CONSOLIDATED FINANCIAL INFORMATION

Notes to Translation

1. The following is an English translation of ORIX Corporation's quarterly financial report (*shihanki houkokusho*) as filed with the Kanto Financial Bureau in Japan on August 13, 2014, which includes unaudited consolidated financial information prepared in accordance with generally accepted accounting principles in the United States (U.S. GAAP) for the three months ended June 30, 2013 and 2014.

2. Significant differences between U.S. GAAP and generally accepted accounting principles in Japan (Japanese GAAP) are stated in the notes of Overview of Accounting Principles Utilized.

In preparing its consolidated financial information, ORIX Corporation (the Company) and its subsidiaries have complied with U.S. GAAP.

This document may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on the Company's current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's most recent annual report on Form 20-F filed with the U.S. Securities and Exchange Commission.

This document contains non-GAAP financial measures, including adjusted long-term debt, adjusted total assets and adjusted ORIX Corporation shareholders' equity, as well as other measures and ratios calculated on the basis thereof. These non-GAAP financial measures should not be considered in isolation or as a substitute for the most directly comparable financial measures included in the Company's consolidated financial statements presented in accordance with U.S. GAAP. Reconciliations of these non-GAAP financial measures to the most directly comparable U.S. GAAP measures are included in this document.

The Company believes that it will be considered a passive foreign investment company for U.S. Federal income tax purposes in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

Table of Contents**1. Information on the Company and its Subsidiaries****(1) Consolidated Financial Highlights**

	Millions of yen (except for per share amounts and ratios)		
	Three months ended June 30, 2013	Three months ended June 30, 2014	Fiscal year ended March 31, 2014

Notes 1. Pursuant to FASB Accounting Standards Codification (ASC) 205-20 (Presentation of Financial Statements - Discontinued Operations), certain amounts in the fiscal year ended March 31, 2014 related to the operations of subsidiaries, business units, and certain properties, that have been sold or are to be disposed of by sale without significant continuing involvement as of June 30, 2014 have been reclassified retrospectively.

2. Consumption tax is excluded from the stated amount of total revenues.

(2) Overview of Activities

During the three months ended June 30, 2014, no significant changes were made in the Company and its subsidiaries' operations. Additionally, there were no changes of principal related companies.

2. Risk Factors

Investing in the Company's securities involves risks. You should carefully consider the information described herein as well as the risks described under Risk Factors in our Form 20-F for the fiscal year ended March 31, 2014 and the other information in that annual report, including, but not limited to, the Company's consolidated financial statements and related notes and Item 11. Quantitative and Qualitative Disclosures about Market Risk. The Company's business activities, financial condition and results of operations and the trading prices of the Company's securities could be adversely affected by any of those factors or other factors.

3. Material Contracts

On April 28, 2014, ORIX Life Insurance Corporation (hereinafter, ORIX Life Insurance), a subsidiary of the Company, decided to purchase all issued shares of Hartford Life Insurance K.K. (hereinafter, HLIKK) held by Hartford Life, Inc. On July 1, 2014, ORIX Life Insurance completed the acquisition of HLIKK. As a result, HLIKK has become a consolidated subsidiary of the Company.

For more information about the acquisition of HLIKK, see Note 23 Subsequent Events.

4. Analysis of Financial Results and Condition

The following discussion provides management's explanation of factors and events that have significantly affected the Company's financial condition and results of operations. Also included is management's assessment of factors and trends that could have a material effect on the Company's financial condition and results of operations in the future. However, please be advised that financial conditions and results of operations in the future may also be affected by factors other than those discussed herein. These factors and trends regarding the future were assessed as of the issue date of the quarterly financial report (*shihanki houkokusho*).

Table of Contents**(1) Qualitative Information Regarding Consolidated Financial Results****Economic Environment**

Steady growth in the global economy continues due in part to improvement in the U.S. economy and recovery of the European economy despite some signs of weakness in China and other emerging economies.

In the United States, quantitative easing (QE3) is on a tapering trend but continues to maintain stable growth with recovery in the employment market, increasing housing demand, and an increase in consumer spending.

The European economy continues to be on the path of steady recovery against the backdrop of fiscal policies including monetary easing, even though it still carries downside risks such as decelerating growth.

In Asia, while China is in the process of shifting the emphasis of its economic policy away from high growth and toward stable growth, other emerging economies are expected to maintain high growth due in part to economic resurgence among developed countries.

The Japanese economy also continues to show signs of steady growth with stable employment level, due in part to monetary easing by the Bank of Japan and various economic measures, despite a temporary negative impact on consumer spending and housing investment by the consumption tax hike that went into effect in April 2014.

Financial Highlights**Financial Results for the Three Months Ended June 30, 2014**

Total revenues	¥437,743 million (Up 59% year on year)
Total expenses	¥351,341 million (Up 59% year on year)
Income before income taxes and discontinued operations	¥111,316 million (Up 80% year on year)
Net income attributable to ORIX Corporation shareholders	¥68,605 million (Up 52% year on year)
Earnings per share for net income attributable to ORIX Corporation shareholders	
(Basic)	¥52.38 (Up 43% year on year)
(Diluted)	¥52.31 (Up 50% year on year)
ROE (Annualized) *1	14.2% (10.8% during the same period in the previous fiscal year)
ROA (Annualized) *2	3.04% (2.16% during the same period in the previous fiscal year)

*1 ROE is the ratio of Net Income Attributable to ORIX Corporation shareholders for the period to average ORIX Corporation shareholders Equity.

*2 ROA is the ratio of Net Income Attributable to ORIX Corporation shareholders for the period to average Total Assets.

Total revenues for the three-month period ended June 30, 2014 (hereinafter, the first consolidated period) increased 59% to ¥437,743 million compared to ¥276,072 million during the same period of the previous fiscal year. Compared to the same period of the previous fiscal year, revenues from asset management and servicing increased due to the consolidation of Robeco Groep N.V. (hereinafter, Robeco), which was acquired on July 1, 2013, other operating revenues and real estate sales increased due to factors including the consolidation of DAIKYO INCORPORATED (hereinafter, DAIKYO), which was acquired on February 27, 2014, contributions from subsidiaries acquired as a part of our private equity investments, and growth in our environment and energy-related business. In addition, brokerage commissions and net gains on investment securities increased due to the sale of shares of Monex Group Inc. On the other hand, interest on loans and investment securities decreased compared to the same period of the previous fiscal year due to a decrease in the average balance of installment loans.

Total expenses increased 59% to ¥351,341 million compared to ¥221,042 million during the same period of the previous fiscal year. Costs of real estate sales, expenses from asset management and servicing, and other operating expenses increased in connection with an increase in revenues. Selling, general and administrative expenses also increased due to newly consolidated companies and strong fee business in the United States. Meanwhile, interest expense decreased due to a decrease in the average balance of borrowings.

Table of Contents

Gains on sales of subsidiaries and affiliates and liquidation losses, net, increased compared to the same period of the previous fiscal year primarily due to the recognition of a gain on the sale of partial shares of STX Energy Co., Ltd. (presently GS E&R Corp., hereinafter, STX Energy).

As a result of the foregoing, income before income taxes and discontinued operations for the first consolidated period increased 80% to ¥111,316 million compared to ¥61,928 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation shareholders increased 52% to ¥68,605 million compared to ¥45,007 million during the same period of the previous fiscal year.

Segment Information

Total revenues and profits by segment for the three months ended June 30, 2013 and 2014 are as follows:

	Millions of yen							
	Three months ended June 30, 2013		Three months ended June 30, 2014		Change (revenues)		Change (profits)	
	Segment Revenues	Segment Profits	Segment Revenues	Segment Profits	Amount	Percent (%)	Amount	Percent (%)
Corporate Financial Services	¥ 18,359	¥ 5,246	¥ 18,579	¥ 5,852	¥ 220	1	¥ 606	12

Total	7,281,355	80.3	7,181,990	80.0	(99,365)	(1)
Difference between Segment Total and Consolidated Amounts	1,788,037	19.7	1,798,718	20.0	10,681	1
Total Consolidated Amounts	¥ 9,069,392	100.0	¥ 8,980,708	100.0	¥ (88,684)	(1)

Edgar Filing: ORIX CORP - Form 6-K

Segment profits increased 63% to ¥106,155 million compared to ¥65,253 million during the same period of the previous fiscal year. The Overseas Business, Retail, and Real Estate segments made significant profit contributions and the Corporate Financial Services segment also displayed strong performance, but profits from the Investment and Operation segment decreased and profits from the Maintenance Leasing segment stayed flat compared to the same period of the previous fiscal year.

Table of Contents

Segment information for the first consolidated period is as follows:

Corporate Financial Services Segment: Lending, leasing and fee business

	Three-month period ended June 30, 2013	Three-month period ended June 30, 2014	Change	
			Amount	Percent (%)
Segment Profits (millions of yen)	5,246	5,852	606	12

	As of March 31, 2014	As of June 30, 2014	Change	
			Amount	Percent (%)
Segment Assets (millions of yen)	992,078	994,839	2,761	0

In Japan, we are seeing a steady growth in capital expenditures and continued improvement in corporate revenues, despite a temporary negative impact on consumer spending and housing investment by the consumption tax hike that went into effect in April 2014. We are also seeing an increase in lending by the financial institutions to small and medium enterprises (SMEs) in addition to large corporations, and we anticipate an increase in corporate capital expenditure as companies take advantage of the favorable funding environment. Meanwhile, the competition in lending continues to intensify.

Installment loan revenues decreased in line with a decrease in the average balance of installment loans. On the other hand, direct financing lease revenues remained robust due to an increase in the average balance of direct financing leases. Segment profits increased compared to the same period of the previous fiscal year due to robust fee business including solar panel and life insurance sales to domestic SMEs.

Segment assets were flat compared to the end of the previous fiscal year with an increase in investment in securities offsetting a decrease in installment loans.

Maintenance Leasing Segment: Automobile leasing and rentals, car sharing and precision measuring equipment and IT-related equipment rentals and leasing

	Three-month period ended June 30, 2013	Three-month period ended June 30, 2014	Change	
			Amount	Percent (%)
Segment Profits (millions of yen)	11,031	11,014	(17)	(0)

	As of March 31, 2014	As of June 30, 2014	Change	
			Amount	Percent (%)
Segment Assets (millions of yen)	622,009	637,097	15,088	2

In the automobile leasing industry, the number of new auto leases is on a recovery trend against the backdrop of Japan's steady economic recovery, despite some temporary negative impact from the consumption tax hike that went into effect in April 2014. Furthermore, in the car rental industry, we are seeing a shift toward expanding truck rental locations to respond to the increasing construction demand.

Operating lease revenues and direct financing lease revenues increased due to the steady expansion of assets in the automobile business, and selling, general and administrative expenses and costs of operating leases increased in line with an increase in revenues. Segment profits remained at the same level as the same period of the previous fiscal year as a result of an increase in profits driven by the asset growth offsetting a decrease in gains on sales of used cars.

Segment assets increased compared to the end of the previous fiscal year due to steady increases in investment in operating leases and investment in financing leases mainly in the automobile business.

Table of Contents

Real Estate Segment: Real estate development, rental and financing; facility operation; REIT asset management; and real estate investment and advisory services

	Three-month	Three-month	Change	
	period	period	Amount	Percent
	ended	ended		(%)
	June 30, 2013	June 30, 2014		
Segment Profits (millions of yen)	5,545	10,847	5,302	96

	As of	As of	Change	
	March 31,	June 30,	Amount	Percent
	2014	2014		(%)
Segment Assets (millions of yen)	962,404	916,060	(46,344)	(5)

Office rents and vacancy rates in the Japanese office building market are continuing to show signs of improvement. In the J-REIT market, property acquisitions are increasing as a result of new stock exchange listings and capital raising activities through public offerings. We are also seeing sales of large real estates and rising sales prices due to increased competition among buyers.

Rental and interest revenues decreased due to a decrease in asset balance and real estate sales decreased in accordance with a decrease in the number of condominium units delivered mainly by ORIX Real Estate. On the other hand, gains on sales of real estate under operating leases increased. In addition, segment profits increased compared to the same period of the previous fiscal year due to decreases in losses from inventory valuation which are included in costs of real estate sales and write-downs of long-lived assets.

Segment assets decreased compared to the end of the previous fiscal year as a result of asset turnover centered on rental properties.

Investment and Operation Segment: Environment and energy-related business, principal investment, and loan servicing (asset recovery)

	Three-month	Three-month	Change	
	period	period	Amount	Percent
	ended	ended		(%)
	June 30, 2013	June 30, 2014		
Segment Profits (millions of yen)	10,699	9,835	(864)	(8)

	As of	As of	Change	
	March 31,	June 30,	Amount	Percent
	2014	2014		(%)
Segment Assets (millions of yen)	565,740	568,353	2,613	0

In the environment and energy-related business in Japan, there has been ongoing, active investment in the power generation business, such as mega-solar projects. In addition, investment targets are expanding beyond solar power generation projects to include wind and geothermal power generation projects. In the capital markets, the fiscal year ended March 31, 2014 marked the fourth consecutive year of increase in the number of initial public offerings and we are seeing a continuation of the favorable environment into this fiscal year. In addition, M&A activities are increasing on the back of recovery in corporate profitability.

Segment profits decreased compared to the same period of the previous fiscal year due to a decrease in installment loan revenues in the loan servicing business despite solid profit contributions from the investees in the principal investment business and the environment and energy-related business.

Segment assets were approximately at the same level as the end of the previous fiscal year due to an increase in assets in the environment and energy-related business, despite decreases in installment loans in the loan servicing business and DAIKYO's inventories.

Table of Contents**Retail Segment:** Life insurance, banking and the card loan business

	Three-month	Three-month	Change	
	period ended	period ended	Amount	Percent
	June 30, 2013	June 30, 2014		(%)
Segment Profits (millions of yen)	17,223	28,954	11,731	68

	As of	As of	Change

	2014	2014		(%)
Segment Assets (millions of yen)	2,166,986	2,131,107	(35,879)	(2)

Although the life insurance business is being affected by macro factors such as a decline in the population, demand for medical insurance is increasing. In the consumer finance sector, we are seeing an increase in loan demand which may be attributed to an improvement in consumer confidence in line with Japan's economic recovery.

Segment profits increased significantly compared to the same period of the previous fiscal year due to an increase in installment loan revenues in the banking business, an increase in insurance premium income as a result of an increase in the number of policies in force in the life insurance business and recognition of gain on sale of shares of Monex Group Inc.

Segment assets decreased compared to the end of the previous fiscal year due to a significant drop in investment in securities and installment loans that were held for investment purposes in the life insurance business, as well as the sale of Monex Group shares, despite a steady increase in assets in the banking business.

Overseas Business Segment: Leasing, lending, investment in bonds, investment banking, asset management and ship- and aircraft-related operations

	Three-month	Three-month	Change	
	period ended	period ended	Amount	Percent
	June 30, 2013	June 30, 2014		(%)
Segment Profits (millions of yen)	15,509	39,653	24,144	156

	As of	As of	Change	
	March 31,	June 30,	Amount	Percent
	2014	2014		(%)
Segment Assets (millions of yen)	1,972,138	1,934,534	(37,604)	(2)

In the United States, quantitative easing (QE3) is on a tapering trend but continues to maintain stable growth with recovery in the employment market, increasing housing demand, and an increase in consumer spending. The European economy continues to be on the path of steady recovery against the backdrop of fiscal policies including monetary easing, even though it still carries downside risks such as decelerating growth. In Asia, while China is in the process of shifting the emphasis of its economic policy away from high growth and toward stable growth, other emerging economies are expected to maintain high growth due in part to economic resurgence among developed countries.

Fee revenues in the United States increased in addition to an increase in asset management revenues as a result of the acquisition of Robeco on July 1, 2013. Furthermore, we recognized a gain on sale of partial shares of STX Energy, which prior to the sale of partial shares was our consolidated subsidiary. Segment profits increased significantly compared to the same period of the previous fiscal year despite an increase in selling, general, and administrative expenses due to an increase in revenues.

Segment assets decreased compared to the end of the previous fiscal year. Installment loans and investment in securities increased in the United States while other operating assets decreased due to the sale of partial shares of STX Energy, which as a result of the sale became an equity method affiliate from a consolidated subsidiary of the company.

Table of Contents**(2) Financial Condition**

	As of March 31, 2014	As of June 30, 2014	Change Amount	Percent (%)
	(Millions of yen except ratios, per share and percentages)			
Total Assets	9,069,392	8,980,708	(88,684)	(1)
(Segment assets)	7,281,355	7,181,990	(99,365)	(1)
Total Liabilities	6,921,037	6,821,149	(99,888)	(1)
(Long- and short-term debt)	4,168,465	4,119,537	(48,928)	(1)
(Deposits)	1,206,413	1,195,330	(11,083)	(1)
ORIX Corporation Shareholders' Equity	1,918,740	1,943,506	24,766	1
ORIX Corporation Shareholders' Equity per share*	1,465.31	1,483.25	17.94	1
ORIX Corporation Shareholders' Equity ratio*	21.2%	21.6%	0.4%	
Adjusted ORIX Corporation Shareholders' equity ratio*	21.8%	22.2%	0.4%	
D/E ratio (Debt-to-equity ratio) (Long- and short-term debt (excluding deposits) / ORIX Corporation Shareholders' equity)	2.2x	2.1x	(0.1)x	
Adjusted D/E ratio*	2.0x	2.0x	0.0x	

- * ORIX Corporation Shareholders' equity per share is calculated using total ORIX Corporation Shareholders' Equity.
- * ORIX Corporation Shareholders' equity ratio is the ratio as of the period end of ORIX Corporation Shareholders' equity to total assets.
- * Adjusted ORIX Corporation Shareholders' equity ratio and Adjusted D/E ratio are non-GAAP financial measures presented on an adjusted basis which excludes the effect of consolidating certain variable interest entities (VIEs) on our assets or liabilities and reverses the cumulative effect on our retained earnings of such consolidation, which resulted from applying the accounting standards for the consolidation of VIEs under ASU 2009-16 and ASU 2009-17, effective April 1, 2010. For a discussion of these and other non-GAAP financial measures, including a quantitative reconciliation to the most directly comparable GAAP financial measures, please see 5. Non-GAAP Financial Measures.

Total assets decreased 1% to ¥8,980,708 million compared to ¥9,069,392 million at the end of the previous fiscal year. Installment loans increased primarily due to an increase in new transactions in the United States. Meanwhile, investment in operating leases decreased due to the sales of rental properties and aircraft, investment in securities decreased due to sales and redemption of government bond and shares of Monex Group Inc., and inventories decreased due to delivery of condominiums. In addition, other operating assets and other assets decreased as a result of STX Energy, changing from a consolidated subsidiary to an equity-method affiliate. Segment assets decreased 1% compared to the end of the previous fiscal year to ¥7,181,990 million.

The balance of interest bearing liabilities is managed at an appropriate level taking into account the projection or condition of assets and liquidity on-hand as well as the domestic and overseas financial environment. As a result, long-term debt and deposits decreased compared to the end of the previous fiscal year.

ORIX Corporation Shareholders' Equity increased 1% to ¥1,943,506 million compared to the end of the previous fiscal year primarily due to an increase in retained earnings.

Table of Contents**(3) Liquidity and Capital Resources**

We require capital resources for working capital and investment and lending in our businesses. We accordingly prioritize funding stability, maintaining adequate liquidity, and reducing capital costs. We formulate and execute on funding policies that are resilient to sudden deterioration in financial markets, and then conduct funding activities in accordance with actual transitions in our assets and changes in financial markets. In preparing our management plan, we project funding activities to maintain a balanced capital structure in light of projected cash flows, asset liquidity and our own liquidity situation. In implementation, we adjust our funding plan based on changes in the external funding environment and our funding needs in light of our business activities, and endeavor to maintain flexibility in our funding activities.

We have endeavored to diversify our funding sources, promote longer liability maturities, stagger interest and principal repayment dates, and otherwise maintain sufficient liquidity and reinforce our funding stability.

Our funding was comprised of borrowings from financial institutions, direct fund procurement from capital markets, and deposits. ORIX Group's total funding including that from short- and long-term debt and deposits on a consolidated basis was ¥5,314,867 million as of June 30, 2014.

Borrowings were procured from a diverse range of financial institutions including major banks, regional banks, foreign banks and life and casualty insurance companies. The number of financial institutions from which we procured borrowings exceeded 200 as of June 30, 2014. Procurement from the capital markets was composed of bonds, medium-term notes, commercial paper, and payables under securitized leases, loan receivables and other assets. ORIX Group accepts deposits for funding purposes, with the majority of deposits attributable to ORIX Bank Corporation.

In an effort to promote longer liability maturities, during the three months ended June 30, 2014, we issued ten-year domestic straight bonds to institutional investors and seven-year domestic straight bonds to retail investors. We intend to continue to strengthen our financial condition, while maintaining an appropriate funding mix.

Short-term and long-term debt and deposits**(a) Short-term debt**

	Millions of yen	
	March 31, 2014	June 30, 2014
Borrowings from financial institutions	¥ 208,598	¥ 172,531
Commercial paper	100,993	161,993
Total short-term debt	¥ 309,591	¥ 334,524

Short-term debt as of June 30, 2014 was ¥334,524 million, which accounted for 8% of the total amount of short and long-term debt (excluding deposits) as compared to 7% as of March 31, 2014.

While the amount of short-term debt as of June 30, 2014 was ¥334,524 million, the sum of cash and cash equivalents and the unused amount of the committed credit facilities as of June 30, 2014 was ¥1,240,032 million.

(b) Long-term debt

	Millions of yen	
	March 31, 2014	June 30, 2014
Borrowings from financial institutions	¥ 2,430,225	¥ 2,412,007
Bonds	1,128,788	1,101,767
Medium-term notes	46,034	45,810
Payables under securitized leases and loan receivables and other assets	253,827	225,429

Total long-term debt	¥ 3,858,874	¥ 3,785,013
----------------------	-------------	-------------

Table of Contents

The balance of long-term debt as of June 30, 2014 was ¥3,785,013 million, which accounted for 92% of the total amount of short and long-term debt (excluding deposits) as compared to 93% as of March 31, 2014. On an adjusted basis, our ratio of long-term debt to total debt (excluding deposits) was 91% as of June 30, 2014 as compared to 92% as of March 31, 2014. This ratio is a non-GAAP financial measure presented on an adjusted basis that excludes payables under securitized leases, loan receivables and other assets. For a discussion of this and other non-GAAP financial measures including reconciliations to the most directly comparable financial measures presented in accordance with GAAP, see 5. Non-GAAP Financial Measures.

(c) Deposits

	Millions of yen	
	March 31, 2014	June 30, 2014
Deposits	¥ 1,206,413	¥ 1,195,330

Apart from the short-term and long-term debt noted above, ORIX Bank Corporation and ORIX Asia Limited accept deposits. These deposit taking subsidiaries are regulated institutions, and loans from these subsidiaries to ORIX Group are subject to maximum regulatory limits.

(4) Summary of Cash Flows

Cash and cash equivalents as of June 30, 2014 increased by ¥753 million to ¥828,052 million compared to March 31, 2014.

Cash flows provided by operating activities were ¥27,247 million in the three months ended June 30, 2014, down from ¥28,919 million during the same period of the previous fiscal year, primarily resulting from an increase in net income, a larger decrease in inventories because of a delivery of the property which was completed, a smaller decrease in restricted cash, a larger decrease in trade notes, accounts payable and other liabilities, in addition to adjustments made for non-cash revenue and expense items such as depreciation and amortization and provision for doubtful receivables and probable loan losses, and for gains on sales of subsidiaries and affiliates and liquidation losses, net compared to the same period of the previous fiscal year.

Cash flows used in investing activities were ¥26,556 million in the three months ended June 30, 2014, while having provided ¥69,853 million during the same period of the previous fiscal year. This change was primarily due to a decrease in principal collected on installment loans, a decrease in proceeds from sales of available-for-sale securities, and an increase in installment loans made to customers mainly in the United States, but partially offset by a decrease in investment in affiliates, net, an increase in proceeds from redemption of available-for-sale securities due to a redemption in investment in securities held for investment purposes in the life insurance business, an increase in sales of subsidiaries, net of cash disposed due to the sale of partial shares of STX Energy.

Cash flows provided by financing activities were ¥2,355 million in the three months ended June 30, 2014, while having used ¥195,799 million during the same period of the previous fiscal year. This change was primarily due to net increase in debt with maturities of three months or less because of new debt compared to net decrease during the same period of the previous fiscal year, a decrease in repayment of debt with maturities longer than three months, and net decrease in deposits due to customers compared to net increase during the same period of the previous fiscal year.

(5) Challenges to be addressed

There were no significant changes for the three months ended June 30, 2014.

(6) Research and Development Activity

There were no significant changes in research and development activity for the three months ended June 30, 2014.

(7) Major facilities

There were no significant changes in major facilities for the three months ended June 30, 2014.

Table of Contents

5. Non-GAAP Financial Measures

The sections 4 Analysis of Financial Results and Condition contains certain financial measures presented on a basis not in accordance with U.S. GAAP (commonly referred to as non-GAAP financial measures), including long-term debt, ORIX Corporation shareholders' equity and total assets, as well as other measures or ratios calculated based on those measures, presented on an adjusted basis, which excludes payables under securitized leases, loan receivables and other assets and reverses the cumulative effect on retained earnings of applying the accounting standards for the consolidation of VIEs under ASU 2009-16 and ASU 2009-17, effective April 1, 2010.

Our management believes these non-GAAP financial measures provide investors with additional meaningful comparisons between our financial condition as of June 30, 2014, as compared to prior periods. Effective April 1, 2010, we adopted ASU 2009-16 and ASU 2009-17, which changed the circumstances under which we are required to consolidate certain VIEs. Our adoption of these accounting standards caused a significant increase in our consolidated assets and liabilities and a decrease in our retained earnings without affecting the net cash flow and economic effects of our investments in such consolidated VIEs. Accordingly, our management believes that providing certain financial measures that exclude the impact of consolidating certain VIEs on our assets and liabilities as a supplement to financial information calculated in accordance with U.S. GAAP enhances understanding of the overall picture of our current financial position and enables investors to evaluate our historical financial and business trends without the large balance sheet fluctuation caused by our adoption of these accounting standards.

We provide these non-GAAP financial measures as supplemental information to our consolidated financial statements prepared in accordance with U.S. GAAP, and they should not be considered in isolation or as substitutes for the most directly comparable U.S. GAAP measures.

The tables set forth below provide reconciliations of these non-GAAP financial measures to the most directly comparable financial measures presented in accordance with U.S. GAAP as reflected in our consolidated financial statements for the periods provided.

Table of Contents

		2014	
		As of March 31, (Millions of yen, except percentage data)	As of June 30,

Notes to Consolidated Financial Statements

1. Overview of Accounting Principles Utilized

In preparing the accompanying consolidated financial statements, ORIX Corporation (the Company) and its subsidiaries have complied with accounting principles generally accepted in the United States of America (U.S. GAAP), modified for the accounting for stock splits (see Note 2 (n)).

These statements include all adjustments (consisting of normal recurring accruals) that we considered necessary to present a fair statement of our results of operations, financial position and cash flows. The results reported in these condensed consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. These condensed consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in our March 31, 2014 consolidated financial statements on Form 20-F.

Since the Company listed on the New York Stock Exchange in September 1998, the Company has filed the annual report (Form 20-F) including the consolidated financial statements with the Securities and Exchange Commission.

Significant differences between U.S. GAAP and generally accepted accounting principles in Japan (Japanese GAAP) are as follows:

(a) Initial direct costs

Under U.S. GAAP, certain initial direct costs to originate leases or loans are being deferred and amortized as yield adjustments over the life of related direct financing leases or loans by using interest method.

Under Japanese GAAP, those initial direct costs are recognized as expenses when they are incurred.

(b) Operating leases

Under U.S. GAAP, revenues from operating leases are recognized on a straight-line basis over the contract terms. Also operating lease assets are depreciated over their estimated useful lives mainly on a straight-line basis.

Japanese GAAP allows for operating lease assets to be depreciated using mainly either a declining-balance basis or a straight-line basis.

(c) Accounting for life insurance operations

Based on ASC 944 (Financial Services Insurance), certain costs related directly to the successful acquisition of new (or renewal of) insurance contracts, or deferred policy acquisition costs, are being deferred and amortized over the respective policy periods in proportion to anticipated premium revenue.

Under Japanese GAAP, such costs are recorded as expenses currently in earnings in each accounting period.

In addition, under U.S. GAAP, although policy liabilities for future policy benefits are established using the net level premium method, based on actuarial estimates of the amount of future policyholder benefits, under Japanese GAAP, these are calculated by the methodology which relevant authorities accept.

(d) Accounting for goodwill and other intangible assets in business combination

Under U.S. GAAP, goodwill and intangible assets that have indefinite useful lives are not amortized, but assessed at least annually for impairment. Additionally, if events or changes in circumstances indicate that the asset might be impaired, the Company and its subsidiaries test for impairment when such events or changes occur.

Under Japanese GAAP, goodwill is amortized over an appropriate period up to 20 years.

(e) Accounting for pension plans

Under U.S. GAAP, the Company and its subsidiaries apply ASC 715 (Compensation Retirement Benefits) and record pension costs based on the amounts determined using actuarial methods. The net actuarial gain (loss) is amortized using a corridor test.

Under Japanese GAAP, the net actuarial gain (loss) is fully amortized over a certain term within the average remaining service period of employees.

Table of Contents

(f) Reporting on discontinued operations

Under U.S. GAAP, in accordance with ASC 205-20 (Presentation of Financial Statements Discontinued Operations), the financial results of discontinued operations and disposal gain or loss, net of applicable income tax effects, are presented as a separate line item from continuing operations in the consolidated statements of income. Results of these discontinued operations from prior periods are reclassified as income from discontinued operations in each prior period presented in the accompanying consolidated statements of income and consolidated statements of cash flows.

Under Japanese GAAP, there are no rules on reporting discontinued operations and the amounts are not presented separately from continuing operations.

(g) Presentation of net income in the consolidated statements of income

Under U.S. GAAP, net income consists of net income attributable to the parent and net income attributable to the noncontrolling interests. Each of them is separately stated in the consolidated statements of income.

Under Japanese GAAP, net income attributable to the minority interests is not included in net income.

(h) Partial sale and additional acquisition of the parent's ownership interest in subsidiaries

Under U.S. GAAP, a partial sale and an additional acquisition of the parent's ownership interest in subsidiaries where the parent continues to retain control of that subsidiary are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained.

Under Japanese GAAP, a partial sale of the parent's ownership interest where the parent continues to retain control is accounted for as a profit-loss transaction and an additional acquisition of the parent's ownership interest is accounted for as a business combination. In addition, in a transaction that results in the loss of control, only the realized gain or loss related to the portion of ownership interest sold is recognized in income and the gain or loss on the remeasurement to fair value of the interest retained is not recognized.

(i) Classification in consolidated statements of cash flows

Classification in the statements of cash flows under U.S. GAAP is based on ASC 230 (Statement of Cash Flows), which differs from Japanese GAAP. As significant differences, purchase of lease equipment and principal payments received under direct financing leases, proceeds from sales of operating lease assets, installment loans made to customers and principal collected on installment loans (excluding issues and collections of loans held for sale) are included in Cash Flows from Investing Activities under U.S. GAAP while they are classified as Cash Flows from Operating Activities under Japanese GAAP.

(j) Securitization of financial assets

Under U.S. GAAP, an enterprise is required to perform analysis to determine whether or not to consolidate special-purpose entities (SPEs) for securitization under the VIE's consolidation rules. As a result of the analysis, if it is determined that the enterprise transferred financial assets in a securitization transaction to an SPE that needs to be consolidated, the transaction is not accounted for as a sale but accounted for as a secured borrowing.

Under Japanese GAAP, an SPE that meets certain conditions may be considered not to be a subsidiary of the transferor. Therefore, if an enterprise transfers financial assets to this type of SPE in a securitization transaction, the transferee SPE is not required to be consolidated, and the enterprise accounts for the transaction as a sale and recognizes a gain or loss on the sale into earnings when control over the transferred assets is surrendered.

Table of Contents

2. Significant Accounting and Reporting Policies

(a) Principles of consolidation

The consolidated financial statements include the accounts of the Company and all of its subsidiaries. Investments in affiliates, where the Company has the ability to exercise significant influence by way of 20%-50% ownership or other means, are accounted for by using the equity method. Where the Company holds majority voting interests but noncontrolling shareholders have substantive participating rights to decisions that occur as part of the ordinary course of their business, the equity method is applied pursuant to ASC 810-10-25-2 to 14 (Consolidation The Effect of Noncontrolling Rights on Consolidation). In addition, the consolidated financial statements also include variable interest entities to which the Company and its subsidiaries are primary beneficiaries pursuant to ASC 810 (Consolidation).

A lag period of up to three months is used on a consistent basis for recognizing the results of certain subsidiaries and affiliates.

All significant intercompany accounts and transactions have been eliminated in consolidation.

(b) Use of estimates

Preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company has identified ten areas where it believes assumptions and estimates are particularly critical to the financial statements. These are the selection of valuation techniques and determination of assumptions used in fair value measurements (see Note 3), the determination and periodic reassessment of the unguaranteed residual value for direct financing leases and operating leases (see (d)), the determination and reassessment of insurance policy liabilities and deferred policy acquisition costs (see (e)), the determination of the allowance for doubtful receivables on direct financing leases and probable loan losses (see (f)), the determination of impairment of long-lived assets (see (g)), the determination of impairment of investment in securities (see (h)), the determination of valuation allowance for deferred tax assets and the evaluation of tax positions (see (i)), the assessment and measurement of effectiveness in hedging relationship using derivative financial instruments (see (k)), the determination of benefit obligation and net periodic pension cost (see (l)) and the determination of impairment of goodwill and intangible assets that have indefinite useful lives (see (w)).

(c) Foreign currencies translation

The Company and its subsidiaries maintain their accounting records in their functional currency. Transactions in foreign currencies are recorded in the entity's functional currency based on the prevailing exchange rates on the transaction date.

The financial statements of overseas subsidiaries and affiliates are translated into Japanese yen by applying the exchange rates in effect at the end of each fiscal period to all assets and liabilities. Income and expenses are translated at the average rates of exchange prevailing during the fiscal period. The currencies in which the operations of the overseas subsidiaries and affiliates are conducted are regarded as the functional currencies of these companies. Foreign currency translation adjustments reflected in accumulated other comprehensive income (loss) arise from the translation of foreign currency financial statements into Japanese yen.

(d) Recognition of revenues

Revenues are recognized when persuasive evidence of an arrangement exists, the service has been rendered or the goods have been delivered to the customer, the transaction price is fixed or determinable and collectibility is reasonably assured.

In addition to the aforementioned general policy, the policies as specifically described hereinafter are applied for each of the major revenue items.

Leases The Company and its subsidiaries lease various assets to customers under direct financing or operating lease arrangements. Classification of a lease arrangement into either a direct financing lease or an operating lease is dependent upon the specific conditions of the arrangement. Revenue recognition policies applied for direct financing leases and operating leases are specifically described in sections following this paragraph. In providing leasing services, the Company and its subsidiaries execute supplemental services, such as paying insurance and handling taxes on leased assets on behalf of lessees. In some cases, automobile maintenance services are also provided to lessees. Where under terms of the lease or related maintenance agreements the Company and its subsidiaries bear the favorable or unfavorable variability of cost, revenues and expenses are recorded on a gross basis. For those arrangements in which the Company and its subsidiaries do not have substantial risks and rewards of ownership, but instead serve as an agent in collecting from lessees and remitting payments to third parties, the Company and its

Edgar Filing: ORIX CORP - Form 6-K

subsidiaries record revenues net of third-party services costs. Revenues from automobile maintenance services are taken into income over the contract period in proportion to the estimated service costs to be incurred and are recorded in other operating revenues in the accompanying consolidated statements of income.

Table of Contents

(1) Recognition of revenues for direct financing leases

Direct financing leases consist of full-payout leases for various equipment types, including office equipment, industrial machinery and transportation equipment. The excess of aggregate lease rentals plus the estimated unguaranteed residual value over the cost of the leased equipment constitutes the unearned lease income to be taken into income over the lease term by using the interest method. The estimated residual values represent estimated proceeds from the disposition of equipment at the time the lease is terminated. Estimates of unguaranteed residual values are based on market values of used equipment, estimates of when and how much equipment will become obsolete, and actual recovery being experienced for similar used equipment. Initial direct costs are being deferred and amortized as a yield adjustment over the life of the related lease by using interest method. The unamortized balance of initial direct costs is reflected as a component of investment in direct financing leases.

(2) Recognition of revenues for operating leases

Revenues from operating leases are recognized on a straight-line basis over the contract terms. Investment in operating leases is recorded at cost less accumulated depreciation, which was ¥449,435 million and ¥459,202 million as of March 31, 2014 and June 30, 2014, respectively. Operating lease assets are depreciated over their estimated useful lives mainly on a straight-line basis. Depreciation expenses are included in costs of operating leases. Gains or losses arising from dispositions of operating lease assets, except real estate under operating leases, are included in operating lease revenues. With respect to some sales of real estate under operating leases such as commercial buildings, the Company and its subsidiaries may retain an interest in some cash flows of the real estate in the form of management or operation of the real estate.

Estimates of residual values are based on market values of used equipment, estimates of when and how much equipment will become obsolete and actual recovery being experienced for similar used equipment.

Installment loans Interest income on installment loans is recognized on an accrual basis. Certain direct loan origination costs, net of origination fees, are deferred and amortized over the contractual term of the loan as an adjustment of the related loan's yield using the interest method.

Interest payments received on impaired loans other than purchased loans are recorded as interest income unless the collection of the remaining investment is doubtful at which time payments received are recorded as reductions of principal. For purchased loans, although the acquired assets may remain loans in legal form, collections on these loans often do not reflect the normal historical experience of collecting delinquent accounts, and the need to tailor individual collateral-realization strategies often makes it difficult to reliably estimate the amount, timing or nature of collections. Accordingly, the Company and its subsidiaries use the cost recovery method of income recognition for such purchased loans regardless of whether impairment is recognized or not.

Non-accrual policy In common with all classes, past-due financing receivables are receivables for which principal or interest is past-due 30 days or more. Loans whose terms have been modified are not classified as past-due financing receivables if the principals and interests are not past-due 30 days or more in accordance with the modified terms. The Company and its subsidiaries suspend accruing revenues on past-due installment loans and direct financing leases when principal or interest is past-due 90 days or more, or earlier, if management determines that their collections are doubtful based on factors such as individual debtors' creditworthiness, historical loss experience, current delinquencies and delinquency trends. Accrued but uncollected interest is reclassified to investment in direct financing leases or installment loans in the accompanying consolidated balance sheets and becomes subject to the allowance for doubtful receivables and probable loan loss process. Cash repayments received on non-accrual loans are applied first against past due interest and then any surpluses are applied to principal in view of the conditions of the contract and obligors. The Company and its subsidiaries return non-accrual loans and lease receivables to accrual status when it becomes probable that the Company and its subsidiaries will be able to collect all amounts due according to the contractual terms of these loans and receivables, as evidenced by continual payments from the debtors. The period of such continual payments before returning to accrual status varies depending on factors that we consider are relevant in assessing the debtor's creditworthiness, such as the debtor's business characteristics and financial conditions as well as relevant economic conditions and trends.

Brokerage commissions and net gains on investment securities Brokerage commissions and net gains on investment securities are recorded on a trade date basis.

Table of Contents

Real estate sales Revenues from the sales of real estate are recognized when a contract is in place, a closing has taken place, the buyer's initial and continuing investment is adequate to demonstrate a commitment to pay for the property and the Company and its subsidiaries do not have a substantial continuing involvement in the property.

Revenues from asset management and servicing The Company and its subsidiaries provide to our customers investment management services for investments in financial assets, and asset management as well as maintenance and administrative services for investments in real estate properties. The Company and its subsidiaries also perform servicing duties on behalf of their customers. The Company and its subsidiaries receive fees for those services from Company's customers.

Revenues from asset management and servicing are recognized in the consolidated statements of income when transactions occur or services are rendered and the amounts are fixed or determinable and collectability of which is reasonably assured. Certain subsidiaries recognize revenues from performance fees when earned based on the performance of the asset under management. Another subsidiary recognizes revenues from performance fees on an accrual basis over the period in which services are performed.

Revenues from asset management and servicing primarily include management fee income and performance fee income. Management fees are calculated based on the predetermined percentages of the market value of the assets under management or net assets of the investment funds in accordance with the contracts with customers. Performance fees are calculated based on the predetermined percentages of the performance of the assets under management in accordance with the contracts with customers.

(e) Insurance premiums and expenses

Premium income from life insurance policies is recognized as earned premiums when due.

Life insurance benefits are recorded as expenses when they are incurred. Policy liabilities for future policy benefits are established using the net level premium method, based on actuarial estimates of the amount of future policyholder benefits.

ASC 944 (Financial Services - Insurance) requires insurance companies to defer certain costs related directly to the successful acquisition of new or renewal insurance contracts, or deferred policy acquisition costs, and amortize them over the respective policy periods in proportion to anticipated premium revenue. These deferred policy acquisition costs consist primarily of first-year commissions in excess of recurring policy maintenance costs and certain variable costs and expenses for underwriting policies.

Amortization charged to income for the three months ended June 30, 2013 and 2014 amounted to ¥1,803 million and ¥2,718 million, respectively.

(f) Allowance for doubtful receivables on direct financing leases and probable loan losses

The allowance for doubtful receivables on direct financing leases and probable loan losses is maintained at a level which, in the judgment of management, is appropriate to provide for probable losses inherent in lease and loan portfolios. The allowance is increased by provision charged to income and is decreased by charge-offs, net of recoveries.

Developing the allowance for doubtful receivables on direct financing leases and probable loan losses is subject to numerous estimates and judgments. In evaluating the appropriateness of the allowance, management considers various factors, including the business characteristics and financial conditions of the obligors, current economic conditions and trends, prior charge-off experience, current delinquencies and delinquency trends, future cash flows expected to be received from the direct financing leases and loans and value of underlying collateral and guarantees. Impaired loans are individually evaluated for a valuation allowance based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. For non-impaired loans, including loans that are not individually evaluated for impairment, and direct financing leases, the Company and its subsidiaries evaluate prior charge-off experience segmented by the debtors' industries and the purpose of the loans, and then develop the allowance for doubtful receivables on direct financing leases and probable loan losses considering the prior charge-off experience and current economic conditions.

The Company and its subsidiaries charge off doubtful receivables when the likelihood of any future collection is believed to be minimal considering debtors' creditworthiness and the liquidation status of collateral.

Table of Contents**(g) Impairment of long-lived assets**

The Company and its subsidiaries have followed ASC 360 (Property, Plant, and Equipment). Under ASC 360, long-lived assets to be held and used in operations, including tangible assets and intangible assets being amortized, consisting primarily of office building, condominiums, golf courses and other operating assets, shall be tested for recoverability whenever events or changes in circumstances indicate that the assets might be impaired. When the undiscounted future cash flows estimated to be generated by those assets are less than the carrying amount of those assets, the net carrying amount of assets not recoverable is reduced to fair value if lower than the carrying amount. The Company and its subsidiaries determine the fair value using appraisals prepared by independent third party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate.

(h) Investment in securities

Trading securities are reported at fair value with unrealized gains and losses included in income.

Available-for-sale securities are reported at fair value, and unrealized gains or losses are recorded in accumulated other comprehensive income (loss), net of applicable income taxes, except investments which are recorded at fair value with unrealized gains and losses included in income by electing the fair value option under ASC 825 (Financial Instruments).

Held-to-maturity securities are recorded at amortized cost.

Other securities are recorded at cost or carrying value that reflects equity income and loss based on the Company's share, except investments which are recorded at fair value with unrealized gains and losses included in income by electing the fair value option under ASC 825.

For available-for-sale securities, the Company and its subsidiaries generally recognize losses related to equity securities for which the fair value has been significantly below the acquisition cost (or current carrying value if an adjustment has been made in the past) for more than six months. Also, the Company and its subsidiaries charge against income losses related to equity securities in situations where, even though the fair value has not remained significantly below the carrying value for six months, the decline in the fair value of an equity security is based on the issuer's specific economic conditions and not just general declines in the related market and where it is considered unlikely that the fair value of the equity security will recover within six months.

For debt securities, where the fair value is less than the amortized cost, the Company and its subsidiaries consider whether those securities are other-than-temporarily impaired using all available information about their collectability. The Company and its subsidiaries do not consider a debt security to be other-than-temporarily impaired if (1) the Company and its subsidiaries do not intend to sell the debt security, (2) it is not more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis and (3) the present value of estimated cash flows will fully cover the amortized cost of the security. On the other hand, the Company and its subsidiaries consider a debt security to be other-than-temporarily impaired if any of the above mentioned three conditions are not met. When the Company and its subsidiaries deem a debt security to be other-than-temporarily impaired, the Company and its subsidiaries recognize the entire difference between the amortized cost and the fair value of the debt securities if the Company and its subsidiaries intend to sell the debt security or it is more likely than not that the Company and its subsidiary will be required to sell the debt security before recovery of its amortized cost basis less any current-period credit loss. However, if the Company and its subsidiaries do not intend to sell the debt security and it is not more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis less any current-period credit loss, the Company and its subsidiaries separate the difference between the amortized cost and the fair value of the debt securities into the credit loss component and the non-credit loss component. The credit loss component is recognized in earnings, and the non-credit loss component is recognized in other comprehensive income (loss), net of applicable income taxes.

For other securities, when the Company and its subsidiaries determine the decline in value is other than temporary the Company and its subsidiaries reduce the carrying value of the security to the fair value and charge against income losses related to these other securities in situations.

(i) Income taxes

The Company, in general, determines its provision for income taxes for quarterly periods by applying the current estimate of the effective tax rate for the full fiscal year to the actual year-to-date income before income taxes and discontinued operations. The estimated effective tax rate is determined by dividing the estimated provision for income taxes for the full fiscal year by the estimated income before income taxes and discontinued operations for the full fiscal year.

Table of Contents

At the fiscal year end, income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized.

The effective income tax rates including discontinued operations for the three months ended June 30, 2013 and 2014 were 34.4% and 35.0%, respectively. For the three months ended June 30, 2013, the Company and its subsidiaries in Japan are subject to a National Corporate tax of approximately 28%, an Inhabitant tax of approximately 5% and a deductible Enterprise tax of approximately 8%, which in the aggregate result in a statutory income tax rate of approximately 38.3%. For the three months ended June 30, 2014, as a result of the tax reforms as discussed in the following paragraph, the National Corporation tax was reduced from approximately 28% to approximately 26% and accordingly, the statutory income tax rate was reduced to approximately 35.9%. The effective income tax rate is different from the statutory tax rate primarily because of certain non-deductible expenses for tax purposes, non-taxable income for tax purposes, the effect of lower income tax rates on foreign subsidiaries and a life insurance subsidiary in Japan, and a change in valuation allowance.

On March 20, 2014, the bill for reconstruction funding and the bill for local corporate tax were approved by the National Diet of Japan. For the fiscal year beginning on April 1, 2014, special corporate tax for reconstruction will not be charged, and as a result, the statutory income tax rate for the fiscal year beginning on April 1, 2014 was reduced from approximately 38.3% to approximately 35.9%. In addition, from fiscal years beginning on or after October 1, 2014, the statutory national income tax rate will increase from approximately 23.6% to approximately 24.6% and the statutory local income tax rate will decrease from approximately 12.3% to approximately 11.3%, while total statutory income tax rate will remain at 35.9%.

The Company and its subsidiaries have followed ASC 740 (Income Taxes). According to ASC 740, the Company and its subsidiaries recognize the financial statement effects of a tax position taken or expected to be taken in a tax return when it is more likely than not, based on the technical merits, that the position will be sustained upon tax examination, including resolution of any related appeals or litigation processes, and measure the tax position that meets the recognition threshold at the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the taxing authority. The Company and its subsidiaries classify penalties and interest expense related to income taxes as part of provision for income taxes in the consolidated statements of income.

The Company and certain consolidated subsidiaries have elected to file a consolidated tax return for National Corporation tax purposes.

The Company and its subsidiaries adopted Accounting Standards Update 2013-11 (Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists – ASC 740 (Income Taxes)) on April 1, 2014.

(j) Securitized assets

The Company and its subsidiaries have securitized and sold to investors various financial assets such as lease receivables and loan receivables. In the securitization process, the assets to be securitized (the assets) are sold to trusts or SPEs that issue asset-backed beneficial interests and securities to the investors.

In accordance with ASC 860 (Transfers and Servicing) and ASC 810 (Consolidation), trusts or SPEs used in securitization transactions are consolidated if the Company and its subsidiaries are the primary beneficiary of the trusts or SPEs, and the transfers of the financial assets to those consolidated trusts and SPEs are not accounted for as sales. Assets held by consolidated trusts or consolidated SPEs continue to be accounted for as lease receivables and loan receivable, as they were before the transfer, and asset-backed beneficial interests and securities issued to the investors are accounted for as debt. When the Company and its subsidiaries have transferred financial assets to a transferee that is not subject to consolidation, the Company and its subsidiaries account for the transfer as a sale if control over the transferred assets is surrendered.

A certain subsidiary originates and sells loans into the secondary market, while retaining the obligation to service those loans. In addition, it undertakes obligations to service loans originated by others. The subsidiary recognizes servicing assets if it expects the benefit of servicing to more than adequately compensate it for performing the servicing or recognizes servicing liabilities if it expects the benefit of servicing to less than adequately compensate it. These servicing assets and liabilities are initially recognized at fair value and subsequently accounted for using the amortization method whereby the assets and liabilities are amortized in proportion to and over the period of estimated net servicing income or net servicing loss. On a quarterly basis, servicing assets and liabilities are evaluated for impairment or increased obligations. The fair value of

Edgar Filing: ORIX CORP - Form 6-K

servicing assets and liabilities is estimated using an internal valuation model, or by obtaining an opinion of value from an independent third-party vendor. Both methods are based on calculating the present value of estimated future net servicing cash flows, taking into consideration discount rates, prepayments and servicing costs. The internal valuation model is validated at least semiannually through third-party valuations.

Table of Contents

(k) Derivative financial instruments

The Company and its subsidiaries apply ASC 815 (Derivatives and Hedging), and all derivatives held by the Company and its subsidiaries are recognized on the consolidated balance sheets at fair value. The accounting treatment of subsequent changes in the fair value depends on their use, and whether they qualify as effective hedges for accounting purposes. Derivatives that are not hedges must be adjusted to fair value through the consolidated statements of income. If a derivative is a hedge, then depending on its nature, changes in its fair value will be either offset against change in the fair value of hedged assets or liabilities through the consolidated statements of income, or recorded in other comprehensive income (loss).

If a derivative is held as a hedge of the variability of fair value related to a recognized asset or liability or an unrecognized firm commitment (fair value hedge), changes in the fair value of the derivative are recorded in earnings along with the changes in the fair value of the hedged item.

If a derivative is held as a hedge of the variability of cash flows related to a forecasted transaction or a recognized asset or liability (cash flow hedge), changes in the fair value of the derivative are recorded in other comprehensive income (loss) to the extent that the derivative is effective as a hedge, until earnings are affected by the variability in cash flows of the designated hedged item.

If a derivative is held as a hedge of a foreign-currency fair-value or cash-flow hedge (foreign currency hedge), changes in the fair value of the derivative are recorded in either earnings or other comprehensive income (loss), depending on whether the hedged transaction is a fair-value hedge or a cash-flow hedge. However, if a derivative is used as a hedge of a net investment in a foreign operation, changes in its fair value, to the extent effective as a hedge, are recorded in the foreign currency translation adjustments account within other comprehensive income (loss).

Changes in the fair value of a derivative that are not held as a hedge, such as those held for trading use, or the ineffective portion of the change in fair value of derivatives that qualify as a hedge, are recorded in earnings.

For all hedging relationships, at inception the Company and its subsidiaries formally document the details of the hedging relationship and the hedged activity. The Company and its subsidiaries also formally assess, both at the hedge s inception and on an ongoing basis, the effectiveness of the hedge relationship. The Company and its subsidiaries cease hedge accounting prospectively when the derivative no longer qualifies for hedge accounting.

(l) Pension plans

The Company and certain subsidiaries have contributory and non-contributory pension plans covering substantially all of their employees. The Company and its subsidiaries apply ASC 715 (Compensation Retirement Benefits), and the costs of pension plans are accrued based on amounts determined using actuarial methods, with assumptions of discount rate, rate of increase in compensation level, expected long-term rate of return on plan assets and others.

The Company and its subsidiaries also recognize the funded status of pension plans, measured as the difference between the fair value of plan assets and the benefit obligation, on the consolidated balance sheets. Changes in that funded status are recognized in the year in which the changes occur through other comprehensive income (loss), net of applicable income taxes.

(m) Stock-based compensation

The Company and its subsidiaries apply ASC 718 (Compensation Stock Compensation). ASC 718 requires, with limited exception, that the cost of employee services received in exchange for an award of equity instruments be measured based on the grant-date fair value. The costs are recognized over the requisite employee service period.

(n) Stock splits

Stock splits implemented prior to October 1, 2001 had been accounted for by transferring an amount equivalent to the par value of the shares from additional paid-in capital to common stock as required by the Japanese Commercial Code (the Code) before amendment. However, no such reclassification was made for stock splits when common stock already included a portion of the proceeds from shares issued at a price in excess of par value. This method of accounting was in conformity with accounting principles generally accepted in Japan.

Table of Contents

As a result of a revision to the Code before amendment effective on October 1, 2001 and the Companies Act implemented on May 1, 2006, the above-mentioned method of accounting required by the Code has become unnecessary.

In the United States, stock splits in comparable circumstances are considered to be stock dividends and are accounted for by transferring from retained earnings to common stock and additional paid-in capital amounts equal to the fair market value of the shares issued. Common stock is increased by the par value of the shares and additional paid-in capital is increased by the excess of the market value over par value of the shares issued. Had such stock splits made prior to October 1, 2001 been accounted for in this manner, additional paid-in capital as of June 30, 2014 would have increased by approximately ¥24,674 million, with a corresponding decrease in retained earnings. Total ORIX Corporation shareholders' equity would remain unchanged. A stock split on May 19, 2000 and April 1, 2013 was excluded from the above amounts because the stock split was not considered to be a stock dividend under U.S. GAAP.

(o) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits placed with banks and short-term highly liquid investments with original maturities of three months or less.

(p) Restricted cash

Restricted cash consists of trust accounts under securitization programs and real estate, deposits related to servicing agreements, deposits collected on the underlying assets and applied to non-recourse loans and others.

(q) Installment loans

Certain loans, for which the Company and its subsidiaries have the intent and ability to sell to outside parties in the foreseeable future, are considered held for sale and are carried at the lower of cost or market value determined on an individual basis, except loans held for sale for which the fair value option under ASC 825 (Financial Instruments) was elected. A subsidiary elected the fair value option under ASC 825 on its loans held for sale originated on or after October 1, 2011. The subsidiary enters into forward sale agreements to offset the change in the fair value of loans held for sale, and the election of the fair value option allows the subsidiary to recognize both the change in the fair value of the loans and the change in the fair value of the forward sale agreements due to changes in interest rates in the same accounting period.

Loans held for sale are included in installment loans and the outstanding balances of these loans as of March 31, 2014 and June 30, 2014 were ¥14,267 million and ¥10,230 million, respectively. There were ¥12,631 million and ¥7,809 million of loans held for sale as of March 31, 2014 and June 30, 2014, respectively, measured at fair value by electing the fair value option.

(r) Other operating assets

Other operating assets consist primarily of operating facilities (including golf courses, hotels, training facilities and senior housing), which are stated at cost less accumulated depreciation, and depreciation is calculated mainly on a straight-line basis over the estimated useful lives of the assets. Accumulated depreciation were ¥62,182 million and ¥61,847 million as of March 31, 2014 and June 30, 2014, respectively.

(s) Other receivables

Other receivables primarily include payments made on behalf of lessees for property tax, maintenance fees and insurance premiums in relation to direct financing lease contracts, accounts receivables in relation to sales of assets to be leased, residential condominiums and other assets, accrued revenue in relation to business operations and derivative assets.

(t) Inventories

Inventories primarily consist of advance and/or progress payments for development of residential condominiums for sale and completed residential condominiums (including completed residential condominiums waiting to be delivered to buyers under the contracts for sale). Advance and/or progress payments for development of residential condominiums for sale are carried at cost less any impairment losses and finished goods (including completed residential condominiums) are stated at the lower of cost or market. As of March 31, 2014, and June 30, 2014, advance and/or progress payments were ¥111,813 million and ¥84,889 million, respectively, and finished goods were ¥24,291 million and ¥42,345 million, respectively.

Table of Contents

For the three months ended June 30, 2013, a certain subsidiary recorded ¥3,257 million of write-downs principally for advance and/or progress payments for development of residential condominiums for sale, resulting from an increase in development costs and/or a decrease in expected sales price. For the three months ended June 30, 2014, no write-downs were recorded. These write-downs were recorded in costs of real estate sales and included in the Real Estate segment.

(u) Office facilities

Office facilities are stated at cost less accumulated depreciation. Depreciation is calculated on a declining-balance basis or straight-line basis over the estimated useful lives of the assets. Accumulated depreciation was ¥39,747 million and ¥40,088 million as of March 31, 2014 and June 30, 2014, respectively.

(v) Other assets

Other assets consist primarily of the excess of purchase prices over the net assets acquired in acquisitions (goodwill) and other intangible assets (see (w)), deferred insurance policy acquisition costs which are amortized over the contract periods, leasehold deposits, advance payments made in relation to purchases of assets to be leased and construction of real estate for operating lease, and deferred tax assets.

(w) Goodwill and other intangible assets

The Company and its subsidiaries have followed ASC 805 (Business Combinations) and ASC 350 (Intangibles). ASC 805 requires that all business combinations be accounted for using the acquisition method. It also requires that intangible assets acquired in a business combination be recognized apart from goodwill if the intangible assets meet one of two criteria either the contractual-legal criterion or the separability criterion. In a business combination achieved in stages, the Company and its subsidiaries remeasure their previously held equity interest at their acquisition-date fair value and recognize the resulting gain or loss, if any, in earnings.

ASC 350 establishes how intangible assets (other than those acquired in a business combination) should be accounted for upon acquisition. It also addresses how goodwill and other intangible assets should be accounted for subsequent to their acquisition. Goodwill and intangible assets that have indefinite useful lives are not amortized but tested at least annually for impairment. Additionally, if events or changes in circumstances indicate that the asset might be impaired, we test for impairment when such events or changes occur. Under ASC 350, the Company and its subsidiaries may perform a qualitative assessment to determine whether to calculate the fair value of a reporting unit under the first step of the two-step goodwill impairment test. If, after assessing the totality of events or circumstances, it is determined that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then the Company and/or subsidiaries do not perform the two-step impairment test. However, if the Company and/or subsidiaries conclude otherwise, the Company and/or subsidiaries perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the fair value of the reporting unit falls below its carrying amount, then the Company and/or subsidiaries perform the second step of the goodwill impairment test by comparing the fair value of goodwill with its carrying amount. If the carrying amount of goodwill exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The Company and its subsidiaries test the goodwill either at the operating segment level or one level below the operating segments. The Company and its subsidiaries perform the qualitative assessment for some goodwill but bypass the qualitative assessment and proceed directly to the first step of the two-step impairment test for other goodwill.

According to ASC 350, the Company and its subsidiaries may perform a qualitative assessment to determine whether it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, the Company and/or subsidiaries conclude that it is not more likely than not that the indefinite-lived asset is impaired, then the Company and/or subsidiaries do not perform the quantitative impairment test. However, if the Company and/or subsidiaries conclude otherwise, the Company and/or subsidiaries calculate the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test. If the carrying amount of the indefinite-lived intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The Company and its subsidiaries perform the qualitative assessment for some indefinite-lived intangible assets but bypass the qualitative assessment and perform the quantitative assessment for other indefinite-lived intangible assets.

Intangible assets with finite lives are amortized over their useful lives and tested for impairment in accordance with ASC 360 (Property, Plant, and Equipment).

Table of Contents

The amount of goodwill is ¥366,375 million and ¥305,599 million as of March 31, 2014 and June 30, 2014, respectively.

The amount of other intangible assets is ¥323,225 million and ¥378,418 million as of March 31, 2014 and June 30, 2014, respectively.

(x) Trade notes, accounts payable and other liabilities

Trade notes, accounts payable and other liabilities include accounts payables, guarantee liabilities, and derivative liabilities.

(y) Capitalization of interest costs

The Company and its subsidiaries capitalized interest costs related to specific long-term development projects.

(z) Advertising

The costs of advertising are expensed as incurred.

(aa) Discontinued operations

In April 2014, Accounting Standards Update 2014-08 (Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity ASC 205 (Presentation of Financial Statements) and ASC 360 (Property, Plant, and Equipment)) was issued. This Update requires an entity to report a disposal or a classification as held for sale of a component of an entity or a group of components of an entity in discontinued operations if it represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. The Company and its subsidiaries early adopted this Update on April 1, 2014. In accordance with this Update, the Company and its subsidiaries report a disposal of a component or a group of components of the Company and its subsidiaries in discontinued operations if the disposal represents a strategic shift which has (or will have) a major effect on the company and its subsidiaries' operations and financial results when the component or group of components is disposed by sale or classified as held for sale on or after April 1, 2014.

During the three months ended June 30, 2013, the Company and its subsidiaries have followed ASC 205-20 (Presentation of Financial Statements Discontinued Operations) prior to the early adoption of the amendments. Under ASC 205-20 prior to the early adoption of the amendments, the scope of discontinued operations includes the operating results of any component of an entity with its own identifiable operations and cash flow and in which operations the Company and its subsidiaries will not have significant continuing involvement. Included in reported discontinued operations are the operating results of operations for the subsidiaries, the business units and certain properties sold or to be disposed of by sale without significant continuing involvements, which results of operations for prior periods presented have also been reclassified as discontinued operations in the accompanying consolidated statements of income and consolidated statements of cash flows. During the three months ended June 30, 2014, where the Company and its subsidiaries have significant continuing involvement in the operations from the real estate under operating leases which have been disposed of, the gains or losses arising from such disposition are separately disclosed as gains on sales of real estate under operating leases, whereas if the Company and its subsidiaries have no significant continuing involvement in the operations from such disposed real estate, the gains or losses are reported as income from discontinued operations, net.

Accounting Standards Update 2014-08 do not apply to a disposal or a classification as held for sale of a component or a group of components of the Company and its subsidiaries which have previously been reported in the financial statements. Accordingly, during the three months ended June 30, 2014, the Company and its subsidiaries continue to report gains on sales and the results of operations of subsidiaries, business units, and certain rental properties, which was classified as held for sale at March 31, 2014, as income from discontinued operations in the accompanying consolidated statements of income in accordance with ASC 205-20 prior to the early adoption of the amendments.

(ab) Earnings per share

Basic earnings per share is computed by dividing the income attributable to ORIX Corporation shareholders from continuing operations and net income attributable to ORIX Corporation shareholders by the weighted average number of shares of outstanding common stock in each period and diluted earnings per share, which reflects the potential dilution that could occur if securities or other contracts issuing common stock were exercised or converted into common stock. Earnings per share is adjusted for any stock splits and stock dividends retrospectively.

(ac) Partial sale and additional acquisition of the parent's ownership interest in subsidiaries

Edgar Filing: ORIX CORP - Form 6-K

A partial sale and an additional acquisition of the parent's ownership interest in subsidiaries where the parent continues to retain control of that subsidiary are accounted for as equity transactions. On the other hand, in a transaction that results in the loss of control, the gain or loss recognized in income includes the realized gain or loss related to the portion of ownership interest sold and the gain or loss on the remeasurement to fair value of the interest retained.

Table of Contents

(ad) Redeemable noncontrolling interests

Noncontrolling interests in certain subsidiaries are redeemable preferred shares which are subject to call and put rights upon certain shareholder events. As redemption of the noncontrolling interest is not solely in the control of the subsidiary, it is recorded between Liabilities and Equity on the consolidated balance sheets at its estimated redemption value in accordance with provisions including EITF Topic No. D-98 (ASC 480-10-s99-3A) (Classification and Measurement of Redeemable Securities).

(ae) Issuance of stock by an affiliate

When an affiliate issues stock to unrelated third parties, the Company and its subsidiaries' ownership interest in the affiliate decreases. In the event that the price per share is more or less than the Company and its subsidiaries' average carrying amount per share, the Company and its subsidiaries adjust the carrying amount of its investment in the affiliate and recognize gain or loss in the consolidated statements of income in the year in which the change in ownership interest occurs.

(af) New accounting pronouncements

In February 2013, Accounting Standards Update 2013-04 (Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date ASC 405 (Liabilities)) was issued. This Update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, as the sum of the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. The Company and its subsidiaries adopted this Update on April 1, 2014. The adoption had no effect on the Company and its subsidiaries' results of operations or financial position.

In March 2013, Accounting Standards Update 2013-05 (Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity ASC 830 (Foreign Currency Matters)) was issued. This Update requires that when a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent release any related cumulative translation adjustment into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. This Update continues to require an entity to release a pro rata portion of the cumulative translation adjustment into net income upon a partial sale of an equity method investment that is a foreign entity. This Update requires an acquirer to release any related cumulative translation adjustment into net income when the acquirer obtains a controlling financial interest in a foreign entity that was previously an equity method affiliate in a business combination achieved in stages. The Company and its subsidiaries adopted this Update on April 1, 2014. The adoption had no effect on the Company and its subsidiaries' results of operations or financial position.

Table of Contents

In April 2013, Accounting Standards Update 2013-07 (Liquidation Basis of Accounting ASC 205 (Presentation of Financial Statements)) was issued. This Update requires an entity to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent and provides principles for the recognition and measurement of assets and liabilities and requirements for financial statements prepared using the liquidation basis of accounting. The Company and its subsidiaries adopted this Update on April 1, 2014. The adoption had no effect on the Company and its subsidiaries' results of operations or financial position.

In June 2013, Accounting Standards Update 2013-08 (Amendments to the Scope, Measurement, and Disclosure Requirements ASC 946 (Financial Services Investment Companies)) was issued. This Update changes the approach to the investment company assessment, clarifies the characteristics of an investment company, and provides comprehensive guidance for assessing whether an entity is an investment company. This Update requires an investment company to measure noncontrolling ownership interests in other investment companies at fair value rather than using the equity method of accounting. This Update requires an investment company to disclose the additional information about an entity's status as an investment company and financial support provided or contractually required to be provided by an investment company to its investees. The Company and its subsidiaries adopted this Update on April 1, 2014. The adoption had no material effect on the Company and its subsidiaries' results of operations or financial position.

In July 2013, Accounting Standards Update 2013-11 (Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists ASC 740 (Income Taxes)) was issued. This Update requires an entity to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss carryforward, or similar tax loss or tax credit carryforward, rather than as a liability, with certain exceptions. The Company and its subsidiaries adopted this Update on April 1, 2014. The adoption had no effect on the Company and its subsidiaries' results of operations or financial position.

In January 2014, Accounting Standards Update 2014-04 (Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure ASC 310-40 (Receivables Troubled Debt Restructurings by Creditors)) was issued. This Update clarifies when a creditor is considered to have received physical possession resulting from an in substance repossession or foreclosure of residential real estate property collateralizing a consumer mortgage loan. Additionally, this Update requires an entity to disclose the amount of foreclosed residential real estate property and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. This Update is effective for fiscal years, and interim periods within those annual periods beginning after December 15, 2014. The amendments should be applied on either a prospective basis or a modified retrospective basis. Early adoption is permitted. The adoption is not expected to have a material effect on the Company and its subsidiaries' results of operations or financial position.

In April 2014, Accounting Standards Update 2014-08 (Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity ASC 205 (Presentation of Financial Statements) and ASC 360 (Property, Plant, and Equipment)) was issued. This Update requires an entity to report a disposal (or a classification as held for sale) of a component of an entity or a group of components of an entity in discontinued operations if it represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. This Update requires an entity to present, for each comparative period, the assets and liabilities of discontinued operations separately in the asset and liability sections, respectively, of the statement of financial position. Furthermore, this Update requires additional disclosures about discontinued operations and a disposal of an individually significant component that does not qualify for discontinued operations. The Company and its subsidiaries early adopted this Update on April 1, 2014. The adoption had no material effect on the Company and its subsidiaries' results of operations or financial position.

In May 2014, Accounting Standards Update 2014-09 (Revenue from Contracts with Customers ASC 606 (Revenue from Contracts with Customers)) was issued. The core principle of this Update is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply a five-step model to determine when to recognize revenue, and in what amount. The five steps to apply the model are:

Identify the contract(s) with a customer

Identify the performance obligations in the contract

Determine the transaction price

Edgar Filing: ORIX CORP - Form 6-K

Allocate the transaction price to the performance obligations in the contract

Recognize revenue when (or as) the entity satisfies a performance obligation

Table of Contents

This Update requires an entity to disclose more information about contracts with customers than under the current disclosure requirements. The Update is effective for fiscal years, and interim periods within those years beginning after December 15, 2016. Early adoption is prohibited. An entity should apply the amendments in this Update using either a retrospective method or a cumulative-effect method. The entity using the retrospective method may elect some optional expedients to simplify a full retrospective basis. The entity using the cumulative-effect method would recognize the cumulative effect of initially applying this Update as an adjustment to the opening balance of retained earnings or net assets at the date of initial application. The Company and its subsidiaries are currently evaluating the effect that the adoption of this Update will have on the Company and its subsidiaries' results of operations and financial position.

In June 2014, Accounting Standards Update 2014-11 (Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures – ASC 860 (Transfers and Servicing)) was issued. This Update requires an entity to account for repurchase-to-maturity transactions as secured borrowings. This Update eliminates the guidance on repurchase financing transactions in ASC 860-10-40-42 through 40-47 and requires the transferor and transferee to symmetrically account for the initial transfer of the financial asset as a sale (provided that derecognition conditions are met) and purchase, respectively. Additionally, this Update requires new disclosure requirements related to certain transfers of financial assets that are accounted for as sales and certain transfers accounted for as secured borrowings. This Update is effective for fiscal years, and interim periods within those annual periods beginning after December 15, 2014. Early adoption is prohibited. Generally, the effect of adopting this Update on the Company and its subsidiaries' results of operations or financial position will depend on future transactions.

In June 2014, Accounting Standards Update 2014-12 (Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period a consensus of the FASB Emerging Issues Task Force – ASC 718 (Compensation – Stock Compensation)) was issued. This Update requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. This Update is effective for fiscal years, and interim periods within those annual periods beginning after December 15, 2015. The amendments in this Update should be applied on either a prospective basis or a modified retrospective basis. Early adoption is permitted. The adoption is not expected to have a material effect on the Company and its subsidiaries' results of operations and financial position.

(ag) Reclassifications

Certain amounts in fiscal 2014 consolidated financial statements have been reclassified to conform to fiscal 2015 presentation.

Table of Contents

3. Fair Value Measurements

The Company and its subsidiaries adopted ASC 820 (Fair Value Measurement). This Codification Section defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

This Codification Section classifies and prioritizes inputs used in valuation techniques to measure fair value into the following three levels:

Level 1: Inputs of quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.

Level 3: Unobservable inputs for the assets or liabilities.

This Codification Section differentiates between those assets and liabilities required to be carried at fair value at every reporting period (recurring) and those assets and liabilities that are only required to be adjusted to fair value under certain circumstances (nonrecurring). The Company and its subsidiaries mainly measure certain loans held for sale, trading securities, available-for-sale securities, certain investment funds, derivatives and certain contingent consideration at fair value on a recurring basis.

Table of Contents

The following table presents recorded amounts of major financial assets and liabilities measured at fair value on a recurring basis as of March 31, 2014 and June 30, 2014:

March 31, 2014

	Millions of yen			
	Total carrying value in Consolidated Balance Sheets	Quoted prices in active markets for identical assets or liabilities (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

*1 A subsidiary elected the fair value option under ASC 825 (Financial Instrument) on the loans held for sale originated on or after October 1, 2011. These loans are multi-family and seniors housing loans and are sold to Federal National Mortgage Association (Fannie Mae) or institutional investors. Included in other operating revenues in the consolidated statements of income are losses from the change in the fair value of the loans of ¥694 million and ¥1 million for the three months ended June 30, 2013 and 2014, respectively. No gains or losses were recognized in earnings during the three months ended June 30, 2013 and the three months ended June 30, 2014, attributable to changes in instrument-specific credit risk. The amounts of aggregate unpaid principal balance and aggregate fair value of the loans held for sale at March 31, 2014, are ¥12,024 million and ¥12,631 million, respectively, and the amount of the aggregate fair value exceeds the amount of aggregate unpaid principal balance by ¥607 million. The amounts of aggregate unpaid principal balance and aggregate fair value of the loans held for sale as of June 30, 2014, are ¥7,213 million and ¥7,809 million, respectively, and the amount of the aggregate fair value

Edgar Filing: ORIX CORP - Form 6-K

exceeds the amount of aggregate unpaid principal balance by ¥596 million. As of March 31, 2014 and June 30, 2014, there are no loans that are 90 days or more past due, in non-accrual status, or both.

- *2 Certain subsidiary elected the fair value option under ASC 825 (Financial Instruments) for investments in equity securities included in available-for-sale securities. Included in brokerage commissions and net gains on investment securities in the consolidated statements of income were gains from the change in the fair value of those investments of ¥220 million for the three months ended June 30, 2014. The amounts of aggregate fair value elected the fair value option were ¥5,116 million and ¥5,210 million as of March 31, 2014 and June 30, 2014, respectively.
- *3 Certain subsidiaries elected the fair value option under ASC 825 (Financial Instruments) for investments in some funds. Included in brokerage commissions and net gains on investment securities in the consolidated statements of income were gains from the change in the fair value of those investments of ¥188 million and ¥168 million for the three months ended June 30, 2013 and the three months ended June 30, 2014. The amounts of aggregate Investment funds and aggregate fair value are ¥6,317 million and ¥10,768 million as of March 31, 2014 and June 30, 2014, respectively.

Table of Contents

Changes in economic conditions or valuation methodologies may require the transfer of assets and liabilities from one fair value level to another. In such instances, the Company and its subsidiaries recognize the transfer at the beginning of the quarter during which the transfers occur. For the three months ended June 30, 2013 and 2014, there were no transfers between Level 1 and Level 2.

The following table presents the reconciliation for financial assets and liabilities (net) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended June 30, 2013 and 2014:

Three months ended June 30, 2013

	Millions of yen								Balance at June 30, 2013	Change in unrealized gains or losses included in earnings for assets and liabilities still held at June 30, 2013 *1

Contingent consideration	2,833	413	0	413	0	0	0	0	2,420	413

*1 Principally, gains and losses from available-for-sale securities are included in brokerage commissions, net gains on investment securities, write-downs of securities or life insurance premiums and related investment income ; other securities are included in brokerage commissions and net gains on investment securities and derivative assets and liabilities (net) are included in other operating revenues/expenses, and gains from accounts payable are included in other operating revenues. Also, for available-for-sale securities, amortization of interest recognized in interest on loans and investment securities is included in these columns.

*2 Unrealized gains and losses from available-for-sale securities are included in Net change of unrealized gains (losses) on investment in securities .

There were no transfers in or out of Level 3 in the three months ended June 30, 2013 and 2014.

Table of Contents

The following table presents recorded amounts of assets and liabilities measured at fair value on a nonrecurring basis as of March 31, 2014 and June 30, 2014. These assets are measured at fair value on a nonrecurring basis mainly to recognize impairment.

March 31, 2014

	Millions of yen			
	Total carrying value in Consolidated Balance Sheets	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

Table of Contents

The following is a description of the valuation process and the main valuation methodologies used for assets and liabilities measured at fair value.

Valuation process

The Company and its subsidiaries determine fair value of Level 3 assets and liabilities by using valuation techniques, such as internally developed models, or using third-party pricing information. Internally developed models include the discounted cash flow methodologies and direct capitalization methodologies. To measure the fair value of the assets and liabilities, the Company and its subsidiaries select the valuation technique which best reflects the nature, characteristics and risks of each asset and liability. The appropriateness of valuation methods and unobservable inputs is verified when measuring fair values of the assets and liabilities by using internally developed models. The Company and its subsidiaries also use third-party pricing information to measure the fair value of certain assets and liabilities. In that case, the Company and its subsidiaries verify the appropriateness of the prices by monitoring available information about the assets and liabilities, such as current conditions of the assets or liabilities, as well as surrounding market information. When these prices are determined to be able to reflect the nature, characteristics and risks of assets and liabilities reasonably, the Company and its subsidiaries use these prices as fair value of the assets and liabilities.

Loans held for sale

Certain loans, which the Company and its subsidiaries have the intent and ability to sell to outside parties in the foreseeable future, are considered held-for-sale. The loans held for sale in the United States are classified as Level 2, because the Company and its subsidiaries measure their fair value based on a market approach using inputs other than quoted prices that are observable for the assets such as treasury rate, swap rate and market spread.

Real estate collateral-dependent loans

The valuation allowance for large balance non-homogeneous loans is individually evaluated based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. According to ASC 820 (Fair Value Measurement), measurement for impaired loans determined using a present value technique is not considered a fair value measurement. However, measurement for impaired loans determined using the loan's observable market price or the fair value of the collateral securing the collateral-dependent loans are fair value measurements and are subject to the disclosure requirements for nonrecurring fair value measurements.

The Company and its subsidiaries determine the fair value of the real estate collateral of real estate collateral-dependent loans using appraisals prepared by independent third party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. The Company and its subsidiaries generally obtain a new appraisal once a fiscal year. In addition, the Company and its subsidiaries periodically monitor circumstances of the real estate collateral and then obtain a new appraisal in situations involving a significant change in economic and/or physical conditions, which may materially affect the fair value of the collateral. Real estate collateral-dependent loans whose fair values are estimated using appraisals of the underlying collateral based on these valuation techniques are classified as Level 3 because such appraisals involve unobservable inputs. These unobservable inputs contain discount rates and cap rates as well as future cash flows estimated to be generated from real estate collateral. An increase (decrease) in the discount rate or cap rate and a decrease (increase) in the estimated future cash flows would result in a decrease (increase) in the fair value of real estate collateral-dependent loans.

Investment in operating leases and other operating assets and Land and buildings undeveloped or under construction

Investment in operating leases measured at fair value is mostly real estate. The Company and its subsidiaries determine the fair value of Investment in operating leases and other operating assets and Land and buildings undeveloped or under construction using appraisals prepared by independent third party appraisers or the Company's own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flow methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. The Company and its subsidiaries classified the assets as Level 3 because such appraisals involve unobservable inputs. These unobservable inputs contain discount rates as well as future cash flows estimated to be generated from the assets or projects. An increase (decrease) in the discount rate and a decrease (increase) in the estimated future cash flows would result in a decrease (increase) in the fair value of investment in operating leases and other operating assets and Land and buildings undeveloped or under construction.

Table of Contents***Trading securities, Available-for-sale securities***

If active market prices are available, fair value measurement is based on quoted active market prices and, accordingly, these securities are classified as Level 1. If active market prices are not available, fair value measurement is based on observable inputs other than quoted prices included within Level 1, such as prices for similar assets and accordingly these securities are classified as Level 2. If market prices are not available and there are no observable inputs, then fair value is estimated by using valuation models including discounted cash flow methodologies, commonly used option-pricing models and broker quotes. Such securities are classified as Level 3, as the valuation models and broker quotes are based on inputs that are unobservable in the market. If fair value is based on broker quotes, the Company and its subsidiaries check the validity of received prices based on comparison to prices of other similar assets and market data such as relevant bench mark indices.

The Company and its subsidiaries classified CMBS and RMBS in the United States and other asset-backed securities as level 3 due to a certain market being inactive. In determining whether a market is active or inactive, the Company and its subsidiaries evaluate various factors such as the lack of recent transactions, price quotations that are not based on current information or vary substantially over time or among market makers, a significant increase in implied risk premium, a wide bid-ask spread, significant decline in new issuances, little or no public information (e.g. a principal-to-principal market) and other factors. With respect to the CMBS and RMBS in the United States and other asset-backed securities, the Company and its subsidiaries judged that there has been increased overall trading activity but due to the lack of observable trades for older vintage and below investment grade securities the Company and its subsidiaries continue to limit the reliance on independent pricing service vendors and brokers. As a result, the Company and its subsidiaries established internally developed pricing models (Level 3 inputs) using valuation techniques such as discounted cash flow methodologies in order to estimate fair value of these securities and classified them as Level 3. Under the models, the Company and its subsidiaries use anticipated cash flows of the security discounted at a risk-adjusted discount rate that incorporates our estimate of credit risk and liquidity risk that a market participant would consider. The cash flows are estimated based on a number of assumptions such as default rate and prepayment speed, as well as seniority of the security. An increase (decrease) in the discount rate or default rate would result in a decrease (increase) in the fair value of CMBS and RMBS in the United States and other asset-backed securities.

The Company and its subsidiaries classified the specified bonds as Level 3 because the Company and its subsidiaries measure their fair value using unobservable inputs. Since the specified bonds do not trade in an open market, no relevant observable market data is available. Accordingly the Company and its subsidiaries use discounted cash flow methodologies that incorporates significant unobservable inputs to measure their fair value. When evaluating the specified bonds issued by SPEs in Japan, the Company and its subsidiaries estimate the fair value by discounting future cash flows using a discount rate based on market interest rates and a risk premium. The future cash flows for the specified bonds issued by the SPEs in Japan are estimated based on contractual principal and interest repayment schedules on each of the specified bonds issued by the SPEs in Japan. Since the discount rate is not observable for the specified bonds, the Company and its subsidiaries use an internally developed model to estimate a risk premium considering the value of the real estate collateral (which also involves unobservable inputs in many cases when using valuation techniques such as discounted cash flow methodologies) and the seniority of the bonds. Under the model, the Company and its subsidiaries consider the loan-to-value ratio and other relevant available information to reflect both the credit risk and the liquidity risk in our own estimate of the risk premium. Generally, the higher the loan-to-value ratio, the larger the risk premium the Company and its subsidiaries estimate under the model. The fair value of the specified bonds issued by SPEs in Japan rises when the fair value of the collateral real estate rises and the discount rate declines. The fair value of the specified bonds issued by SPEs in Japan declines when the fair value of the collateral real estate declines and the discount rate rises.

Investment funds

Certain subsidiaries elected the fair value option for investments in some funds. These investment funds for which the fair value option is elected are classified as Level 3, because the subsidiaries measure their fair value using discounting to net asset value based on inputs that are unobservable in the market.

Table of Contents

Derivatives

For exchange-traded derivatives, fair value is based on quoted market prices, and accordingly, classified as Level 1. For non-exchange traded derivatives, fair value is based on commonly used models and discounted cash flow methodologies. If the inputs used for these measurements including yield curves and volatilities, are observable, the Company and its subsidiaries classify it as Level 2. If the inputs are not observable, the Company and its subsidiaries classify it as Level 3. These unobservable inputs contain discount rates. An increase (decrease) in the discount rate would result in a decrease (increase) in the fair value of derivatives.

Contingent consideration

The Company will be required to pay certain contingent consideration described in Note 4 (Acquisitions) depending on the future performance of a certain asset management business of the acquired subsidiary, and the Company recognizes a liability for the contingent consideration at its estimated fair value. The fair value of the contingent consideration is classified as Level 3 because the Company measures its fair value using a Monte Carlo model based on inputs that are unobservable in the market.

Table of Contents**Information about Level 3 Fair Value Measurements**

The following tables provide information about the valuation techniques and significant unobservable inputs used in the valuation of Level 3 assets and liabilities measured at fair value on a recurring basis as of March 31, 2014 and June 30, 2014.

	March 31, 2014			
	Millions of yen Fair value	Valuation technique(s)	Significant unobservable inputs	Range (Weighted average)

Investment in operating leases and other operating assets	11,140	Discounted cash flows	Discount rate	4.7% - 4.9% (4.7%)
	¥ 45,639			

The Company and its subsidiaries generally use discounted cash flow methodologies or similar internally developed models to determine the fair value of Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the preceding table. Accordingly, changes in these unobservable inputs may have a significant impact on the fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the asset or liability for a given change in that input. Alternatively, the fair value of the asset or liability may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular asset or liability. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated to one another), which may counteract or magnify the fair value impact.

For more analysis of the sensitivity of each input, see the description of the valuation process and the main valuation methodologies used for assets and liabilities measured at fair value.

Table of Contents
4. Acquisitions**(1) Robeco Groep N.V. acquisition**

On July 1, 2013, the Company acquired approximately 90.01% of the total voting equity interests of Robeco Groep N.V. (Head office: Rotterdam, the Netherlands, hereinafter, "Robeco") from Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A. (Head office: Utrecht, the Netherlands, hereinafter, "Rabobank"). As a result, Robeco has become a consolidated subsidiary of the Company. Robeco, a mid-size global asset manager, offers a mix of investment solutions in a broad range of strategies to institutional and private investors worldwide.

The total amount of the acquisition consideration was ¥255,163 million. The initial consideration of ¥249,987 million was paid by ¥230,579 million in cash and 13,902,900 shares issued out of treasury, valued at ¥19,408 million. The 13,902,900 shares issued to Rabobank as part of the total consideration was determined based on the closing price of ¥1,396 of the Company's common share on the Tokyo Stock Exchange on July 1, 2013 in accordance with the share purchase agreement executed between the Company and Rabobank as of February 19, 2013. In addition, the Company will be required to pay contingent consideration depending on the future performance of a certain section of asset management business for each of Robeco's fiscal years until the fiscal year ending in December 2015. The estimated fair value of such contingent consideration was ¥5,176 million, which is included in the total consideration transferred. The estimated fair value of the contingent consideration was ¥2,833 million and ¥2,420 million as of March 31, 2014 and June 30, 2014, respectively. The change of its fair value during the three months ended June 30, 2014 was ¥413 million, being included as part of other operating revenues in the Company's consolidated statement of income. The Company believes that the change in such consideration is not expected to be significant.

Transaction costs of ¥2,039 million are included in selling, general and administrative expenses in the Company's consolidated statement of income for prior periods.

Through this acquisition, the Company aims to expand its global asset management business as one of the measures to pursue new business models by combining finance with related services. The rationales for the Company's acquisition of Robeco include the strength of Robeco's global brand, the diversity of its businesses across asset classes and regions, the breadth of its global distribution network and the experience of its investment teams. As a well-managed and relatively autonomous group of businesses with a good performance record, Robeco is the ideal vehicle for the Company to pursue its ambitions in global asset management. Growth opportunities also exist in the pension and asset management markets in Asia and the Middle East, where the Company has an established network.

The Company allocated the acquisition consideration to Robeco's respective assets acquired and liabilities assumed, and records the identified assets, liabilities and noncontrolling interest based on their fair values at the acquisition date by the acquisition method of accounting in accordance with ASC 805 ("Business Combinations"). The fair value of noncontrolling interest is estimated based on the acquisition consideration taking into account an appraised value using a market approach (business enterprise value multiples).

The Company has finalized the purchase price allocation during the three months ended June 30, 2014. As a result, the following table provides fair value amounts allocated to assets acquired and liabilities assumed of Robeco.

Table of Contents

	Millions of yen	
	Fair value amounts of assets, liabilities and noncontrolling interest	
Cash and Cash Equivalents	¥	43,737
Investment in Securities		3,325
Investment in Affiliates		931
Other Receivables		17,938
Prepaid Expenses		1,908
Office Facilities		1,839
Other Assets		372,107
Total Assets		441,785
Trade Notes, Accounts Payable and Other Liabilities		6,529
Accrued Expenses		50,222
Current and Deferred Income Taxes		71,087
Long-Term Debt		31,016
Total Liabilities		158,854
Noncontrolling interests		27,768
Net	¥	255,163

Goodwill with a value of ¥130,961 million, and other intangible assets of ¥205,730 million that were identified in connection with the acquisition are included in other assets in the above table and the Company's consolidated balance sheet as of June 30, 2014. The goodwill is calculated as the excess of consideration transferred and the fair value of noncontrolling interest over the net assets recognized at fair value. The Company calculated the amount of goodwill based on estimates of fair value of assets acquired, liabilities assumed and noncontrolling interest. The goodwill represents the future growth of the ORIX Group from new revenue streams arising from the consolidation of Robeco and synergies with the Company's existing assets and businesses. The goodwill is not deductible for tax purposes. The goodwill and other intangible assets recorded in connection with this acquisition are included in the Overseas Business segment.

Other intangible assets recognized in this acquisition consist of the following:

	Millions of yen	Years
	Acquired intangibles recorded at fair value	Weighted-average amortization period
Intangible assets not subject to amortization:

Table of Contents

The following unaudited supplemental pro forma financial information presents the combined results of operations of the Company and its subsidiaries as though the acquisition had occurred as of April 1, 2012, the beginning of the fiscal year ended March 31, 2013:

	Millions of yen
	Three months ended
	June 30, 2013
Total revenues	¥ 309,116
Income from Continuing Operations	43,674

The unaudited supplemental pro forma financial information is based on estimates and assumptions, that the Company believes are reasonable and should not be taken as indicative of what the Company's consolidated financial results would have been had the acquisition been completed on that date. The unaudited supplemental pro forma financial information does not include nonrecurring costs directly attributable to the acquisition, such as certain professional fees, that would not have been incurred had the acquisition not occurred.

(2) DAIKYO INCORPORATED acquisition

In March, 2005, the Company entered into a capital alliance with DAIKYO INCORPORATED (Head office: Shibuya-ku, Tokyo, Japan, hereinafter, "DAIKYO"), which operates condominium development and management businesses. In connection with the capital alliance, the Company acquired 133,720,000 shares of DAIKYO's common stock, 10,000,000 shares of type-1 preferred stock, 15,000,000 shares of type-2 preferred stock and 25,000,000 shares of type-4 preferred stock. In June 2008, DAIKYO redeemed certain of type-2 preferred stock and type-4 preferred stock held by the Company. Furthermore, in March 2009, the Company subscribed 25,000,000 shares of type-7 preferred stock and acquired 23,598,144 shares of type-8 preferred stock of DAIKYO. Since entering into the capital alliance, DAIKYO has shifted its business model from one focusing on "Flow business", such as development and sale of condominiums, to one that achieves a balance between "Flow business" and "Stock business", such as asset management and brokerage of condominiums. As a result of the shift, DAIKYO has developed business platforms that generate more stable financial performance.

On February 27, 2014, to increase earnings from its investment, the Company exercised its conversion rights attached to all type-2 preferred stock, type-4 preferred stock, type-7 preferred stock and type-8 preferred stock of DAIKYO held by the Company. As a result, the Company acquired an additional 398,204,999 shares of common stock of DAIKYO. Following the conversion, its voting rights in DAIKYO increased from 31.7% to 64.1% and DAIKYO became a consolidated subsidiary of the Company from an equity-method affiliate. There was no additional capital investment in DAIKYO in conjunction with the exercise of the acquisition rights.

Transaction costs of ¥23 million are included in selling, general and administrative expenses in the Company's consolidated statement of income during the three months ended March 31, 2014.

Prior to the exercise of the acquisition rights in February 2014, the Company's interest in DAIKYO was accounted for under the equity-method of accounting. As a result of this step acquisition, the Company remeasured its previously held equity interest at its fair value of ¥124,606 million, which was calculated based primarily on the market price of the common shares on an as-if converted basis adjusted for any control premium, and the Company recognized a gain of ¥58,435 million included in gains on sales of subsidiaries and affiliates and liquidation losses, net in the consolidated statement of income during the three months ended March 31, 2014.

Table of Contents

The Company allocates the acquisition consideration in the amount of ¥124,606 million to DAIKYO's respective assets acquired and liabilities assumed and records the identified assets, liabilities and noncontrolling interest based on their fair values at the acquisition date using the acquisition method of accounting in accordance with ASC 805 (Business Combinations). The fair value of noncontrolling interest is measured based on the market price of the common shares held by noncontrolling shareholders as of the acquisition date.

The following table provides preliminary fair value amounts allocated to assets acquired and liabilities assumed from DAIKYO. The acquisition occurred during the three months ended March 31, 2014, and purchase price allocation has not yet been finalized as of August 13, 2014. Because the fair value measurements of these assets and liabilities require estimates based on various assumptions, the provisional amounts are subject to change as more information about facts and circumstances that existed at the acquisition date becomes available.

	Millions of yen	Provisional fair value amounts of
		assets, liabilities and
		noncontrolling
		interest
Cash and Cash Equivalents	¥	105,137
Investment in Operating Leases		3,975
Investment in Securities		1,313
Investment in Affiliates		32,596
Other Receivables		16,635
Inventories		95,245
Prepaid Expenses		935
Office Facilities		10,975
Other Assets		95,195
Total Assets		362,006
Short-Term Debt		1,387
Trade Notes, Accounts Payable and Other Liabilities		58,924
Accrued Expenses		18,420
Current and Deferred Income Taxes		17,972
Security Deposits		6,334
Long-Term Debt		65,710
Total Liabilities		168,747
Noncontrolling interests		68,653
Net	¥	124,606

Goodwill and other intangible assets, with a total preliminary value amounting to ¥73,222 million, identified in connection with the acquisition are included in other assets in the above table and the Company's consolidated balance sheet as of June 30, 2014. The goodwill is calculated as the excess of consideration transferred and the fair value of noncontrolling interest over the net assets recognized at fair value. The Company calculated the amount of goodwill based on preliminary estimates of fair value of assets acquired, liabilities assumed and noncontrolling interest. The completion of the purchase price allocation could result in an adjustment to the amount of goodwill and other intangible assets. However, such an adjustment, if any, is not expected to have a significant effect on the Company's consolidated statement of income. The goodwill represents the future growth of the ORIX Group from new revenue streams arising from the consolidation of DAIKYO and synergies with the existing Company's assets and businesses. The goodwill is not deductible for tax purposes. The goodwill and other intangible assets recorded in connection with this acquisition are included in the Investment and Operation segment.

Table of Contents

The following unaudited supplemental pro forma financial information presents the combined results of operations of the Company and its subsidiaries as though the acquisition had occurred as of April 1, 2012, the beginning of the fiscal year ended March 31, 2013:

	Millions of yen
	Three months ended
	June 30, 2013
Total revenues	¥ 347,495
Income from Continuing Operations	45,512

Total revenues and income from continuing operations of DAIKYO included in the Company's consolidated statement of income for the three months ended June 30, 2014 are as follows.

	Millions of yen
	Three months ended
	June 30, 2014
Total revenues	¥ 56,828
Income from Continuing Operations	2,022

The unaudited supplemental pro forma financial information is based on estimates and assumptions, that the Company believes are reasonable and should not be taken as indicative of what the Company's consolidated financial results would have been had the acquisition been completed on that date.

The Company has not completed substantially all of the acquisition accounting as of August 13, 2014.

Table of Contents**5. Credit Quality of Financing Receivables and the Allowance for Credit Losses**

The Company and its subsidiaries apply ASC 310 (Receivables), which requires an entity to provide the following information disaggregated by portfolio segment and class of financing receivable.

Allowance for credit losses by portfolio segment

Credit quality of financing receivables by class

Impaired loans

Credit quality indicators

Non-accrual and past-due financing receivables

Information about troubled debt restructurings by class

A portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. The Company and its subsidiaries classify portfolio segments by instruments of loans and direct financing leases. Classes of financing receivables are determined based on the initial measurement attribute, risk characteristics of the financing receivables and the method for monitoring and assessing obligors' credit risk, and are defined as the level of detail necessary for a financial statement user to understand the risks inherent in the financing receivables. Classes of financing receivables generally are a disaggregation of a portfolio segment, and the Company and its subsidiaries disaggregate portfolio segments into classes by regions, instruments or industries of debtors.

The following table provides information about the allowance for credit losses as of March 31, 2014, for the three months ended June 30, 2013 and 2014:

Other *3	6	(117)	(62)	10	(45)	(208)
Ending balance	¥ 13,615	¥ 8,623	¥ 30,893	¥ 12,962	¥ 15,201	¥ 81,294
Individually evaluated for impairment	3,172	8,118	22,742	11,013	0	45,045
Not individually evaluated for impairment	10,443	505	8,151	1,949	15,201	36,249
Financing receivables:						
Ending balance	¥ 1,251,891	¥ 151,843	¥ 880,161	¥ 49,876	¥ 1,090,648	¥ 3,424,419
Individually evaluated for impairment	11,653	22,317	68,762	20,817	0	123,549
Not individually evaluated for impairment	1,240,238	129,526	811,399	29,059	1,090,648	3,300,870

*1 Purchased loans represent loans with evidence of deterioration of credit quality since origination and for which it is probable at acquisition that collection of all contractually required payments from the debtors is unlikely in accordance with ASC 310-30 (Receivables Loans and Debt Securities Acquired with Deteriorated Credit Quality).

*2 Other mainly includes foreign currency translation adjustments. Additionally, Other in Non-recourse loans includes a decrease of ¥4,872 million due to the sale of controlling class interests of certain VIE, which was formerly consolidated, to a third party and resulting in deconsolidation of the VIE.

*3 Other mainly includes foreign currency translation adjustments.

Table of Contents

In developing the allowance for credit losses, the Company and its subsidiaries consider, among other things, the following factors:

business characteristics and financial conditions of obligors;

current economic conditions and trends;

prior charge-off experience;

current delinquencies and delinquency trends; and

value of underlying collateral and guarantees.

The Company and its subsidiaries individually develop the allowance for credit losses for impaired loans. For non-impaired loans, including loans that are not individually evaluated for impairment, and direct financing leases, the Company and its subsidiaries evaluate prior charge-off experience as segmented by debtor's industry and the purpose of the loans and develop the allowance for credit losses based on such prior charge-off experience as well as current economic conditions.

In common with all portfolio segments, a deterioration of debtors' condition may increase the risk of delay in payments of principal and interest. For loans to consumer borrowers, the amount of the allowance for credit losses is changed by the variation of individual debtors' creditworthiness and value of underlying collateral and guarantees, and the prior charge-off experience. For loans to corporate other borrowers and direct financing leases, the amount of the allowance for credit losses is changed by current economic conditions and trends, the value of underlying collateral and guarantees, and the prior charge-off experience in addition to the debtors' creditworthiness.

The decline of the value of underlying collateral and guarantees may increase the risk of inability to collect from the loans and direct financing leases. Particularly for non-recourse loans for which cash flow from real estate is the source of repayment, their collection depends on the real estate collateral value, which may decline as a result of decrease in liquidity of the real estate market, rise in vacancy rate of rental properties, fall in rents and other factors. These risks may change the amount of the allowance for credit losses. For purchased loans, their collection may decrease due to a decline in the real estate collateral value and debtors' creditworthiness. Thus, these risks may change the amount of the allowance for credit losses.

In common with all portfolio segments, the Company and its subsidiaries charge off doubtful receivables when the likelihood of any future collection is believed to be minimal, mainly based upon an evaluation of the relevant debtors' creditworthiness and the liquidation status of collateral.

Edgar Filing: ORIX CORP - Form 6-K

- *1 With no related allowance recorded represents impaired loans with no allowance for credit losses as all amounts are considered to be collectible.
- *2 With an allowance recorded represents impaired loans with the allowance for credit losses as all or a part of the amounts are not considered to be collectible.

Table of Contents

The Company and its subsidiaries recognize installment loans other than purchased loans and loans to consumer borrowers as impaired loans when principal or interest is past-due 90 days or more, or it is probable that the Company and its subsidiaries will be unable to collect all amounts due according to the contractual terms of the loan agreements due to various debtor conditions, including insolvency filings, suspension of bank transactions, dishonored bills and deterioration of businesses. For non-recourse loans, in addition to these conditions, the Company and its subsidiaries perform an impairment review using financial covenants, acceleration clauses, loan-to-value ratios, and other relevant available information.

For purchased loans, the Company and its subsidiaries recognize them as impaired loans when it is probable that the Company and its subsidiaries will be unable to collect book values of the remaining investment due to factors such as a decline in the real estate collateral value and debtors' creditworthiness since the acquisition of these loans.

The Company and its subsidiaries consider that loans to consumer borrowers, including housing loans, card loans and other, are impaired when terms of these loans are modified as troubled debt restructurings.

Interest payments received on impaired loans other than purchased loans are recorded as interest income unless the collection of the remaining investment is doubtful at which time payments received are recorded as reductions of principal. For purchased loans, although the acquired assets may remain loans in legal form, collections on these loans often do not reflect the normal historical experience of collecting delinquent accounts, and the need to tailor individual collateral-realization strategies often makes it difficult to reliably estimate the amount, timing, or nature of collections. Accordingly, the Company and its subsidiaries use the cost recovery method of income recognition for such purchased loans regardless of whether impairment is recognized or not.

In common with all classes, impaired loans are individually evaluated for a valuation allowance based on the present value of expected future cash flows, the loan's observable market price or the fair value of the collateral securing the loans if the loans are collateral-dependent. For non-recourse loans, in principle, the estimated collectible amount is determined based on the fair value of the collateral securing the loans as they are collateral-dependent. Further for certain non-recourse loans, the estimated collectible amount is determined based on the present value of expected future cash flows. The fair value of the real estate collateral securing the loans is determined using appraisals prepared by independent third-party appraisers or our own staff of qualified appraisers based on recent transactions involving sales of similar assets or other valuation techniques such as discounted cash flows methodologies using future cash flows estimated to be generated from operation of the existing assets or completion of development projects, as appropriate. We generally obtain a new appraisal once a fiscal year. In addition, we periodically monitor circumstances of the real estate collateral and then obtain a new appraisal in situations involving a significant change in economic and/or physical conditions which may materially affect its fair value. For impaired purchased loans, the Company and its subsidiaries develop the allowance for credit losses based on the difference between the book value and the estimated collectible amount of such loans.

Table of Contents

The following table provides information about the average recorded investments in impaired loans and interest income on impaired loans for the three months ended June 30, 2013 and 2014:

Note: Loans held for sale are not included in the tables above.

In common with all classes, the Company and its subsidiaries monitor the credit quality indicators as performing and non-performing assets. The category of non-performing assets includes financing receivables for debtors who have filed for insolvency proceedings, whose bank transactions are suspended, whose bills are dishonored, whose repayment is past-due 90 days or more, financing receivables modified as troubled debt restructurings, and performing assets include all other financing receivables. Regarding purchased loans, they are classified as non-performing assets when considered impaired, while all the other loans are included in the category of performing assets.

Table of Contents

Out of non-performing assets, the Company and its subsidiaries consider smaller balance homogeneous loans, including housing loans and card loans and other, which are not restructured and direct financing leases, as 90 days or more past-due financing receivables not individually evaluated for impairment, and consider the others as loans individually evaluated for impairment. After the Company and its subsidiaries have set aside provision for those non-performing assets, the Company and its subsidiaries continue to monitor at least on a quarterly basis the quality of any underlying collateral, the status of management of the debtors and other important factors in order to report to management and develop additional provision as necessary.

The following table provides information about the non-accrual and past-due financing receivables as of March 31, 2014 and June 30, 2014:

		March 31, 2014

Note: Loans held for sale and purchased loans are not included in the tables above.

In common with all classes, the Company and its subsidiaries consider financing receivables as past-due financing receivables when principal or interest is past-due 30 days or more. Loans whose terms have been modified are not classified as past-due financing receivables if the principals and interests are not past-due 30 days or more in accordance with the modified terms.

Table of Contents

The Company and its subsidiaries suspend accruing revenues on past-due installment loans and direct financing leases when principal or interest is past-due 90 days or more, or earlier, if management determines that their collections are doubtful based on factors such as individual debtors creditworthiness, historical loss experience, current delinquencies and delinquency trends. Cash repayments received on non-accrual loans are applied first against past due interest and then any surpluses are applied to principal in view of the conditions of the contract and obligors. The Company and its subsidiaries return non-accrual loans and lease receivables to accrual status when it becomes probable that the Company and its subsidiaries will be able to collect all amounts due according to the contractual terms of these loans and lease receivables, as evidenced by continual payments from the debtors. The period of such continual payments before returning to accrual status varies depending on factors that we consider are relevant in assessing the debtor's creditworthiness, such as the debtor's business characteristics and financial conditions as well as relevant economic conditions and trends.

The following table provides information about troubled debt restructurings of financing receivables that occurred during the three months ended June 30, 2013 and 2014:

		Three months ended June 30, 2013

Total		¥ 1,430	¥ 1,088

A troubled debt restructuring is defined as a restructuring of a financing receivable in which the creditor grants a concession to the debtor for economic or other reasons related to the debtor's financial difficulties.

The Company and its subsidiaries offer various types of concessions to debtors to protect as much of the investment as possible in troubled debt restructurings. For the debtors of non-recourse loans, the Company and its subsidiaries offer concessions including an extension of the maturity date at an interest rate lower than the current market rate for a debt with similar risk characteristics. For the debtors of all financing receivables other than non-recourse loans, the Company and its subsidiaries offer concessions such as a reduction of the loan principal, a temporary

Edgar Filing: ORIX CORP - Form 6-K

reduction in the interest payments, or an extension of the maturity date at an interest rate lower than the current market rate for a debt with similar risk characteristics. In addition, the Company and its subsidiaries may acquire collateral assets from the debtors in troubled debt restructurings to satisfy fully or partially the loan principal or past due interest.

Table of Contents

In common with all portfolio segments, financing receivables modified as troubled debt restructurings are recognized as impaired and are individually evaluated for a valuation allowance. In most cases, these financing receivables have already been considered impaired and individually evaluated for allowance for credit losses prior to the restructurings. However, as a result of the restructuring, the Company and its subsidiaries may recognize additional provision for the restructured receivables.

The following table provides information about financing receivables modified as troubled debt restructurings within the previous 12 months from June 30, 2013 for which there was a payment default during the three months ended June 30, 2013:

Portfolio segment	Class	Three months ended June 30, 2013	
		Millions of yen

Total		¥	91

The following table provides information about financing receivables modified as troubled debt restructurings within the previous 12 months from June 30, 2014 for which there was a payment default during the three months ended June 30, 2014:

Portfolio segment	Class	Three months ended June 30, 2014	
		Millions of yen	
		Recorded investment	
Consumer borrowers		¥	57
	Housing loans		16
	Card loans		27
	Other		14
Corporate borrowers			166
Other	Other		166
Total		¥	223

The Company and its subsidiaries consider financing receivables whose terms have been modified in a restructuring as defaulted receivables when principal or interest is past-due 90 days or more in accordance with the modified terms.

In common with all portfolio segments, the Company and its subsidiaries suspend accruing revenues and may recognize additional provision as necessary for the defaulted financing receivables.

Table of Contents**6. Investment in Securities**

Investment in securities at March 31, 2014 and June 30, 2014 consists of the following:

	Millions of yen	
	March 31, 2014	June 30, 2014
Trading securities	¥ 16,079	¥ 16,862
Available-for-sale securities	881,606	888,759
Held-to-maturity securities	96,731	95,988
Other securities	220,160	202,505
Total	¥ 1,214,576	¥ 1,204,114

Other securities consist mainly of non-marketable equity securities, preferred capital shares carried at cost and investment funds carried at an amount that reflects equity income and loss based on the investor's share. The aggregate carrying amount of other securities accounted for under the cost method totaled ¥80,953 million and ¥73,195 million at March 31, 2014 and June 30, 2014, respectively. Investments with an aggregate cost of ¥72,089 million and ¥73,086 million, respectively, were not evaluated for impairment because the Company and its subsidiaries did not identify any events or changes in circumstances that might have had a significant adverse effect on the fair value of those investments and it was not practicable to estimate the fair value of the investments.

A subsidiary elected the fair value option under ASC 825 (Financial Instruments) for certain investments in equity securities included in available-for-sale securities, which as of March 31, 2014 and June 30, 2014, were fair valued at ¥5,116 million and ¥5,210 million.

Two subsidiaries elected the fair value option under ASC 825 (Financial Instruments) for certain investments in a trust and investment funds included in other securities whose net asset values do not represent the fair value of investments due to the illiquid nature of these investments. The subsidiaries manage these investments on a fair value basis and the election of the fair value option enables the subsidiaries to reflect more appropriate assumptions to measure the fair value of these investments. As of March 31, 2014 and June 30, 2014, the fair values of these investments were at ¥6,317 million and ¥10,768 million, respectively.

The amortized cost basis amounts, gross unrealized holding gains, gross unrealized holding losses and fair values of available-for-sale securities and held-to-maturity securities in each major security type at March 31, 2014 and June 30, 2014 are as follows:

March 31, 2014

	¥ 109,548	¥ (3,894)	¥ 16,589	¥ (1,308)	¥ 126,137	¥ (5,202)

The number of investment securities that were in an unrealized loss position as of March 31, 2014 and June 30, 2014 were 184 and 134, respectively. The gross unrealized losses on these securities are attributable to a number of factors including changes in interest rates, credit spreads and market trends.

For debt securities, in the case of the fair value being below the amortized cost, the Company and its subsidiaries consider whether those securities are other-than-temporarily impaired using all available information about their collectability. The Company and its subsidiaries do not consider a debt security to be other-than-temporarily impaired if (1) the Company and its subsidiaries do not intend to sell the debt security, (2) it is not more likely than not that the Company and its subsidiaries will be required to sell the debt security before recovery of its amortized cost basis and (3) the present value of estimated cash flows will fully cover the amortized cost of the security. On the other hand, the Company and its subsidiaries consider a debt security to be other-than-temporarily impaired if any of the above mentioned three conditions are not met.

Debt securities with unrealized loss position mainly include corporate debt securities in Japan, specified bonds issued by special purpose entities in Japan, CMBS and RMBS in the United States, other asset-backed securities.

The unrealized loss associated with corporate debt securities is primarily due to changes in the market interest rate and risk premium. Considering all available information to assess the collectability of those investments (such as the financial condition of and business prospects for the issuers), the Company and its subsidiaries believe that the Company and its subsidiaries are able to recover the entire amortized cost basis of those investments. Because the Company and its subsidiaries do not intend to sell the investments and it is not more likely than not that the Company and its subsidiaries will be required to sell the investments before recovery of their amortized cost basis, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at June 30, 2014.

The unrealized loss associated with specified bonds is primarily due to changes in the market interest rate and risk premium because of deterioration in the real estate market in Japan and the credit crunch in the capital and financial markets. Considering all available information to assess the collectability of those investments (such as performance and value of the underlying real estate, and seniority of the bonds), the Company and its subsidiaries believe that the Company and its subsidiaries are able to recover the entire amortized cost basis of those investments. Because the Company and its subsidiaries do not intend to sell the investments and it is not more likely than not that the Company and its subsidiaries will be required to sell the investments before recovery of their amortized cost basis, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at June 30, 2014.

Table of Contents

The unrealized loss associated with CMBS and RMBS in the United States and other asset-backed securities is primarily caused by changes in credit spreads and interest rates. In order to determine whether a credit loss exists, the Company and its subsidiaries estimate the present value of anticipated cash flows, discounted at the current yield to accrete the security. The cash flows are estimated based on a number of assumptions such as default rate and prepayment speed, as well as seniority of the security. Then, a credit loss is assessed by comparing the present value of the expected cash flows to the security's amortized cost basis. Based on that assessment, the Company and its subsidiaries expect to recover the entire amortized cost basis and no credit impairment was identified. Because the Company and its subsidiaries do not intend to sell the investments and it is not more likely than not that the Company and its subsidiaries will be required to sell the investments before recovery of their amortized cost basis, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at June 30, 2014.

For equity securities with unrealized losses, the Company and its subsidiaries consider various factors to determine whether the decline is other-than-temporary, including the length of time and the extent to which the fair value has been less than the carrying value and the issuer's specific economic conditions as well as the ability and intent to hold these securities for a period of time sufficient to recover the securities carrying amounts. Based on our ongoing monitoring process, the Company and its subsidiaries do not consider these investments to be other-than-temporarily impaired at June 30, 2014.

The total other-than-temporary impairment with an offset for the amount of the total other-than-temporary impairment recognized in other comprehensive income (loss) for three months ended June 30, 2013 and 2014 are as follows:

	Millions of yen	
	Three months ended June 30, 2013	Three months ended June 30, 2014
Total other-than-temporary impairment losses	¥ 688	¥ 100
Portion of loss recognized in other comprehensive income (before taxes)	0	0
Net impairment losses recognized in earnings	¥ 688	¥ 100

Total other-than-temporary impairment losses for three months ended June 30, 2013 relate to equity securities and other securities. Total other-than-temporary impairment losses for three months ended June 30, 2014 relate to other securities.

Roll-forwards of the amount related to credit losses on other-than-temporarily impaired debt securities recognized in earnings for three months ended June 30, 2013 and 2014 are as follows:

	Millions of yen	
	Three months ended June 30, 2013	Three months ended June 30, 2014
Beginning	¥ 7,809	¥ 1,991
Reduction during the period:		
Due to change in intent to sell or requirement to sell	(1,351)	0
Ending	¥ 6,458	¥ 1,991

Table of Contents

At March 31, 2014, other-than-temporary impairment related to the non-credit losses arising from debt securities for which other-than-temporary impairment related to the credit loss had been recognized in earnings according to ASC 320-10-35-34 (Investments Debt and Equity Securities Recognition of Other-Than-Temporary Impairments) was included in unrealized gains/losses (before taxes) of CMBS and RMBS in the United States, with gross unrealized gains of ¥59 million and unrealized losses of ¥102 million, and was included in unrealized gains/losses (after taxes) of accumulated other comprehensive income, with gross unrealized gains of ¥38 million and unrealized losses of ¥65 million. At June 30, 2014, other-than-temporary impairment related to the non-credit losses arising from debt securities for which other-than-temporary impairment related to the credit loss had been recognized in earnings was included in unrealized gains/losses (before taxes) of CMBS and RMBS in the United States, with gross unrealized gains of ¥102 million and unrealized losses of ¥71 million, and was included in unrealized gains/losses (after taxes) of accumulated other comprehensive income, with gross unrealized gains of ¥65 million and unrealized losses of ¥45 million. The unrealized gains/losses include unrealized gains/losses on impaired securities relating to changes in the value of such securities subsequent to the impairment measurement date.

Included in interest on loans and investment securities in the consolidated statements of income is interest income on investment securities of ¥3,240 million and ¥2,568 million, for the three months ended June 30, 2013 and 2014, respectively.

Table of Contents**7. Securitization Transactions**

The Company and its subsidiaries have securitized various financial assets such as lease receivables and installment loans (commercial mortgage loans, housing loans and other).

In the securitization process, these financial assets are transferred to SPEs, such as trusts and special-purpose companies that issue beneficial interests of the securitization trusts and securities backed by the financial assets to investors. The cash flows collected from these assets transferred to the SPEs are then used to repay these asset-backed beneficial interests and securities. As the transferred assets are isolated from the Company and its subsidiaries, the investors and the SPEs have no recourse to other assets of the Company and its subsidiaries in cases where the debtors or the issuers of the transferred financial assets fail to perform under the original terms of those financial assets.

The Company and its subsidiaries often retain interests in the SPEs in the form of the beneficial interest of the securitization trusts. Those interests that continue to be held include interests in the transferred assets and are often subordinate to other tranche(s) of the securitization. Those beneficial interests that continue to be held by the Company and its subsidiaries are subject to credit risk, interest rate risk and prepayment risk on the securitized financial assets. With regards to these subordinated interests that the Company and its subsidiaries retain, they are subordinated to the senior investments and are exposed to different credit and prepayment risks, since they first absorb the risk of the decline in the cash flows from the financial assets transferred to the SPEs for defaults and prepayment of the transferred assets. If there is any excess cash remaining in the SPEs after payment to investors in the securitization of the contractual rate of returns, most of such excess cash is distributed to the Company and its subsidiaries for payments of the subordinated interests.

In accordance with ASC 860 (Transfers and Servicing) and ASC 810 (Consolidation), trusts or SPEs used in securitization transactions have been consolidated if the Company and its subsidiaries are the primary beneficiary of the trusts or SPEs.

During the three months ended June 30, 2013 and 2014, there was no securitization transaction accounted for as a sale.

Quantitative information about delinquencies, impaired loans and components of financial assets sold on securitization and other assets managed together as of March 31, 2014 and June 30, 2014, and quantitative information about net credit loss for the three months ended June 30, 2013 and 2014 are as follows:

	Millions of yen			
	Total principal amount of receivables		Principal amount of receivables that are 90 days or more past-due and impaired loans	
	March 31, 2014	June 30, 2014	March 31, 2014	June 30, 2014
	¥	¥	¥	¥
Direct financing lease	1,094,073	1,090,648	13,887	14,950
Installment loans	2,315,555	2,344,001	141,973	129,410
Assets recorded on the balance sheet	3,409,628	3,434,649	155,860	144,360

Table of Contents

A certain subsidiary originates and sells loans into the secondary market while retaining the obligation to service those loans. In addition, it undertakes obligations to service loans originated by others. The servicing assets related to those servicing activities are included in other operating assets and the balances of these servicing assets as of March 31, 2014 and June 30, 2014 were ¥16,911 million and ¥16,365 million, respectively. During the three months ended June 30, 2013 and 2014, the servicing assets were increased by ¥1,249 million and ¥722 million, respectively, mainly from loans sold with servicing retained and decreased by ¥933 million and ¥1,014 million, respectively, mainly from amortization and increased by ¥705 million and decreased by ¥254 million from the effects of changes in foreign exchange rates. The fair value of the servicing assets as of March 31, 2014 and June 30, 2014 were ¥23,604 million and ¥23,272 million, respectively.

Table of Contents

8. Variable Interest Entities

The Company and its subsidiaries use special purpose companies, partnerships and trusts (hereinafter referred to as SPEs) in the ordinary course of business.

These SPEs are not always controlled by voting rights, and there are cases where voting rights do not exist for those SPEs. ASC 810 (Consolidation) addresses consolidation by business enterprises of SPEs within the scope of ASC 810. Generally these SPEs are entities where (a) the total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by any parties, including the equity holders or (b) as a group, the holders of the equity investment at risk do not have (1) the ability to make decisions about an entity s activities that most significantly impact the entity s economic performance through voting rights or similar rights, (2) the obligation to absorb the expected losses of the entity or (3) the right to receive the expected residual returns of the entity. Entities within the scope of ASC 810 are called VIEs.

According to ASC 810, the Company and its subsidiaries are required to perform a qualitative analysis to identify the primary beneficiary of VIEs. An enterprise that has both of the following characteristics is considered to be the primary beneficiary and therefore shall consolidate a VIE:

The power to direct the activities of a VIE that most significantly impact the entity s economic performance

The obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE

All facts and circumstances are taken into consideration when determining whether the Company and its subsidiaries have variable interests that would deem it the primary beneficiary and therefore require consolidation of the VIE. The Company and its subsidiaries make ongoing reassessment of whether they are the primary beneficiaries of a VIE.

The following are the items that the Company and its subsidiaries are considering in a qualitative assessment:

Which activities most significantly impact the economic performance of the VIE and who has the power to direct such activities

Characteristics of the Company and its subsidiaries variable interest or interests and other involvements (including involvement of related parties and de facto agents)

Involvement of other variable interest holders

The entity s purpose and design, including the risks that the entity was designed to create and pass through to its variable interest holders

The Company and its subsidiaries generally consider the following types of involvement to be significant when determining the primary beneficiary:

Designing the structuring of a transaction

Providing an equity investment and debt financing

Edgar Filing: ORIX CORP - Form 6-K

Being the investment manager, asset manager or servicer and receiving variable fees

Providing liquidity and other financial support

The Company and its subsidiaries do not have the power to direct activities of the VIEs that most significantly impact the VIEs' economic performance if that power is shared among multiple unrelated parties, and accordingly do not consolidate such VIEs.

Table of Contents

Information about VIEs (consolidated and non-consolidated) for the Company and its subsidiaries are as follows:

1. Consolidated VIEs
March 31, 2014

Types of VIEs	Millions of yen			
	Total assets *1	Total liabilities *1	Assets which are pledged as collateral *2	Commitments *3
(a) VIEs for liquidating customer assets	¥ 0	¥ 0	¥ 0	¥ 0
(b) VIEs for acquisition of real estate and real estate development projects for customers	4,800	986	0	0
(c) VIEs for acquisition of real estate for the Company and its subsidiaries real estate-related business	288,392	96,591	201,427	0
(d) VIEs for corporate rehabilitation support business	6,925	309	0	0
(e) VIEs for investment in securities	23,449	9,405	13,767	0
(f) VIEs for securitizing financial assets such as direct financing lease receivable and loan receivable	303,154	188,463	239,072	0
(g) VIEs for securitization of commercial mortgage loans originated by third parties	64,026	67,251	64,026	0
(h) VIEs for solar power generation projects	20,824	2,723	8,382	29,756
(i) Other VIEs	101,670	63,219	78,633	0
Total	¥ 813,240	¥ 428,947	¥ 605,307	¥ 29,756

June 30, 2014

Types of VIEs	Millions of yen
