Caution Regarding Forward Looking Statements

This Annual Report on Form 10-K contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts included or incorporated by reference in this annual report on Form 10-K, including without limitation, statements regarding our future financial position, business strategy, budgets, projected revenues, projected costs and plans and objective of management for future operations, are forward-looking statements. Forward-looking statements generally can be identified by the use of forward-looking terminology such as may, will, expects, intends, plans, projects, estimates, anticipates, or negative thereof or any variation there on or similar terminology or expressions.

We have based these forward-looking statements on our current expectations and projections about future events. These forward-looking statements are not guarantees and are subject to known and unknown risks, uncertainties and assumptions about us that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Important factors which could materially affect our results and our future performance include, without limitation, our ability to purchase defaulted consumer receivables at appropriate prices, changes in government regulations that affect our ability to collect sufficient amounts on our defaulted consumer receivables, our ability to employ and retain qualified employees, changes in the credit or capital markets, changes in interest rates, deterioration in economic conditions, negative press regarding the debt collection industry which may have a negative impact on a debtor s willingness to pay the debt we acquire, and statements of assumption underlying any of the foregoing, as well as other factors set forth under Item 1A. Risk Factors beginning on page 13 of this report and Item 7 Management s Discussions and Analysis of Financial Condition and Results of Operation below.

All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the foregoing. Except as required by law, we assume no duty to update or revise any forward-looking statements.

Table of Contents

Part I

Item 1. Business.
Overview

Asta Funding, Inc., together with its wholly owned significant operating subsidiaries Palisades Collection LLC, Palisades Acquisition XVI, LLC (Palisades XVI), VATIV Recovery Solutions LLC (VATIV) and other subsidiaries, not all wholly owned, and not considered material (the Company), is engaged in the business of purchasing, and managing for its own account:

Primary charged-off receivables consisting of accounts that have been written-off by the originators and may have been previously serviced by collection agencies;

Semi-performing receivables consisting of accounts where the debtor is currently making partial or irregular monthly payments, but the accounts may have been written-off by the originators;

Performing receivables consisting of accounts where the debtor is making regular monthly payments that may or may not have been delinquent in the past; and

Distressed consumer receivables consisting of the unpaid debts of individuals to banks, finance companies and other credit and service providers.

A large portion of our distressed consumer receivables are MasterCard®, Visa® and other credit card accounts which were charged-off by the issuers or providers for non-payment. We acquire these and other consumer receivable portfolios at substantial discounts to their face values. The discounts are based on the characteristics (issuer, account size, debtor location and age of debt) of the underlying accounts of each portfolio.

We operate solely in the United States in one reportable business segment.

Prior to purchasing a portfolio, we perform a qualitative and quantitative analysis of the underlying receivables and calculate the purchase price which is intended to offer us an adequate return on our investment after servicing expenses. After purchasing a portfolio, we actively monitor performance and review and adjust our collection and servicing strategies accordingly.

We purchase receivables from credit grantors and others through privately negotiated direct sales, brokered transactions and auctions in which sellers of receivables seek bids from several pre-qualified debt purchasers. We fund portfolios through a combination of internally generated cash flow and bank debt, if needed.

Our objective is to maximize our return on investment in acquired consumer receivable portfolios. As a result, before acquiring a portfolio, we analyze the portfolio to determine how to best maximize collections in a cost efficient manner and decide whether to use our internal servicing and collection department, third-party collection agencies, attorneys, or a combination of all three options.

When we outsource the servicing of receivables, our management typically determines the appropriate third-party collection agencies and attorneys based on the type of receivables purchased. Once a group of receivables is sent to third-party collection agencies and attorneys, our management actively monitors and reviews the third-party collection agencies and attorneys performance on an ongoing basis. Based on portfolio performance considerations, our management will either (i) move certain receivables from one third-party collection agency or attorney to another or to our internal servicing department if it anticipates that this will result in an increase in collections, or (ii) sell portions of the portfolio accounts. Our internal collection unit, which currently employs approximately 40 collection-related staff, including senior management, assists us in benchmarking our third-party collection agencies and attorneys, and provides us with greater flexibility for servicing a percentage of our consumer receivable portfolios in-house.

Edgar Filing: ASTA FUNDING INC - Form 10-K

We are a Delaware corporation whose principal executive offices are located at 210 Sylvan Avenue, Englewood Cliffs, New Jersey 07632. We were incorporated in New Jersey on July 7, 1994 and were reincorporated in Delaware on October 12, 1995, as the result of a merger with a Delaware corporation. We were formed as an

Table of Contents

affiliate of Asta Group, Incorporated (the Family Entity), an entity owned by Arthur Stern, our Chairman Emeritus, Gary Stern, our Chairman, President and Chief Executive Officer, and other members of the Stern family, to purchase, at a small discount to face value, retail installment sales contracts secured by motor vehicles. We became a public company in November 1995. In 1999, we capitalized on our management's more than 40 years of experience and expertise in acquiring and managing consumer receivable portfolios for the Family Entity. As a result, we ceased purchasing automobile contracts and, with the assistance and financial support of the Family Entity and a partner, purchased our first significant consumer receivable portfolio. Since then, the Family Entity ceased acquiring consumer receivable portfolios and, accordingly, does not compete with the Company.

Industry Overview

The purchasing, servicing and collection of charged-off, semi-performing and performing consumer receivables is an industry that is driven by:

increasing levels of consumer debt;

increasing defaults of the underlying receivables; and

increasing utilization of third-party providers to collect such receivables.

Strategy

Although we are in a challenging economic period and an enhanced regulatory environment, our primary objective remains to utilize our management's experience and expertise by identifying, evaluating, pricing and acquiring consumer receivable portfolios and maximizing collections of such receivables in a cost efficient manner. Our strategies include:

managing the collection and servicing of our consumer receivable portfolios, including outsourcing a majority of those activities to maintain low fixed overhead;

selling accounts on an opportunistic basis, generally when our efforts have been exhausted through traditional collecting methods, or when we can capitalize on pricing during times when we feel the pricing environment is high; and

capitalizing on our strategic relationships to identify and acquire consumer receivable portfolios as pricing, financing and conditions permit.

Because our purchases of new portfolios of consumer receivables has been reduced, we expect to see a corresponding reduction in finance income in future quarters and future years, to the extent we have not replaced our receivables acquired for liquidation. Instead, we focused on reducing our debt and being highly disciplined in our portfolio purchases. We continue to review potential portfolio acquisitions regularly and will buy at a price that we believe will yield our desired rate of return.

We believe that, given our management's experience and expertise, along with the fragmented yet growing market in which we operate, as we implement this short-term strategy, we will be in position to again grow our business when economic conditions stabilize.

Consumer Receivables Business

Receivables Purchase Program

We purchase bulk receivable portfolios that include charged-off receivables, semi-performing receivables and performing receivables. These receivables consist primarily of MasterCard(R), Visa(R) and private label credit card accounts, among other types of receivables.

Edgar Filing: ASTA FUNDING INC - Form 10-K

In the past we have acquired, directly and indirectly, through the consumer receivable portfolios that we acquire, secured consumer asset portfolios, consisting primarily of receivables secured by automobiles.

Table of Contents

We identify potential portfolio acquisitions on an ongoing basis through:

our relationships with industry participants, financial institutions, collection agencies, investors and our financing sources;

brokers who specialize in the sale of consumer receivable portfolios; and

other sources.

Historically, the purchase prices of the consumer receivable portfolios we have acquired have ranged from less than \$100,000 to approximately \$15,000,000; however, we acquired one group of portfolios in March 2007 for \$300 million (the Portfolio Purchase). As a part of our strategy to acquire consumer receivable portfolios, we have, from time to time, entered into, and may continue to enter into, participation and profit sharing agreements with our sources of financing and our third-party collection agencies and attorneys. These arrangements may take the form of a joint bid with one of our third-party collection agencies, collection attorneys, or financing sources that assist in the acquisition of a portfolio. This joint bid provides us with more favorable non-recourse financing terms or a discounted servicing commission. Current participation agreements include an approximate 50% sharing arrangement after we have recouped 100% of the cost of the portfolio purchase plus the cost of funds.

We utilize our relationships with brokers, third-party collection agencies and attorneys, and sellers of portfolios to locate portfolios for purchase. Our senior management is responsible for:

coordinating due diligence, including, in some cases, on-site visits to the seller's office;

stratifying and analyzing the portfolio characteristics;

valuing the portfolio;

preparing bid proposals;

negotiating pricing and terms;

negotiating and executing a purchase contract;

closing the purchase; and

coordinating the receipt of account documentation for the acquired portfolios.

The seller or broker typically supplies us with either a sample listing or the actual portfolio being sold, through an electronic form of media. We analyze each consumer receivable portfolio to determine if it meets our purchasing criteria. We may then prepare a bid or negotiate a purchase price. If a purchase is completed, management monitors the portfolio's performance and uses this information in determining future buying criteria including pricing. An integral part of the acquisition process is the oversight by our Investment Committee. This committee, established in January 2008, must review and approve all investments above \$1 million in value. Voting criteria are more stringent as the size of the investment increases. The current members of the committee are the Chairman Emeritus, the Chief Executive Officer, the Chief Financial Officer, and the Senior Vice President. As the Chairman Emeritus and Chief Executive Officer are related family members, at least one other

Edgar Filing: ASTA FUNDING INC - Form 10-K

officer must approve transactions.

After determining that an investment should yield an adequate return on our acquisition cost after servicing fees, including court costs, we use a variety of qualitative and quantitative factors to calculate the estimated cash flows. The following variables are analyzed and factored into our original estimates:

the number of collection agencies previously attempting to collect the receivables in the portfolio;

the average balance of the receivables;

the age of the receivables (as older receivables might be more difficult to collect or might be less cost effective);

past history of performance of similar assets as we purchase portfolios of similar assets, we believe we have built significant history on how these receivables will liquidate and cash flow;

Table of Contents

number of months since charge-off;

payments made since charge-off;

the credit originator and their credit guidelines;

the locations of the debtors as there are states with better regulatory environments, better collection histories, and that are better suited to attempt to collect in and ultimately we have better predictability of the liquidations and the expected cash flows all of which factor into our cash flow analysis;

financial wherewithal of the seller;

jobs or property of the debtors within portfolios this is of particular importance. Debtors with jobs or property are more likely to repay their obligation and conversely, debtors without jobs or property are less likely to repay their obligation; and

the ability to obtain customer statements from the original issuer.

We obtain and utilize, as appropriate, input including, but not limited to, monthly collection projections and liquidation rates from our third party collection agencies and attorneys, as further evidentiary matter, to assist us in developing collection strategies and in modeling the expected cash flows for a given portfolio.

Once a receivable portfolio has been identified for potential purchase, we prepare various analyses based on extracting customer level data from external sources, other than the issuer, to analyze the potential collectability of the portfolio. We also analyze the portfolio by comparing it to similar portfolios previously acquired by us. In addition, we perform qualitative analyses of other matters affecting the value of portfolios, including a review of the delinquency, charge off, placement and recovery policies of the originator as well as the collection authority granted by the originator to any third-party collection agencies, and, if possible, by reviewing their recovery efforts on the particular portfolio. After these evaluations are completed, members of our senior management discuss the findings, decide whether to make the purchase and finalize the price at which we are willing to purchase the portfolio.

We purchase most of our consumer receivable portfolios directly from originators and other sellers including, from time to time, our third-party collection agencies and attorneys, through (i) privately negotiated direct sales, and (ii) through auction-type sales in which sellers of receivables seek bids from several pre-qualified debt purchasers. We also, from time to time, use the services of brokers for sourcing consumer receivable portfolios. We consider a variety of factors in determining whether potential seller may be a source of receivables, a variety of factors are considered. Sellers must demonstrate that they have:

adequate internal controls to detect fraud;

the ability to provide post-sale support; and

the capacity to honor put-back and return warranty requests.

Generally, our portfolio purchase agreements provide that we can return certain accounts to the seller within a specified time period. However, in some transactions, we may acquire a portfolio with few, if any, rights to return accounts to the seller. After acquiring a portfolio, we conduct a detailed analysis to determine which accounts in the portfolio should be returned to the seller. Although the terms of each portfolio purchase agreement differ, examples of accounts that may be returned to the seller include:

debts paid prior to the cutoff date;

debts in which the consumer filed bankruptcy prior to the cutoff date;

debts in which the consumer was deceased prior to cutoff date; and

fraudulent accounts.

We have determined that all accounts returned to sellers for fiscal years 2011 and 2010 are immaterial. Our purchase agreements generally do not contain any provision for a limitation on the number of accounts that we may return to the seller.

Table of Contents

We generally use third parties to determine bankrupt and deceased accounts, allowing us to focus our resources on portfolio collections. Under a typical portfolio purchase agreement, the seller refunds the portion of the purchase price attributable to the returned accounts or delivers replacement receivables to us. Occasionally, we will acquire a well-seasoned or older portfolio at a reduced price from a seller that is unable to meet all of our purchasing criteria. When we acquire such portfolios, the purchase price is further discounted beyond the typical discounts we receive on the portfolios we purchase.

VATIV, our wholly-owned subsidiary located in Houston, Texas, provides bankruptcy account servicing. VATIV provides us with internal experience and proprietary systems in support of servicing our own bankruptcy accounts, while also affording us the opportunity to enter new markets for acquisitions in the bankruptcy account field.

Receivable Servicing

Our objective is to maximize our return on investment on acquired consumer receivable portfolios. As a result, before acquiring a portfolio, we analyze the portfolio to determine how to best maximize collections in a cost efficient manner and decide whether to use a third-party collection agency or an attorney.

Therefore, if we are successful in acquiring the portfolio, we can promptly process the receivables that were purchased and commence the collection process. Unlike collection agencies that typically have only a specified period of time to recover a receivable, as the portfolio owner, we have significantly more flexibility and can establish payment programs.

We presently outsource a significant amount of our receivable servicing to third-party collection agencies and attorneys. Our senior management typically determines the appropriate third-party collection agency and attorney based on the type of receivables purchased. Once a group of receivables is sent to a third-party collection agency or attorney, our management actively monitors and reviews the third-party collection agency's and attorney's performance on an ongoing basis. Our management receives detailed analyses, including collection activity and portfolio performance, from our internal servicing departments for the purpose of evaluating the results of the efforts of the third-party collection agencies and attorneys. Based on portfolio performance guidelines, our management will reassign certain receivables from one third-party collection agency or attorney to another if we believe such change will enhance collections.

At September 30, 2011, approximately 29% of our portfolios were serviced by seven collection organizations. We have servicing agreements in place with these five collection organizations as well as all other third-party collection agencies and attorneys. These servicing agreements cover standard contingency fees and servicing of the accounts.

Operations

The Operations servicing division consists of the Collection department, Media Department, Disputes Department, Correspondence Department, and Accounting and Finance Department:

Collections Department

The Collection Department is responsible for making and receiving contact with and from consumers for the purpose of collecting upon the accounts contained in our consumer receivables portfolios. Collection efforts are specific to accounts that are not yet being serviced by our network of external agencies and attorneys. The Collection Department uses a friendly, customer service approach to collect on receivables and utilizes collection software, a dialer and telephone system to accomplish this goal. Each collector is responsible for:

Initiating outbound collection calls and handling incoming calls from the consumer. If a call is received for an account that has already been outsourced to a servicer the collector relays the corresponding contact information and directs the customer to call the servicer directly.

Identifying the debt and iterating the benefits of paying the obligation.

Table of Contents

Working with the customer to develop acceptable means of satisfying the obligation. The Collection Department (and our third party network of servicers) has the ability to tailor repayment plans that accommodate the situation of the obligor by considering components including their monthly budgets and employment status.

Offering (if necessary and based upon the individual situation) an obligor a discount on the overall obligation. Additionally, the Collection Department utilizes a series of collection letters, late payment reminders and settlement offers that are sent out at specific intervals or at the request of a member of the Collection Department.

If the Collection Department cannot contact the customer by either telephone or mail, the account is skip-traced through an automated process to obtain the most recent contact information for the debtor. This process employs usage of data supplied by a variety of third party databases. Once new contact information is obtained, the account is referred back to the Collections Department and collection activity is once again initiated.

Other members of the collection department are responsible for:

Coordinating customer inquiries and assisting the collection agencies in their processes, if needed.

Handling the repurchase process of ineligible accounts received from a seller that may be included in a purchased portfolio.

Working with buyers during the transition period and post-sale process.

Handling any issues that may arise once a purchased receivable portfolio is sold.

Reading incoming correspondence for accounts that are currently assigned to the Collection Department, ensuring the account is handled properly, taking the initial action required and forwarding to a collector and/or manager for follow up action.

Media Department

The Media Department is responsible for obtaining, storing and tracking the requests and subsequent receipt of back-up documents associated with specific accounts. These documents are usually requested from the seller for the purpose of substantiating the debt if the debt is disputed by the consumer or is requested by our legal department. The Media Department is also responsible for reconciling and tracking expenses incurred by the aforementioned document requests and ensuring invoices are handled timely and any errors are corrected.

Disputes Department

The function of the dispute department is to handle any dispute received via mail, electronically or telephone. Once a dispute is communicated, the account is removed from the credit reports or reported as a dispute, investigated and resolution is obtained.

Correspondence Department

The purpose of the correspondence department is to review, document and scan into the system any written correspondence related to our accounts. The employees are also required to notify the Department to whom the correspondence is intended to ensure appropriate action is initiated.

Accounting and Finance Department

In addition to the customary accounting activities, the Accounting and Finance Department is responsible for:

Edgar Filing: ASTA FUNDING INC - Form 10-K

Making daily deposits of debtor payments.

Posting payments to debtors' accounts.

Providing senior management with daily, weekly and monthly receivable activity and performance reports.

Table of Contents

Accounting and finance employees assist collection department employees in handling customer disputes relating to payment and balance information and handling the repurchase requests from companies to whom we have sold receivables.

Additionally, the Accounting Department reviews the results of the collection of consumer receivable portfolios that are being serviced by third party collection agencies and attorneys.

Collections Represented by Account Sales

Certain collections represent account sales to other debt buyers to help maximize revenue and cash flows. We believe that our business model of not having a large number of collectors, coupled with a legal strategy which is focused on attempting to perfect liens and judgments against obligors, allows us the flexibility to sell accounts at prices that are attractive to us, and, just as important, sell the less desirable accounts within our collection portfolios. There are many factors that contribute to the decision as to which receivable to sell and which to service, including:

the age of the receivable;

the status of the receivable whether paying or non-paying; and

the selling price.

Net collections represented by account sales for the fiscal years ended September 30, 2011, 2010 and 2009 were \$0.4 million, \$3.5 million and \$8.7 million, respectively. Collections represented by account sales as a percentage of total collections for the fiscal years ended September 30, 2011, 2010 and 2009 were 0.5%, 3.4% and 5.9%, respectively.

Marketing

We have established relationships with brokers who market consumer receivable portfolios from banks, finance companies and other credit providers. In addition, we subscribe to national publications that list consumer receivable portfolios for sale. We also directly contact banks, finance companies or other credit providers to solicit consumer receivables for sale.

Competition

Our business of purchasing distressed consumer receivables is highly competitive and fragmented, and we expect that competition from new and existing companies will continue. We compete with:

other purchasers of consumer receivables, including third-party collection companies; and

other financial services companies who purchase consumer receivables.

Some of our competitors are larger and more established and may have substantially greater financial, technological, personnel and other resources than we have, including greater access to the credit and capital markets. We believe that no individual competitor or group of competitors has a dominant presence in the market.

We compete in the marketplace for consumer receivable portfolios based on many factors, including:

purchase price;

Edgar Filing: ASTA FUNDING INC - Form 10-K

representations, warranties and indemnities requested;

timeliness of purchase decisions; and

reputation.

Our strategy is designed to capitalize on the market's lack of a dominant industry player. We believe that our management's experience and expertise in identifying, evaluating, pricing and acquiring consumer receivable portfolios and managing collections, coupled with our strategic alliances with third-party collection agencies and

Table of Contents

attorneys and our sources of financing, give us a competitive advantage. However, we cannot assure that we will be able to compete successfully against current or future competitors or that competition will not increase in the future.

Seasonality and Trends

Our management believes that our operations may, to some extent, be affected by high delinquency rates and by lower recoveries on consumer receivables acquired for liquidation during or shortly following certain holiday periods and during the summer months. In addition, on occasion the market for acquiring distressed receivables does become more competitive thereby possibly diminishing our ability to acquire such distressed receivables at attractive prices in such periods.

Technology

We believe that a high degree of automation is necessary to enable us to grow and successfully compete with other finance companies. Accordingly, we continually look to upgrade our technology systems to support the servicing and recovery of consumer receivables acquired for liquidation. Our telecommunications and technology systems allow us to quickly and accurately process large amounts of data necessary to purchase and service consumer receivable portfolios. In addition, we rely on the information technology of our third-party collection agencies and attorneys and periodically review their systems to ensure that they can adequately service the consumer receivable portfolios outsourced to them.

Due to our desire to increase productivity through automation, we periodically review our systems for possible upgrades and enhancements.

Government Regulation

On July 21, 2010, the Dodd-Frank Wall Street Reform and Protection Act, or the Dodd-Frank Act, was enacted. There are significant corporate governance and executive compensation-related provisions in the Dodd-Frank Act that require the SEC to adopt additional rules and regulations in these areas such as corporate governance, say on pay and proxy access. Our efforts to comply with these requirements have resulted in, and are likely to continue to result in, an increase in expenses and a diversion of management's time from other business activities. We are subject to changing rules and regulations of federal and state governments as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board (PCAOB), the SEC and the NASDAQ Global Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations and requirements in response to laws enacted by Congress.

Our business is subject to extensive federal and state regulations. The relationship of a consumer and a creditor is extensively regulated by federal, state and local laws, rules, regulations and ordinances. These laws include, but are not limited to, the following federal statutes and regulations: the Federal Truth-In-Lending Act, the Fair Credit Billing Act, the Equal Credit Opportunity Act and the Fair Credit Reporting Act, as well as comparable statutes in states where consumers reside and/or where creditors are located. Among other things, the laws and regulations applicable to various creditors impose disclosure requirements regarding the advertisement, application, establishment and operation of credit card accounts or other types of credit programs. Federal law requires a creditor to disclose to consumers, among other things, the interest rates, fees, grace periods and balance calculation methods associated with their accounts. In addition, consumers are entitled to have payments and credits applied to their accounts promptly, to receive prescribed notices and to request that billing errors be resolved promptly. In addition, some laws prohibit certain discriminatory practices in connection with the extension of credit. Further, state laws may limit the interest rate and the fees that a creditor may impose on consumers. Failure by the creditors to comply with applicable laws could create claims and rights of offset by consumers that would reduce or eliminate their obligations, which could have a material adverse effect on our operations. Pursuant to agreements under which we purchase receivables, we are typically indemnified against losses resulting from the failure of the creditor to have complied with applicable laws relating to the receivables prior to our purchase of such receivables.

Table of Contents

Certain laws, including the laws described above, may limit our ability to collect amounts owing with respect to the receivables regardless of any act or omission on our part. For example, under the Federal Fair Credit Billing Act, a credit card issuer may be subject to certain claims and defenses arising out of certain transactions in which a credit card is used if the consumer has made a good faith attempt to obtain satisfactory resolution of a problem relative to the transaction and, except in cases where there is a specified relationship between the person honoring the card and the credit card issuer, the amount of the initial transaction exceeds \$50 and the place where the initial transaction occurred was in the same state as the consumer's billing address or within 100 miles of that address. Accordingly, as a purchaser of defaulted receivables, we may purchase receivables subject to valid defenses on the part of the consumer. Other laws provide that, in certain instances, consumers cannot be held liable for, or their liability is limited to \$50 with respect to, charges to the credit card credit account that were a result of an unauthorized use of the credit card account. No assurances can be given that certain of the receivables were not established as a result of unauthorized use of a credit card account, and, accordingly, the amount of such receivables may not be collectible by us.

Several federal, state and local laws, rules, regulations and ordinances, including, but not limited to, the Federal Fair Debt Collection Practices Act (FDCPA) and the Federal Trade Commission Act and comparable state statutes, regulate consumer debt collection activity. Although, for a variety of reasons, we may not be specifically subject to the FDCPA or certain state statutes that govern third-party debt collectors, it is our policy to comply with applicable laws in our collection activities. Additionally, our third-party collection agencies and attorneys may be subject to these laws. To the extent that some or all of these laws apply to our collection activities or our third-party collection agencies and attorneys collection activities, failure to comply with such laws could have a material adverse effect on us.

In order to comply with the foregoing laws and regulations, we provide a comprehensive development training program for our new collection/dispute department representatives and on-going training for all collection/dispute department associates. All collection and dispute representatives are tested annually on their knowledge of the FDCPA and other applicable laws. Account representatives not achieving our minimum standards are required to complete a FDCPA review session and are then retested. In addition, annual supplemental instruction in the FDCPA and collection techniques is provided to all our account representatives.

The enactment of the Dodd-Frank Wall Act will subject us to substantial additional federal regulation, and we cannot predict the effect of such regulation on our business, results of operations, cash flows or financial condition.

Additional laws or amendments to existing laws, may be enacted that could impose additional restrictions on the servicing and collection of receivables. Such new laws or amendments may adversely affect our ability to collect the receivables.

We currently hold a number of licenses issued under applicable consumer credit laws or other licensing statutes or regulations. Certain of our current licenses, and any licenses that we may be required to obtain in the future, may be subject to periodic renewal provisions and/or other requirements. Our inability to renew licenses or to take any other required action with respect to such licenses could have a material adverse effect upon our results of operation and financial condition.

Employees

As of September 30, 2011, we had 87 full-time employees. We are not a party to any collective bargaining agreements.

Our web address is www.astafunding.com. Copies of our Form 10-Ks, 10-Qs, 8-Ks, amendments thereto, and other SEC reports are available on our website as soon as reasonably practical after filing electronically with the SEC. No part of the Asta Funding, Inc. web site is incorporated by reference into this report.

Table of Contents**Item 1A. Risk Factors.****Note Regarding Risk Factors**

You should carefully consider the risk factors below in evaluating the Company. In addition to the following risks, there may also be risks that we do not yet know of or that we currently think are immaterial that may also impair our business operations. If any of the following risks occur, our business, results of operation or financial condition could be adversely affected, the trading price of our common stock could decline and stockholders might lose all or part of their investment. The risk factors presented below are those which we currently consider material. However, they are not the only risks facing our company. Additional risks not presently known to us, or which we currently consider immaterial, may also adversely affect us. There may be risks that a particular investor views differently from us, and our analysis might be wrong. If any of the risks that we face actually occur, our business, financial condition and operating results could be materially adversely affected and could differ materially from any possible results suggested by any forward-looking statements that we have made or might make. In such case, the trading price of our common stock could decline, and you could lose part or all of your investment. Except as required by law, we expressly disclaim any obligation to update or revise any forward-looking statements.

The enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act will subject us to substantial additional federal regulation, and we cannot predict the effect of such regulation on our business, results of operations, cash flows or financial condition.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Protection Act, or the Dodd-Frank Act, was enacted. There are significant corporate governance and executive compensation-related provisions in the Dodd-Frank Act that require the SEC to adopt additional rules and regulations in these areas such as say on pay and proxy access. Our efforts to comply with these requirements have resulted in, and are likely to continue to result in, an increase in expenses and a diversion of management's time from other business activities.

Given the uncertainty associated with the manner in which the provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies and through regulations, the full extent of the impact such requirements will have on our operations is unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of business activities, require changes to certain business practices, or otherwise adversely affect our business. In particular, the potential impact of the Dodd-Frank Act on our operations and activities, both currently and prospectively, include, among others:

increased cost of operations due to greater regulatory oversight, supervision and compliance with consumer debt issuance and collection practices; and

the limitation on the ability to expand consumer product and service offerings due to anticipated stricter consumer protection laws and regulations.

The Act establishes a Bureau of Consumer Financial Protection (the Bureau) that will assume broad regulatory powers over debt collectors and virtually all other covered persons who have any connection to consumer financial products or services. The Bureau will have exclusive rule-making authority with respect to all significant federal statutes that impact the collection industry, including the FDCPA, the Fair Credit Reporting Act (FCRA), and others. This means, for example, that the Bureau will have the ability to pass rules and regulations that interpret any of the provisions of the FDCPA, potentially impacting all facets of the collection channel. Federal agencies, including the Bureau, will have been given significant discretion in drafting the rules and regulations that will implement the Dodd-Frank Act. Consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for some time. In addition, this legislation mandated multiple studies and reports for Congress, which could result in additional legislative or regulatory action.

At this time, it is not possible or practical to attempt to provide a comprehensive analysis of how these new laws and regulations will impact debt collectors. The full extent of that impact probably will not be known for a year or more, when the Bureau begins to implement regulations.

Table of Contents

We expect that we will be required to invest significant management attention and resources to evaluate and make any changes to our policies and procedures necessary to comply with new statutory and regulatory requirements under the Dodd-Frank Act, which may negatively impact results of operations and financial condition. We cannot predict the requirements of the regulations ultimately adopted under the Dodd-Frank Act, the affect such regulations will have on financial markets generally, or on our businesses specifically, the additional costs associated with compliance with such regulations, or any changes to our operations that may be necessary to comply with the Dodd-Frank Act, any of which could have a material adverse affect on our business, results of operations, cash flows or financial condition.

Government regulations may limit our ability to recover and enforce the collection of our receivables.

Federal, state and local laws, rules, regulations and ordinances may limit our ability to recover and enforce our rights with respect to the receivables acquired by us. These laws include, but are not limited to, the following federal statutes and regulations promulgated thereunder and comparable statutes in states where consumers reside and/or where creditors are located:

The Fair Debt Collection Practices Act;

The Federal Trade Commission Act;

The Truth-In-Lending Act;

The Fair Credit Billing Act;

The Equal Credit Opportunity Act;

The Fair Credit Reporting Act;

The Financial Privacy Rule;

The Safeguards Rule;

Telephone Consumer Protection Act;

Health Insurance Portability and Accountability Act (HIPAA)/Health Information Technology for Economical and Clinical Health Act (HITECH);

U.S. Bankruptcy Code; and

Credit Card Accountability Responsibility and Disclosure Act of 2009.

We may be precluded from collecting receivables we purchase where the creditor or other previous owner or third-party collection agency or attorney failed to comply with applicable law in originating or servicing such acquired receivables. Laws relating to the collection of consumer

Edgar Filing: ASTA FUNDING INC - Form 10-K

debt also directly apply to our business. Our failure to comply with any laws applicable to us, including state licensing laws, could limit our ability to recover on receivables and could subject us to fines and penalties, which could reduce our earnings and result in a default under our loan arrangements. In addition, our third-party collection agencies and attorneys may be subject to these and other laws and their failure to comply with such laws could also materially adversely affect our finance income and earnings.

Additional laws or amendments to existing laws may be enacted that could impose additional restrictions on the servicing and collection of receivables. Such new laws or amendments may adversely affect the ability to collect on our receivables, which could also adversely affect our finance income and earnings.

Because our receivables are generally originated and serviced pursuant to a variety of federal, state laws and/or local laws by a variety of entities and may involve consumers in all 50 states, the District of Columbia, Puerto Rico and South America, there can be no assurance that all originating and servicing entities have, at all times, been in substantial compliance with applicable law. Additionally, there can be no assurance that we or our third-party collection agencies and attorneys have been or will continue to be at all times in substantial compliance with applicable law. Failure to comply with applicable law could materially adversely affect our ability to collect our receivables and could subject us to increased costs, fines and penalties.

Table of Contents

We are subject to changing rules and regulations of federal and state government as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and the NASDAQ Global Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations and requirements in response to laws enacted by Congress.

The current economic environment has slowed our ability to collect from our debtors.

The recent worldwide financial turmoil has adversely affected all businesses, including our own. The current collection environment is particularly challenging as a result of factors in the economy over which we have no control. These factors include:

a slowdown in the economy;

severe problems in the credit and housing markets;

higher unemployment;

reductions in consumer spending;

changes in the underwriting criteria by originators; and

changes in laws and regulations governing consumer lending and the related collections.

Our litigation strategy is highly dependent on our ability to locate debtors with jobs and/or homes. We believe that our debtors are straining to pay their obligations owed to us. Higher unemployment rates particularly impact our debtors' ability to pay obligations and our ability to get wage executions as a source of payment. Problems in the credit markets and lower home values have reduced the ability of our debtors to secure financing through second mortgages and home equity lines to pay obligations owed to us. A continuation of the current problems in the credit and housing markets and general slowdown in the economy will continue to adversely affect the effectiveness of our litigation strategy, and the value of our portfolios and our financial performance.

We may not be able to purchase consumer receivable portfolios at favorable prices or on sufficiently favorable terms or at all.

Our success depends upon the continued availability of consumer receivable portfolios that meet our purchasing criteria and our ability to identify and finance the purchases of such portfolios. The availability of consumer receivable portfolios at favorable prices and on terms acceptable to us depends on a number of factors outside of our control, including:

the growth in consumer debt;

the volume of consumer receivable portfolios available for sale;

availability of financing to fund purchases;

Edgar Filing: ASTA FUNDING INC - Form 10-K

Competitive factors affecting potential purchasers and sellers of consumer receivable portfolios; and

possible future changes in the bankruptcy laws, state laws and homestead acts which could make it more difficult for us to collect.

Our future operating results will be negatively impacted as we have not replaced our defaulted consumer receivables at historic levels.

To operate profitably, we must continually acquire, or invest in a sufficient level of various types of receivables to generate continued revenue. Our investing activities during fiscal year 2011, 2010, 2009 and the last three quarters of fiscal year 2008 slowed dramatically. As the economic environment deteriorated, we felt that pricing of portfolios had not fallen enough to offset the decline in ultimate collections. Accordingly, our investment in portfolios was \$7.5 million in 2011, and \$8.0 million in 2010 compared to \$19.6 million in 2009 and

Table of Contents

\$49.9 million in 2008. In part, this led to our net cash collections in fiscal 2011 decreasing \$20.7 million, or 20.3% from \$101.9 million in fiscal year 2010 to \$81.2 million in fiscal year 2010. Further, of those collections, \$34.3 million for fiscal years 2011 and 2010 came from zero basis portfolios (whose carrying value has been reduced to zero). Our decreased level of buying new portfolios during 2011, 2010, and 2009 will likely result in future reduced net cash collections in 2012 and slow the growth of our future revenues and operating results. Furthermore, we cannot predict how our ability to identify and invest in receivables, and evaluate the quality of those receivables, would be affected if there is a shift in consumer lending practices whether caused by changes in regulations or by a sustained economic downturn.

Our inability to invest in sufficient quantities of receivables portfolios may necessitate workforce reductions, which may harm our business.

Because fixed costs, such as personnel costs, constitute a significant portion of our overhead, we may be required to reduce the number of employees if we do not continually invest in receivables. Reducing the number of employees can adversely affect our business and lead to:

lower employee morale, higher employee attrition rates, and fewer experienced employees;

disruptions in our operations and loss of efficiency in collection functions;

Excess costs associated with unused space in collection facilities; and

Further reliance on our third party collection agencies and attorneys.

The market for acquiring consumer receivable portfolios has become more competitive, thereby diminishing our ability to invest in such receivables at prices we are willing to pay.

The receivables management industry is highly fragmented and competitive, consisting of thousands of consumer and commercial agencies. We face bidding competition in our acquisition of defaulted consumer receivables and we also compete on the basis of our reputation, industry experience and performance. Some of our current competitors may have more resources than us and may be willing to purchase consumer receivable portfolios at higher prices, thus driving up the price of portfolios and potentially reducing the profit generated from any such portfolios that we purchase.

We have risks associated with our purchase of \$6.9 billion in face value of receivables purchased for \$300 million in March 2007 (the Portfolio Purchase) which has not met our expectations and has and may continue to adversely impact our financial position and results of operations.

Since the inception of the Portfolio Purchase financed by the Receivables Financing Agreement, the Receivables Financing Agreement has been modified five times due to collections not meeting our expectations. The shortfall has been exacerbated by the general economic downturn. We have recorded impairments on the Portfolio Purchase totaling \$97.2 million (\$30.3 million in fiscal year 2008, \$53.9 million in fiscal year 2009, and \$13.0 million in fiscal year 2010). The Portfolio Purchase was transferred to the cost recovery method effective with the third quarter of fiscal year 2008, as collections became increasingly more difficult to predict. Accordingly, we will recognize finance income only after we recover the carrying value of the asset. As a result, finance income since April 1, 2008 has been and will continue to be negatively impacted. There can be no assurance as to when or if the current carrying value will be recovered. Further, all cash collections from the Portfolio Purchase are used to repay our loan under the Receivable Financing Agreement.

There is no assurance that we will realize the full value of the deferred tax asset.

Although the carry forward period for income taxes is up to twenty years, such allowance period is outside a reasonable period to forecast full realization of the deferred tax asset. We continually monitor forecast information to ensure the valuation allowance is appropriate.

Table of Contents

With portfolios classified under the interest method, our projections of future cash flows from our portfolio purchases may prove to be inaccurate, which could result in reduced revenues or the recording of impairment charges if we do not achieve the collections forecasted by our model.

We use qualitative and quantitative analyses to project future cash flows from our portfolio purchases. There can be no assurance, however, that we will be able to achieve the collections forecasted by our analysis. If we are not able to achieve these levels of forecasted collections, our revenues will be reduced and we may be required to record additional impairment charges, which would result in a reduction of our earnings. We recorded impairment charges of \$0.7 million, \$13.0 million, and \$183.5 million, for the years ended September 30, 2011, 2010 and 2009, respectively.

As the mix of our portfolios has shifted to the cost recovery method, there is a negative impact on finance income as no finance income is recognized on the cost recovery portfolios until the carrying value has been recovered.

Historically, we have utilized the interest method to recognize finance income on most consumer receivable portfolios purchased. As the economy has impacted our business, making collections more unpredictable, we have transferred portfolios from the interest method to the cost recovery method, which delays the recognition of finance income until the carrying value has been fully recovered.

We use estimates for recognizing finance income on a portion of our consumer receivables acquired for liquidation and our earnings would be reduced if actual results are less than estimated.

We utilize the interest method of revenue recognition for determining a portion of our finance income recognized, which is based on projected cash flows that may prove to be less than anticipated and could lead to reductions in revenue or additional impairment charges under Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) 310, Receivables – Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310). Static pools of accounts are established. These pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost and is accounted for as a single unit for the recognition of income, principal payments and loss provision. Once a static pool is established for a quarter, individual receivable accounts are not added to the pool (unless replaced by the seller) or removed from the pool (unless sold or returned to the seller). ASC 310 requires that the excess of the contractual cash flows over expected cash flows not be recognized as an adjustment of revenue or expense or on the balance sheet. ASC 310 initially freezes the internal rate of return (IRR), estimated when the accounts receivable are purchased, as the basis for subsequent impairment testing. Significant increases in actual, or expected future cash flows may be recognized prospectively through an upward adjustment of the IRR over a portfolio's remaining life. Any increase to the IRR then becomes the new benchmark for impairment testing. Rather than lowering the estimated IRR, if the collection estimates are not received or projected to be received, the carrying value of a pool would be written down to maintain the then current IRR. Any reduction in our earnings resulting from such a write down could materially adversely affect our stock price.

We may not be able to collect sufficient amounts on our consumer receivable portfolios to recover the costs associated with the purchase of those portfolios and to fund our operations.

We acquire and collect on consumer receivable portfolios that contain charged-off, semi-performing, and performing receivables. In order to operate profitably over the long term, we must continually purchase and collect on a sufficient volume of receivables to generate revenue that exceeds our purchase costs. For accounts that are charged-off or semi-performing, the originators or interim owners of the receivables generally have:

made numerous attempts to collect on these obligations, often using both their in-house collection staff and third-party collection agencies; and

subsequently deemed these obligations as uncollectible

These receivable portfolios are purchased at significant discounts to the amount the consumers owe. These receivables are difficult to collect and actual recoveries may vary and be less than the amount expected. In addition, our collections may worsen in a weak economic cycle. We may not recover amounts in excess of our acquisition and servicing costs.

Table of Contents

Our ability to recover the purchase costs on our portfolios and produce sufficient returns can be negatively impacted by the quality of the purchased receivables. In the normal course of our portfolio acquisitions, some receivables may be included in the portfolios that fail to conform to certain terms of the purchase agreements and we may seek to return these receivables to the seller for payment or replacement receivables. However, we cannot guarantee that any of such sellers will be able to meet their payment obligations to us. Accounts that we are unable to return to sellers may yield no return. If cash flows from operations are less than anticipated as a result of our inability to collect sufficient amounts on our receivables, our ability to satisfy our debt obligations, purchase new portfolios, and achieve future growth and profitability may be materially adversely affected.

We are subject to competition for the purchase of consumer receivable portfolios which could result in an increase in prices of such portfolios.

We compete with other purchasers of consumer receivable portfolios, with third-party collection agencies and with financial services companies that manage their own consumer receivable portfolios. We compete on the basis of price, reputation, industry experience and performance. Some of our competitors have greater capital, personnel and other resources than we have. The possible entry of new competitors, including competitors that historically have focused on the acquisition of different asset types, and the expected increase in competition from current market participants may reduce our access to consumer receivable portfolios. Aggressive pricing by our competitors has raised the price of consumer receivable portfolios above levels that we are willing to pay, which could reduce the number of consumer receivable portfolios suitable for us to purchase or if purchased by us, reduce the profits, if any, generated by such portfolios. If we are unable to purchase receivable portfolios at favorable prices or at all, our finance income and earnings could be materially reduced.

We are dependent upon third parties who we do not control to service a significant portion of our consumer receivable portfolios. The loss of certain servicers could have a material adverse effect on our financial position and results of operation.

Although we utilize our in-house collection staff to initiate the collection process to collect some of our receivables, we outsource a majority of our receivable servicing. As a result, we are dependent upon the efforts of our third-party collection agencies and attorneys to service and collect our consumer receivables. Any failure by our third-party collection agencies and attorneys to adequately perform collection services for us or remit such collections to us could materially reduce our finance income and our profitability. In addition, our finance income and profitability could be materially adversely affected if we are not able to secure replacement third party collection agencies and attorneys and redirect payments from the debtors to our new third party collection agencies and attorneys promptly in the event our agreements with our third-party collection agencies and attorneys are terminated, our third-party collection agencies and attorneys fail to adequately perform their obligations or if our relationships with such third-party collection agencies and attorneys adversely change. As 29% of our portfolios are serviced by seven organizations, we are dependent on their efforts to maximize collections.

The current economic environment has had adverse effects on others in this industry; certain third parties providing services to us have filed for bankruptcy protection which has delayed collections.

The current economic environment has had an adverse effect on others in our industry. One of our five most significant third party servicers filed a bankruptcy proceeding and has been liquidated. We took decisive steps in that servicer's bankruptcy proceeding and with permission of the bankruptcy courts, moved all debtor accounts to other third party collection units with whom we have experience. In addition, a law firm used by the bankrupt servicer also filed for bankruptcy and has closed. All accounts serviced by this law firm have also been transferred to similar third party collection units. The replacement servicer will be taking steps to arrange for the substitution of counsel. Notwithstanding the efforts of various parties to provide for a conversion of the accounts to the new servicer, these occurrences could interfere with the collection of certain of our portfolios including the ability of judgment debtors to identify the Company, the new servicer or new counsel as the parties to whom they should direct payments. In addition, representatives of creditors of the insolvent servicer and troubled law firm may endeavor to assert claims with respect to portfolios that those companies relinquish including our accounts.

Table of Contents

We rely on our third party collectors to comply with all rules and regulations and maintain proper internal controls over their accounting and operations.

Because the receivables were originated and serviced pursuant to a variety of federal and/or state laws by a variety of entities and involved consumers in all 50 states, the District of Columbia, and Puerto Rico., there can be no assurance that all original servicing entities have, at all times, been in substantial compliance with applicable law. Additionally, there can be no assurance that we or our third-party collection agencies and attorneys have been or will continue to be at all times in substantial compliance with applicable law. The failure to comply with applicable law and not maintain proper controls in their accounting and operations could materially adversely affect our ability to collect our receivables and could subject us to increased costs, fines and penalties.

We may rely on third parties to locate, identify and evaluate consumer receivable portfolios available for purchase.

We may rely on third parties, including brokers and third-party collection agencies and attorneys, to identify consumer receivable portfolios and, in some instances, to assist us in our evaluation and purchase of these portfolios. As a result, if such third parties fail to identify receivable portfolios or if our relationships with such third parties are not maintained, our ability to identify and purchase additional receivable portfolios could be materially adversely affected. In addition, if we, or such parties, fail to correctly or adequately evaluate the value or collectability of these consumer receivable portfolios, we may pay too much for such portfolios and suffer an impairment, which would negatively impact our earnings.

Our collections may decrease if bankruptcy filings increase.

During times of economic recession, the amount of defaulted consumer receivables generally increases, which contributes to an increase in the amount of personal bankruptcy filings. Under certain bankruptcy filings, a debtor's assets are sold to repay credit originators, but since the defaulted consumer receivables we purchase are generally unsecured, we may not be able to collect on those receivables. We cannot assure you that our collection experience would not decline with an increase in bankruptcy filings. If our actual collection experience with respect to a defaulted consumer receivable portfolio is significantly lower than we projected when we purchased the portfolio, our earnings could be negatively affected.

The loss of any of our executive officers may adversely affect our operations and our ability to successfully acquire receivable portfolios.

Gary Stern, our Chairman, President and Chief Executive Officer, Robert J. Michel, our Chief Financial Officer, and Mary Curtin, our Senior Vice President, are responsible for making substantially all management decisions, including determining which portfolios to purchase, the purchase price and other material terms of such portfolio acquisitions. These decisions are instrumental to the success of our business. As of January 2009, Arthur Stern, former Chairman of the board of directors, now Chairman Emeritus, stepped down as an employee of the Company. Mr. Stern continues to serve on the board of directors and consults with our executives. Significant losses of the services of our executive officers or the inability to replace our officers with individuals who have experience in the industry or with the Company could disrupt our operations and adversely affect our ability to successfully acquire receivable portfolios.

The Stern family effectively controls the Company, substantially reducing the influence of our other stockholders.

Members of the Stern family including Arthur Stern, Gary Stern and Barbara Marburger, daughter of Arthur Stern and sister of Gary Stern, trusts or custodial accounts for the benefit of a minor child of Gary Stern, Asta Group, Incorporated, and limited liability companies controlled by Judith R. Feder, niece of Arthur Stern and cousin of Gary Stern, in which Arthur Stern, Alice Stern (wife of Arthur Stern and mother of Gary Stern and Barbara Marburger), Gary Stern and trusts for the benefit of the issue of Arthur Stern and the issue of Gary Stern

Table of Contents

hold all economic interests, own, in the aggregate, approximately 25.7% of our outstanding shares of common stock. As a result, the Stern family is able to influence significantly the actions that require stockholder approval, including:

the election of a majority of our directors; and

the approval of mergers, sales of assets or other corporate transactions or matters submitted for stockholder approval.

As a result, our other stockholders may have reduced influence over matters submitted for stockholder approval. In addition, the Stern family's influence could preclude any unsolicited acquisition of us and consequently materially adversely affect the price of our common stock.

Current economic conditions have had a significant impact on our ability to sell accounts.

As part of our historic business model, we have sold accounts on an opportunistic basis. Our ability to sell accounts has been limited in 2011 and 2010 and may be limited in the future. Net collections represented by account sales for 2011 were only \$0.4 million, compared to \$3.5 million and \$8.7 million in 2010 and 2009, respectively. Collections represented by account sales as a percentage of total collections were 0.5% in 2011, compared to 3.4% and 5.9% in 2010 and 2009, respectively. We had launched a sales effort to enhance cash flow and pay debt, particularly from the Portfolio Purchase, but sales have been slower than expected due to a variety of factors, including a slow resale market, similar to the decrease in pricing we are seeing in general, as well as lack of supporting documentation (media) and validation of the Portfolio Purchase accounts.

An unfavorable government review of our tax returns could adversely affect our operating results.

Our tax filings are subject to review or audit by the IRS and state and local taxing authorities. In April 2010, we received notification from the IRS that our 2008 and 2009 federal income tax returns would be audited. This audit is currently in progress. The IRS examinations of our federal tax returns could result in significant proposed adjustments. Although we believe our tax estimates are reasonable, we can provide no assurance that any final determination in an audit will not be materially different than the treatment reflected in our historical income tax provisions and accruals. An assessment of additional taxes as a result of an audit could adversely affect our income tax provision and net income in the period or periods for which that determination is made. In addition, the Company recently signed consent to extend the IRS review period through 2010.

Negative press regarding the debt collection industry may have a negative impact on a debtor's willingness to pay the debt we acquire.

Consumers are exposed to information from a number of sources that may cause them to be more reluctant to pay their debts or to pursue legal actions against us. On-line, print and other media publish stories about the debt collection industry which cite specific examples of abusive collection practices. These stories can lead to the rapid dissemination of the story, adding to the level of exposure to negative publicity about our industry. Various Internet sites are maintained where consumers can list their concerns about the activities of debt collectors and seek guidance from other website posters on how to handle the situation. Advertisements by debt relief attorneys and credit counseling centers are becoming more common, adding to the negative attention given to our industry. As a result of this negative publicity, debtors may be more reluctant to pay their debts or could pursue legal action against us regardless of whether those actions are warranted. These actions could impact our ability to collect on the receivables we acquire and affect our revenues and profitability.

Class action suits and other litigation could divert our management's attention from operating our business and increase our expenses.

Originators, debt purchasers and third-party collection agencies and attorneys in the consumer credit industry are frequently subject to putative class action lawsuits and other litigation. Claims include failure to comply with applicable laws and regulations and improper or deceptive origination and servicing practices. Being a defendant in such class action lawsuits or other litigation could materially adversely affect our results of operations and financial condition.

Table of Contents

We may seek to make acquisitions that prove unsuccessful or strain or divert our resources.

We may seek to grow through acquisitions of related businesses in the financial services sector. Such acquisitions present risks that could materially adversely affect our business and financial performance, including:

the diversion of our management's attention from our everyday business activities;

the assimilation of the operations and personnel of the acquired business;

the contingent and latent risks associated with the past operations of, and other unanticipated problems arising in, the acquired business; and

the need to expand management, administration and operational systems.

If we make such acquisitions we cannot predict whether:

we will be able to successfully integrate the operations of any new businesses into our business;

we will realize any anticipated benefits of completed acquisitions; or

there will be substantial unanticipated costs associated with acquisitions.

In addition, future acquisitions by us may result in:

potentially dilutive issuances of our equity securities;

the incurrence of additional debt; and

the recognition of significant charges for depreciation and impairment charges related to goodwill and other intangible assets.

Our investments in other businesses and entry into new business ventures may adversely affect our operations.

We have and may continue to make investments in companies or commence operations in businesses and industries that are not identical to those with which we have historically been successful. If these investments or arrangements are not successful, our earnings could be materially adversely affected by increased expenses and decreased finance income.

If our technology and phone systems are not operational, our operations could be disrupted and our ability to successfully acquire receivable portfolios and receive collections from debtors could be adversely affected.

Our success depends, in part, on sophisticated telecommunications and computer systems. The temporary loss of our computer or telecommunications systems, through casualty, operating malfunction or service provider failure, could disrupt our operations. In addition, we must record and process significant amounts of data quickly and accurately to properly bid on prospective acquisitions of receivable portfolios

Edgar Filing: ASTA FUNDING INC - Form 10-K

and to access, maintain and expand the databases we use for our collection and monitoring activities. Any failure of our information systems and their backup systems would interrupt our operations. We may not have adequate backup arrangements for all of our operations and we may incur significant losses if an outage occurs. In addition, we rely on third-party collection agencies and attorneys who also may be adversely affected in the event of an outage in which the third-party collection agencies and attorneys do not have adequate backup arrangements. Any interruption in our operations or our third-party collection agencies and attorneys' operations could have an adverse effect on our results of operations and financial condition. However, we are in the process of implementing a disaster recovery program which would mitigate this risk.

Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.

In the ordinary course of our business, we collect and store on our networks sensitive data, including our proprietary business information and personally identifiable information of individual debtors from which we are

Table of Contents

trying to collect. The secure processing, maintenance and transmission of this information is critical to our operations and business strategy. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could disrupt our operations and could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, and regulatory penalties, which may adversely affect our business.

Our organizational documents and Delaware law may make it harder for us to be acquired without the consent and cooperation of our board of directors and management.

Several provisions of our organizational documents and Delaware law may deter or prevent a takeover attempt, including a takeover attempt in which the potential purchaser offers to pay a per share price greater than the current market price of our common stock. Under the terms of our certificate of incorporation, our board of directors has the authority, without further action by the stockholders, to issue shares of preferred stock in one or more series and to fix the rights, preferences, privileges and restrictions thereof. The ability to issue shares of preferred stock could tend to discourage takeover or acquisition proposals not supported by our current board of directors. In addition, we are subject to Section 203 of the Delaware General Corporation Law, which restricts business combinations with some stockholders once the stockholder acquires 15% or more of our common stock.

Future sales of our common stock by members of the Stern Family or other stockholders may depress our stock price.

Sales of a substantial number of shares of our common stock in the public market could cause a decrease in the market price of our common stock. We had 14,639,456 shares of common stock issued and outstanding as of December 7, 2011. Of these shares, 3,748,254 are held by our affiliates and are saleable under Rule 144 of the Securities Act of 1933, as amended, subject to the volume limitations set forth in Rule 144. The remainder of our outstanding shares are freely tradable. In addition, options to purchase approximately 1,294,271 shares of our common stock were outstanding as of September 30, 2011, of which 992,607 were vested. In certain cases, the exercise prices of such options were higher than the current market price of our common stock. We may also issue additional shares in connection with our business and may grant additional stock options or restricted shares to our employees, officers, directors and consultants under our present or future equity compensation plans or we may issue warrants to third parties outside of such plans. As of September 30, 2011, there were 630,203 shares available for such purpose with such shares available under the Equity Compensation Plan and the 2002 Stock Option Plan. If a significant portion of these shares were sold in the public market, the market value of our common stock could be adversely affected.

In the past, the Company's Chairman Emeritus, Arthur Stern and President and Chief Executive Officer, Gary Stern have adopted prearranged stock trading plans in accordance with guidelines specified by Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. While no such plans are in effect at present, significant sales by the Stern family could have an adverse effect on market price for our common stock.

We have the ability to issue preferred shares, warrants, convertible debt and other securities without stockholder approval which could dilute the relative ownership interest of current stockholders and adversely affect our share price.

Future sales of our equity-related securities in the public market, including sales of our common stock pursuant to our shelf-registration statement, could adversely affect the trading price of our common stock and our ability to raise funds in new stock offerings. Our common shares may be subordinate to classes of preferred shares issued in the future in the payment of dividends and other distributions made with respect to common shares, including distributions upon liquidation or dissolution. Our certificate of incorporation permits our board of directors to issue preferred shares without first obtaining stockholder approval. If we issued preferred shares, these additional securities may have dividend or liquidation preferences senior to our common shares. If we issue convertible preferred shares, a subsequent conversion may dilute the current common stockholders' interest. We have similar abilities to issue convertible debt, warrants and other equity securities.

Table of Contents

Climate change and related regulatory responses may impact our business.

Climate change as a result of emissions of greenhouse gases is a significant topic of discussion and may generate federal and other regulatory responses in the near future, including the imposition of a so-called cap and trade system. It is impracticable to predict with any certainty the impact on our business of climate change or the regulatory responses to it, although we recognize that they could be significant. The most direct impact is likely to be an increase in energy costs, which would increase slightly our operating costs, primarily through increased utility and transportation costs. In addition, increased energy costs could impact consumers and their ability to incur and repay indebtedness. However, it is too soon for us to predict with any certainty the ultimate impact, either directionally or quantitatively, of climate change and related regulatory responses.

Our quarterly operating results may fluctuate and cause our stock price to decline.

Because of the nature of our business, our quarterly operating results may fluctuate, which may adversely affect the market price of our common stock. Our results may fluctuate as a result of any of the following:

the timing and amount of collections on our consumer receivable portfolios;

our inability to identify and acquire additional consumer receivable portfolios;

a decline in the estimated future value of our consumer receivable portfolio recoveries;

increases in operating expenses associated with the growth of our operations;

general and economic market conditions; and

Prices we are willing to pay for consumer receivable portfolios.

Item 1B. *Unresolved Staff Comments.*

We have not received any written comments regarding our periodic or current reports from the staff of the Securities and Exchange Commission which were issued 180 days or more preceding September 30, 2011 and that remain unresolved.

Item 2. *Properties.*

Our executive and administrative offices are located in Englewood Cliffs, New Jersey, where we lease approximately 14,700 square feet of general office space for approximately \$20,000 per month, plus utilities. The lease expires on July 31, 2015, with a two-year renewal option.

Our office in Houston, Texas occupies approximately 2,600 square feet of general office space for approximately \$3,800 per month. The lease expires August 18, 2016.

Our office in Long Beach, New York occupies approximately 800 square feet of general office space for approximately \$1,350 per month. The lease expires August 31, 2012.

We believe that our existing facilities are adequate for our current needs.

Item 3. *Legal Proceedings.*

In the ordinary course of our business, we are involved in numerous legal proceedings. We regularly initiate collection lawsuits, using third party law firms, against consumers. Also, consumers occasionally initiate litigation against us, in which they allege that we have violated a federal or state law in the process of collecting on their account. We do not believe that these ordinary course matters are material to our business and financial condition. As of the date of this report, we were not involved in any material litigation in which we were a defendant.

Item 4. *(Removed and Reserved).*

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

Since August 15, 2000, our common stock has been quoted on the NASDAQ National Market system under the symbol ASFI. On November 30, 2011 there were 18 holders of record of our common stock. High and low sales prices of our common stock since October 1, 2009 as reported by NASDAQ are set forth below (such quotations reflect inter-dealer prices without retail markup, markdown, or commission, and may not necessarily represent actual transactions):

	High	Low
<u>2010</u>		
October 1, 2009 to December 31, 2009	\$ 8.49	\$ 6.53
January 1, 2010 to March 31, 2010	8.10	6.00
April 1, 2010 to June 30, 2010	10.03	7.05
July 1, 2010 to September 30, 2010	10.02	7.07
<u>2011</u>		
October 1, 2010 to December 31, 2010	\$ 8.74	\$ 6.66
January 1, 2011 to March 31, 2011	8.82	7.51
April 1, 2011 to June 30, 2011	8.65	6.40
July 1, 2011 to September 30, 2011	8.75	7.48

Dividends

During the year ended September 30, 2011, we declared quarterly cash dividends aggregating \$1,170,000 (\$0.02 per share, per quarter). During the year ended September 30, 2010, we declared quarterly cash dividends aggregating \$1,161,000 (\$0.02 per share, per quarter). Future dividend payments will be at the discretion of our board of directors and will depend upon our financial condition, operating results, capital requirements and any other factors our board of directors deems relevant. In addition, our agreements with our lender may, from time to time, restrict our ability to pay dividends. Currently there are no restrictions in place.

Purchases of Common Stock

We have a share repurchase program that authorizes us to purchase up to \$20.0 million of shares of our common stock through June 20, 2012. The share repurchases may occur from time-to-time through open market purchases at prevailing market prices or through privately negotiated transactions as permitted by securities laws and other legal requirements. The following table sets forth information regarding our repurchases or acquisitions of common stock during the fourth quarter of the fiscal year ended September 30, 2011.

Period	Total	Average	Total Number	Maximum Number
	Number of	Price Paid	of Shares	(or Approximate
	Shares	per Share	Purchased as	Dollar Value)
	(or Units)	(or Unit)	Part	of Shares that

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation. Caution Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements typically are identified by use of terms such as may, will, should, plan, expect, anticipate, estimate, or similar words, although some forward-looking statements are expressed differently. Forward-looking statements represent our judgment regarding future events, but we can give no assurance that such judgments will prove to be correct. Such statements are subject to risks and uncertainties that could cause actual results to differ materially and adversely from those projected in such forward-looking statements. Certain factors which could materially affect our results and our future performance are described above under Item 1A Risk Factors and below under

Critical Accounting Policies. Forward-looking statements are inherently uncertain as they are based on current expectations and assumptions concerning future events and are subject to numerous known and unknown risks and uncertainties. We caution you not to place undue reliance on these forward-looking statements, which are only predictions and speak only as of the date of this report. Except as required by law, we undertake no obligation to update or publicly announce revisions to any forward-looking statements. Unless the context otherwise requires, the terms we, us, the Company, or our as used herein refer to Asta Funding, Inc. and our subsidiaries.

Overview

We are primarily engaged in the business of acquiring, managing for our own account, servicing and recovering on portfolios of consumer receivables. These portfolios generally consist of one or more of the following types of consumer receivables:

charged-off receivables accounts that have been written-off by the originators and may have been previously serviced by collection agencies;

semi-performing receivables accounts where the debtor is making partial or irregular monthly payments, but the accounts may have been written-off by the originators; and in limited circumstances,

performing receivables accounts where the debtor is making regular monthly payments that may or may not have been delinquent in the past.

We acquire these consumer receivable portfolios at a significant discount to the amount actually owed by the borrowers. We acquire these portfolios after a qualitative and quantitative analysis of the underlying receivables and calculate the purchase price so that our estimated cash flow offers us an adequate return on our investment after servicing expenses. After purchasing a portfolio, we actively monitor its performance and review and adjust our collection and servicing strategies accordingly.

We purchase receivables from credit grantors and others through privately negotiated direct sales, brokered transactions and auctions in which sellers of receivables seek bids from several pre-qualified debt purchasers. We pursue new acquisitions of consumer receivable portfolios on an ongoing basis through:

our relationships with industry participants, financial institutions, collection agencies, investors and our financing sources;

brokers who specialize in the sale of consumer receivable portfolios; and

other sources.

Critical Accounting Policies

We account for our investments in consumer receivable portfolios, using either:

the interest method; or

the cost recovery method.

Table of Contents

As we believe our extensive liquidating experience in certain asset classes such as distressed credit card receivables, consumer loan receivables and mixed consumer receivables has matured, we use the interest method when we believe we can reasonably estimate the timing of the cash flows. In those situations where we diversify our acquisitions into other asset classes in which we do not possess the same expertise or history, or we cannot reasonably estimate the timing of the cash flows, we utilize the cost recovery method of accounting for those portfolios of receivables.

We account for our investment in finance receivables using the interest method under the guidance of ASC 310. Static pools of accounts are established. These pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost and is accounted for as a single unit for the recognition of income, principal payments and loss provision. We currently consider for aggregation portfolios of accounts, purchased within the same fiscal quarter, that generally have the following characteristics:

same issuer/originator

same underlying credit quality

similar geographic distribution of the accounts

similar age of the receivable and

same type of asset class (credit cards, telecommunications, etc.)

After determining that an investment will yield an adequate return on our acquisition cost after servicing fees, including court costs, which are expensed as incurred, we use a variety of qualitative and quantitative factors to determine the estimated cash flows. The following variables are analyzed and factored into our original estimates:

the number of collection agencies previously attempting to collect the receivables in the portfolio;

the average balance of the receivables;

the age of the receivables (as older receivables might be more difficult to collect or might be less cost effective);

past history of performance of similar assets as we purchase portfolios of similar assets, we believe we have built significant history on how these receivables will liquidate and cash flow;

number of months since charge-off;

payments made since charge-off;

the credit originator and their credit guidelines;

Edgar Filing: ASTA FUNDING INC - Form 10-K

the locations of the debtors as there are better states to attempt to collect in and ultimately we have better predictability of the liquidations and the expected cash flows.

financial wherewithal of the seller;

jobs or property of the debtors found within portfolios-with our business model. Debtors with jobs or property are more likely to repay their obligation and conversely, debtors without jobs or property are less likely to repay their obligation; and

the ability to obtain customer statements from the original issuer.

We will obtain and utilize as appropriate input including, but not limited to, monthly collection projections and liquidation rates, from our third party collection agencies and attorneys, as further evidentiary matter, to assist us in developing collection strategies and in modeling the expected cash flows for a given portfolio.

We acquire accounts that have experienced deterioration of credit quality between origination and the date of our acquisition of the accounts. The amount paid for a portfolio of accounts reflects our determination that it is probable we will be unable to collect all amounts due according to the portfolio of accounts contractual terms.

Table of Contents

We consider the expected payments and estimate the amount and timing of undiscounted expected principal, interest and other cash flows for each acquired portfolio coupled with expected cash flows from accounts available for sales. The excess of this amount over the cost of the portfolio, representing the excess of the account's cash flows expected to be collected over the amount paid, is accreted into income recognized on finance receivables over the expected remaining life of the portfolio.

We believe we have significant experience in acquiring certain distressed consumer receivable portfolios at a significant discount to the amount actually owed by underlying debtors. We acquire these portfolios only after both qualitative and quantitative analyses of the underlying receivables are performed and a calculated purchase price is paid so that we believe our estimated cash flow offers us an adequate return on our acquisition costs including servicing expenses. Additionally, when considering larger portfolio purchases of accounts, or portfolios from issuers from whom we have little or limited experience, we have the added benefit of soliciting our third party collection agencies and attorneys for their input on liquidation rates and at times incorporate such input into the price we offer for a given portfolio and the estimates we use for our expected cash flows.

As a result of the a challenging economic environment and the impact it has had on collections, for portfolio purchases acquired in fiscal year 2009 we extended our time frame of the expectation of recovering 100% of our invested capital to a 24-39 month period from an 18-28 month period, and the expectation of recovering 130-140% over seven years from the previous five year expectation. The 2009 time frame of expectations has remained in force for fiscal year 2011. We routinely monitor these expectations against the actual cash flows and, in the event the cash flows are below our expectations and we believe there are no reasons relating to mere timing differences or explainable delays (such as can occur particularly when the court system is involved) for the reduced collections, an impairment is recorded on portfolios accounted for on the interest method. Conversely, in the event the cash flows are in excess of our expectations and the reason is due to timing, we would defer the excess collection as deferred revenue.

We use the cost recovery method when collections on a particular pool of accounts cannot be reasonably predicted. Under the cost recovery method, no finance income is recognized until the cost of the portfolio has been fully recovered. A pool can become fully amortized (zero carrying balance on the balance sheet) while still generating cash collections. In this case, all cash collections are recognized as finance income when received.

Results of Operations

The following discussion of our operations and financial condition should be read in conjunction with our financial statements and notes thereto included elsewhere in this report. In these discussions, most percentages and dollar amounts have been rounded to aid presentation. As a result, all such figures are approximations.

	Year Ended September 30,		
	2011	2010	2009
Finance income	98.7%	99.5%	99.7%
Other income	1.3%	0.5%	0.3%
Total revenue	100%	100.0%	100.0%
General and administrative expenses	50.5%	50.7%	36.8%
Interest expense	7%	9.5%	12.0%
Impairments	1.7%	28.4%	261.1%
Income (loss) before income taxes	40.8%	11.4%	(209.9)%
Provision (benefit) for income taxes	16.5%	4.6%	(80.8)%
Net income (loss)	24.4%	6.8%	(129.1)%

Table of Contents***Year Ended September 30, 2011 Compared to the Year Ended September 30, 2010***

Finance income. For the year ended September 30, 2011, finance income decreased \$3.0 million or 6.6% to \$42.6 million from \$45.6 million for the year ended September 30, 2010. The decrease is primarily due to the lower level of portfolio purchases over the last two years and, as a result, an increased percentage of our portfolio balances are in the later stages of their yield curves. In addition, during the fourth quarter of fiscal 2011 there was a one time charge of approximately \$1.3 million against finance income by a third party collection company that invoiced us for previously unbilled collections costs. Finance income for the year ended September 30, 2011 excluding this one time charge, would have been \$44,439,000, down \$1.4 million, or 3.1%. During the fiscal year ended September 30, 2011, we acquired \$19.5 million in face value of new portfolios at a cost of \$7.5 million as compared to \$269.0 million of face value portfolios at a cost of approximately \$8.0 million, during the fiscal year ended September 30, 2010. Finance income recognized from fully amortized portfolios (zero basis revenue) was \$34.3 million for the years ended September 30, 2011 and 2010, respectively.

Net collections decreased \$20.7 million or 20.3% to \$81.2 million for the fiscal year ended September 30, 2011, from \$101.9 million for the fiscal year ended September 30, 2010. During fiscal year 2011, gross collections decreased 17.7% to \$129.7 from \$157.6 million for fiscal year 2010, reflecting the lower level of purchases, the age of our portfolios and the slowdown in the economy. Commissions and fees associated with gross collections from our third party collection agencies and attorneys decreased \$7.2 million or 12.9% as compared to the same period in the prior year and averaged 37.4% of collections for the fiscal year ended September 30, 2011 as compared to 35.3% in the same prior year period. As previously mentioned the \$1.3 million one time charge impacted commissions and fees by one percentage point. Commissions and fees excluding this one time charge would have been 36.4%.

Further, as we have curtailed our purchases of new portfolios of consumer receivables in the last three fiscal years, finance income was negatively impacted and we expect will continue to be negatively impacted going forward since we have not been replacing our receivables acquired for liquidation. Instead, we focused on reducing our debt and being highly disciplined in our portfolio purchases. We continue to review potential portfolio acquisitions regularly and will purchase such portfolios when we believe the purchase will yield our desired rate of return. There were no accretable yield adjustments recorded during the fiscal years ended September 30, 2011 and 2010.

Other income. Other income of \$557,000 and \$218,000 for the fiscal years ended September 30, 2011 and 2010, respectively, consisted primarily of service fee income and interest income from banks.

General and administrative expenses. For the year ended September 30, 2011, general and administrative expenses decreased \$1.4 million or 6.0% to \$21.8 million from \$23.2 million for the year ended September 30, 2010. The decrease is due primarily to lower collection expenses, including lower attorney fees and settlements associated with debtor lawsuits, lower professional fees, and the lower non-cash item of amortization expense, offset by higher non-cash stock based compensation expense.

Interest expense. For the year ended September 30, 2011, interest expense decreased \$1.4 million or 31.0% to \$3.0 million from \$4.4 million during the year ended September 30, 2010. The decrease was due to the repayment of the outstanding borrowings on our subordinated debt and the reduction of our Receivables Financing Agreement (described below under the caption Receivables Financing Agreement) loan balance during the year ended September 30, 2011, as compared to the year ended September 30, 2010. Additionally, the average interest rate during the year ended September 30, 2010 on the Receivable Financing Agreement was 3.75% as compared to 3.77% during the year ended September 30, 2010. The rate on the subordinated debt related party was increased from 6.25% to 10.0% during fiscal year 2010; however, the principal balance was paid off in December 2010, with little impact on the fiscal year 2011 expense.

Impairments. We recorded impairments of \$720,000 during the year ended September 30, 2011 as compared to \$13.0 million for the year ended September 30, 2010. The impairment recorded in fiscal year 2010 was related to the Portfolio Purchase. During fiscal year 2010 a significant servicer of accounts of the Portfolio Pur-

Table of Contents

chase declaring bankruptcy which caused a delay in collections as accounts were transferred to other servicers. Although we believe that value remains in the Portfolio Purchase, the delay has impacted projections of collections of the Portfolio Purchase.

Income tax expense (benefit) Income tax expense for fiscal year 2011 of \$7.1 million consists of a current tax expense of \$2.5 million and a deferred tax expense of \$4.6 million. The \$4.6 million deferred tax expense consists of \$3.0 million of federal tax expense and \$1.6 million in state deferred expense. Included in the deferred tax expense in fiscal year 2010 is a \$5.6 million true up of federal income taxes from fiscal year 2009. Upon the completion of our federal tax return for fiscal year 2009 and the application for the tax refund completed earlier in the second quarter, the federal tax refund estimate of \$46 million was revised upward to approximately \$52 million which caused the \$5.6 million true up in the current year. This change was due to a combination of applying the federal tax net operating loss carryback and the recognition of the benefit of the state net operating loss carryforwards for federal tax purposes, and other timing differences applied to the current year tax return. These adjustments did not affect the statement of operations and yielded a net adjustment between the federal income tax receivable and the deferred tax asset. The true up for the fiscal year 2010 federal tax return was not material.

Net income. For the year ended September 30, 2011, net income increased \$7.4 million to \$10.5 million from \$3.1 million for the year ended September 30, 2010, primarily reflecting decreased impairments and other expenses, partially offset by higher income taxes. Net income per diluted share for the year ended September 30, 2010 increased \$0.50 per diluted share to \$0.72 per diluted share from \$0.22 per diluted share for the year ended September 30, 2010.

Year Ended September 30, 2010 Compared to the Year Ended September 30, 2009

Finance income. For the year ended September 30, 2010, finance income decreased \$24.6 million or 35.0% to \$45.6 million from \$70.2 million for the year ended September 30, 2009. Finance income has decreased primarily due to the lower level of portfolio purchases over the last two years and, as a result, an increased percentage of our portfolio balances are in the later stages of their yield curves. The average outstanding level of consumer receivable accounts acquired for liquidation decreased from \$328.6 million for the fiscal year ended September 30, 2009 to \$177.6 million for fiscal year ended September 30, 2010, reflecting a reduced level of portfolio purchases and the recognition of impairments in the fourth quarter of fiscal year 2010 of approximately \$13.0 million. In addition, we recorded \$143.7 million in impairments in the second half of fiscal year 2009. During the fiscal year ended September 30, 2010, we acquired \$269.1 million in face value of new portfolios at a cost of \$8.0 million as compared to \$577.0 million of face value portfolios at a cost \$19.6 million, during the fiscal year ended September 30, 2009. Finance income recognized from fully amortized portfolios (zero basis revenue) was \$34.3 million and \$40.7 million for the years ended September 30, 2010 and 2009, respectively.

Net collections decreased \$45.5 million or 30.9% to \$101.9 million for the fiscal year ended September 30, 2010, from \$147.4 million for the fiscal year ended September 30, 2009. During fiscal year 2010, gross collections decreased 29.8% to \$157.6 from \$224.5 million for fiscal year 2009, reflecting the lower level of purchases, the age of our portfolios and the slowdown in the economy. Commissions and fees associated with gross collections from our third party collection agencies and attorneys decreased \$21.5 million or 27.8% as compared to the same period in the prior year and averaged 35.3% of collections for the fiscal year ended September 30, 2010 as compared to 34.3% in the same prior year period.

Further, as we have curtailed our purchases of new portfolios of consumer receivables in the last three fiscal years, finance income was negatively impacted and we expect will continue to be negatively impacted going forward since we have not been replacing our receivables acquired for liquidation. Instead, we have focused on reducing our debt and being highly disciplined in our portfolio purchases. We continue to review potential portfolio acquisitions regularly and will be buyers at the right price, where we believe the purchase will yield our desired rate of return. There were no accretable yield adjustments recorded during the fiscal years ended September 30, 2010 and 2009.

Other income. Other income of \$218,000 and \$199,000 for the fiscal year ended September 30, 2010 and 2009, respectively, consisted primarily of service fee income and interest income from banks.

Table of Contents

General and administrative expenses. For the year ended September 30, 2010, general and administrative expenses decreased \$2.7 million or 10.4% to \$23.2 million from \$25.9 million for the year ended September 30, 2009. Lower general and administrative expenses is due primarily to the closing of the Pennsylvania call center in February 2009, lower collection expenses, primarily the discontinuation in May 2009 of the \$275,000 monthly management fee paid to a significant servicer relative to the Portfolio Purchase, and lower telephone expense and professional fees. We have improved the efficiency of the telephone collection management system, which reduced costs without a significant impact on the results from the volume of calls.

Interest expense. For the year ended September 30, 2010, interest expense decreased \$4.1 million or 48.3% to \$4.4 million from \$8.5 million during the year ended September 30, 2009. The decrease was due to the repayment of the outstanding borrowings under our line of credit and the reduction of our Receivables Financing Agreement (described below under the caption "Receivables Financing Agreement") loan balance during the year ended September 30, 2010, as compared to the year ended September 30, 2009. Additionally, the average interest rate during the year ended September 30, 2010 on the Receivable Financing Agreement was 3.77% as compared to 4.82% during the year ended September 30, 2009. The rate on the subordinated debt related party was increased from 6.25% to 10.0% during fiscal year 2010; however, the principal balance was paid down to \$4.4 million during fiscal year 2010 from \$8.2 million at September 30, 2009. The average outstanding borrowings decreased from \$168.1 million to \$112.9 million for the years ended September 30, 2009 and 2010, respectively.

Impairments. Impairments of \$13.0 million were recorded by us during the year ended September 30, 2010 as compared to \$183.5 million for the year ended September 30, 2009. The impairment recorded in fiscal year 2010 was related to the Portfolio Purchase. During fiscal year 2010 a significant servicer of accounts of the Portfolio Purchase declared bankruptcy which caused a delay in collections as accounts were transferred to other servicers. Although value remains in the Portfolio Purchase, the delay has impacted projections of collections of the Portfolio Purchase. Included in the fiscal year 2009 impairments is approximately \$108.5 million related to the interest method portfolios and \$75.0 million related to cost recovery method portfolios, including \$53.9 applied to the Portfolio Purchase. For the interest method portfolios, relative collections with respect to our expectations were deteriorating and this deterioration was confirmed by our third party collection agencies and attorneys. The deterioration, which had impacted us throughout the year, became more significant during the fourth quarter of the fiscal year ended September 30, 2009. In fiscal year 2010, the entire impairment which was determined by us in connection the preparation of our year end financial statements, was taken in the fourth quarter and related to the Portfolio Purchase resulting in a write down to net realizable value of \$91.8 million at September 30, 2010.

Income tax expense (benefit). Income tax expense for fiscal year 2010 of \$2.1 million consists of a current tax benefit of \$3.2 million and a deferred tax expense of \$5.3 million. Included in the deferred tax expense is a \$5.6 million true up of federal income taxes from fiscal year 2009. Upon the completion of our Federal tax return for fiscal year 2009 and the application for the tax refund completed earlier in the second quarter, the Federal tax refund estimate of \$46 million was revised upward to approximately \$52 million which caused the \$5.6 million true up in the current year. This change was due to a combination of applying the Federal tax net operating loss carryback and the recognition of the benefit of the state net operating loss carryforwards for federal tax purposes, and other timing differences applied to the current year tax return. These adjustments did not affect the statement of operations and yielded a net adjustment between the federal income tax receivable and the deferred tax asset.

Income tax benefit for fiscal year 2009 of \$56.8 million consists of a federal tax benefit of \$46.0 million and a state tax benefit of \$10.8 million. The state deferred tax benefit is inclusive of a \$4.4 million valuation allowance. Although the carryforward period for state income tax purposes is up to twenty years, given the economic conditions, such economic environment could limit growth over a reasonable time period to realize the deferred tax asset. The Company determined the time period allowance for carryforward is outside a reasonable period to forecast full realization of the deferred tax asset, therefore recognized the deferred tax asset valuation allowance.

Net income (loss). For the year ended September 30, 2010, net income increased \$93.9 million to \$3.1 million from a \$90.7 million loss for the year ended September 30, 2009, primarily reflecting decreased impairments and other expenses, partially offset by reduced finance income and higher income taxes. Net income per diluted share for the year ended September 30, 2010 increased \$6.58 per diluted share to \$0.22 per diluted share from (\$6.36) per diluted share for the year ended September 30, 2009.

Table of Contents

Liquidity and Capital Resources

Our primary source of cash from operations is collections on the receivable portfolios we have acquired. Our primary uses of cash include repayments of debt, our purchases of consumer receivable portfolios, interest payments, costs involved in the collections of consumer receivables, taxes and dividends, if approved. In the past, we relied significantly upon our lenders to provide the funds necessary for the purchase of consumer receivables acquired for liquidation.

Receivables Financing Agreement

In March 2007, Palisades XVI borrowed approximately \$227 million under the Receivables Financing Agreement, as amended in July 2007, December 2007, May 2008 and February 2009 with BMO, in order to finance the Portfolio Purchase. The Portfolio Purchase had a purchase price of \$300 million (plus 20% of net payments after Palisades XVI recovers 150% of its purchase price plus cost of funds, which recovery has not yet occurred). Prior to the modification, discussed below, the debt was full recourse only to Palisades XVI and bore an interest rate of approximately 170 basis points over LIBOR. The original term of the agreement was three years. This term was extended by each of the Second, Third, Fourth and Fifth Amendments to the Receivables Financing Agreement as discussed below. The Receivables Financing Agreement contained cross default provisions related to the IDB Credit Facility. This cross default could only occur in the event of a non-payment in excess of \$2.5 million of the IDB Credit Facility. Proceeds received as a result of the net collections from the Portfolio Purchase are applied to interest and principal of the underlying loan. The Portfolio Purchase is serviced by Palisades Collection LLC, a wholly owned subsidiary of the Company, which has engaged unaffiliated subservicers for a majority of the Portfolio Purchase.

Since the inception of the Receivables Financing Agreement amendments have been signed to revise various terms of the Receivables Financing Agreement. Currently we are operating under the Fifth Amendment.

On October 26, 2010, Palisades XVI entered into the Fifth Amendment to the Receivables Financing Agreement (the *Fifth Amendment*). The effective date of the Fifth Amendment is October 14, 2010. The Fifth Amendment (i) extends the expiration date of the Receivables Financing Agreement to April 30, 2014, (ii) reduces the minimum monthly total payment to \$750,000, (iii) accelerates the Company's guarantee credit enhancement of \$8,700,000, which was paid upon execution of the Fifth Amendment, (iv) eliminates the Company's limited guarantee of repayment of the loans outstanding by Palisades XVI, and (v) revises the definition of *Borrowing Base Deficit*, as defined in the Receivables Financing Agreement, to mean the excess, if any, of 105% of the loans outstanding over the borrowing base.

In connection with the Fifth Amendment, on October 26, 2010, the Company entered into the Omnibus Termination Agreement (the *Termination Agreement*). The limited recourse subordinated guaranty discussed under the Fourth Amendment, was eliminated upon signing the Termination Agreement.

The aggregate minimum repayment obligations required under the Fifth Amendment, including interest and principal, for fiscal years ending September 30, 2012 and 2013 are \$9 million annually, and, for the fiscal year ended September 30, 2014, is approximately \$5 million (seven months).

On September 30, 2011 and 2010, the outstanding balance on this loan was approximately \$71.6 million, and \$90.5 million, respectively. The applicable interest rate at September 30, 2011 and 2010 was 3.72% and 3.76%, respectively. The average interest rate of the Receivable Financing Agreement was 3.75% and 3.77% for the years ended September 30, 2011 and 2010, respectively.

Other significant amendments to the Receivables Financing Agreement are as follows:

Second Amendment Receivables Financing Agreement, dated December 27, 2007 revised the amortization schedule of the loan from 25 months to approximately 31 months. BMO charged Palisades XVI a fee of \$475,000 which was paid on January 10, 2008. The fee was capitalized and is being amortized over the remaining life of the Receivables Financing Agreement.

Third Amendment Receivables Financing Agreement, dated May 19, 2008 extended the payments of the loan through December 2010. The lender also increased the interest rate from 170 basis points over LIBOR to

Table of Contents

approximately 320 basis points over LIBOR, subject to automatic reduction in the future if additional capital contributions are made by the parent of Palisades XVI.

Fourth Amendment Receivables Financing Agreement, dated February 20, 2009, among other things, (i) lowered the collection rate minimum to \$1 million per month (plus interest and fees) as an average for each period of three consecutive months, (ii) provided for an automatic extension of the maturity date from April 30, 2011 to April 30, 2012 should the outstanding balance be reduced to \$25 million or less by April 30, 2011 and (iii) permanently waived the previous termination events. The interest rate remains unchanged at approximately 320 basis points over LIBOR, subject to automatic reduction in the future should certain collection milestones be attained.

As additional credit support for repayment by Palisades XVI of its obligations under the Receivables Financing Agreement and as an inducement for BMO to enter into the Fourth Amendment, the Company provided BMO a limited recourse, subordinated guaranty, secured by the assets of the Company, in an amount not to exceed \$8.0 million plus reasonable costs of enforcement and collection. Under the terms of the guaranty, BMO cannot exercise any recourse against the Company until the earlier of (i) five years from the date of the Fourth Amendment and (ii) the termination of the Company's existing senior lending facility or any successor senior facility.

The Company's average debt obligation (excluding the subordinated debt-related party) for the fiscal years ended September 30, 2011 and 2010, was approximately \$77.2 million and \$99.0 million, respectively. The average interest rate was 3.75% and 3.81%, respectively, for the years ended September 30, 2011 and 2010.

Bank Leumi Credit Agreement

On December 14, 2009 Asta Funding, Inc. and its subsidiaries other than Palisades XVI, entered into the Bank Leumi Credit Agreement which permits maximum principal advances of up to \$6 million. The term of the agreement was through December 31, 2010. The interest rate is a floating rate equal to the Bank Leumi Reference Rate plus 2%, with a floor of 4.5%. The loan is secured by collateral consisting of all of the assets of the Company other than those of Palisades XVI. In addition, other collateral for the loan consists of a pledge by GMS Family Investors, LLC, an investment company owned by members of the Stern family in the form of cash and securities with a value of 133% of the loan commitment. There are no financial covenant restrictions for the Leumi Credit Agreement. On December 14, 2009, approximately \$3.6 million of the Bank Leumi credit line was used to reduce to zero the remaining balance of the IDB Credit Facility described below. The Leumi Credit Agreement balance was reduced to zero in January 2010. The Company is working with its bank on a new credit facility with a larger credit limit.

Subordinated Debt - Related Party

On April 29, 2008, we obtained a subordinated loan pursuant to a subordinated promissory note from the Family Entity. The Family Entity is a greater than 5% stockholder of the Company and is beneficially owned and controlled by Arthur Stern, a director of the Company, Gary Stern, the President, Chairman and Chief Executive Officer of the Company, and members of their families. The loan, originally in the aggregate principal amount of \$8,246,000, currently accrues interest at a rate of 10.0% per annum, is payable interest only each quarter until maturity on December 31, 2010, subject to repayment in full of the Company's loan facility.

The Family Entity loan was extended in December 2009 to December 31, 2010 with a new interest rate (effective January 2010) of 10.0% per annum (formerly the rate was 6.25%). On January 27, 2010, the Company repaid approximately \$860,740 of the subordinated loan, delivering approximately \$787,500 to the Family Entity, which, the Family Entity delivered its portion of the loan payment to Gary Stern, who used the proceeds to exercise the 300,000 stock options awarded him in 2000. We made additional loan repayments of \$1.5 million each on February 17, 2010 and March 26, 2010. The subordinated loan balance was approximately \$4.4 million and \$8.2 million as of September 30, 2010 and 2009, respectively. On November 16, 2010, we made an additional \$2.0 million loan repayment to the Family Entity, reducing the loan balance to \$2.4 million.

The subordinated loan was incurred by us to resolve certain issues with a significant servicer. Proceeds of the subordinated loan were used to reduce the balance due on our line of credit with the IDB Bank Group on June 13, 2008. This facility was secured by substantially all of the assets of the Company and its subsidiaries, other than the assets of Palisades XVI.

Table of Contents

IDB Credit Facility

The Eighth Amendment to the IDB Credit Facility entered into on July 10, 2009 provided for an initial \$40 million line of credit from the Bank Group for portfolio purchases and working capital and was scheduled to reduce to zero by December 31, 2009. The IDB Credit Facility provided for interest at the lesser of LIBOR plus an applicable margin, or the prime rate minus an applicable margin based on certain leverage ratios, with a minimum rate of 5.5%. The IDB Credit Facility was collateralized by all assets of the Company other than the assets of Palisades XVI and contained financial and other covenants. The IDB Credit Facility's commitment termination date was December 31, 2009. This IDB Credit Facility was repaid on December 14, 2009.

Cash Flow

As of September 30, 2011, our cash and cash equivalents increased \$9.0 million to \$84.3 million, from \$75.3 million at September 30, 2010. Although our cash flow remains strong we have diversified some of our cash flow into other investments.

Net cash provided by operating activities was \$16.7 million during the fiscal year ended September 30, 2011, compared to net cash provided by operating activities of \$68.7 million for the fiscal year ended September 30, 2010. The decrease is primarily due to the significant federal tax refund received in fiscal year 2010. Net cash provided by investing activities was \$16.4 million during the fiscal year ended September 30, 2011, as compared to net cash provided by investing activities of \$39.2 million during the fiscal year ended September 30, 2010. The decrease is primarily due to lower collections of consumer receivables acquired for liquidation, and the purchase of available for sales securities during the year ended September 30, 2011 as compared to the same prior year period. Net cash used in financing activities was \$24.1 million during the fiscal year ended September 30, 2011, as compared to cash used in financing activities of \$35.0 million in the prior period. The decrease in net cash used was primarily due to a smaller pay down of debt during the fiscal year ended September 30, 2011 compared to the prior period.

Our cash requirements have been and will continue to be significant and have, in the past, depended on external financing to acquire consumer receivables and operate the business. Significant requirements include repayments under our non-recourse debt facilities, investment in consumer receivable portfolios, litigation related receivables, interest payments, costs involved in the collections of consumer receivables, and taxes. In addition, dividends are paid if approved by the board of directors. Acquisitions have been financed primarily through cash flows from operating activities and a credit facility. We believe we will be less dependent on a credit facility in the short-term as our cash flow from operations will be sufficient to purchase portfolios and operate the business. However, as the collection environment remains challenging, we may seek additional funding.

We are cognizant of the current market fundamentals in the debt purchase and company acquisition markets which, because of significant supply and tight capital availability, could result in increased buying opportunities. Accordingly, we filed a \$100 million shelf registration statement with the SEC which was declared effective during the third quarter of 2010. As of the date of this report, we have not issued any securities under this registration statement. The outcome of any future transaction(s) is subject to market conditions. In addition, due to these opportunities, we continue to work with our current bank group and others on a new and expanded loan facility.

Our business model affords us the ability to sell accounts on an opportunistic basis. While we have not consummated any significant sales from our Portfolio Purchase, we launched a sales effort in order to attempt to enhance our cash flow and pay down our debt faster. The results are slower than expected for a variety of factors, including a slow resale market, similar to the decrease in pricing we are seeing in general.

During the first quarter of 2012, we have invested \$3.8 million in the litigation funding business with a focus on investing in personal injury claims. We are working with an industry leader who sources and manages these types of investments.

Table of Contents**Contractual Obligations**

The following table summarizes our contractual obligations in future fiscal years:

Payments Due By Period

	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long Term Debt Obligations	\$ 71,604,000	\$ 9,000,000	\$ 62,604,000	\$	\$
Operating Lease Obligations	\$ 1,183,000	\$ 307,000	\$ 584,000	\$ 292,000	
Total	\$ 72,787,000	\$ 9,307,000	\$ 63,188,000	\$ 292,000	

Off-Balance Sheet Arrangements

As of September 30, 2011, we did not have any relationships with unconsolidated entities or financial partners, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

The following table shows the changes in finance receivables, including amounts paid to acquire new portfolios:

	Year Ended September 30,				
	2011	2010	2009	2008	2007
	(In millions)				
Balance at beginning of period	\$ 147.0	\$ 208.3	\$ 449.0	\$ 545.6	\$ 257.3
Acquisitions of finance receivables, net of buybacks	7.5	8.0	19.6	49.9	440.9
Cash collections from debtors applied to principal(1)(2)	(38.4)	(55.1)	(69.1)	(81.7)	(114.4)
Cash collections represented by account sales applied to principal(1)	(0.2)	(1.2)	(8.1)	(11.0)	(29.1)
Impairments/Portfolio write down	(0.7)	(13.0)	(183.5)	(53.2)	(9.1)
Effect of foreign exchange			0.4	(0.6)	
Balance at end of period	\$ 115.2	\$ 147.0	\$ 208.3	\$ 449.0	\$ 545.6

(1) Cash collections applied to principal consists of cash collections less income recognized on finance receivables plus amounts received by us from the sale of consumer receivable portfolios to third parties.

(2) In 2007, includes put backs of purchased accounts returned to the seller totaling \$5.5 million. Put backs are considered not material for all other years presented.

Supplementary Information on Consumer Receivables Portfolios:

Portfolio Purchases

Edgar Filing: ASTA FUNDING INC - Form 10-K

	Year Ended September 30,		
	2011	2010	2009
	(In millions)		
Aggregate Purchase Price	\$ 7.5	\$ 8.0	\$ 19.6
Aggregate Portfolio Face Amount	19.5	269.1	577.0

The prices we pay for our consumer receivable portfolios are dependent on many criteria including the age of the portfolio, the number of third party collection agencies and attorneys that have been involved in the collection process and the geographical distribution of the portfolio. When we pay higher prices for portfolios which

Table of Contents

are performing or fresher, we believe it is not at the sacrifice of our expected returns. Price fluctuations for portfolio purchases from quarter to quarter or year to year are primarily indicative of the overall mix of the types of portfolios we are purchasing.

Schedule of Portfolios by Income Recognition Category

	September 30, 2011		September 30, 2010		September 30, 2009	
	Cost Recovery Portfolios	Interest Method Portfolios	Cost Recovery Portfolios	Interest Method Portfolios	Cost Recovery Portfolios	Interest Method Portfolios
	(In millions)					
Original Purchase Price (at period end)	\$ 443.3	\$ 787.2	\$ 442.5	\$ 780.5	\$ 442.2	\$ 772.8
Cumulative Aggregate Managed Portfolios (at period end)	13,915.3	17,985.0	13,913.3	17,966.2	13,884.5	17,725.9
Receivable Carrying Value (at period end)	84.0	31.2	100.7	46.3	137.6	70.6
Finance Income Earned (for the respective period)	2.7	39.9	1.7	43.9	2.5	67.7
Total Cash Flows (for the respective period)	19.6	61.6	26.0	75.9	47.0	100.4

The original purchase price reflects what we paid for the receivables from 1998 through the end of the respective period. The cumulative aggregate managed portfolio balance is the original aggregate amount owed by the borrowers at the end of the respective period. Additional differences between year to year period end balances may result from the transfer of portfolios between the interest method and the cost recovery method. We purchase consumer receivables at substantial discounts from the face amount. We record finance income on our receivables under either the cost recovery or interest method. The receivable carrying value represents the current basis in the receivables after collections and amortization of the original price.

Collections Represented by Account Sales

Year	Collections Represented By Account Sales	Finance Income Recognized
2011	\$ 390,000	\$ 155,000
2010	3,485,000	2,272,000
2009	8,662,000	3,085,000

Table of Contents**Portfolio Performance (1)**

The following table summarizes our historical portfolio purchase price and cash collections on interest method portfolios on an annual vintage basis since October 1, 2001 through September 30, 2011.

Purchase		Net Cash	Estimated	Total	Total
Period	Purchase	Collections	Remaining	Estimated	Estimated
	Price(2)	Including	Collections(4)	Collections(5)	Collections
		Cash Sales(3)			as a Percentage
					of Purchase Price
2001	\$ 65,120,000	\$ 105,617,000	\$	\$ 105,617,000	162%
2002	36,557,000	48,238,000		48,238,000	132%
2003	115,626,000	218,596,000		218,596,000	189%
2004	103,743,000	187,774,000	113,000	187,887,000	181%
2005	126,023,000	218,563,000	2,695,000	221,258,000	176%
2006	163,392,000	258,089,000	5,958,000	264,047,000	162%
2007	109,235,000	99,253,000	16,495,000	115,748,000	106%
2008	26,626,000	45,589,000	157,000	45,746,000	172%
2009	19,127,000	29,201,000	4,888,000	34,089,000	178%
2010	7,698,000	12,752,000	1,295,000	14,047,000	182%
2011	6,620,000	1,540,000	7,065,000	8,605,000	130%

(1) Total collections do not represent full collections of the Company with respect to this or any other year.

(2) Purchase price refers to the cash paid to a seller to acquire a portfolio less the purchase price refunded by a seller due to the return of non-compliant accounts (also defined as put-backs), plus third party commissions.

(3) Cash collections include: net collections from our third-party collection agencies and attorneys, collections from our in-house efforts and collections represented by account sales.

(4) Does not include estimated collections from portfolios that are zero basis.

(5) Total estimated collections refer to the actual net cash collections, including cash sales, plus estimated remaining collections.

We do not anticipate collecting the majority of the purchased principal amounts. Accordingly, the difference between the carrying value of the portfolios and the gross receivables is not indicative of future finance income from these accounts acquired for liquidation. Since we purchased these accounts at significant discounts, we anticipate collecting only a portion of the face amounts.

For the year ended September 30, 2011, we recognized finance income of \$2.7 million under the cost recovery method because we collected \$2.7 million in excess of our purchase price on certain of these portfolios. In addition, we earned \$39.9 million of finance income under the interest method based on actuarial computations which, in turn, are based on actual collections during the period and on what we project to collect in future periods. During the year ended September 30, 2011, we purchased portfolios with an aggregate purchase price of \$7.5 million with a face value (gross contracted amount) of \$19.5 million.

Recent Accounting Pronouncements

Edgar Filing: ASTA FUNDING INC - Form 10-K

In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-08, *Intangibles Goodwill and Other (Topic 350) (ASU 2011-08)* which amends and simplify the rules related to testing goodwill for impairment. The revised guidance allows an entity to make an initial qualitative evaluation, based on the entity's events and circumstances, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The results of this qualitative assessment determine whether it is necessary to perform the currently required two-step impairment test. The new guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. As allowed by ASU 2011-08, we early adopted this guidance for the fiscal year 2011 goodwill impairment test.

Table of Contents

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220)* (*ASU 2011-05*) in order to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. This standard eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. This update requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. This update is effective for public companies for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted because compliance with the amendments is already permitted. Adoption of this update is not expected to have a material effect on our results of operations or financial condition.

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement (Topic 820)* (*ASU 2011-04*) which sets forth common fair value measurement and disclosure requirements for US GAAP and International Financial Reporting Standards. ASU No. 2011-04 is effective for the first annual period beginning on or after December 15, 2011. Adoption of this update is not expected to have a material effect on our results of operations or financial condition but may have an effect on disclosures.

In December 2010, the FASB issued ASU No. 2010-29, *Business Combinations (Topic 805)* (*ASU 2010-29*), to improve consistency in how the pro forma disclosures are calculated. Additionally, ASU 2010-29 enhances the disclosure requirements and requires description of the nature and amount of any material, nonrecurring pro forma adjustments directly attributable to a business combination. The guidance will become effective for us with the reporting period beginning October 1, 2011, and should be applied prospectively to business combinations for which the acquisition date is after the effective date. Early adoption is permitted. Other than requiring disclosures for prospective business combinations, the adoption of this guidance is not expected to have a material effect on our results of operations or financial condition but may have an effect on disclosures.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures*, which amends the authoritative accounting guidance under ASC Topic 820, *Fair Value Measurements and Disclosures*. The update requires companies to:

- a. Separately disclose the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and
- b. Information about purchases, sales, issuances and settlements need to be disclosed separately in the reconciliation for fair value measurements using Level 3.

The update also provides for amendments to existing disclosures as follows:

- a. Fair value measurement disclosures are to be made for each class of assets and liabilities; and
- b. Disclosures about valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. The update also includes conforming amendments to guidance on employers' disclosures about postretirement benefit plan assets.

The update is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption in fiscal year 2011 did not have a material effect and future adoption is not expected to have a material effect on our results of operations or financial condition.

In December 2009, the FASB issued ASU 2009-17, *Consolidations (Topic 810) - Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. ASU 2009-17 generally represents a revision to former FASB Interpretation No. 46 (Revised December 2003), *Consolidation of Variable Interest Entities*, and changes how a reporting entity determines when an entity that is insufficiently capitalized or is not

Table of Contents

controlled through voting (or similar rights) should be consolidated. ASU 2009-17 also requires a reporting entity to provide additional disclosures about its involvement with variable interest entities and any significant changes in risk exposure due to that involvement. ASU 2009-17 is effective for fiscal years beginning after November 15, 2009 and for interim periods within the first annual reporting period. We adopted ASU 2009-17 as of October 1, 2010, which did not have a significant effect on its financial statements.

Inflation

We believe that inflation has not had a material impact on our results of operations for the years ended September 30, 2011, 2010 and 2009.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

We are exposed to various types of market risk in the normal course of business, including the impact of interest rate changes and changes in corporate tax rates. A material change in these rates could adversely affect our operating results and cash flows. At September 30, 2011, our Receivables Financing Agreement, all of which is variable rate debt, had an outstanding balance of \$71.6 million. A 25 basis-point increase in interest rates would have increased our annual interest expense by approximately \$200,000 based on the average debt obligation outstanding during the fiscal year. We do not currently invest in derivative, financial or commodity instruments.

Item 8. *Financial Statements And Supplementary Data.*

The Financial Statements of the Company, the Notes thereto and the Report of Independent Registered Public Accounting Firms thereon required by this item begin on page F-1 of this report located immediately after the signature page.

Item 9. *Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.*

None

Item 9A. *Controls and Procedures.*

Disclosure Controls and Procedures

An evaluation of the effectiveness of the our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period ended September 30, 2011 was carried out by us under the supervision and with the participation of our chief executive officer and chief financial officer. Based upon that evaluation, our chief executive officer and chief financial officer concluded that as of September 30, 2011, our disclosure controls and procedures were effective to ensure (i) that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) that such information is accumulated and communicated to management, including our president, in order to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Under the supervision and with the participation of our management, including its principal executive officer and principal financial officer, we conducted an assessment of the effectiveness of its internal control over financial reporting. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. Based on management's assessment, and based on the criteria of the COSO, we believe that, as of September 30, 2011, our internal control over financial reporting is effective at the reasonable assurance level.

Table of Contents

Our internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the U.S. Our internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the U.S., and that our receipts and expenditures are being made only in accordance with authorization of our management and directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

Our independent registered public accounting firm, Grant Thornton LLP, audited our internal control over financial reporting as of September 30, 2011 and their report dated December 14, 2011 expresses an unqualified opinion on our internal control over financial reporting and is included in this Item 9A.

Changes in Internal Controls over Financial Reporting

There have not been any changes in our internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Asta Funding, Inc.

We have audited Asta Funding, Inc. and subsidiaries (the Company) internal control over financial reporting as of September 30, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Asta Funding, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of September 30, 2011, based on criteria established in *Internal Control-Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Asta Funding, Inc. and subsidiaries as of September 30, 2011 and 2010 and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended September 30, 2011, and our report dated December 14, 2011, expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Asta Funding, Inc.

We have audited the accompanying consolidated balance sheets of Asta Funding, Inc. and subsidiaries (the Company) as of September 30, 2011 and 2010, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended September 30, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Asta Funding, Inc. and subsidiaries as of September 30, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2011 in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Asta Funding, Inc. and subsidiaries' internal control over financial reporting as of September 30, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated December 14, 2011 expressed an unqualified opinion.

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES

[1] The Company:

Asta Funding, Inc., together with its wholly owned significant operating subsidiaries Palisades Collection LLC, Palisades Acquisition XVI, LLC (Palisades XVI), VATIV Recovery Solutions LLC (VATIV) and other subsidiaries, not all wholly owned, and not considered material (the Company), is engaged in the business of purchasing, managing for its own account and servicing distressed consumer receivables, including charged-off receivables, semi-performing receivables, performing receivables and investment in litigation related receivables. The primary charged-off receivables are accounts that have been written-off by the originators and may have been previously serviced by collection agencies. Semi-performing receivables are accounts whereby the debtor is currently making partial or irregular monthly payments, but the accounts may have been written-off by the originators. Performing receivables are accounts whereby the debtor is making regular monthly payments that may or may not have been delinquent in the past. Distressed consumer receivables are the unpaid debts of individuals to banks, finance companies and other credit providers. A large portion of the Company s distressed consumer receivables are, MasterCard®, Visa®, and other credit card accounts which were charged-off by the issuers for non-payment. The Company acquires these portfolios at substantial discounts from their face values. The discounts are based on the characteristics (issuer, account size, debtor location and age of debt) of the underlying accounts of each portfolio. Litigation related receivables are semi-performing investments whereby the Company is assigned the revenue stream from the proceeds received.

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) and industry practices.

[1A] Liquidity:

The Company s cash requirements have been and will continue to be significant. In the past the Company has depended upon external financing to acquire consumer receivables, fund operating expenses, interest and income taxes. If approved, dividends paid are also a significant use of cash. As the Company s revolving debt level decreased to zero in fiscal year 2010, the Company has depended solely on operating cash flow to fund the acquisition of portfolios, pay operating expenses, dividends, and taxes. In June 2010, the Company received an aggregate tax refund of approximately \$52.7 million. As of November 30, 2011, the outstanding amount on the Bank of Montreal (BMO) facility (Receivables Financing Agreement) that financed the \$6.9 billion in face value receivables for a purchase price of \$300 million, (the Portfolio Purchase) is \$70.0 million. The Company continue to pay down the balance and the interest from the collections of the receivables under the Portfolio Purchase.

Net collections decreased \$20.7 million or 20.3% from \$101.9 million in fiscal year 2010 to \$81.2 million in fiscal year 2011. Although the Company s collections decreased from the prior year, the Company believes its net cash collections over the next twelve months, coupled with its current liquid cash balances, will be sufficient to cover its operating expenses, service debt and pay interest. See Note E Non Recourse Debt and Subordinated Debt Related Party, for further information.

[2] Principles of consolidation:

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

[3] Cash and cash equivalents and restricted cash:

The Company considers all highly liquid investments with a maturity of three months or less at the date of purchase to be cash equivalents.

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

[3] Cash and cash equivalents and restricted cash: (Continued)

The Company maintains cash balances in various depository institutions. Management periodically evaluates the creditworthiness of such institutions. Cash balances exceed Federal Deposit Insurance Corporation (FDIC) limits from time to time. Cash balances at September 30, 2011 were substantially in excess of these limits.

On February 5, 2007, Palisades Acquisition XV, LLC, a wholly-owned subsidiary of the Company, entered into a Purchase and Sale Agreement (the Portfolio Purchase Agreement), under which it agreed to acquire the Portfolio Purchase for a purchase price of \$300 million. To finance this purchase, now owned by Palisades XVI, the Company entered into a Receivables Financing Agreement with BMO as the funding source, consisting of debt with full recourse only to Palisades XVI. As part of the Receivables Financing Agreement, all proceeds received as a result of the net collections from the Portfolio Purchase are to be applied to interest and principal of the underlying loan until the loan is fully paid.

The restricted cash at September 30, 2011 represents cash on hand, substantially all of which is designated to be paid to the Company's lender subsequent to September 30, 2011. The lender has mandated in which depository institutions the cash is to be maintained.

[4] Investments

Available-for-Sale

Investments that the Company intends to hold for an indefinite period of time, but not necessarily to maturity, are classified as available-for-sale and are carried at fair value. Unrealized gains and losses on available-for-sale securities are determined using the specific-identification method.

Declines in the fair value of individual available-for-sale securities below their respective costs that are other than temporary will result in write-downs of the individual securities to their fair value. Factors affecting the determination of whether an other-than-temporary impairment has occurred include a downgrading of the security by a rating agency, a significant deterioration in the financial condition of the issuer, or that management would not have the ability to hold a security for a period of time sufficient to allow for any anticipated recovery in fair value.

Other Investments

Other investments consist of certificates of deposits with maturities greater than three months at the date of purchase.

[5] Income recognition, Impairments and Accretible yield adjustments:

Income Recognition

The Company accounts for its investment in consumer receivables acquired for liquidation using the interest method under the guidance of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 310, Receivables Loans and Debt Securities Acquired with Deteriorated Credit Quality, (ASC 310). In ASC 310 static pools of accounts are established. These pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost and is accounted for as a single unit for the recognition of income, principal payments and loss provision.

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

[5] Income recognition, Impairments and Accretable yield adjustments: (Continued)

Once a static pool is established for a quarter, individual receivable accounts are not added to the pool (unless replaced by the seller) or removed from the pool (unless sold or returned to the seller). ASC 310 requires that the excess of the contractual cash flows over expected cash flows not be recognized as an adjustment of revenue or expense or on the balance sheet. ASC 310 initially freezes the internal rate of return (IRR), estimated when the accounts receivable are purchased, as the basis for subsequent impairment testing. Significant increases in actual, or expected future cash flows are recognized prospectively through an upward adjustment of the IRR over a portfolio's remaining life. Any increase to the IRR then becomes the new benchmark for impairment testing. Under ASC 310, rather than lowering the estimated IRR if the collection estimates are not received or projected to be received, the carrying value of a pool would be written down to maintain the then current IRR.

Finance income is recognized on cost recovery portfolios after the carrying value has been fully recovered through collections or amounts written down.

Impairments and accretable yield adjustments

The Company accounts for its impairments in accordance with ASC 310, which provides guidance on how to account for differences between contractual and expected cash flows from an investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. Increases in expected cash flows are recognized prospectively through an adjustment of the internal rate of return while decreases in expected cash flows are recognized as impairments. An impairment of approximately \$0.7 million was recorded in the fiscal year ended September 30, 2011. An impairment of approximately \$13.0 million was recorded in the fiscal year ended September 30, 2010, all related to the Portfolio Purchase. As a result of the slower economy and other factors that resulted in slower collections on certain portfolios, impairments of \$183.5 million were recorded in fiscal year 2009, of which \$108.5 million related to the interest method portfolios and \$75.0 million related to cost recovery method portfolios. Finance income is not recognized on cost recovery method portfolios until the cost of the portfolio is fully recovered. Collection projections are performed on both interest method and cost recovery method portfolios. With regard to the cost recovery portfolios, if collection projections indicate the carrying value will not be recovered, a write down in value is required. There were no accretable yield adjustments recorded in the fiscal years ended September 30, 2011, 2010 and 2009.

The recognition of income under ASC 310 is dependent on the Company having the ability to develop reasonable expectations of both the timing and amount of cash flows to be collected. In the event the Company cannot develop a reasonable expectation as to both the timing and amount of cash flows expected to be collected, ASC 310 permits the change to the cost recovery method. The Company will recognize income only after it has recovered its carrying value. As of September 30, 2011, the carrying value of the Portfolio Purchase was approximately \$78.3 million. There can be no assurance as to when or if the carrying value will be recovered.

The Company's analysis of the timing and amount of cash flows to be generated by its portfolio purchases and investments are based on the following attributes:

the type of receivable, the location of the debtor and the number of collection agencies previously attempting to collect the receivables in the portfolio. The Company has found that there are better states to try to collect receivables and the Company factors in both better and worse states when establishing their initial cash flow expectations.

the average balance of the receivables influences the Company's analysis in that lower average balance portfolios tend to be more collectible in the short-term and higher average balance portfolios are more

F-9

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

[5] Income recognition, Impairments and Accretable yield adjustments: (Continued)

appropriate for the Company's lawsuit strategy and thus yield better results over the longer term. As the Company has significant experience with both types of balances, it is able to factor these variables into its initial expected cash flows;

the age of the receivables, the number of days since charge-off, any payments since charge-off, and the credit guidelines of the credit originator also represent factors taken into consideration in the Company's estimation process. For example, older receivables might be more difficult and/or require more time and effort to collect;

past history and performance of similar assets acquired. As the Company purchases portfolios of like assets, it accumulates a significant historical data base on the tendencies of debtor repayments and factor this into its initial expected cash flows;

the Company's ability to analyze accounts and resell accounts that meet its criteria;

jobs or property of the debtors found within portfolios. With the Company's business model, this is of particular importance. Debtors with jobs or property are more likely to repay their obligation through the lawsuit strategy and, conversely, debtors without jobs or property are less likely to repay their obligation. The Company believes that debtors with jobs or property are more likely to repay because courts have mandated the debtor must pay the debt. Ultimately, the debtor with property will pay to clear title or release a lien. The Company also believes that these debtors generally might take longer to repay and that is factored into its initial expected cash flows; and

credit standards of issuer.

The Company acquires accounts that have experienced deterioration of credit quality between origination and the date of its acquisition of the accounts. The amount invested in a portfolio of accounts reflects the Company's determination that it is probable the Company will be unable to collect all amounts due according to the portfolio of accounts' contractual terms. The Company considers the expected payments and estimates the amount and timing of undiscounted expected principal, interest and other cash flows for each acquired portfolio coupled with expected cash flows from accounts available for sale. The excess of this amount over the cost of the portfolio, representing the excess of the accounts' cash flows expected to be collected over the amount paid, is accreted into income recognized on finance receivables accounted for on the interest method over the expected remaining life of the portfolio.

The Company believes it has significant experience in acquiring certain distressed consumer receivable portfolios at a significant discount to the amount actually owed by underlying debtors. The Company invests in these portfolios only after both qualitative and quantitative analyses of the underlying receivables are performed and a calculated purchase price is paid so that it believes its estimated cash flow offers an adequate return on acquisition costs after servicing expenses. Additionally, when considering larger portfolio purchases of accounts, or portfolios from issuers with whom the Company has limited experience, it has the added benefit of soliciting its third party collection agencies and attorneys for their input on liquidation rates and, at times, incorporates such input into the estimates it uses for its expected cash flows.

Edgar Filing: ASTA FUNDING INC - Form 10-K

As a result of the challenging economic environment and the impact it has had on collections, for portfolio purchases acquired in fiscal year 2011, the Company's expectation of recovering 100% of its invested capital is a 24 -39 month period, with the expectation of recovering 130-140% over 7 years. The 2011 time frame of expectations have remained unchanged from fiscal year 2010. The Company routinely monitors these expectations against the actual cash flows and, in the event the cash flows are below expectations and the Company believes

F-10

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****[5] Income recognition, Impairments and Accretible yield adjustments: (Continued)**

there are no reasons relating to mere timing differences or explainable delays (such as can occur particularly when the court system is involved) for the reduced collections, an impairment is recorded on portfolios accounted for on the interest method. Conversely, in the event the cash flows are in excess of its expectations and the reason is due to timing, the Company would defer the excess collection as deferred revenue.

[6] Commissions and fees:

Commissions and fees are the contractual commissions earned by third party collection agencies and attorneys, and direct costs associated with the collection effort- generally court costs. The Company expects to continue to purchase portfolios and utilize third party collection agencies and attorney networks.

[7] Furniture, equipment and leasehold improvements:

Furniture and equipment is stated at cost. Depreciation is provided using the straight-line method over the estimated useful lives of the assets (5 to 7 years). Amortization on leasehold improvements is provided by the straight line-method of the remaining life of the respective lease. An accelerated depreciation method is used for tax purposes.

[8] Income taxes:

Deferred federal and state taxes arise from (i) recognition of finance income collected for tax purposes, but not yet recognized for financial reporting; (ii) provision for impairments/credit losses, all resulting in timing differences between financial accounting and tax reporting, and (iii) amortization of leasehold improvements resulting in timing differences between financial accounting and tax reporting.

[9] Net income (loss) per share:

Basic per share data is determined by dividing net income by the weighted average shares outstanding during the period. Diluted per share data is computed by dividing net income by the weighted average shares outstanding, assuming all dilutive potential common shares were issued. The assumed proceeds from the exercise of dilutive options are calculated using the treasury stock method based on the average market price for the period.

The following table presents the computation of basic and diluted per share data for the years ended September 30, 2011, 2010 and 2009:

	2011			2010			2009

weighted average exercise price of \$15.59 were not included in the diluted earnings per share calculation as they were anti-dilutive. At September 30, 2009, 133,250 options at a weighted average exercise price of \$8.30 were not included in the diluted earnings per share calculation as they were anti-dilutive.

[10] Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. With respect to income recognition under the interest method, the Company takes into consideration the relative credit quality of the underlying receivables constituting the portfolio acquired, the strategy involved to maximize the collections thereof, the time required to implement the collection strategy as well as other factors to estimate the anticipated cash flows. Actual results could differ from those estimates including management's estimates of future cash flows and the resultant allocation of collections between principal and interest resulting therefrom. Downward revisions to estimated cash flows will result in impairments.

[11] Stock-based compensation:

The Company accounts for stock-based employee compensation under FASB ASC 718, Compensation - Stock Compensation, (ASC 718). ASC 718 requires that compensation expense associated with stock options and vesting of restricted stock awards be recognized in the statement of operations.

[12] Impact of Recently Issued Accounting Standards:

In September 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-08, *Intangibles - Goodwill and Other (Topic 350)*, which amends and simplify the rules related to testing goodwill for impairment. The revised guidance allows an entity to make an initial qualitative evaluation, based on the entity's events and circumstances, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The results of this qualitative assessment determine whether it is necessary to perform the currently required two-step impairment test. The new guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. As allowed by ASU 2011-08, the Company early adopted this guidance for its fiscal year 2011 goodwill impairment test.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220)*, in order to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. This standard eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. This update requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. This update is effective for public companies for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted because compliance with the amendments is already permitted. Adoption

Edgar Filing: ASTA FUNDING INC - Form 10-K

of this update is not expected to have a material effect on the Company's results of operations or financial condition.

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

[12] Impact of Recently Issued Accounting Standards: (Continued)

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement (Topic 820)*, which results in common fair value measurement and disclosure requirements for US GAAP and International Financial Reporting Standards. ASU No. 2011-04 is effective for the first annual period beginning on or after December 15, 2011. Adoption of this update is not expected to have a material effect on the Company's results of operations or financial condition but may have an effect on disclosures.

In December 2010, the FASB issued ASU No. 2010-29, *Business Combinations (Topic 805)*, to improve consistency in how the pro forma disclosures are calculated. Additionally, ASU 2010-29 enhances the disclosure requirements and requires description of the nature and amount of any material, nonrecurring pro forma adjustments directly attributable to a business combination. The guidance will become effective for the Company with the reporting period beginning October 1, 2011, and should be applied prospectively to business combinations for which the acquisition date is after the effective date. Early adoption is permitted. Other than requiring disclosures for prospective business combinations, the adoption of this update is not expected to have an impact on the Company's consolidated financial statements.

In January 2010, the FASB issued ASU No. 2010-06, which amends the authoritative accounting guidance under ASC Topic 820, *Fair Value Measurements and Disclosures*. The update requires the following additional disclosures:

- a. Separately disclose the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers;
- b. Information about purchases, sales, issuances and settlements need to be disclosed separately in the reconciliation for fair value measurements using Level 3.

The update provides for amendments to existing disclosures as follows:

- a. Fair value measurement disclosures are to be made for each class of assets and liabilities;
- b. Disclosures about valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. The update also includes conforming amendments to guidance on employers' disclosures about postretirement benefit plan assets.

The update is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption in fiscal year 2011 did not have a material effect and future adoption is not expected to have a material effect on the Company's results of operations or financial condition.

In December 2009, the FASB issued ASU 2009-17, *Consolidations (Topic 810)*, which represents a revision to former FASB Interpretation No. 46 (Revised December 2003), *Consolidation of Variable Interest Entities*, and changes how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. ASU 2009-17 also requires a reporting entity to provide additional disclosures about its involvement with variable interest entities and any significant changes in risk exposure due to that involvement. ASU 2009-17 is effective for fiscal years beginning after November 15, 2009 and for interim periods within the first annual reporting period. The Company adopted ASU 2009-17 as of October 1, 2010, which did not have a significant effect on its financial statements.

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE A THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****[13] Reclassifications:**

Certain items in prior years' financial statements have been reclassified to conform to the current year's presentation.

NOTE B INVESTMENTS*Available-for-Sale*

Investments classified as available-for-sale at September 30, 2011 consist of the following:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Mutual Funds	\$ 14,000,000	\$	\$ (485,000)	\$ 13,515,000

The available-for-sale investments did not have any contractual maturities. There were no sales during fiscal year 2011. There were no available-for-sale investments at September 30, 2010.

At September 30, 2011, there were four investments in an unrealized loss position, all of which had current unrealized losses which had existed for 12 months or less. Based on the evaluation of the available evidence, including recent changes in market rates and credit rating information, management believes the decline in fair value for these instruments is temporary. In addition, management has the ability but does not believe it will be required to sell these investment securities for a period of time sufficient to allow for an anticipated recovery or maturity. Should the impairment of any of these securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period in which the other-than-temporary impairment is identified.

Other Investments

Other investments consist of the following:

	September 30, 2011	September 30, 2010
Certificates of deposits in banks	\$ 9,060,000	\$ 8,934,000

Certificates are generally nonnegotiable and nontransferable, and may incur substantial penalties for withdrawal prior to maturity, which will be within one year. Of the amounts shown above, the following amounts are classified as brokered certificates of deposits:

	2011	2010
Brokered certificates of deposits	\$ 1,483,000	\$ 3,925,000

Edgar Filing: ASTA FUNDING INC - Form 10-K

Brokered certificates of deposit are subject to market fluctuations if sold prior to maturity; however, it is the Company's intention to hold all certificates of deposit to maturity. All of the brokered securities referenced above are FDIC insured.

NOTE C CONSUMER RECEIVABLES ACQUIRED FOR LIQUIDATION

Accounts acquired for liquidation are stated at their net estimated realizable value and consist primarily of defaulted consumer loans to individuals throughout the country and in Central America.

F-14

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE C CONSUMER RECEIVABLES ACQUIRED FOR LIQUIDATION (CONTINUED)

The Company accounts for its investments in consumer receivable portfolios, using either:

the interest method; or

the cost recovery method.

The Company accounts for its investment in finance receivables using the interest method under the guidance of ASC 310. Under the guidance of ASC 310, static pools of accounts are established and these pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost and is accounted for as a single unit for the recognition of income, principal payments and loss provision.

Once a static pool is established for a quarter, individual receivable accounts are not added to the pool (unless replaced by the seller) or removed from the pool (unless sold or returned to the seller). ASC310 requires that the excess of the contractual cash flows over expected cash flows not be recognized as an adjustment of revenue or expense or on the balance sheet. ASC310 initially freezes the internal rate of return, referred to as IRR, estimated when the accounts receivable are purchased, as the basis for subsequent impairment testing. Significant increases in actual or expected future cash flows may be recognized prospectively through an upward adjustment of the IRR over a portfolio's remaining life. Any increase to the IRR then becomes the new benchmark for impairment testing. Rather than lowering the estimated IRR if the collection estimates are not received or projected to be received, the carrying value of a pool would be impaired, or written down to maintain the then current IRR. Under the interest method, income is recognized on the effective yield method based on the actual cash collected during a period and future estimated cash flows and timing of such collections and the portfolio's cost. Revenue arising from collections in excess of anticipated amounts attributable to timing differences is deferred until such time as a review results in a change in the expected cash flows. The estimated future cash flows are reevaluated quarterly.

The Company uses the cost recovery method when collections on a particular pool of accounts cannot be reasonably predicted. Under the cost recovery method, no income is recognized until the cost of the portfolio has been fully recovered. A pool can become fully amortized (zero carrying balance on the balance sheet) while still generating cash collections. In this case, all cash collections are recognized as revenue when received.

The Company's extensive liquidating experience is in the field of distressed credit card receivables, telecommunication receivables, consumer loan receivables, retail installment contracts, consumer receivables, and auto deficiency receivables. The Company uses the interest method for accounting for asset acquisitions within these classes of receivables when it believes it can reasonably estimate the timing of the cash flows. In those situations where the Company diversifies its acquisitions into other asset classes where the Company does not possess the same expertise or history, or the Company cannot reasonably estimate the timing of the cash flows; the Company utilizes the cost recovery method of accounting for those portfolios of receivables. At September 30, 2011, approximately \$31.2 million of the consumer receivables acquired for liquidation are accounted for using the interest method, while approximately \$84.0 million are accounted for using the cost recovery method, of which \$78.3 million is concentrated in one portfolio, the Portfolio Purchase.

The Company aggregates portfolios of receivables acquired sharing specific common characteristics which were acquired within a given quarter. The Company currently considers for aggregation portfolios of accounts, purchased within the same fiscal quarter, that generally meet the following characteristics:

same issuer/originator;

same underlying credit quality;

F-15

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

NOTE C CONSUMER RECEIVABLES ACQUIRED FOR LIQUIDATION (CONTINUED)

similar geographic distribution of the accounts;

similar age of the receivable; and

same type of asset class (credit cards, telecommunication, etc.)

The Company uses a variety of qualitative and quantitative factors to estimate collections and the timing thereof. This analysis includes the following variables:

the number of collection agencies previously attempting to collect the receivables in the portfolio;

the average balance of the receivables, as higher balances might be more difficult to collect while low balances might not be cost effective to collect;

the age of the receivables, as older receivables might be more difficult to collect or might be less cost effective. On the other hand, the passage of time, in certain circumstances, might result in higher collections due to changing life events of some individual debtors;

past history of performance of similar assets;

time since charge-off;

payments made since charge-off;

the credit originator and its credit guidelines;

the Company's ability to analyze accounts and resell accounts that meet the Company's criteria for resale;

the locations of the debtors, as there are better states to attempt to collect in and ultimately the Company has better predictability of the liquidations and the expected cash flows. Conversely, there are also states where the liquidation rates are not as favorable and that is

Edgar Filing: ASTA FUNDING INC - Form 10-K

factored into the Company's cash flow analysis;

jobs or property of the debtors found within portfolios. In the Company's business model, this is of particular importance. Debtors with jobs or property are more likely to repay their obligation and conversely, debtors without jobs or property are less likely to repay their obligation; and

the ability to obtain timely customer statements from the original issuer.

The Company obtains and utilizes, as appropriate, input, including but not limited to monthly collection projections and liquidation rates, from third party collection agencies and attorneys, as further evidentiary matter, to assist in evaluating and developing collection strategies and in evaluating and modeling the expected cash flows for a given portfolio.

F-17

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE C CONSUMER RECEIVABLES ACQUIRED FOR LIQUIDATION (CONTINUED)**

As of September 30, 2011, the Company had \$115,195,000 in consumer receivables acquired for liquidation, of which \$31,193,000 are accounted for on the interest method. Based upon current projections, net cash collections, applied to principal for interest method portfolios are estimated as follows for the twelve months in the periods ending:

September 30, 2012	\$ 18,059,000
September 30, 2013	8,344,000
September 30, 2014	3,705,000
September 30, 2015	749,000
September 30, 2016	620,000
September 30, 2017	30,000
	31,507,000
Deferred revenue	(314,000)
Total	\$ 31,193,000

Accretable yield represents the amount of income the Company can expect to generate over the remaining amortizable life of its existing portfolios based on estimated future net cash flows as of September 30, 2011. The Company adjusts the accretable yield upward when it believes, based on available evidence, that portfolio collections will exceed amounts previously estimated. Projected accretable yield for the fiscal years ended September 30, 2011 and 2010 are as follows:

	Year Ended September 30, 2011
Balance at beginning of period, October 1, 2010	\$ 15,255,000
Income recognized on finance receivables, net	(39,911,000)
Additions representing expected revenue from purchases	1,824,000
Reclassifications from non-accretable difference(1)	30,305,000
Balance at end of period, September 30, 2011	\$ 7,473,000
	Year Ended September 30, 2010
Balance at beginning of period, October 1, 2009	\$ 25,875,000
Income recognized on finance receivables, net	(43,208,000)
Additions representing expected revenue from purchases	2,424,000

Edgar Filing: ASTA FUNDING INC - Form 10-K

Reclassifications from non-accretable difference(1)	30,164,000
Balance at end of period, September 30, 2010	\$ 15,255,000

- (1) Includes portfolios that became zero based portfolios during the period, removal of zero basis portfolios from the accretable yield calculation and, other immaterial impairments and accretions based on the certain collection curves being extended.

F-18

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE C CONSUMER RECEIVABLES ACQUIRED FOR LIQUIDATION (CONTINUED)**

During the year ended September 30, 2011, the Company invested \$7.5 million in receivables totaling \$19.5 million in face value. During the year ended September 30, 2010, the Company invested approximately \$8.0 million in receivables totaling \$269 million in face value. The estimated remaining net collections on the receivables purchased and classified under the interest method (\$6.6 million) during the fiscal year ended September 30, 2011, are \$7.1 million.

The following table summarizes collections on a gross basis as received by the Company's third-party collection agencies and attorneys, less commissions and direct costs for the years ended September 30, 2011, 2010 and 2009, respectively.

	For the Years Ended, September 30,		
	2011	2010	2009
Gross collections(1)	\$ 129,688,000	\$ 157,574,000	\$ 224,528,000
Commissions and fees(2)	48,483,000	55,654,000	77,119,000
Net collections	\$ 81,205,000	\$ 101,920,000	\$ 147,409,000

(1) Gross collections include: collections from third-party collection agencies and attorneys, collections from in-house efforts and collections represented by account sales.

(2) Commissions and fees are the contractual commissions earned by third party collection agencies and attorneys, and direct costs associated with the collection effort- generally court costs. The Company expects to continue to purchase portfolios and utilize third party collection agencies and attorney networks.

Finance income recognized on net collections represented by account sales was \$0.2 million, \$1.2 million and \$3.1 million for the fiscal years ended September 30, 2011, 2010 and 2009, respectively.

NOTE D FURNITURE AND EQUIPMENT

Furniture and equipment as of September 30, 2011 and 2010 consist of the following:

	2011	2010
Furniture	\$ 310,000	\$ 310,000
Equipment	3,290,000	2,855,000
Software	180,000	153,000
Leasehold improvements	99,000	86,000

Edgar Filing: ASTA FUNDING INC - Form 10-K

	3,879,000	3,404,000
Less accumulated depreciation	3,316,000	3,066,000
Balance, end of period	\$ 563,000	\$ 338,000

Depreciation expense for the years ended September 30, 2011, 2010 and 2009 aggregated \$250,000, \$308,000 and \$411,000, respectively.

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE E NON RECOURSE DEBT AND SUBORDINATED DEBT RELATED PARTY

Receivables Financing Agreement

In March 2007, Palisades XVI borrowed approximately \$227 million under the Receivables Financing Agreement, as amended in July 2007, December 2007, May 2008 and February 2009, from BMO, in order to finance the Portfolio Purchase. The Portfolio Purchase had a purchase price of \$300 million (plus 20% of net payments after Palisades XVI recovers 150% of its purchase price plus cost of funds, which recovery has not yet occurred). Prior to the modification, discussed below, the debt was full recourse only to Palisades XVI and bore an interest rate of approximately 170 basis points over LIBOR. The original term of the agreement was three years. This term was extended by each of the Second, Third, Fourth and Fifth Amendments to the Receivables Financing Agreement as discussed below. The Receivables Financing Agreement contained cross default provisions related to the IDB Credit Facility. This cross default could only occur in the event of a non-payment in excess of \$2.5 million of the IDB Credit Facility. Proceeds received as a result of the net collections from the Portfolio Purchase are applied to interest and principal of the underlying loan. The Portfolio Purchase is serviced by Palisades Collection LLC, a wholly owned subsidiary of the Company, which has engaged unaffiliated subservicers for a majority of the Portfolio Purchase.

Since the inception of the Receivables Financing Agreement amendments have been signed to revise various terms of the Receivables Financing Agreement. Currently, the Fifth Amendment is in effect.

On October 26, 2010, Palisades XVI entered into the Fifth Amendment to the Receivables Financing Agreement (the Fifth Amendment). The effective date of the Fifth Amendment was October 14, 2010. The Fifth Amendment (i) extends the expiration date of the Receivables Financing Agreement to April 30, 2014, (ii) reduces the minimum monthly total payment to \$750,000, (iii) accelerates the Company's guarantee credit enhancement of \$8,700,000, which was paid upon execution of the Fifth Amendment, (iv) eliminates the Company's limited guarantee of repayment of the loans outstanding by Palisades XVI, and (v) revises the definition of Borrowing Base Deficit, as defined in the Receivables Financing Agreement, to mean the excess, if any, of 105% of the loans outstanding over the borrowing base.

In connection with the Fifth Amendment, on October 26, 2010, the Company entered into the Omnibus Termination Agreement (the Termination Agreement). The limited recourse subordinated guaranty discussed under the Fourth Amendment, was eliminated upon signing the Termination Agreement.

The aggregate minimum repayment obligations required under the Fifth Amendment, including interest and principal, for each of the fiscal years ending September 30, 2012 and 2013 is \$9 million annually, and, for the fiscal year ended September 30, 2014, is approximately \$53.6 million.

On September 30, 2011 and 2010, the outstanding balance on this loan was approximately \$71.6 million, and \$90.5 million, respectively. The applicable interest rate at September 30, 2011 and 2010 was 3.72% and 3.76%, respectively. The average interest rate of the Receivable Financing Agreement was 3.75% and 3.77% for the years ended September 30, 2011 and 2010, respectively.

Other significant amendments to the Receivables Financing Agreement are as follows:

Second Amendment Receivables Financing Agreement, dated December 27, 2007 revised the amortization schedule of the loan from 25 months to approximately 31 months. BMO charged Palisades XVI a fee of \$475,000 which was paid on January 10, 2008. The fee was capitalized and is being amortized over the remaining life of the Receivables Financing Agreement.

Table of Contents

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE E NON RECOURSE DEBT AND SUBORDINATED DEBT RELATED PARTY (CONTINUED)

Third Amendment Receivables Financing Agreement, dated May 19, 2008 extended the payments of the loan through December 2010. The lender also increased the interest rate from 170 basis points over LIBOR to approximately 320 basis points over LIBOR, subject to automatic reduction in the future if additional capital contributions are made by the parent of Palisades XVI.

Fourth Amendment Receivables Financing Agreement, dated February 20, 2009, among other things, (i) lowered the collection rate minimum to \$1 million per month (plus interest and fees) as an average for each period of three consecutive months, (ii) provided for an automatic extension of the maturity date from April 30, 2011 to April 30, 2012 should the outstanding balance be reduced to \$25 million or less by April 30, 2011 and (iii) permanently waived the previous termination events. The interest rate remains unchanged at approximately 320 basis points over LIBOR, subject to automatic reduction in the future should certain collection milestones be attained.

As additional credit support for repayment by Palisades XVI of its obligations under the Receivables Financing Agreement and as an inducement for BMO to enter into the Fourth Amendment, the Company provided BMO a limited recourse, subordinated guaranty, secured by the assets of the Company, in an amount not to exceed \$8.0 million plus reasonable costs of enforcement and collection. Under the terms of the guaranty, BMO cannot exercise any recourse against the Company until the earlier of (i) five years from the date of the Fourth Amendment and (ii) the termination of the Company's existing senior lending facility or any successor senior facility.

The Company's average debt obligation (excluding the subordinated debt related party) for the fiscal years ended September 30, 2011 and 2010, was approximately \$77.2 million and \$99.0 million, respectively. The average interest rate was 3.75% and 3.81%, respectively, for the years ended September 30, 2011 and 2010.

Bank Leumi Credit Agreement

On December 14, 2009 Asta Funding, Inc. and its subsidiaries other than Palisades XVI, entered into the Bank Leumi Credit Agreement which permits maximum principal advances of up to \$6 million. The term of the agreement was through December 31, 2010. The interest rate was a floating rate equal to the Bank Leumi Reference Rate plus 2%, with a floor of 4.5%. The loan was secured by collateral consisting of all of the assets of the Company other than those of Palisades XVI. In addition, other collateral for the loan consisted of a pledge by GMS Family Investors, LLC, and an investment company owned by members of the Stern family in the form of cash and securities with a value of 133% of the loan commitment. There were no financial covenant restrictions for the Bank Leumi Credit Agreement. On December 14, 2009, approximately \$3.6 million of the Bank Leumi credit line was used to reduce to zero the remaining balance of the IDB Credit Facility described below. The Bank Leumi Credit Agreement balance was reduced to zero in January 2010. The Company is working with its bank on a new credit facility with a larger credit limit.

IDB Credit Facility

The Eighth Amendment to the IDB Credit Facility entered into on July 10, 2009, granted an initial \$40 million line of credit from a consortium of banks (The Bank Group) for portfolio purchases and working capital and was scheduled to reduce to zero by December 31, 2009. The IDB Credit Facility bore interest at the lesser of LIBOR plus an applicable margin, or the prime rate minus an applicable margin based on certain leverage ratios, with a minimum rate of 5.5%. The IDB Credit Facility was collateralized by all assets of the Company other than the assets of Palisades XVI and contained financial and other covenants. The IDB Credit Facility's commitment termination date was December 31, 2009. This IDB Credit Facility was repaid on December 14, 2009.

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE E NON RECOURSE DEBT AND SUBORDINATED DEBT RELATED PARTY (CONTINUED)*****Subordinated Debt Related Party***

On April 29, 2008, the Company obtained a subordinated loan pursuant to a subordinated promissory note from the Family Entity. The Family Entity is a greater than 5% stockholder of the Company beneficially owned and controlled by Arthur Stern, a Director of the Company, Gary Stern, the Chairman, President and Chief Executive Officer of the Company, and members of their families. The loan was in the aggregate principal amount of approximately \$8.2 million, bore interest at a rate of 6.25% per annum, was payable interest only each quarter until its maturity date of January 9, 2010, subject to prior repayment in full of the Company's senior loan facility with the Bank Group. The subordinated loan was incurred by the Company to resolve certain issues related to the activities of one of the subservicers utilized by Palisades Collection LLC under the Receivables Financing Agreement. Proceeds from the subordinated loan were used initially to further collateralize the Company's revolving loan facility with the Bank Group and was used to reduce the balance due on that facility as of May 31, 2008. In December 2009, the subordinated debt-related party maturity date was extended through December 31, 2010. In addition the interest rate was changed to 10% per annum. Approximately \$3.8 million of the loan of the loan was repaid in fiscal year 2010, with the remaining \$4.4 million repaid during the first quarter of fiscal year 2011, including the final payment of \$2.4 million on December 20, 2010, reducing the balance to zero.

NOTE F OTHER LIABILITIES

Other liabilities as of September 30, 2011 and 2010 are as follows:

	2011	2010
Accounts payable and accrued expenses	\$ 980,000	\$ 1,227,000
Accrued interest payable	223,000	321,000
Due to third party servicer	1,293,000	
Other	671,000	557,000
Total other liabilities	\$ 3,167,000	\$ 2,105,000

NOTE G INCOME TAXES

The components of the provision for income taxes (benefit) for the years ended September 30, 2011, 2010 and 2009 are as follows:

	2011	2010	2009
Current:			
Federal	\$ 2,418,000	\$ 2,215,000	\$ (47,062,000)
State		175,000	(1,220,000)
Federal true up	73,000	(5,588,000)	
	2,491,000	(3,198,000)	(48,282,000)

Edgar Filing: ASTA FUNDING INC - Form 10-K

Deferred:			
Federal	2,963,000	3,882,000	1,092,000
State	1,648,000	1,428,000	(9,597,000)
	4,611,000	5,310,000	(8,505,000)
Provision for income taxes	\$ 7,102,000	\$ 2,112,000	\$ (56,787,000)

F-22

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE G INCOME TAXES (CONTINUED)**

The difference between the statutory federal income tax rate on the Company's pre-tax income and the Company's effective income tax rate is summarized for the years ended September 30, 2011, 2010 and 2009 as follows:

	2011	2010	2009
Statutory federal income tax rate	34.0%	35.0%	35.0%
State income tax, net of federal benefit	6.3	6.2	5.8
Deferred tax valuation allowance	1.8	15.8	(2.1)
Federal true up		(15.3)	
Other	(1.8)	(1.4)	(0.2)
Effective income tax rate	40.3%	40.3%	38.5%

The Company recognized a net deferred tax asset of \$14,358,000 and \$18,762,000 as of September 30, 2011 and 2010, respectively. The components are as follows:

	September 30, 2011	September 30, 2010
Deferred revenue	\$ 127,000	\$ 638,000
Impairments	8,399,000	12,228,000
State tax net operating loss carry forward	10,315,000	10,768,000
Compensation expense	1,172,000	496,000
Other	(93,000)	(131,000)
Deferred income taxes	19,920,000	23,999,000
Deferred tax valuation allowance	(5,562,000)	(5,237,000)
Deferred income taxes	\$ 14,358,000	\$ 18,762,000

The Company files consolidated Federal and state income tax returns. The Company's subsidiaries are single member limited liability companies and, therefore, do not file separate tax returns.

The Company accounts for income taxes using the asset and liability method which requires the recognition of deferred tax assets and, if applicable, deferred tax liabilities, for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and, if applicable, liabilities. Additionally, the Company would adjust deferred taxes to reflect estimated tax rate changes, if applicable. The Company conducts periodic evaluations to determine whether it is more likely than not that some or all of its deferred tax assets will not be realized. Among the factors considered in this evaluation are estimates of future earnings, the future reversal of temporary differences and the impact of tax planning strategies that the Company can implement if warranted. The Company is required to provide a valuation allowance for any portion of the Company's deferred tax assets that, more likely than not, will not be realized at September 30, 2011. Based on this evaluation, the Company has a deferred tax asset valuation allowance of approximately \$5.6 million as of September 30, 2011. Although the

Edgar Filing: ASTA FUNDING INC - Form 10-K

carryforward period for state income tax purposes is up to twenty years, given the economic conditions, such economic environment could limit growth over a reasonable time period to realize the deferred tax asset. The Company determined the time period allowance for carryforward is outside a reasonable period to forecast full realization of the deferred tax asset, therefore recognized the deferred tax asset valuation allowance. The Company continually monitors forecast information to ensure the valuation allowance is at

F-23

ASTA FUNDING, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

September 30, 2011 and 2010

NOTE G INCOME TAXES (CONTINUED)

the appropriate value. As required by FASB ASC 740, Income Taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

Upon the completion of the Company's federal tax return for fiscal year 2009 and the application for the tax refund, the Company received a federal tax refund in fiscal year 2010 of approximately \$52.7 million based on the results of fiscal year 2009 and tax law changes for net operating loss carryback. Income tax benefits related to states where the Company files tax returns only apply to future years. No loss carrybacks are allowed. The true up for the fiscal year 2010 Federal tax return was immaterial.

The Corporate federal income tax returns of the Company for 2007, 2008, 2009 and 2010 are subject to examination by the IRS, generally for three years after they are filed. The state income tax returns and other state filings of the Company are subject to examination by the state taxing authorities for various periods, generally up to four years after they are filed.

In April 2010, the Company received notification from the IRS that the Company's 2008 and 2009 federal income tax returns will be audited. This audit is currently in progress. In addition, the Company's federal income tax return 2010 has been included in the ongoing audit.

The Company files consolidated Federal and state income tax returns. The Company's subsidiaries are single member limited liability companies (LLC) and, therefore, do not file separate tax returns.

NOTE H COMMITMENTS AND CONTINGENCIES

Employment Agreements

On January 25, 2007, the Company entered into an employment agreement (the "Employment Agreement") with Gary Stern, the Company's Chairman, President and Chief Executive Officer, which was to expire on December 31, 2009, provided, however, that Gary Stern was required to provide ninety days' prior written notice if he did not intend to seek an extension or renewal of the Employment Agreement. The Company and Mr. Stern are in the process of finalizing an extension of this agreement. In the interim period Mr. Stern continues his duties as Chief Executive Officer at the discretion of the board of directors of the Company. In January 2008, the Company entered into a similar two year employment agreement with Cameron Williams, the Company's former Chief Operating Officer. The contract was not renewed and expired December 31, 2009. The Company entered into a Consulting Services Agreement with Mr. Williams for services through December 31, 2010.

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE H COMMITMENT AND CONTINGENCIES (CONTINUED)***Leases*

The Company leases its facilities in (i) Englewood Cliffs, New Jersey, (ii) Houston, Texas and (iii) Long Beach, New York. The leases are operating leases, and the Company incurred related rent expense in the amounts of \$305,000, \$395,000 and \$611,000 during the years ended September 30, 2011, 2010 and 2009, respectively. The future minimum lease payments are as follows:

Year Ending September 30,	
2012	\$ 307,000
2013	291,000
2014	292,000
2015	252,000
2016	41,000
	\$ 1,183,000

Contingencies

In the ordinary course of its business, the Company is involved in numerous legal proceedings. The Company regularly initiates collection lawsuits, using its network of third party law firms, against consumers. Also, consumers occasionally initiate litigation against the Company, in which they allege that the Company has violated a federal or state law in the process of collecting their account. The Company does not believe that these matters are material to its business and financial condition. The Company is not involved in any material litigation in which it was a defendant.

The Company received subpoenas from three jurisdictions seeking information and/or documentation regarding its business practices. The Company is fully cooperating with the issuing agencies. The Company has not made any provision with respect to these matters in the financial statements because the Company does not believe that they are material to its business and financial condition.

NOTE I CONCENTRATIONS

At September 30, 2011, approximately 29% of the Company's portfolios were serviced by seven collection organizations. The Company has servicing agreements in place with these seven collection organizations as well as all of the Company's other third party collection agencies and attorneys that cover standard contingency fees and servicing of the accounts.

NOTE J STOCK OPTION PLANS*Equity Compensation Plan*

On December 1, 2005, the board of directors adopted the Company's Equity Compensation Plan (the Equity Compensation Plan), which was approved by the stockholders of the Company on March 1, 2006. The Equity Compensation Plan was adopted to supplement the Company's

Edgar Filing: ASTA FUNDING INC - Form 10-K

existing 2002 Stock Option Plan. In addition to permitting the grant of stock options as are permitted under the 2002 Stock Option Plan, the Equity Compensation Plan allows the Company flexibility with respect to equity awards by also providing for grants of stock awards (i.e. restricted or unrestricted), stock purchase rights and stock appreciation rights.

F-25

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE J STOCK OPTION PLANS (CONTINUED)**

The general purpose of the Equity Compensation Plan is to provide an incentive to the Company's employees, directors and consultants, including executive officers, employees and consultants of any subsidiaries, by enabling them to share in the future growth of the business.

The Company has 1,000,000 shares of Common Stock authorized for issuance under the Equity Compensation Plan and 495,569 were available as of September 30, 2011. As of September 30, 2011, approximately 87 of the Company's employees were eligible to participate in the Equity Compensation Plan. Future grants under the Equity Compensation Plan have not yet been determined.

2002 Stock Option Plan

On March 5, 2002, the board of directors adopted the Asta Funding, Inc. 2002 Stock Option Plan (the 2002 Plan), which plan was approved by the Company's stockholders on May 1, 2002. The 2002 Plan was adopted in order to attract and retain qualified directors, officers and employees of, and consultants to, the Company. The following description does not purport to be complete and is qualified in its entirety by reference to the full text of the 2002 Plan, which is included as an exhibit to the Company's reports filed with the SEC.

The 2002 Plan authorizes the granting of incentive stock options (as defined in Section 422 of the Code) and non-qualified stock options to eligible employees of the Company, including officers and directors of the Company (whether or not employees) and consultants of the Company.

The Company has 1,000,000 shares of Common Stock authorized for issuance under the 2002 Plan and 134,634 were available as of September 30, 2011. As of September 30, 2011, approximately 87 of the Company's employees were eligible to participate in the 2002 Plan.

In June 2011, the Compensation Committee of the board of directors of the Company (the Compensation Committee) granted 50,000 stock options to a consultant. The exercise price of these options was above the market price on the date of the grant. The weighted average assumptions used in the option pricing model were as follows:

Risk-free interest rate	0.09%
Expected term (years)	10.0
Expected volatility	105.4%
Dividend yield	0.95%

In March 2011, the Compensation Committee granted 10,000 stock options to an employee. The exercise price of these options was at the market price on the date of the grant. The weighted average assumptions used in the option pricing model were as follows:

Risk-free interest rate	0.10%
Expected term (years)	10.0
Expected volatility	106.2%
Dividend yield	0.94%

In December 2010, the Compensation Committee granted 324,800 stock options, of which 30,000 options were issued to each non-employee independent director for a total of 150,000 stock options. 60,000 stock options were awarded to the Chief Executive Officer and 30,000 stock options were awarded to the Chief Financial Officer and the Senior Vice President. The remaining 54,800 stock options were granted to full time

employees of the

F-26

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE J STOCK OPTION PLANS (CONTINUED)**

Company, who had been employed at the Company for at least six months prior to the date of grant. The grants to employees excluded officers of the Company. The exercise price of these options was at the market price on the date of the grant. The exercise price of all stock options was at the market price on the date of the grant. The weighted average assumptions used in the option pricing model were as follows:

Risk-free interest rate	0.17%
Expected term (years)	10.0
Expected volatility	106.9%
Dividend yield	0.98%

Additionally, in December 2010, the Compensation Committee issued 32,765 shares of restricted stock to the Chief Executive Officer.

In December 2009, the Compensation Committee granted 25,000 stock options to each director of the Company other than the Chief Executive Officer, for a total of 150,000 options, and 8,900 stock options to full time employees of the Company who had been employed at the Company for at least six months prior to the date of grant. The grants to employees excluded officers of the Company. The exercise price of these options was at the market price on the date of the grant. The weighted average assumptions used in the option pricing model were as follows:

Risk-free interest rate	0.17%
Expected term (years)	10.0
Expected volatility	110.2%
Dividend yield	1.12%

1995 Stock Option Plan

The 1995 Stock Option Plan expired on September 14, 2005. The plan was adopted in order to attract and retain qualified directors, officers and employees of, and consultants to the Company. The following description does not purport to be complete and is qualified in its entirety by reference to the full text of the 1995 Stock Option Plan, which is included as an exhibit to the Company's reports filed with the SEC.

The 1995 Stock Option Plan authorized the granting of incentive stock options (as defined in Section 422 of the Internal Revenue Code of 1986, as amended [the Code]) and non-qualified stock options to eligible employees of the Company, including officers and directors of the Company (whether or not employees) and consultants to the Company.

The Company authorized 1,840,000 shares of Common Stock for issuance under the 1995 Stock Option Plan. All but 96,002 shares were utilized. As of September 14, 2005, no more options could be issued under this plan.

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE J STOCK OPTION PLANS (CONTINUED)**

The following table summarizes stock option transactions under the plans:

	2011		Year Ended September 30, 2010		2009	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding options at the beginning of year	922,039	\$ 12.70	1,157,905	\$ 10.76	1,037,438	\$ 11.69
Options granted	384,800	7.53	158,900	8.07	122,000	2.95
Options cancelled	(6,300)	6.07	(66,700)	17.48	(1,000)	28.75
Options exercised	(6,268)	3.35	(328,066)	2.65	(533)	2.95
Outstanding options at the end of year	1,294,271	\$ 11.41	922,039	\$ 12.70	1,157,905	\$ 10.76
Exercisable options at the end of year	992,607	\$ 12.41	792,377	\$ 13.65	1,081,912	\$ 11.31

The Company recognized \$1,906,000 of compensation expense related to stock options in the fiscal year ended September 30, 2011. As of September 30, 2011, there was \$1,176,000 of unrecognized compensation cost related to unvested stock options. The Company recognized \$807,000 and \$164,000 of stock based compensation expense related to stock option grants in fiscal year 2010 and 2009, respectively.

The intrinsic value of the options exercised during fiscal year 2010 was approximately \$30,000. The intrinsic value of options exercised during the fiscal year ended September 30, 2010 was \$1.3 million and there was no intrinsic value for the options exercised in 2009. There was no intrinsic value of the outstanding and exercisable options as of September 30, 2011, 2010 and 2009.

The following table summarizes information about the plans outstanding options as of September 30, 2011:

Range of Exercise Price	Options Outstanding			Options Exercisable

Vested	(28,591)	15.11	(17,669)	19.73
Forfeited		0.00		0.00
Unvested at the end of period	21,843	\$ 7.63	17,669	\$ 19.73

The Company recognized \$149,000, \$382,000 and \$820,000 of compensation expense during the fiscal years ended September 30, 2011, 2010 and 2009, respectively, for restricted stock. As of September 30, 2011, there was \$101,000 of unrecognized compensation cost related to unvested restricted stock.

The Company recognized a total of \$2,055,000, \$1,189,000 and \$984,000 in compensation expense for the fiscal years ended September 30, 2011, 2010 and 2009, respectively, for the stock options and restricted stock grants. As of September 30, 2011, there was a total of \$1,277,000 of unrecognized compensation cost related to unvested stock options and restricted stock grants. The method used to calculate stock based compensation is the straight line pro-rated method.

NOTE K STOCKHOLDERS EQUITY

During the year ended September 30, 2011, the Company declared quarterly cash dividends aggregating \$1,170,000, which includes \$0.02 per share, per quarter, of which \$293,000 was accrued as of September 30, 2011 and paid November 1, 2011.

During the year ended September 30, 2010, the Company declared quarterly cash dividends aggregating \$1,161,000, which includes \$0.02 per share, per quarter, of which \$292,000 was accrued as of September 30, 2010 and paid November 1, 2010.

The Company expects to pay a regular cash dividend in future quarters, but the amount has not yet been determined. This will be at the discretion of the board of directors and will depend upon the Company's financial condition, operating results, capital requirements and any other factors the board of directors deems relevant. In addition, agreements with the Company's lenders may, from time to time, restrict the ability to pay dividends. As of September 30, 2011, there were no such restrictions.

On June 20, 2011, the Company's board of directors authorized a share repurchase program for up to \$20.0 million of the Company's common stock. The program calls for repurchases to be made in the open market or in privately negotiated transactions from time to time in compliance with applicable laws, rules, and regulations, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended, subject to cash requirements for other purposes, and other relevant factors, such as trading price, trading volume and general market and business conditions.

Edgar Filing: ASTA FUNDING INC - Form 10-K

There is no guarantee as to the exact number of shares that will be purchased, and the Company may discontinue repurchases at any time that the board of directors determines that additional repurchases are not warranted. The Company repurchased an aggregate of approximately \$70,000 of its common stock, at cost, during August 2011.

F-29

Table of Contents**ASTA FUNDING, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements****September 30, 2011 and 2010****NOTE L RETIREMENT PLAN**

The Company maintains a 401(k) Retirement Plan covering all of its eligible employees. Matching contributions made by the Company to the plan are made at the discretion of the board of directors each plan year. Contributions for the years ended September 30, 2011, 2010 and 2009 were \$106,000, \$95,000 and \$74,000, respectively.

NOTE M FAIR VALUE MEASUREMENT AND DISCLOSURES***Disclosures about Fair Value of Financial Instruments***

FASB ASC 825, Financial Instruments, (ASC 825), requires disclosure of fair value information about financial instruments, whether or not recognized on the balance sheet, for which it is practicable to estimate that value. Because there are a limited number of market participants for certain of the Company's assets and liabilities, fair value estimates are based upon judgments regarding credit risk, investor expectation of economic conditions, normal cost of administration and other risk characteristics, including interest rate and prepayment risk. These estimates are subjective in nature and involve uncertainties and matters of judgment, which significantly affect the estimates.

The estimated fair value of the Company's financial instruments is summarized as follows:

	September 30, 2011		September 30, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets				
Cash and cash equivalents	\$ 84,347,000	\$ 84,347,000	\$ 75,301,000	\$ 75,301,000
Available-for-sale investments	13,515,000	13,515,000		
Other investments	9,060,000	9,060,000	8,934,000	8,934,000
Consumer receivables acquired for liquidation	115,195,000	135,234,000	147,031,000	179,730,000
Financial liabilities				
Non recourse debt and subordinated debt (related party)	71,604,000	71,604,000	94,869,000	94,869,000

Disclosure of the estimated fair values of financial instruments often requires the use of estimates. The Company uses the following methods and assumptions to estimate the fair value of financial instruments:

Cash and cash equivalents The carrying amount approximates fair value.

Available-for-sale investments The available-for-sale securities consist of mutual funds that are valued based on quoted prices in active markets.

Other investments The carrying amount approximates fair value.

Consumer receivables acquired for liquidation The Company computed the fair value of the consumer receivables acquired for liquidation using its proprietary forecasting model. The Company's forecasting model utilizes a discounted cash flow analysis. The Company's cash flows are an estimate of collections for consumer receivables based on variables fully described in Note C: Consumer Receivables Acquired for Liquidation. These cash flows are discounted to determine the fair value.

Debt and subordinated debt (related party) The carrying value of debt and subordinated debt (related party) approximates fair value as the majority of these loan balances are variable rate and short-term in nature.

Fair Value Measurements

The Company recorded its available-for-sale investments at estimated fair value on a recurring basis. The accompanying consolidated financial statements include estimated fair value information regarding its

NOTE M FAIR VALUE MEASUREMENT AND DISCLOSURES (CONTINUED)

available-for sale investments as of September 30, 2011, as required by FASB ASC 820, Fair Value Measurements and Disclosures (ASC 820). There were no available-for-sale investments as of September 30, 2010. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument s level within the fair value hierarchy is based on the lowest level of input significant to the fair value measurement.

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to assess at the measurement date.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities in active markets; quoted prices in markets that are not active for identical or similar assets or liabilities; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3 Unobservable inputs that are supported by little or no market activity and significant to the fair value of the liabilities that are developed using the reporting entities estimates and assumptions, which reflect those that market participants would use.

The Company s available for-sale investments are classified as Level 1 financial instruments based on the classifications described above. The Company did not have any transfers into (out of) Level 1 investments during the fiscal year end September 30, 2011. The Company had no Level 2 or 3 investments during the fiscal year ended September 30, 2011.

NOTE N RELATED PARTY TRANSACTIONS

On April 29, 2008, the Company obtained a subordinated loan pursuant to a subordinated promissory note from the Family Entity. The loan is in the aggregate principal amount of approximately \$8.2 million, bears interest at a rate of 6.25% per annum, is payable interest only each quarter until its maturity date of January 9, 2010, subject to prior repayment in full of the Company s senior loan facility with the Bank Group. In December 2009 the promissory note s maturity date was extended to December 31, 2010, and the interest rate was changed to 10% per annum.

On January 27, 2010, the Company re-paid approximately \$860,740 of the subordinated loan. The Company delivered \$787,500 to the Family Entity, and will deliver \$73,240 to BMO to hold as collateral, as approximately 8.5% of the loan to the Family Entity secures the obligations due to BMO by Palisades Acquisition XVI, LLC, and the Company s wholly owned subsidiary. The Family Entity then delivered its portion of the loan payment to Gary Stern, who used it to exercise the stock options awarded to him in the year 2000 (300,000 stock options under the 1995 Stock Option Plan of Asta Funding, Inc. with an exercise price of \$2.625 per share). On February 17, 2010, the Company re-paid \$1,500,000 of principal of the subordinated loan. The Company delivered \$1,372,365 to the Family Entity, and delivered \$127,635 to BMO to hold as collateral.

The Company paid GMS Family Investors, a related party, a 2% collateral fee of \$160,000, related to the assets pledged by GMS Family Investors for the \$6.0 million Bank Leumi Credit Agreement.

On March 26, 2010, the Company re-paid \$1,500,000 of principal of the subordinated loan. The Company delivered \$1,372,365 to the Family Entity, and the remaining \$127,635 to BMO to hold as collateral.

Edgar Filing: ASTA FUNDING INC - Form 10-K

On November 16, 2010, the Company repaid \$1,970,000 of principal on the Subordinated Loan with the Family entity. The remaining balance due to the Family Entity under the Subordinated Loan after this payment is approximately \$2,416,000. That balance was repaid on December 20, 2010.
