On May 5, 2011, Lam Research Corporation issued a press release announcing that it proposes to offer \$700 million of convertible senior notes, subject to market conditions and other factors. The notes would be issued in two tranches of \$350 million each due in May 2016 and May 2018, respectively, and are to be offered and sold to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended. The notes will be convertible, upon certain conditions, into cash up to their principal amount and, with respect to any excess conversion value, shares of Lam Research common stock. The interest rate, conversion rate, offering price and other terms will be determined by negotiations between the Company and the initial purchasers of the notes. The Company also expects to grant to the initial purchasers the right to purchase an additional \$50 million of each tranche to cover over-allotments.

Lam Research intends to use a portion of the net proceeds of the offering to repurchase, depending on interest, a minimum of 1,000,000 shares of its common stock and may repurchase up to 3,000,000 shares of its common stock from purchasers of notes in privately negotiated transactions effected through one of the initial purchasers. The price of the common stock repurchased in such transactions is expected to equal the closing price per share of its common stock on the date of the pricing of the offering. This activity could affect the market price of Lam Research common stock concurrently with, or shortly after, the pricing of the notes, and could result in a higher effective conversion price for the notes. In addition, following this offering Lam Research may from time to time repurchase additional shares of common stock pursuant to its stock repurchase program. Any future repurchases could affect the market price of Lam Research common stock or the notes.

In connection with the pricing of the notes, Lam Research also expects to enter into privately negotiated convertible note hedge and warrant transactions with the initial purchasers or their respective affiliates. Lam Research intends to use a portion of the net proceeds to pay the cost of the convertible note hedge transactions (taking into account the proceeds to it from the sale of the warrants). If the initial purchasers exercise their over-allotment option with respect to a series of notes, Lam Research expects to sell additional warrants and use a portion of the net proceeds from the sale of the additional notes, together with the proceeds from the additional warrants, to enter into additional convertible note hedge transactions.

The balance of the net proceeds of the offering is intended to be used for general corporate purposes, including working capital and capital expenditures. Lam Research may also use a portion of the net proceeds to acquire other businesses, products or technologies, or to repurchase shares of our common stock under our share repurchase program. The Company does not have agreements or commitments for any specific acquisition at this time.

A copy of the press release is filed as Exhibit 99.1 to this Current Report on Form 8-K.
