Peoples Financial Services Corp.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

1. Summary of significant accounting policies:

Nature of operations:

Peoples Financial Services Corp., a bank holding company incorporated under the laws of Pennsylvania, provides a full range of financial services through its wholly-owned subsidiary, Peoples Security Bank and Trust Company (Peoples Bank), including its subsidiaries, Peoples Advisors, LLC and Penseco Realty, Inc. (collectively, the Company or Peoples). On November 30, 2013, Penseco Financial Services Corporation, a financial holding company incorporated under the laws of Pennsylvania (Penseco), merged with and into Peoples Financial Services Corp., with Peoples Financial Services Corp. being the surviving corporation (the Merger), pursuant to an Agreement and Plan of Merger dated June 28, 2013 (the Merger Agreement). In connection with the Merger, on December 1, 2013, Penseco s former banking subsidiary, Penn Security Bank and Trust Company, merged with and into Peoples Neighborhood Bank (the Bank Merger), and the resulting institution adopted the name Peoples Security Bank and Trust Company. The Company services its retail and commercial customers through twenty-six full-service community banking offices located within the Lackawanna, Luzerne, Monroe, Susquehanna, Wayne and Wyoming Counties of Northeastern Pennsylvania and Broome County of New York.

Basis of presentation:

The aforementioned merger between the Company and Penseco was accounted for as a reverse acquisition whereby Penseco was treated as the acquirer for accounting and reporting purposes. As a result, the historical financial information included in the Company s consolidated financial statements and related notes as reported in this Form 10-Q is that of Penseco. The number of shares issued and outstanding and the amount of common stock and capital surplus have been retroactively adjusted in 2013 to reflect the equivalent number of shares issued by the Company in the merger.

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10-01 of Regulation S-X. In the opinion of management, all normal recurring adjustments necessary for a fair presentation of the financial position and results of operations for the periods presented have been included. All significant intercompany balances and transactions have been eliminated in consolidation. Prior-period amounts are reclassified when necessary to conform to the current year s presentation. These reclassifications did not have any effect on the operating results or financial position of the Company. Certain disclosures related to impaired and nonaccrual loans have been revised for December 31, 2013. Such revisions were not material and had no effect on the operating results or financial position of the Company. The operating results and financial position of the Company for the three months ended and as of March 31, 2014, are not necessarily indicative of the results of operations and financial position that may be expected in the future.

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates that are particularly susceptible to material change in the near term

relate to the determination of the allowance for loan losses, fair value of financial instruments, the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, the valuation of deferred tax assets, determination of other-than-temporary impairment losses on securities and impairment of goodwill. Actual results could differ from those estimates. For additional information and disclosures required under GAAP, reference is made to the Company's Annual Report on Form 10-K for the period ended December 31, 2013.

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of March 31, 2014, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

Peoples Financial Services Corp.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

Recent accounting standards:

In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-04, Receivables Troubled Debt Restructurings by Creditors (Subtopic 310-40) Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The amendments are intended to clarify when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate recognized. These amendments clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: (i) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure; or (ii) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additional disclosures are required. The amendments are effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. The adoption of ASU 2014-04 is not expected to have a material effect on the operating results or financial position of the Company.

In July 2013, the FASB issued ASU No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This amendment provides that an unrecognized tax benefit, or a portion thereof, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except to the extent that a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date to settle any additional income taxes that would result from disallowance of a tax position, or the tax law does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, then the unrecognized tax benefit should be presented as a liability. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. The adoption of this ASU did not have a material effect on the operating results or financial position of the Company.

Table of Contents**Peoples Financial Services Corp.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Dollars in thousands, except per share data)****2. Other comprehensive income (loss):**

The components of other comprehensive income (loss) and their related tax effects are reported in the Consolidated Statements of Income and Comprehensive Income. The accumulated other comprehensive loss included in the Consolidated Balance Sheets relates to net unrealized gains and losses on investment securities available-for-sale and benefit plan adjustments.

The components of accumulated other comprehensive income included in stockholders' equity at March 31, 2014 and December 31, 2013 is as follows:

	March 31, 2014	December 31, 2013
Net unrealized gain on investment securities available-for-sale	\$ 5,204	\$ 2,810
Related income taxes	(1,822)	(984)
Net of income taxes	3,382	1,826
Benefit plan adjustments	(3,883)	(3,883)
Related income taxes	1,359	1,359
Net of income taxes	(2,524)	(2,524)
Accumulated other comprehensive loss	\$ 858	\$ (698)

Other comprehensive income (loss) and related tax effects for the three months ended March 31, 2014 and 2013 is as follows:

Three months ended March 31	2014	2013
Net gain on the sale of investment securities available-for-sale (1)		\$ (101)
Unrealized gain (loss) on investment securities available-for-sale	\$ 2,394	(476)
Other comprehensive income (loss) gain before taxes	2,394	(577)

Edgar Filing: PEOPLES FINANCIAL SERVICES CORP. - Form 10-Q

Income taxes	838	(196)
Other comprehensive income (loss)	\$ 1,556	\$ (381)

- (1) Represents amounts reclassified out of accumulated comprehensive income and included in gains on sale of investment securities on the consolidated statements of income.

Table of Contents**Peoples Financial Services Corp.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Dollars in thousands, except per share data)****3. Earnings per share:**

Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding stock options, and are determined using the treasury stock method.

For the three months ended March 31	2014		2013	
	Basic	Diluted	Basic	Diluted
Net Income (Numerator)	\$ 4,698	\$ 4,698	\$ 2,521	\$ 2,521
Average common shares outstanding (Denominator)	7,550,253	7,580,480	4,467,261	4,467,261
Earnings per share	\$ 0.62	\$ 0.62	\$ 0.56	\$ 0.56

Mortgage-backed securities	9,236	9,722
Total	\$ 16,607	\$ 16,597

Securities with a carrying value of \$205,549 and \$202,407 at March 31, 2014 and December 31, 2013, respectively, were pledged to secure public deposits and repurchase agreements as required or permitted by law.

Securities and short-term investment activities are conducted with a diverse group of government entities, corporations and state and local municipalities. The counterparty's creditworthiness and type of collateral is evaluated on a case-by-case basis. At March 31, 2014 and December 31, 2013, there were no significant concentrations of credit risk from any one issuer, with the exception of U.S. Government agencies and sponsored enterprises, that exceeded 10.0 percent of stockholders' equity.

The fair value and gross unrealized losses of investment securities with unrealized losses for which an other-than-temporary impairment (OTTI) has not been recognized at March 31, 2014 and December 31, 2013, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position, are summarized as follows:

	Less Than 12 Months	12 Months or More	Total
March 31, 2014

4. Investment securities (continued):

	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2013						
U.S. Government agencies	\$ 204	\$ 3			\$ 204	\$ 3
U.S. Government-sponsored enterprises	66,391	468	\$ 3,114	\$ 4	69,505	472
State and municipals:						
Taxable	10,621	126			10,621	126
Tax-exempt	36,471	1,157			36,471	1,157
Corporate debt securities	1,095	78			1,095	78
Mortgage-backed securities:						
U.S. Government agencies	12,774	63			12,774	63
U.S. Government-sponsored enterprises	5,624	40			5,624	40
Common equity securities	137	10			137	10
Total	\$ 133,317	\$ 1,945	\$ 3,114	\$ 4	\$ 136,431	\$ 1,949

The Company had 114 investment securities, consisting of 54 tax-exempt state and municipal obligations, 6 taxable state and municipal obligations, 32 U.S. Government-sponsored enterprise securities, 19 mortgage-backed securities, one corporate debt security, one U.S. Government agency security and one common equity security that were in unrealized loss positions at March 31, 2014. Of these securities, one U.S. Government-sponsored enterprise security and one tax-exempt state and municipal security were in a continuous unrealized loss position for twelve months or more. The unrealized loss on the common equity securities was a direct reflection of reductions from historical levels in stock values in the financial industry sector, as a whole, and was not a result of credit or other issues that would cause the Company to realize an OTTI charge. Management does not consider the unrealized losses on the debt securities, as a result of changes in interest rates, to be OTTI based on historical evidence that indicates the cost of these securities is recoverable within a reasonable period of time in relation to normal cyclical changes in the market rates of interest. Moreover, because there has been no material change in the credit quality of the issuers or other events or circumstances that may cause a significant adverse impact on the fair value of these securities, and management does not intend to sell these securities and it is unlikely that the Company will be required to sell these securities before recovery of their amortized cost basis, which may be maturity, the Company does not consider the unrealized losses to be OTTI at March 31, 2014. There was no OTTI recognized for the three months ended March 31, 2014 and 2013.

The Company had 153 investment securities, consisting of 79 tax-exempt state and municipal obligations, 16 taxable state and municipal obligations, 39 U.S. Government-sponsored enterprise securities, 15 mortgage-backed securities,

one corporate debt security, one U.S. Government agency and two common equity securities that were in unrealized loss positions at December 31, 2013. Of these securities, one U.S. Government-sponsored enterprise security was in continuous unrealized loss position for twelve months or more.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

5. Loans, net and allowance for loan losses (continued):

The Company segments loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. Loans are individually analyzed for credit risk by classifying them within the Company's internal risk rating system. The Company's risk rating classifications are defined as follows:

Pass- A loan to borrowers with acceptable credit quality and risk that is not adversely classified as Substandard, Doubtful, Loss nor designated as Special Mention.

Special Mention- A loan that has potential weaknesses that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in the institution's credit position at some future date. Special Mention loans are not adversely classified since they do not expose the Company to sufficient risk to warrant adverse classification.

Substandard- A loan that is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected.

Doubtful A loan classified as Doubtful has all the weaknesses inherent in one classified Substandard with the added characteristic that the weaknesses make the collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss-A loan classified as Loss is considered uncollectible and of such little value that its continuance as bankable loans is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future.

The following tables present the major classification of loans summarized by the aggregate pass rating and the classified ratings of special mention, substandard and doubtful within the Company's internal risk rating system at March 31, 2014 and December 31, 2013:

March 31, 2014:	Pass	Special Mention	Substandard	Doubtful	Total

Included in the commercial loan and commercial real estate categories are troubled debt restructurings that are classified as impaired. Trouble debt restructurings totaled \$1,924 at March 31, 2014, \$2,487 at December 31, 2013 and \$349 at March 31, 2013.

Troubled debt restructured loans are loans with original terms, interest rate, or both, that have been modified as a result of a deterioration in the borrower's financial condition and a concession has been granted that the Company would not otherwise consider. Unless on nonaccrual, interest income on these loans is recognized when earned, using the interest method. The Company offers a variety of modifications to borrowers that would be considered concessions. The modification categories offered can generally fall within the following categories:

Rate Modification A modification in which the interest rate is changed to a below market rate.

Term Modification A modification in which the maturity date, timing of payments or frequency of payments is changed.

Interest Only Modification A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

Combination Modification Any other type of modification, including the use of multiple categories above.

Table of Contents**Peoples Financial Services Corp.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Dollars in thousands, except per share data)****5. Loans, net and allowance for loan losses (continued):**

There were no loans modified as troubled debt restructurings for the three months ended March 31, 2014 and 2013.

6. Other assets:

The components of other assets at March 31, 2014, and December 31, 2013 are summarized as follows:

	March 31, 2014	December 31, 2013
Other real estate owned	\$ 678	\$ 648
Investment in residential housing program	3,152	3,211
Mortgage servicing rights	833	880
Bank owned life insurance	29,449	29,198
Restricted equity securities	3,858	4,102
Other assets	11,360	9,949
Total	\$ 49,330	\$ 47,988

7. Fair value estimates:

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosure under GAAP. Fair value estimates are calculated without attempting to estimate the value of anticipated future business and the value of certain assets and liabilities that are not considered financial. Accordingly, such assets and liabilities are excluded from disclosure requirements.

In accordance with FASB ASC 820, Fair Value Measurements and Disclosures, fair value is the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets. In many cases, these values cannot be realized in immediate settlement of the instrument.

Current fair value guidance provides a consistent definition of fair value, which focuses on exit price in an orderly transaction that is not a forced liquidation or distressed sale between participants at the measurement date under

current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

Peoples Financial Services Corp.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

7. Fair value estimates (continued):

In accordance with GAAP, the Company groups its assets and liabilities generally measured at fair value into three levels based on market information or other fair value estimates in which the assets and liabilities are traded or valued and the reliability of the assumptions used to determine fair value. These levels include:

Level 1: Unadjusted quoted prices of identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

An asset's or liability's placement in the fair value hierarchy is based on the lowest level of input that is significant to the fair value estimate.

The following methods and assumptions were used by the Company to calculate fair values and related carrying amounts of financial instruments:

Cash and cash equivalents: The carrying values of cash and cash equivalents as reported on the balance sheet approximate fair value.

Investment securities: The fair values of marketable equity securities are based on quoted market prices from active exchange markets. The fair values of debt securities are based on pricing from a matrix pricing model.

Loans held for sale: The fair values of loans held for sale are based upon current delivery prices in the secondary mortgage market.

Net loans: For adjustable-rate loans that re-price frequently and with no significant credit risk, fair values are based on carrying values. The fair values of other non-impaired loans are estimated using discounted cash flow analysis, using interest rates currently offered in the market for loans with similar terms to borrowers of similar credit risk. Fair values for impaired loans are estimated using discounted cash flow analysis determined by the loan review function or

underlying collateral values, where applicable.

In conjunction with the Merger, the loans purchased were recorded at their acquisition date fair value. In order to record the loans at fair value, management made three different types of fair value adjustments. A market rate adjustment was made to adjust for the movement in market interest rates, irrespective of credit adjustments, compared to the stated rates of the acquired loans. A credit adjustment was made on pools of homogeneous loans representing the changes in credit quality of the underlying borrowers from the loan inception to the acquisition date. The credit adjustment on distressed loans represents the portion of the loan balance that has been deemed uncollectible based on the management's expectations of future cash flows for each respective loan.

Mortgage servicing rights: To determine the fair value, the Company estimates the present value of future cash flows incorporating assumptions such as cost of servicing, discount rates, prepayment speeds and default rates.

Accrued interest receivable: The carrying value of accrued interest receivable as reported on the balance sheet approximates fair value.

Restricted equity securities: The carrying values of restricted equity securities approximate fair value, due to the lack of marketability for these securities.

Table of Contents

Peoples Financial Services Corp.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

7. Fair value estimates (continued):

Deposits: The fair values of noninterest-bearing deposits and savings, NOW and money market accounts are the amounts payable on demand at the reporting date. The fair value estimates do not include the benefit that results from such low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market. The carrying values of adjustable-rate, fixed-term time deposits approximate their fair values at the reporting date. For fixed-rate time deposits, the present value of future cash flows is used to estimate fair values. The discount rates used are the current rates offered for time deposits with similar maturities.

The fair value assigned to the core deposit intangible asset represents the future economic benefit of the potential cost savings from acquiring core deposits in the Merger compared to the cost of obtaining alternative funding such as brokered deposits from market sources. Management utilized an income valuation approach to present value the estimated future cash savings in order to determine the fair value of the intangible asset.

Short-term borrowings: The carrying values of short-term borrowings approximate fair value.

Long-term debt: The fair value of fixed-rate long-term debt is based on the present value of future cash flows. The discount rate used is the current rate offered for long-term debt with the same maturity.

Accrued interest payable: The carrying value of accrued interest payable as reported on the balance sheet approximates fair value.

Off-balance sheet financial instruments:

The majority of commitments to extend credit, unused portions of lines of credit and standby letters of credit carry current market interest rates if converted to loans. Because such commitments are generally unassignable to either the Company or the borrower, they only have value to the Company and the borrower. None of the commitments are subject to undue credit risk. The estimated fair values of off-balance sheet financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of off-balance sheet financial instruments was not material at March 31, 2014 and December 31, 2013.

Assets and liabilities measured at fair value on a recurring basis at March 31, 2014 December 31, 2013 are summarized as follows:

Fair Value Measurement Using

March 31, 2014	Amount	Quoted Prices in		
		Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
U.S. Government-agencies	\$ 203		\$ 203

(Dollars in thousands, except per share data)

7. Fair value estimates (continued):

	Amount	Fair Value Measurement Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2013				
U.S. Government-agencies	\$ 204		\$ 204	
U.S. Government-sponsored enterprises	113,045		113,045	
State and Municipals:				
Taxable	16,698		16,698	
Tax-exempt	98,081		98,081	
Corporate debt securities	4,387		4,387	
Mortgage-backed securities:				
U.S. Government agencies	20,229		20,229	
U.S. Government-sponsored enterprises	45,974		45,974	
Common equity securities	1,097	\$ 1,097		
Total	\$ 299,715	\$ 1,097	\$ 298,618	

Assets and liabilities measured at fair value on a nonrecurring basis at March 31, 2014 and December 31, 2013 are summarized as follows:

	Amount	Fair Value Measurement Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
March 31, 2014				
Impaired loans	\$ 1,561			\$ 1,561
December 31, 2013				
	Amount	Quoted Prices in Active Markets for	Significant Other Observable	Significant Unobservable

	Identical Assets (Level 1)	Inputs (Level 2)	Inputs (Level 3)
Impaired loans	\$ 2,354		\$ 2,354
Other real estate owned	\$ 437		\$ 437

Fair values of impaired loans are based on the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent.

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Company has utilized Level 3 inputs to determine fair value:

**Quantitative Information about Level 3 Fair Value Measurements
Range**

March 31, 2014	Fair Value Estimate	Valuation Techniques	Unobservable Input	(Weighted Average) Range
Impaired loans	\$ 1,561	Appraisal of collateral	Appraisal adjustments	14.0% to 33.7% (18.5%)
			Liquidation expenses	3.0% to 6.0% (4.7%)

Table of Contents**Peoples Financial Services Corp.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Dollars in thousands, except per share data)

7. Fair value estimates (continued):**Quantitative Information about Level 3 Fair Value Measurements**

December 31, 2013	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Impaired loans	\$ 2,354	Appraisal of collateral	Appraisal adjustments	11.0% to 33.7% (17.3%)
			Liquidation expenses	3.0% to 6.0% (5.0%)
Other real estate owned	\$ 437	Appraisal of collateral	Appraisal adjustments	11.0% to 33.7% (17.3%)
			Liquidation expenses	3.0% to 6.0% (5.0%)

Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 Inputs which are not identifiable.

Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

The carrying and fair values of the Company's financial instruments at March 31, 2014 and December 31, 2013 and their placement within the fair value hierarchy are as follows:

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited consolidated interim financial statements contained in Part I, Item 1 of this report, and with our audited consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations presented in our Annual Report on Form 10-K for the year ended December 31, 2013.

Cautionary Note Regarding Forward-Looking Statements:

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, which are subject to risks and uncertainties. These statements are based on assumptions and may describe future plans, strategies and expectations of Peoples Financial Services Corp. and its direct and indirect subsidiaries. These forward-looking statements are generally identified by use of the words believe, expect, intend, anticipate, estimate, project or similar expressions. All statements in this report, other than statements of historical facts, are forward-looking statements.

Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Important factors that could cause our actual results to differ materially from those in the forward-looking statements include, but are not limited to: our ability to timely and efficiently integrate the operations of the former Pensco Financial Services Corporation, and to achieve the intended benefits of the merger with Pensco Financial Services Corporation; changes in interest rates; economic conditions, particularly in the our market area; legislative and regulatory changes and the ability to comply with the significant laws and regulations governing the banking and financial services business; monetary and fiscal policies of the U.S. government, including policies of the U.S. Department of Treasury and the Federal Reserve System; credit risk associated with lending activities and changes in the quality and composition of our loan and investment portfolios; demand for loan and other products; deposit flows; competition; changes in the values of real estate and other collateral securing the loan portfolio, particularly in our market area; changes in relevant accounting principles and guidelines; and inability of third party service providers to perform. Additional factors that may affect our results are discussed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013, and in and reports we file with the Securities and Exchange Commission from time to time.

These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, Peoples Financial Services Corp. does not undertake, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

Notes to the Consolidated Financial Statements referred to in the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) are incorporated by reference into the MD&A. Certain prior period amounts have been reclassified to conform with the current year's presentation.

Critical Accounting Policies:

Disclosure of our significant accounting policies are included in Note 1 to the consolidated financial statements of the Annual Report on Form 10-K for the year ended December 31, 2013. Some of these policies are particularly sensitive requiring significant judgments, estimates and assumptions.

Operating Environment:

Fiscal policy initiatives enacted by the Federal Open Market Committee (FOMC) during the first quarter of 2014 were limited. Economic indicators throughout the latter part of 2013 and into 2014 pointed to an improving economy. However, the tough winter experienced throughout much of the country caused the gross domestic product (GDP), the value of all goods and services produced in the Nation, to slow in the first quarter of 2014 to a seasonally adjusted growth rate of 0.1%, the weakest level since the end of 2012. Despite this anemic growth rate, the FOMC indicated that the economy will improve during the second quarter of 2014 based on recent employment additions by private

Table of Contents**Peoples Financial Services Corp.****MANAGEMENT'S DISCUSSION AND ANALYSIS****(Dollars in thousands, except per share data)**

employers. Moreover, consumer spending rose at a healthy pace of 3.0% annualized during the first quarter of 2014. With regard to inflation, rising food and energy costs caused the price index for gross domestic purchases, a measure of prices paid by United States residents, to increase to 1.5% for the most recent reporting month of March 2014, below the 2.0% rate targeted by the Federal Reserve. Rising food and energy prices continue to squeeze consumer wallets and if sustained, may counteract the impact of job gains and increased consumer spending and weigh on GDP readings going forward.

Review of Financial Position:

Total assets grew \$30,040 or at an annual rate of 7.2% to \$1,718,261 at March 31, 2014, from \$1,688,221 at December 31, 2013. For the three months ended March 31, 2014, total assets averaged \$1,695,070, including average assets acquired from the merger totaling \$766,445, an increase of \$777,117 or 84.7%, from \$917,953 for the same period of 2013. The balance sheet growth during 2014 was driven by increases in total deposits of \$24,559, an annual growth rate of 7.2%. Interest-bearing deposits increased \$22,441, while noninterest-bearing deposits grew \$2,118. Loans, net increased to \$1,177,122 at March 31, 2014, compared to \$1,176,617 at December 31, 2013. Total stockholders' equity increased \$3,773 or at an annual rate of 6.4%, from \$238,792 at year-end 2013 to \$242,565 at March 31, 2014.

Investment Portfolio:

The majority of the investment portfolio is held as available-for-sale, which allows for greater flexibility in using the investment portfolio for liquidity purposes by allowing securities to be sold when market opportunities occur. Investment securities available-for-sale totaled \$302,226 at March 31, 2014, an increase of \$2,511, or 0.8% from \$299,715 at December 31, 2013. The increase resulted primarily from the purchase of collateralized mortgage obligations net of payments received from mortgage backed holdings. Investment securities held-to-maturity totaled \$16,607 at March 31, 2014, a decrease of \$688, or 4.0% from \$17,295 at December 31, 2013 due to payments received from mortgage backed holdings.

For the three months ended March 31, 2014, the investment portfolio averaged \$319,798, an increase of \$144,452 or 82.4% compared to \$175,346 for the same period last year. The tax-equivalent yield on the investment portfolio decreased 36 basis points to 2.81% for the three months ended March 31, 2014, from 3.17% for the comparable period of 2013. The yield decline is the result of decreasing reinvestment yields as well as an overall investment strategy aimed at shortening the duration of the investment portfolio.

Securities available-for-sale are carried at fair value, with unrealized gains or losses net of deferred income taxes reported in the accumulated other comprehensive income (loss) component of stockholders' equity. The carrying value of securities at March 31, 2014, included a net unrealized gain of \$5,204 reflected as a component of accumulated other comprehensive income of \$3,382 in stockholders' equity, net of deferred income taxes of \$1,822. This compares to a net unrealized gain of \$2,810 at December 31, 2013, reflected as a component of accumulated other comprehensive loss of \$1,826, net of deferred income taxes of \$984.

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

The Asset/Liability Committee (ALCO) reviews the performance and risk elements of the investment portfolio monthly. Through active balance sheet management and analysis of the securities portfolio, we maintain sufficient liquidity to satisfy depositor requirements and meet the credit needs of our customers.

Loan Portfolio:

Payments and prepayments on loans approximated the amount of loan originations during the first quarter of 2014. As a result, loans, net increased slightly to \$1,177,122 at March 31, 2014 from \$1,176,617 at December 31, 2013. The growth reflected increases in commercial loans, partially offset by decreases in commercial real estate loans, residential real estate and consumer loans. Commercial loans increased \$8,049, or 9.3% annualized, to \$358,729 at March 31, 2014 compared to \$350,680 at December 31, 2013. Commercial real estate loans decreased \$3,335, or 3.3% annual, to \$409,723 at March 31, 2014 compared to \$413,058 at December 31, 2013.

Continued weakness in labor markets, coupled with higher food and energy prices, have hampered consumer purchasing power throughout the first quarter of 2014. Additionally, weakness in real estate markets have further cut into the wealth of consumers. Residential real estate loans decreased \$1,259, or 1.6% annualized, to \$320,803 at March 31, 2014 compared to \$322,062 at December 31, 2013 while consumer loans decreased \$2,950, or 13.6% annualized, to \$87,867 at March 31, 2014 compared to \$90,817 at December 31, 2013.

For the three months ended March 31, 2014, loans, net averaged \$1,181,481, including loans, net acquired from the merger totaling \$509,172, an increase of \$550,659 or 87.3% compared to \$630,822 for the same period of 2013. The tax-equivalent yield on the loan portfolio was 5.14% for the three months ended March 31, 2014, which equaled the comparable period last year.

In addition to the risks inherent in our loan portfolio, in the normal course of business, we are also a party to financial instruments with off-balance sheet risk to meet the financing needs of our customers. These instruments include legally binding commitments to extend credit, unused portions of lines of credit and commercial letters of credit made under the same underwriting standards as on-balance sheet instruments, and may involve, to varying degrees, elements of credit risk and interest rate risk (IRR) in excess of the amount recognized in the financial statements.

Unused commitments at March 31, 2014, totaled \$310,406, consisting of \$278,463 in unfunded commitments of existing loan facilities and \$31,943 in standby letters of credit. Due to fixed maturity dates, specified conditions within these instruments, and the ultimate needs of our customers, many will expire without being drawn upon. We believe that amounts actually drawn upon can be funded in the normal course of operations and therefore, do not represent a significant liquidity risk to us. In comparison, unused commitments, at December 31, 2013, totaled \$303,309, consisting of \$273,395 in unfunded commitments of existing loans and \$29,914 in standby letters of credit.

Table of Contents**Peoples Financial Services Corp.****MANAGEMENT'S DISCUSSION AND ANALYSIS****(Dollars in thousands, except per share data)****Asset Quality:**

National, Pennsylvania, New York and market area unemployment rates at March 31, 2014 and 2013, are summarized as follows:

	March 31, 2014	March 31, 2013
United States	6.7%	7.7%
Pennsylvania (statewide)	6.4%	7.8%
Lackawanna county	7.8%	8.7%
Luzerne county	8.7%	10.0%
Monroe county	8.5%	9.8%
Susquehanna county	6.6%	7.4%
Wayne county	7.3%	8.4%
Wyoming county	9.2%	10.3%
New York (statewide)	7.3%	8.0%
Broome county	8.2%	8.4%

The employment conditions improved for the Nation, Pennsylvania, New York as well as all seven counties representing our market areas in Pennsylvania and New York from one year ago. Despite the overall improvements, employment conditions continued to be weak as unemployment levels remained at historical highs.

Our asset quality improved in the first quarter of 2014. Nonperforming assets decreased \$4,192 or 21.5% to \$15,263 at March 31, 2014, from \$19,455 at December 31, 2013. We experienced increases in other real estate owned and accruing loans past due 90 days or more, which were more than offset by a decline in nonaccrual and restructured loans. As a percentage of loans, net and foreclosed assets, nonperforming assets equaled 1.30% at March 31, 2014 compared to 1.65% at December 31, 2013.

Loans on nonaccrual status decreased \$1,944 to \$12,922 at March 31, 2014 from \$14,866 at December 31, 2013. The decrease from year end was due primarily to a decrease of \$1,399 in commercial and commercial real estate loans on nonaccrual status. Retail loans, including residential real estate and consumer loans on nonaccrual status declined \$545. Other real estate owned increased \$30 to \$678 at March 31, 2014 when compared to \$648 at December 31, 2013.

Generally, maintaining a high loan to deposit ratio is our primary goal in order to maximize profitability. However, this objective is superseded by our attempts to assure that asset quality remains strong. We continued our efforts to maintain sound underwriting standards for both commercial and consumer credit. Most commercial lending is done primarily with locally owned small businesses.

We maintain the allowance for loan losses at a level we believe adequate to absorb probable credit losses related to specifically identified loans, as well as probable incurred loan losses inherent in the remainder of the loan portfolio as of the balance sheet date. The allowance for loan losses is based on past events and current economic conditions. We employ the Federal Financial Institutions Examination Council Interagency Policy Statement, as amended December 13, 2006, and GAAP in assessing the adequacy of the allowance account. Under GAAP, the adequacy of the allowance account is determined based on the provisions of Financial Accounting Standards Board (FASB) Accounting

Table of Contents

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Standards Codification (ASC) 310, Receivables, for loans specifically identified to be individually evaluated for impairment and the requirements of FASB ASC 450, Contingencies, for large groups of smaller-balance homogeneous loans to be collectively evaluated for impairment.

We follow our systematic methodology in accordance with procedural discipline by applying it in the same manner regardless of whether the allowance is being determined at a high point or a low point in the economic cycle. Each quarter, loan review identifies those loans to be individually evaluated for impairment and those loans collectively evaluated for impairment utilizing a standard criteria. Internal loan review grades are assigned quarterly to loans identified to be individually evaluated. A loan's grade may differ from period to period based on current conditions and events, however, we consistently utilize the same grading system each quarter. We consistently use loss experience from the latest twelve quarters in determining the historical loss factor for each pool collectively evaluated for impairment. Qualitative factors are evaluated in the same manner each quarter and are adjusted within a relevant range of values based on current conditions. For additional disclosure related to the allowance for loan losses refer to the note entitled, Loans, net and Allowance for Loan Losses, in the Notes to Consolidated Financial Statements to this Quarterly Report.

The allowance for loan losses increased \$208 to \$8,859 at March 31, 2014, from \$8,651 at the end of 2013. For the three months ended March 31, 2014, net charge-offs were \$649 or 0.22% of average loans outstanding in 2014, a \$509 increase compared to \$140 or 0.09% of average loans outstanding in the first quarter of 2013.

Deposits:

Deposits are attracted within our primary market area through the offering of various deposit instruments including demand deposit accounts, NOW accounts, money market deposit accounts, savings accounts, and time deposits, including certificates of deposit and IRAs. During the three months ended March 31, 2014, total deposits increased \$24,559, or 7.2% annualized, to \$1,404,066 from \$1,379,507 at December 31, 2013. Interest-bearing checking deposits, including NOW and money market accounts, increased \$15,877, or 15.2% annualized, to \$440,434 at March 31, 2014, compared to \$424,557 at December 31, 2013. Savings deposits increased \$9,700, or 10.6% annualized, to \$381,801 at March 31, 2014, compared to \$372,101 at December 31, 2013. Demand deposits, increased \$2,118, or 3.1% annualized, to \$282,060 at March 31, 2014, compared to \$279,942 at December 31, 2013. Time deposits less than \$100 increased \$27,988, or 67.5% annualized, to \$196,073 at March 31, 2014, compared to \$168,085 at December 31, 2013 while time deposits of \$100 or more decreased \$31,124, or 93.6% annualized, to \$103,698 at March 31, 2014, compared to \$134,822 at December 31, 2013.

For the quarter ended March 31, 2014, average total deposits increased \$662,212 to \$1,383,669, including average balances for deposits acquired in the merger totaling \$636,784, compared to \$721,457 for the same period of 2013. Average noninterest-bearing deposits grew \$129,591, while average interest-bearing accounts increased \$532,621. Our cost of interest-bearing deposits increased 4 basis points to 0.50% for the three months ended March 31, 2014, from 0.46% for the same three months of 2013.

Interest rates have been at historic lows for an extended period. Short term and core deposit rates have remained flat. As such, deposits have been attracted by offering rates on longer term time deposit products and core savings accounts which are higher than other investment alternatives available to customers elsewhere in the market place.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Borrowings:

The Bank utilizes borrowings as a secondary source of liquidity for its asset/liability management. Advances are available from the Federal Home Loan Bank (FHLB) provided certain standards related to credit worthiness have been met. Repurchase and term agreements are also available from the FHLB.

Total short-term borrowings at March 31, 2014, totaled \$22,539 as compared to \$22,052 at December 31, 2013, an increase of \$487, or 2.2%. Long-term debt was \$35,838 at March 31, 2014, compared to \$36,743 at year end 2013. The reduction was a product of monthly contractual amortized payments made during the first quarter of 2014.

Market Risk Sensitivity:

Market risk is the risk to our earnings or financial position resulting from adverse changes in market rates or prices, such as interest rates, foreign exchange rates or equity prices. Our exposure to market risk is primarily interest rate risk (IRR) associated with our lending, investing and deposit-gathering activities. During the normal course of business, we are not exposed to foreign exchange risk or commodity price risk. Our exposure to IRR can be explained as the potential for change in our reported earnings and/or the market value of our net worth. Variations in interest rates affect earnings by changing net interest income and the level of other interest-sensitive income and operating expenses. Interest rate changes also affect the underlying economic value of our assets, liabilities and off-balance sheet items. These changes arise because the present value of future cash flows, and often the cash flows themselves, change with interest rates. The effects of the changes in these present values reflect the change in our underlying economic value and provide a basis for the expected change in future earnings related to interest rates. IRR is inherent in the role of banks as financial intermediaries. However, a bank with a high degree of IRR may experience lower earnings, impaired liquidity and capital positions, and most likely, a greater risk of insolvency. Therefore, banks must carefully evaluate IRR to promote safety and soundness in their activities.

As a result of economic uncertainty and a prolonged era of historically low market rates, it has become challenging to manage IRR. Due to these factors, IRR and effectively managing it are very important to both bank management and regulators. Bank regulations require us to develop and maintain an IRR management program, overseen by the Board of Directors and senior management, that involves a comprehensive risk management process in order to effectively identify, measure, monitor and control risk. Should bank regulatory agencies identify a material weaknesses in our risk management process or high exposure relative to our capital, bank regulatory agencies may take action to remedy these shortcomings. Moreover, the level of IRR exposure and the quality of our risk management process is a determining factor when evaluating capital adequacy.

Table of Contents**Peoples Financial Services Corp.****MANAGEMENT'S DISCUSSION AND ANALYSIS****(Dollars in thousands, except per share data)**

The ALCO, comprised of members of our Board of Directors, senior management and other appropriate officers, oversees our IRR management program. Specifically ALCO analyzes economic data and market interest rate trends, as well as competitive pressures, and utilizes computerized modeling techniques to reveal potential exposure to IRR. This allows us to monitor and attempt to control the influence these factors may have on our rate-sensitive assets (RSA) and rate-sensitive liabilities (RSL), and overall operating results and financial position. One such technique utilizes a static gap model that considers repricing frequencies of RSA and RSL in order to monitor IRR. Gap analysis attempts to measure our interest rate exposure by calculating the net amount of RSA and RSL that reprice within specific time intervals. A positive gap occurs when the amount of RSA repricing in a specific period is greater than the amount of RSL repricing within that same time frame and is indicated by a RSA/RSL ratio greater than 1.0. A negative gap occurs when the amount of RSL repricing is greater than the amount of RSA and is indicated by a RSA/RSL ratio less than 1.0. A positive gap implies that earnings will be impacted favorably if interest rates rise and adversely if interest rates fall during the period. A negative gap tends to indicate that earnings will be affected inversely to interest rate changes.

Our cumulative one-year RSA/RSL ratio equaled 1.66% at March 31, 2014. Given the length of time that market rates have been at historical lows and the potential for rates to rise in the future, the focus of ALCO has been to create a positive static gap position. With regard to RSA, we predominantly offer medium-term, fixed-rate loans as well as adjustable rate loans. With respect to RSL, we offer longer term promotional certificates of deposit in an attempt to increase duration. The current position at March 31, 2014, indicates that the amount of RSA repricing within one year would exceed that of RSL, thereby causing increases in market rates, to increase net interest income. However, these forward-looking statements are qualified in the aforementioned section entitled "Forward-Looking Discussion" in this Management's Discussion and Analysis.

Static gap analysis, although a credible measuring tool, does not fully illustrate the impact of interest rate changes on future earnings. First, market rate changes normally do not equally or simultaneously affect all categories of assets and liabilities. Second, assets and liabilities that can contractually reprice within the same period may not do so at the same time or to the same magnitude. Third, the interest rate sensitivity table presents a one-day position. Variations occur daily as we adjust our rate sensitivity throughout the year. Finally, assumptions must be made in constructing such a table.

As the static gap report fails to address the dynamic changes in the balance sheet composition or prevailing interest rates, we utilize a simulation model to enhance our asset/liability management. This model is used to create pro forma net interest income scenarios under various interest rate shocks. Model results at March 31, 2014, produced results similar to those indicated by the one-year static gap position. In addition, parallel and instantaneous shifts in interest rates under various interest rate shocks resulted in changes in net interest income that were well within ALCO policy limits. We will continue to monitor our IRR throughout 2014 and endeavor to employ deposit and loan pricing strategies and direct the reinvestment of loan and investment repayments in order to manage our IRR position.

Financial institutions are affected differently by inflation than commercial and industrial companies that have significant investments in fixed assets and inventories. Most of our assets are monetary in nature and change

correspondingly with variations in the inflation rate. It is difficult to precisely measure the impact inflation has on us, however we believe that our exposure to inflation can be mitigated through asset/liability management.

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Liquidity:

Liquidity management is essential to our continuing operations and enables us to meet financial obligations as they come due, as well as to take advantage of new business opportunities as they arise. Financial obligations include, but are not limited to, the following:

Funding new and existing loan commitments;

Payment of deposits on demand or at their contractual maturity;

Repayment of borrowings as they mature;

Payment of lease obligations; and

Payment of operating expenses.

These obligations are managed daily, thus enabling us to effectively monitor fluctuations in our liquidity position and to adapt that position according to market influences and balance sheet trends. Future liquidity needs are forecasted and strategies are developed to ensure adequate liquidity at all times.

Historically, core deposits have been the primary source of liquidity because of their stability and lower cost, in general, than other types of funding. Providing additional sources of funds are loan and investment payments and prepayments and the ability to sell both available for sale securities and mortgage loans held for sale. We believe liquidity is adequate to meet both present and future financial obligations and commitments on a timely basis.

We employ a number of analytical techniques in assessing the adequacy of our liquidity position. One such technique is the use of ratio analysis related to our reliance on noncore funds to fund our investments and loans maturing after March 31, 2014. Our noncore funds at March 31, 2014, were comprised of time deposits in denominations of \$100 or more, repurchase agreements and other borrowings. These funds are not considered to be a strong source of liquidity since they are very interest rate sensitive and are considered to be highly volatile. At March 31, 2014, our net noncore funding dependence ratio, the difference between noncore funds and short-term investments to long-term assets, was 7.4%, while our net short-term noncore funding dependence ratio, noncore funds maturing within one-year, less short-term investments to long-term assets equaled 1.2%. Comparatively, our overall noncore dependence ratio improved from year-end 2013 when it was 10.0%. Similarly, our net short-term noncore funding dependence ratio was 4.1% at year-end, indicating that our reliance on short-term noncore funds has decreased. The decrease in noncore

funding reliance resulted primarily from an increase in core deposits.

The Consolidated Statements of Cash Flows present the changes in cash and cash equivalents from operating, investing and financing activities. Cash and cash equivalents, consisting of cash on hand, cash items in the process of collection, deposit balances with other banks and federal funds sold, increased \$27,902 during the three months ended March 31, 2014. Cash and cash equivalents increased \$5,422 for the same period last year. For the three months ended March 31, 2014, net cash inflows of \$21,971 from financing activities and \$7,130 from operating activities were only partially offset by a \$1,199 net cash outflow from investing activities. For the same period of 2013, net cash inflows of \$8,895 from financing activities and \$5,206 from operating activities were partially offset by a \$8,679 net cash outflow from investing activities.

Table of Contents

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Financing activities provided net cash of \$21,971 for the three months ended March 31, 2014, and \$8,895 for the same three months of 2013. Deposit gathering is our predominant financing activity. During the first three months of 2014 deposit gathering accelerated compared to the same period last year. The net increase in deposits totaled \$24,855 in 2014. Comparatively, deposit gathering provided net cash of \$19,389 for the same period of 2013. We continued to attract deposits from new and existing customers, including municipalities and school districts, as well as deposits gathered in relation to natural gas activity within existing markets in Susquehanna and Wyoming Counties of Pennsylvania.

Operating activities provided net cash of \$7,130 for the three months ended March 31, 2014, and \$5,206 for the same three months of 2013. Net income, adjusted for the effects of gains and losses along with noncash transactions such as depreciation and the provision for loan losses, is the primary source of funds from operations.

Investing activities primarily include transactions related to our lending activities and investment portfolio. Investing activities used net cash of \$1,199 for the three months ended March 31, 2014, compared to \$8,679 for the same period of 2013. In both 2014 and 2013, an increase in investment portfolio activities was the primary factor causing the net cash outflow from investing activities.

We believe that our future liquidity needs will be satisfied through maintaining an adequate level of cash and cash equivalents, by maintaining readily available access to traditional funding sources, and through proceeds received from the investment and loan portfolios. The current sources of funds will enable us to meet all cash obligations as they come due.

Capital:

Stockholders' equity totaled \$242,565 or \$32.13 per share at March 31, 2014, compared to \$238,792 or \$31.62 per share at December 31, 2013. Net income of \$4,698 for the three months ended March 31, 2014 was the primary factor leading to the improved capital position. Stockholders' equity was also affected by cash dividends declared of \$2,341, common stock repurchases of \$70, common stock issuances of \$39, shares retired of \$109, and other comprehensive income resulting from market value fluctuations in the investment portfolio of \$1,556.

Dividends declared equaled \$0.31 per share for the first quarter of 2014, representing a dividend payout ratio was 50.0%. The Pensco merger agreement contemplates that, unless 80 percent of our board of directors determines otherwise, we will pay a quarterly cash dividend in an amount no less than \$0.31 per share through 2018, provided that sufficient funds are legally available, and that Peoples and Peoples Bank remain well-capitalized in accordance with applicable regulatory guidelines. It is the intention of the Board of Directors to continue to pay cash dividends in the future. However, these decisions are affected by operating results, financial and economic decisions, capital and growth objectives, appropriate dividend restrictions and other relevant factors.

Table of Contents**Peoples Financial Services Corp.****MANAGEMENT'S DISCUSSION AND ANALYSIS****(Dollars in thousands, except per share data)**

We attempt to assure capital adequacy by monitoring our current and projected capital positions to support future growth, while providing stockholders with an attractive long-term appreciation of their investments. According to bank regulation, at a minimum, banks must maintain a Tier 1 capital to risk-adjusted assets ratio of 4.0 percent and a total capital to risk-adjusted assets ratio of 8.0 percent. Additionally, banks must maintain a leverage ratio, defined as Tier 1 capital to total average assets less intangibles, of 3.0 percent. The minimum leverage ratio of 3.0 percent only applies to institutions with a composite rating of 1 under the Uniform Interagency Bank Rating System that are not anticipating or experiencing significant growth and have well-diversified risk. An additional 100 to 200 basis points are required for all but these most highly-rated institutions. Our minimum Leverage ratio was 4.0 percent at March 31, 2014 and December 31, 2013. If an institution is deemed to be undercapitalized under these standards, banking law prescribes an increasing amount of regulatory intervention, including the required institution of a capital restoration plan and restrictions on the growth of assets, branches or lines of business. Further restrictions are applied to significantly or critically undercapitalized institutions, including restrictions on interest payable on accounts, dismissal of management and appointment of a receiver. For well capitalized institutions, banking law provides authority for regulatory intervention where the institution is deemed to be engaging in unsafe and unsound practices or receives a less than satisfactory examination report rating.

The adequacy of capital is reviewed on an ongoing basis with reference to the size, composition and quality of resources and regulatory guidelines. We seek to maintain a level of capital sufficient to support existing assets and anticipated asset growth. At March 31, 2014, the Bank's Tier 1 capital to total average assets was 9.93% as compared to 9.72% at December 31, 2013. The Bank's Tier 1 capital to risk weighted asset ratio was 13.16% and the total capital to risk weighted asset ratio was 13.89% at March 31, 2014. These ratios were 13.02% and 13.69% at December 31, 2013. The Bank was deemed to be well-capitalized under regulatory standards at March 31, 2014.

Review of Financial Performance:

Net income for the first quarter of 2014 equaled \$4,698 or \$0.62 per share compared to \$2,521 or \$0.56 per share for the first quarter of 2013. Per share data for 2013 are restated to reflect the merger exchange rates of 1.3636 shares. Return on average assets (ROA) measures our net income in relation to total assets. Our ROA was 1.13% for the first quarter of 2014 compared to 1.11% for the same period of 2013. Return on average equity (ROE) indicates how effectively we can generate net income on the capital invested by stockholders. Our ROE was 8.03% for the first quarter of 2014 compared to 7.65% for the first quarter of 2013. The merger between Peoples and Penseco was accounted for as a reverse acquisition of Peoples by Penseco. As a result of the reverse merger, Peoples is the legal acquirer and Penseco is the accounting acquirer. In a reverse merger the historical financial statements are those of the accounting acquirer. Accordingly the earnings increase was primarily a result of adhering to the accounting treatment that requires the inclusion of results of operations of both Peoples and Penseco for the quarter ended March 31, 2014, compared to Penseco on a standalone basis for same period last year. The quarter over quarter improvement was also a function of the recognizing a higher net interest margin and an improvement in the efficiency ratio when comparing the first quarter of 2014 to the same period in 2013. The results for the quarter ended March 31, 2014, include pre-tax merger related expenses of approximately \$608. The conversion of the core processing system is scheduled to be completed at the end of April, 2014. Accordingly, cost savings associated with such action are not anticipated to be

realized before the third quarter of 2014.

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Net Interest Income:

Net interest income is still the fundamental source of earnings for commercial banks. Moreover, fluctuations in the level of net interest income can have the greatest impact on net profits. Net interest income is defined as the difference between interest revenue, interest and fees earned on interest-earning assets, and interest expense, the cost of interest-bearing liabilities supporting those assets. The primary sources of earning assets are loans and investment securities, while interest-bearing deposits, short-term and long-term borrowings comprise interest-bearing liabilities. Net interest income is impacted by:

Variations in the volume, rate and composition of earning assets and interest-bearing liabilities;

Changes in general market rates; and

The level of nonperforming assets.

Changes in net interest income are measured by the net interest spread and net interest margin. Net interest spread, the difference between the average yield earned on earning assets and the average rate incurred on interest-bearing liabilities, illustrates the effects changing interest rates have on profitability. Net interest margin, net interest income as a percentage of earning assets, is a more comprehensive ratio, as it reflects not only the spread, but also the change in the composition of interest-earning assets and interest-bearing liabilities. Tax-exempt loans and investments carry pre-tax yields lower than their taxable counterparts. Therefore, in order to make the analysis of net interest income more comparable, tax-exempt income and yields are reported herein on a tax-equivalent basis using the prevailing federal statutory tax rate of 35.0%.

For the three months ended March 31, 2014, tax-equivalent net interest income increased \$7,144 to \$15,533 in 2014 from \$8,389 in 2013. The net interest spread increased to 3.94% for the three months ended March 31, 2014 from 3.88% for the three months ended March 31, 2013. The tax-equivalent net interest margin for the three months ended March 31, was 4.09% in 2014 compared to 4.05% in 2013. Loan accretion included in loan interest income in the first quarter of 2014 related to loans acquired in the fourth quarter of 2013 was \$904, resulting in an increase in the tax-equivalent net interest margin of 24 basis points. The tax-equivalent net interest margin for the fourth quarter of 2013 was 3.82%. The yield curve continued to be relatively steep during the first quarter of 2014 as the Federal Reserve has maintained lower overnight and discount rates. Since deposit rates are affected by the short end of the yield curve and loan and securities rates tend to follow the long end of the yield curve, the continuation of the current interest rate environment may assist us in maintaining a stable net interest margin in the future.

For the three months ended March 31, 2014, tax-equivalent interest income increased \$7,798, to \$17,220 as compared to \$9,422 for the three months ended March 31, 2013. A volume variance in interest income of \$9,323 attributable to

changes in the average balance of earning assets was offset partially by a \$1,525 unfavorable rate variance due to a reduction in the yield on earning assets. Specifically, the increase was primarily due to the growth in average earning assets which increased \$700,468 to \$1,541,050 for the first quarter of 2014 from \$840,582 for the same period in 2013, primarily as a result of the merger. The overall yield on earning assets, on a fully tax-equivalent basis, decreased for the three months ended March 31, 2014 to 4.53% as compared to 4.55% for the three months ended March 31, 2013. This was a result of the continuation of the low interest rate environment along with increased market competition. The yield earned on investments decreased 36 basis points for the first quarter of 2014 to 2.81% from 3.17% for the first quarter of 2013. Average investments increased to \$319,798 for the quarter ended March 31, 2014 compared to \$175,346 for the same period in 2013. The resulting tax-equivalent interest earned on investments was \$2,218 for the three month period ended March 31, 2014 compared to \$1,402 for the same period in 2013, an increase of \$816.

Table of Contents

Peoples Financial Services Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Total interest expense increased \$654 to \$1,687 for the three months ended March 31, 2014 from \$1,033 for the three months ended March 31, 2013. An unfavorable volume variance caused interest expenses to increase \$875 offset partially by a favorable rate variance of \$221. The cost of funds decreased to 0.59% for the three months ended March 31, 2014 as compared to 0.67% for the same period in 2013. Offsetting the positive impact of the decline in fund costs was an increase in the average volume of interest bearing liabilities to \$1,166,766 for the three months ended March 31, 2014, including average interest-bearing liabilities acquired in the merger totaling \$529,754, as compared to \$625,242 for the three months ended March 31, 2013. Average interest-bearing deposits increased \$532,621 to \$1,109,085 for the first quarter of 2014 compared to \$576,464 for the same period last year. We continue to offer highly attractive rates on longer term promotional certificates of deposit accounts, in order to position us for an expected eventual increase in interest rates.

Table of Contents**Peoples Financial Services Corp.****MANAGEMENT'S DISCUSSION AND ANALYSIS****(Dollars in thousands, except per share data)**

The average balances of assets and liabilities, corresponding interest income and expense and resulting average yields or rates paid are summarized as follows. Averages for earning assets include nonaccrual loans. Investment averages include available-for-sale securities at amortized cost. Income on investment securities and loans is adjusted to a tax equivalent basis using the prevailing federal statutory tax rate of 35.0% in 2014 and 34.0% in 2013.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

Provision for Loan Losses:

We evaluate the adequacy of the allowance for loan losses account on a quarterly basis utilizing our systematic analysis in accordance with procedural discipline. We take into consideration certain factors such as composition of the loan portfolio, volumes of nonperforming loans, volumes of net charge-offs, prevailing economic conditions and other relevant factors when determining the adequacy of the allowance for loan losses account. We make monthly provisions to the allowance for loan losses account in order to maintain the allowance at the appropriate level indicated by our evaluations. Based on our most current evaluation, we believe that the allowance is adequate to absorb any known and inherent losses in the portfolio as of March 31, 2014.

For the three months ended March 31, 2014, the provision for loan losses totaled \$857. The provision for loan losses was \$300 for the same period in 2013. A higher volume and concentration of commercial loans in the portfolio, along with continued weakness in economic growth, were the main contributors to the increased provision.

Noninterest Income:

Noninterest income for the first quarter rose \$734 or 26.0% to \$3,560 in 2014 from \$2,826 in 2013. Service charges, fees and commissions increased \$663 or 70.0% attributable primarily to the merger. Income generated from commissions and fees on fiduciary activities increased \$176 to \$567 for the first quarter of 2014 in comparison to the same period in 2013 due to an increase in the fee structure implemented in the second half of 2013. Income generated from our Wealth Management Division increased \$97 to \$187 for the first quarter of 2014 in comparison to the same period in 2013. Merchant services income decreased \$137 to \$894 for the three months ended March 31, 2014 from \$1,031 for the same period last year as the monthly discount income accrual was reduced due to a lower volume of transactions.

Noninterest Expenses:

In general, noninterest expense is categorized into three main groups: employee-related expenses, occupancy and equipment expenses and other expenses. Employee-related expenses are costs associated with providing salaries, including payroll taxes and benefits, to our employees. Occupancy and equipment expenses, the costs related to the maintenance of facilities and equipment, include depreciation, general maintenance and repairs, real estate taxes, rental expense offset by any rental income, and utility costs. Other expenses include general operating expenses such as advertising, contractual services, insurance, including FDIC assessment, other taxes and supplies. Several of these costs and expenses are variable while the remainder are fixed. We utilize budgets and other related strategies in an effort to control the variable expenses.

For the first quarter of 2014, noninterest expense increased \$4,162 or 58.4% to \$11,287 in 2014 from \$7,125 in 2013. Personnel costs rose 44.2%, net occupancy and equipment costs increased 116.4% and other expenses were higher by 39.9% comparing the first quarters of 2014 and 2013.

Salaries and employee benefits expense, which comprise the majority of noninterest expense, totaled \$5,168 for the first quarter of 2014. The \$1,585 or 44.2% increase was a result of comparing the staffing expense of the merged company to that of the standalone accounting acquirer.

Table of Contents

Peoples Financial Services Corp.

MANAGEMENT S DISCUSSION AND ANALYSIS

(Dollars in thousands, except per share data)

We experienced a \$932 or 116.4% increase in net occupancy and equipment expense comparing the first quarters of 2014 and 2013. Increased depreciation expense and other costs related to equipment and computer systems from the merger caused the increase between comparable periods. In addition, the ongoing need for new technologies has increased the need for additional equipment and the costs associated with such equipment.

For the first quarter, other expenses increased \$818 or 39.9% comparing 2014 to 2013. This increase was the result of additional expenses resulting from the merger. Acquisition related expenses incurred in the first quarter of 2014 totaled \$608. There was no comparable expenses incurred during the same period in 2013.

Income Taxes:

We recorded income tax expense of \$1,463 or 23.7% of pre-tax income, and \$737 or 22.6% of pre-tax income for the quarters ended March 31, 2014 and 2013.

Table of Contents**Peoples Financial Services Corp.****Item 3. Quantitative and Qualitative Disclosures about Market Risk.**

Market risk is the risk to our earnings and/or financial position resulting from adverse changes in market rates or prices, such as interest rates, foreign exchange rates or equity prices. Our exposure to market risk is primarily interest rate risk (IRR), which arises from our lending, investing and deposit gathering activities. Our market risk sensitive instruments consist of non-derivative financial instruments, none of which are entered into for trading purposes. During the normal course of business, we are not exposed to foreign exchange risk or commodity price risk. Our exposure to IRR can be explained as the potential for change in reported earnings and/or the market value of net worth. Variations in interest rates affect the underlying economic value of assets, liabilities and off-balance sheet items. These changes arise because the present value of future cash flows, and often the cash flows themselves, change with interest rates. The effects of the changes in these present values reflect the change in our underlying economic value, and provide a basis for the expected change in future earnings related to interest rates. Interest rate changes affect earnings by changing net interest income and the level of other interest-sensitive income and operating expenses. IRR is inherent in the role of banks as financial intermediaries.

A bank with a high degree of IRR may experience lower earnings, impaired liquidity and capital positions, and most likely, a greater risk of insolvency. Therefore, banks must carefully evaluate IRR to promote safety and soundness in their activities.

The overnight borrowing rate has been subject to a range of 0% to 0.25% since the Federal Open Market Committee (FOMC) adopted their accommodative monetary policy. The FOMC has acted to drive longer term rates to historic lows and operate as a backstop to the financial industry through direct infusions of capital by implementing their quantitative easing policies.

The projected impact of instantaneous changes in interest rates on our net interest income and economic value of equity at March 31, 2014, based on our simulation model, is summarized as follows:

Changes in Interest Rates (basis points)	March 31, 2014 % Change in			
	Net Interest Income		Economic Value of Equity	
	Metric	Policy	Metric	Policy
+400	6.9	N/A	2.8	N/A
+300	5.3	(30.0)	2.9	(30.0)
+200	3.3	(20.0)	2.2	(25.0)
+100	1.3	(10.0)	1.7	(15.0)
Static				
-100	(1.7)	(10.0)	(9.9)	(15.0)

Our simulation model creates pro forma net interest income scenarios under various interest rate shocks. Given instantaneous and parallel shifts in general market rates of plus 100 basis points, our projected net interest income for the 12 months ending March 31, 2014, would increase slightly at 1.3 percent from model results using current interest rates. Additional disclosures about market risk are included in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2013, under the heading Market Risk Sensitivity, and are incorporated into this Item 3

by reference. There were no material changes in our market risk from December 31, 2013.

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures.

At March 31, 2014, the end of the period covered by this Quarterly Report on Form 10-Q, the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) evaluated the effectiveness of the Company s disclosure controls and procedures as defined in Rule 13a-15(e) under the Exchange Act. Based upon that evaluation, the CEO and CFO concluded that the disclosure controls and procedures, at March 31, 2014, were effective to provide reasonable assurance that information required to be disclosed in the Company s reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and to provide reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to the CEO and CFO to allow timely decisions regarding required disclosure.

(b) Changes in internal controls.

There were no changes made in the Company s internal controls over financial reporting that occurred during the Company s most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company s internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

The nature of the Company s business generates a certain amount of litigation involving matters arising out of the ordinary course of business. In the opinion of management, there were no legal proceedings that had or might have a material effect on the consolidated results of operations, liquidity, or the financial position of the Company during the first quarter of 2014 and through the date of this quarterly report on Form 10-Q.

Item 1A. Risk Factors.

No material changes from those previously disclosed in the Company s Annual Report on Form 10-K for the year ended December 31, 2013.

Table of Contents**Peoples Financial Services Corp.****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

On January 31, 2014, the Board of Directors authorized the repurchase of 370,000 shares of the Company's common stock. The following purchases were made by or on behalf of the Company or any affiliated purchaser, as defined in the Exchange Act Rule 10b-18(a) (3), of the Company's common stock during each of the three months ended March 31, 2014. At March 31, 2014, there were 368,200 shares available for repurchase under the 2014 Stock Repurchase Program with an expiration date of December 31, 2014.

MONTH		Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
January 1, 2014	January 31, 2014				370,000
February 1, 2014	February 28, 2014				370,000
March 1, 2014	March 31, 2014	1,800	39.03	1,800	368,200
TOTAL		1,800	39.03	1,800	

Item 3. Defaults upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.

31 (i) Chief Executive Officer and Chief Financial Officer certifications pursuant to Rule 13a-14(a)/15d-14(a).

32 Chief Executive Officer and Chief Financial Officer certifications pursuant to Section 1350.
