Securities And Exchange Commission
Washington, D.C. 20549

FORM 10-K

x Annual Report Pursuant To Section 13 or 15(d) of the Securities Exchange Act of 1934

For The Fiscal Year Ended December 31, 2012

or

.. Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission	Exact name of registrant as specified in its charter	State of	I.R.S. Employer
File Number 1-14514	and principal office address and telephone number Consolidated Edison, Inc. 4 Irving Place, New York, New York 10003	Incorporation New York	ID. Number 13-3965100
1-1217	(212) 460-4600 Consolidated Edison Company of New York, Inc. 4 Irving Place, New York, New York 10003	New York	13-5009340

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

(212) 460-4600

Securities Registered Pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Consolidated Edison, Inc., Common Shares (\$.10 par value)	New York Stock Exchange
Securities Registered Pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Consolidated Edison, Inc. (Con Edison)	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
Consolidated Edison Company of New York, Inc. (CECONY)	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Con Edison	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>
CECONY	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Con Edison	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
CECONY	Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of

Table of Contents

this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Con Edison	Yes	x	No	..
CECONY	Yes	x	No	..

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ..

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Con Edison						
Large accelerated filer	x	Accelerated filer	..	Non-accelerated filer	..	Smaller reporting company
CECONY						
Large accelerated filer	..	Accelerated filer	..	Non-accelerated filer	x	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Con Edison	Yes	..	No	x
CECONY	Yes	..	No	x

The aggregate market value of the common equity of Con Edison held by non-affiliates of Con Edison, as of June 30, 2012, was approximately \$18.2 billion.

As of January 31, 2013, Con Edison had outstanding 292,877,396 Common Shares (\$.10 par value).

All of the outstanding common equity of CECONY is held by Con Edison.

Documents Incorporated By Reference

Portions of Con Edison's definitive proxy statement for its Annual Meeting of Stockholders to be held on May 20, 2013, to be filed with the Commission pursuant to Regulation 14A, not later than 120 days after December 31, 2012, is incorporated in Part III of this report.

Filing Format

This Annual Report on Form 10-K is a combined report being filed separately by two different registrants: Consolidated Edison, Inc. (Con Edison) and Consolidated Edison Company of New York, Inc. (CECONY). CECONY is a wholly-owned subsidiary of Con Edison and, as such, the information in this report about CECONY also applies to Con Edison. CECONY meets the conditions set forth in General Instruction (I)(1)(a) and (b) of Form 10-K and is therefore filing this Form 10-K with the reduced disclosure format.

As used in this report, the term the "Companies" refers to Con Edison and CECONY. However, CECONY makes no representation as to the information contained in this report relating to Con Edison or the subsidiaries of Con Edison other than itself.

Table of Contents

Introduction

This introduction contains certain information about Con Edison and its subsidiaries, including CECONY, and is qualified in its entirety by reference to the more detailed information appearing elsewhere or incorporated by reference in this report.

Con Edison's mission is to provide energy services to our customers safely, reliably, efficiently and in an environmentally sound manner; to provide a workplace that allows employees to realize their full potential; to provide a fair return to our investors; and to improve the quality of life in the communities we serve.

Con Edison is a holding company that owns:

CECONY, which delivers electricity, natural gas and steam to customers in New York City and Westchester County;

O&R (together with CECONY referred to as the Utilities), which delivers electricity and natural gas to customers primarily located in southeastern New York, and northern New Jersey and northeastern Pennsylvania; and

Competitive energy businesses, which provide retail and wholesale electricity supply and energy services.

Con Edison anticipates that the Utilities, which are subject to extensive regulation, will continue to provide substantially all of its earnings over the next few years. The Utilities have approved rate plans that are generally designed to cover each company's cost of service, including the capital and other costs of the company's energy delivery systems. The Utilities recover from their full-service customers (generally, on a current basis) the cost the Utilities pay for the energy and charge all of their customers the cost of delivery service.

(a) Reflects a \$1,076 million decrease in regulatory assets for unrecognized pension and other retirement costs. See Notes E and F to the financial statements in Item 8.

(b) Reflects a \$1,257 million increase in net plant, a \$241 million increase in regulatory assets environmental remediation costs and a \$125 million increase in accounts receivable from affiliated companies.

(c) Reflects a \$1,101 million increase in net plant and a \$1,402 million increase in regulatory assets for unrecognized pension and other postretirement costs. See Notes E and F to the financial statements in Item 8.

(d) Reflects a \$1,243 million increase in net plant and a \$229 million increase in regulatory assets for deferred storm costs. See Note B to the financial statements in Item 8.

Significant 2012 Developments

CECONY delivered 57,201 million kWhs of electricity (1.1 percent decrease from prior year), 116,416 mdths of gas (9.8 percent decrease from prior year) and 19,741 MMBls of steam to its customers (11.6 percent decrease from prior year). The company's electric and gas rate plans include revenue decoupling mechanisms pursuant to which delivery revenues are not generally affected by changes in delivery volumes from levels assumed in the rate plans. See Results of Operations in Item 7.

CECONY invested \$1,909 million to upgrade and reinforce its energy delivery systems. O&R invested \$137 million in its energy delivery systems. See Capital Requirements and Resources in Item 1.

CECONY's electric, gas and steam rates increased (on an annual basis) \$286.9 million (April 2012), \$46.7 million (October 2012) and \$17.8 million plus a one-time surcharge of \$31.7 million (October 2012), respectively. O&R's electric and gas rates increased (on an annual basis) \$19.4 million and \$4.6 million plus a one-time surcharge of \$4.3 million, respectively (July and November 2012). See Note B to the financial statements in Item 8.

In late October 2012, Superstorm Sandy caused extensive damage to the Utilities' electric distribution system. Superstorm Sandy interrupted service to approximately 1.4 million of the Utilities' customers more than four times the number of customers impacted by the Utilities' previous worst storm event (Hurricane Irene in 2011). See Other Regulatory Matters in Note B to the financial statements in Item 8.

Available Information

Con Edison and CECONY file annual, quarterly and current reports and other information, and Con Edison files proxy statements, with the Securities and Exchange Commission (SEC). The public may read and copy any materials that the Companies file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Room 1580 Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy statements, and other information regarding issuers (including Con Edison and CECONY) that file electronically with the SEC. The address of that site is www.sec.gov.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

This information the Companies file with the SEC is also available free of charge on or through the Investor Information section of their websites as soon as reasonably practicable after the reports are electronically filed with, or furnished to, the SEC. Con Edison's internet website is at: www.conedison.com; and CECONY's is at www.coned.com.

The Investor Information section of Con Edison's website also includes the company's code of ethics (and amendments or waivers of the code for executive officers or directors), corporate governance guidelines and the charters of the following committees of the company's Board of Directors: Audit Committee, Management Development and Compensation Committee, and Corporate Governance and Nominating Committee. This information is available in print to any shareholder who requests it. Requests should be directed to: Corporate Secretary, Consolidated Edison, Inc., 4 Irving Place, New York, NY 10003.

Information on the Companies' websites is not incorporated herein.

Forward-Looking Statements

This report includes forward-looking statements intended to qualify for the safe-harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the

CON EDISON ANNUAL REPORT 7

Table of Contents

Securities Exchange Act of 1934, as amended. Forward-looking statements are statements of future expectation and not facts. Words such as expects, estimates, anticipates, intends, believes, plans, will and similar expressions identify forward-looking statements. Forward-looking statements are based on information available at the time the statements are made, and accordingly speak only as of that time. Actual results or developments might differ materially from those included in the forward-looking statements because of various factors including, but not limited to, those discussed under Risk Factors, in Item 1A.

Table of Contents

PART I

ITEM 1: BUSINESS
Overview

Consolidated Edison, Inc. (Con Edison), incorporated in New York State in 1997, is a holding company which owns all of the outstanding common stock of Consolidated Edison Company of New York, Inc. (CECONY), Orange and Rockland Utilities, Inc. (O&R) and the competitive energy businesses. As used in this report, the term the Companies refers to Con Edison and CECONY.

CECONY's principal business operations are its regulated electric, gas and steam delivery businesses. O&R's principal business operations are its regulated electric and gas delivery businesses. The competitive energy businesses sell electricity to wholesale and retail customers, provide certain energy-related services, and participate in energy infrastructure projects. Con Edison is evaluating additional opportunities to invest in electric and gas-related businesses.

Con Edison's strategy is to provide reliable energy services, maintain public and employee safety, promote energy efficiency, and develop cost-effective ways of performing its business. Con Edison seeks to be a responsible steward of the environment and enhance its relationships with customers, regulators and members of the communities it serves.

CECONY

Electric

CECONY provides electric service to approximately 3.3 million customers in all of New York City (except part of Queens) and most of Westchester County, an approximately 660 square mile service area with a population of more than nine million.

Gas

CECONY delivers gas to approximately 1.1 million customers in Manhattan, the Bronx and parts of Queens and Westchester County.

Steam

CECONY operates the largest steam distribution system in the United States by producing and delivering approximately 20,000 MMlbs of steam annually to approximately 1,717 customers in parts of Manhattan.

O&R

Electric

O&R and its utility subsidiaries, Rockland Electric Company (RECO) and Pike County Light & Power Company (Pike) (together referred to herein as O&R) provide electric service to approximately 0.3 million customers in southeastern New York and in adjacent areas of northern New Jersey and northeastern Pennsylvania, an approximately 1,350 square mile service area.

Gas

O&R delivers gas to over 0.1 million customers in southeastern New York and adjacent areas of northeastern Pennsylvania.

Competitive Energy Businesses

Con Edison pursues competitive energy opportunities through three wholly-owned subsidiaries: Con Edison Solutions, Con Edison Energy and Con Edison Development. These businesses include the sales and related hedging of electricity to wholesale and retail customers, sales of certain energy-related products and services, and participation in energy infrastructure projects. At December 31, 2012, Con Edison's equity investment in its competitive energy businesses was \$522 million and their assets amounted to \$1,061 million.

Table of Contents

Utility Regulation

State Utility Regulation

Regulators

The Utilities are subject to regulation by the New York State Public Service Commission (NYSPSC), which under the New York Public Service Law, is authorized to set the terms of service and the rates the Utilities charge for providing service in New York. It also approves the issuance of the Utilities' securities. It exercises jurisdiction over the siting of the Utilities' electric transmission lines and approves mergers or other business combinations involving New York utilities. In addition, it has the authority to impose penalties on utilities, which could be substantial, for violating state utility laws and regulations. O&R's New Jersey subsidiary, RECO, is subject to similar regulation by the New Jersey Board of Public Utilities (NJBPUC). O&R's Pennsylvania subsidiary, Pike, is subject to similar regulation by the Pennsylvania Public Utility Commission (PAPUC). The NYSPSC, together with the NJBPUC and the PAPUC, are referred to herein as state utility regulators.

In November 2012, the Governor of New York established a commission to review actions taken by New York utilities relating to emergency weather events, including Superstorm Sandy and other major storms, and to make recommendations regarding, among other things, the oversight, management and legal framework governing power delivery services in New York. See "Other Regulatory Matters" in Note B to the financial statements in Item 8. In January 2013, following the issuance of recommendations by the commission, the Governor submitted a bill to the State legislature that, among other things, would authorize the NYSPSC to (i) levy expanded penalties against utilities; (ii) review, at least every five years, a utility's capability to provide safe, adequate and reliable service, and order the utility to comply with additional and more stringent terms of service than existed prior to the review or cause the utility to divest some or all of its utility assets, including franchise territories (based on standards established by the NYSPSC to ensure continuity of service, due process and fair and just compensation); and (iii) revoke or modify an operating certificate issued to the utility by the NYSPSC (following consideration of certain factors, including public interest and standards deemed necessary by the NYSPSC to ensure continuity of service, and due process).

Utility Industry Restructuring In New York

In the 1990s, the NYSPSC restructured the electric utility industry in the state. In accordance with NYSPSC orders, the Utilities sold all of their electric generating facilities other than those that also produce steam for CECONY's steam business (see Electric Operations' Electric Facilities below) and provided all of their customers the choice to buy electricity or gas from the Utilities or other suppliers (see Electric Operations' Electric Sales and Deliveries and Gas Operations' Gas Sales and Deliveries below).

Following adoption of NYSPSC industry restructuring, there were several utility mergers as a result of which substantially all of the electric and gas delivery service in New York State is now provided by one of three investor-owned utility companies—Con Edison, National Grid plc and Iberdrola, S.A.—or one of two state authorities—New York Power Authority (NYPA) or Long Island Power Authority.

Rate Plans

Investor-owned utilities in the United States provide service to customers according to the terms of tariffs approved by the appropriate state utility regulator. The tariffs include schedules of rates for service that are designed to permit the utilities to recover from their customers the approved anticipated costs, including capital costs, of providing service to customers as defined by the tariff. The tariffs implement rate plans, that result from rate orders, settlements, or joint proposals developed during rate proceedings. The utilities' earnings depend on the rate levels authorized in the rate plans and their ability to operate their businesses in a manner consistent with their rate plans.

The utilities' rate plans each cover specified periods, but rates determined pursuant to a plan generally continue in effect until a new rate plan is approved by the state utility regulator. In New York, either the utility or the NYSPSC can commence a proceeding for a new rate plan, and a new rate plan filed by the utility will take effect automatically in 11 months unless prior to such time the NYSPSC approves a rate plan.

In each rate proceeding, rates are determined by the state utility regulator following the submission by the utility of testimony and supporting information, which are subject to review by the staff of the regulator. Other parties with an interest in the proceeding can also review the utility's proposal and become involved in the rate case. The review process is overseen by an Administrative Law Judge. After an Administrative Law Judge issues a decision, that generally considers the interests of the utility, the regulatory staff, other parties, and legal requisites, the regulator will issue a rate order. The utility and the regulator's staff and interested parties may enter into a settlement agreement or joint proposal prior to the completion of this administrative process, in which case the agreement would be subject to approval of the regulator.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

For each rate plan, the revenues needed to provide the utility a return on invested capital is determined by multiplying the utility's forecasted rate base by the utility's pre-tax weighted average cost of capital. In general, rate base is the amount of the utility's net plant, deferred taxes and working capital. The NYSPSC uses a forecast of rate base for the rate year. The weighted average cost of capital is determined based on the forecasted amounts and costs of long-term debt and customer deposits, the forecasted amount of common equity and an allowed return on common equity determined by the state utility regulator. The NYSPSC's current methodology for determining the allowed return on common equity assigns a one-third weight to an estimate determined from a capital asset pricing model applied to a peer group of utility companies and a two-thirds weight to an estimate

12 CON EDISON ANNUAL REPORT

Table of Contents

determined from a dividend discount model using stock prices and dividend forecasts for a peer group of utility companies.

Pursuant to the Utilities rate plans, there generally can be no change to the charges to customers during the respective terms of the rate plans other than for recovery of the costs incurred for energy supply and specified adjustments provided for in the rate plans.

Common provisions of the Utilities rate plans may include:

Recoverable energy cost clauses that allow the Utilities to recover on a current basis the costs for the energy they supply with no mark-up to their full-service customers.

Other cost reconciliations that reconcile pension and other postretirement benefit costs, environmental remediation costs, and certain other costs to amounts reflected in delivery rates for such costs. Utilities generally retain the right to petition for recovery or accounting deferral of extraordinary and material cost increases for items such as major storm events and provision is sometimes made for the utility to retain a share of cost reductions, for example, property tax refunds.

Revenue decoupling mechanisms under which actual energy delivery revenues will be compared, on a periodic basis, with the authorized delivery revenues. The difference is accrued with interest for refund to, or recovery from customers, as applicable.

Earnings sharing provisions require the Utilities to defer for customer benefit earnings over specified rates of return on common equity. There is no symmetric mechanism for earnings below specified rates of return on common equity.

Negative earnings adjustments for failure to meet certain performance standards relating to service, reliability, safety and other matters.

The following table should be read in conjunction with, and is subject to, the more detailed discussion of the Utilities rate plans in Note B to the financial statements in Item 8 (which information is incorporated by reference herein).

Effective Period	Rate Increases	Rate Base (millions of dollars, except percentages)	Amortization To Income of Net Regulatory (Assets) and Liabilities	Authorized Return on Equity (ROE)	ROE Sharing Threshold Earnings Sharing Terms(a) (Shareholders/ Customers)

(a) Subject to limitation for cost reconciliations described in Note B to the financial statements in Item 8.

(b) Pursuant to NYSPSC orders, a portion of the company's revenues is being collected subject to refund. See "Other Regulatory Matters" in Note B to the financial statements in Item 8.

(c) In Yr. 2 and Yr. 3, 10.65% - 12.149%: 40/60, 12.15% - 13.149%: 25/75, and > 13.15%: 10/90.

(d) In Yr. 2 and Yr. 3, 10.1% - 11.59%: 40/60, 11.6% - 12.59%: 25/75, and >12.6%: 10/90.

(e) The rate plan provides for a one-time surcharge of \$31.7 million in Year 3.

(f) In Yr. 2, 10.31% - 11.3%: 50/50, 11.31% - 12.3%: 25/75, and >12.3%: 10/90. In Yr. 3, 10.41% - 11.4%: 50/50, 11.41% - 12.4%: 25/75, and >12.4%: 10/90.

(g) The rate plan provides for a one-time surcharge of \$4.3 million in Year 3.

Table of Contents

In January 2013, CECONY filed a request with the NYSPSC for new electric, gas and steam rate plans. See Note B to the financial statements (which information is incorporated by reference herein).

Liability for Service Interruptions and Other Non-rate Conditions of Service

The tariff provisions under which CECONY provides electric, gas and steam service limit the company's liability to pay for damages resulting from service interruptions to circumstances resulting from its gross negligence or willful misconduct.

CECONY's tariff for electric service provides for reimbursement to electric customers for spoilage losses resulting from service interruptions in certain circumstances. In general, the company is obligated to reimburse affected residential and commercial customers for food spoilage of up to \$450 and \$9,000, respectively, and reimburse affected residential customers for prescription medicine spoilage losses without limitation on amount per claim. The company's maximum aggregate liability for such reimbursement for an incident is \$15 million. The company is not required to provide reimbursement to electric customers for outages attributable to generation or transmission system facilities or events beyond its control, such as storms, provided the company makes reasonable efforts to restore service as soon as practicable.

Generic Proceedings

The NYSPSC from time to time conducts generic proceedings to consider issues relating to all electric and gas utilities operating in New York State. Pending proceedings included those relating to utilities exiting the service of selling electric energy and gas at retail (including an examination of utilities' provider of last resort responsibility); the utilities' vision for the smart grid; and the implementation of energy efficiency and renewable energy programs and consumer protections. The Utilities are typically active participants in such proceedings. The Utilities do not expect that these pending generic proceedings will have a material adverse effect on their financial positions, results of operation or liquidity. In February 2011, the NYSPSC initiated a proceeding to examine the existing mechanisms pursuant to which utilities recover site investigation and remediation costs and possible alternatives. In November 2012, the NYSPSC adopted an order in which it, among other things, declined to adopt a generic policy requiring sharing such costs between utilities and their customers and indicated that sharing may be appropriate in specific company and rate case circumstances (for example, to serve as an incentive to a utility that has failed to adequately constrain such costs or, in the context of a multi-year rate plan, where some allocation of earnings in excess of the allowed rate of return could be used toward payment of such costs). See Environmental Matters - CECONY and Environmental Matters - O&R, below, and Note G to the financial statements in Item 8.

Federal Utility Regulation

The Federal Energy Regulatory Commission (FERC), among other things, regulates the transmission and wholesale sales of electricity in interstate commerce and the transmission and sale of natural gas for resale in interstate commerce. In addition, the FERC has the authority to impose penalties, which could be substantial, including penalties for the violation of reliability and cyber security rules. Certain activities of the Utilities and the competitive energy businesses are subject to the jurisdiction of the FERC. The Utilities are subject to regulation by the FERC with respect to electric transmission rates and to regulation by the NYSPSC with respect to electric and gas retail commodity sales and local delivery service. As a matter of practice, the NYSPSC has approved delivery service rates that include both distribution and transmission costs.

New York Independent System Operator (NYISO)

The NYISO is a not-for-profit organization that controls and operates most of the electric transmission facilities in New York State, including those of the Utilities, as an integrated system and administers wholesale markets for electricity in New York State. In addition to operating the state's high voltage grid, the NYISO administers the energy, ancillary services and capacity markets. The New York State Reliability Council (NYSRC) promulgates reliability standards subject to FERC oversight. Pursuant to a requirement that is set annually by the NYSRC, the NYISO requires that entities supplying electricity to customers in New York State have generating capacity (owned, procured through the NYISO capacity markets or contracted for) in an amount equal to the peak demand of their customers plus the applicable reserve margin. In addition, the NYISO has determined that entities that serve customers in New York City must have enough capacity that is electrically located in New York City to cover a substantial percentage (currently 83 percent; 86 percent effective May 2013) of the peak demands of their New York City customers. These requirements apply both to regulated utilities such as CECONY and O&R for the customers they supply under regulated tariffs and to companies such as Con Edison Solutions that supply customers on market terms. RECO, O&R's New Jersey subsidiary, provides electric service in an area that has a different independent system operator - PJM Interconnection LLC (PJM).

New York Energy Highway

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

In October 2012, the Energy Highway Task Force appointed by the Governor of New York issued its Blueprint containing recommendations to modernize New York's energy systems. The recommended actions included electric transmission construction and upgrades to electric and natural gas infrastructure.

In November 2012, the NYSPSC established a proceeding to review specific proposals from utilities and private developers

14 CON EDISON ANNUAL REPORT

Table of Contents

for new electric transmission lines and upgrades to existing facilities that will address transmission congestion between upstate and downstate. In January 2013, the owners of transmission facilities in New York (including the Utilities), on behalf of the proposed New York Transmission Company that is to be owned by their affiliates, submitted a statement of intent to construct five transmission projects, with an aggregate estimated cost of \$1,300 million. The projects, which could be completed in the 2016 to 2019 timeframe, will require authorizations from the NYSPPSC (including its determination that the projects meet public policy goals), the FERC, as well as other federal, state and local agencies.

Competition

Competition from suppliers of oil and other sources of energy, including distributed generation (such as solar, fuel cells and micro-turbines), may provide alternatives for the Utilities' delivery customers. See *Rate Agreements* in Note B and *Recoverable Energy Costs* in Note A to the financial statements in Item 8.

The Utilities do not consider it reasonably likely that another company would be authorized to provide utility delivery service of electricity, natural gas or steam where the company already provides service. Any such other company would need to obtain NYSPPSC consent, satisfy applicable local requirements, install facilities to provide the service, meet applicable services standards, and charge customers comparable taxes and other fees and costs imposed on the service. A new delivery company would also be subject to extensive ongoing regulation by the NYSPPSC. See *Utility Regulation* *State Utility Regulation* *Regulators* .

The competitive energy businesses participate in competitive energy supply and services businesses that are subject to different risks than those found in the businesses of the Utilities.

The Utilities

CECONY

CECONY, incorporated in New York State in 1884, is a subsidiary of Con Edison and has no significant subsidiaries of its own. Its principal business segments are its regulated electric, gas and steam businesses.

For a discussion of the company's operating revenues and operating income for each segment, see *Results of Operations* in Item 7. For additional information about the segments, see Note N to the financial statements in Item 8.

Electric Operations

Electric Facilities

CECONY's capitalized costs for utility plant, net of accumulated depreciation, for distribution facilities were \$13,930 million and \$13,125 million at December 31, 2012 and 2011, respectively. For its transmission facilities, the costs for utility plant, net of accumulated depreciation, were \$2,518 million and \$2,476 million at December 31, 2012 and 2011, respectively, and for its generation facilities, the costs for utility plant, net of accumulated depreciation, were \$434 million and \$400 million, at December 31, 2012 and 2011, respectively.

Distribution Facilities. CECONY owns 62 area distribution substations and various distribution facilities located throughout New York City and Westchester County. At December 31, 2012, the company's distribution system had a transformer capacity of 28,899 MVA, with 36,825 miles of overhead distribution lines and 96,907 miles of underground distribution lines. The underground distribution lines represent the single longest underground electric delivery system in the United States. In late October 2012, Superstorm Sandy caused extensive damage to the company's electric distribution system. See *Other Regulatory Matters* in Note B to the financial statements in Item 8.

Transmission Facilities. The company's transmission facilities are located in New York City and Westchester, Orange, Rockland, Putnam and Dutchess counties in New York State. At December 31, 2012, CECONY owned or jointly owned 438 miles of overhead circuits operating at 138, 230, 345 and 500 kV and 750 miles of underground circuits operating at 69, 138 and 345 kV. The company's 39 transmission substations and 62 area stations are supplied by circuits operated at 69 kV and above. In 2011, the company completed and placed in service a 9 1/2 mile transmission line connecting its Sprainbrook substation in Westchester County with the new Academy substation in upper Manhattan.

CECONY's transmission facilities interconnect with those of National Grid, Central Hudson Gas & Electric Corporation, O&R, New York State Electric & Gas, Connecticut Light & Power Company, Long Island Power Authority, NYPA and Public Service Electric and Gas Company.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Generating Facilities. CECONY's electric generating facilities consist of plants located in Manhattan with an aggregate capacity of 706 MW. The company expects to have sufficient amounts of gas and fuel oil available in 2013 for use in these facilities.

Electric Sales and Deliveries

CECONY delivers electricity to its full-service customers who purchase electricity from the company. The company also delivers electricity to its customers who purchase electricity from other suppliers through the company's retail access plan. In addition, the company delivers electricity to state and municipal customers of NYPA and economic development customers of municipal electric agencies.

CON EDISON ANNUAL REPORT 15

Table of Contents

The company charges all customers in its service area for the delivery of electricity. The company generally recovers, on a current basis, the cost of the electricity that it buys and then sells to its full-service customers. It does not make any margin or profit on the electricity it sells. Effective April 2008, CECONY's electric revenues became subject to a revenue decoupling mechanism. As a result, its electric delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. CECONY's electric sales and deliveries, excluding off-system sales, for the last five years were:

	Year Ended December 31,				
	2008	2009	2010	2011	2012
Electric Energy Delivered (millions of kWhs)					
CECONY full service customers	24,640	23,483	24,142	22,622	20,622
Delivery service for retail access customers	22,047	21,859	23,098	24,234	25,990
Delivery service to NYPA customers and others	10,918	10,650	10,834	10,408	10,267
Delivery service for municipal agencies	718	675	619	562	322
Total Deliveries in Franchise Area	58,323	56,667	58,693	57,826	57,201
Electric Energy Delivered (\$ in millions)					
CECONY full service customers	\$ 5,569	\$ 5,040	\$ 5,546	\$ 5,237	\$ 4,731
Delivery service for retail access customers	1,507	1,855	2,123	2,354	2,750
Delivery service to NYPA customers and others	378	423	516	555	596

Commercial and Industrial	21.2	19.6	20.4	20.7	20.0

(a) Includes Municipal Agency sales.

For further discussion of the company's electric operating revenues and its electric results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Electric Peak Demand

The electric peak demand in CECONY's service area occurs during the summer air conditioning season. CECONY's highest service area peak demand, which occurred on July 22, 2011, was 13,189 MW. The 2012 service area peak demand, which occurred on July 18, 2012, was 12,836 MW. The 2012 peak demand included an estimated 5,428 MW for CECONY's full-service customers, 5,688 MW for customers participating in its electric retail access program and 1,720 MW for NYPA's customers and municipal electric agency customers. The NYISO invoked demand reduction programs on July 18, 2012, as it had on peak demand days in some previous years (most recently 2011). Design weather for the electric system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. Since the majority of demand reduction programs are invoked only in specific circumstances, design conditions do not include these programs' potential impact. However, the CECONY forecasted peak demand at design conditions does include the impact of mandatory demand reduction programs. The company estimates that, under design weather conditions, the 2013 service area peak demand will be 13,200 MW, including an estimated 5,315 MW for its full-service customers, 5,965 MW for its electric retail access customers and 1,920 MW for NYPA's customers and municipal electric agency customers. The company forecasts average annual growth of the peak electric demand in the company's service area over the next five years at design conditions to be approximately 1.3 percent per year.

Electric Supply

Most of the electricity sold by CECONY to its customers in 2012 was purchased under firm power contracts or through the wholesale electricity market administered by the NYISO. Con Edison expects that these resources will again be adequate to meet the requirements of its customers in 2013. The company plans to meet its continuing obligation to supply electricity to its customers through a combination of electricity purchased under contracts, purchased through the NYISO's wholesale electricity market, or generated from its electricity generating facilities. For information about the company's contracts for approximately 2,835 MW of electric generating capacity, see Notes I and O to the financial statements in Item 8. To reduce the volatility of its customers' electric energy costs, the company has contracts to purchase electric energy and enters into derivative transactions to hedge the costs of a portion of its expected purchases under these contracts and through the NYISO's

wholesale electricity market.

16 CON EDISON ANNUAL REPORT

Table of Contents

CECONY owns generating stations in New York City associated primarily with its steam system. As of December 31, 2012, the generating stations had a combined electric capacity of approximately 706 MW, based on 2012 summer test ratings. For information about electric generating capacity owned by the company, see *Electric Operations*, *Electric Facilities*, *Generating Facilities*, above.

In general, the Utilities recover their purchased power costs, including the cost of hedging purchase prices, pursuant to rate provisions approved by the state public utility regulatory authority having jurisdiction. See *Financial and Commodity Market Risks*, *Commodity Price Risk*, in Item 7 and *Recoverable Energy Costs* in Note A to the financial statements in Item 8. From time to time, certain parties have petitioned the NYSPSC to review these provisions, the elimination of which could have a material adverse effect on the Companies' financial position, results of operations or liquidity.

In a July 1998 order, the NYSPSC indicated that it agree(s) generally that CECONY need not plan on constructing new generation as the competitive market develops, but considers overly broad and did not adopt CECONY's request for a declaration that, solely with respect to providing generating capacity, it will no longer be required to engage in long-range planning to meet potential demand and, in particular, that it will no longer have the obligation to construct new generating facilities, regardless of the market price of capacity. CECONY monitors the adequacy of the electric capacity resources and related developments in its service area, and works with other parties on long-term resource adequacy issues within the framework of the NYISO. In addition, the NYISO has adopted reliability rules that include obligations on transmission owners (such as CECONY) to construct facilities that may be needed for system reliability if the market does not solve a reliability need identified by the NYISO. See *NYISO* above.

In November 2012, the NYSPSC directed CECONY to work with NYPA to develop a contingency plan to address reliability concerns associated with the potential closure by the end of 2015 of the nuclear power plants at the Indian Point Energy Center (which is owned by Entergy Corporation subsidiaries). In February 2013, CECONY and NYPA submitted their plan, which takes into account incremental CECONY energy efficiency and demand management programs. The plan provides for the New York transmission owners, subject to required approvals, to begin developing three proposed transmission projects for implementation by 2016. These projects, which include two projects included in the statement of intent discussed under *New York Energy Highway* above, subsequently would be transferred to the proposed New York Transmission Company. The plan also provides for the issuance by NYPA of a request for proposals for generation and transmission projects that could also be in service by 2016. Under the plan, the NYSPSC is to designate which projects are authorized to be implemented.

In 2009, the then Governor of New York announced a new goal of meeting 45 percent of the State's electricity needs with energy efficiency or renewable resources by 2015. The goal is to be achieved by reducing electricity consumption by 15 percent, and having 30 percent of the electricity used in New York provided by renewable resources. Establishment of the renewable resources target began in September 2004, when the NYSPSC issued an order establishing a renewable portfolio standard (RPS) which provides that by 2013, 24 percent of the State's energy needs would come from large renewable facilities (such as wind, hydro, and biomass) and smaller customer-sited renewable generation (limited to solar, fuel cells, and wind farm less than 300 kW in size), and 1 percent would come from green marketing efforts. The NYSPSC agreed with the Utilities that the responsibility for procuring the new renewable resources would rest with the New York State Energy Research and Development Authority (NYSERDA), and not the Utilities. In implementing the RPS for large renewable resources, NYSEDA enters into long-term agreements with developers, and pays the developers renewable premiums based on the facilities' energy output. For customer-sited resources, NYSEDA provides rebates when customers install eligible renewable technologies. The renewable premiums, rebates, and NYSEDA's administrative fee are financed through a volumetric charge imposed on the delivery customers of each of the state's investor-owned utilities. Pursuant to the 2004 NYSPSC order, CECONY billed customers RPS surcharges of \$92 million and \$73 million in each of 2012 and 2011, respectively. These surcharges will increase as NYSEDA increases its renewables energy purchases. The NYSPSC issued an order in January 2010 formally increasing the RPS target to 30 percent by 2015 and requiring NYSPSC staff to develop a program to address the geographic balance of the RPS, setting-aside up to \$30 million per year to be spent in the downstate region (including in the Utilities service territories) until 2015 for this purpose. Large renewable resources are grid-connected and sell their energy output in the wholesale energy market administered by the NYISO. As a result of the Utilities participation in the NYISO wholesale markets, a portion of the Utilities' NYISO energy purchases are sourced from renewable resources. The energy produced by customer-sited renewables offsets the energy which the Utilities would otherwise have procured, thereby reducing the overall level of non-renewable energy consumed. In 2008, the NYSPSC issued an order authorizing the Utilities to begin implementing energy efficiency programs. Costs of the programs are being recovered primarily through a separate non-bypassable charge.

Gas Operations

Gas Facilities

CECONY's capitalized costs for utility plant, net of accumulated depreciation, for gas facilities, which are primarily distribution

Table of Contents

facilities, were \$3,735 million and \$3,455 million at December 31, 2012 and 2011, respectively.

Natural gas is delivered by pipeline to CECONY at various points in its service territory and is distributed to customers by the company through an estimated 4,360 miles of mains and 387,881 service lines. The company owns a natural gas liquefaction facility and storage tank at its Astoria property in Queens, New York. The plant can store approximately 1,000 mdths of which a maximum of about 250 mdths can be withdrawn per day. The company has about 1,226 mdths of additional natural gas storage capacity at a field in upstate New York, owned and operated by Honeoye Storage Corporation, a corporation 28.8 percent owned by CECONY and 71.2 percent owned by Con Edison Development.

Gas Sales and Deliveries

The company generally recovers the cost of the gas that it buys and then sells to its firm sales customers. It does not make any margin or profit on the gas it sells. CECONY's gas revenues are subject to a weather normalization clause and a revenue decoupling mechanism. As a result, its gas delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved.

CECONY's gas sales and deliveries for the last five years were:

	Year Ended December 31,				
	2008	2009	2010	2011	2012

Table of Contents**Gas Peak Demand**

The gas peak demand for firm service customers in CECONY's service area occurs during the winter heating season. The daily peak day demand during the winter 2012/2013 (through January 31, 2013) occurred on January 24, 2013 when the demand reached 941 mdths. The 2012/2013 winter demand included 621 mdths for CECONY's full-service customers and 320 mdths for customers participating in its gas retail access program. Design weather for the gas system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. The company estimates that, under design weather conditions, the 2013/2014 service area peak demand will be 1,274 mdths, including an estimated 689 mdths for its full-service customers and 585 mdths for its retail access customers. The company forecasts average annual growth of the peak gas demand over the next five years at design conditions to be approximately 4.3 percent in its service area. The forecasted peak demand at design conditions does not include gas used by interruptible gas customers or in generating stations (electricity and steam).

Gas Supply

CECONY and O&R have combined their gas requirements, and contracts to meet those requirements, into a single portfolio. The combined portfolio is administered by, and related management services are provided by, CECONY (for itself and as agent for O&R) and costs are allocated between the Utilities in accordance with provisions approved by the NYSPSC. See Note S to the financial statements in Item 8.

Charges from suppliers for the firm purchase of gas, which are based on formulas or indexes or are subject to negotiation, are generally designed to approximate market prices. The gas supply contracts are for various terms extending to 2015. The Utilities have contracts with interstate pipeline companies for the purchase of firm transportation from upstream points where gas has been purchased to the Utilities' distribution systems, and for upstream storage services. Charges under these transportation and storage contracts are approved by the FERC. Such contracts are for various terms extending to 2027. The Utilities are required to pay certain fixed charges under the supply, transportation and storage contracts whether or not the contracted capacity is actually used. These fixed charges amounted to approximately \$253 million in 2012, including \$213 million for CECONY. See Contractual Obligations below. In addition, the Utilities purchase gas on the spot market and contract for interruptible gas transportation. See Recoverable Energy Costs in Note A to the financial statements in Item 8.

Steam Operations**Steam Facilities**

CECONY's capitalized costs for utility plant, net of accumulated depreciation for steam facilities were \$1,674 million and \$1,651 million at December 31, 2012 and 2011, respectively.

CECONY generates steam at one steam-electric generating station and five steam-only generating stations and distributes steam to its customers through approximately 105 miles of transmission, distribution, and service piping.

Steam Sales and Deliveries

CECONY's steam sales and deliveries for the last five years were:

	Year Ended December 31,				
	2008	2009	2010	2011	2012
Steam Sold (MMlbs)					
General	533	544	515	519	425

Total Steam Delivered to CECONY Customers	\$ 707	\$ 661	\$ 656	\$ 683	\$ 596

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Average Revenue per Mlb Sold	\$ 28.24	\$ 27.76	\$ 27.79	\$ 30.91	\$ 31.00
-------------------------------------	----------	----------	----------	----------	-----------------

For further discussion of the company's steam operating revenues and its steam results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Steam Peak Demand and Capacity

Demand for steam in CECONY's service area peaks during the winter heating season. The one-hour peak demand during the winter of 2012/2013 (through January 31, 2013) occurred on

CON EDISON ANNUAL REPORT 19

Table of Contents

January 25, 2013 when the demand reached 8.1 MMlbs per hour. The company’s estimate for the winter of 2013/2014 peak demand of its steam customers is 9.2 MMlbs per hour under design criteria, which assumes severe weather.

On December 31, 2012, the steam system had the capability of delivering approximately 10.0 MMlbs of steam per hour. This reduction from the prior year’s capability (11.7 MMlbs of steam per hour on December 31, 2011) is due to damage to stations caused by Superstorm Sandy. (For additional information, see “Other Regulatory Matters” in Note B to the financial statements in Item 8). In January 2013, the steam system was restored to its full capacity. The steam system is expected to have the capability to deliver 11.7 MMlbs of steam per hour for the remainder of the 2012/2013 winter. CECONY estimates that the system will have the capability to deliver 11.7 MMlbs of steam per hour in the 2013/2014 winter.

Steam Supply

Thirty-six percent of the steam produced by CECONY in 2012 was supplied by the company’s steam-only generating assets; 49 percent was produced by the company’s steam-electric generating assets, where steam and electricity are primarily cogenerated; and 15 percent was purchased under an agreement with Brooklyn Navy Yard Cogeneration Partners L.P.

O&R

Electric Operations

Electric Facilities

O&R’s capitalized costs for utility plant, net of accumulated depreciation, for distribution facilities were \$728 million and \$680 million at December 31, 2012 and 2011, respectively. For its transmission facilities, the costs for utility plant, net of accumulated depreciation, were \$180 million and \$178 million at December 31, 2012 and 2011, respectively.

O&R, RECO and Pike, own, in whole or in part, transmission and distribution facilities which include 555 circuit miles of transmission lines, 14 transmission substations, 62 distribution substations, 85,474 in-service line transformers, 3,781 pole miles of overhead distribution lines and 1,794 miles of underground distribution lines. O&R’s transmission system is part of the NYISO system except that portions of RECO’s system are located within the transmission area controlled by PJM. In late October 2012, Superstorm Sandy caused extensive damage to the company’s electric distribution system, See “Other Regulatory Matters” in Note B to the financial statements in Item 8.

Electric Sales and Deliveries

O&R generally recovers, on a current basis, the cost of the electricity that it buys and then sells to its full-service customers. It does not make any margin or profit on the electricity it sells. Effective July 2008, O&R’s New York electric revenues (which accounted for 70.7 percent of O&R’s electric revenues in 2012) became subject to a revenue decoupling mechanism. As a result, O&R’s New York electric delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R’s electric sales in New Jersey and Pennsylvania are not subject to a decoupling mechanism. O&R’s electric sales and deliveries, excluding off-system sales for the last five years were:

	Year Ended December 31,				
	2008	2009	2010	2011	2012
Electric Energy Delivered (millions of kWhs)					
Total deliveries to O&R full service customers	4,093	3,673	3,498	3,029	2,691
Delivery service for retail access customers	1,814	1,901	2,330	2,760	3,040
Total Deliveries In Franchise Area	5,907	5,574	5,828	5,789	5,731
Electric Energy Delivered (\$ in millions)					
Total deliveries to O&R full service customers	\$ 650	\$ 551	\$ 570	\$ 486	\$ 405
Delivery service for retail access customers	80	95	132	157	178

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Other operating revenues	3	2	(10)	(2)	9
Total Deliveries In Franchise Area	\$ 733	\$ 648	\$ 692	\$ 641	\$ 592
Average Revenue Per kWh Sold (Cents)					
Residential	17.4	17.2	18.3	18.0	16.7
Commercial and Industrial	14.6	13.3	14.1	13.7	13.0

For further discussion of the company's electric operating revenues and its electric results, see "Results of Operations" in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Table of Contents*Electric Peak Demand*

The electric peak demand in O&R's service area occurs during the summer air conditioning season. O&R's highest service area peak demand, which occurred in 2006, was 1,617 MW. The 2012 service area peak demand, which occurred on July 18, 2012, was 1,508 MW. The 2012 peak demand included an estimated 980 MW for O&R's full-service customers and 528 MW for customers participating in its electric retail access program. The NYISO invoked demand reduction programs on July 18, 2012, as it had on peak demand days in some previous years. Design weather for the electric system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. Since the majority of demand reduction programs are invoked only in specific circumstances, design conditions do not include these programs' potential impact. However, the O&R forecasted peak demand at design conditions does include the impact of permanent demand reduction programs. The company estimates that, under design weather conditions, the 2013 service area peak demand will be 1,600 MW, including an estimated 1,040 MW for its full-service customers and 560 MW for its electric retail access customers. The company forecasts average annual growth of the peak electric demand in the company's service area over the next five years at design conditions to be approximately 0.9 percent per year.

Electric Supply

The electricity O&R sold to its customers in 2012 was purchased under firm power contracts or through the wholesale electricity markets administered by the NYISO and PJM. The company expects that these resources will again be adequate to meet the requirements of its customers in 2013. O&R does not own any electric generating capacity.

*Gas Operations**Gas Facilities*

O&R's capitalized costs for utility plant, net of accumulated depreciation for gas facilities, which are primarily distribution facilities, were \$435 million and \$403 million at December 31, 2012 and 2011, respectively. O&R and Pike own their gas distribution systems, which include 1,777 miles of mains. In addition, O&R owns a gas transmission system, which includes 77 miles of mains.

Gas Sales and Deliveries

O&R generally recovers the cost of the gas that it buys and then sells to its firm sales customers. It does not make any margin or profit on the gas it sells. O&R's gas revenues are subject to a weather normalization clause. Effective November 2009, O&R's New York gas revenues (which accounted for substantially all of O&R's gas revenues in 2012) became subject to a revenue decoupling mechanism. As a result, its gas delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R's gas deliveries and sales for the last five years were:

	Year Ended December 31,				
	2008	2009	2010	2011	2012

For further discussion of the company's gas operating revenues and its gas results, see Results of Operations in Item 7. For additional segment information, see Note N to the financial statements in Item 8.

Gas Peak Demand

The gas peak demand for firm service customers in O&R's service area occurs during the winter heating season. The daily peak day demand during the winter 2012/2013 (through January 31, 2013) occurred on January 23, 2013 when the demand reached 179 mdths. The 2012/2013 winter demand included an estimated 90 mdths for O&R's full-service customers and 89 mdths for customers participating in its gas retail access program. Design weather for the gas system is a standard to which the actual peak demand is adjusted for evaluation and planning purposes. The company estimates that, under design weather conditions, the 2013/2014 service area peak demand will be 214 mdths, including an estimated 107 mdths for its full-service customers and 107 mdths for its retail access customers. The company forecasts average annual growth of the peak gas demand over the next five years at design conditions to be approximately 0.8 percent in the company's service area. The forecasted peak demand at design conditions does not include gas used by interruptible gas customers or in generating stations.

Table of Contents

Gas Supply

O&R and CECONY have combined their gas requirements and purchase contracts to meet those requirements into a single portfolio. See CECONY Gas Operations Gas Supply above.

Competitive Energy Businesses

Con Edison pursues competitive energy opportunities through three wholly-owned subsidiaries: Con Edison Solutions, Con Edison Energy and Con Edison Development. These businesses include the sales and related hedging of electricity to wholesale and retail customers, sales of certain energy-related products and services, and participation in energy infrastructure projects. At December 31, 2012, Con Edison's equity investment in its competitive energy businesses was \$522 million and their assets amounted to \$1,061 million.

Con Edison Solutions

Con Edison Solutions primarily sells electricity to industrial, commercial and governmental customers in the northeastern United States and Texas. It also sells electricity to residential and small commercial customers in the northeastern United States. Con Edison Solutions does not sell electricity to the Utilities. Con Edison Solutions sells electricity to customers who are provided delivery service by the Utilities. It also provides energy efficiency services, procurement and management services to companies and governmental entities throughout most of the United States.

Con Edison Solutions was reported by KEMA, Inc. in August 2012 to be the 9th largest non-residential retail electricity provider in the United States. The company sells to retail aggregation entities in Massachusetts and Illinois as well as to individual residential and small commercial (mass market) customers in the northeastern United States. At December 31, 2012, it served approximately 154,000 customers, not including approximately 145,000 served under the two aggregation agreements. Con Edison Solutions' electricity sales for the last five years were:

	2008	2009	2010	2011	2012
Retail electric volumes sold (millions of kWhs)	10,749	12,723	15,993	15,725	13,840
Number of retail customers accounts:(a)					
Industrial and large commercial	18,828	35,056	40,081	42,983	35,043
Mass market	39,976	49,094	85,191	117,635	119,276

(a) Excludes aggregation agreement customers

Con Edison Solutions seeks to serve customers in utility service territories that encourage retail competition through transparent pricing, purchase of receivables programs or utility-sponsored customer acquisition programs. The company currently sells electricity in the service territories of 45 utilities in the states of New York, Massachusetts, Connecticut, New Hampshire, Maine, New Jersey, Delaware, Maryland, Illinois, Pennsylvania, Rhode Island and Texas, as well as the District of Columbia.

Total peak load at the end of 2012 was 4,514 MWs. Approximately 26 percent of the sales volumes were in New York, 28 percent in New England, 37 percent in PJM and the remainder in Texas.

Con Edison Solutions offers the choice of green power to customers. In 2012, it sold approximately 377,000 MWhs of green power, ending the year with almost 17,000 customers. Green power is a term used by electricity suppliers to describe electricity produced from renewable energy sources, including wind, hydro and solar.

Con Edison Solutions also provides energy-efficiency services to government and commercial customers. The services include the design and installation of lighting retrofits, high-efficiency heating, ventilating and air conditioning equipment and other energy saving technologies. The company is compensated for its services based primarily on the increased energy efficiency of the installed equipment over a multi-year period.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Con Edison Solutions has won competitive solicitations for energy savings contracts with the Department of Energy and the Department of Defense, and a shared energy savings contract with the United States Postal Service. The company owns solar energy projects in Massachusetts with an aggregate capacity of 5 MW (AC).

Con Edison Energy

Con Edison Energy manages the output and fuel requirements for over 7,400 MW of third-party generating plants in the northeastern United States. The company also provides wholesale hedging and risk management services to Con Edison Solutions and Con Edison Development. In addition, the company sells electricity to utilities in the northeastern United States, primarily under indexed price contracts, which they use to supply their full-service customers.

	2008	2009	2010	2011	2012
Wholesale electricity sales (millions of kWh)	7,798	5,472	3,610	2,231	958

CON EDISON ANNUAL REPORT 23

Table of Contents

Con Edison Development

Con Edison Development participates in energy infrastructure projects. The company's investments include ownership interests in solar energy projects in New Jersey, Massachusetts, California and Pennsylvania with an aggregate capacity of 127 MW, a gas storage corporation (see CECONY Gas Operations Gas Facilities, above), an investment in an affordable housing partnership and leasehold interests in a gas-fired plant and a gas distribution network in the Netherlands (see Note J to the financial statements in Item 8). The company has additional solar energy projects under construction with an aggregate capacity of 42 MW.

Con Edison Development and its subsidiary, CED/SCS Newington, LLC, completed the sale of their ownership interests in electricity generating plants with an aggregate capacity of approximately 1,706 MW in the second quarter of 2008.

State	Solar Energy Projects (in MW (AC))		Total
	In-Service	Under Construction	
California	70(a)	40(a)	110
Massachusetts	12	-	12
New Jersey	35(b)	-	35
Pennsylvania	10	-	10
Rhode Island	-	2	2
Total	127	42	169

(a) Electricity generated by the projects is to be purchased by Pacific Gas and Electric Company pursuant to 25 year power purchase agreements

(b) Includes 100% of an 18 MW (AC) project (Pilesgrove Solar, LLC) in which CED holds a 50% interest

Capital Requirements and Resources

Capital Requirements

The following table contains the Companies' capital requirements for the years 2010 through 2012 and their current estimate of amounts for 2013 through 2015.

(millions of dollars)	2010	Actual 2011	2012	2013	Estimate 2014	2015
Regulated utility construction expenditures(a)						
CECONY(b)	\$ 1,866	\$ 1,778	\$ 1,909	\$ 2,030	\$ 2,077	\$ 2,291
O&R	135	111	137	142	140	125
Total regulated utility construction expenditures	2,001	1,889	2,046	2,172	2,217	2,416
Competitive energy businesses capital expenditures	28	114	492	253	95	106
Sub-total	2,029	2,003	2,538	2,425	2,312	2,522
Retirement of long-term securities(c)						
Con Edison parent company	3	1	1	2	2	2
CECONY(d)	850	-	764	700	475	350
O&R	158	3	3	3	4	143
Competitive energy businesses	-	-	1	1	-	-
Total retirement of long-term securities	1,011	4	769	706	481	495
Total	\$ 3,040	\$ 2,007	\$ 3,307	\$ 3,131	\$ 2,793	\$ 3,017

(a) Actuals for 2011-2012 and the estimate for 2013 include an aggregate \$136 million for one-half of the costs of certain smart electric grid projects for which the company is receiving grants from the U.S. Department of Energy for the other half of the projects' costs under the American Recovery and Reinvestment Act of 2009.

(b) CECONY's capital expenditures for environmental protection facilities and related studies were \$194 million, \$149 million and \$133 million in 2012, 2011 and 2010, respectively, and are estimated to be \$175 million in 2013.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

(c) For 2010, includes long-term securities redeemed in advance of maturity.

(d) For 2012, includes \$239 million for the May 2012 redemption of all of its preferred stock and \$224.6 million tax-exempt debt which was subject to mandatory tender by bondholders in November 2012.

The Utilities have an ongoing need for substantial capital investment in order to meet the growth in demand for electricity and gas, and for electric, gas and steam reliability needs, including programs to strengthen the storm resiliency of their infrastructure. The estimated construction expenditures do not include amounts for transmission projects that New York transmission owners have proposed. See New York Energy Highway, above.

The estimated capital expenditures for the competitive energy businesses reflect potential investments in renewable generation and energy infrastructure projects and could significantly increase or decrease from the amounts estimated depending on market conditions and opportunities.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

- (a) Includes interest on variable rate debt calculated at rates in effect at December 31, 2012.
- (b) Included in these amounts is the cost of minimum quantities of energy that the company is obligated to purchase at both fixed and variable prices.
- (c) Included in these amounts is the cost of minimum quantities of natural gas supply, transportation and storage that the Utilities are obligated to purchase at both fixed and variable prices.
- (d) Amounts shown for other purchase obligations, which reflect capital and operations and maintenance costs incurred by the Utilities in running their day-to-day operations, were derived from the Utilities' purchasing system as the difference between the amounts authorized and the amounts paid (or vouchered to be paid) for each obligation. For many of these obligations, the Utilities are committed to purchase less than the amount authorized. Payments for the Other Purchase Obligations are generally assumed to be made ratably over the term of the obligations. The Utilities believe that unreasonable effort and expense would be involved to enable them to report their Other Purchase Obligations in a different manner.
- (e) Amounts represent commitments to purchase minimum quantities of electric energy and capacity, renewable energy certificates, natural gas, natural gas pipeline capacity, energy efficiency services and construction services entered into by Con Edison's competitive energy businesses.

CON EDISON ANNUAL REPORT 25

Table of Contents

The Companies' commitments to make payments in addition to these contractual commitments include their other liabilities reflected in their balance sheets, any funding obligations for their pension and other postretirement benefit plans, financial hedging activities, their collective bargaining agreements and Con Edison's guarantees of certain obligations of its businesses. See Notes E, F, O and Guarantees in Note H to the financial statements in Item 8.

Capital Resources

Con Edison is a holding company that operates only through its subsidiaries and has no material assets other than its interests in its subsidiaries. Con Edison expects to finance its capital requirements primarily through internally-generated funds and the sale of its securities. The company does not expect to need to issue additional common equity in 2013. Con Edison's ability to make payments on its external borrowings and dividends on its common shares is also dependent on its receipt of dividends from its subsidiaries or proceeds from the sale of its securities or its interests in its subsidiaries.

For information about restrictions on the payment of dividends by the Utilities and significant debt covenants, see Note C to the financial statements in Item 8.

For information on the Companies' commercial paper program and revolving credit agreements with banks, see Note D to the financial statements in Item 8.

The Utilities may finance their operations, capital requirements and payment of dividends to Con Edison from internally-generated funds (see Liquidity and Capital Resources - Cash Flows from Operating Activities in Item 7), contributions of equity capital from Con Edison and external borrowings.

The Companies expect to meet their 2013 external financing requirements, including for maturing securities, through the issuance of between \$1,000 million and \$1,500 million of long-term debt.

The Companies require access to the capital markets to fund capital requirements that are substantially in excess of available internally-generated funds. See Capital Requirements, above. Each of the Companies believes that it will continue to be able to access capital, although capital market conditions may affect the timing of the Companies' financing activities. The Companies monitor the availability and costs of various forms of capital, and will seek to issue Con Edison common stock and other securities when it is necessary or advantageous to do so. For information about the Companies' long-term debt and short-term borrowing, see Notes C and D to the financial statements in Item 8.

In 2012, the NYSPSC authorized CECONY, through 2016, to issue up to \$3,500 million of debt securities and to issue up to \$2,500 million of debt securities to refund existing debt securities. At December 31, 2012, CECONY had not issued any securities pursuant to such authorization. In 2009, the NYSPSC authorized O&R, through 2013, to issue up to \$500 million of securities (of which up to \$100 million may be preferred stock and up to the entire amount authorized may be debt securities) and to issue up to \$389 million of debt securities to refund existing debt securities. At December 31, 2012, O&R had issued \$190 million of debt securities pursuant to such authorization.

Con Edison's competitive energy businesses have financed their operations and capital requirements primarily with capital contributions and borrowings from Con Edison, internally-generated funds and external borrowings. Con Edison Development is evaluating long-term debt financing for the solar projects it acquired in 2012.

For each of the Companies, the ratio of earnings to fixed charges (SEC basis) for the last five years was:

	Ratio of Earnings to Fixed Charges				
	2008	2009	2010	2011	2012
Con Edison	3.4	3.0	3.3	3.6	3.7
CECONY	3.3	3.1	3.4	3.8	3.7

For each of the Companies, the common equity ratio for the last five years was:

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

	Common Equity Ratio (Percent of total capitalization)				
	2008	2009	2010	2011	2012
Con Edison	50.7	50.5	50.4	52.5	54.1
CECONY	50.8	50.3	49.9	52.0	53.6

The commercial paper of the Companies is rated P-2, A-2 and F2, respectively, by Moody's, S&P and Fitch. Con Edison's long-term credit rating is Baa1, BBB+ and BBB+, respectively, by Moody's, S&P and Fitch. The unsecured debt of CECONY is rated A3, A- and A-, respectively, by Moody's, S&P and Fitch. The unsecured debt of O&R is rated Baa1, A- and A-, respectively, by Moody's, S&P and Fitch. Securities ratings assigned by rating organizations are expressions of opinion and are not recommendations to buy, sell or hold securities. A securities rating is subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

CECONY has \$636 million of tax-exempt debt for which the interest rates are to be determined pursuant to periodic auctions. Of this amount, \$391 million is insured by Ambac Assurance Corporation and \$245 million is insured by Syncora Guarantee Inc. (formerly XL Capital Assurance Inc.). Credit rating agencies have withdrawn the ratings of these insurers. Subsequently,

Table of Contents

there have not been sufficient bids to determine the interest rates pursuant to auctions, and interest rates have been determined by reference to a variable rate index. The weighted average annual interest rate on this tax-exempt debt was 0.27 percent on December 31, 2012. The weighted average interest rate was 0.29 percent, 0.34 percent and 0.45 percent for the years 2012, 2011 and 2010, respectively. Under CECONY's current electric, gas and steam rate plans, variations in auction rate debt interest expense are reconciled to the levels set in rates.

Environmental Matters

Climate Change

As indicated in 2007 by the Intergovernmental Panel on Climate Change, emissions of greenhouse gases, including carbon dioxide, are very likely changing the world's climate.

Climate change could affect customer demand for the Companies' energy services. The effects of climate change might also include physical damage to the Companies' facilities and disruption of their operations due to the impact of more frequent and more extreme weather-related events. In late October 2012, Superstorm Sandy caused extensive damage to the Utilities' electric distribution system. Superstorm Sandy interrupted service to approximately 1.4 million of the Utilities' customers—more than four times the number of customers impacted by the Utilities' previous worst storm event (Hurricane Irene in 2011). See "Other Regulatory Matters" in Note B to the financial statements in Item 8.

Based on the most recent data (2009) published by the U.S. Environmental Protection Agency (EPA), Con Edison estimates that its greenhouse gas emissions constitute less than 0.1 percent of the nation's greenhouse gas emissions. Con Edison's emissions of greenhouse gases during the past five years (expressed in terms of millions of tons of carbon dioxide equivalent) were:

	2008	2009	2010	2011	2012
CO ₂ equivalent emissions	4.6	4.2	4.3	3.7	3.6

The 45 percent decrease in Con Edison's greenhouse gas emissions since 2005 (6.6 million tons) reflects the emission reductions resulting from equipment and repair projects, including projects to reduce sulfur hexafluoride emissions, and increased use of natural gas at CECONY's steam production facilities. Emissions from electric generation at the Con Edison Development electric generating plants, which were sold in 2008, have been removed from the above data set.

The Companies are working to further reduce greenhouse gas emissions. CECONY has participated for several years in voluntary initiatives with the EPA to reduce its methane and sulfur hexafluoride emissions. The Utilities reduce methane emissions from the operation of their gas distribution systems through pipe maintenance and replacement programs, by operating system components at lower pressure, and by introducing new technologies. The Utilities reduce emissions of sulfur hexafluoride, which is used for arc suppression in substation circuit breakers and switches, by using improved technologies to locate and repair leaks, and by replacing older equipment. The Utilities also promote energy efficiency programs for customers that help them reduce their greenhouse gas emissions.

Beginning in 2009, CECONY is subject to carbon dioxide emissions regulations established by New York State under the Regional Greenhouse Gas Initiative (RGGI). The Initiative, a cooperative effort by Northeastern and Mid-Atlantic states, established a decreasing cap on carbon dioxide emissions resulting from the generation of electricity to a level ten percent below the Initiative's baseline by 2018. Under the Initiative, affected electric generators are required to obtain emission allowances to cover their carbon dioxide emissions, available primarily through auctions administered by participating states or a secondary market. CECONY met its requirement of 6.3 million allowances for the first RGGI compliance period (2009–2011). In February 2013, RGGI released a model rule for adoption by the participating states that includes a 45 percent reduction in the emissions cap for 2014 and further reductions of 2.5 percent each year from 2015 to 2020.

The EPA has started regulating greenhouse gas emissions from major sources, requiring existing sources to report emissions and subjecting certain new sources to emissions limitations. Also, New York State has announced a goal to reduce greenhouse gas emissions 80 percent below 1990 levels by 2050, and New York City plans to reduce greenhouse gas emissions within the City 30 percent below 2005 levels by 2030. The cost to comply with legislation, regulations or initiatives limiting the Companies' greenhouse gas emissions could be substantial.

Environmental Sustainability

Con Edison seeks to improve the environmental sustainability of its businesses. CECONY is piloting smart grid technologies to demonstrate the interoperability of distributed generation and the exchange of information between customers and utilities. The smart grid will give customers

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

the tools to be smarter consumers of energy and will allow the utility to identify and isolate problems more quickly. The company recycles clean non-hazardous waste materials in more than a dozen categories and recycled an estimated 50,000 tons of waste in 2012. More than 38 percent of the company's vehicles now use alternative-energy technology. New environmentally friendly white roofs are in place at the corporate headquarters and more than 20 other company facilities, and others are underway. A white roof reflects sunlight, lowering indoor temperatures on hot days, which reduces the need to cool the building, resulting in fewer carbon dioxide emissions.

CECONY

Superfund

The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 and similar state statutes (Superfund) impose joint and several liability, regardless of fault,

Table of Contents

upon generators of hazardous substances for investigation costs, remediation costs and environmental damages. The sites as to which CECONY has been asserted to have liability under Superfund include its and its predecessor companies' former manufactured gas sites, its multi-purpose Astoria site, its former Flushing Service Center site, the Gowanus Canal site, and other Superfund sites discussed below. There may be additional sites as to which assertions will be made that the Company has liability. For a further discussion of claims and possible claims against the Company under Superfund, estimated liability accrued for Superfund claims and recovery from customers of site investigation and remediation costs, see Note G to the financial statements in Item 8 (which information is incorporated herein by reference).

Manufactured Gas Sites

CECONY and its predecessors formerly manufactured gas and maintained storage holders for gas manufactured at sites in New York City and Westchester County (MGP Sites). Many of these sites have been subdivided and are now owned by parties other than CECONY and have been redeveloped by them for other uses, including schools, residential and commercial developments and hospitals. The New York State Department of Environmental Conservation (NYSDEC) requires the company to investigate, and if necessary, develop and implement remediation programs for the sites, which include 34 manufactured gas plant sites and 17 storage holder sites and any neighboring areas to which contamination may have migrated.

The information available to CECONY for many of the MGP Sites is incomplete as to the extent of contamination and scope of the remediation likely to be required. Through the end of 2012, investigations have been started for all 51 MGP Sites, and have been completed at all or portions of 31 of the sites. Coal tar and/or other manufactured gas production/storage-related environmental contaminants have been detected at 35 MGP Sites, including locations within Manhattan and other parts of New York City, and in Westchester County. Remediation has been completed at six sites and portions of seven other sites.

Astoria Site

CECONY is permitted by the NYSDEC to operate a hazardous waste storage facility on property the company owns in the Astoria section of Queens, New York. Portions of the property were formerly the location of a manufactured gas plant and also have been used or are being used for, among other things, electric generation operations, electric substation operations, the storage of fuel oil and liquefied natural gas, and the maintenance and storage of electric equipment. As a condition of its NYSDEC permit, the company is required to investigate the property and, where environmental contamination is found and action is necessary, to conduct corrective action to remediate the contamination. The company has investigated various sections of the property and is performing additional investigations. The company has submitted to the NYSDEC and the New York State Department of Health reports identifying the known areas of contamination. The company estimates that its undiscounted potential liability for the completion of the site investigation and cleanup of the known contamination on the property will be at least \$53 million.

Flushing Service Center Site

The owner of a former CECONY service center facility in Flushing, New York, informed the company that PCB contamination had been detected on a substantial portion of the property, which the owner remediated pursuant to the New York State Brownfield Cleanup Program administered by the NYSDEC and is redeveloping for residential and commercial use. The property owner's claim against the company for its environmental response costs for the site has been resolved. In September 2007, the NYSDEC demanded that the company investigate and remediate PCB contamination that may have migrated into the adjacent Flushing River from the site. In April 2008, the company and NYSDEC entered into a consent order under which the company has agreed to implement a NYSDEC-approved investigation program for the Flushing River and, if deemed necessary by the NYSDEC to protect human health and the environment from such contamination, to implement a NYSDEC-approved remediation program for any PCB contamination in the river attributable to the site. In March 2011, the company submitted to NYSDEC a report indicating that PCBs had migrated from the site to sediment in a portion of the river. In October 2011, the company submitted to the NYSDEC a feasibility study evaluating various remedial alternatives. In response to NYSDEC comments on that feasibility study, the company submitted a revised feasibility study in June 2012. The NYSDEC has not yet approved that study or selected a remedy. At this time, the company cannot estimate its liability for the cleanup of PCB contamination that has migrated to the Flushing River from the site, but such liability may be substantial.

Gowanus Canal

In August 2009, CECONY received a notice of potential liability and request for information from the EPA about the operations of the company and its predecessors at sites adjacent or near the 1.8 mile Gowanus Canal in Brooklyn, New York. The company understands that the EPA also has provided or will provide notices of potential liability and information requests to other parties. In March 2010, the EPA added the Gowanus Canal to its National Priorities List of Superfund sites. The canal's adjacent waterfront is primarily commercial and industrial, currently

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

consisting of concrete plants, warehouses, and parking lots, and the canal is near several residential neighborhoods. In February 2011, the EPA released a report of its remedial investigation that confirmed there was significant contamination in the Gowanus Canal. In December 2011, the EPA released a draft feasibility study that evaluated remedial alternatives. In December 2012, the EPA released its proposed remedial action plan for the site. The EPA estimated that the cost of assessment and remediation

28 CON EDISON ANNUAL REPORT

Table of Contents

of hazardous substances in and around the Gowanus Canal will be between \$466.7 million and \$503.7 million, and indicated that the cost could be significantly higher. CECONY is unable to predict its exposure to liability with respect to the Gowanus Canal site.

Other Superfund Sites

CECONY is a potentially responsible party (PRP) with respect to other Superfund sites where there are other PRPs and where it is generally not responsible for managing the site investigation and remediation. Work at these sites is in various stages, with the company participating in PRP groups at some of the sites. Investigation, remediation and monitoring at some of these sites have been, and are expected to continue to be, conducted over extended periods of time. The company does not believe that it is reasonably likely that monetary sanctions, such as penalties, will be imposed upon it by any governmental authority with respect to these sites.

The following table lists each of CECONY's other Superfund sites for which the company anticipates it may have a liability. The table also shows for each such site, its location, the year in which the company was designated or alleged to be a PRP or to otherwise have responsibilities with respect to the site (shown in the table under "Start"), the name of the court or agency in which proceedings with respect to the site are pending and CECONY's estimated percentage of total liability for each site. The company currently estimates that its potential liability for investigation, remediation, monitoring and environmental damages at each site is less than \$0.2 million, with the exception of the Cortese Landfill site, for which the estimate is \$1 million, and the Curcio Scrap Metal site, for which the estimate is \$0.2 million. Superfund liability is joint and several. The company's estimate of its liability for each site was determined pursuant to consent decrees, settlement agreements or otherwise and in light of the financial condition of other PRPs. The company's actual liability could differ substantially from amounts estimated.

Site	Location	Start	Court or Agency	% of Total Liability
Maxey Flats Nuclear	Morehead, KY	1986	EPA	0.8%
Curcio Scrap Metal	Saddle Brook, NJ	1987	EPA	100%
Metal Bank of America	Philadelphia, PA	1987	EPA	0.97%
Cortese Landfill	Narrowsburg, NY	1987	EPA	6.0%
Global Landfill	Old Bridge, NJ	1988	EPA	0.3%
Borne Chemical	Elizabeth, NJ	1997	NJDEP	0.7%

Superfund

The sites at which O&R has been asserted to have liability under Superfund include its manufactured gas sites, its West Nyack site, the Newark Bay site, and other Superfund sites discussed below. There may be additional sites as to which assertions will be made that O&R has liability. For a further discussion of claims and possible claims against O&R under Superfund, see Note G to the financial statements in Item 8 (which information is incorporated herein by reference).

Manufactured Gas Sites

O&R and its predecessors formerly owned and operated manufactured gas plants at seven sites (O&R MGP Sites) in Orange County and Rockland County, New York. Three of these sites are now owned by parties other than O&R, and have been redeveloped by them for residential, commercial or industrial uses. The NYSDEC is requiring O&R to develop and implement remediation programs for the O&R MGP Sites including any neighboring areas to which contamination may have migrated.

O&R has completed remedial investigations at all seven O&R MGP Sites and has completed the remediation at one of the sites and a portion of another. O&R has received NYSDEC's decision regarding the remedial work to be performed at three of the sites and a portion of another. Remedial construction at the Port Jervis MGP site began in July 2012 and the excavation phase of the remedy is expected to be completed by May 2013. Remedial design is ongoing for three of the sites. A feasibility study was completed for one site in 2012 and is currently being reviewed by NYSDEC. A feasibility study for one site will be completed in 2013.

West Nyack Site

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

In 1991, 1994 and 1997, O&R entered into consent orders with the NYSDEC pursuant to which O&R agreed to conduct a remedial investigation and remediate certain property it owns in West Nyack, New York at which PCBs were discovered. Petroleum contamination related to a leaking underground storage tank was found as well. O&R has completed all remediation at the site that the NYSDEC has required to date. In 2012, NYSDEC reclassified the West Nyack site to a Class 4 site, meaning that the site has been properly closed but requires continued site management. Annual inspections and certification of compliance with the Site Management Plan will be required.

Newark Bay

Approximately 300 parties, including O&R (which was served with a third-party complaint in June 2009), were sued as third-party defendants by Tierra Solutions, Inc. (Tierra) and Maxus Energy Corporation (Maxus), successors to the Occidental Chemical Corporation and Diamond Shamrock Chemical Company. Tierra and Maxus were themselves sued in 2005 by the New Jersey Department of Environmental Protection and others for removal and cleanup costs, punitive damages, penalties, and economic losses allegedly arising from the dioxin contamination their predecessors pesticide/herbicide plant allegedly released to the Newark Bay Complex, a system of

CON EDISON ANNUAL REPORT 29

Table of Contents

waterways including Newark Bay, the Arthur Kill, the Kill Van Kull, and lower portions of the Passaic and Hackensack Rivers. Tierra and Maxus are seeking equitable contribution from the third-party defendants for such costs, damages, penalties and losses, which are likely to be substantial. As to O&R, Tierra and Maxus allege that 1975 and 1976 shipments of waste oil by O&R from an electricity generating plant in Haverstraw, New York to the Borne Chemical Company in Elizabeth, New Jersey was a source of petroleum discharges to the Arthur Kill. Con Edison is unable to predict O&R's exposure to liability with respect to the Newark Bay Complex.

Other Superfund Sites

O&R is a PRP with respect to other Superfund sites where there are other PRPs and it is not managing the site investigation and remediation. Work at these sites is in various stages, with the company participating in PRP groups at some of the sites. Investigation, remediation and monitoring at some of these sites have been, and are expected to continue to be, conducted over extended periods of time. The company does not believe that it is reasonably likely that monetary sanctions, such as penalties, will be imposed upon it by any governmental authority with respect to these sites.

The following table lists each of O&R's other Superfund sites for which the company anticipates it may have liability. The table also shows for each such site, its location, the year in which the company was designated or alleged to be a PRP or to otherwise have responsibilities with respect to the site (shown in the table under "Start"), the name of the court or agency in which proceedings with respect to the site are pending and O&R's estimated percentage of total liability for each site. The company currently estimates that its potential liability for investigation, remediation, monitoring and environmental damages at each site is less than \$0.3 million. Superfund liability is joint and several. The company's estimate of its anticipated share of the total liability for each site was determined pursuant to consent decrees, settlement agreements or otherwise and in light of the financial condition of other PRPs. The company's actual liability could differ substantially from amounts estimated.

Site	Location	Start	Court or Agency	% of Total Liability
Borne Chemical	Elizabeth, NJ	1997	NJDEP	2.27%
Metal Bank of America	Philadelphia, PA	1993	EPA	4.58%
Ellis Road	Jacksonville, FL	2011	EPA	0.24%

Other Federal, State and Local Environmental Provisions**Toxic Substances Control Act**

Virtually all electric utilities, including CECONY, own equipment containing PCBs. PCBs are regulated under the Federal Toxic Substances Control Act of 1976.

Water Quality

Under NYSDEC regulations, the operation of certain CECONY generating facilities requires permits for water discharges. Regulations that will become effective in 2013 will begin to require permits for water withdrawals. Conditions to the issuance or renewal of such permits may include limitations on the operations of the permitted facility or requirements to install certain equipment, the cost of which could be substantial. For information about the company's generating facilities, see CECONY Electric Operations Electric Facilities and Steam Operations Steam Facilities above in this Item 1.

Certain governmental authorities are investigating contamination in the Hudson River and the New York Harbor. These waters run through portions of CECONY's service area. Governmental authorities could require entities that released hazardous substances that contaminated these waters to bear the cost of investigation and remediation, which could be substantial.

Air Quality

Under new source review regulations, an owner of a large generating facility, including CECONY's steam and steam-electric generating facilities, is required to obtain a permit before making modifications to the facility, other than routine maintenance, repair, or replacement, that increase emissions of pollutants from the facility above specified thresholds. To obtain a permit, the facility owner could be required to install additional pollution controls or otherwise limit emissions from the facility. The company reviews on an on-going basis its planned modifications to its generating facilities to determine the potential applicability of new source review and similar regulations. In December 2011, the company

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

filed its proposed plan to comply with revised New York State nitrogen oxides reasonably available control technology regulations (NO_x RACT) and is incorporating the plan provisions into its existing air quality permits as they are renewed. In 2011, the EPA adopted regulations establishing maximum achievable control technology standards for utility and industrial boilers. The regulations apply to major air emissions sources, including CECONY's generating facilities. CECONY plans to comply with these regulations and the regulations known as the Clean Air Interstate Rule (CAIR) largely through the modification by 2014 of certain of its generating facilities to enable the facilities to increase the use of natural gas, decreasing the use of fuel oil. In 2011, the EPA also adopted additional regulations known as the Cross State Air Pollution Rule (CSAPR), which established a new cap and trade program requiring further reductions in air emissions than CAIR (which CSAPR was to have replaced). In August 2012, CSAPR was overturned by an appellate court, and CAIR will remain in effect pending further action by the EPA. For information about the company's generating facilities, see CECONY Electric Operations Electric Facilities and Steam Operations Steam Facilities above in this Item 1. The company is unable to predict the impact on its operations of any regulations that may be adopted

Table of Contents

to replace CSAPR or the additional costs, which could be substantial, it could incur to comply with any such regulations.

State Anti-Takeover Law

New York State law provides that a domestic corporation, such as Con Edison, may not consummate a merger, consolidation or similar transaction with the beneficial owner of a 20 percent or greater voting stock interest in the corporation, or with an affiliate of the owner, for five years after the acquisition of the voting stock interest, unless the transaction or the acquisition of the voting stock interest was approved by the corporation's board of directors prior to the acquisition of the voting stock interest. After the expiration of the five-year period, the transaction may be consummated only pursuant to a stringent fair price formula or with the approval of a majority of the disinterested stockholders.

Employees

Con Edison has no employees other than those of CECONY, O&R and Con Edison's competitive energy businesses (which at December 31, 2012 had 13,130, 1,096 and 303 employees, respectively). Of the 13,130 CECONY employees and 1,096 O&R employees, 8,143 and 622 were represented by a collective bargaining unit, respectively. The collective bargaining agreement covering most of these CECONY employees expires in June 2016. Agreements covering other CECONY employees and O&R employees expire in June 2013 and June 2014, respectively.

Available Information

For the sources of information about the Companies, see Available Information in the Introduction appearing before this Item 1.

ITEM 1A: RISK FACTORS

Information in any item of this report as to which reference is made in this Item 1A is incorporated by reference herein. The use of such terms as see or refer to shall be deemed to incorporate at the place such term is used the information to which such reference is made.

The Companies' businesses are influenced by many factors that are difficult to predict, and that involve uncertainties that may materially affect actual operating results, cash flows and financial condition.

The Companies have established an enterprise risk management program to identify, assess, manage and monitor its major operations and administrative risks based on established criteria for the severity of an event, the likelihood of its occurrence, and the programs in place to control the event or reduce the impact. The Companies also have financial and commodity market risks. See Financial and Commodity Market Risks in Item 7.

The Companies' major risks include:

The Failure to Operate Energy Facilities Safely and Reliably Could Adversely Affect The Companies. The Utilities provide electricity, gas and steam service using energy facilities, many of which are located either in, or close to, densely populated public places. See the description of the Utilities' facilities in Item 1. A failure of, or damage to, these facilities, or an error in the operation or maintenance of these facilities, could result in bodily injury or death, property damage, the release of hazardous substances or extended service interruptions. In such event, the Utilities could be required to pay substantial amounts, which may not be covered by the Utilities' insurance policies, to repair or replace their facilities, compensate others for injury or death or other damage, and settle any proceedings initiated by state utility regulators or other regulatory agencies. In late October 2012, Superstorm Sandy caused extensive damage to the Utilities' electric distribution system and interrupted service to approximately 1.4 million of the Utilities' customers. See Other Regulatory Matters in Note B and Manhattan Steam Main Rupture in Note H to the financial statements in Item 8. The occurrence of such an event could also adversely affect the cost and availability of insurance. Changes to laws, regulations or judicial doctrines could further expand the Utilities' liability for service interruptions. See Utility Regulation State Utility Regulation in Item 1.

The Failure To Properly Complete Construction Projects Could Adversely Affect The Companies. The Utilities' ongoing construction program includes large energy transmission, substation and distribution system projects. The failure to properly complete these projects timely and effectively could adversely affect the Utilities' ability to meet their customers' growing energy needs with the high level of safety and reliability that they currently provide, which would adversely affect the Companies. See Capital Requirements and New York Energy Highway

in Item 1.

The Failure of Processes and Systems and the Performance of Employees and Contractors Could Adversely Affect the Companies. The Companies have developed business processes for operations, customer service, legal compliance, personnel, accounting, planning and other matters. Some of the Companies' information systems and communications systems have been operating for many years, and may become obsolete. In 2012, the Utilities implemented new financial and supply-chain enterprise resource planning information systems. See Item 9A. The failure of the Companies' business processes or information or communication systems could adversely affect the Companies' operations and liquidity and result in substantial liability, higher costs and increased regulatory requirements. The failure by the Companies' employees or contractors to follow procedures, or their unsafe actions, errors or intentional misconduct, or work stoppages could also adversely affect the Companies. See Employees in Item 1 and Other Regulatory Matters in Note B to the financial statements in Item 8.

Table of Contents

The Companies Are Extensively Regulated And Are Subject To Penalties. The Companies' operations require numerous permits, approvals and certificates from various federal, state and local governmental agencies. State utility regulators may seek to impose substantial penalties on the Utilities for violations of state utility laws, regulations or orders. In addition, the Utilities rate plans usually include penalties for failing to meet certain operating standards. See Note B to the financial statements in Item 8. FERC has the authority to impose penalties on the Utilities and the competitive energy businesses, which could be substantial, for violations of the Federal Power Act, the Natural Gas Act or related rules, including reliability and cyber security rules. Environmental agencies may seek penalties for failure to comply with laws, regulations or permits. The Companies may also be subject to penalties from other regulatory agencies. The Companies may be subject to new laws, regulations, accounting standards or other requirements or the revision or reinterpretation of such requirements, which could adversely affect the Companies. See *Utility Regulation and Environmental Matters* *Climate Change and Other Federal, State and Local Environmental Provisions* in Item 1 and *Application of Critical Accounting Policies* in Item 7.

The Utilities' Rate Plans May Not Provide A Reasonable Return. The Utilities have rate plans approved by state utility regulators that limit the rates they can charge their customers. The rates are generally designed for, but do not guarantee, the recovery of the Utilities' cost of service (including a return on equity). The Utilities' rate plans can involve complex accounting and other calculations, a mistake in which could have a substantial adverse affect on the Utilities. See *Utility Regulation* *State Utility Regulation, Rate Plans* in Item 1 and *Rate Agreements* in Note B to the financial statements in Item 8. Rates usually may not be changed during the specified terms of the rate plans other than to recover energy costs and limited other exceptions. The Utilities' actual costs may exceed levels provided for such costs in the rate plans. The Utilities' rate plans usually include penalties for failing to meet certain operating standards. State utility regulators can initiate proceedings to prohibit the Utilities from recovering from their customers the cost of service (including energy costs) that the regulators determine to have been imprudently incurred (see *Other Regulatory Matters* in Note B to the financial statements in Item 8). The Utilities have from time to time entered into settlement agreements to resolve various prudence proceedings.

The Companies May Be Adversely Affected By Changes To The Utilities' Rate Plans. The Utilities' rate plans typically require action by regulators at their expiration dates, which may include approval of new plans with different provisions. The need to recover from customers increasing costs, taxes or state-mandated assessments or surcharges could adversely affect the Utilities' opportunity to obtain new rate plans that provide a reasonable rate of return and continue important provisions of current rate plans. The Utilities' current New York electric and gas rate plans include revenue decoupling mechanisms and their New York electric, gas and steam rate plans include provisions for the recovery of energy costs and reconciliation of the actual amount of pension and other postretirement, environmental and certain other costs to amounts reflected in rates. In January 2013, CECONY filed a request with the NYSPSC for new electric, gas and steam rate plans. See *Rate Agreements* in Note B to the financial statements in Item 8.

The Companies Are Exposed to Risks From The Environmental Consequences Of Their Operations. The Companies are exposed to risks relating to climate change and related matters. See *Environmental Matters* *Climate Change* in Item 1. CECONY may also be impacted by regulations requiring reductions in air emissions. See *Environmental Matters* *Other Federal, State and Local Environmental Provisions, Air Quality* in Item 1. In addition, the Utilities are responsible for hazardous substances, such as asbestos, PCBs and coal tar, that have been used or produced in the course of the Utilities' operations and are present on properties or in facilities and equipment currently or previously owned by them. See *Environmental Matters* in Item 1 and Note G to the financial statements in Item 8. Electric and magnetic fields are found wherever electricity is used. The Companies could be adversely affected if a causal relationship between these fields and adverse health effects were to be established. Negative perceptions about electric and magnetic fields can make it more difficult to construct facilities needed for the Companies' operations.

A Disruption In The Wholesale Energy Markets Or Failure By An Energy Supplier Could Adversely Affect The Companies. Almost all the electricity and gas the Utilities sell to their full-service customers is purchased through the wholesale energy markets or pursuant to contracts with energy suppliers. See the description of the Utilities' energy supply in Item 1. Con Edison Energy and Con Edison Solutions also depend on wholesale energy markets to supply electricity to their customers. See *Competitive Energy Businesses* in Item 1. A disruption in the wholesale energy markets or a failure on the part of the Companies' energy suppliers or operators of energy delivery systems that connect to the Utilities' energy facilities could adversely affect the Companies' ability to meet their customers' energy needs and adversely affect the Companies.

The Companies Have Substantial Unfunded Pension And Other Postretirement Benefit Liabilities. The Utilities have substantial unfunded pension and other postretirement benefit liabilities. The Utilities expect to make substantial contributions to their pension and other postretirement benefit plans. Significant declines in the market values of the investments held to fund pension and other postretirement benefits could trigger substantial funding requirements under governmental regulations. See *Application of Critical Accounting Policies*

Table of Contents

Accounting for Pensions and Other Postretirement Benefits and Financial and Commodity Market Risks, in Item 7 and Notes E and F to the financial statements in Item 8.

Con Edison's Ability To Pay Dividends Or Interest Depends On Dividends From Its Subsidiaries. Con Edison's ability to pay dividends on its common stock or interest on its external borrowings depends primarily on the dividends and other distributions it receives from its subsidiaries. The dividends that the Utilities may pay to Con Edison are limited by the NYSPSC to not more than 100 percent of their respective income available for dividends calculated on a two-year rolling average basis, with certain exceptions. See Dividends in Note C to the financial statements in Item 8.

The Companies Require Access To Capital Markets To Satisfy Funding Requirements. The Utilities estimate that their construction expenditures will exceed \$6 billion over the next three years. The Utilities may use internally-generated funds, equity contributions from Con Edison and external borrowings to fund the construction expenditures. The competitive energy businesses are evaluating opportunities to invest in renewable generation and energy-related infrastructure projects that would require funds in excess of those produced in the businesses. Con Edison expects to finance its capital requirements primarily through internally generated funds and the sale of its securities. In addition, Con Edison Development is evaluating long-term debt financing for the solar projects it acquired in 2012. See Cash Flows Used in Investing Activities in Item 7. The company does not expect to need to issue additional common equity in 2013. Changes in financial market conditions or in the Companies' credit ratings could adversely affect their ability to raise new capital and the cost thereof. See Capital Requirements and Resources in Item 1.

The Internal Revenue Service Has Disallowed Substantial Tax Deductions Taken By The Company. The Companies' federal income tax returns reflect certain tax positions with which the Internal Revenue Service does not or may not agree, including the deduction of the cost of certain repairs to utility plant for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility (see Note L to the financial statements in Item 8). In January 2013, a federal appeals court reversed a trial court decision that had allowed deductions claimed by Con Edison relating to Con Edison Development's 1997 lease in/lease out (LILO) transaction. As a result, with respect to the 1997 and 1999 LILO transactions, Con Edison expects to record an estimated charge of between \$150 million and \$170 million (after-tax) in the first quarter of 2013 and has made deposits of \$447 million with federal and state tax agencies. See Note J to the financial statements in Item 8.

A Cyber Attack Could Adversely Affect the Companies. The Utilities and other operators of critical energy infrastructure may face a heightened risk of cyber attack. The Companies have experienced cyber attacks, although none of the attacks had a material impact on the Companies. In the event of a cyber attack that the Companies were unable to defend against or mitigate, the Utilities and the competitive energy businesses could have their operations disrupted, financial and other information systems impaired, property damaged and customer information stolen; experience substantial loss of revenues, response costs and other financial loss; and be subject to increased regulation, litigation and damage to their reputation.

The Companies Also Face Other Risks That Are Beyond Their Control. The Companies' results of operations can be affected by circumstances or events that are beyond their control. Weather directly influences the demand for electricity, gas and steam service, and can affect the price of energy commodities. Natural disasters, such as a major storm, heat wave or hurricane (see Environmental Matters Climate Change in Item 1 and Other Regulatory Matters in Note B to the financial statements in Item 8) or terrorist attacks or related acts of war could damage Company facilities. As a provider of essential utility services, the Utilities may experience more severe consequences from attempting to operate during and after such events. In addition, pandemic illness could potentially disrupt the Utilities' employees and contractors from providing essential utility services. Economic conditions can affect customers' demand and ability to pay for service, which could adversely affect the Companies.

ITEM 1B: UNRESOLVED STAFF COMMENTS

Con Edison

Con Edison has no unresolved comments from the SEC staff.

CECONY

CECONY has no unresolved comments from the SEC staff.

ITEM 2: PROPERTIES

Con Edison

Con Edison has no significant properties other than those of the Utilities and its competitive energy businesses.

For information about the capitalized cost of the Companies' utility plant, net of accumulated depreciation, see "Plant and Depreciation" in Note A to the financial statements in Item 8 (which information is incorporated herein by reference).

CECONY

For a discussion of CECONY's electric, gas and steam facilities, see "CECONY Electric Operations Electric Facilities", "CECONY Gas Operations Gas Facilities", and "CECONY Steam Operations Steam Facilities" in Item 1 (which information is incorporated herein by reference).

For a discussion of the competitive energy businesses' facilities, see [Competitive Energy Businesses](#) in Item 1 (which information is incorporated herein by reference).

ITEM 3: LEGAL PROCEEDINGS **Con Edison**

Lease In/Lease Out Transactions

For information about legal proceedings with the IRS with respect to substantial tax deductions taken by Con Edison in connection with Con Edison Development's LILO transactions, see Note J to the financial statements in Item 8 (which information is incorporated herein by reference).

Former Con Edison Development Subsidiary Site

In November 2011, Con Edison Development was notified by the Office of the Attorney General of Massachusetts that it was considering filing suit against the company and others for violations of certain laws and regulations in connection with the capping and cover of certain ash treatment basins with an amount of material in excess of that permitted by the Massachusetts Department of Environmental Protection. The ash treatment basins are located on the electric generating plant site of a subsidiary sold by the company in 2008. In December 2012, the company paid less than \$1 million to resolve the claims against it in connection with this matter.

CECONY

Manhattan Steam Main Rupture

For information about proceedings relating to the July 2007 rupture of a steam main located in midtown Manhattan, see [Manhattan Steam Main Rupture](#) in Note H to the financial statements in Item 8 (which information is incorporated herein by reference).

ITEM 4: MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**Executive Officers of the Registrant**

The following table sets forth certain information about the executive officers of Con Edison and CECONY as of February 21, 2013. As indicated, certain of the executive officers are executive officers of each of Con Edison and CECONY and others are executive officers of Con Edison or CECONY. The term of office of each officer, is until the next election of directors (trustees) of their company and until his or her successor is chosen and qualifies. Officers are subject to removal at any time by the board of directors (trustees) of their company. Mr. Burke has an employment agreement with Con Edison, which provides for him to serve in his present position through December 31, 2013. The employment agreement provides for automatic one-year extensions of its term, unless notice to the contrary is received six months prior to the end of the term.

Name	Age	Offices and Positions During Past Five Years
Executive Officers of Con Edison and CECONY		
Kevin Burke	62	3/06 to present Chairman of the Board, President and Chief Executive Officer and Director of Con Edison and Chairman, Chief Executive Officer and Trustee of CECONY
Craig S. Ivey	50	12/09 to present President of CECONY 8/07 to 9/09 Senior Vice President Transmission & Distribution, Dominion Resources, Inc.
William G. Longhi	59	1/13 to present President Shared Services of CECONY 2/09 to 12/12 President and Chief Executive Officer of O&R 12/06 to 1/09 Senior Vice President Central Operations of CECONY
Robert Hoglund	51	9/05 to present Senior Vice President and Chief Financial Officer of Con Edison and CECONY 6/04 to 10/09 Chief Financial Officer and Controller of O&R
Elizabeth D. Moore	58	5/09 to present General Counsel of Con Edison and CECONY 1/95 to 4/09 Partner, Nixon Peabody LLP
Joseph P. Oates	51	9/12 to present Senior Vice President Business Shared Services of CECONY 7/12 to 8/12 Senior Vice President of CECONY 7/07 to 6/12 Vice President Energy Management of CECONY
Frances A. Resheske	52	2/02 to present Senior Vice President Public Affairs of CECONY
Luther Tai	64	7/06 to present Senior Vice President Enterprise Shared Services of CECONY
Gurudatta Nadkarni	47	1/08 to present Vice President of Strategic Planning
Scott Sanders	49	2/10 to present Vice President and Treasurer of Con Edison and CECONY 1/10 to 2/10 Vice President Finance 5/09 to 12/09 Co-founder and Partner of New Infrastructure Advisors 5/05 to 1/09 Managing Director Investment Banking, Bank of America
Robert Muccilo	56	7/09 to present Vice President and Controller of Con Edison and CECONY 11/09 to present Chief Financial Officer and Controller of O&R 4/08 to 6/09 Assistant Controller of CECONY 8/06 to 3/08 General Manager Central Field Services of CECONY
Executive Officers of Con Edison but not CECONY		
John McAvoy	52	1/13 to present President and Chief Executive Officer of O&R 12/12 Senior Vice President of CECONY 2/09 to 11/12 Senior Vice President Central Operations of CECONY 12/06 to 1/09 Vice President System and Transmission Operations of CECONY
Executive Officers of CECONY but not Con Edison (All offices and positions listed are with CECONY)		
Marilyn Caselli	58	5/05 to present Senior Vice President Customer Operations
Timothy P. Cawley	48	12/12 to present Senior Vice President Central Operations 5/11 to 11/12 Vice President Substation Operations

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

		9/07 to 4/11	Vice President	Bronx and Westchester Electric Operations
Claude Trahan	60	5/09 to present	Senior Vice President	Gas Operations
		2/02 to 5/09	Vice President	Human Resources
John F. Miksad	53	9/05 to present	Senior Vice President	Electric Operations

CON EDISON ANNUAL REPORT 35

Table of Contents**PART II****ITEM 5: MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTER AND ISSUER PURCHASES OF EQUITY SECURITIES**
Con Edison

Con Edison's Common Shares (\$.10 par value), the only class of common equity of Con Edison, are traded on the New York Stock Exchange. As of January 31, 2013, there were 56,172 holders of record of Con Edison's Common Shares.

The market price range for Con Edison's Common Shares during 2012 and 2011, as reported in the consolidated reporting system, and the dividends paid by Con Edison in 2012 and 2011 were as follows:

	2012			2011		
	High	Low	Dividends Paid	High	Low	Dividends Paid
1 st Quarter	\$ 62.26	\$ 56.99	\$ 0.605	\$ 50.90	\$ 48.55	\$ 0.60
2 nd Quarter	\$ 63.64	\$ 57.01	\$ 0.605	\$ 54.36	\$ 49.80	\$ 0.60
3 rd Quarter	\$ 65.98	\$ 59.01	\$ 0.605	\$ 58.79	\$ 49.18	\$ 0.60
4 th Quarter	\$ 60.83	\$ 53.63	\$ 0.605	\$ 62.74	\$ 54.72	\$ 0.60

On January 31, 2013, Con Edison declared a quarterly dividend of 61 1/2 cents per Common Share. The first quarter 2013 dividend will be paid on March 15, 2013.

Con Edison expects to pay dividends to its shareholders primarily from dividends and other distributions it receives from its subsidiaries. The payment of future dividends, which is subject to approval and declaration by Con Edison's Board of Directors, will depend on a variety of factors, including business, financial and regulatory considerations. For additional information, see "Dividends" in Note C to the financial statements in Item 8 (which information is incorporated herein by reference).

During 2012, the market price of Con Edison's Common Shares decreased by 10.46 percent (from \$62.03 at year-end 2011 to \$55.54 at year-end 2012). By comparison, the S&P 500 Index increased 13.41 percent and the S&P Utilities Index decreased 2.91 percent. The total return to Con Edison's common shareholders during 2012, including both price depreciation and reinvestment of dividends, was -6.72 percent. By comparison, the total returns for the S&P 500 Index and the S&P Utilities Index were 16.00 percent and 1.29 percent, respectively. For the five-year period 2008 through 2012 inclusive, Con Edison's shareholders' total average annual return was 7.91 percent, compared with total average annual returns for the S&P 500 Index and the S&P Utilities Index of 1.66 percent and 0.36 percent, respectively.

Table of Contents

Company/Index	Period Ending					
	12/31/07	12/31/08	12/31/09	12/31/10	12/31/11	12/31/12
Consolidated Edison, Inc.	100.00	84.24	104.37	119.94	156.90	146.35
S&P 500 Index	100.00	63.00	79.68	91.68	93.61	108.59
S&P Utilities	100.00	71.02	79.48	83.82	100.51	101.81

Based on \$100 invested at December 31, 2007, reinvestment of all dividends in equivalent shares of stock and market price changes on all such shares.

CECONY

The outstanding shares of CECONY's Common Stock (\$2.50 par value), the only class of common equity of CECONY, are held by Con Edison and are not traded.

The dividends declared by CECONY in 2012 and 2011 are shown in its Consolidated Statement of Common Shareholder's Equity included in Item 8 (which information is incorporated herein by reference). For additional information about the payment of dividends by CECONY, and restrictions thereon, see Dividends in Note C to the financial statements in Item 8 (which information is incorporated herein by reference).

Issuer Purchases of Equity Securities

Period	Total Number of Shares (or Units) Purchased*	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Appropriate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
October 1, 2012 to October 31, 2012	92,175	\$ 60.04		
November 1, 2012 to November 30, 2012	44,093	55.89		
December 1, 2012 to December 31, 2012	60,198	56.22		
Total	196,466	\$ 57.94		

* Represents Con Edison common shares purchased in open-market transactions. The number of shares purchased approximated the number of treasury shares used for the company's employee stock plans.

Table of Contents

ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This combined management's discussion and analysis of financial condition and results of operations relates to the consolidated financial statements included in this report of two separate registrants: Con Edison and CECONY and should be read in conjunction with the financial statements and the notes thereto. As used in this report, the term the Companies refers to Con Edison and CECONY. CECONY is a subsidiary of Con Edison and, as such, information in this management's discussion and analysis about CECONY applies to Con Edison.

Information in any item of this report referred to in this discussion and analysis is incorporated by reference herein. The use of terms such as see or refer to shall be deemed to incorporate by reference into this discussion and analysis the information to which reference is made.

Corporate Overview

Con Edison's principal business operations are those of the Utilities. Con Edison also has competitive energy businesses. See The Utilities and Competitive Energy Businesses in Item 1. Certain financial data of Con Edison's businesses is presented below:

(millions of dollars, except percentages)	Twelve months ended December 31, 2012				At December 31, 2012	
	Operating Revenues		Net Income for Common Stock		Assets	
CECONY	\$ 10,187	84%	\$ 1,014	89%	\$ 36,885	90%
O&R	795	6%	64	6%	2,671	6%
Total Utilities	10,982	90%	1,078	95%	39,556	96%
Con Edison						
Solutions (a)	1,115	9%	71	6%	302	1%
Con Edison Energy (a)	84	1%	-	-%	49	-%
Con Edison Development	22	-%	5	-%	727	2%
Other (b)	(15)	-%	(16)	(1)%	575	1%
Total Con Edison	\$ 12,188	100%	\$ 1,138	100%	\$ 41,209	100%

(a) Net income from the competitive energy businesses for the twelve months ended December 31, 2012 includes \$40 million of net after-tax mark-to-market (losses)/gains (Con Edison Solutions, \$42 million and Con Edison Energy, \$(2) million).

(b) Represents inter-company and parent company accounting. See Results of Operations, below.

Con Edison's net income for common stock in 2012 was \$1,138 million or \$3.88 a share (\$3.86 on a diluted basis). Net income for common stock in 2011 and 2010 was \$1,051 million or \$3.59 a share (\$3.57 on a diluted basis) and \$992 million or \$3.49 a share (\$3.47 on a diluted basis), respectively. See Results of Operations Summary, below. For segment financial information, see Note N to the financial statements in Item 8 and Results of Operations, below.

Results of Operations Summary

Net income for common stock for the years ended December 31, 2012, 2011 and 2010 was as follows:

(millions of dollars)	2012	2011	2010
CECONY	\$ 1,014	\$ 978	\$ 893
O&R	64	53	49
Competitive energy businesses (a)	76	32	66
Other (b)	(16)	(12)	(16)
Con Edison	\$ 1,138	\$ 1,051	\$ 992

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

(a) Includes \$40 million, \$(13) million and \$11 million of net after-tax mark-to-market (losses)/gains in 2012, 2011 and 2010, respectively.

(b) Consists of inter-company and parent company accounting.

The Companies' results of operations for 2012, as compared with 2011, reflect changes in the Utilities' rate plans and the effects of the milder winter weather on steam revenues. These rate plans provide for additional revenues to cover expected increases in certain operations and maintenance expenses, and depreciation. The results of operations include the operating results of the competitive energy businesses, including net mark-to-market effects.

Operations and maintenance expenses were higher in 2012 compared with 2011 due to pension costs and the support and maintenance of company underground facilities to accommodate municipal projects. Depreciation and property taxes were higher in 2012 compared with 2011 reflecting primarily higher utility plant balances.

CECONY and O&R, in the 2012 fourth quarter, incurred response and restoration costs for Superstorm Sandy of \$363 million and \$98 million, respectively (including capital expenditures of \$104 million and \$14 million, respectively). Most of the costs that were not capitalized were deferred for recovery as a regulatory asset under the Utilities' electric rate plans. See "Other Regulatory Matters" in Note B to the financial statements in Item 8.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

The following table presents the estimated effect on earnings per share and net income for common stock for 2012 as compared with 2011 and 2011 as compared with 2010, resulting from these and other major factors:

	2012 vs. 2011		2011 vs. 2010	
	Earnings per	Net Income for	Earnings	Net Income
	Share	Common	per	for Common
		Stock	Share	Stock
		(millions of		(millions of
		dollars)		dollars)
CECONY				
Rate plans, primarily to recover increases in certain costs	\$ 0.90	\$ 263	\$ 0.84	\$ 237
Weather impact on steam revenues	(0.07)	(20)	-	-
Operations and maintenance expenses	(0.47)	(137)	(0.14)	(41)
Depreciation and property taxes	(0.19)	(57)	(0.30)	(86)
Other (includes dilutive effect of new stock issuances)	(0.05)	(13)	(0.20)	(25)
Total CECONY	0.12	36	0.20	85
O&R	0.04	11	0.01	4
Competitive energy businesses (a)	0.15	44	(0.13)	(34)
Other, including parent company expenses	(0.02)	(4)	0.02	4
Total variations	\$ 0.29	\$ 87	\$ 0.10	\$ 59

(a) These variations reflect after-tax net mark-to-market gains/(losses) of \$40 million or \$0.13 a share, \$(13) million or \$(0.05) a share and \$11 million or \$0.04 a share for the years ended December 31, 2012, 2011 and 2010, respectively.

See Results of Operations below for further discussion and analysis of results of operations.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

Risk Factors

The Companies' businesses are influenced by many factors that are difficult to predict, and that involve uncertainties that may materially affect actual operating results, cash flows and financial condition. See "Risk Factors" in Item 1A.

Application of Critical Accounting Policies

The Companies' financial statements reflect the application of their accounting policies, which conform to accounting principles generally accepted in the United States of America. The Companies' critical accounting policies include industry-specific accounting applicable to regulated public utilities and accounting for pensions and other postretirement benefits, contingencies, long-lived assets, derivative instruments, goodwill and leases.

Accounting for Regulated Public Utilities

The Utilities are subject to the accounting rules for regulated operations and the accounting requirements of the FERC and the state public utility regulatory commissions having jurisdiction.

The accounting rules for regulated operations specify the economic effects that result from the causal relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or regulatory assets under the accounting rules for regulated operations. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or regulatory liabilities under the accounting rules for regulated operations.

The Utilities' principal regulatory assets and liabilities are listed in Note B to the financial statements in Item 8. The Utilities are each receiving or being credited with a return on all regulatory assets for which a cash outflow has been made. The Utilities are each paying or being charged with a return on all regulatory liabilities for which a cash inflow has been received. The regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

In the event that regulatory assets of the Utilities were no longer probable of recovery, as required by the accounting rules for regulated operations, these regulatory assets would be charged to earnings. At December 31, 2012, the regulatory assets for Con Edison and CECONY were \$9,779 million and \$9,032 million, respectively.

Accounting for Pensions and Other Postretirement Benefits

The Utilities provide pensions and other postretirement benefits to substantially all of their employees and retirees. Con Edison's competitive energy businesses also provide such benefits to certain of their employees. The Companies account for these benefits in accordance with the accounting rules for retirement benefits. In addition, the Utilities apply the accounting rules for regulated operations to account for the regulatory treatment of these obligations (which, as described in Note B to the financial statements in Item 8, reconciles the amounts reflected in rates for the costs of the benefit to the costs actually incurred). In applying these accounting policies, the Companies have made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, discount rates, health care cost trends and future compensation. See Notes A, E and F to the financial statements in Item 8 for information about the Companies' pension and other postretirement benefits, the actuarial assumptions, actual performance, amortization of investment and other actuarial gains and losses and calculated plan costs for 2012, 2011 and 2010.

The discount rate for determining the present value of future period benefit payments is determined using a model to match the durations of highly-rated (Aa or higher by either Moody's or S&P) corporate bonds with the projected stream of benefit payments.

In determining the health care cost trend rate, the Companies review actual recent cost trends and projected future trends.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The cost of pension and other postretirement benefits in future periods will depend on actual returns on plan assets, assumptions for future periods, contributions and benefit experience. Con Edison's and CECONY's current estimates for 2013 are increases, compared with 2012, in their pension and other postretirement benefits costs of \$43 million.

CON EDISON ANNUAL REPORT 41

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

The following table illustrates the effect on 2013 pension and other postretirement costs of changing the critical actuarial assumptions, while holding all other actuarial assumptions constant:

Actuarial Assumption (millions of dollars)	Change in Assumption	Pension	Other Postretirement	
			Benefits	Total
Increase in accounting cost:				
Discount rate				
Con Edison	(0.25%)	\$ 51	\$ 3	\$ 54
CECONY	(0.25%)	\$ 48	\$ 2	\$ 50
Expected return on plan assets				
Con Edison	(0.25%)	\$ 22	\$ 2	\$ 24
CECONY	(0.25%)	\$ 21	\$ 2	\$ 23
Health care trend rate				
Con Edison	1.00%	\$ -	\$ (2)	\$ (2)
CECONY	1.00%	\$ -	\$ (6)	\$ (6)
Increase in projected benefit obligation:				
Discount rate				
Con Edison	(0.25%)	\$ 504	\$ 40	\$ 544
CECONY	(0.25%)	\$ 475	\$ 33	\$ 508
Health care trend rate				
Con Edison	1.00%	\$ -	\$ (12)	\$ (12)
CECONY	1.00%	\$ -	\$ (31)	\$ (31)

A 5.0 percentage point variation in the actual annual return in 2013, as compared with the expected annual asset return of 8.00 percent, would change pension and other postretirement benefit costs for both Con Edison and CECONY by approximately \$24 million and \$22 million, respectively, in 2014.

Pension benefits are provided through a pension plan maintained by Con Edison to which CECONY, O&R and the competitive energy businesses make contributions for their participating employees. Pension accounting by the Utilities includes an allocation of plan assets.

The Companies' policy is to fund their pension and other postretirement benefit accounting costs to the extent tax deductible, and for the Utilities, to the extent these costs are recovered under their rate agreements. The Companies were not required to make cash contributions to the pension plan in 2012 under funding regulations and tax laws. However, CECONY and O&R made discretionary contributions to the plan in 2012 of \$741 million and \$56 million, respectively. In 2013, CECONY and O&R expect to make contributions of \$834 million and \$59 million, respectively. See Expected Contributions in Notes E and F to the financial statements in Item 8.

Accounting for Contingencies

The accounting rules for contingencies apply to an existing condition, situation or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. Known material contingencies, which are described in the notes to the financial statements, include certain regulatory matters (Note B), the Utilities' responsibility for hazardous substances, such as asbestos, PCBs and coal tar that have been used or generated in the course of operations (Note G); certain tax matters (Notes J and L); and other contingencies (Note H). In accordance with the accounting rules, the Companies have accrued estimates of losses relating to the contingencies as to which loss is probable and can be reasonably estimated and no liability has been accrued for contingencies as to which loss is not probable or cannot be reasonably estimated.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The Utilities generally recover costs for asbestos lawsuits, workers' compensation and environmental remediation pursuant to their current rate plans. Changes during the terms of the rate plans to the amounts accrued for these contingencies would not impact earnings.

Accounting for Long-Lived Assets

The accounting rules for property, plant and equipment require that certain long-lived assets must be tested for recoverability whenever events or changes in circumstances indicate their carrying amounts may not be recoverable. The carrying amount of a long-lived asset is deemed not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Under the accounting rules, an impairment loss is recognized if the carrying amount is not recoverable from such cash flows, and exceeds its fair value, which approximates market value.

Accounting for Goodwill

In accordance with the accounting rules for goodwill and intangible assets, Con Edison is required to test goodwill for impairment annually. See Notes K to the financial statements in Item 8. Goodwill is tested for impairment using a two-step approach. The first step of the goodwill impairment test compares the estimated fair value of a reporting unit with its carrying value, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill of the reporting unit is considered not impaired. If the carrying value exceeds the estimated fair value of the reporting unit, the second step is performed to measure the amount of impairment loss, if any. The second step requires a calculation of the implied fair value of goodwill.

Goodwill was \$429 million at December 31, 2012. The most recent test, which was performed during 2012 did not require

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

any second-step assessment and did not result in any impairment. The company's most significant assumptions surrounding the goodwill impairment test relate to the estimates of reporting unit fair values. The company estimated fair values based primarily on discounted cash flows and on market values for a proxy group of companies.

Accounting for Derivative Instruments

The Companies apply the accounting rules for derivatives and hedging to their derivative financial instruments. The Companies use derivative financial instruments to hedge market price fluctuations in related underlying transactions for the physical purchase and sale of electricity and gas and interest rate risk on certain debt securities. The Utilities are permitted by their respective regulators to reflect in rates all reasonably incurred gains and losses on these instruments. See Financial and Commodity Market Risks, below and Note O to the financial statements in Item 8.

Where the Companies are required to make mark-to-market estimates pursuant to the accounting rules, the estimates of gains and losses at a particular period end do not reflect the end results of particular transactions, and will most likely not reflect the actual gain or loss at the conclusion of a transaction. Substantially all of the estimated gains or losses are based on prices supplied by external sources such as the fair value of exchange-traded futures and options and the fair value of positions for which price quotations are available through or derived from brokers or other market sources.

Accounting for Leases

The Companies apply the accounting rules for leases and other related pronouncements to their leasing transactions. In accordance with the accounting rules, Con Edison accounted for Con Edison Development's two Lease In/Lease Out or LILO transactions as leveraged leases. Accordingly, the company's investment in these leases, net of non-recourse debt, is carried as a single amount in Con Edison's consolidated balance sheet included in Item 8. In January 2013, the United States Court of Appeals for the Federal Circuit reversed an October 2009 trial court ruling and disallowed company-claimed tax deductions relating to a 1997 transaction in which Con Edison Development leased property from the owner and then immediately subleased it back to the owner. As a result, Con Edison expects to record an estimated charge of between \$150 million and \$170 million (after-tax) in the first quarter of 2013 to reflect the interest on disallowed federal and state income tax deductions and the recalculation of the accounting effect of the 1997 transaction and Con Edison Development's 1999 LILO transaction. The transactions did not impact earnings in either 2012 or 2011. See Note J to the financial statements in Item 8.

Liquidity and Capital Resources

The Companies' liquidity reflects cash flows from operating, investing and financing activities, as shown on their respective consolidated statement of cash flows and as discussed below.

The principal factors affecting Con Edison's liquidity are its investments in the Utilities, the dividends it pays to its shareholders and the dividends it receives from the Utilities and cash flows from financing activities discussed below. In addition, in January 2013, Con Edison deposited \$447 million with federal and state agencies in connection with Con Edison Development's LILO transactions. See Note J to the financial statements in Item 8.

The principal factors affecting CECONY's liquidity are its cash flows from operating activities, cash used in investing activities (including construction expenditures), the dividends it pays to Con Edison and cash flows from financing activities discussed below.

The Companies generally maintain minimal cash balances and use short-term borrowings to meet their working capital needs and other cash requirements. The Companies repay their short-term borrowings using funds from long-term financings and operating activities. The Utilities cost of capital, including working capital, is reflected in the rates they charge to their customers.

Each of the Companies believes that it will be able to meet its reasonably likely short-term and long-term cash requirements. See The Companies Require Access to Capital Markets to Satisfy Funding Requirements and The Companies Also Face Other Risks That Are Beyond Their Control in Item 1A, Application of Critical Accounting Policies Accounting for Contingencies, above, and Utility Regulation in Item 1.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Changes in the Companies' cash and temporary cash investments resulting from operating, investing and financing activities for the years ended December 31, 2012, 2011 and 2010 are summarized as follows:

Con Edison

(millions of dollars)			Variance			Variance

Balance at end of period	\$ 353	\$ 372	\$ (19)	\$ 78	\$ 294

Cash Flows from Operating Activities

The Utilities' cash flows from operating activities reflect principally their energy sales and deliveries and cost of operations. The volume of energy sales and deliveries is dependent primarily on factors external to the Utilities, such as growth of customer demand, weather, market prices for energy, economic conditions and measures that promote energy efficiency. Under the revenue decoupling mechanisms in CECONY's electric and gas rate plans and O&R's New York electric and gas rate plans, changes in delivery volumes from levels assumed when rates were approved may affect the timing of cash flows but not net income. See Note B to the financial statements in Item 8. The prices at which the Utilities provide energy to their customers are determined in accordance with their rate agreements. In general, changes in the Utilities' cost of purchased power, fuel and gas may affect the timing of cash flows but not net income because the costs are recovered in accordance with rate agreements. See Recoverable Energy Costs in Note A to the financial statements in Item 8.

The Companies' cash flows from operating activities also reflect the timing of the deduction for income tax purposes of their construction expenditures. Cash paid by Con Edison for income taxes, net of any refunds received was \$46 million, \$(236) million and \$(25) million in 2012, 2011 and 2010, respectively (including \$62 million, \$(198) million and \$(18) million for CECONY in 2012, 2011 and 2010, respectively). For 2012, the Companies had no current federal income tax liability as a result of, among other things, deduction of costs incurred in connection with Superstorm Sandy. Con Edison intends to apply estimated federal income tax payments made in 2012 (prior to Superstorm Sandy) to the payment of its 2013 tax liability. For 2011 and 2010, the Companies had no current federal income tax liability as a result of, among other things, the bonus depreciation provisions of the American Recovery and Reinvestment Act of 2009, the Small Business Jobs Act of 2010 and the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010. In addition, the company changed its method of determining the timing of deductions of certain repairs to utility plant. The American Taxpayer Relief Act of 2012, which was enacted in January 2013, extends bonus depreciation provisions to assets placed in service before January 2014 (or, for certain types of assets, January 2015). For information about net operating loss carryforwards available for federal and state income tax purposes, see Note L to the financial statements in Item 8.

Net income is the result of cash and non-cash (or accrual) transactions. Only cash transactions affect the Companies' cash flows from operating activities. Principal non-cash charges include depreciation and deferred income tax expense. Principal non-cash credits include amortizations of certain net regulatory liabilities. Non-cash charges or credits may also be accrued under the revenue decoupling and cost reconciliation mechanisms in the Utilities' electric and gas rate plans in New York. See Rate Agreements - CECONY Electric and Gas and O&R Electric and Gas in Note B to the financial statements in Item 8.

Net cash flows from operating activities in 2012 for Con Edison and CECONY were \$538 million and \$587 million lower, respectively, than in 2011. The decreases in net cash flows reflect the higher estimated income tax payments, net of refund received, in 2012 (\$282 million for Con Edison and \$260 million for CECONY). The decrease in net cash flows is also due to the increased pension contributions in 2012 (\$244 million for Con Edison and \$232 million for CECONY). The Companies contributed \$797 million and \$553 million (of which \$741 million and \$509 million was contributed by CECONY) to the pension plan during 2012 and 2011, respectively.

Net cash flows from operating activities in 2011 for Con Edison and CECONY were \$756 million and \$728 million higher, respectively, than in 2010. The increases in net cash flows reflect primarily lower estimated income tax payments, net of refunds received in 2011 (\$211 million for Con Edison and \$180 million for CECONY), lower cash collateral held by brokers and counterparties at the end of 2011, generally reflecting

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

lower hedged volume and smaller decreases in commodity prices for derivative transactions (\$82 million for Con Edison and \$74 million for CECONY) and recoveries received in 2011 for costs incurred relating to the World Trade Center attack (\$150 million).

The change in net cash flows also reflects the timing of payments for and recovery of energy costs. This timing is reflected within changes to accounts receivable – customers, recoverable energy costs and accounts payable balances.

The changes in regulatory assets principally reflect changes in deferred pension costs in accordance with the accounting rules for retirement benefits and changes in future federal income taxes associated with increased removal costs. See Notes A, B and E to the financial statements in Item 8.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

Cash Flows Used in Investing Activities

Net cash flows used in investing activities for Con Edison and CECONY were \$373 million and \$11 million higher, respectively, in 2012 than in 2011. The changes for Con Edison and CECONY reflect increased utility construction expenditures in 2012. In addition, for Con Edison, the change reflects the acquisition and construction of solar energy projects, return of investment resulting from the receipt of government grant proceeds at the Pilesgrove solar project and proceeds from grants related to other renewable investments.

Net cash flows used in investing activities for Con Edison and CECONY were \$25 million and \$51 million lower, respectively, in 2011 than in 2010. The decrease reflects primarily decreased utility construction expenditures in 2011, offset in part for Con Edison by higher construction expenditures at Con Edison Development.

Cash Flows from Financing Activities

Net cash flows from financing activities in 2012 for Con Edison and CECONY were \$347 million and \$285 million higher, respectively, than in 2011. Net cash flows from financing activities in 2011 for Con Edison and CECONY were \$549 million and \$432 million lower, respectively, than in 2010.

Con Edison's cash flows from financing activities for the year ended December 31, 2010 reflect the issuance through public offering of 6.3 million Con Edison common shares resulting in net proceeds of \$305 million. The proceeds from this offering were invested by Con Edison in CECONY.

Cash flows from financing activities for 2011 and 2010 also reflect the issuance of Con Edison common shares through its dividend reinvestment and employee stock plans (2011: 1.3 million shares for \$31 million and 2010: 4.2 million shares for \$133 million). In addition, as a result of the stock plan issuances, cash used to pay common stock dividends was reduced by \$10 million in 2011 and \$48 million in 2010. The number of shares issued through, and cash flows relating to, the plans in 2011, as compared with 2010, reflect the purchase in 2011 of shares in open-market transactions in connection with the plans.

CECONY had no issuances of long-term debt in 2011. Net cash flows from financing activities during the years ended December 31, 2012 and 2010 also reflect the following CECONY transactions:

2012

Issued \$400 million 4.20 percent 30-year debentures, \$239 million of the net proceeds from the sale of which were used to redeem all outstanding shares of its \$5 Cumulative Preferred Stock and Cumulative Preferred Stock (\$100 par value); and

Redeemed at maturity \$300 million 5.625 percent 10-year debentures.

2010

Issued \$350 million 4.45 percent 10-year debentures and \$350 million 5.70 percent 30-year debentures;

Redeemed at maturity \$325 million 8.125 percent 10-year debentures and \$300 million 7.50 percent 10-year debentures; and

Issued \$224.6 million of 1.45 percent, tax-exempt debt (which in 2012 was subject to mandatory tender and reoffered with interest rates reset weekly); the proceeds of which were used to refund 4.70 percent tax-exempt debt (that was also subject to redemption in 2012).

O&R had no issuances of long-term debt in 2012 and 2011. Con Edison's net cash flows from financing activities also reflect the following O&R transactions:

2010

Issued \$115 million 5.50 percent 30-year debentures;

Redeemed in advance of maturity \$45 million 7.00 percent 30-year debentures due 2029;

Issued \$55 million 2.50 percent 5-year debentures; the proceeds of which were used to purchase and cancel \$55 million variable rate, tax-exempt debt that was due in 2014; and

Redeemed at maturity \$55 million 7.50 percent 10-year debentures.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

Cash flows from financing activities of the Companies also reflect commercial paper issuance. The commercial paper amounts outstanding at December 31, 2012, 2011 and 2010 and the average daily balances for 2012, 2011 and 2010 for Con Edison and CECONY were as follows:

	2012		2011		2010	
	Out-standing at Dec-ember 31	Daily average	Out-standing at Dec-ember 31	Daily average	Out-standing at Dec-ember 31	Daily average
(millions of dollars, except Weighted Average Yield)						
Con Edison	\$ 539	\$ 144	\$ -	\$ 83	\$ -	\$ 370
CECONY	\$ 421	\$ 123	\$ -	\$ 83	\$ -	\$ 352
Weighted average yield	0.3%	0.3%	-%	0.3%	-%	0.4%

At February 20, 2013, Con Edison had \$1,609 million of commercial paper outstanding (including \$916 million outstanding at CECONY). The increase in outstanding commercial paper from December 31, 2012 reflects the January 2013 deposits of \$447 million in connection with Con Edison Development's LILO transactions (see Note J to the financial statements in Item 8) and the February 1, 2013 payment at maturity of \$500 million of CECONY 4.875 percent 10-year debentures.

Common stock issuances and external borrowings are sources of liquidity that could be affected by changes in credit ratings, financial performance and capital market conditions. For information about the Companies' credit ratings and certain financial ratios, see Capital Requirements and Resources in Item 1.

Other Changes in Assets and Liabilities

The following table shows changes in certain assets and liabilities at December 31, 2012, compared with December 31, 2011.

(millions of dollars)	Con Edison 2012 vs. 2011 Variance	CECONY 2012 vs. 2011 Variance
Assets		
Non-utility plant	\$ 466	-
Regulatory asset - Deferred storm costs	304	\$ 229
Regulatory asset - Unrecognized pension and other postretirement costs	(175)	(147)
Liabilities		
Deferred income taxes and investment tax credits	\$ 809	\$ 531
Notes payable	539	421
Accounts payable	260	215
Pension and retiree benefits	(157)	(117)

Non-Utility Plant

The increase in non-utility plant for Con Edison reflects the acquisition and construction of solar energy projects. See Note N to the financial statements in Item 8.

Regulatory Asset for Deferred Storm Costs and Accounts Payable

The increase in the regulatory asset for deferred storm costs and accounts payable reflects the response and restoration costs in connection with Superstorm Sandy and other major storms that were deferred by the Utilities under their New York electric rate plans. See Other Regulatory

Matters in Note B to the financial statements in Item 8.

Regulatory Asset for Unrecognized Pension and Other Postretirement Costs and Noncurrent Liability for Pension and Retiree Benefits

The decrease in the regulatory asset for unrecognized pension and other postretirement costs and the noncurrent liability for pension and retiree benefits reflects the final actuarial valuation of the pension and other retiree benefit plans as measured at December 31, 2012, in accordance with the accounting rules for retirement benefits. The change in the regulatory asset also reflects the year's amortization of accounting costs. The decrease in the noncurrent liability for pension and retiree benefits reflects in part contributions to the plans made by the Utilities in 2012. See Notes B, E and F to the financial statements in Item 8.

Deferred Income Taxes and Investment Tax Credits

The increase in the liability for deferred income taxes and investment tax credits reflects the timing of the tax deduction of expenditures for utility plant that resulted in amounts being collected from customers to pay income taxes in advance of when the income tax payments will be required. See Cash Flows from Operating Activities, above.

Notes Payable

The increase in notes payable reflects the commercial paper issuance by CECONY in advance of its January 2013 semi-annual payment of New York City property taxes (\$610 million).

Capital Requirements and Resources

For information about capital requirements, contractual obligations and capital resources, see Capital Requirements and Resources in Item 1.

Regulatory Matters

For Information about the Utilities' rate plans and other regulatory matters affecting the Companies, see Utility Regulation in Item 1 and Note B to the financial statements in Item 8.

Financial and Commodity Market Risks

The Companies are subject to various risks and uncertainties associated with financial and commodity markets. The most significant market risks include interest rate risk, commodity price risk, credit risk and investment risk.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Interest Rate Risk**

The interest rate risk relates primarily to variable rate debt and to new debt financing needed to fund capital requirements, including the construction expenditures of the Utilities and maturing debt securities. Con Edison and its businesses manage interest rate risk through the issuance of mostly fixed-rate debt with varying maturities and through opportunistic refinancing of debt. Con Edison and CECONY estimate that at December 31, 2012, a 10 percent variation in interest rates applicable to its variable rate debt would not result in a material change in annual interest expense. Under CECONY's current gas, steam and electric rate plans, variations in actual long-term debt interest rates are reconciled to levels reflected in rates. Under O&R's current New York rate plans, variations in actual tax-exempt (and under the gas rate plan, taxable) long-term debt interest expense are reconciled to the level set in rates.

In addition, from time to time, Con Edison and its businesses enter into derivative financial instruments to hedge interest rate risk on certain debt securities. See "Interest Rate Swap" in Note O to the financial statements in Item 8.

Commodity Price Risk

Con Edison's commodity price risk relates primarily to the purchase and sale of electricity, gas and related derivative instruments. The Utilities and Con Edison's competitive energy businesses apply risk management strategies to mitigate their related exposures. See Note O to the financial statements in Item 8.

Con Edison estimates that, as of December 31, 2012, a 10 percent decline in market prices would result in a decline in fair value of \$52 million for the derivative instruments used by the Utilities to hedge purchases of electricity and gas, of which \$42 million is for CECONY and \$10 million is for O&R. Con Edison expects that any such change in fair value would be largely offset by directionally opposite changes in the cost of the electricity and gas purchased. In accordance with provisions approved by state regulators, the Utilities generally recover from customers the costs they incur for energy purchased for their customers, including gains and losses on certain derivative instruments used to hedge energy purchased and related costs. See "Recoverable Energy Costs" in Note A to the financial statements in Item 8.

Con Edison's competitive energy businesses use a value-at-risk (VaR) model to assess the market risk of their electricity and gas commodity fixed-price purchase and sales commitments, physical forward contracts and commodity derivative instruments. VaR represents the potential change in fair value of instruments or the portfolio due to changes in market factors, for a specified time period and confidence level. These businesses estimate VaR across their electricity and natural gas commodity businesses using a delta-normal variance/covariance model with a 95 percent confidence level. Since the VaR calculation involves complex methodologies and estimates and assumptions that are based on past experience, it is not necessarily indicative of future results. VaR for transactions associated with hedges on generating assets and commodity contracts, assuming a one-day holding period, for the years ended December 31, 2012 and 2011, respectively, was as follows:

(millions of dollars)	2012	2011
95% Confidence Level, One-Day Holding Period		
Average for the period	\$ 1	\$ 1
High	2	1
Low	-	-

Credit Risk

The Companies are exposed to credit risk related to transactions entered into primarily for the various energy supply and hedging activities by the Utilities and the competitive energy businesses. Credit risk relates to the loss that may result from a counterparty's nonperformance. The Companies use credit policies to manage this risk, including an established credit approval process, monitoring of counterparty limits, netting provisions within agreements and collateral or prepayment arrangements, credit insurance and credit default swaps. The Companies measure credit risk exposure as the replacement cost for open energy commodity and derivative positions plus amounts owed from counterparties for settled transactions. The replacement cost of open positions represents unrealized gains, net of any unrealized losses where the Companies have a legally enforceable right of setoff.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

The Utilities had \$21 million of credit exposure in connection with energy supply and hedging activities, net of collateral, at December 31, 2012, of which \$19 million was with commodity exchange brokers and \$2 million was with investment grade counterparties.

Con Edison's competitive energy businesses had \$92 million of credit exposure in connection with energy supply and hedging activities, net of collateral, at December 31, 2012, of which \$40 million was with investment grade counterparties, \$22 million was with commodity exchange brokers, \$28 million was with independent system operators and \$2 million was with non-investment grade counterparties.

Investment Risk

The Companies' investment risk relates to the investment of plan assets for their pension and other postretirement benefit plans. See Application of Critical Accounting Policies Accounting for Pensions and Other Postretirement Benefits, above. The Companies' current investment policy for pension plan assets

CON EDISON ANNUAL REPORT 47

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

includes investment targets of 60 percent equities and 40 percent fixed income and other securities. At December 31, 2012, the pension plan investments consisted of 60 percent equity and 40 percent fixed income and other securities.

Environmental Matters

For information concerning climate change, environmental sustainability, potential liabilities arising from laws and regulations protecting the environment and other environmental matters, see "Environmental Matters" in Item 1 and Note G to the financial statements in Item 8.

Impact of Inflation

The Companies are affected by the decline in the purchasing power of the dollar caused by inflation. Regulation permits the Utilities to recover through depreciation only the historical cost of their plant assets even though in an inflationary economy the cost to replace the assets upon their retirement will substantially exceed historical costs. The impact is, however, partially offset by the repayment of the Companies' long-term debt in dollars of lesser value than the dollars originally borrowed.

Material Contingencies

For information concerning potential liabilities arising from the Companies' material contingencies, see "Application of Critical Accounting Policies - Accounting for Contingencies," above, and Notes B, G, H, J and L to the financial statements in Item 8.

Results of Operations

See "Results of Operations - Summary," above.

Results of operations reflect, among other things, the Companies' accounting policies (see "Application of Critical Accounting Policies," above) and rate plans that limit the rates the Utilities can charge their customers (see "Utility Regulation" in Item 1). Under the revenue decoupling mechanisms currently applicable to CECONY's electric and gas businesses and O&R's electric and gas businesses in New York, the Utilities' delivery revenues generally will not be affected by changes in delivery volumes from levels assumed when rates were approved. Revenues for CECONY's steam business and O&R's businesses in New Jersey and Pennsylvania are affected by changes in delivery volumes resulting from weather, economic conditions and other factors. See Note B to the financial statements in Item 8.

In general, the Utilities recover on a current basis the fuel, gas purchased for resale and purchased power costs they incur in supplying energy to their full-service customers (see "Recoverable Energy Costs" in Note A and "Regulatory Matters" in Note B to the financial statements in Item 8). Accordingly, such costs do not generally affect the Companies' results of operations. Management uses the term "net revenues" (operating revenues less such costs) to identify changes in operating revenues that may affect the Companies' results of operations. Management believes that, although "net revenues" may not be a measure determined in accordance with accounting principles generally accepted in the United States of America, the measure facilitates the analysis by management and investors of the Companies' results of operations.

Con Edison's principal business segments are CECONY's regulated utility activities, O&R's regulated utility activities and Con Edison's competitive energy businesses. CECONY's principal business segments are its regulated electric, gas and steam utility activities. A discussion of the results of operations by principal business segment for the years ended December 31, 2012, 2011 and 2010 follows. For additional business segment financial information, see Note N to the financial statements in Item 8.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS CONTINUED

Year Ended December 31, 2012 Compared with Year Ended December 31, 2011

The Companies' results of operations (which were discussed above under Results of Operations Summary) in 2012 compared with 2011 were:

(millions of dollars)	CECONY		O&R		Competitive Energy Businesses and Other(a) Increases		Con Edison(b)	
	Increases (Decreases)	Increases (Decreases)	Increases (Decreases)	Increases (Decreases)	Increases (Decreases)	(Decreases)	Increases (Decreases)	Increases (Decreases)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

Electric

CECONY's results of electric operations for the year ended December 31, 2012 compared with the year ended December 31, 2011 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2012	December 31, 2011	
Operating revenues	\$ 8,176	\$ 8,228	\$ (52)
Purchased power	1,938	2,260	(322)
Fuel	159	199	(40)
Net revenues	6,079	5,769	310
Operations and maintenance	2,273	2,041	232
Depreciation and amortization	710	656	54
Taxes, other than income taxes	1,403	1,377	26
Electric operating income	\$ 1,693	\$ 1,695	\$ (2)

CECONY's electric sales and deliveries, excluding off-system sales, in 2012 compared with 2011 were:

Description	Millions of kWhs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2012	December 31, 2011			December 31, 2012	December 31, 2011		
Residential/Religious(a)	10,718	11,404	(686)	(6.0)%	\$ 2,749	\$ 2,918	\$ (169)	(5.8)%
Commercial/Industrial	9,848	11,148	(1,300)	(11.7)	1,971	2,304	(333)	(14.5)
Retail access customers	25,990	24,234	1,756	7.2	2,750	2,354	396	16.8
NYPA, Municipal Agency and other sales	10,645	11,040	(395)	(3.6)	617	592	25	4.2
Other operating revenues	-	-	-	-	89	60	29	48.3
Total	57,201	57,826	(625)	(1.1)%	\$ 8,176	\$ 8,228	\$ (52)	(0.6)%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

CECONY's electric operating revenues decreased \$52 million in 2012 compared with 2011 due primarily to lower purchased power (\$322 million) and fuel costs (\$40 million), offset by higher revenues from the electric rate plan (\$310 million). CECONY's revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which delivery revenues generally are not affected by changes in delivery volumes from levels assumed when rates were approved. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the revenue decoupling mechanism and other provisions of the company's rate plans. See Note B to the financial statements in Item 8.

Electric delivery volumes in CECONY's service area decreased 1.1 percent in 2012 compared with 2011. After adjusting for variations, principally weather and billing days, electric delivery volumes in CECONY's service area increased 0.2 percent in 2012 compared with 2011.

CECONY's electric purchased power costs decreased \$322 million in 2012 compared with 2011 due to a decrease in purchased volumes (\$321 million) and unit costs (\$1 million). Electric fuel costs decreased \$40 million in 2012 compared with 2011 due to lower unit costs (\$58 million), offset by higher sendout volumes from the company's electric generating facilities (\$18 million).

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's electric operating income decreased \$2 million in 2012 compared with 2011. The decrease reflects primarily higher operations and maintenance costs (\$232 million), due primarily to higher pension expense (\$149 million), and increase in surcharges that are collected in revenues from customers (\$25 million) and higher support and maintenance of company underground facilities to accommodate municipal projects (\$14 million), higher depreciation and amortization (\$54 million) and higher taxes other than income taxes (\$26 million, principally property taxes), offset in part by higher net revenues (\$310 million, due primarily to the electric rate plan). Most of the operating expenses attributable to major storms in 2012 and 2011 were deferred as a regulatory asset. See "Regulatory Assets and Liabilities" in Note B to the financial statements.

50 CON EDISON ANNUAL REPORT

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Gas**

CECONY's results of gas operations for the year ended December 31, 2012 compared with the year ended December 31, 2011 is as follows:

(millions of dollars)	Twelve Months Ended		Variation

Other operating revenues	-	-	-	-	37	(44)	81	Large
Total	272,609	261,078	11,531	4.4%	\$ 1,415	\$ 1,521	\$ (106)	(7.0)%

(a) Includes 563 and 3,801 thousands of dths for 2012 and 2011, respectively, which are also reflected in firm transportation and other.

CECONY's gas operating revenues decreased \$106 million in 2012 compared with 2011 due primarily to a decrease in gas purchased for resale costs (\$131 million), offset in part higher revenues from the gas rate plan (\$25 million). CECONY's revenues from gas sales are subject to a weather normalization clause and a revenue decoupling mechanism as a result of which delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other gas operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

CECONY's sales and transportation volumes for firm customers decreased 7.2 percent in 2012 compared with 2011. After adjusting for variations, principally weather and billing days, firm gas sales and transportation volumes in the company's service area increased 0.6 percent in 2012.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's purchased gas cost decreased \$131 million in 2012 compared with 2011 due to lower unit costs (\$120 million) and sendout volumes (\$11 million).

CECONY's gas operating income increased \$51 million in 2012 compared with 2011. The increase reflects primarily lower operations and maintenance expense (\$36 million, due primarily to a decrease in the surcharges that are collected in revenues from customers (\$34 million) and higher net revenues (\$25 million), offset by higher depreciation and amortization (\$10 million).

CON EDISON ANNUAL REPORT 51

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Steam**

CECONY's results of steam operations for the year ended December 31, 2012 compared with the year ended December 31, 2011 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2012	December 31, 2011	
Operating revenues	\$ 596	\$ 683	\$ (87)
Purchased power	30	53	(23)
Fuel	151	213	(62)
Net revenues	415	417	(2)
Operations and maintenance	185	154	31
Depreciation and amortization	64	63	1
Taxes, other than income taxes	112	107	5
Steam operating income	\$ 54	\$ 93	\$ (39)

CECONY's steam sales and deliveries in 2012 compared with 2011 were:

Description	Millions of Pounds Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2012	December 31, 2011			December 31, 2012	December 31, 2011		
General	425	519	(94)	(18.1)%	\$ 25	\$ 28	\$ (3)	(10.7)%
Apartment house	5,240	5,779	(539)	(9.3)	158	175	(17)	(9.7)
Annual power	14,076	16,024	(1,948)	(12.2)	429	487	(58)	(11.9)
Other operating revenues	-	-	-	-	(16)	(7)	(9)	Large
Total	19,741	22,322	(2,581)	(11.6)%	\$ 596	\$ 683	\$ (87)	(12.7)%

CECONY's steam operating revenues decreased \$87 million in 2012 compared with 2011 due primarily to the lower fuel costs (\$62 million) and purchased power (\$23 million). Other steam operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Steam sales and delivery volumes decreased 11.6 percent in 2012 compared with 2011. After adjusting for variations, principally weather and billing days, steam sales and deliveries decreased 1.5 percent in 2012, reflecting lower average normalized use per customer.

CECONY's steam fuel costs decreased \$62 million in 2012 compared with 2011 due to lower unit costs (\$53 million) and sendout volumes (\$9 million). Steam purchased power costs decreased \$23 million in 2012 compared with 2011 due to a decrease in unit costs (\$13 million) and purchased volumes (\$10 million).

Steam operating income decreased \$39 million in 2012 compared with 2011. The decrease reflects primarily lower net revenues (\$2 million) and higher operations and maintenance expense (\$31 million, due primarily to higher pension expense (\$35 million)), taxes other than income taxes (\$5 million, principally property taxes) and depreciation and amortization (\$1 million).

Taxes Other Than Income Taxes

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

At over \$1.7 billion, taxes other than income taxes remain one of CECONY's largest operating expenses. The principal components of, and variations in, taxes other than income taxes were:

(millions of dollars)	2012	2011	Increase/ (Decrease)
Property taxes	\$ 1,351	\$ 1,320	\$ 31(a)
State and local taxes related to revenue receipts	318	318	-
Payroll taxes	66	68	(2)
Other taxes	12	10	2
Total	\$ 1,747(b)	\$ 1,716(b)	\$ 31

(a) Property taxes increased \$31 million reflecting primarily higher capital investments.

(b) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2012 and 2011 were \$2,185 million and \$2,175 million, respectively.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

Net Interest Expense

Net interest expense increased \$11 million in 2012 compared with 2011 due primarily to interest on regulatory liabilities and the issuance by CECONY in March 2012 of \$400 million of 4.2 percent 30-year debentures.

Income Taxes

Income taxes decreased \$29 million in 2012 compared with 2011 due primarily to higher deductions for injuries and damages payments in 2012.

Preferred Stock Dividend Requirements

Preferred stock dividend requirements decreased \$8 million in 2012 compared with 2011 due to the company's redemption, in May 2012, of all of its outstanding shares of \$5 Cumulative Preferred Stock and Cumulative Preferred Stock (\$100 par value).

O&R

(millions of dollars)	Twelve Months Ended December 31, 2012			Twelve Months Ended December 31, 2011			2012-2011 Variation

Total	5,731	5,789	(58)	(1.0)%	\$ 592	\$ 641	\$ (49)	(7.6)%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

O&R's electric operating revenues decreased \$49 million in 2012 compared with 2011 due primarily to lower purchased power costs (\$69 million), offset in part by the New York electric rate plan (\$12 million). O&R's New York electric delivery revenues are subject to a revenue decoupling mechanism, as a result of which delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R's electric sales in New Jersey and Pennsylvania are not subject to a decoupling mechanism, and as a result, changes in such volumes do impact revenues. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's electric rate plan. See Note B to the financial statements in Item 8.

Electric delivery volumes in O&R's service area decreased 1.0 percent in 2012 compared with 2011. After adjusting for weather and other variations, electric delivery volumes in O&R's service area increased 0.8 percent in 2012 compared with 2011.

Electric operating income increased \$2 million in 2012 compared with 2011. The increase reflects primarily higher net revenues (\$20 million), offset by higher operations and maintenance expense (\$9 million, due to higher pension and health care expense), taxes other than income taxes (\$6 million, principally property taxes) and depreciation and amortization (\$3 million). Most of the operating expenses attributable to major storms in 2012 and 2011 were deferred as a regulatory asset.

Gas

O&R's results of gas operations for the year ended December 31, 2012 compared with the year ended December 31, 2011 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2012	December 31, 2011	
Operating revenues	\$ 203	\$ 214	\$ (11)
Gas purchased for resale	69	87	(18)
Net revenues	134	127	7
Operations and maintenance	64	66	(2)
Depreciation and amortization	15	13	2
Taxes, other than income taxes	15	15	-
Gas operating income	\$ 40	\$ 33	\$ 7

O&R's gas sales and deliveries, excluding off-system sales, in 2012 compared with 2011 were:

Description	Thousands of dths Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2012	December 31, 2011			December 31, 2012	December 31, 2011		
Residential	6,291	7,024	(733)	(10.4)%	\$ 88	\$ 104	\$ (16)	(15.4)%
General	1,248	1,360	(112)	(8.2)	15	18	(3)	(16.7)

Other	793	864	(71)	(8.2)	-	-	-	-
Other gas revenues	-	-	-	-	20	16	4	25.0

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Total	23,901	25,364	(1,463)	(5.8)%	\$ 203	\$	214	\$ (11)	(5.1)%
--------------	---------------	---------------	----------------	---------------	---------------	-----------	------------	----------------	---------------

O&R's gas operating revenues decreased \$11 million in 2012 compared with 2011 due primarily to the decrease in gas purchased for resale in 2012 (\$18 million), offset in part by the gas rate plan.

Sales and transportation volumes for firm customers decreased 6.1 percent in 2012 compared with 2011. After adjusting for weather and other variations, total firm sales and transportation volumes increased 1.4 percent in 2012 compared with 2011.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

Gas operating income increased \$7 million in 2012 compared with 2011. The increase reflects primarily higher net revenues (\$7 million) and lower operations and maintenance costs (\$2 million), offset by higher depreciation and amortization (\$2 million).

Taxes Other Than Income Taxes

Taxes, other than income taxes, increased \$6 million in 2012 compared with 2011. The principal components of taxes, other than income taxes, were:

(millions of dollars)	2012	2011	Increase/ (Decrease)
Property taxes	\$ 41	\$ 35	\$ 6
State and local taxes related to revenue receipts	13	14	(1)
Payroll taxes	6	6	-
Other taxes	1	-	1
Total	\$ 61(a)	\$ 55(a)	\$ 6

(a) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2012 and 2011 were \$80 million and \$83 million, respectively.

Other Income (Deductions)

Other income (deductions) decreased \$2 million in 2012 compared with 2011.

Net Interest Expense

Net interest expense decreased \$4 million in 2012 compared with 2011 reflecting changes to accrued interest resulting from adjustments to prior year federal income tax returns.

Competitive Energy Businesses

The competitive energy businesses' results of operations for the year ended December 31, 2012 compared with the year ended December 31, 2011 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2012	December 31, 2011	
Operating revenues	\$ 1,213	\$ 1,617	\$ (404)
Purchased power	950	1,397	(447)
Gas purchased for resale	5	18	(13)
Net revenues	258	202	56
Operations and maintenance	107	128	(21)
Depreciation and amortization	8	7	1
Taxes, other than income taxes	18	21	(3)
Operating income	\$ 125	\$ 46	\$ 79

The competitive energy businesses' operating revenues decreased \$404 million in 2012 compared with 2011, due primarily to lower electric retail and wholesale revenues. Electric wholesale revenues decreased \$143 million in 2012 as compared with 2011, due to lower sales volumes (\$110 million) and unit prices (\$33 million). Electric retail revenues decreased \$257 million, due to lower sales volume (\$148 million) and unit prices (\$109 million). Net mark-to-market values increased \$90 million in 2012 as compared with 2011, of which \$70 million in gains are reflected in purchased power costs and \$20 million in gains are reflected in revenues. Other revenues decreased \$24 million in 2012 as compared with 2011 due primarily to lower energy services revenues (\$25 million) and other wholesale revenues (\$15 million), partially offset by higher solar revenues (\$14 million).

Purchased power costs decreased \$447 million in 2012 compared with 2011, due primarily to lower volumes (\$220 million), lower unit prices (\$157 million) and changes in mark-to-market values (\$70 million). Operating income increased \$79 million in 2012 compared with 2011 due primarily to net mark-to-market effects (\$90 million) and higher solar margins (\$14 million), offset by lower electric retail margins (\$22 million).

Other

For Con Edison, Other also includes inter-company eliminations relating to operating revenues and operating expenses.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS CONTINUED

Year Ended December 31, 2011 Compared with Year Ended December 31, 2010

The Companies' results of operations (which were discussed above under "Results of Operations - Summary") in 2011 compared with 2010 were:

<i>(millions of dollars)</i>	CECONY		O&R		Competitive Energy Businesses and Other(a)		Con Edison(b)

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Electric**

CECONY's results of electric operations for the year ended December 31, 2011 compared with the year ended December 31, 2010 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2011	December 31, 2010	
Operating revenues	\$ 8,228	\$ 8,376	\$ (148)
Purchased power	2,260	2,629	(369)
Fuel	199	256	(57)
Net revenues	5,769	5,491	278
Operations and maintenance	2,041	1,963	78
Depreciation and amortization	656	623	33
Taxes, other than income taxes	1,377	1,356	21
Electric operating income	\$ 1,695	\$ 1,549	\$ 146

CECONY's electric sales and deliveries, excluding off-system sales, in 2011 compared with 2010 were:

Description	Millions of kWhs Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2011	December 31, 2010			December 31, 2011	December 31, 2010		
Residential/Religious(a)	11,404	11,518	(114)	(1.0)%	\$ 2,918	\$ 2,977	\$ (59)	(2.0)%
Commercial/Industrial	11,148	12,559	(1,411)	(11.2)	2,304	2,557	(253)	(9.9)
Retail access customers	24,234	23,098	1,136	4.9	2,354	2,123	231	10.9
NYPA, Municipal Agency and other sales	11,040	11,518	(478)	(4.2)	592	550	42	7.6
Other operating revenues	-	-	-	-	60	169	(109)	(64.5)
Total	57,826	58,693	(867)	(1.5)%	\$ 8,228	\$ 8,376	\$ (148)	(1.8)%

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

CECONY's electric operating revenues decreased \$148 million in 2011 compared with 2010 due primarily to lower purchased power (\$369 million) and fuel costs (\$57 million), offset by higher revenues from the electric rate plan (\$278 million, which reflects, among other things, reconciliations of costs for municipal infrastructure support and capital expenditures (\$10 million)). CECONY's revenues from electric sales are subject to a revenue decoupling mechanism, as a result of which delivery revenues generally are not affected by changes in delivery volumes from levels assumed when rates were approved. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the revenue decoupling mechanism and other provisions of the company's rate plans. See Note B to the financial statements in Item 8.

Electric delivery volumes in CECONY's service area decreased 1.5 percent in 2011 compared with 2010. After adjusting for variations, principally weather and billing days, electric delivery volumes in CECONY's service area decreased 1.1 percent in 2011 compared with 2010.

CECONY's electric purchased power costs decreased \$369 million in 2011 compared with 2010 due to a decrease in unit costs (\$258 million) and purchased volumes (\$111 million). Electric fuel costs decreased \$57 million in 2011 compared with 2010 due to lower sendout volumes

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

from the company's electric generating facilities (\$39 million) and lower unit costs (\$18 million).

CECONY's electric operating income increased \$146 million in 2011 compared with 2010. The increase reflects primarily higher net revenues (\$278 million, due primarily to the electric rate plan). The higher net revenues were offset by higher operations and maintenance costs (\$78 million), due primarily to higher pension expense (\$99 million) and employees' health care costs (\$16 million), offset in part by lower regulatory assessments and fees (\$52 million). In addition, net revenues were offset by higher taxes other than income taxes (\$21 million, principally property taxes) and depreciation and amortization (\$33 million). Most of the operating expenses attributable to major storms in 2011 and 2010 were deferred as a regulatory asset. See Regulatory Assets and Liabilities in Note B to the financial statements.

CON EDISON ANNUAL REPORT 57

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Gas**

CECONY's results of gas operations for the year ended December 31, 2011 compared with the year ended December 31, 2010 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2011	December 31, 2010	
Operating revenues	\$ 1,521	\$ 1,541	\$ (20)

Generation plants	75,207	78,880	(3,673)	(4.7)	32	36	(4)	(11.1)
Other	21,956	20,786	1,170	5.6	52	51	1	2.0
Other operating revenues	-	-	-	-	(44)	(54)	10	18.5
Total	261,078	248,528	12,550	5.0%	\$ 1,521	\$ 1,541	\$ (20)	(1.3)%

(a) Includes 3,801 and 3,385 thousands of dths for 2011 and 2010, respectively, which are also reflected in firm transportation and other.

CECONY's gas operating revenues decreased \$20 million in 2011 compared with 2010 due primarily to a decrease in gas purchased for resale costs (\$56 million), offset in part by the gas rate plans (\$41 million). CECONY's revenues from gas sales are subject to a weather normalization clause and a revenue decoupling mechanism as a result of which delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. Other gas operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

CECONY's sales and transportation volumes for firm customers increased 3.1 percent in 2011 compared with 2010. After adjusting for variations, principally weather and billing days, firm gas sales and transportation volumes in the company's service area increased 2.1 percent in 2011.

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

CECONY's purchased gas cost decreased \$56 million in 2011 compared with 2010 due to lower unit costs (\$39 million) and sendout volumes (\$17 million).

CECONY's gas operating income decreased \$15 million in 2011 compared with 2010. The decrease reflects primarily higher taxes other than income taxes (\$23 million, principally property taxes), operations and maintenance expense (\$20 million, due primarily to higher pension expense (\$18 million)) and depreciation (\$8 million), offset by higher net revenues (\$36 million).

58 CON EDISON ANNUAL REPORT

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Steam**

CECONY's results of steam operations for the year ended December 31, 2011 compared with the year ended December 31, 2010 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2011	December 31, 2010	
Operating revenues	\$ 683	\$ 656	\$ 27
Purchased power	53	54	(1)
Fuel	213	202	11
Net revenues	417	400	17
Operations and maintenance	154	184	(30)
Depreciation and amortization	63	62	1
Taxes, other than income taxes	107	91	16
Steam operating income	\$ 93	\$ 63	\$ 30

CECONY's steam sales and deliveries in 2011 compared with 2010 were:

Description	Millions of Pounds Delivered				Revenues in Millions			
	Twelve Months Ended		Variation	Percent Variation	Twelve Months Ended		Variation	Percent Variation
	December 31, 2011	December 31, 2010			December 31, 2011	December 31, 2010		
General	519	515	4	0.8%	\$ 28	\$ 25	\$ 3	12.0%
Apartment house	5,779	5,748	31	0.5	175	158	17	10.8
Annual power	16,024	16,767	(743)	(4.4)	487	457	30	6.6
Other operating revenues	-	-	-	-	(7)	16	(23)	Large
Total	22,322	23,030	(708)	(3.1)%	\$ 683	\$ 656	\$ 27	4.1%

CECONY's steam operating revenues increased \$27 million in 2011 compared with 2010 due primarily to the net change in rates under the steam rate plan (\$21 million). Other steam operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's rate plans. See Note B to the financial statements in Item 8.

Steam sales and delivery volumes decreased 3.1 percent in 2011 compared with 2010. After adjusting for variations, principally weather and billing days, steam sales and deliveries decreased 2.8 percent in 2011, reflecting the impact of lower customer usage during the summer season.

CECONY's steam fuel costs increased \$11 million in 2011 compared with 2010 due to higher unit costs (\$26 million), offset by lower sendout volumes (\$15 million). Steam purchased power costs decreased \$1 million in 2011 compared with 2010 due to a decrease in unit costs (\$6 million), offset by an increase in purchased volumes (\$5 million).

Steam operating income increased \$30 million in 2011 compared with 2010. The increase reflects primarily higher net revenues (\$17 million) and lower operations and maintenance expense (\$30 million, due primarily to lower pension expense (\$17 million), production expense (\$8 million) and costs for injuries and damages (\$2 million)), offset by higher taxes other than income taxes (\$16 million, principally property taxes) and depreciation (\$1 million).

Taxes Other Than Income Taxes

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

At over \$1.7 billion, taxes other than income taxes remain one of CECONY's largest operating expenses. The principal components of, and variations in, taxes other than income taxes were:

(millions of dollars)	2011	2010	Increase/ (Decrease)
Property taxes	\$ 1,320	\$ 1,271	\$ 49(a)
State and local taxes related to revenue receipts	318	315	3
Payroll taxes	68	65	3
Other taxes	10	5	5
Total	\$ 1,716(b)	\$ 1,656(b)	\$ 60

(a) Property taxes increased \$49 million reflecting primarily higher capital investments.

(b) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2011 and 2010 were \$2,175 million and \$2,122 million, respectively.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED****Other Income (Deductions)**

Other income (deductions) decreased \$28 million in 2011 compared with 2010 due primarily to lower financing charges on changes in World Trade Center regulatory assets and liabilities (\$16 million) and lower allowance for equity funds used during construction (\$5 million). See Cash Flows from Operating Activities, above and Regulatory Assets and Liabilities in Note B to the financial statements in Item 8.

Net Interest Expense

Net interest expense decreased \$15 million in 2011 compared with 2010 due primarily to lower interest rates on long-term debt in 2011.

Income Taxes

Income taxes increased \$63 million in 2011 compared with 2010 due primarily to higher income in 2011.

O&R

(millions of dollars)	Twelve Months Ended December 31, 2011			Twelve Months Ended December 31, 2010			2011-2010 Variation
	Electric	Gas	2011 Total	Electric	Gas	2010 Total

(a) Residential/Religious generally includes single-family dwellings, individual apartments in multi-family dwellings, religious organizations and certain other not-for-profit organizations.

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED**

O&R's electric operating revenues decreased \$51 million in 2011 compared with 2010 due primarily to lower purchased power costs (\$68 million), offset in part by the New York electric rate plan (\$20 million). O&R's New York electric delivery revenues are subject to a revenue decoupling mechanism, as a result of which delivery revenues are generally not affected by changes in delivery volumes from levels assumed when rates were approved. O&R's electric sales in New Jersey and Pennsylvania are not subject to a decoupling mechanism, and as a result, changes in such volumes do impact revenues. Other electric operating revenues generally reflect changes in regulatory assets and liabilities in accordance with the company's electric rate plan. See Note B to the financial statements in Item 8.

Electric delivery volumes in O&R's service area decreased 0.7 percent in 2011 compared with 2010. After adjusting for weather and other variations, electric delivery volumes in O&R's service area increased 0.3 percent in 2011 compared with 2010.

Electric operating income increased \$7 million in 2011 compared with 2010. The increase reflects primarily higher net revenues (\$17 million), offset by higher taxes other than income taxes (\$5 million, principally property taxes), depreciation (\$3 million) and operations and maintenance expense (\$2 million). Most of the operating expenses attributable to major storms in 2011 and 2010 were deferred as a regulatory asset.

Gas

O&R's results of gas operations for the year ended December 31, 2011 compared with the year ended December 31, 2010 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2011	December 31, 2010	
Operating revenues	\$ 214	\$ 218	\$ (4)
Gas purchased for resale	87	99	(12)
Net revenues	127	119	8
Operations and maintenance	66	59	7
Depreciation and amortization	13	12	1
Taxes, other than income taxes	15	14	1
Gas operating income	\$ 33	\$ 34	\$ (1)

O&R's gas sales and deliveries, excluding off-system sales, in 2011 compared with 2010 were:

Description	Thousands of dths Delivered				Revenues in Millions			
	Twelve Months Ended		Percent Variation	Percent Variation	Twelve Months Ended		Percent Variation	Percent Variation
	December 31, 2011	December 31, 2010			December 31, 2011	December 31, 2010

Other	864	840	24	2.9	-	-	-	-
Other gas revenues	-	-	-	-	16	13	3	23.1
Total	25,364	25,492	(128)	(0.5)%	\$ 214	\$ 218	(\$ 4)	(1.8)%

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

O&R's gas operating revenues decreased \$4 million in 2011 compared with 2010 due primarily to the decrease in gas purchased for resale in 2011 (\$12 million), offset in part by the gas rate plan.

Sales and transportation volumes for firm customers decreased 1.3 percent in 2011 compared with 2010. After adjusting for weather and other variations, total firm sales and transportation volumes decreased 1.8 percent in 2011 compared with 2010. O&R's New York revenues from gas sales are subject to a weather normalization clause that moderates, but does not eliminate, the effect of weather-related changes on net income.

CON EDISON ANNUAL REPORT 61

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - CONTINUED

Gas operating income decreased \$1 million in 2011 compared with 2010. The decrease reflects primarily higher operations and maintenance costs (\$7 million, due primarily to higher pension expense (\$4 million)), taxes other than income taxes (\$1 million, principally property taxes) and depreciation (\$1 million), offset by higher net revenues (\$8 million).

Taxes Other Than Income Taxes

Taxes, other than income taxes, increased \$6 million in 2011 compared with 2010. The principal components of taxes, other than income taxes, were:

(millions of dollars)	2011	2010	Increase/ (Decrease)
Property taxes	\$ 35	\$ 29	\$ 6
State and local taxes related to revenue receipts	14	14	-
Payroll taxes	6	6	-
Total	\$ 55(a)	\$ 49(a)	\$ 6

(a) Including sales tax on customers' bills, total taxes other than income taxes, billed to customers in 2011 and 2010 were \$83 million and \$78 million, respectively.

Other Income (Deductions)

Other income (deductions) increased \$2 million in 2011 compared with 2010.

Net Interest Expense

Net interest expense decreased \$1 million in 2011 compared with 2010.

Income Taxes

Income taxes increased \$5 million in 2011 compared with 2010 due primarily to higher income in 2011.

Competitive Energy Businesses

The competitive energy businesses' results of operations for the year ended December 31, 2011 compared with the year ended December 31, 2010 is as follows:

(millions of dollars)	Twelve Months Ended		Variation
	December 31, 2011	December 31, 2010	
Operating revenues	\$ 1,617	\$ 1,883	\$ (266)
Purchased power	1,397	1,627	(230)
Gas purchased for resale	18	9	9

Edgar Filing: CONSOLIDATED EDISON CO OF NEW YORK INC - Form 10-K

Net revenues	202	247	(45)
Operations and maintenance	128	122	6
Depreciation and amortization	7	9	(2)
Taxes, other than income taxes	21	18	3
Operating income	\$ 46	\$ 98	\$ (52)

The competitive energy businesses' operating revenues decreased \$266 million in 2011 compared with 2010, due primarily to lower electric retail and wholesale revenues. Electric wholesale revenues decreased \$155 million in 2011 as compared with 2010, due to lower sales volumes (\$136 million) and unit prices (\$19 million). Electric retail revenues decreased \$122 million, due to lower per unit prices (\$96 million) and sales volume (\$26 million). Gross margins on electric retail revenues decreased due primarily to lower volumes and unit gross margins. Net mark-to-market values decreased \$42 million in 2011 as compared with 2010, of which \$44 million in losses are reflected in purchased power costs and \$2 million in gains are reflected in revenues. Other revenues increased \$9 million in 2011 as compared with 2010 due primarily to higher other wholesale revenues.

Purchased power costs decreased \$230 million in 2011 compared with 2010, due primarily to lower purchased power costs of \$274 million and changes in mark-to-market values of \$44 million. Purchased power costs decreased \$274 million due to lower unit prices (\$145 million) and volumes (\$129 million). Operating income decreased \$52 million in 2011 compared with 2010 due primarily to net mark-to-market losses and lower electric retail margins.

Other

For Con Edison, Other also includes inter-company eliminations relating to operating revenues and operating expenses.

Report of Management on Internal Control Over Financial Reporting

Management of Consolidated Edison, Inc. and its subsidiaries (the Company) is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable, but not absolute, assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of the effectiveness of controls to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management of the Company assessed the effectiveness of internal control over financial reporting as of December 31, 2012, using the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework*. Based on that assessment, management has concluded that the Company had effective internal control over financial reporting as of December 31, 2012.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2012, has been audited by PricewaterhouseCoopers LLP, Con Edison's independent registered public accounting firm, as stated in their report which appears on the following page of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Consolidated Edison, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Consolidated Edison, Inc. and its subsidiaries (the Company) at December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
