Exhibit 99.1 Press Release

**Trina Solar Announces Updates to Second Quarter 2011**

**Guidance**

Changzhou, China August 2, 2011 Trina Solar Limited (TSL) ( Trina Solar or the Company ), a leading integrated manufacturer of solar photovoltaic products from the production of ingots, wafers and cells to the assembly of PV modules, announced today the following updates to its previous guidance made for the quarter ended June 30, 2011.

Despite achieving record shipment volumes in the second quarter, the Company estimates its solar module shipments in the second quarter to be in the range of 395 MW to 397 MW, compared to the Company s previous guidance of 430 MW to 450 MW for the reasons discussed below.

Additionally, for the second quarter 2011, the Company estimates:

Gross margin relating to its in-house wafer production and module production to be approximately 20%, compared to the Company s previous guidance of in the mid 20s in percentage terms; and

Overall gross margin to be in the range of 17.0% to 17.5%, compared to the Company s previous guidance of in the low 20s in percentage terms.

While shipment volumes in the second quarter were our highest ever, sales were adversely impacted by extended slower demand and high industry inventory due in part to recently issued regulatory revisions and reduction in solar subsidies in Italy, said Mr. Jifan Gao, Chairman and CEO of Trina Solar. We expect a significant improvement in production costs and an increase in shipment volumes in the third quarter.

As market demand conditions improve, we see a significant increase in pipeline from our distributors and large commercial and utility segment customers across Europe and North America. We are in discussions with new and existing customers to secure a growing number of sales agreements that cover the second half of the year.

Based on its demand outlook for the second half of 2011, the Company reiterates its expectation for its full year 2011 PV module shipments of between 1.75 GW to 1.80 GW, representing an increase of 65.6% to 70.3% from 2010.

As these selected estimated results are subject to finalization of the Company s financial closing procedures, the Company s actual results may differ from its current estimates.

The Company will review its second quarter 2011 results via conference call at 8:00 a.m. ET on August 23, 2011. Conference call details may be found via separate announcement, available at the Investors Center of the company s website at <http://www.trinasolar.com>.

**About Trina Solar Limited**

Trina Solar Limited (NYSE: TSL) is a leading manufacturer of high quality modules and has a long history as a solar PV pioneer since it was founded in 1997 as a system installation company. Trina Solar is one of the few PV manufacturers that have developed a vertically integrated business model from the production of monocrystalline and multicrystalline ingots, wafers and cells to the assembly of high quality modules. Trina Solar s products provide reliable and environmentally-friendly electric power for a growing variety of end-user applications worldwide.
