The reverse repurchase agreement matures on demand. Interest rate resets daily and the rate shown is the rate in effect on December 31, 2013

* Interest payment due from counterparty.

** Principal amount less than 500.

- (a) Position, or a portion thereof, has been segregated to collateralize reverse repurchase agreements. The market value of the collateral amounted to \$134,496,468.
- (b) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2013, the aggregate market value of these securities amounted to \$545,724,176 or 42.5% of net assets.
- (c) Pay-In-Kind Payments (PIK).
- (d) Security is in default and is non-income producing.
- (e) Illiquid security.
- (f) Defaulted.
- (g) Fair valued by the Adviser.
- (h) Non-income producing security.
- (i) Floating Rate Security. Stated interest rate was in effect at December 31, 2013.
- (j) Variable rate coupon, rate shown as of December 31, 2013.
- (k) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities, which represent 1.10% of net assets as of December 31, 2013, are considered illiquid and restricted.

- (i) IO - Interest Only
- (m) Position, or a portion thereof, has been segregated to collateralize OTC derivatives outstanding. The aggregate market value of these securities amounted to \$1,565,393.
- (n) Restricted and illiquid security.
- (o) One contract relates to 100 shares.
- (p) Investment in affiliated money market mutual fund. The rate shown represents the 7-day yield as of period end.
- (q) As of December 31, 2013, the cost basis of investment securities owned was substantially identical for both book and tax purposes. Gross unrealized appreciation of investments was \$109,191,359 and gross unrealized depreciation of investments was \$(26,738,144), resulting in net unrealized appreciation of \$82,453,215.

The fund currently owns investments collateralized by subprime mortgage loans. Subprime loans are offered to homeowners who do not have a history of debt or who have had problems meeting their debt obligations. Because repayment is less certain, subprime borrowers pay a higher rate of interest than prime borrowers. As of December 31, 2013, the fund's total exposure to subprime investments was 7.36% of net assets. These investments are valued in accordance with the fund's Valuation Policies (see Note A for additional details).

AllianceBernstein Global High Income Fund

December 31, 2013 (unaudited)

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability (including those valued based on their market values). Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 - quoted prices in active markets for identical investments

Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The fair value of debt instruments, such as bonds, and over-the-counter derivatives is generally based on market price quotations, recently executed market transactions (where observable) or industry recognized modeling techniques and are generally classified as Level 2. Pricing vendor inputs to Level 2 valuations may include quoted prices for similar investments in active markets, interest rates, coupon rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which is then discounted to calculate fair values. If these inputs are unobservable and significant to the fair value, these investments will be classified as Level 3. In addition, non-agency rated investments are classified as Level 3.

Where readily available market prices or relevant bid prices are not available for certain equity investments, such investments may be valued based on similar publicly traded investments, movements in relevant indices since last available prices or based upon underlying company fundamentals and comparable company data (such as multiples to earnings or other multiples to equity). Where an investment is valued using an observable input, by pricing vendors, such as another publicly traded security, the investment will be classified as Level 2. If management determines that an adjustment is appropriate based on restrictions on resale, illiquidity or uncertainty, and such adjustment is a significant component of the valuation, the investment will be classified as Level 3. An investment will also be classified as Level 3 where management uses company fundamentals and other significant inputs to determine the valuation.

Options and warrants are valued using market-based inputs to models, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency, where such inputs and models are available. Alternatively the values may be obtained through unobservable management determined inputs and/or management's proprietary models. Where models are used, the selection of a particular model to value an option or a warrant depends upon the contractual terms of, and specific risks inherent in, the option or warrant as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, measures of volatility and correlations of such inputs. Exchange traded options will be classified as Level 2. For options or warrants that do not trade on exchange but trade in liquid markets, inputs can generally be verified and model selection does not involve significant management judgment. Options and warrants are classified within Level 2 on the fair value hierarchy when all of the significant inputs can be corroborated to market evidence. Otherwise such instruments are classified as Level 3.

Valuations of mortgage-backed or other asset-backed securities, by pricing vendors, are based on both proprietary and industry recognized models and discounted cash flow techniques. Significant inputs to the valuation of these instruments are value of the collateral, the rates and timing of delinquencies, the rates and timing of prepayments, and default and loss expectations, which are driven in part by housing prices for residential mortgages. Significant inputs are determined based on relative value analyses, which incorporate comparisons to instruments with similar collateral and risk profiles, including relevant indices. Mortgage and asset-backed securities for which management has collected current observable data through brokers or pricing services are generally categorized within Level 2. Those investments for which current data has not been provided are classified as Level 3.

Other fixed income investments, including non-U.S. government and corporate debt, are generally valued using quoted market prices, if available, which are typically impacted by current interest rates, maturity dates and any perceived credit risk of the issuer. Additionally, in the absence of quoted market prices, these inputs are used by pricing vendors to derive a valuation based upon industry or proprietary models which incorporate issuer specific data with relevant yield/spread comparisons with more widely quoted bonds with similar key characteristics. Those investments for which there are observable inputs are classified as Level 2. Where the inputs are not observable, the investments are classified as Level 3.

Edgar Filing: ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND INC - Form N-Q

Bank loan prices are provided by third party pricing services and consist of a composite of the quotes received by the vendor into a consensus price. Bank loans are classified as Level 3, as significant input used in the fair value measurement of these instruments is the market quotes that are received by the vendor and these inputs are not observable.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of December 31, 2013:

Total^	\$ 17,333,974	\$ 1,195,199,354	\$ 211,112,011	\$ 1,423,645,339

The Fund held securities with zero market value at period end.

* Other financial instruments are derivative instruments, such as futures, forwards and swaps, which are valued at the unrealized appreciation/depreciation on the instrument.

^ There were de minimis transfers under 1% of net assets between Level 1 and Level 2 during the reporting period.

Edgar Filing: ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND INC - Form N-Q

The Fund recognizes all transfers between levels of the fair value hierarchy assuming the financial instruments were transferred at the beginning of the reporting period.

Edgar Filing: ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND INC - Form N-Q

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

*Earnings Before Interest, Taxes, Depreciation and Amortization

The Adviser has established a Valuation Committee (the Committee) which is responsible for overseeing the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee's responsibilities include: 1) fair value and liquidity determinations (and oversight of any third parties to whom any responsibility for fair value and liquidity determinations is delegated), and 2) regular monitoring of the Adviser's pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

The Committee is also responsible for monitoring the implementation of the pricing policies by the Adviser's Pricing Group (the Pricing Group) and a third party which performs certain pricing functions in accordance with the pricing policies. The Pricing Group is responsible for the oversight of the third party on a day-to-day basis. The Committee and the Pricing Group perform a series of activities to provide reasonable assurance of the accuracy of prices including: 1) periodic vendor due diligence meetings, review of methodologies, new developments, and process at vendors, 2) daily comparisons of security valuation versus prior day for all securities that exceeded established thresholds, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by senior management and the Committee.

In addition, several processes outside of the pricing process are used to monitor valuation issues including: 1) performance and performance attribution reports are monitored for anomalous impacts based upon benchmark performance, and 2) portfolio managers review all portfolios for performance and analytics (which are generated using the Adviser's prices).

ITEM 2. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no significant changes in the registrant's internal control over financial reporting that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

ITEM 3. EXHIBITS.

The following exhibits are attached to this Form N-Q:

EXHIBIT NO.	DESCRIPTION OF EXHIBIT
3 (a) (1)	Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
3 (a) (2)	Certification of Principal Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
