Wells Fargo Advantage Funds

During the period, an improving U.S. economy, a stronger U.S. dollar, declining oil and gas prices, and central bank actions globally were among the most significant influences on the equity and bond markets.

Dear Valued Shareholder:

We are pleased to offer you this semi-annual report for the *Wells Fargo Advantage Utilities and High Income Fund* for the six-month period that ended February 28, 2015. During the period, an improving U.S. economy, a stronger U.S. dollar, declining oil and gas prices, and central bank actions globally were among the most significant influences on the equity and bond markets.

The U.S. Federal Reserve (Fed) continued to hold short-term interest rates near zero, which supported equity investing, although falling energy commodity prices caused volatility. Utilities sector stocks benefited while energy sector stocks suffered. Many domestic longer-term fixed-income market segments recorded positive returns, which was counter to investor expectations that bonds would suffer when the Fed ended its quantitative easing-related bond-buying program in October 2014. U.S. high-yield bond returns were essentially flat. Energy-related high-yield bonds declined due to falling oil and natural gas prices.

Strengthening U.S. economic recovery benefited investors.

The U.S. economy strengthened with positive gross domestic product measures in each of the last two quarters of 2014. Consumer sentiment improved and corporate earnings generally were favorable. In 2015, initial weekly jobless claims fell to 267,000 for the week ended January 24. The unemployment rate declined from 5.7% in January to 5.5% in February. The S&P 500 Index¹ returned 6.12%. Nine of ten business sectors in the index had positive returns. The lone exception was the S&P 500 Energy Index², which fell 18.21% when oil and natural gas prices declined in the second half of 2014 before stabilizing in early 2015. The S&P 500 Utilities Index³ returned 6.44%. Utilities stocks followed a negative September 2014 return with four months of positive performances before declining 6.40% in February 2015 when improving economic data caused the 10-year U.S. Treasury bond yield to spike. Some stocks may look less attractive during times of rising fixed-income yields because investors may consider stocks, particularly

utilities stocks, as a source of dividend income when bond investment returns are low.

Returns in fixed-income markets, while not as strong as stocks, were positive in many sectors. Domestic bond yields were higher than international bonds, driving continued investor demand for U.S. issues. The Barclays U.S. Aggregate Bond Index⁴ returned 2.25%. Returns in the high-yield sector of the fixed-income market were essentially flat, falling 0.08% as measured by the Barclays U.S. Corporate High Yield Bond Index⁵.

¹ The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

² The S&P 500 Energy Index is a market-value-weighted index that measures the performance of all stocks within the energy sector of the S&P 500 Index. You cannot invest directly in an index.

³ The S&P 500 Utilities Index is a market-value-weighted index that measures the performance of all stocks within the utilities sector of the S&P 500 Index. You cannot invest directly in an index.

⁴ The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. You cannot invest directly in an index.

⁵ The Barclays U.S. Corporate High Yield Bond Index is an unmanaged, U.S. dollar-denominated, nonconvertible, non-investment-grade debt index. The index consists of domestic and corporate bonds rated Ba and below with a minimum outstanding amount of \$150 million. You cannot invest directly in an index.

Wells Fargo Advantage Utilities and High Income Fund 3

Europe and Asia focus on economic stimulus.

As the U.S. economic recovery gained strength, economies in other global regions tended to struggle. In response, central banks in Europe, Japan, and China took steps to spark business activity and economic growth. The European Central Bank reduced interest rates in June and September 2014 and announced a quantitative easing bond-buying program early in 2015. While Japan's economy rebounded from recession in the final quarter of 2014, the Bank of Japan maintained accommodative monetary policies because growth was weaker than expected. The People's Bank of China reduced interest rates in November 2014 and February 2015 in an effort to spark increased economic activity, however government officials revised their projections for future economic growth lower. U.S. investors in international equity markets saw positive returns in local currency terms turn negative after translation into U.S. dollars because the U.S. dollar strengthened substantially. During the period, the return for the MSCI All Country World Index ex-USA Index (Net)⁶ was -3.78%. On the international fixed-income front, the return for the Barclays Global Aggregate ex-U.S. Dollar Bond Index⁷ was -9.54% during the period, as investors shunned foreign debt markets in favor of the U.S., helping to sustain higher domestic bond prices.

Don't let short-term uncertainty derail long-term investment goals.

Periods of investment uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with *Wells Fargo Advantage Funds*. We appreciate your confidence in us and remain committed to helping you meet your financial needs. For current information about your fund investments, contact your investment professional, visit our website at wellsfargoadvantagefunds.com, or call us directly at **1-800-222-8222**. We are available 24 hours a day, 7 days a week.

Sincerely,

Karla M. Rabusch

President

Average annual total return¹ (%) as of February 28, 2015

	6 months	1 year	5 year	10 year
Based on market value	8.35	16.66	4.74	7.91
Based on net asset value (NAV) per share	1.13	8.99	11.81	6.79

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's expense ratio for the six months ended February 28, 2015, was 1.09% which includes 0.16% of interest expense.

Comparison of NAV vs. market value²

High-yield, lower-rated bonds may contain more risk due to the increased possibility of default. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of international investing are magnified in emerging or developing markets. Funds that concentrate their investments in a single industry or sector may face increased risk of price fluctuation due to adverse developments within that industry or sector. Small- and midcap securities may be subject to special risks associated with narrower product lines and limited financial resources compared with their large-cap counterparts. The use of leverage results in certain risks including, among others, the likelihood of greater volatility of net asset value and the market price of common shares. Derivatives involve additional risks, including interest-rate risk, credit risk, the risk of improper valuation, and the risk of noncorrelation to the relevant instruments they are designed to hedge or to closely track. There are numerous risks associated with transactions in options on securities. Illiquid securities may be subject to wide fluctuations in market value and may be difficult to sell.

¹Total returns based on market value are calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

²This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common stock. Dividends and distributions paid by the Fund have the effect of reducing the Fund's NAV.

MANAGERS DISCUSSION

The Fund's return was 8.35% based on market value and 1.13% based on net asset value during the six-month period that ended February 28, 2015.

Overview

For the period, high-yield bond prices declined, driven primarily by the energy sector as oil prices fell nearly 50%. The high-yield market reached its lowest level in December 2014 and moved higher through January and February. Corporate leverage levels have moved higher over the past several years, though they are not at record highs. Typically, leverage is highest during recessions when earnings before interest, taxes, depreciation, and amortization typically decline. That is not the situation today. Economic and business measures have improved. In addition, accommodative U.S. Federal Reserve (Fed) policies allow companies to take advantage of historically low interest rates to extend maturities while keeping interest costs low. Low interest costs reduce the cash-flow impact of higher debt levels as evidenced by today's historically high interest coverage levels, which measure the ability of companies to meet interest obligations on outstanding debt.

The Fund's equity allocation was positioned somewhat more defensively during the period compared with the period that ended August 31, 2014. Interest rates generally declined during 2014 and into 2015, with the 10-year U.S. Treasury yield falling below 2.00% early in 2015 before moving higher in February 2015. Within the equity portfolio, the Fund's cash allocation increased.

Ten largest holdings³ (%) as of February 28, 2015

Entergy Louisiana LLC	5.14
American Electric Power Company Incorporated	4.61
ITC Holdings Corporation	4.19
NextEra Energy Incorporated	4.14
Deutsche Post AG	4.09
Suez Environnement Company SA	3.93
The Williams Companies Incorporated	3.93
Edison International	3.86
Eversource Energy	3.73
Great Plains Energy Incorporated	3.73

Credit quality⁴ as of February 28, 2015**Contributors to performance**

Relative to the broader high-yield market, the Fund's fixed-income portfolio allocation to the exploration and production and metals and mining industries had a beneficial effect on performance, though it was offset to some extent by its oil-field services industry positions. Select European equity investments contributed to performance

despite the strengthening U.S. dollar, with gains in Deutsche Post AG and Veolia Environnement SA. Domestic utility investments NextEra Energy Incorporated; American Electric Power Company Incorporated; Edison International; Entergy Louisiana, LLC; and Public Service Enterprise Group Incorporated contributed to performance.

Detractors from performance

The Fund's allocation to BB-rated bonds detracted from performance, while a lower risk profile contributed. Stocks of companies directly exposed to energy prices detracted from performance, including The Williams Companies Incorporated; Spectra Energy Corporation; and EQT Corporation.

Table of Contents

6 Wells Fargo Advantage Utilities and High Income Fund	Performance highlights (unaudited)
Country allocation ⁵ as of February 28, 2015	

Management outlook

Our base case is for high-yield bonds to perform in a relatively stable manner, potentially outperforming government and investment-grade corporate bonds, which may be more affected by rising interest rates. In this scenario, the economy improves while U.S. Treasury yields rise. We believe lower energy prices are generally positive for the economy and high-yield bonds, with the exception of energy exploration and development companies and others associated with them. We do not expect a substantial increase in 2015 defaults for energy

exploration and development companies if energy prices remain at today's level because many have hedged 2015 production partially and have access to secured debt markets. If energy prices remain low for several years, an uptick may be expected in energy-company defaults in the coming years. High levels of developed markets governmental debt, a potential real estate and municipal debt bubble in China, and persistent trade and current account concerns among certain countries could renew fears of systemic risks and related falls in risk markets. Long-term high-yield bond performance is likely to be driven primarily by corporate fundamentals and defaults. Over a full cycle, we believe the best way to protect the Fund against the potentially negative effects periodic bouts of systemic fear can have will be a continued focus on a bottom-up approach that seeks to minimize downside risk while capturing the return potential of high-yield issuers.

A strengthening economy and potential interest-rate increases also influence the outlook from an equity perspective. While stronger economic growth will be positive for utilities suffering from weak sales, it could push interest rates higher, which could be a near-term headwind for utility stocks. During the period, interest rates in the U.S. remained higher compared with Europe and Japan and the U.S. dollar strengthened sharply. The dollar could move higher if and when the Fed raises U.S. interest rates. Longer-term fundamentals for regulated network operators remain robust, while the outlook for utilities with significant commodity-price exposure remains challenging.

³The ten largest holdings are calculated based on the value of the securities divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.

⁴ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the Fund's portfolio with the ratings depicted in the chart are calculated based on the total market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was

utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality and credit quality ratings are subject to change and may have changed since the date specified.

⁵ Amounts are calculated based on the total long-term investments of the Fund. These percentages are subject to change and may have changed since the date specified.

¹ Calculated based upon average shares outstanding

² Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

³ Ratios include interest expense relating to interest associated with borrowings and/or leverage transactions as follows:

Table of Contents

Notes to financial statements (unaudited)

Wells Fargo Advantage Utilities and High Income Fund 19

1. ORGANIZATION

Wells Fargo Advantage Utilities and High Income Fund (the Fund) was organized as a statutory trust under the laws of the state of Delaware on February 4, 2004. Originally classified as non-diversified, the Fund now is classified as a diversified closed-end management investment company and is registered under the Investment Company Act of 1940, as amended. As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, *Financial Services Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time).

Equity securities and options that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the primary exchange or market that day, the prior day's price will be deemed stale and a fair value price will be determined in accordance with the Fund's Valuation Procedures.

Equity securities that are not listed on a foreign or domestic exchange or market, but have a public trading market, are valued at the quoted bid price from an independent broker-dealer that the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management) has determined is an acceptable source.

Non-listed OTC options are valued at the evaluated price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures approved by the Board of Trustees of the Fund are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2.

Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in net asset values that are higher or lower than net asset values based on the last reported sales price or latest quoted bid price. On February 28, 2015, such fair value pricing was not used in pricing foreign securities.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on an exchange

Table of Contents

20 Wells Fargo Advantage Utilities and High Income Fund

Notes to financial statements (unaudited)

or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in net realized and unrealized gains or losses from investments.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Loans

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. When the Fund purchases participations, it generally has no rights to enforce compliance with terms of the loan agreement with the borrower. As a result, the Fund assumes the credit risk of both the borrower and the lender that is selling the participation. When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan and may enforce compliance by the borrower with the terms of the loan agreement. Loans may include fully funded term loans or unfunded loan commitments, which are contractual obligations for future funding.

Options

The Fund is subject to interest rate and equity price risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options on individual securities and/or indexes. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains on the expiration date. For exercised options, the difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security and/or index underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment, the value of which is subsequently adjusted based on the current market value of the option. Premiums paid for purchased options that expire are recognized as realized losses on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. Purchased options traded over-the-counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk can be mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

Notes to financial statements (unaudited)	Wells Fargo Advantage Utilities and High Income Fund	21
---	--	----

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the custodian verifies the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Capital loss carryforwards that do not expire are required to be utilized prior to capital loss carryforwards that expire. As of August 31 2014, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2017	2018	No expiration Short-term
\$20,548,693	\$27,435,579	\$3,278,428

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- n Level 1 quoted prices in active markets for identical securities

- n Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

- n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

Table of Contents

22 Wells Fargo Advantage Utilities and High Income Fund

Notes to financial statements (unaudited)

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of February 28, 2015:

	Quoted prices (Level 1)	Other significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
Assets				
Investments in:				
Common stocks				
<i>Energy</i>	\$ 11,962,775	\$ 0	\$ 0	\$ 11,962,775
<i>Industrials</i>	5,164,244	0	0	5,164,244
<i>Telecommunication services</i>	4,399,621	0	0	4,399,621
<i>Utilities</i>	57,453,393	0	0	57,453,393
Corporate bonds and notes	0	36,165,247	0	36,165,247
Loans	0	2,036,304	961,381	2,997,685
Preferred stocks				
<i>Financials</i>	89,986	0	0	89,986
<i>Utilities</i>	10,997,516	2,509,038	0	13,506,554
Warrants				
<i>Utilities</i>	0	61,760	0	61,760
Yankee corporate bonds and notes	0	2,889,188	0	2,889,188
Short-term investments				
<i>Investment companies</i>	12,636,577	0	0	12,636,577
Total assets	\$ 102,704,112	\$ 43,661,537	\$ 961,381	\$ 147,327,030

The Fund recognizes transfers between levels within the fair value hierarchy at the end of the reporting period. At February 28, 2015, the Fund did not have any transfers into/out of Level 1, Level 2, or Level 3.

4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo) is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.60% of the Fund's average daily total assets. Total assets consist of net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain investment subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated (an affiliate of Funds Management and an indirect wholly owned subsidiary of Wells Fargo) and Crow Point Partners, LLC are each investment subadvisers to the Fund and are each entitled to receive a fee from Funds

Management at an annual rate of 0.20% of the Fund's average daily total assets.

Administration fee

Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the six months ended February 28, 2015 and the year ended August 31, 2014, the Fund did not issue any shares.

6. BORROWINGS

The Fund has borrowed approximately \$22 million through a secured debt financing agreement administered by a major financial institution (the Facility). The Facility has a commitment amount of \$25 million which expires on March 6, 2015, at which point it may be renegotiated and potentially renewed for another one-year term. At February 28, 2015, the Fund had secured borrowings outstanding in the amount of \$22,004,402 (including accrued interest and usage and commitment fees payable).

Table of Contents

Notes to financial statements (unaudited)	Wells Fargo Advantage Utilities and High Income Fund	23
---	--	----

The Fund's borrowings under the Facility are generally charged interest at a rate determined by the type of loan elected by the Fund. During the six months ended February 28, 2015, an effective interest rate of 0.91% was incurred on the borrowings. Interest expense of \$99,187, representing 0.16% of the Fund's average daily net assets, was incurred during the six months ended February 28, 2015.

The Fund has pledged all of its assets to secure the borrowings and pays a commitment fee at an annual rate equal to 0.15% of average daily unutilized amounts of the \$25 million commitment amount.

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended February 28, 2015 were \$24,319,104 and \$29,250,079, respectively.

As of February 28, 2015, the Fund had unfunded term loan commitments of \$123,554.

8. CONCENTRATION RISK

The Fund invests a substantial portion of its assets in utilities companies and, therefore, would be more affected by changes in that industry than would be a fund whose investments are not heavily weighted in the sector.

9. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

10. SUBSEQUENT DISTRIBUTIONS

The Fund declared the following distributions to shareholders:

Declaration date	Record date	Payable date	Per share amount
February 19, 2015	March 16, 2015	April 1, 2015	\$0.075
March 27, 2015	April 15, 2015	May 1, 2015	0.075
April 24, 2015	May 13, 2015	June 1, 2015	0.075

These distributions are not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

PROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available, upon request, by calling **1-800-222-8222**, visiting our website at **wellsfargoadvantagefunds.com**, or visiting the SEC website at sec.gov. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on the Fund's website at **wellsfargoadvantagefunds.com** or by visiting the SEC website at sec.gov.

ANNUAL MEETING OF SHAREHOLDERS

On December 8, 2014, an Annual Meeting of Shareholders for the Fund was held to consider the following proposal. The results of the proposal are indicated below.

Proposal 1 Election of Trustees:

Net assets voted For	Isaiah Harris, Jr.	\$ 106,899,296
Net assets voted Against		\$ 5,148,707
Net assets voted For	David F. Larcker	\$ 107,279,695
Net assets voted Against		\$ 4,768,308
Net assets voted For	Olivia S. Mitchell	\$ 106,834,503
Net assets voted Against		\$ 5,213,500

PORTFOLIO HOLDINGS INFORMATION

The complete portfolio holdings for the Fund are publicly available monthly on the Fund's website (**wellsfargoadvantagefunds.com**), on a one-month delayed basis. The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q, which is available by visiting the SEC website at sec.gov. In addition, the Fund's Form N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and at regional offices in New York City, at 233 Broadway, and in Chicago, at 175 West Jackson Boulevard, Suite 900. Information about the Public Reference Room may be obtained by calling 1-800-SEC-0330.

BOARD OF TRUSTEES AND OFFICERS

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers¹ listed below acts in identical capacities for each fund in the Wells Fargo Advantage family of funds, which consists of 134 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

Name and year of birth	Position held and length of service	Principal occupations during past five years or longer	Other directorships during past five years

Table of Contents

Automatic dividend reinvestment plan	Wells Fargo Advantage Utilities and High Income Fund	27
AUTOMATIC DIVIDEND REINVESTMENT PLAN		

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170 or by calling 1-800-730-6001.

< All or a portion of the position represents an unfunded loan commitment.

%% The security is issued on a when-issued basis.

± Variable rate investment. The rate shown is the rate in effect at period end.

Non-income-earning security

144A The security may be resold in transactions exempt from registration, normally to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933.

(i) Illiquid security

(s) The security is currently in default with regards to scheduled interest and/or principal payments. The Fund has stopped accruing interest on the security.

¥ A payment-in-kind (PIK) security is a security in which the issuer may make interest or dividend payments in cash or additional securities. These additional securities generally have the same terms as the original holdings.

(l) The security represents an affiliate of the Fund as defined in the Investment Company Act of 1940.

(u) The rate represents the 7-day annualized yield at period end.

All or a portion of this security is segregated for when-issued securities and unfunded loans.

* Cost for federal income tax purposes is \$120,714,424 and unrealized gains (losses) consists of:

Gross unrealized gains	\$ 30,683,305
Gross unrealized losses	(4,070,699)
Net unrealized gains	\$ 26,612,606

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES

Not applicable.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES

Not applicable.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS

Not applicable.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There have been no material changes to the procedures by which shareholders may recommend nominees to the registrant's Board of Trustees that have been implemented since the registrant's last provided disclosure in response to the requirements of this Item.

ITEM 11. CONTROLS AND PROCEDURES

(a) The President and Treasurer have concluded that the Wells Fargo Advantage Utilities and High Income Fund (the Trust) disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) provide reasonable assurances that material information relating to the Trust is made known to them by the appropriate persons, based on their evaluation of these controls and procedures as of a date within 90 days of the filing of this report.

(b) There were no significant changes in the Trust's internal controls over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) that occurred during the second fiscal quarter of the period covered by this report that materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
