SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2012

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES AND EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number 0-8408

WOODWARD, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: Woodward, Inc. - Form 10-Q

Delaware (State or other jurisdiction of incorporation or organization)	36-1984010 (I.R.S. Employer Identification No.)
1000 East Drake Road, Fort Collins, Colorado (Address of principal executive offices)	80525 (Zip Code)
Registrant's telephone number, including area code: (970) 482-5811	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definitions of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes ☐ No ☒

As of April 19, 2012, 69,146,674 shares of the common stock with a par value of \$0.001455 per share were outstanding.

WOODWARD, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share amounts)

(Unaudited)

Note 1. Basis of presentation

The Condensed Consolidated Financial Statements of Woodward, Inc. (Woodward or the Company) as of March 31, 2012 and for the three and six-months ending March 31, 2012 and March 31, 2011, included herein, have not been audited by an independent registered public accounting firm. These Condensed Consolidated Financial Statements reflect all normal recurring adjustments that, in the opinion of management, are necessary to present fairly Woodward's financial position as of March 31, 2012, and the results of operations, cash flows, and changes in stockholders' equity for the periods presented herein. The Condensed Consolidated Balance Sheet as of September 30, 2011 was derived from Woodward's Annual Report on Form 10-K for the fiscal year then ended. The results of operations for the three and six-months ending March 31, 2012 are not necessarily indicative of the operating results to be expected for other interim periods or for the full fiscal year. Dollar amounts contained in these Condensed Consolidated Financial Statements are in thousands, except per share amounts.

The Condensed Consolidated Financial Statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for interim reporting. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations.

These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and Notes thereto included in Woodward's most recent Annual Report on Form 10-K filed with the SEC and other financial information filed with the SEC.

Management is required to use estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements, the reported revenues and expenses recognized during the reporting period, and certain financial statement disclosures, in the preparation of the Condensed Consolidated Financial Statements. Significant estimates in these Condensed Consolidated Financial Statements include allowances for losses, net realizable value of inventories, warranty reserves, timing of recognition on percentage complete on long-term contracts, cost of sales incentives, useful lives of property and identifiable intangible assets, the evaluation of impairments of property, identifiable intangible assets and goodwill, income tax and valuation reserves, the valuation of assets and liabilities acquired in business combinations, assumptions used in the determination of the funded status and annual expense of pension and postretirement employee benefit plans, the valuation of stock compensation instruments granted to employees, and contingencies. Actual results could vary materially from Woodward's estimates.

Woodward serves two significant markets – the aerospace market and the energy market. In order to better serve these markets, Woodward completed a realignment of its reportable segments at September 30, 2011 and now reports its financial results through two reportable segments Aerospace and Energy. The Aerospace segment combines the aircraft propulsion portion of the former Turbine Systems business group, now referred to as the Aircraft Turbine Systems business group, with the Airframe Systems business group. The Energy segment combines the industrial turbine portion of the former Turbine Systems business group, now referred to as the Industrial Turbomachinery Systems business group, with the Engine Systems and Electrical Power Systems business groups.

Prior period information has been revised to be consistent with the Company's current reportable segment structure, which is based upon how it managed its business as of September 30, 2011 and during the first half of fiscal year 2012.

Note 2. Recent accounting pronouncements

From time to time, the Financial Accounting Standards Board (FASB) or other standard-setting bodies issue new accounting pronouncements. Updates to the FASB Accounting Standards Codification (ASC) are communicated through issuance of an Accounting Standards Update (ASU).

In September 2011, the FASB issued ASU 2011-08, Testing Goodwill for Impairment. ASU 2011-08 allows companies to perform a qualitative assessment to determine whether or not the current two-step quantitative testing method, in which a company compares the fair value of reporting units to its carrying amount including goodwill, must be followed. If a qualitative assessment indicates that it is more-likely-than-not

Edgar Filing: Woodward, Inc. - Form 10-Q

that the fair value of a reporting unit is greater than its carrying amount, then the quantitative impairment test is not required. A company may choose to use the qualitative assessment on none, some, or all of its reporting units or to bypass the qualitative assessment and proceed directly to the two-step quantitative testing method. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011; however, early adoption is permitted. Woodward does not anticipate that the adoption of ASU 2011-08 will have a material impact on Woodward's Condensed Consolidated Financial Statements.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)***Note 3. Earnings per share**

Basic earnings per share is computed by dividing net earnings available to common stockholders by the weighted-average number of shares of common stock outstanding for the period.

Diluted earnings per share reflects the weighted-average number of shares outstanding after the assumed conversion of all dilutive securities.

The following is a reconciliation of net earnings to basic earnings per share and diluted earnings per share:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Numerator:				
Net earnings	\$ 38,751	\$ 32,090	\$ 67,168	\$ 54,489
Denominator:				
Basic shares outstanding	69,077	68,752	68,998	68,782
Dilutive effect of stock options	1,547	1,355	1,506	1,358
Diluted shares outstanding	70,624	70,107	70,504	70,140
Income per common share:				
Basic earnings per share	\$ 0.56	\$ 0.47	\$ 0.97	\$ 0.79
Diluted earnings per share	\$ 0.55	\$ 0.46	\$ 0.95	\$ 0.78

The following stock option grants were outstanding during the three and six-months ending March 31, 2012 and 2011, but were excluded from the computation of diluted earnings per share because their inclusion would have been anti-dilutive:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Options	6	680	39	678
Weighted-average option price	\$ 40.60	\$ 32.03	\$ 34.63	\$ 32.02

The weighted-average shares of common stock outstanding for basic and diluted earnings per share included weighted-average treasury stock shares held for deferred compensation obligations of the following:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Weighted-average treasury stock shares held for deferred compensation obligations	304	345	307	348

Note 4. Business acquisitions

IDS Acquisition

During the third quarter of fiscal year 2011, Woodward acquired all of the outstanding stock of Integral Drive Systems AG and its European companies, including their respective holding companies (IDS), and the assets of IDS 's business in China (collectively, the IDS Acquisition) for an aggregate cash purchase price of \$48,412 paid to the sellers.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

IDS is a developer and manufacturer of innovative power electronic systems predominantly in utility scale wind turbines and photovoltaic power plants. Additionally, IDS offers key products in power distribution and marine propulsion systems. In addition to wind turbines and photovoltaic plants, its products are used in offshore oil and gas platforms, energy storage and distribution systems, and a variety of industrial applications. IDS has been integrated into Woodward's Energy segment.

The Company believes the IDS Acquisition expands its presence in wind converter offerings and reduces its time to market with expansion of solar energy, energy storage, and marine drives. Goodwill recorded in connection with the IDS Acquisition, which is not deductible for income tax purposes, represents the estimated value of such future opportunities, the value of potential expansion with new customers, the opportunity to further develop sales opportunities with new and acquired IDS customers, and anticipated synergies expected to be achieved through the integration of IDS into Woodward's Energy segment.

As of March 31, 2012, an amount of \$7,987 paid in connection with the IDS Acquisition was deposited into escrow accounts to secure Woodward's ability to recover any amounts owed to Woodward by the sellers as a result of customary indemnities related to representations and warranties made by the sellers. Funds held in escrow will only be released to the sellers as specified in the related purchase agreements.

The purchase price of the IDS Acquisition is as follows:

Cash paid to sellers	\$ 48,412
Less cash acquired	(1,251)
Total purchase price	47,161
Less marketable securities acquired	(8,463)
Price paid for business assets	\$ 38,698

The allocation of the purchase price to the assets acquired and liabilities assumed was finalized as of March 31, 2012. Assets acquired and liabilities assumed in the transaction were recorded at their acquisition date fair values, while transaction costs associated with the acquisition were expensed as incurred. The Company's allocation was based on an evaluation of the appropriate fair values and represents management's best estimate based on available data.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of the IDS Acquisition:

Current assets	\$ 14,627
Investments in marketable securities	8,463
Property, plant, and equipment	1,954
Goodwill	24,188
Intangible assets	11,882
Total assets acquired	61,114

Edgar Filing: Woodward, Inc. - Form 10-Q

Other current liabilities	5,505
Warranty accrual	2,250
Postretirement benefits	434
Deferred tax liabilities	2,472
Other tax noncurrent	3,292
 Total liabilities assumed	 13,953
 Net assets acquired	 \$ 47,161

There were no changes to the values of assets acquired and liabilities assumed during the three and six-months ending March 31, 2012. The fair value of warranty liabilities assumed represents the estimated costs to provide service for contractual warranty obligations on products sold by IDS and IDS's business in China prior to the IDS Acquisition. The fair value of Other tax noncurrent represents the estimated value of gross unrecognized tax benefits assumed.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

In connection with the IDS Acquisition, Woodward acquired various marketable securities, which are not classified as cash equivalents under U.S. GAAP. These marketable securities were sold during the fiscal quarter ended June 30, 2011 and reinvested into cash and cash equivalents consistent with Woodward's internal investment and risk management policies. Losses on the sale of marketable securities were included in Other (income) expense, net in the Condensed Consolidated Statements of Earnings for the fiscal quarter ended June 30, 2011.

Also, in connection with the IDS Acquisition, Woodward assumed the net postretirement benefit obligations of five Swiss statutory retirement plans which are considered to be defined benefit plans under U.S. GAAP.

A summary of the intangible assets acquired, weighted-average useful lives, and amortization methods follows:

	Amount	Weighted-Average Useful Life	Amortization Method
Customer relationships	\$ 3,452	9 years	Straight-line
Process technology	7,752	8.5 years	Straight-line
Other	678	2.5 years	Straight-line
Total	\$ 11,882	8 years	

The operating results of the IDS Acquisition are included in Woodward's Consolidated Statements of Earnings and Comprehensive Earnings beginning April 15, 2011. Pro forma financial disclosures have not been presented, as the IDS Acquisition was not significant to Woodward's financial position or results of operations. The Company incurred transaction costs of \$2,396 during the year ending September 30, 2011, which were included in Selling, general and administrative expenses in the Condensed Consolidated Statements of Earnings. No additional transactions costs were incurred in the six-months ending March 31, 2012.

Note 5. Financial instruments and fair value measurements

The estimated fair values of Woodward's financial instruments were as follows:

	At March 31, 2012		At September 30, 2011	
	Estimated Fair Value	Carrying Cost	Estimated Fair Value	Carrying Cost
Cash and cash equivalents	\$ 56,329	\$ 56,329	\$ 74,539	\$ 74,539
Investments in deferred compensation program	7,221	7,221	5,855	5,855
Short-term borrowings	(32,500)	(32,500)		
Long-term debt, including current portion	(464,137)	(410,728)	(482,776)	(425,246)

The fair values of cash and cash equivalents, which include investments in money market funds and reverse repurchase agreements for the overnight investment of excess cash in U.S. government and government agency obligations, are assumed to be equal to their carrying amounts. Cash and cash equivalents have short-term maturities and market interest rates. Woodward's cash and cash equivalents include funds deposited or invested in the U.S. and overseas that are not insured by the Federal Deposit Insurance Corporation (FDIC). Woodward believes that its deposited and invested funds are held by or invested with credit worthy financial institutions or counterparties.

Edgar Filing: Woodward, Inc. - Form 10-Q

Investments related to the deferred compensation program used to provide deferred compensation benefits to certain employees are carried at market value.

The fair values of short-term borrowings at variable interest rates are assumed to be equal to their carrying amounts because such borrowings are expected to be repaid or settled for their carrying amounts within a short period of time.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

The fair value of long-term debt was estimated based on a model that discounted future principal and interest payments at interest rates available to the Company at the end of the period for similar debt of the same maturity, which is a Level 2 input as defined below. The weighted-average interest rates used to estimate the fair value of long-term debt were as follows:

	March 31, 2012	September 30, 2011
Weighted-average interest rate used to estimate fair value	2.5%	2.6%

Financial assets and liabilities recorded at fair value in the Condensed Consolidated Balance Sheet are categorized based upon a fair value hierarchy established by U.S. GAAP, which prioritizes the inputs used to measure fair value into the following levels:

Level 1: Inputs based on quoted market prices in active markets for identical assets or liabilities at the measurement date.

Level 2: Quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable and can be corroborated by observable market data.

Level 3: Inputs reflect management's best estimates and assumptions of what market participants would use in pricing the asset or liability at the measurement date. The inputs are unobservable in the market and significant to the valuation of the instruments.

The table below presents information about Woodward's financial assets that are measured at fair value on a recurring basis and indicates the fair value hierarchy of the valuation techniques Woodward utilized to determine such fair value. Woodward had no financial liabilities required to be measured at fair value on a recurring basis as of March 31, 2012 or September 30, 2011.

	At March 31, 2012				At September 30, 2011			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Financial assets:								
Investments in money market funds	\$ 19,390	\$	\$	\$ 19,390	\$ 10,823	\$	\$	\$ 10,823
Equity securities	7,221			7,221	5,855			5,855
Total financial assets	\$ 26,611	\$	\$	\$ 26,611	\$ 16,678	\$	\$	\$ 16,678

Investments in money market funds: Woodward sometimes invests excess cash in money market funds not insured by the FDIC. Woodward believes that the investments in money market funds are on deposit with creditworthy financial institutions and that the funds are highly liquid. The investments in money market funds are reported at fair value, with realized gains from interest income realized in earnings, and included in Cash and cash equivalents. The fair values of Woodward's investments in money market funds are based on the quoted market prices for the net asset value of the various money market funds.

Equity securities: Woodward holds marketable equity securities, through investments in various mutual funds, related to its deferred compensation program. Based on Woodward's intentions regarding these instruments, marketable equity securities are classified as trading securities. The trading securities are reported at fair value, with realized gains and losses recognized in earnings. The trading securities are included in Other current assets. The fair values of Woodward's trading securities are based on the quoted market prices for the net asset value of the various mutual funds.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)***Note 6. Derivative instruments and hedging activities**

Woodward is exposed to global market risks, including the effect of changes in interest rates, foreign currency exchange rates, changes in certain commodity prices and fluctuations in various producer indices. From time to time, Woodward enters into derivative instruments for risk management purposes only, including derivatives designated as accounting hedges and/or those utilized as economic hedges. Woodward uses interest rate related derivative instruments to manage its exposure to fluctuations of interest rates. Woodward does not enter into or issue derivatives for trading or speculative purposes.

By using derivative and/or hedging instruments to manage its risk exposure, Woodward is subject, from time to time, to credit risk and market risk on those derivative instruments. Credit risk arises from the potential failure of the counterparty to perform under the terms of the derivative and/or hedging instrument. When the fair value of a derivative contract is positive, the counterparty owes Woodward, which creates credit risk for Woodward. Woodward mitigates this credit risk by entering into transactions with only credit worthy counterparties. Market risk arises from the potential adverse effects on the value of derivative and/or hedging instruments that result from a change in interest rates, commodity prices, or foreign currency exchange rates. Woodward mitigates this market risk by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken.

Derivatives in foreign currency relationships

Woodward did not enter into any hedging transactions during the three or six-months ending March 31, 2012 and was not a party to any derivative instruments as of March 31, 2012 or September 30, 2011.

In September 2010, Woodward entered into a foreign currency exchange rate contract to purchase 39,000 for approximately \$52,549 in early December 2010. An unrealized gain of \$579 on this derivative was carried at fair market value in Other current assets as of September 30, 2010. In December 2010, a loss of \$1,033 was realized on the settlement of this forward contract and was recorded in Other (income) expense, net.

The objective of this derivative instrument, which was not designated as an accounting hedge, was to limit the risk of foreign currency exchange rate fluctuations on certain short-term intercompany loan balances.

The following table discloses the remaining unrecognized gains and losses in Woodward's Condensed Consolidated Balance Sheets associated with terminated derivative instruments that were previously entered into by the Company:

	March 31, 2012	September 30, 2011
Derivatives designated as hedging instruments		Unrecognized Gain (Loss)
Classified in accumulated other comprehensive earnings	\$ (693)	\$ (781)
Classified in current and long-term debt		3
	\$ (693)	\$ (778)

The following tables disclose the impact of derivative instruments on Woodward's Condensed Consolidated Statements of Earnings:

Based on the carrying value of the unrecognized gains and losses on terminated derivative instruments designated as cash flow hedges as of March 31, 2012, Woodward expects to reclassify \$171 of net unrecognized losses on terminated derivative instruments from accumulated other comprehensive earnings to earnings during the next twelve months.

During fiscal year 2010, Woodward began construction of a new forty-eight thousand square foot system test facility in Rockford, Illinois. In the first half of fiscal year 2012, Woodward placed into service assets totaling \$16,738 associated with the new system test facility, the majority of which is included in Buildings and improvements. As of March 31, 2012, \$5,247 of assets related to the system test facility remained as construction in progress and are expected to be placed into service by the end of fiscal year 2012. The facility, which houses numerous environmental system test cells and a vibration lab, will support, among other development projects, Woodward's Aerospace segment development efforts of next generation fuel systems for aircraft turbines.

The increase in Computer equipment and software of \$16,166 was primarily related to assets that were placed into service during the second quarter of fiscal year 2012 associated with a new enterprise resource planning (ERP) system for a group within Woodward's Aerospace segment.

For the three and six-months ending March 31, 2012 and March 31, 2011, Woodward had capitalized interest that would have otherwise been included in interest expense as follows:

Three-Months Ending March 31,		Six-Months Ending March 31,	
2012	2011	2012	2011

Edgar Filing: Woodward, Inc. - Form 10-Q

Capitalized interest	\$ 124	\$ 315	\$ 428	\$ 513

Woodward tests goodwill for impairment at the reporting unit level on an annual basis and more often if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The impairment tests consist of comparing the implied fair value of each identified reporting unit with its carrying amount including goodwill. If the carrying amount of the reporting unit exceeds its implied fair value, Woodward compares the implied fair value of goodwill with the recorded carrying amount of goodwill. If the carrying amount of goodwill exceeds the implied fair value of goodwill, an impairment loss would be recognized to reduce the carrying amount to its implied fair value.

Woodward completed its annual goodwill impairment test as of July 31, 2011 during the quarter ended September 30, 2011. As a part of that test, the fair value of each of Woodward's reporting units was determined using a discounted cash flow method. This method represents a Level 3 input and incorporates various estimates and assumptions, the most significant being projected revenue growth rates, operating earnings margins, and forecasted cash flows based on the discount rate and terminal growth rate. Management projects revenue growth rates, operating earnings margins and cash flows based on each reporting unit's current operational results, expected performance and operational strategies over a five or ten-year period. These projections are adjusted to reflect economic conditions and the demand for certain products and require considerable management judgment.

Forecasted cash flows used in the July 31, 2011 impairment test were discounted using weighted-average cost of capital assumptions from 10.0% to 10.2%. The terminal values of the forecasted cash flows were calculated using the Gordon Growth Model and assumed an annual compound growth rate after five or ten years of 4.3%. These inputs, which are unobservable in the market, represent management's best estimate of what market participants would use in determining the present value of the Company's forecasted cash flows. Changes in these estimates and assumptions can have a significant impact on the fair value of forecasted cash flows. Woodward evaluated the reasonableness of the reporting units resulting fair values utilizing a market multiple method.

The results of Woodward's goodwill impairment tests performed as of July 31, 2011 indicated the estimated fair value of each reporting unit was substantially in excess of its carrying value, and accordingly, no impairment existed.

As part of the Company's ongoing monitoring efforts, Woodward will continue to consider the global economic environment and its potential impact on Woodward's business at a reporting unit level in assessing goodwill recoverability. There can be no assurance that Woodward's estimates and assumptions regarding forecasted cash flows of certain reporting units, the period or strength of the current economic recovery, or the other inputs used in forecasting the present value of forecasted cash flows will prove to be accurate projections of future performance.

WOODWARD, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share amounts)

(Unaudited)

Note 12. Credit facilities, short-term borrowings and long-term debt

As of December 31, 2011, Woodward had a \$225,000 revolving credit facility related to unsecured financing arrangements with a syndicate of U.S. banks. The revolving credit facility agreement provided for an option to increase available borrowings to \$350,000, subject to the lenders participation, and had an expiration date of October 2012. The interest rate on borrowings under the revolving credit facility agreement varied with LIBOR, the federal funds rate, or the prime rate.

On January 4, 2012, the \$225,000 revolving credit facility was amended and restated by the Third Amended and Restated Credit Agreement (the Amended and Restated Revolver Agreement) entered into between Woodward and a syndicate of nine lenders led by JPMorgan Chase Bank, N.A., as administrative agent. The Amended and Restated Revolver Agreement extended the existing revolving credit facility's maturity to January 2017. The borrowing capacity increased from \$225,000 to \$400,000 and the option, subject to the lenders' participation, to expand the commitment increased from \$125,000 to \$200,000, for a total borrowing capacity of up to \$600,000. Borrowings under the Amended and Restated Revolver Agreement generally bear interest at LIBOR plus 0.95% to 1.525%. Outstanding borrowings under the revolving credit facility as of March 31, 2012 were \$27,500, at an effective interest rate of 1.29%.

The Amended and Restated Revolver Agreement contains certain covenants customary with such agreements, which are generally consistent with the covenants applicable to Woodward's long-term debt agreements, and contains customary events of default, including certain cross default provisions related to Woodward's other outstanding debt arrangements in excess of \$30,000, the occurrence of which would permit the lenders to accelerate the amounts due thereunder. In addition, the Amended and Restated Revolver Agreement increases the minimum required consolidated net worth of Woodward to a base of \$725,000, plus 50% of Woodward's positive net income for the prior fiscal year and plus 50% of Woodward's net cash proceeds resulting from certain issuances of stock, subject to certain adjustments. Woodward also made amendments to its existing Term Loan Credit Agreement, dated as of October 1, 2008 (the Term Loan Agreement), that provided for certain changes to, among other things, the affirmative, negative and financial covenants of the Term Loan Agreement consistent with the covenant provisions in the Amended and Restated Revolver Agreement.

Woodward's obligations under the Amended and Restated Revolver Agreement and the Term Loan Agreement are guaranteed by Woodward FST, Inc., MPC Products Corporation and Woodward HRT, Inc., each of which is a wholly owned subsidiary of Woodward.

In connection with the Amended and Restated Revolver Agreement, Woodward incurred \$2,185 in financing costs, which were deferred and will be amortized to Interest expense using the straight-line method over the life of the agreement. The remaining \$100 of deferred financing costs incurred in connection with the prior \$225,000 revolving credit facility were expensed in the first quarter of fiscal year 2012 and are included in Interest expense in the Condensed Consolidated Statements of Earnings.

On January 5, 2012, a Chinese subsidiary of Woodward entered into a local credit facility with the Hong Kong and Shanghai Banking Company under which it has the ability to borrow up to either \$5,000, or the local currency equivalent of \$5,000. Any cash borrowings under the local Chinese credit facility are secured by a parent guarantee from Woodward. The Chinese subsidiary may utilize the local facility for cash borrowings to support its local operating cash needs. Local currency borrowings on the Chinese credit facility are charged interest at the prevailing interest rate offered by the People's Bank of China on the date of borrowing, plus a margin equal to 25% of that prevailing rate. U.S. dollar borrowings on the credit facility are charged interest at the lender's cost of borrowing rate at the date of borrowing, plus a margin of 3%.

At March 31, 2012, the Chinese subsidiary had outstanding cash borrowings of \$5,000 which were fully secured by a \$5,000 parent guarantee issued by Woodward. The U.S. dollar borrowings were made at an effective interest rate of 7.45%.

Woodward also has other foreign lines of credit and foreign overdraft facilities at various financial institutions, which are generally reviewed annually for renewal and are subject to the usual terms and conditions applied by the financial institutions. Pursuant to the terms of the related facility agreements, Woodward's foreign performance guarantee facilities are limited in use to providing performance guarantees to third parties.

Edgar Filing: Woodward, Inc. - Form 10-Q

As of March 31, 2012 and September 30, 2011, there were no outstanding borrowings from Woodward's other foreign lines of credit and foreign overdraft facilities.

At March 31, 2012, Woodward held \$56,329 in cash and cash equivalents, and had total outstanding debt of \$443,228 with additional borrowing availability of \$365,728 under its revolving credit facility, net of outstanding letters of credit, and \$15,351 under its other foreign lines of credit and foreign overdraft facilities.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

Management believes that Woodward was in compliance with all its debt covenants at March 31, 2012.

Note 13. Accrued liabilities

	March 31, 2012	September 30, 2011
Salaries and other member benefits	\$ 30,710	\$ 70,965
Current portion of restructuring and other charges	2,429	2,489
Warranties	13,783	14,083
Interest payable	11,357	11,611
Accrued retirement benefits	2,423	2,560
Deferred revenues	5,870	8,160
Taxes, other than income	7,377	5,097
Other	18,952	18,551
	\$ 92,901	\$ 133,516

Warranties

Provisions of Woodward's sales agreements include product warranties customary to these types of agreements. Accruals are established for specifically identified warranty issues that are probable to result in future costs. Warranty costs are accrued on a non-specific basis whenever past experience indicates a normal and predictable pattern exists. Changes in accrued product warranties were as follows:

Warranties, September 30, 2011	\$ 14,083
Increases to accruals related to warranties during the period	952
Settlements of amounts accrued	(1,194)
Foreign currency exchange rate changes	(58)
Warranties, March 31, 2012	\$ 13,783

Restructuring and other charges

The main components of accrued non-acquisition related restructuring charges, which were recognized in fiscal year 2009, include workforce management costs associated with the early retirement and the involuntary separation of employees in connection with a strategic realignment of global workforce capacity. Restructuring charges related to fiscal year 2009 business acquisitions include a number of items such as those associated with integrating similar operations, workforce management, vacating certain facilities, and the cancellation of some contracts.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

The summary of the activity in accrued restructuring charges during the three and six-months ending March 31, 2012 is as follows:

	Restructuring Charges	Three-Months Ending March 31, 2012 Business Acquisitions	Total
Accrued restructuring charges, December 31, 2011	\$ 261	\$ 2,499	\$ 2,760
Payments	(21)	(45)	(66)
Non-cash adjustments	6		6
Foreign currency exchange rates	1		1
Accrued restructuring charges, March 31, 2012	\$ 247	\$ 2,454	\$ 2,701

For additional information regarding Net expense recognized in earnings on foreign currency derivatives refer to Note 6, *Derivative instruments and hedging activities*.

Note 16. Income taxes

U.S. GAAP requires that the interim period tax provision be determined as follows:

At the end of each quarter, Woodward estimates the tax that will be provided for the current fiscal year stated as a percentage of estimated ordinary income. The term ordinary income refers to earnings from continuing operations before income taxes, excluding significant unusual or infrequently occurring items.

The estimated annual effective rate is applied to the year-to-date ordinary income at the end of each quarter to compute the estimated year-to-date tax applicable to ordinary income. The tax expense or benefit related to ordinary income in each quarter is the difference between the most recent year-to-date and the prior quarter year-to-date computations.

The tax effects of significant unusual or infrequently occurring items are recognized as discrete items in the interim period in which the events occur. The impact of changes in tax laws or rates on deferred tax amounts, the effects of changes in judgment about beginning of the year valuation allowances, and changes in tax reserves resulting from the finalization of tax audits or reviews are examples of significant unusual or infrequently occurring items that are recognized as discrete items in the interim period in which the event occurs.

The determination of the annual effective tax rate is based upon a number of significant estimates and judgments, including the estimated annual pretax income of Woodward in each tax jurisdiction in which it operates, and the development of tax planning strategies during the year. In addition, as a global commercial enterprise, Woodward's tax expense can be impacted by changes in tax rates or laws, the finalization of tax audits and reviews, changes in the estimate of the amount of undistributed foreign earnings that Woodward considers indefinitely reinvested, as well as other factors that cannot be predicted with certainty. As such, there can be significant volatility in interim tax provisions.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

The following table sets forth the tax expense and the effective tax rate for Woodward's income from operations:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Earnings before income taxes	\$ 54,038	\$ 46,487	\$ 94,214	\$ 77,962
Income tax expense	15,287	14,397	27,046	23,473
Effective tax rate	28.3%	31.0%	28.7%	30.1%

Income taxes for the three and six-months ending March 31, 2012 included a tax benefit of \$3,326 related to a reduction in the anticipated amount of undistributed earnings of certain of Woodward's foreign subsidiaries that were previously expected to be repatriated into the U.S. within the foreseeable future. Woodward now anticipates that a portion of those earnings will remain indefinitely invested outside the U.S. to support the growth of its foreign operations, and has accordingly reversed the deferred tax liability associated with repatriating those earnings.

Income taxes for the six-months ending March 31, 2011 included an expense reduction of \$1,890 related to the retroactive extension of the U.S. research and experimentation tax credit.

Worldwide unrecognized tax benefits were as follows:

	March 31, 2012	September 30, 2011
Gross liability	\$ 17,947	\$ 16,931
Amount that would impact Woodward's effective tax rate, if recognized, net of expected offsetting adjustments	15,322	14,078

At this time, Woodward estimates that it is reasonably possible that the liability for unrecognized tax benefits will decrease by as much as \$1,122 in the next twelve months due to the completion of reviews by tax authorities and the expiration of certain statutes of limitations.

Woodward recognizes interest and penalties related to unrecognized tax benefits in tax expense. Woodward had accrued interest and penalties of the following:

	March 31, 2012	September 30, 2011
Accrued interest and penalties	\$ 2,383	\$ 1,989

Woodward's tax returns are audited by U.S., state, and foreign tax authorities, and these audits are at various stages of completion at any given time. Fiscal years remaining open to examination in significant foreign jurisdictions include 2004 and forward. Woodward has been subject to U.S. Federal income tax examinations for fiscal years through 2008. Woodward is subject to U.S. state income tax examinations for fiscal years 2007 and forward.

Note 17. Retirement benefits

Edgar Filing: Woodward, Inc. - Form 10-Q

Woodward provides various benefits to eligible members of the Company, including contributions to various defined contribution plans, pension benefits associated with defined benefit plans, postretirement medical benefits and postretirement life insurance benefits. Eligibility requirements and benefit levels vary depending on employee location.

Defined contribution plans

Substantially all U.S. employees are eligible to participate in the U.S. defined contribution plan. The U.S. defined contribution plan allows employees to defer part of their annual income for income tax purposes into their personal 401(k) accounts. The Company makes contributions to eligible employee accounts, which are also deferred for employee personal income tax purposes. Certain foreign employees are also eligible to participate in foreign plans.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

Most U.S. employees with at least two years of service receive an annual contribution of Woodward stock, equal to 5% of their eligible prior year wages, to their personal Woodward Retirement Savings Plan accounts. In February 2012, Woodward fulfilled the annual Woodward stock contribution using shares held in treasury stock by issuing 209 shares of common stock for a total value of \$9,335. In the second quarter of fiscal year 2011, the annual Woodward stock contribution totaling \$9,107 was funded by way of a cash contribution to the Woodward Retirement Savings Plan, which then purchased shares of Woodward stock on the open market.

The amount of expense associated with defined contribution plans was as follows:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Company costs	\$ 4,350	\$ 4,058	\$ 8,982	\$ 8,256

Woodward operates one multi-employer plan for certain employees in the Netherlands. The amounts of contributions associated with the multi-employer plan were as follows:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Company contributions	\$ 121	\$ 114	\$ 242	\$ 233

Defined benefit plans

Woodward has defined benefit plans that provide pension benefits for certain retired employees in the U.S., the United Kingdom, Japan and Switzerland. Woodward also provides other postretirement benefits to its employees including postretirement medical benefits and life insurance benefits. Postretirement medical benefits are provided to certain current and retired employees and their covered dependants and beneficiaries in the U.S. and the United Kingdom. Life insurance benefits are provided to certain retirees in the U.S. under frozen plans which are no longer available to current employees. A September 30 measurement date is utilized to value plan assets and obligations for all of Woodward's defined benefit pension and other postretirement benefit plans.

U.S. GAAP requires that, for obligations outstanding as of September 30, 2011, the funded status reported in interim periods shall be the same asset or liability recognized in the previous year end statement of financial position adjusted for (a) subsequent accruals of net periodic benefit cost that exclude the amortization of amounts previously recognized in other comprehensive income (for example, subsequent accruals of service cost, interest cost, and return on plan assets) and (b) contributions to a funded plan or benefit payments.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

Net periodic retirement pension (benefit) cost	\$ 1,468	\$ 1,386	\$ 748	\$ 758	\$ 2,216	\$ 2,144
Contributions paid	\$ 300	\$	\$ 2,332	\$ 3,190	\$ 2,632	\$ 3,190

The components of the net periodic other postretirement benefit costs recognized are as follows:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Service cost	\$ 18	\$ 23	\$ 35	\$ 46
Interest cost	450	494	899	987
Amortization of:				

Edgar Filing: Woodward, Inc. - Form 10-Q

Net actuarial (gain) loss	23	32	46	64
Prior service cost (benefit)	(138)	(217)	(275)	(435)
Net periodic other postretirement (benefit) cost	\$ 353	\$ 332	\$ 705	\$ 662
Contributions paid	\$ 792	\$ 817	\$ 1,293	\$ 1,594

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

The amount of cash contributions made to these plans in any year is dependent upon a number of factors, including minimum funding requirements in the jurisdictions in which Woodward operates and arrangements made with trustees of certain foreign plans. As a result, the actual funding in fiscal year 2012 may differ from the current estimate. Woodward estimates its remaining cash contributions in fiscal year 2012 will be as follows:

Retirement pension benefits:	
United States	\$ 300
United Kingdom	864
Japan	
Switzerland	191
Other postretirement benefits	3,417

Note 18. Stock-based compensation**Stock options**

Woodward's 2006 Omnibus Incentive Plan (the "2006 Plan"), which has been approved by Woodward's stockholders, provides for the grant of up to 7,410 stock options to its employees and directors. Woodward believes that these awards align the interest of its employees with those of its stockholders. Stock option awards are granted with an exercise price equal to the market price of Woodward's stock at the date of grant, and generally with a four-year vesting schedule at a vesting rate of 25% per year and a term of 10 years.

The fair value of options granted was estimated on the date of grant using the Black-Scholes-Merton option-valuation model using the assumptions in the following table. Woodward calculates the expected term based upon historical experience of plan participants and it represents the period of time that stock options granted are expected to be outstanding. Expected volatility is based on historical volatility using daily stock price observations. The estimated dividend yield is based upon Woodward's historical dividend practice and the market value of its common stock. The risk-free rate is based on the U.S. treasury yield curve, for periods within the contractual life of the stock option, at the time of grant.

	Three-Months Ending		Six-Months Ending			
	March 31,		March 31,			
	2012	2011	2012	2011	2012	2011
Expected term	5.9 years	5.8 years	5.9 years	8.5 years	5.8 years	8.7 years
Estimated volatility	55.5%	55.6%	54.0%	48.9%	55.6%	48.0%
Estimated dividend yield	0.7%	1.1%	0.7%	1.1%	1.1%	1.3%
Risk-free interest rate	1.0%	1.3%	2.6%	1.0%	1.6%	1.9%

The following is a summary of the activity for stock option awards during the three and six-months ending March 31, 2012:

Three-Months Ending
March 31, 2012

Six-Months Ending
March 31, 2012

Edgar Filing: Woodward, Inc. - Form 10-Q

	Number of options	Weighted- Average Exercise Price per Share	Number of options	Weighted- Average Exercise Price per Share
Options, beginning balance	4,858	\$ 21.34	4,228	\$ 20.12
Options granted	20	43.27	845	26.00
Options exercised	(205)	13.90	(390)	12.86
Options forfeited		n/a	(10)	26.83
Options, ending balance	4,673	\$ 21.76	4,673	\$ 21.76

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

Changes in nonvested stock options during the three and six-months ending March 31, 2012 were as follows:

	Three-Months Ending March 31, 2012		Six-Months Ending March 31, 2012	
	Number of options	Weighted- Average Exercise Price per Share	Number of options	Weighted- Average Exercise Price per Share
Options, beginning balance	1,713	\$ 26.80	1,368	\$ 27.71
Options granted	20	43.27	845	26.00
Options vested	(4)	29.00	(476)	27.41
Options forfeited		n/a	(8)	26.83
Options, ending balance	1,729	\$ 26.99	1,729	\$ 26.99

As of March 31, 2012, there was approximately \$13,000 of total unrecognized compensation cost, which assumes a weighted-average forfeiture rate of 6.4%, related to non-vested stock-based compensation arrangements granted under the 2002 Stock Option Plan (for which no further grants will be made) and the 2006 Plan. The remaining unrecognized compensation cost is expected to be recognized over a weighted-average period of approximately 2.8 years.

Information about stock options that have vested, or are expected to vest, and are exercisable at March 31, 2012 were as follows:

	Number	Weighted- Average Exercise Price	Weighted- Average Remaining Life in Years	Aggregate Intrinsic Value
Options outstanding	4,673	\$ 21.76	6.1	\$ 98,471
Options vested and exercisable	2,944	18.69	4.5	71,059
Options vested and expected to vest	4,505	21.55	5.9	95,871

Note 19. Commitments and contingencies

Woodward is currently involved in claims, pending or threatened litigation, other legal proceedings, investigations and/or regulatory proceedings arising in the normal course of business, including, among others, those relating to product liability claims, employment matters, workman's compensation claims, contractual disputes, product warranty claims and alleged violations of various laws and regulations. Woodward has accrued for individual matters that it believes are likely to result in a loss when ultimately resolved using estimates of the most likely amount of loss. Legal costs are expensed as incurred and are classified in Selling, general and administrative expenses on the Condensed Consolidated Statements of Earnings.

Woodward is partially self-insured in the U.S. for healthcare and workman's compensation up to predetermined amounts, above which third party insurance applies. Management regularly reviews the probable outcome of these claims and proceedings, the expenses expected to be incurred, the availability and limits of the insurance coverage, and the established accruals for liabilities.

Edgar Filing: Woodward, Inc. - Form 10-Q

While the outcome of pending claims, proceedings and investigations cannot be predicted with certainty, management believes that any liabilities that may result from these claims, proceedings and investigations will not have a material effect on Woodward's liquidity, financial condition, or results of operations.

In connection with the sale of the Fuel & Pneumatic product line during fiscal year 2009, Woodward assigned to a subsidiary of the purchaser its rights and responsibilities related to certain contracts with the U.S. Government. Woodward provided to the U.S. Government a customary guarantee of the purchaser's subsidiary's obligations under the contracts. The purchaser and its affiliates have agreed to indemnify Woodward for any liability incurred with respect to the guarantee.

Table of Contents**WOODWARD, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***(In thousands, except per share amounts)**(Unaudited)*

In the event of a change in control of Woodward, as defined in change-in-control agreements with its current corporate officers, Woodward may be required to pay termination benefits to such officers.

Note 20. Segment information

Woodward serves two significant markets – the aerospace market and the energy market. In order to better serve these markets, Woodward completed a realignment of its reportable segments in September 2011 and now reports its financial results through two reportable segments Aerospace and Energy. The Aerospace segment combines the aircraft propulsion portion of the former Turbine Systems business group, now referred to as the Aircraft Turbine Systems business group, with the Airframe Systems business group. The Energy segment combines the industrial turbine portion of the former Turbine Systems business group, now referred to as the Industrial Turbomachinery Systems business group, with the Engine Systems and Electrical Power Systems business groups.

Woodward uses reportable segment information internally to manage its business, including the assessment of business segment performance and decisions for the allocation of resources between segments.

The accounting policies of the reportable segments are the same as those of the Company. Woodward evaluates segment profit or loss based on internal performance measures for each segment in a given period. In connection with that assessment, Woodward excludes matters such as charges for restructuring costs, interest income and expense, and certain gains and losses from asset dispositions.

A summary of consolidated net sales and earnings by segment follows:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Segment external net sales:				
Aerospace	\$ 224,337	\$ 204,945	\$ 417,563	\$ 386,089
Energy	244,456	213,921	459,126	397,852
Total consolidated net sales	\$ 468,793	\$ 418,866	\$ 876,689	\$ 783,941
Segment earnings:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Amounts in thousands, except per share amounts)

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are statements that are deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of management. Words such as anticipate, believe, estimate, seek, goal, expect, forecast, intend, continue, outlook, plan, project, target, strive, can, could, may, should, will, would, variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characteristics of future events or circumstances are forward-looking statements. Forward-looking statements may include, among others, statements relating to:

future sales, earnings, cash flow, uses of cash, and other measures of financial performance;

description of our plans and expectations for future operations;

the effect of economic downturns or growth in particular regions;

the effect of changes in the level of activity in particular industries or markets;

the availability and cost of materials, components, services, and supplies;

the scope, nature, or impact of acquisition activity and integration into our businesses;

the development, production, and support of advanced technologies and new products and services;

new business opportunities;

restructuring costs and savings;

our plans, objectives, expectations and intentions with respect to recent acquisitions and expected business opportunities that may be available to us;

the outcome of contingencies;

future repurchases of common stock;

future levels of indebtedness and capital spending; and

pension plan assumptions and future contributions.

Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including:

a decline in business with, or financial distress of, our significant customers;

the instability in the financial markets, sovereign credit rating downgrades and uncertainty surrounding European sovereign and other debt defaults, and prolonged unfavorable economic and other industry conditions;

our ability to obtain financing, on acceptable terms or at all, to implement our business plans, complete acquisitions, or otherwise take advantage of business opportunities or respond to business pressures;

the long sales cycle, customer evaluation process, and implementation period of some of our products and services;

our ability to implement, and realize the intended effects of, our restructuring efforts;

our ability to successfully manage competitive factors, including prices, promotional incentives, industry consolidation, and commodity and other input cost increases;

our ability to manage our expenses and product mix while responding to sales increases or decreases;

Table of Contents

the ability of our subcontractors to perform contractual obligations and our suppliers to provide us with materials of sufficient quality or quantity required to meet our production needs at favorable prices or at all;

the success of, or expenses associated with, our product development activities;

our ability to integrate acquisitions and manage costs related thereto;

our debt obligations, our debt service requirements, and our ability to operate our business, pursue business strategies and incur additional debt in light of covenants contained in our outstanding debt agreements;

risks related to our U. S. Government contracting activities;

future impairment charges resulting from changes in the estimates of fair value of reporting units or of long-lived assets;

future subsidiary results or changes in domestic or international tax statutes;

environmental liabilities related to manufacturing activities;

our continued access to a stable workforce and favorable labor relations with our employees;

the geographical location of a significant portion of our Aerospace business in California, which historically has been susceptible to natural disasters;

our ability to successfully manage regulatory, tax, and legal matters (including product liability, patent, and intellectual property matters);

liabilities resulting from legal and regulatory proceedings, inquiries, or investigations by private or U.S. Government persons or entities;

risks from operating internationally, including the impact on reported earnings from fluctuations in foreign currency exchange rates, and changes in the legal and regulatory environments of countries in which we operate;

fair value of defined benefit plan assets and assumptions used in determining our retirement pension and other postretirement benefit obligations and related expenses including, among others, discount rates and investment return on pension assets; and

certain provisions of our charter documents and Delaware law that could discourage or prevent others from acquiring our company. These factors are representative of the risks, uncertainties, and assumptions that could cause actual outcomes and results to differ materially from what is expressed or forecast in our forward-looking statements. Other factors are discussed under Risk Factors in our Securities and

Edgar Filing: Woodward, Inc. - Form 10-Q

Exchange Commission (SEC) filings and are incorporated herein by reference.

Therefore, actual results could differ materially and adversely from those expressed in any forward-looking statements. For additional information regarding factors that may affect our actual financial condition and results of operations, see the information under the caption Risk Factors in Part I, Item 1A in our most recent Annual Report on Form 10-K filed with the SEC (our Form 10-K). We undertake no obligation to revise or update any forward-looking statements for any reason.

Unless we have indicated otherwise or the context otherwise requires, references in this Quarterly Report on Form 10-Q to Woodward, the Company, we, us, and our refer to Woodward, Inc. and its consolidated subsidiaries.

Except where we have otherwise indicated or the context otherwise requires, amounts presented in this Quarterly Report on Form 10-Q are in thousands except per share amounts.

This discussion should be read together with Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of our most recent Form 10-K and the Condensed Consolidated Financial Statements and Notes included therein and in this report.

Table of Contents**Non-U.S. GAAP Financial Measures**

Earnings before interest and taxes (EBIT), earnings before interest, taxes, depreciation and amortization (EBITDA) and free cash flow are financial measures not prepared and presented in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Management uses EBIT to evaluate Woodward's performance without financing and tax related considerations, as these elements may not fluctuate with operating results. Management uses EBITDA in evaluating Woodward's operating performance, making business decisions, including developing budgets, managing expenditures and forecasting future periods, and evaluating capital structure impacts of various strategic scenarios. Management uses free cash flow, which is defined as net cash flows provided by operating activities less payments for property, plant and equipment, in reviewing the financial performance of Woodward's various business groups and evaluating cash levels. Securities analysts, investors, and others frequently use EBIT, EBITDA and free cash flow in their evaluation of companies, particularly those with significant property, plant, and equipment, and intangible assets that are subject to amortization. The use of these non-U.S. GAAP financial measures is not intended to be considered in isolation of, or as a substitute for, the financial information prepared and presented in accordance with U.S. GAAP. As EBIT and EBITDA exclude certain financial information compared with net earnings, the most comparable U.S. GAAP financial measure, users of this financial information should consider the information that is excluded. Free cash flow does not necessarily represent funds available for discretionary use and is not necessarily a measure of our ability to fund our cash needs. Our calculations of EBIT, EBITDA and free cash flow may differ from similarly titled measures used by other companies, limiting their usefulness as comparative measures.

EBIT and EBITDA for the three and six-months ending March 31, 2012 and March 31, 2011 were as follows:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Net earnings	\$ 38,751	\$ 32,090	\$ 67,168	\$ 54,489
Income taxes	15,287	14,397	27,046	23,473
Interest expense	6,552	6,299	12,860	12,800
Interest income	(84)	(85)	(210)	(208)
EBIT	60,506	52,701	106,864	90,554
Amortization of intangible assets	8,294	8,542	16,552	17,085
Depreciation expense	9,513	9,970	19,682	20,324
EBITDA	\$ 78,313	\$ 71,213	\$ 143,098	\$ 127,963

Free cash flow for the six-months ending March 31, 2012 and March 31, 2011 was as follows:

	Six-Months Ending March 31,	
	2012	2011
Net cash provided by operating activities	\$ 12,226	\$ 20,176
Payments for property, plant and equipment	(30,523)	(20,124)
Free cash flow	\$ (18,297)	\$ 52

OVERVIEW**Operational Highlights****Quarterly Highlights**

Edgar Filing: Woodward, Inc. - Form 10-Q

Net sales for the second quarter of fiscal 2012 were \$468,793, an increase of 11.9% from \$418,866 for the second quarter of the prior fiscal year. Net sales growth as compared to the second quarter of fiscal 2011 was across both of our segments reflecting continued market share gains and consistent growth in most of the markets we serve.

Sequentially, net sales for the second quarter of fiscal 2012 increased by \$60,897, or 14.9%, to \$468,793 from \$407,896 for the first quarter of 2012. Historically, net sales in the first quarter have generally been lower than the remaining three quarters of the fiscal year due to customer buying patterns and the observance of various holidays.

EBIT for the second quarter of fiscal 2012 was \$60,506, up 14.8% from \$52,701 in the same period of fiscal 2011. The current quarter EBIT was positively impacted by increased sales volumes, partially offset by increased research and development costs of \$10,395, or 38.4%, compared to the same quarter for fiscal 2011, reflecting increased investment in awarded customer programs. In addition, variable compensation expense for the second quarter of fiscal 2012 was \$7,659 lower than the second quarter of fiscal 2011.

Table of Contents

Net earnings for the second quarter of fiscal 2012 were \$38,751, or \$0.55 per diluted share, compared to \$32,090, or \$0.46 per diluted share, for the second quarter of fiscal 2011. The effective tax rate in the second quarter of fiscal 2012 was 28.3% compared to 31.0% for the second quarter of the prior year.

Year to Date Highlights

Net sales for the first half of fiscal 2012 were \$876,689, an increase of 11.8% from \$783,941 for the first half of the prior fiscal year. The sales increase was across both of our segments and reflected continued market share gains and consistent growth in most of the markets we serve.

EBIT for the first half of fiscal 2012 was \$106,864, up 18.0% from \$90,554 in the same period of fiscal 2011. Current year EBIT was positively affected by increased sales volumes and favorable price and sales mix, partially offset by increased investment in research and development. In addition, variable compensation expense for the first half of fiscal 2012 was \$4,985 lower than the first half of fiscal 2011.

Net earnings for the first half of fiscal 2012 were \$67,168, or \$0.95 per diluted share, compared to \$54,489, or \$0.78 per diluted share, for the first half of fiscal 2011. The effective tax rate in the first half of fiscal 2012 was 28.7% compared to 30.1% for the first half of the prior year.

Liquidity Highlights

Net cash provided by operating activities for the first half of fiscal 2012 was \$12,226 compared to \$20,176 for the same period of fiscal 2011, primarily reflecting increased payments of variable compensation in the current year, partially offset by less of an increase in accounts receivable and inventory.

Negative free cash flow for the first half of fiscal 2012 was \$18,297 compared to positive free cash flow of \$52 for the same period of fiscal 2011, due mainly to increased payments of variable compensation in the current year as compared to the prior year and our continuing investment in capital expenditures. EBITDA increased \$15,135 to \$143,098 for the first half of fiscal 2012 from \$127,963 for the same period of fiscal 2011, primarily due to increased net earnings.

On January 4, 2012, we amended and restated our revolving credit facility, which had an expiration date of October 2012, by entering into a Third Amended and Restated Credit Agreement (the "Amended and Restated Revolver Agreement") with a syndicate of lenders led by JPMorgan Chase Bank, N.A., as administrative agent. The Amended and Restated Revolver Agreement extended the prior revolving credit facility's maturity to January 2017. The borrowing capacity increased from \$225,000 to \$400,000 and the option, subject to the lenders' participation, to expand the commitment increased from \$125,000 to \$200,000, for a total borrowing capacity of up to \$600,000.

At March 31, 2012, we held \$56,329 in cash and cash equivalents, and had total outstanding debt of \$443,228 with additional borrowing availability of \$365,728 under our revolving credit facility, net of outstanding letters of credit, and \$15,351 under various foreign credit facilities.

Table of Contents**RESULTS OF OPERATIONS**

The following table sets forth selected consolidated statements of earnings data as a percentage of net sales for each period indicated:

	March 31, 2012	Three-Months Ending % of Net Sales	March 31, 2011	% of Net Sales	March 31, 2012	Six-Months Ending % of Net Sales	March 31, 2011	% of Net Sales
Net sales	\$ 468,793	100%	\$ 418,866	100%	\$ 876,689	100%	\$ 783,941	100%
Costs and expenses:								
Cost of goods sold	322,492	68.8	292,520	69.8	606,902	69.2	553,697	70.6
Selling, general, and administrative expenses	40,788	8.7	38,445	9.2	79,358	9.1	71,111	9.1
Research and development costs	37,445	8.0	27,050	6.5	68,239	7.8	50,788	6.5

Income tax expense	15,287	3.3	14,397	3.4	27,046	3.1	23,473	3.0
Net earnings	\$ 38,751	8.3	\$ 32,090	7.7	\$ 67,168	7.7	\$ 54,489	7.0

Other select financial data:

	March 31, 2012	September 30, 2011
Working capital	\$ 607,087	\$ 536,936
Short-term borrowings	32,500	
Total debt	443,228	425,249
Total stockholders' equity	988,010	919,097

Net Sales

Consolidated net sales for the second quarter and first half of fiscal 2012 increased by \$49,927, or 11.9%, and \$92,748, or 11.8%, respectively, compared to the same periods of fiscal 2011. Details of the changes in consolidated net sales are as follows:

	Three-Month Period	Six-Month Period
Consolidated net sales for the period ending March 31, 2011	\$ 418,866	\$ 783,941
Aerospace volume changes	14,607	22,309
Energy volume changes	33,217	63,066
Price changes	4,963	9,888
Effects of changes in foreign currency rates	(2,860)	(2,515)
Consolidated net sales for the period ending March 31, 2012	\$ 468,793	\$ 876,689

Edgar Filing: Woodward, Inc. - Form 10-Q

The increase in net sales for the second quarter and first half of fiscal 2012 was primarily attributable to sales volume increases across both of our segments. Net sales increases in our Aerospace segment were primarily attributable to commercial and military aftermarket and commercial original equipment manufacturer (OEM) sales. Control systems for wind turbines and industrial gas turbines were leading contributors to increased sales in our Energy segment.

Table of Contents

Price changes: Increases in selling prices were driven primarily by price increases related to both OEM and aftermarket sales within our Aerospace segment. Selling prices in the Energy segment were relatively unchanged from the prior year, consistent with prevailing market conditions.

Foreign currency exchange rates: During the second quarter and first half of fiscal 2012, our net sales were negatively impacted by \$2,860 and \$2,515, respectively, due to changes in foreign currency exchange rates compared to the same periods of fiscal 2011.

Our worldwide sales activities are primarily denominated in U.S. Dollars (USD), European Monetary Units (the Euro), Great Britain Pounds (GBP), Japanese Yen (JPY), Chinese Yuan (CNY), and Swiss Francs (CHF). As the USD, Euro, GBP, JPY, CNY, and CHF fluctuate against each other and other currencies, we are exposed to gains or losses on sales transactions. If the CNY, which the Chinese government has not historically allowed to fluctuate significantly against USD, is allowed to fluctuate against USD in the future, we would be exposed to gains or losses on sales transactions denominated in CNY. For additional information on foreign currency exchange rate risk please refer to the risks summarized under the caption Risk Factors in Part I, Item 1A of our most recent Form 10-K.

Costs and Expenses

Cost of goods sold increased by \$29,972 to \$322,492 for the second quarter of fiscal 2012 from \$292,520 for the second quarter of fiscal 2011. Cost of goods sold increased to \$606,902 for the first half of fiscal 2012 from \$553,697 for the first half of 2011. Gross margins (as measured by net sales less cost of goods sold, divided by net sales) increased to 31.2% and 30.8% for the second quarter and first half of fiscal 2012, respectively, compared to 30.2% and 29.4%, respectively, for the same periods of the prior year. The increase in gross margins is due primarily to favorable prices and sales mix realized by our Aerospace segment.

Selling, general, and administrative expenses increased by \$2,343, or 6.1%, to \$40,788 for the second quarter of fiscal 2012 as compared to \$38,445 for the same period of fiscal 2011. Selling, general and administrative expenses decreased as a percentage of net sales to 8.7% for the second quarter of fiscal 2012 as compared to 9.2% for the same period of fiscal 2011. Selling, general, and administrative expenses increased by \$8,247, or 11.6%, to \$79,358 for the first half of fiscal 2012 as compared to \$71,111 for the same period of fiscal 2011. Selling, general, and administrative expenses as a percentage of net sales remained flat at 9.1% for both the first half of fiscal 2012 and fiscal 2011. The increase in selling, general and administrative expenses in both comparable periods is due to increases in employee related costs and other costs to support our sales growth.

Research and development costs increased by \$10,395, or 38.4%, to \$37,445 for the second quarter of fiscal 2012 as compared to \$27,050, for the same period of fiscal 2011. Research and development costs increased by \$17,451, or 34.4%, to \$68,239 for the first half of fiscal 2012 as compared to \$50,788 for the same period of fiscal 2011. Research and development costs increased as a percentage of sales to 8.0% and 7.8% for the second quarter and first half of fiscal 2012, respectively, as compared to 6.5% for both the second quarter and the first half of fiscal 2011. The increase in research and development costs is primarily due to increased investment related to our pursuit of new and awarded customer programs and market share gains in most of our markets, particularly those within our Aerospace segment. Our research and development activities extend across almost all of our customer base. We anticipate that our research and development costs as a percent of net sales in each of the third and fourth quarters of fiscal 2012 will be slightly lower than the second quarter of fiscal 2012.

Amortization of intangible assets decreased slightly to \$8,294 and \$16,552 for the second quarter and first half of fiscal 2012, respectively, compared to \$8,542 and \$17,085 for the same periods in fiscal 2011. As a percentage of net sales, amortization of intangible assets decreased to 1.8% and 1.9% for the second quarter and first half of fiscal 2012, respectively, as compared to 2.0% and 2.2% for the same periods of the prior year.

Interest expense increased slightly to \$6,552 and \$12,860 for the second quarter and first half of fiscal 2012, respectively, compared to \$6,299 and \$12,800 for the same periods in fiscal 2011. As a percentage of net sales, interest expense decreased to 1.4% and 1.5% for the second quarter and first half of fiscal 2012, respectively, from 1.5% and 1.6% for the same periods of the prior year.

Table of Contents

Income taxes were provided at an effective rate on earnings before income taxes of 28.3% and 28.7% for the second quarter and first half of fiscal 2012, respectively, compared to 31.0% and 30.1% for the same periods of fiscal 2011. The reductions in the effective tax rates for the second quarter and first half of fiscal 2012 each contributed \$0.02 to earnings per diluted share when compared to the same periods of the prior fiscal year. The change in the effective tax rate (as a percentage of earnings before income taxes) was attributable to the following:

	Three-Month Period	Six-Month Period
Effective tax rate for the period ending March 31, 2011	31.0%	30.1%
Repatriation reserve change	(6.2)	(3.5)
Research credit in fiscal 2011 as compared to fiscal 2012	1.6	2.5
Adjustment of tax issues recorded in the period ending March 31, 2011	1.6	0.2
Adjustment of tax issues recorded in the period ending March 31, 2012	(0.1)	(0.9)
Domestic production activities deduction	(0.6)	(0.6)
Foreign tax rate differences	1.0	1.0
Other changes, net		(0.1)
Effective tax rate for the period ending March 31, 2012	28.3%	28.7%

During the second quarter of fiscal 2012, we reevaluated our strategic alternatives in various international markets and determined that a portion of the undistributed earnings of certain of our foreign subsidiaries that were previously expected to be repatriated into the U.S. within the foreseeable future will remain indefinitely invested outside the U.S. to support the growth of our foreign operations. We accordingly reversed the deferred tax liability associated with repatriating those earnings, resulting in a tax benefit of \$3,326, or 6.2% and 3.5% of earnings before income taxes, respectively, for the three and six-months ending March 31, 2012.

On December 17, 2010, legislation was enacted that retroactively extended the U.S. research tax credit, which had expired as of December 31, 2009. As a result of this extension, we recognized a net tax benefit of \$1,890 in the first quarter of fiscal 2011 related to the prior year impact. The credit expired again as of December 31, 2011.

Segment Results

In September 2011, we reorganized our reportable segments to better align with our markets. We now have two reportable segments – Aerospace and Energy. Both of our reportable segments are comprised of multiple business groups, which focus on particular applications within the aerospace and energy markets. Our Aerospace segment combines the aircraft propulsion portion of the former Turbine Systems business group, now referred to as the Aircraft Turbine Systems business group, with our Airframe Systems business group. Our Energy segment combines the industrial turbine portion of the former Turbine Systems business group, now referred to as the Industrial Turbomachinery Systems business group, with our Engine Systems and Electrical Power Systems business groups.

Prior period segment information has been retrospectively revised to be consistent with our current reportable segment structure, which is based on how we managed our business as of September 30, 2011 and during the first half of fiscal 2012.

The following table presents sales by segment:

	Three-Months Ending March 31, 2012				Six-Months Ending March 31, 2012			
	2012		2011		2012		2011	
External net sales:								
Aerospace	\$ 224,337	47.9%	\$ 204,945	48.9%	\$ 417,563	47.6%	\$ 386,089	49.2%
Energy	244,456	52.1	213,921	51.1	459,126	52.4	397,852	50.8
Consolidated net sales	\$ 468,793	100.0%	\$ 418,866	100.0%	\$ 876,689	100.0%	\$ 783,941	100.0%

Table of Contents

The following table presents earnings by segment:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Aerospace	\$ 33,681	\$ 33,241	\$ 60,741	\$ 53,155
Energy	34,334	26,941	61,059	51,444
Total segment earnings	68,015	60,182	121,800	104,599
Nonsegment expenses	(7,509)	(7,481)	(14,936)	(14,045)
Interest expense, net	(6,468)	(6,214)	(12,650)	(12,592)
Consolidated earnings before income taxes	54,038	46,487	94,214	77,962
Income tax expense	(15,287)	(14,397)	(27,046)	(23,473)
Consolidated net earnings	\$ 38,751	\$ 32,090	\$ 67,168	\$ 54,489

The following table presents earnings by segment as a percentage of segment net sales:

	Three-Months Ending March 31,		Six-Months Ending March 31,	
	2012	2011	2012	2011
Aerospace	15.0%	16.2%	14.5%	13.8%
Energy	14.0%	12.6%	13.3%	12.9%

Aerospace

Aerospace segment net sales were \$224,337 and \$417,563 for the second quarter and first half of fiscal 2012, respectively, compared to \$204,945 and \$386,089 for the same periods of fiscal 2011. Sales during the first half of fiscal 2012 were higher in nearly all the markets we serve.

Sales for the aerospace aftermarket continued to benefit from increased passenger air traffic, and the roll out of new aircraft platforms on which our Aerospace products are used. Commercial OEM aircraft deliveries of narrow-body and wide-body aircraft have increased based on improved airline demand and new product introduction. In addition, the increase in sales continues to reflect recovering demand for business and regional jets. Due to quarterly variability, sales for some of our OEM military-related systems decreased in the second quarter of fiscal 2012 compared to the second quarter of the prior fiscal year. OEM military sales for the first half of fiscal 2012 were in total relatively unchanged when compared to the first half of the prior year.

Aerospace segment earnings increased \$440, or 1.3%, to \$33,681 and \$7,586, or 14.3%, to \$60,741 for the second quarter and first half of fiscal 2012, respectively, as compared to \$33,241 and \$53,155, respectively, for the same periods of fiscal 2011 due to the following:

	Three-Month Period	Six-Month Period
Earnings for the period ending March 31, 2011	\$ 33,241	\$ 53,155
Sales volume changes	5,908	10,392
Selling price and mix	4,423	10,116
Investments in research and development	(9,533)	(14,920)
Manufacturing costs associated with sales growth and manufacturing productivity	(2,073)	(2,356)
Workman s compensation		2,983
Changes in variable compensation	3,342	1,682
Other, net	(1,627)	(311)

Edgar Filing: Woodward, Inc. - Form 10-Q

Earnings for the period ending March 31, 2012	\$ 33,681	\$ 60,741
---	-----------	-----------

Aerospace segment earnings in the second quarter of fiscal 2012 were flat when compared to the same period of fiscal 2011. Segment earnings benefitted from increased sales volume, favorable price and sales mix and reduced variable compensation expense. These benefits were largely offset by increased research and development and higher than anticipated manufacturing costs associated with sales growth and investments to improve manufacturing productivity. Such initiatives include programs to streamline production cell layouts and reduce waste in the manufacturing process. Earnings as a percentage of sales decreased to 15.0% compared to 16.2% in the second quarter of fiscal 2011.

The increase in Aerospace segment earnings in the first half of fiscal 2012 compared to the same period of fiscal 2011 was primarily the result of sales volume increases and favorable price and sales mix, partially offset by increased costs associated with new product research and development and higher than anticipated manufacturing costs associated with sales growth and investments to improve manufacturing productivity. Such initiatives include programs to streamline production cell layouts and reduce waste in the manufacturing process. In addition, the prior year included a one-time charge of \$2,983 related to workman's compensation. For the first half of fiscal 2012, earnings as a percentage of sales increased to 14.5% compared to 13.8% in the first half of fiscal 2011.

Table of Contents**Energy**

Energy segment net sales were \$244,456 and \$459,126 for the second quarter and first half of fiscal 2012, respectively, compared to \$213,921 and \$397,852 for the same periods of fiscal 2011. Sales for the first half of fiscal 2012 increased in nearly all of our markets. Wind turbine power converter sales increased primarily due to our market share gains. There was also some accelerated ordering by our customers in an effort to take advantage of current government incentives and to comply with various renewable energy programs. We continued to see growth in our industrial gas turbine markets. In addition, sales increased in the large and small engine markets utilizing natural gas and other special fuel sources, which serve primarily electric power generation systems and on-highway natural gas vehicles.

Energy segment earnings increased \$7,393, or 27.4%, to \$34,334 and \$9,615, or 18.7%, to \$61,059 for the second quarter and first half of fiscal 2012, respectively, as compared to \$26,941 and \$51,444, respectively, for the same periods of fiscal 2011 due to the following:

	Three-Month Period	Six-Month Period
Earnings for the period ending March 31, 2011	\$ 26,941	\$ 51,444
Sales volume changes	8,373	16,522
Selling price and mix	(3,047)	(6,409)
Investments in research and development	(1,811)	(2,948)
Changes in variable compensation	3,263	2,625
Effects of changes in foreign currency rates	546	1,525
Other, net	69	(1,700)
 Earnings for the period ending March 31, 2012	 \$ 34,334	 \$ 61,059

The increase in the Energy segment earnings for both the second quarter and the first half of fiscal 2012 as compared to the prior fiscal year comparable periods was driven primarily by increased sales volume and reduced variable compensation, partially offset by unfavorable product mix impacts. Earnings as a percentage of sales increased to 14.0% and 13.3% in the second quarter and first half of fiscal 2012, respectively, as compared to 12.6% and 12.9% for the same periods of fiscal 2011 due primarily to leverage on sales volume, partially offset by unfavorable product mix impacts.

Nonsegment expenses

Nonsegment expenses for the second quarter and first half of fiscal 2012 increased slightly to \$7,509 and \$14,936, respectively, compared to \$7,481 and \$14,045 for the same periods of fiscal 2011. As a percent of net sales, nonsegment expenses for the second quarter and first half of fiscal 2012 decreased to 1.6% and 1.7% of net sales, respectively, compared to 1.8% of net sales for each of the same periods of fiscal 2011.

LIQUIDITY AND CAPITAL RESOURCES

We believe liquidity and cash generation are important to our strategy of self-funding our ongoing operating needs. Historically, we have been able to satisfy our working capital needs, including capital expenditures, product development and other liquidity requirements associated with our operations, with cash flow provided by operating activities. We expect that cash generated from our operating activities, together with borrowings under our revolving credit facility, will be sufficient to fund our continuing operating needs.

As of March 31, 2012, we do not believe that any potential European sovereign debt defaults would have a material adverse affect on our liquidity. We do not have any significant direct exposure to European government receivables and our customers do not rely heavily on European government subsidies or other government support. We will continue to monitor our exposure to risks relating to European sovereign debt.

Our aggregate cash and cash equivalents were \$56,329 and \$74,539 and our working capital was \$607,087 and \$536,936 at March 31, 2012 and September 30, 2011, respectively. Of the \$56,329 of cash and cash equivalents held at March 31, 2012, \$39,561 is held by our foreign subsidiaries. We are not presently aware of any restrictions on the repatriation of these funds, although a portion is considered permanently invested in these foreign subsidiaries. If these funds were needed to fund our operations or satisfy obligations in the U.S., they could be repatriated and their repatriation into the U.S. may cause us to incur additional U.S. income taxes or foreign withholding taxes. Any additional taxes could be offset, in part or in whole, by foreign tax credits. The amount of such taxes and application of tax credits would be dependent on

Edgar Filing: Woodward, Inc. - Form 10-Q

the income tax laws and other circumstances at the time these amounts are repatriated. Based on these variables, it is not practicable to determine the income tax liability that might be incurred if these earnings were to be repatriated.

Table of Contents

Our Amended and Restated Revolver Agreement, which we entered into on January 4, 2012, extends the maturity date of our revolving credit facility to January 2017 and provides borrowing capacity of up to \$400,000 with the option to increase total borrowing capacity to up to \$600,000, subject to lenders' participation. In the event we are unable to generate sufficient cash flows from operating activities, we can borrow against our \$400,000 revolving credit facility as long as we are in compliance with all of our debt covenants. Historically, we have used borrowings under our revolving credit facility to meet certain short-term working capital needs as well as strategic uses including repurchases of our stock, payments of dividends and acquisitions. In addition, we have various foreign credit facilities, some of which are tied to net amounts on deposit at certain foreign financial institutions. These foreign credit facilities are generally reviewed annually for renewal. We use borrowings under these foreign credit facilities to finance certain local operations on a periodic basis.

At March 31, 2012, we had \$27,500 of borrowings outstanding from our \$400,000 revolving credit facility and \$5,000 of borrowings outstanding from our foreign credit facilities. Short-term borrowing activity during the six-months ending March 31, 2012 were as follows:

Maximum daily balance during the period	\$ 61,576
Average daily balance during the period	\$ 36,156
Weighted average interest rate on average daily balance	1.14%

At March 31, 2012, we had total outstanding debt of \$443,228 with additional borrowing availability of \$365,728 under our \$400,000 revolving credit facility, net of outstanding letters of credit, and additional borrowing availability of \$15,351 under various foreign credit facilities.

We believe we were in compliance with all our debt covenants at March 31, 2012.

In addition to utilizing our cash resources to fund the working capital needs of our business, we evaluate additional strategic uses of our funds, including the repurchase of our stock, payment of dividends, significant capital expenditures, consideration of strategic acquisitions and other potential uses of cash.

We believe we have adequate access to several sources of contractually committed borrowings and other available credit facilities. However, we could be adversely affected if the banks supplying our borrowing requirements refuse to honor their contractual commitments, cease lending, or declare bankruptcy. While we believe the lending institutions participating in our credit arrangements are financially capable, recent events in the global credit markets, including the failure, takeover or rescue by various government entities of major financial institutions, have created uncertainty with respect to credit availability.

Our ability to service our long-term debt, to remain in compliance with the various restrictions and covenants contained in our debt agreements and to fund working capital, capital expenditures and product development efforts will depend on our ability to generate cash from operating activities, which in turn is subject to, among other things, future operating performance as well as general economic, financial, competitive, legislative, regulatory, and other conditions, some of which may be beyond our control.

Table of Contents**Cash Flows Summary**

	Six-Months Ending March 31,	
	2012	2011
Net cash provided by operating activities	\$ 12,226	\$ 20,176
Net cash used in investing activities	(30,308)	(20,104)
Net cash used in financing activities	(117)	(44,881)
Effect of exchange rate changes on cash and cash equivalents	(11)	49
 Net change in cash and cash equivalents	 (18,210)	 (44,760)
Cash and cash equivalents at beginning of period	74,539	105,579
 Cash and cash equivalents at end of period	 \$ 56,329	 \$ 60,819

Net cash flows provided by operating activities for the first half of fiscal 2012 was \$12,226 compared to \$20,176 for the same period of fiscal 2011. The decline of \$7,950 is attributable to an increase in variable compensation paid of approximately \$25,000 in the first half of fiscal 2012 compared to the prior year's first half, partially offset by less of an increase in accounts receivable and inventory. The increase in variable compensation paid in the first half of fiscal 2012 was the result of improved operating results for fiscal year 2011 compared to fiscal year 2010.

Net cash flows used in investing activities for the first half of fiscal 2012 was \$30,308 compared to \$20,104 for the same period of fiscal 2011 and is due nearly entirely to cash paid for planned capital expenditures to support our current and future growth that will continue through the remainder of fiscal 2012.

Net cash flows used in financing activities for the first half of fiscal 2012 was \$117 as compared to \$44,881 for the same period of fiscal 2011. During the first half of fiscal 2012, we had net short-term borrowings of \$32,440 compared to net repayments of short-term borrowings of \$18,071 in the same period of the prior year. We utilized \$14,312 to repurchase 345 shares of our common stock in the first half of fiscal 2012, compared to \$6,837 to repurchase 208 shares of our common stock in the same period of fiscal 2011.

Contractual Obligations

We have various contractual obligations, including obligations related to long-term debt, operating leases, purchases, retirement pension benefit plans, and other postretirement benefit plans. These contractual obligations are summarized and discussed more fully in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of our most recent Form 10-K. There have been no material changes to our various contractual obligations during the first half of fiscal 2012 other than those relating to certain of our credit facilities and our Term Loan, as discussed at Note 12, *Credit facilities, short-term borrowings and long-term debt*, in the Notes to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires us to make judgments, assumptions, and estimates that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Note 1, *Operations and summary of significant accounting policies*, to the Consolidated Financial Statements in our most recent Form 10-K describes the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements. The estimates and assumptions described below are those that we consider to be most critical to an understanding of our financial statements because they involve significant judgments and uncertainties. All of these estimates reflect our best judgment about current and, for some estimates, future economic and market conditions and their effects based on information available as of the date of these financial statements. As estimates are updated or actual amounts are known, our critical accounting estimates are revised, and operating results may be affected by the revised estimates. Actual results may differ from these estimates under different assumptions or conditions.

Our management has discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors, and the Audit Committee has reviewed our disclosures in this Management's Discussion and Analysis.

Table of Contents

Revenue recognition

Except for revenue recognized under the percentage of completion method discussed below, Woodward recognizes revenue when the following criteria are met:

- 1) persuasive evidence of an arrangement exists,
- 2) delivery of the product has occurred or services have been rendered,
- 3) price is fixed or determinable, and
- 4) collectability is reasonably assured.

In implementing the four criteria stated above, we have found that determining when the risks and rewards of ownership have passed to the customer, which determines whether persuasive evidence of an arrangement exists and if delivery has occurred, may require judgment. The passage of title indicates transfer of the risks and rewards of ownership from Woodward to the customer; however, contract- and customer-specific circumstances are reviewed by management to ensure that transfer of title constitutes the transfer of the risks and rewards of ownership.

Examples of situations requiring management review and judgment, with respect to the passage of the risks and rewards of ownership, include: interpretation of customer-specific contract terms, situations where substantive performance obligations exist, such as completion of product testing that remain after product delivery to the customer, situations that require customer acceptance (or in some instances regulatory acceptance) of the product, and situations in countries whose laws provide for retention of some form of title by sellers such that Woodward is able to recover goods in the event a customer defaults on payment.

Based on management's determination, if the risks and rewards of ownership have not passed to the customer, revenue is deferred until this requirement is met.

Woodward provides certain engineering services to customers under fully funded and partially funded long- and short-term development contracts, which accounted for an immaterial amount of customer payments received in the three and six-months ending March 31, 2012 and March 31, 2011. Funded development contracts may be fixed price or cost-reimbursable contracts. Revenue for such contracts is recognized using the percentage-of-completion, milestone or completed contract methods. The applicable revenue recognition methodology to apply is dependent on an evaluation of each project.

Estimating total anticipated costs on long-term projects requires a comprehensive understanding and consideration of variables that may impact the future costs required to be incurred to complete the project, and are subject to revision and adjustment throughout the projects. Accurately estimating total costs on long-term contracts is often difficult due to the number of variables to consider, including customer changes to project scope, unexpected engineering charges and cost overruns. Changes in estimates over the course of a project will impact the future timing of revenue recognition on projects accounted for using the percentage-of-completion method and the milestone method, as well as the timing of recognition of loss reserves, if any.

Changes in contract estimates occur for a variety of reasons, including changes in contract scope, changes in contract cost estimates due to unanticipated cost growth, changes in risks affecting contract costs and/or the resolution of contract risks at lower costs than anticipated, and changes in contract overhead costs over the performance period. The Company has a contract management process involving cross-functional groups who are familiar with our contract activities. Significant changes in estimates on a single contract could impact our financial results. Aggregate net changes in contract estimates recognized on a cumulative catch-up basis were not material to our Condensed Consolidated Financial Statements for the three and six-months ending March 31, 2012 and March 31, 2011. No discrete event or adjustment to an individual contract within the aggregate net changes in contract estimates for three and six-months ending March 31, 2012 and March 31, 2011 was material to the Condensed Consolidated Financial Statements for such period.

Purchase accounting

During the third quarter of fiscal 2011, we acquired all of the outstanding stock of Integral Drive Systems AG and its European companies, including their respective holding companies (IDS), and the assets of IDS's business in China (collectively, the IDS Acquisition) for an aggregate purchase price of \$47,161. For more information on the IDS Acquisition see Note 4, *Business acquisitions*, in the Notes to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q.

Edgar Filing: Woodward, Inc. - Form 10-Q

Assigning fair market values to the assets acquired and liabilities assumed at the date of an acquisition requires knowledge of current market values, and the values of assets in use, and often requires the application of judgment regarding estimates and assumptions. While the ultimate responsibility resides with management, for material acquisitions, we retain the services of certified valuation specialists to assist with assigning estimated values to certain acquired assets and assumed liabilities, including intangible assets and postretirement benefit plan assets and liabilities.

Table of Contents

Acquired intangible assets, excluding goodwill, are valued using a discounted cash flow methodology based on future cash flows. This methodology incorporates various estimates and assumptions, the most significant being projected revenue growth rates, earnings margins, and forecasted cash flows based on the discount rate and terminal growth rate. Management projects revenue growth rates, earnings margins and cash flows based on the historical operating results of the acquired entity adjusted for synergies anticipated to be achieved through integration, expected future performance, operational strategies, and the general macroeconomic environment. We review finite-lived intangible assets for triggering events such as significant changes in operations, customers or future revenue that might indicate the need to impair the assets acquired or change the useful lives of the assets acquired. In the three and six-months ending March 31, 2012 and March 31, 2011, no impairment or change in useful lives has been recognized on other intangible assets acquired.

Estimated values for inventory acquired is subject to reliable estimates of future sales volumes, replacement costs, costs of selling effort, anticipated selling prices, normal profit margins and the percent complete, as of the acquisition date, and costs to complete work-in-process inventory. Estimated values for accounts receivable are subject to reliable estimates of collectability.

Assumed liabilities are valued based on estimates of anticipated expenditures to be incurred to satisfy the assumed obligations, including estimation of any warranty or other contractual liabilities assumed, which require the exercise of professional judgment. Valuation of postretirement benefit plan assets and liabilities is dependent on similar assumptions and estimates as those used to value our non-acquisition postretirement benefit plan assets and liabilities.

Assumed contracts may have favorable or unfavorable terms that must be valued as of the acquisition date. Such valuation is subject to management judgment regarding the evaluation and interpretation of contract terms in relation to other economic circumstances, such as the market rates for office space leases.

If we assume a performance obligation to customers as of the acquisition date, a deferred revenue obligation is recognized. Judgment is required to evaluate whether a future performance obligation exists and to assign a value to the performance obligation.

Valuation of gain and loss contingencies, if not resolved during the purchase measurement period, requires exercise of management judgment. We measure pre-acquisition contingencies at their acquisition date fair value if their fair value can be determined during the measurement period. If we cannot determine the fair value of the pre-acquisition contingency during the measurement period, we recognize an acquired asset or assumed liability if it is probable that an asset existed or that a liability had been incurred at the acquisition date and the amount of the asset or liability can be reasonably estimated.

Assumed acquired tax liabilities for uncertain tax positions are dependent on assessing the past practices of the acquisition target based on review of actual tax filings and information obtained through due diligence procedures. Evaluation of the validity of tax positions taken by the acquisition target are subject to management judgment.

Inventory

Inventories are valued at the lower of cost or market value. Inventory cost is determined using methods that approximate the first-in, first-out basis. We include product costs, labor and related fixed and variable overhead in the cost of inventories.

Inventory market values are determined by giving substantial consideration to the expected product selling price. We estimate expected selling prices based on our historical recovery rates, general economic and market conditions, the expected channel of disposition, and current customer contracts and preferences. Actual results may differ from our estimates due to changes in resale or market value and the mix of these factors. Management monitors inventory for events or circumstances, such as negative margins, recent sales history suggesting lower sales value, or changes in customer preferences, which indicate the market value of inventory is less than the carrying value of inventory and records adjustments as necessary. When inventory is written down below cost, such reduced amount is considered the cost for subsequent accounting purposes. Our recording of inventory at the lower of cost or market value has not historically required material adjustments once initially established.

The carrying value of inventory was \$416,622 and \$381,555 as of March 31, 2012 and September 30, 2011, respectively. If economic conditions, customer product requirements or other factors significantly reduce future customer demand for our products from forecast levels, then future adjustments to the carrying value of inventory may become necessary. We attempt to maintain inventory quantities at levels considered necessary to fill expected orders in a reasonable time frame, which we believe mitigates our exposure to future inventory carrying cost adjustments.

Postretirement benefits

Edgar Filing: Woodward, Inc. - Form 10-Q

The Company provides various benefits to certain employees through defined benefit plans and other postretirement benefit plans. A September 30 measurement date is utilized to value plan assets and obligations for all Woodward defined benefit pension and other postretirement benefit plans. For financial reporting purposes, net periodic benefits expense and related obligations are calculated using a number of significant actuarial assumptions, including anticipated discount rates, rates of compensation increases, long-term return on defined benefit plan investments, and anticipated healthcare cost increases. Based on these actuarial assumptions, at September 30, 2011, our recorded liabilities included \$25,349 for underfunded defined benefit pension plans and \$32,923 for unfunded other postretirement benefit plans. Changes in net periodic expense or the amounts of recorded liabilities may occur in the future due to changes in these assumptions.

Table of Contents

Estimates of the value of postretirement benefit obligations, and related net periodic benefits expense, are dependent on actuarial assumptions, including future interest rates, compensation rates, healthcare cost trends, and returns on defined benefit plan investments.

Primary actuarial assumptions for our defined benefit plans were determined as follows:

The discount rate assumption is intended to reflect the rate at which the retirement benefits could be effectively settled based upon the assumed timing of the benefit payments. In the U.S., we used a bond portfolio matching analysis based on recently traded, non-callable bonds rated AA or better, which have at least \$50 million outstanding. In the United Kingdom, we used the iBoxx AA-rated corporate bond index (applicable for bonds over 15 years) to determine a blended rate to use as the benchmark. In Japan, we used Standard & Poors AA-rated corporate bond yields (applicable for bonds over 10 years) as the benchmark. In Switzerland, we used high quality swap rates plus a credit spread of 0.36%, as high quality swaps are available in Switzerland at various durations and trade at higher volumes than bonds, as the benchmark. Our assumed rates do not differ significantly from any of these benchmarks. These rates are sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

Compensation increase assumptions are based upon historical experience and anticipated future management actions. An increase in the rate would increase our obligation and expense.

In determining the long-term rate of return on plan assets, we assume that the historical long-term compound growth rates of equity and fixed-income securities will predict the future returns of similar investments in the plan portfolio. Investment management and other fees paid out of the plan assets are factored into the determination of asset return assumptions. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market volatility. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense.

Primary actuarial assumptions for our other postretirement benefit plans were determined as follows:

The discount rate assumption is intended to reflect the rate at which the postretirement benefits could be effectively settled based upon the assumed timing of the benefit payments. In the U.S., we used a bond portfolio matching analysis based on recently traded, non-callable bonds rated AA or better, which have at least \$50 million outstanding. In the United Kingdom, we used the iBoxx AA-rated corporate bond index (applicable for bonds over 15 years) to determine a blended rate to use as the benchmark. Our assumed rate did not differ significantly from this benchmark. These rates are sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.

Variances from our fiscal year end estimates for these variables could materially affect our recognized postretirement benefit obligation liabilities. On a near-term basis, such changes are unlikely to have a material impact on reported earnings, since such adjustments are recorded to other comprehensive income and recognized into expense over a number of years. Significant changes in estimates could, however, materially affect the carrying amounts of benefit obligation liabilities, including accumulated benefit obligations, which could affect compliance with the provisions of our debt arrangements and future borrowing capacity.

The following information illustrates the sensitivity of the net periodic benefit cost and the projected accumulated benefit obligation to a change in the discount rate assumed.

Table of Contents

Assumption	Change	Increase/(Decrease) In		Post Retirement Benefit Obligation as of Sept. 30, 2011
		2012 Net Periodic Benefit Cost	2012 Projected Service and Interest Costs	
Defined benefit pension benefits:				
Change in discount rate	1% increase	\$ (1,327)	\$ (443)	\$ (21,575)
	1% decrease	2,358	403	26,480
Other postretirement benefits:				
Change in discount rate	1% increase	(116)	140	(2,584)
	1% decrease	(10)	(172)	2,998

It should be noted that economic factors and conditions often affect multiple assumptions simultaneously and the effects of changes in assumptions are not necessarily linear due to factors such as the 10% corridor applied to the larger of the postretirement benefit obligation or the fair market value of plan assets when determining amortization of actuarial net gains or losses.

A one-percentage-point change in assumed health care cost trend rates would have the following effects:

Health care cost trend rate sensitivity analysis

	1% increase	1% decrease
Effect on projected fiscal year 2012 service and interest cost	\$ 182	\$ (159)
Effect on accumulated postretirement benefit obligation at September 30, 2011	3,107	(2,722)

Reviews for impairment of goodwill

At March 31, 2012, we had \$462,659 of goodwill, representing 25% of our total assets. At September 30, 2011, we had \$462,282 of goodwill, representing 26% of our total assets. Goodwill is tested for impairment on the reporting unit level on an annual basis and more often if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. For purposes of performing the impairment tests, we identify reporting units in accordance with U.S. GAAP. The identification of reporting units and consideration of aggregation criteria requires management judgment. The impairment tests consist of comparing the fair value of reporting units, determined using discounted cash flows, with its carrying amount including goodwill. If the carrying amount of the reporting unit exceeds its fair value, we compare the implied fair value of goodwill with its carrying amount. If the carrying amount of goodwill exceeds the implied fair value of goodwill, an impairment loss would be recognized to reduce the carrying amount to its implied fair value. There was no impairment charge recorded in the three or six-months ending March 31, 2012 or in fiscal years 2011 or 2010.

Woodward completed its annual goodwill impairment test as of July 31, 2011 during the quarter ended September 30, 2011. As a part of that test, the fair value of each of Woodward's reporting units was determined using a discounted cash flow method. This method represents a Level 3 input and incorporates various estimates and assumptions, the most significant being projected revenue growth rates, operating earnings margins, and forecasted cash flows based on the discount rate and terminal growth rate. Management projects revenue growth rates, operating earnings margins and cash flows based on each reporting unit's current operational results, expected performance and operational strategies over a five or ten-year period. These projections are adjusted to reflect current economic conditions and demand for certain products, and require considerable management judgment.

Forecasted cash flows used in the July 31, 2011 impairment test were discounted using weighted average cost of capital assumptions from 10.0% to 10.2%. The terminal values of the forecasted cash flows were calculated using the Gordon Growth Model and assumed an annual compound growth rate after five or ten years of 4.3%. These inputs, which are unobservable in the market, represent management's best estimate of what market participants would use in determining the present value of the Company's forecasted cash flows. Changes in these estimates and assumptions can have a significant impact on the fair value of forecasted cash flows. Woodward evaluated the reasonableness of the reporting units resulting fair values utilizing a market multiple method.

The results of Woodward's annual goodwill impairment test performed as of July 31, 2011, indicated the estimated fair value of each reporting unit was substantially in excess of its carrying value, and accordingly, no impairment existed.

Table of Contents

Increasing the discount rate by 20%, decreasing the growth rate by 20%, or decreasing forecasted cash flow by 20%, would not have resulted in an impairment charge at July 31, 2011.

As part of the Company's ongoing monitoring efforts, Woodward will continue to consider the global economic environment and its potential impact on Woodward's business in assessing goodwill recoverability. There can be no assurance that Woodward's estimates and assumptions regarding forecasted cash flows of certain reporting units, the period or strength of the current economic recovery, or the other inputs used in forecasting the present value of forecasted cash flows will prove to be accurate projections of future performance.

Income taxes

We are subject to income taxes in both the United States and numerous foreign jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes.

During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. The reserves are established when we believe that certain positions are likely to be challenged and may not be fully sustained on review by tax authorities. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or refinement of an estimate. Although we believe our reserves are reasonable, no assurance can be given that the final outcome of these matters will be consistent with what is reflected in our historical income tax provisions and accruals. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate. As of March 31, 2012 and September 30, 2011, unrecognized gross tax benefits for which recognition has been deferred was \$17,947 and \$16,931, respectively.

Significant judgment is also required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, we consider all available evidence including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event we change our determination as to the amount of deferred tax assets that can be realized, we will adjust our valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made. As of March 31, 2012 and September 30, 2011, our valuation allowance was \$3,534 and \$3,201, respectively.

Our effective tax rates differ from the U.S. statutory rate primarily due to the tax impact of foreign operations, adjustments of valuation allowances, research tax credits, state taxes, and tax audit settlements.

Our provision for income taxes is subject to volatility and could be affected by earnings that are different than those anticipated in countries which have lower or higher tax rates; by changes in the valuation of our deferred tax assets and liabilities; by transfer pricing adjustments; by tax effects of share-based compensation; and/or changes in tax laws, regulations, and accounting principles, including accounting for uncertain tax positions, or interpretations thereof. In addition, we are subject to examination of our income tax returns by the U.S. Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these examinations will not have a significant effect on our operating results, financial condition, and cash flows.

New Accounting Standards

From time to time, the Financial Accounting Standards Board (FASB) or other standards-setting bodies issue new accounting pronouncements. Updates to the FASB Accounting Standards Codification are communicated through issuance of an Accounting Standards Update. Unless otherwise discussed, we believe that the impact of recently issued guidance, whether adopted or to be adopted in the future, is not expected to have a material impact on our Condensed Consolidated Financial Statements upon adoption.

To understand the impact of recently issued guidance, whether adopted or to be adopted, please review the information provided in Note 2, *Recent accounting pronouncements*, in the Notes to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Edgar Filing: Woodward, Inc. - Form 10-Q

In the normal course of business, we have exposures to interest rate risk from our long-term and short-term debt, and our postretirement benefit plans, and foreign currency exchange rate risk related to our foreign operations and foreign currency transactions. We are also exposed to various market risks that arise from transactions entered into in the normal course of business related to items such as the cost of raw materials and changes in inflation. Certain contractual relationships with customers and vendors mitigate risks from changes in raw material costs and foreign currency exchange rate changes that arise from normal purchasing and normal sales activities.

Table of Contents

These market risks are discussed more fully in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of our most recent Form 10-K. These market risks have not materially changed since the date our most recent Form 10-K was filed with the SEC.

Item 4. Controls and Procedures

We have established disclosure controls and procedures, which are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934 (the "Act") is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. These disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Act is accumulated and communicated to management, including our Principal Executive Officer (Thomas A. Gendron, Chairman of the Board, Chief Executive Officer and President) and Principal Financial and Accounting Officer (Robert F. Weber, Jr., Vice Chairman, Chief Financial Officer and Treasurer), as appropriate, to allow timely decisions regarding required disclosures.

Thomas A. Gendron and Robert F. Weber, Jr., evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Form 10-Q. Based on their evaluations, they concluded that our disclosure controls and procedures were effective as of March 31, 2012.

Furthermore, there have been no changes in our internal control over financial reporting during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Beginning with the third quarter of fiscal 2012, management will include the internal controls of IDS in its assessment of the effectiveness of Woodward's internal controls over financial reporting. IDS was acquired during the third quarter of fiscal 2011, as discussed in Note 4, *Business acquisitions*, in the Notes to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q, and was excluded from management's annual report on internal control over financial reporting for the fiscal year ended September 30, 2011 in accordance with the general guidance issued by the SEC regarding exclusion of certain acquired businesses. IDS will be included in the September 30, 2012 assessment of Woodward's internal controls over financial reporting.

We considered the results of our pre-acquisition due diligence activities, the continuation by IDS of its established internal control over financial reporting, and our implementation of additional internal control over financial reporting activities as part of our overall evaluation of disclosure controls and procedures as of March 31, 2012. The objectives of IDS's established internal control over financial reporting were predominately associated with local statutory financial reporting. We are in the process of completing a more complete review of IDS's internal control over financial reporting and will be implementing changes to better align its reporting and controls with the rest of Woodward. IDS accounted for approximately 3% of total assets in Woodward's Condensed Consolidated Financial Statements as of March 31, 2012. IDS accounted for approximately 1% of total net sales in Woodward's Condensed Consolidated Financial Statements for the six-months ending March 31, 2012.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Woodward is currently involved in claims, pending or threatened litigation or other legal proceedings, investigations or regulatory proceedings arising in the normal course of business, including, among others, those relating to product liability claims, employment matters, workman's compensation claims, regulatory, legal or contractual disputes, product warranty claims and alleged violations of various environmental laws. We have accrued for individual matters that we believe are likely to result in a loss when ultimately resolved using estimates of the most likely amount of loss.

While the outcome of pending claims, legal proceedings, investigations and regulatory proceedings cannot be predicted with certainty, management believes that any liabilities that may result from these claims, proceedings and investigations will not have a material effect on our liquidity, financial condition, or results of operations.

Table of Contents**Item 1A. Risk Factors**

Investment in our securities involves risk. An investor or potential investor should consider the risks summarized under the caption Risk Factors in Part I, Item 1A of our most recent Form 10-K when making investment decisions regarding our securities. The risk factors that were disclosed in our most recent Form 10-K have not materially changed since the date our most recent Form 10-K was filed with the SEC.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
Issuer Purchases of Equity Securities

(In thousands, except for shares and per share amounts.)

	Total Number of Shares Purchased	Weighted Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased under the Plans or Programs at Period End (1)
January 1, 2012 through January 31, 2012 (1)	80,000	\$ 42.30	80,000	\$ 182,115
February 1, 2012 through February 29, 2012 (1)	103,500	43.91	103,500	177,570
March 1, 2012 through March 31, 2012 (1), (2)	40,538	43.00	40,000	175,850

- (1) In July 2010, our Board of Directors authorized a stock repurchase program of up to \$200,000 of our outstanding shares of common stock on the open market or in privately negotiated transactions over a three-year period that will end in July 2013.
- (2) The Woodward Executive Benefit Plan, which is a separate legal entity, acquired 538 shares of common stock on the open market related to the reinvestment of dividends for shares of treasury stock held for deferred compensation in March 2012. Shares owned by the Woodward Executive Benefit Plan are included in Treasury stock held for deferred compensation in the Condensed Consolidated Balance Sheets.
