The Markets in Review

Dear Shareholder.

Uneven economic outlooks and the divergence of monetary policies across regions have been the overarching themes driving financial markets over the past couple of years. In the latter half of 2015, investors were focused largely on the timing of the Federal Reserve's (the Fed) decision to end its near-zero interest rate policy. The Fed ultimately hiked rates in December, while, in contrast, the European Central Bank and the Bank of Japan increased stimulus, even introducing negative interest rates. The U.S. dollar had strengthened considerably, causing profit challenges for U.S. companies that generate revenues overseas, and pressuring emerging market currencies and commodities prices. Also during this time period, oil prices collapsed due to excess global supply. China showed signs of slowing economic growth and declining confidence in the country's policymakers stoked worries about the potential impact on the global economy. Risk assets (such as equities and high yield bonds) struggled as volatility increased.

The elevated market volatility spilled over into 2016, but as the first quarter wore on, fears of a global recession began to fade, allowing markets to calm and risk assets to rebound. Central bank stimulus in Europe and Japan, combined with a more tempered outlook for rate hikes in the United States, helped bolster financial markets. A softening in U.S. dollar strength brought relief to U.S. exporters and emerging market economies, and oil prices rebounded as the world slargest producers agreed to reduce supply.

Volatility spiked in late June when the United Kingdom shocked investors with its vote to leave the European Union. Uncertainty around how the British exit might affect the global economy and political landscape drove investors to high-quality assets, pushing already low global yields to even lower levels. However, risk assets recovered swiftly in July as economic data suggested that the consequences had thus far been contained to the United Kingdom.

With a number of factors holding interest rates down central bank accommodation, an aging population in need of income, and institutions such as insurance companies and pension plans needing to meet liabilities assets offering decent yield have become increasingly scarce. As a result, income-seeking investors have stretched into riskier assets despite high valuations in many sectors.

Market volatility touched a year-to-date low in August, which may be a signal that investors have become complacent given persistent macro risks: Geopolitical turmoil continues to loom. A surprise move from the Fed i.e., raising rates sooner than expected has the potential to roil markets. And perhaps most likely to stir things up the U.S. presidential election.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to adjust accordingly as market conditions change over time. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today s markets.

Trust Summary as of August 31, 2016

BlackRock Core Bond Trust

Trust Overview

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its managed assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The Trust may invest up to 25% of its total managed assets in bonds that at the time of investment are rated Ba/BB or below by Moody s Investors Service, Inc. (Moody s), Fitch Ratings (Fitch) or another nationally recognized rating agency or bonds that are unrated but judged to be of comparable quality by the investment adviser. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Current Distribution Rate on Closing Market Price as of August 31, 2016 (\$14.33) ¹	5.44%
Current Monthly Distribution per Common Share ²	\$0.065
Current Annualized Distribution per Common Share ²	\$0.780
Economic Leverage as of August 31, 2016 ³	26%

- 1 Current distribution rate on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. The current distribution rate may consist of income, net realized gains and/or a tax return of capital. Past performance does not guarantee future results.
- The distribution rate is not constant and is subject to change.
- Represents reverse repurchase agreements outstanding as a percentage of total managed assets, which is the total assets of the Trust (including any assets attributable to borrowings) minus the sum of liabilities (other than borrowings representing financial leverage). For a discussion of leveraging techniques utilized by the Trust, please see The Benefits and Risks of Leveraging on page 10.

Performance and Portfolio Management Commentary

Returns for the 12 months ended August 31, 2016 were as follows:

Returns Based On

	Market Price	NAV
BHK ^{1,2}	20.85%	13.67%
Lipper Corporate BBB-Rated Debt Funds (Leveraged) ³	15.43%	7.69%

- ¹ All returns reflect reinvestment of dividends and/or distributions.
- The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.

3 Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Trust s absolute performance based on NAV:

What factors influenced performance?

The largest positive contributor to the Trust s performance was its allocation to investment grade corporate securities, followed by its allocation to U.S. Treasuries. Also contributing to performance was the Trust s positioning within high yield corporates, commercial mortgage-backed securities (CMBS) and global sovereign/supranational/agency issues.

The Trust employs derivatives to manage duration and yield curve positioning. During the period, the employment of interest rate derivatives did not materially impact performance.

Describe recent portfolio activity.

At the start of the period the Trust maintained a consistent allocation, favoring investment grade and high yield corporates, securitized products such as asset-backed securities (ABS) and CMBS, as well as agency mortgage-backed securities (MBS). Volatility increased at year end 2015 in the wake of the first Fed rate hike in nine years and the subsequent currency depreciation of the Chinese yuan in January. As a result, the Trust reduced risk by decreasing exposure to structured products, corporate credit and sovereign securities in favor of U.S. Treasuries. During the second half of the period, the Trust continued to reduce exposure to spread products and added exposure to U.S. Treasuries, as the investment adviser expected market volatility to remain elevated ahead of the U.K. referendum on leaving the European Union. Most of the reductions were within high yield corporates and CMBS. Following the U.K. referendum vote, the Trust began to add exposure to spread products as a way of increasing yield and to benefit from investors global search for income due to very low interest rate levels.

Describe portfolio positioning at period end.

The Trust maintained diversified exposure within non-government spread sectors, including investment grade credit, high yield credit, CMBS and ABS, as well as smaller allocations to non-agency mortgages and U.S. municipals. The Trust also held exposure to government-related sectors such as U.S. Treasury securities, agency debt and agency MBS. The Trust closed the period with a long duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

² For financial reporting purposes, credit quality ratings shown above reflect the highest rating assigned by either S&P or Moody s if ratings differ. These rating agencies are independent, nationally recognized statistical rating organizations and are widely used. Investment grade ratings are credit ratings of BBB/Baa or higher. Below investment grade ratings are credit ratings of BB/Ba or lower. Investments designated N/R are not rated by either rating agency. Unrated investments do not necessarily indicate low credit quality. Credit quality ratings are subject to change.

- ³ Excludes Short-Term Securities, Options Purchased and Options Written.
- 4 The investment adviser evaluates the credit quality of not-rated investments based upon certain factors including, but not limited to, credit ratings for similar investments and financial analysis of sectors and individual investments. Using this approach, the investment adviser has deemed U.S. Government Sponsored Agency Securities and U.S. Treasury Obligations as AAA/Aaa.

Trust Summary as of August 31, 2016

BlackRock Corporate High Yield Fund, Inc.

Trust Overview

BlackRock Corporate High Yield Fund, Inc. s (HYT) (the Trust) primary investment objective is to provide shareholders with current income. The Trust s secondary investment objective is to provide shareholders with capital appreciation. The Trust seeks to achieve its objectives by investing primarily in a diversified portfolio of fixed income securities which are rated below investment grade or, if unrated, are considered by the investment adviser to be of comparable quality. The Trust may invest directly in fixed income securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Performance and Portfolio Management Commentary

Returns for the 12 months ended August 31, 2016 were as follows:

Returns Based On

	Market Price	NAV	
HYT ^{1,2}	20.29%	7.76%	
Lipper High Yield Funds (Leveraged) ³	18.69%	7.88%	

- ¹ All returns reflect reinvestment of dividends and/or distributions.
- The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.
- 3 Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Trust s absolute performance based on NAV:

What factors influenced performance?

Credit markets performed poorly during the first half of the period, driven in large part by declines in commodity prices. However, in the second half of the period, the high-yield market rebounded sharply, led by a recovery in commodity-related assets. Holdings within the energy and metals & mining industries were the most notable contributors to the Trust s performance during the period. Holdings within the technology and cable & satellite industries helped performance as well.

The Trust s exposure to equity and equity-like positions were the primary detractors to performance during the period. **Describe recent portfolio activity.**

The Trust began the period somewhat conservatively positioned but steadily increased its risk profile as volatility decreased and risk markets became more stable. By the middle of the period, the Trust had transitioned to a market-neutral risk position and then proceeded to a slightly overweight risk position. The investment adviser added risk to the portfolio at a measured pace, while remaining underweight to the more distressed areas of the high yield market, which led performance over the period. The Trust added to exposure in the metals & mining sector and moved toward a more neutral-weight position in commodity-related issuers. The Trust decreased risk in the pharmaceutical and home construction industries during the period.

Describe portfolio positioning at period end.

The Trust held the majority of its portfolio in corporate bonds, with a modest allocation to floating rate loan interests (bank loans). Within high yield corporates, the Trust had most of its assets in single B-rated bonds, followed by BB-rated bonds. The Trust kept exposure to high conviction CCC-rated issues but favored select equity and equity-like assets over the higher-beta segment of the CCC-rated bond market.

Leading individual positions included Ally Financial (banking), First Data Corp. (technology), and Altice NV (cable & satellite). The Trust also maintained exposure to equity futures positions to help reduce portfolio risk. Bank loans provided diversification and helped increase the stability of the Trust sportfolio, while providing attractive levels of income.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2016

BlackRock Income Trust, Inc.

Trust Overview

BlackRock Income Trust, Inc. s (BKT) (the Trust) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the U.S. government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Trust Information

Performance and Portfolio Management Commentary

Returns for the 12 months ended August 31, 2016 were as follows:

Returns Based On

	Market Price	NAV
BKT ^{1,2}	10.44%	3.64%
Lipper US Mortgage Funds ³	13.46%	5.27%

- ¹ All returns reflect reinvestment of dividends and/or distributions.
- The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.
- 3 Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Trust s absolute performance based on NAV:

What factors influenced performance?

The largest positive contributor to performance was the Trust s allocation in well-structured agency collateralized mortgage obligations (CMOs) that offered call protected and seasoned collateral with favorable risk/reward characteristics and attractive income.

Detractors from performance included the Trust s positioning with respect to overall portfolio duration (and corresponding sensitivity to changes in

market interest rates), as well as allocation-based strategies across both 30-year and 15-year mortgage-backed securities (MBS).

The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity (the rate at which duration changes in response to interest rate movements) and yield curve positioning. During the period, the Trust employed Treasury futures, and also utilized mortgage derivatives to gain market exposure. The use of these derivatives had a negative impact on Trust performance for the period.

Describe recent portfolio activity.

The Trust decreased exposure to agency pass-throughs, primarily in generic 30-year MBS, while marginally adding exposure to longer duration, stable CMO cash flows.

Describe portfolio positioning at period end.

The Trust continued to be overweight agency CMOs. In addition, the Trust continued to maintain allocations to 30-year MBS and some 15-year MBS with higher coupons. The Trust closed the period with a long duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Credit Quality Allocation ^{2,3}	8/31/16	8/31/15
AAA/Aaa ⁴	99%	100%
BBB	1	

For financial reporting purposes, credit quality ratings shown above reflect the highest rating assigned by either S&P or Moody s if ratings differ. These rating agencies are independent, nationally recognized statistical rating organizations and are widely used. Investment grade ratings are credit ratings of BBB/Baa or higher. Below investment grade ratings are credit ratings of BB/Ba or lower. Investments designated N/R are not rated by either rating agency. Unrated investments do not necessarily indicate low credit quality. Credit quality ratings are subject to change.

³ Excludes Money Market Funds.

The investment adviser evaluates the credit quality of not-rated investments based upon certain factors including, but not limited to, credit ratings for similar investments and financial analysis of sectors and individual investments. Using this approach, the investment adviser has deemed U.S. Government Sponsored Agency Securities and U.S. Treasury Obligations as AAA/Aaa.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the distribution rate on, and net asset value (NAV) of, their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by a Trust on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Trusts (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trusts shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, a Trust s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by a Trust with the proceeds from leverage earn income based on longer-term interest rates. In this case, a Trust s financing cost of leverage is significantly lower than the income earned on a Trust s longer-term investments acquired from such leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Trusts—return on assets purchased with leverage proceeds, income to shareholders is lower than if the Trusts had not used leverage. Furthermore, the value of the Trusts—portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Trusts obligations under their respective leverage arrangements generally does not fluctuate in relation to interest rates. As a result, changes in interest

rates can influence the Trusts NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that the Trusts intended leveraging strategy will be successful.

The use of leverage also generally causes greater changes in each Trust s NAV, market price and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the NAV and market price of a Trust s shares than if the Trust were not leveraged. In addition, each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trusts to incur losses. The use of leverage may limit a Trust s ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust incurs expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income to the shareholders. Moreover, to the extent the calculation of the Trusts investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Trust s investment advisor will be higher than if the Trusts did not use leverage.

Each Trust may utilize leverage through a credit facility or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act.), the Trusts are permitted to issue debt up to 33% of their total managed assets. A Trust may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Trust may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

If a Trust segregates or designates on its books and records cash or liquid assets having values not less than the value of a Trust sobligations under the reverse repurchase agreement (including accrued interest) then such transaction is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act.

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments. These instruments are used to obtain exposure to a security, commodity, index, market, and/or other asset without owning or taking physical custody of securities, commodities and/or other referenced assets or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage and involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the

transaction or illiquidity of the instrument. The Trusts successful use of a derivative financial instrument depends on the investment adviser s ability to predict pertinent market movements accurately, which cannot be assured. The use of these instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trusts investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

Notes to Schedule of Investments

- (a) Non-income producing security.
- (b) Variable rate security. Rate as of period end.
- (c) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) All or a portion of security has been pledged as collateral in connection with outstanding reverse repurchase agreements.
- (e) Payment-in-kind security which may pay interest/dividends in additional par/shares and/or in cash. Rates shown are the current rate and possible payment rates.

See Notes to Financial Statements.

ANNUAL REPORT AUGUST 31, 2016 25

BlackRock Core Bond Trust (BHK)

- (f) When-issued security.
- (g) Perpetual security with no stated maturity date.
- (h) Convertible security.
- (i) Issuer filed for bankruptcy and/or is in default
- (j) Amount is less than \$500.
- (k) Zero-coupon bond.
- (1) During the year ended August 31, 2016, investments in issuers considered to be affiliates of the Trust for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held		Shares Held	Value	
	at August 31,	Net	at August 31,	at August 31,	
Affiliate	2015	Activity	2016	2016	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	9,920,365	3,006,544	12,926,909	\$ 12,926,909	\$ 43,746

(m) Current yield as of period end.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.
