- (1) Senior floating-rate loans (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will typically have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate ( LIBOR ) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate ) and the certificate of deposit ( CD ) rate or other base lending rates used by commercial lenders.
- (2) This Senior Loan will settle after July 31, 2017, at which time the interest rate will be determined.
- (3) For fair value measurement disclosure purposes, security is categorized as Level 3.
- (4) Currently the issuer is in default with respect to interest and/or principal payments or has filed for bankruptcy. For a variable rate security, interest rate has been adjusted to reflect non-accrual status.
- (5) Inverse floating-rate security whose coupon varies inversely with changes in the interest rate index. The stated interest rate represents the coupon rate in effect at July 31, 2017.
- (6) Interest only security that entitles the holder to receive only interest payments on the underlying mortgages. Principal amount shown is the notional amount of the underlying mortgages on which coupon interest is calculated.
- (7) Principal only security that entitles the holder to receive only principal payments on the underlying mortgages.
- (8) Variable rate security. The stated interest rate represents the rate in effect at July 31, 2017.
- (9) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be sold in certain transactions in reliance on an exemption from registration (normally to qualified institutional buyers). At July 31, 2017, the aggregate value of these securities is \$95,229,091 or 34.7% of the Fund's net assets.

- (10) Weighted average fixed-rate coupon that changes/updates monthly. Rate shown is the rate at July 31, 2017.
- (11) Adjustable rate mortgage security. Rate shown is the rate at July 31, 2017.
- (12) When-issued security. For a variable rate security, interest rate will be determined after July 31, 2017.
- (13) Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At July 31, 2017, the aggregate value of these securities is \$18,847,017 or 6.9% of the Fund's net assets.
- (14) Multi-step coupon bond. Interest rate represents the rate in effect at July 31, 2017.
- (15) Loan is subject to scheduled mandatory prepayments. Maturity date shown reflects the final maturity date.
- (16) Variable interest rate that updates semiannually based on changes to the LIBOR. The stated interest rate represents the rate in effect at July 31, 2017.
- (17) Amount is less than 0.05%.
- (18) Non-income producing.
- (19) Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale.
- (20) Security (or a portion thereof) has been pledged to cover collateral requirements on open derivative contracts.

- (21) Affiliated investment company, available to Eaton Vance portfolios and funds, which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of July 31, 2017. Net income from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended July 31, 2017 was \$96,993.

\* If the Fund is the seller of credit protection, the notional amount is the maximum potential amount of future payments the Fund could be required to make if a credit event, as defined in the credit default swap agreement, were to occur. At July 31, 2017, such maximum potential amount for all open credit default swaps in which the Fund is the seller was \$64,400,000.

\*\* The contract annual fixed rate represents the fixed rate of interest received by the Fund (as a seller of protection) or paid by the Fund (as a buyer of protection) on the notional amount of the credit default swap contract.

\*\*\* Current market annual fixed rates, utilized in determining the net unrealized appreciation or depreciation as of period end, serve as an indicator of the market's perception of the current status of the payment/performance risk associated with the credit derivative. The current market annual fixed rate of a particular reference entity reflects the cost, as quoted by the pricing vendor, of selling protection against default of that entity as of period end and may include upfront payments required to be made to enter into the agreement. The higher the fixed rate, the greater the market perceived risk of a credit event involving the reference entity. A rate identified as "Defaulted" indicates a credit event has occurred for the reference entity.

(1) Upfront payment is exchanged with the counterparty as a result of the standardized trading coupon.

**Credit Risk:** The Fund enters into credit default swap contracts to manage certain investment risks and/or to enhance total return.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At July 31, 2017, the hierarchy of inputs used in valuing the Fund's investments and open derivative instruments, which are carried at value, were as follows:

\* None of the unobservable inputs for Level 3 assets, individually or collectively, had a material impact on the Fund. Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the fiscal year to date ended July 31, 2017 is not presented. At July 31, 2017, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.
