## MEDIA GENERAL, INC.

## NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(Unaudited)

1. The accompanying unaudited consolidated condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting, and with applicable quarterly reporting regulations of the Securities and Exchange Commission. They do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements and, accordingly, should be read in conjunction with the consolidated financial statements and related footnotes included in the Company's Annual Report on Form 10-K for the year ended December 26, 2010.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of interim financial information have been included.

2. Inventories are principally raw materials (primarily newsprint).

3. The Company recorded non-cash income tax expense of \$5.3 million in the first quarter of 2011 compared to \$6 million in the equivalent quarter of 2010. The Company's tax provision for both periods had an unusual relationship to its pretax loss due primarily to the existence of a full deferred tax asset valuation allowance at the beginning of both periods. This circumstance generally results in a zero net tax provision since the income tax expense or benefit that would otherwise be recognized is offset by the change to the valuation allowance. The tax expense recorded in the first quarter of 2011 reflects the accrual of approximately \$6.2 million (\$7.5 million for the first quarter of 2010) of valuation allowance in connection with the tax amortization of the Company's indefinite-lived intangible assets that is not available to offset existing deferred tax assets (termed a naked credit), partially offset by \$900 thousand of tax benefit related to the intraperiod allocation items in Other Comprehensive Income. The Company expects the naked credit to result in approximately \$25 million of non-cash income tax expense for the full-year 2011; other tax adjustments and intraperiod tax allocations that are difficult to forecast may also affect the remainder of 2011. A full discussion of the naked credit issue is contained in Note 2 of Item 8 of the Company's Form 10-K for the year ended December 26, 2010.

4. In the first quarter of 2010, the Company established a new financing structure; the Company simultaneously amended and extended its bank term loan facility and issued senior notes. As a result, the Company immediately expensed previously deferred debt issuance costs of \$1.8 million. The senior notes mature in 2017 and have a face value of \$300 million, an interest rate of 11.75%, and were issued at a price equal to 97.69% of face value. The proceeds from the senior notes were used to pay down existing bank credit facilities. The bank term loan facility matures in March 2013 and bears an interest rate of LIBOR plus a margin ranging from 3.75% to 4.75% (4.25% at December 26, 2010), determined by the Company's leverage ratio, as defined in the agreement. The new agreements have two main financial covenants: a leverage ratio and a fixed charge coverage ratio which involve debt levels, interest expense as well as other fixed charges, and a rolling four-quarter calculation of EBITDA, all as defined in the agreements. The Company pledged its cash and assets as well as the stock of its subsidiaries as collateral; the Company's subsidiaries also guaranteed the debt of the parent company. Additionally, there are restrictions on the Company's ability to pay dividends (none are allowed in 2011), make capital expenditures above certain levels, repurchase its stock, and engage in certain other transactions such as making investments or entering into capital leases above certain levels. The bank term loan facility contains an annual requirement to use excess cash flow (as defined within the agreement) to repay debt. Other factors, such as the sale of assets, may also result in a mandatory prepayment of a portion of the bank term loan. The Company was in compliance with all covenants and expects that the covenants will continue to be met. The following table includes information about the carrying values and estimated fair values of the Company's financial instruments at March 27, 2011 and December 26, 2010:

(In thousands)	March 27, 2011		December 26, 2010	
	Carrying Amounts	Fair Value	Carrying Amounts	Fair Value

Revolving credit facility (\$65 million available at 3/27/11)				

**Table of Contents**

Trading securities held by the Supplemental 401(k) plan are carried at fair value and are determined by reference to quoted market prices. The fair value of the bank term loan debt in the chart above was estimated using discounted cash flow analyses and an estimate of the Company's bank borrowing rate (by reference to publicly traded debt rates as of March 27, 2011) for similar types of borrowings. As of March 27, 2011, the fair value of the 11.75% Senior Notes was valued at the most recent trade prior to the end of the quarter which approximates fair value. Under the fair value hierarchy, the Company's trading securities fall under Level 1 (quoted prices in active markets), and its long term debt falls under Level 2 (other observable inputs).

In the third quarter of 2006, the Company entered into several interest rate swaps as part of an overall strategy to manage interest cost and risk associated with variable interest rates, primarily short-term changes in LIBOR. These interest rate swaps are cash flow hedges with original notional amounts totaling \$300 million; swaps with notional amounts of \$100 million matured in 2009, and the remaining swaps with nominal amounts of \$200 million will mature in the third quarter of 2011. Changes in cash flows of the interest rate swaps offset changes in the interest payments on the Company's Facilities. These swaps effectively convert a portion of the Company's variable rate bank debt to fixed rate debt with a weighted average interest rate approximating 9.9% at March 27, 2011.

The interest rate swaps are carried at fair value based on the present value of the estimated cash flows the Company would have received or paid to terminate the swaps; the Company applied a discount rate that is predicated on quoted LIBOR prices and current market spreads for unsecured borrowings. In the first quarter of 2011 and 2010, \$2.7 and \$2.8 million, respectively, were reclassified from Other Comprehensive Income (OCI) into interest expense on the Consolidated Condensed Statement of Operations as the effective portion of the interest rate swap. The pretax change deferred in OCI for the first quarter of 2011 and 2010 was \$2.5 million and \$1.1 million, respectively. All amounts paid for these swaps are recorded in the Consolidated Condensed Statement of Operations during the accounting period in the Interest expense line. Based on the estimated current and future fair values of the swaps as of March 27, 2011, the Company estimates that \$4.4 million will be reclassified from OCI to interest expense in the next twelve months. Interest rate swaps are recorded on the Consolidated Condensed Balance Sheets in the line item Accrued expenses and other liabilities. Under the fair value hierarchy, the Company's interest rate swaps fall under Level 2 (other observable inputs). The following table includes information about the Company's derivative instruments as of March 27, 2011:

(In thousands)	Fair Value as of March 27, 2011	Fair Value as of December 26, 2010
Fair value of interest rate swaps	\$ 4,435	\$ 6,891

**Table of Contents**

5. The Company is a diversified communications company located primarily in the southeastern United States. The Company is comprised of five geographic segments (Virginia/Tennessee, Florida, Mid-South, North Carolina and Ohio/Rhode Island) along with a sixth segment that includes interactive advertising services and certain other operations.

Revenues for the geographic markets include revenues from 18 network-affiliated television stations, three metropolitan newspapers, and 20 community newspapers, all of which have associated websites. Additionally, more than 200 specialty publications that include weekly newspapers and niche publications and the websites that are associated with many of these specialty publications are included in revenues for the geographic markets. Revenues for the sixth segment, Advertising Services & Other, are generated by three interactive advertising services companies and certain other operations including a broadcast equipment and studio design company.

**Table of Contents**

Management measures segment performance based on profit or loss from operations before interest, income taxes, and acquisition related amortization. Amortization of acquired intangibles is not allocated to individual segments although the intangible assets themselves are included in identifiable assets for each segment. Intercompany sales are primarily accounted for as if the sales were at current market prices and are eliminated in the consolidated financial statements. Certain promotion in the Company's newspapers and television stations on behalf of its online shopping portal are recognized based on incremental cost. The Company's reportable segments are managed separately, largely based on geographic market considerations and a desire to provide services to customers regardless of media platform. In certain instances, operations have been aggregated based on similar economic characteristics. The following table sets forth the Company's current and prior-year financial performance by segment:

<i>(In thousands)</i>	Revenues	Depreciation and Amortization	Operating Profit (Loss)

6. The Consolidated Condensed Statements of Operations include amortization expense from amortizing intangible assets of \$1.5 million for the first quarter of 2011 and \$1.6 million for the first quarter of 2010. Currently, intangibles amortization expense is projected to be approximately \$6 million in total for 2011, decreasing to \$3 million in 2012, and to \$2 million from 2013 to 2015.

The Company has recorded pretax cumulative impairment losses related to goodwill approximating \$685 million through March 27, 2011, with no impairment losses recorded in the first quarter of 2011. The following table shows the gross carrying amount and accumulated amortization for intangible assets as of March 27, 2011 and December 26, 2010:

	December 26, 2010		Change	March 27, 2011

11. The Company's subsidiaries guarantee the debt securities of the parent company. The Company's subsidiaries are 100% owned except for the Company's Supplemental 401(k) Plan; all subsidiaries except those in the non-guarantor column (which includes the Supplemental 401(k) Plan) currently guarantee the debt securities. These guarantees are full and unconditional and on a joint and several basis. The following financial information presents condensed consolidating balance sheets, statements of operations, and statements of cash flows for the parent company, the Guarantor Subsidiaries, and the Non-Guarantor Subsidiaries, together with certain eliminations.

**Table of Contents****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****OVERVIEW**

The Company is a diversified communications company located primarily in the southeastern United States. It is committed to providing high-quality local content in growth markets over multiple platforms, to continually developing new products and services tailored to customer preferences, and to sustaining traditional media audience viewership while simultaneously seeking an increased share of digital audiences. The Company is comprised of five geographic segments (Virginia/Tennessee, Florida, Mid-South (which includes South Carolina, Georgia, Alabama, and Mississippi), North Carolina, and Ohio/Rhode Island) along with a sixth segment that includes interactive advertising services and certain other operations. Regardless of the delivery platform, content/information is the product that the Company provides and the individual markets take their cues about customers' distinct needs and preferences. The Company's strategic objective is to drive profitable growth across multiple platforms by engaging with communities on their own terms and by developing effective marketing opportunities that connect advertisers to the prospective customers they want to reach.

The Company's fiscal year ends on the last Sunday in December.

**RESULTS OF OPERATIONS**

The Company recorded a net loss of \$26 million (\$1.15 per share) in the first quarter of 2011, as compared to a net loss of \$17 million (\$0.75 per share) in the equivalent prior-year quarter. The driving force behind the reduced quarter-over-quarter performance was a 6.2% decline in revenues which brought about a 54% decrease in operating results. In this odd-numbered year, the absence of the Olympics and significantly reduced Political advertising both contributed to the revenue shortfall. In an effort to mitigate some of the revenue weakness, year-over-year operating expenses were held to a 2% increase. Additionally, lower interest and income tax expense helped to soften the year-over-year decrease in results. The 16% drop in interest expense was more than fully attributable to the current-year absence of \$5.5 million of 2010 expense (due to debt issuance costs that were expensed immediately upon entering into the new financing structure in February 2010). Income taxes in 2011 decreased \$.7 million as compared to the first quarter of 2010, chiefly the result of a decrease in the non-cash "naked credit" that is described in the Income Taxes section of this Form 10-Q.

**SEGMENT RESULTS****Revenues**

Revenues are grouped primarily into five major categories: Local, National, Political, Classified, and Subscription/Content/Circulation (which includes newspaper circulation, broadcast retransmission revenues, and interactive subscription and content revenues). The following chart summarizes the total consolidated period-over-period changes in these select revenue categories:

**Change in Market Revenue by Major Category****2011 versus 2010**

<i>(In thousands)</i>	<b>First Quarter Change</b>	
	<b>Amount</b>	<b>Percent</b>
Local	\$ (1,286)	(1.6)
National	(4,612)	(15.6)
Political	(792)	(80.8)
Classified	(3,220)	(15.2)
Subs/Content/Circulation	(486)	(2.2)

---

## **Table of Contents**

As illustrated in the chart above, revenues were down across all major categories. Several factors contributed, including the current-year absence of more than \$7.5 million in 2010 Olympic revenues and nearly \$1 million in prior-year Super Bowl revenues (which aired on FOX this year), the Easter holiday falling in the second quarter of this year as opposed to being a first-quarter event last year, and a general weakness in advertising at the Company's Publishing operations. As anticipated in this off-election year, Political advertising was down significantly. Classified continued to struggle in most, but not all, locations and generally had a greater impact in those markets with a heavier mix of newspapers. While not yet a major revenue category, the Company's Printing and Distribution operations have continued to expand and are becoming an increasingly important contributor to overall revenues as evidenced by a 24% revenue increase in the first quarter over the equivalent prior-year period.

Revenues in the Virginia/Tennessee Market fell 7.1% in the first quarter of 2011 compared to 2010. Advertising dollars were down across all categories. Classified advertising fell by 17% and was the largest contributor to the year-over-year decline as legal advertising rates and real estate advertising dropped significantly. National and Local advertising fell a combined 4.5% in 2011 from the equivalent quarter last year. Revenues from third-party Printing and Distribution grew 5.4%.

Revenues in the Florida Market decreased 11%, in the first quarter of the year compared to the first three months of 2010. The continued soft housing market and high unemployment in the Tampa Bay area remained a factor in the Market's overall revenue performance. National advertising fell farthest, with Local and Classified advertising equally contributing the remainder of the shortfall. National advertising (down 31%) and Local advertising (down 4.2%) were impacted by non-recurring revenues from the 2010 Olympics, while Classified advertising (down 17%) dropped most significantly in the real estate and employment categories.

Running counter to trend, revenues in the Mid-South Market increased 4.7% in the first quarter of 2011 compared to 2010. Despite the virtual absence of Political advertising and a small decrease in Classified advertising, total advertising revenues rose more than 5% due to solid growth in Local and National advertising (both up approximately 5%). Also contributing to this Market's revenue success was a 54% increase in Printing and Distribution revenues and growth of nearly 7% in Subscription/Content/Circulation revenues.

Revenues in the North Carolina Market declined 6.3% in the first quarter of 2011 from the first three months of 2010. Advertising revenues were down across all categories, with Local, National and Classified contributing almost equally to the overall decline. The lack of Olympic spending and general weakness across many advertising categories (such as financial, medical, and telecommunications) led to reduced current-year revenues in the Market. Printing and Distribution revenues in the North Carolina Market more than doubled with the addition of USA TODAY as a local third-party customer.

Revenues in the Ohio/Rhode Island Market decreased 9.2% in the first quarter of 2011 compared to the first quarter of 2010. This is the Company's only geographic market which does not include any newspapers and is therefore less influenced by Classified advertising, but more affected by the ebb and flow of Political and Olympic revenues in corresponding odd and even-numbered years. Both of this Market's television stations are NBC affiliates and, consequently, reaped the full benefit of 2010 Winter Olympics advertising. Without that revenue source in 2011, National and Local advertising revenues were down 18% and 8.4%, respectively, from last year's first quarter. Local advertising suffered decreases in most key categories, while the decline in National advertising stemmed primarily from lower automotive and furniture advertising.

## **Operating Expenses**

The Company manages its expenses consistent with the revenue opportunities in each market. Over the past few years in particular, the Company has reacted to the challenging advertising environment by aggressively reducing costs across all markets and modifying its operations to achieve greater efficiencies. While the Company continues to keep a sharp eye on costs, its current structure is much more in line with existing economic conditions. Total operating costs rose just 2% in the first quarter of 2011 due to higher employee compensation

---

**Table of Contents**

costs and newsprint expense. After several years of virtually freezing all merit increases as well as suspending the Company's 401(k) match, effective with 2011's first quarter, the Company reinstated modest merit increases, incentive-based compensation, and a 401(k) match of up to 2% of the employee's salary. As a result, employee compensation was up 3.5%, but was held somewhat in check due to lower employee counts and open positions at many locations. Higher newsprint expense, which was partially offset by additional savings derived through efforts to manage discretionary spending and by lower depreciation costs (due primarily to lower capital expenditures), was responsible for the remainder of the overall operating cost increase. Newsprint costs rose 31% in 2011 from the prior year due almost fully to a 30% increase in average cost per ton.

Operating expenses in the Virginia/Tennessee Market increased 1.3% in the first quarter of 2011 from the first quarter of 2010. Higher newsprint costs were primarily responsible for the increase, partially offset by a decrease in depreciation and amortization (due to lower capital expenditures).

Operating expenses in the Florida Market were up less than 1% in the first quarter of 2011 from the equivalent year-ago period of 2010. Similar to the Virginia/Tennessee Market, higher newsprint costs were the driving factor behind the Market's modest quarter-over-quarter rise in operating costs.

Operating expenses in the Mid-South Market rose 3% in the first quarter of 2011 from the same period in 2010. Higher employee compensation expense was responsible for the Market's increased costs due not only to merit increases, but also to the Market's strong performance which resulted in higher sales incentives and commissions. This market has a heavier mix of broadcast stations than newspapers and therefore, while newsprint costs were up, they were less significant to the overall cost increase than in other markets.

Operating expenses in the North Carolina Market decreased 1.1% in the first quarter compared to 2010's first quarter. As was the case with other Markets, a drop in depreciation and amortization expense (down 9.4% due to lower capital expenditures in recent years) aided the Market's overall results. Despite merit increases, employee compensation costs were also down moderately due to lower employee counts in the first quarter of 2011 compared to the first three months of 2010.

Operating expenses in the Ohio/Rhode Island Market were down 3.1% in the quarter relative to the first three months of 2010 due to small savings in depreciation and amortization expense (due to lower capital expenditures) as well as reduced bad debt expense.

**Advertising Services & Other**

Advertising Services & Other (ASO) primarily includes:

Blockdot - an adver gaming business that also produces other forms of branded entertainment;

*DealTaker.com* - an online social shopping portal;

NetInformer - a provider of mobile advertising and marketing services;

Production Services - comprised primarily of a provider of broadcast equipment and studio design services.

Revenues in ASO decreased 19% in the first quarter of 2011 from the first quarter of 2010. The Market's revenue decline was fully attributable to a \$1.5 million (52%) reduction in revenues at *DealTaker.com* that was driven by a significant change in the way Internet search results are delivered by Google that affected many e-commerce businesses. As a result of this change, the Company performed an interim impairment test on this reporting unit in the first quarter of 2011 by comparing the carrying value of the reporting unit to its estimated fair value, with no impairment indicated. The quarter-over-quarter decrease in Market revenue was partially offset by a \$.2 million (12%) increase in revenues in the Production Services operations due to higher sales and installation of broadcast equipment and, to a lesser degree, to revenue improvement at NetInformer.

**Table of Contents**

Operating expenses were up 5.5% in the first quarter of 2011 primarily due to higher project costs associated with Company's mobile business. In addition, higher cost of goods sold was in line with the previously mentioned increased volume of work at Production Services.

**Operating Profit (Loss)**

The following chart shows the change in operating profit by market; the period-over-period movement in market operating profit was driven by the underlying fluctuations in revenue and expense as detailed in the previous discussion.

**Change in Market Operating Profits****2011 versus 2010**

<i>(In thousands)</i>	<b>Q1 Change</b>	
	<b>Amount</b>	<b>Percent</b>
Virginia/Tennessee	\$ (3,772)	(49.6)
Florida	(4,380)	NM
Mid-South	736	15.7
North Carolina	(984)	(88.6)
Ohio/Rhode Island	(937)	(28.6)
Adv. Services & Other	(1,454)	NM
Eliminations	2	(100.0)
<b>Total</b>	<b>\$ (10,789)</b>	<b>(55.7)</b>

NM is not meaningful

Excluding the Mid-South, all Markets fell short of achieving their 2010 first quarter operating profit performance, with the Florida and Virginia/Tennessee Markets falling furthest from the prior-year mark. Lower revenues (due to 2011 being an odd-numbered year and to a general weakness in advertising at the Company's Publishing operations) drove the year-over-year deficits for all markets that were down. The Mid-South Market was the exception to this rule as it produced revenue growth of 4.7% which allowed for a 16% improvement in its operating profit.

**INTEREST EXPENSE**

Interest expense decreased from \$20 million in the first quarter of 2010 to \$17 million in the first three months of 2011. The prior-year quarter included \$5.5 million in debt issuance costs that were immediately expensed when the Company entered into its new financing structure in February of 2010. Absent this write-off, interest expense would have increased in 2011 due to an increase in the average rate from 8.1% in the first quarter of 2010 to 9.9% in the first quarter of 2011, slightly offset by the effect of a \$40 million reduction in average debt outstanding.

In the third quarter of 2006, the Company entered into three interest rate swaps (where it pays a fixed rate and receives a floating rate) to manage interest cost and cash flows associated with variable interest rates, primarily short-term changes in LIBOR, not to trade such instruments for profit or loss. The interest rate swaps are carried at fair value based on a discounted cash flow analysis (predicated on quoted LIBOR prices) of the estimated amounts the Company would have received or paid to terminate the swaps. These interest rate swaps were cash flow hedges with notional amounts originally totaling \$300 million; swaps with notional amounts of \$100 million matured in 2009, and the remaining \$200 million will mature in the third quarter of 2011. Changes in cash flows of the interest rate swaps offset changes in the interest payments on the Company's bank debt. These swaps effectively convert the Company's variable rate bank debt to fixed rate debt with a weighted average interest rate approximating 9.9% at March 27, 2011.

**INCOME TAXES**

The Company recorded non-cash income tax expense of \$5.3 million in the first quarter of 2011 compared to \$6 million in the equivalent quarter of 2010. The Company's tax provision for both periods had an unusual relationship to its pretax loss due primarily to the existence of a full deferred tax asset valuation allowance at the beginning of both periods. This circumstance generally results in a zero net tax provision since the income tax expense or benefit that would otherwise be recognized is offset by the change to the valuation allowance. The tax expense recorded in the first quarter of 2011 reflects the accrual of approximately \$6.2 million of valuation allowance in connection with the tax amortization of the Company's indefinite-lived intangible assets that is not available to offset existing deferred tax assets (termed a "naked credit"), partially offset by \$900 thousand of tax benefit related to the intraperiod allocation items in Other Comprehensive Income. The Company expects the naked credit to result in approximately \$25 million of non-cash income tax expense for the full-year 2011 (as previously discussed in the Company's Form 10-K for the year ended December 26, 2010). Other tax adjustments and intraperiod tax allocations that are difficult to forecast may also affect the remainder of 2011.

**LIQUIDITY**

Net cash used by operating activities in the first quarter of 2011 was \$3.9 million compared to \$21 million provided by operations in the year-ago period. Cash collected from year-end accounts receivable and the drawdown of cash investments allowed the Company to make interest payments of \$18 million on its senior notes, make capital expenditures of \$4.6 million and to reduce debt by almost \$5 million.

As of March 27, 2011, the Company had in place with its syndicate of banks a \$364 million term loan that was fully drawn and a revolving credit facility with availability of \$65 million and no outstanding balance. Also outstanding were 11.75% Senior Notes with a par value of \$300 million that were sold at a discount and carried on the balance sheet at quarter end at \$294 million. The bank credit facilities mature in March 2013 and bear an interest rate of LIBOR plus a margin (4.25% at the close of the first quarter) based on the Company's leverage ratio, as defined in the agreement. The agreements have two main financial covenants; a leverage ratio and a fixed charge coverage ratio. The leverage ratio is calculated as the ratio of total indebtedness (including long-term debt, short-term capitalized leases, guarantees and letters of credit) to earnings before interest, depreciation and amortization (EBITDA) (rolling four quarters of EBITDA adjusted for severance and other shutdown charges, non-operating non-cash charges less gains and broadcast film rights amortization charges less cash payments). The fixed charge coverage ratio is calculated as the ratio of EBITDA (as defined for the leverage ratio) less capital expenditures to fixed charge expense (cash interest paid plus cash taxes paid).

The Company pledged its cash and assets as well as the stock of its subsidiaries as collateral; the Company's subsidiaries also guarantee the debt of the parent company. Additionally, there are restrictions on the Company's ability to pay dividends (none are allowed in 2011), make capital expenditures above certain levels, repurchase its stock, make pension plan contributions above the amount required to maintain 80% plan funding, and engage in certain other transactions such as making investments or entering into capital leases above certain preset levels. The Company was in compliance with all covenants as of March 27, 2011 and fully expects that the covenants in both the near and long-term will continue to be met.

**OUTLOOK**

Despite the challenges that an off-election year presents, the Company's Broadcast stations are expected to benefit from issue advertising and early presidential campaign spending in the latter part of 2011. However, the Company's Publishing properties are expected to experience the effects of lower revenues and higher newsprint costs during the remainder of 2011. While the Company remains optimistic about its Broadcast properties and digital offerings in the second half of the year, profits in all of the Company's Markets are expected to be down in the second quarter of 2011 compared to the equivalent prior-year quarter. The Company will remain vigilant in managing expenses in light of the current revenue opportunity in each particular

market. The Company recognizes the ongoing changes surrounding the packaging and delivery of news and information and continues to create new revenue streams, cultivate burgeoning projects and pursue new business and new customer prospects. The Company's execution of this strategy is illustrated by its success growing Local online revenues and in its relationships with both emerging and established online brands (such as Yahoo!, Zillow and Monster). Additionally, the Company routinely evaluates the potential of its existing properties and makes changes such as at Blockdot, which is in the process of transforming itself from essentially a job shop that produces games and other forms of branded entertainment to a full-service digital media agency.

*Certain statements in this quarterly report that are not historical facts are forward-looking statements, as that term is defined by the federal securities laws. Forward-looking statements include statements related to accounting estimates and assumptions, expectations regarding interest expense, the economic recovery, the impact of cost-containment measures, staff reductions, income taxes, the Internet, debt compliance, general advertising levels and political advertising levels. Forward-looking statements, including those which use words such as the Company believes, anticipates, expects, estimates, intends, projects, plans, may and similar words, are made as of the date of this filing and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in or implied by such statements.*

*Some significant factors that could affect actual results include: the effect of the economy on advertising demand, interest rates, the availability and pricing of newsprint, changes to accounting standards, changes in consumer preferences for programming, health care cost trends and regulations, a natural disaster, the level of political advertising, and regulatory rulings and laws.*

**Item 3. Quantitative and Qualitative Disclosure About Market Risk.**

The Company's Annual Report on Form 10-K for the year ended December 26, 2010, details our disclosures about market risk. As of March 27, 2011, there have been no material changes in the Company's market risk from December 26, 2010.

**Item 4. Controls and Procedures**

The Company's management, including the chief executive officer and chief financial officer, performed an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the chief executive officer and chief financial officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. There have been no significant changes in the Company's internal controls or in other factors that are reasonably likely to adversely affect internal control subsequent to the date of this evaluation.
