Table of Contents

Aegon's condensed consolidated interim financial statements 3Q 2017, prepared in accordance with IFRS as issued by the International Accounting Standards Board (IFRS), are included as an appendix and incorporated herein by reference.

This document is based on Aegon's condensed consolidated interim financial statements 3Q 2017, prepared in accordance with IFRS as adopted by the EU (IFRS-EU), dated November 9, 2017 and has been enhanced with the impacts, to all periods reported, of deviations between IFRS and IFRS-EU of which the main item is reversing the hedge accounting impacts that are applied under the EU carve out version of IAS 39. This document has been prepared for incorporation by reference in Aegon's registration statement under the Securities Act of 1933 on Form F-3 filed on December 21, 2017.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

AEGON N.V.

Condensed Consolidated Interim Financial Statements 3Q 2017 7

Notes to the Condensed consolidated interim financial statements**Amounts in EUR millions, unless otherwise stated**

Aegon N.V., incorporated and domiciled in the Netherlands, is a public limited liability company organized under Dutch law and recorded in the Commercial Register of The Hague under number 27076669 and with its registered address at Aegonplein 50, 2591 TV, The Hague, the Netherlands. Aegon N.V. serves as the holding company for the Aegon Group and has listings of its common shares in Amsterdam and New York.

Aegon N.V. (or the Company) and its subsidiaries (Aegon or the Group) have life insurance and pensions operations in more than 20 countries in the Americas, Europe and Asia and are also active in savings and asset management operations, accident and health insurance, general insurance and to a limited extent banking operations. Headquarters are located in The Hague, the Netherlands. The Group employs close to 30,000 people worldwide.

1. Basis of presentation

The condensed consolidated interim financial statements as at and for the period ended, September 30, 2017, have been prepared in accordance with IAS 34 Interim Financial Reporting , as issued by the International Accounting Standards Board (hereafter IFRS). They do not include all of the information required for a full set of financial statements prepared in accordance with IFRS and should therefore be read together with the 2016 consolidated financial statements of Aegon N.V. as included in Aegon s Annual Report on Form 20-F for 2016. Aegon s Annual Report on Form 20-F for 2016 is available on its website (aegon.com).

The condensed consolidated interim financial statements have been prepared in accordance with the historical cost convention as modified by the revaluation of investment properties and those financial instruments (including derivatives) and financial liabilities that have been measured at fair value. Certain amounts in prior periods may have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income, shareholders equity or earnings per share. The condensed consolidated interim financial statements as at, and for the period ended September 30, 2017, were approved by the Supervisory Board on November 8, 2017, except for the effects of reversing the hedge accounting impacts that are applied under the EU carve out version of IAS 39 described in Note 1, as to which the date is December 21, 2017.

The condensed consolidated interim financial statements are presented in euro (EUR) and all values are rounded to the nearest million unless otherwise stated. The consequence is that the rounded amounts may not add up to the rounded total in all cases.

The published figures in these condensed consolidated interim financial statements are unaudited.

Other than for SEC reporting purposes, Aegon prepares its condensed consolidated interim financial statements under International Financial Reporting Standards as adopted by the European Union, including the decisions Aegon made with regard to the options available under International Financial Reporting Standards as adopted by the EU

(IFRS-EU). IFRS-EU differs from IFRS in respect of certain paragraphs in IAS 39 Financial Instruments: Recognition and Measurement regarding hedge accounting for portfolio hedges of interest rate risk. Under IFRS-EU, Aegon applies fair value hedge accounting for portfolio hedges of interest rate risk (fair value macro hedges) in accordance with the EU carve out version of IAS 39. Under IFRS, hedge accounting for fair value macro hedges cannot be applied to mortgage loans and ineffectiveness arises whenever the revised estimate of the amount of cash flows in scheduled time buckets is either more or less than the original designated amount of that bucket.

This information is prepared by reversing the hedge accounting impacts that are applied under the EU carve out version of IAS 39. Financial information under IFRS accordingly does not take account of the possibility that had Aegon applied IFRS as its primary accounting framework it might have applied alternative hedge strategies where those alternative hedge strategies could have qualified for IFRS compliant hedge accounting. These decisions could have resulted in different shareholders' equity and net income amounts compared with those indicated in this condensed consolidated interim financial statements on Form 6-K.

A reconciliation between IFRS and IFRS-EU is included in the table below:

<i>EUR millions</i>	Net income			
	Shareholders	Equity	nine months ended	
	Sept. 30, 2017	Dec. 31, 2016	Sept. 30, 2017	Sept. 30, 2016
In accordance with IFRS	19,842	20,520	1,502	(188)
Adjustment of EU IAS 39 carve out	341	510	(168)	402
Tax effect of the adjustment	(75)	(117)	42	(98)
Effect of the adjustment after tax	266	393	(126)	304
In accordance with IFRS-EU	20,108	20,913	1,375	116

2. Significant accounting policies

All accounting policies and methods of computation applied in the condensed consolidated interim financial statements are the same as those applied in Aegon's Annual Report on Form 20-F for 2016.

New IFRS accounting standards effective

The following standards, interpretations, amendments to standards and interpretations became effective in 2017, but have not yet been endorsed by the European Union:

IAS 7 Amendment Disclosure Initiative;

IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses; and

Annual improvements 2014-2016 Cycle.

None of these revised standards and interpretations will significantly impact the financial position or the condensed consolidated interim financial statements.

For a complete overview of IFRS standards, published before January 1, 2017, that will be applied in future years, and were not early adopted by the Group, please refer to Aegon's Annual Report on Form 20-F for 2016.

Future adoption of IFRS accounting standards

In May 2017, the IASB has issued IFRS 17 Insurance Contracts. IFRS 17 will be mandatorily effective for annual reporting periods beginning on or after January 1, 2021. It aims to provide a more consistent accounting model for insurance contracts among entities issuing insurance contracts globally.

IFRS 17, together with IFRS 9 Financial Instruments, will fundamentally change the accounting in IFRS financial statements of insurance companies. Aegon has started its implementation project on both standards. Aegon expects the impact of these standards to be significant.

The endorsement process of the European Union of the new standard is expected to start in 2017. A final endorsement decision is not expected to be made in 2017.

Taxes

Taxes on income for the nine month period, ended September 30, 2017, are calculated using the tax rate that is estimated to be applicable to total annual earnings.

Judgments and critical accounting estimates

Preparing the condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions, including the likelihood, timing or amount of future transactions or events, that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from the estimates made.

In preparing the condensed consolidated interim financial statements, significant judgments made by management in applying the Group's accounting policies and the key sources of estimating uncertainty were not significantly different than those that were applied to the consolidated financial statements as at and for the year ended December 31, 2016.

Impact from 2017 assumption changes and model updates

In 3Q 2017, a charge of EUR 198 million (3Q 2016: EUR 81 million charge) has been recorded in other income/ (charges) in respect of assumption changes and model updates. The impact is mainly attributable to Aegon's business in the Americas and the Netherlands. Assumption changes and model updates in the Americas led to a net negative impact of EUR 304 million and were mainly driven by a charge of EUR 252 million (USD 280 million) from the conversion of the largest block of universal life business to a new model. The model allows for modeling policyholder behavior and other assumptions on a policy by policy basis. Other assumption changes and model updates led to a charge of EUR 52 million (USD 58 million). In the Netherlands, assumption changes and model updates mainly relate to the guarantee provision.

3.2 Performance measure

Aegon's segment information is prepared by consolidating on a proportionate basis Aegon's joint ventures and associated companies.

Performance measure

A non-IFRS performance measure of reporting segments utilized by the Company is underlying earnings before tax. Underlying earnings before tax reflects Aegon's profit from underlying business operations and excludes components that relate to accounting mismatches that are dependent on market volatility, updates to best estimate actuarial and economic assumptions and model updates or events that are considered outside the normal course of business.

Table of Contents

Condensed Consolidated Interim Financial Statements 3Q 2017	11
--	----

Aegon believes that its non-IFRS performance measure, underlying earnings before tax, provides meaningful supplemental information about the underlying results of Aegon's business, including insight into the financial measures that Aegon's senior management uses in managing the business. Among other things, Aegon's senior management is compensated based in part on Aegon's results against targets using underlying earnings before tax. While many other insurers in Aegon's peer group present substantially similar performance measures, the performance measures presented in this document may nevertheless differ from the performance measures presented by other insurers. There is no standardized meaning to these measures under IFRS or any other recognized set of accounting standards.

The reconciliation from underlying earnings before tax to income before tax, being the most comparable IFRS measure, is presented in the tables in this note.

The items that are excluded from underlying earnings before tax as described further below are: fair value items, realized gain or losses on investments, impairment charges/reversals, other income or charges, run-off businesses and share in earnings of joint ventures and associates.

Fair value items

Fair value items include the over- or underperformance of investments and guarantees held at fair value for which the expected long-term return is included in underlying earnings before tax.

In addition, hedge ineffectiveness on hedge transactions, fair value changes on economic hedges without natural offset in earnings and for which no hedge accounting is applied and fair value movements on real estate are included under fair value items.

Certain assets held by Aegon are carried at fair value and managed on a total return basis, with no offsetting changes in the valuation of related liabilities. These include assets such as investments in hedge funds, private equities, real estate (limited partnerships), convertible bonds and structured products. Underlying earnings before tax exclude any over- or underperformance compared to management's long-term expected return on assets. Based on current holdings and asset returns, the long-term expected return on an annual basis is 7-10%, depending on asset class, including cash income and market value changes. The expected earnings from these asset classes are net of deferred policy acquisition costs (DPAC) where applicable.

In addition, certain products offered by Aegon Americas contain guarantees and are reported on a fair value basis and the total return annuities and guarantees on variable annuities. The earnings on these products are impacted by movements in equity markets and risk-free interest rates. Short-term developments in the financial markets may therefore cause volatility in earnings. Included in underlying earnings before tax is a long-term expected return on these products and excluded is any over- or underperformance compared to management's expected return.

The fair value movements of certain guarantees and the fair value change of derivatives that hedge certain risks on these guarantees of Aegon the Netherlands, VA Europe (included in United Kingdom) and Japan are excluded from

underlying earnings before tax, and the long-term expected return for these guarantees is set at zero. In addition, fair value items include market related results on our loyalty bonus reserves in the United Kingdom. The value of these reserves are directly related to policyholder investments which value is directly impacted by movements in equity and bond markets.

Holding and other activities include certain issued bonds that are held at fair value through profit or loss (FVTPL). The interest rate risk on these bonds is hedged using swaps. The fair value movement resulting from changes in Aegon's credit spread used in the valuation of these bonds are excluded from underlying earnings before tax and reported under fair value items.

Unaudited

Table of Contents

12

Realized gains or losses on investments

Includes realized gains and losses on available-for-sale investments, mortgage loans and other loan portfolios.

Impairment charges/reversals

Impairment charges include impairments on available-for-sale debt securities, shares including the effect of deferred policyholder acquisition costs, mortgage loans and other loan portfolios at amortized cost, joint ventures and associates. Impairment reversals include reversals on available-for-sale debt securities.

Other income or charges

Other income or charges includes: a) items which cannot be directly allocated to a specific line of business; b) the impact of actuarial and economic assumption and model updates used to support calculations of our liabilities for insurance and investment contracts sold to policyholders and related assets; and c) items that are outside the normal course of business, including restructuring charges. In the condensed consolidated interim financial statements, these restructuring charges are included in operating expenses. Actuarial assumption and model updates are recorded in Claims and Benefits in the IFRS income statement.

Run-off businesses

Includes underlying results of business units where management has decided to exit the market and to run-off the existing block of business. This line includes results related to the run-off of the institutional spread-based business, structured settlements blocks of business, bank-owned and corporate-owned life insurance (BOLI/COLI) business (until April 1, 2017, please refer to note 28 Acquisitions/ divestments for more information on the divestment of this business), and the sale of the life reinsurance business in the United States. Aegon has other blocks of business for which sales have been discontinued and of which the earnings are included in underlying earnings before tax.

Share in earnings of joint ventures and associates

Earnings from Aegon's joint ventures in the Netherlands, Mexico, Spain, Portugal, China and Japan and Aegon's associates in India, Brazil, the Netherlands, United Kingdom, Mexico and France are reported on an underlying earnings before tax basis.

3.3 Investments

Amounts included in the tables on investments are presented on an IFRS basis, which means that investments in joint ventures and associates are not consolidated on a proportionate basis. Instead, these investments are included on a single line using the equity method of accounting.

6. Income from reinsurance ceded

The income from reinsurance ceded for the first nine-month period of 2017 increased by EUR 1.0 billion compared to the first nine-month period of 2016. This is mainly the result of the reinsurance transaction, related to the pay-out annuity and BOLI/COLI businesses in the US that took place in the second quarter of the year. Due to the transaction the liabilities for insurance contracts increased by EUR 0.9 billion resulting from loss recognition and then were ceded to a reinsurance company. The loss recognition is reflected in the benefits and expenses line (within claims and benefits) and is offset by an equal increase in the income from reinsurance ceded. As a result there is a nil net impact in the income statement. For more details on the divestment of the pay-out annuity and BOLI/COLI businesses refer to note 28 Acquisitions/divestments.

7. Results from financial transactions

<i>EUR millions</i>	3Q 2017	3Q 2016	YTD 2017	YTD 2016
Net fair value change of general account financial investments at FVTPL other than derivatives	-	44	84	(21)
Realized gains /(losses) on financial investments	132	6	353	287
Gains /(losses) on investments in real estate	90	27	140	52
Net fair value change of derivatives	(129)	224	(1,291)	8
Net fair value change on for account of policyholder financial assets at FVTPL	4,641	8,315	14,908	14,776
Net fair value change on investments in real estate for account of policyholders	10	(2)	25	(27)
Net foreign currency gains /(losses)	(7)	8	(15)	32
Net fair value change on borrowings and other financial liabilities	3	11	4	9
Realized gains /(losses) on repurchased debt	1	-	-	1
Total	4,741	8,632	14,207	15,117

Net fair value change on for account of policyholder financial assets at FVTPL for the first nine-month period of 2017 remained stable compared to the first nine-month period of 2016, as favorable equity markets results were largely offset by losses from interest rates movements. The decrease of the net fair value change on for account of policyholder financial assets at FVTPL in 3Q 2017 compared to 3Q 2016 is mainly driven by equity markets and interest rate movements.

Net fair value change on for accounts of policyholder financial assets at FVTPL is offset by amounts in the Claims and benefits line reported in note 9 Benefits and expenses.

8. Other income

Other income for the first nine-month period in 2017 of EUR 351 mln mainly related to a book gain of EUR 231 million (USD 250 million) from the divestment of the pay-out annuity and the BOLI/COLI businesses in the US recorded in the second quarter. Furthermore, a release of an expense reserve of EUR 82 million (GBP 71 million) was recorded that was embedded in the liabilities for insurance contracts following the completion of the Part VII transfer to Rothesay Life. In the third quarter EUR 17 million (GBP 14 million) related to the completion in the third quarter of the Part VII transfer of annuities reinsured to Legal & General in 2016 is included. For more details on the divestment of the pay-out annuity and the BOLI/COLI businesses and the completion of the Part VII transfer to Rothesay Life and Legal & General refer to note 28 Acquisitions/divestments.

December 31, 2016	109,860	5,142	39,303	154,304

The decrease of EUR 18.5 billion in financial assets, for general account, excluding derivatives compared to December 31, 2016 is mainly driven by the disposal of debt securities related to the divestment of the pay-out annuity and BOLI/COLI businesses in the Americas and the investments relating to Aegon Ireland PLC., which were reclassified to held for sale. In addition, the balance is affected by currency translation adjustments.

13. Investments for account of policyholders

<i>EUR millions</i>	Sept. 30, 2017	Dec. 31, 2016
Shares	25,119	25,492

Investment in real estate	674	686
Total investments for account of policyholders	192,352	203,610

14. Reinsurance assets

Reinsurance assets increased by EUR 8.3 billion compared to December 31, 2016 mainly due to the reinsurance transaction, related to the pay-out annuity and BOLI/COLI businesses in the US that took place in the second quarter of the year. For more details on the divestment of these businesses refer to note 28 Acquisitions/divestments.

Unaudited

Table of Contents

18

15. Derivatives

The movements in fair value of derivatives on both the asset and liability side of the condensed consolidated statement of financial position mainly result from changes in interest rates and other market movements during the period, as well as purchases, disposals and maturities. The divestment of the pay-out annuity and BOLI/COLI businesses in the US contributed to the decrease of derivative assets with EUR 259 million compared to December 31, 2016.

16. Fair value

The following tables provide an analysis of financial instruments recorded at fair value on a recurring basis by level of the fair value hierarchy:

Table of Contents

20

During the first nine months of 2017, Aegon transferred certain financial instruments from Level I and II to Level III of the fair value hierarchy. The reason for the change in level was that the market liquidity for these securities decreased, which led to a change in market observability of prices. Prior to transfer, the fair value for the Level II securities was determined using observable market transactions or corroborated broker quotes respectively for the same or similar instruments. The amount of assets and liabilities transferred to Level III was EUR 468 million (full year 2016: EUR 1,077 million). Since the transfer, all such assets have been valued using valuation models incorporating significant non market-observable inputs or uncorroborated broker quotes.

Similarly, during the first nine months of 2017, Aegon transferred EUR 398 million (full year 2016: EUR 3,266 million) of financial instruments from Level III to other levels of the fair value hierarchy. The change in level was mainly the result of a return of activity in the market for these securities and that for these securities the fair value could be determined using observable market transactions or corroborated broker quotes for the same or similar instruments.

The following table presents information about the significant unobservable inputs used for recurring fair value measurements for certain Level III financial instruments.

Overview of significant unobservable inputs

<i>EUR millions</i>	Carrying amount September 30, 2017	Valuation technique ¹	Significant unobservable input ²	Range (weighted average)

Total financial liabilities at fair value	1,893			

¹ Other in the table above (column Valuation technique) includes investments for which the fair value is uncorroborated and no broker quote is received.

² Not applicable (n.a.) has been included when no significant unobservable assumption has been identified.

³ Investments for account of policyholders are excluded from the table above and from the disclosure regarding reasonably possible alternative assumptions. Policyholder assets, and their returns, belong to policyholders and do not impact Aegon's net income or equity. The effect on total assets is offset by the effect on total liabilities. Derivatives

exclude derivatives for account of policyholders amounting to EUR 4 million.

⁴ Net asset value is considered the best approximation to the fair value of these financial instruments.

Table of Contents

Condensed Consolidated Interim Financial Statements 3Q 2017	21
---	----

The description of Aegon's methods of determining fair value is included in the consolidated financial statements for 2016. For reference purposes, the valuation techniques included in the table above are described in more detail on the following pages.

Shares

When available, Aegon uses quoted market prices in active markets to determine the fair value of its investments in shares. Fair values for unquoted shares are estimated using observations of the price/earnings or price/cash flow ratios of quoted companies considered comparable to the companies being valued. Valuations are adjusted to account for company-specific issues and the lack of liquidity inherent in an unquoted investment. Adjustments for illiquidity are generally based on available market evidence. In addition, a variety of other factors are reviewed by management, including, but not limited to, current operating performance, changes in market outlook and the third-party financing environment.

Available-for-sale shares include shares in a Federal Home Loan Bank (FHLB) for an amount of EUR 207 million (December 31, 2016: EUR 237 million) that are measured at par, which are reported as part of Other in the column Valuation technique. A FHLB has implicit financial support from the United States government. The redemption value of the shares is fixed at par and they can only be redeemed by the FHLB.

Debt securities

Aegon's portfolio of debt securities can be subdivided in Residential mortgage-backed securities (RMBS), Commercial mortgage-backed securities (CMBS), Asset-backed securities (ABS), Corporate bonds and Government debt. Below relevant details in the valuation methodology for these specific types of debt securities are described.

Valuations of RMBS, CMBS and ABS are monitored and reviewed on a monthly basis. Valuations per asset type are based on a pricing hierarchy which uses a waterfall approach that starts with market prices from indices and follows with third-party pricing services or brokers. The pricing hierarchy is dependent on the possibilities of corroboration of the market prices. If no market prices are available, Aegon uses internal models to determine fair value. Significant inputs included in the internal models are generally determined based on relative value analyses, which incorporate comparisons to instruments with similar collateral and risk profiles. Market standard models may be used to model the specific collateral composition and cash flow structure of each transaction.

Valuations of corporate bonds are monitored and reviewed on a monthly basis. The pricing hierarchy is dependent on the possibility of corroboration of market prices when available. If no market prices are available, valuations are determined by a discounted cash flow methodology using an internally calculated yield. The yield is comprised of a credit spread over a given benchmark. In all cases, the benchmark is an observable input. The credit spread contains both observable and unobservable inputs. Aegon starts by taking an observable credit spread from a similar bond of the given issuer, and then adjusts this spread based on unobservable inputs. These unobservable inputs may include subordination, liquidity and maturity differences. The weighted average credit spread used in valuation of corporate bonds has decreased to 1.3% (December 31, 2016: 3.1%).

If available, Aegon uses quoted market prices in active markets to determine the fair value of its Government debt investments. If Aegon cannot make use of quoted market prices, market prices from indices or quotes from third-party pricing services or brokers are used.

Tax credit investments

The fair value of tax credit investments is determined by using a discounted cash flow valuation technique. This valuation technique takes into consideration projections of future capital contributions and distributions, as well as future tax credits and the tax benefits of future operating losses. The present value of these cash flows is calculated by applying a discount rate. In general, the discount rate is determined based on the cash outflows for the investments and the cash inflows from the tax credits/tax benefits (and the timing of those cash flows). These inputs are unobservable in the market place. The discount rate used in valuation of tax credit investments remained level at 5.6% (December 31, 2016: 5.6%).

Unaudited

Table of Contents

22

Investment funds

Investment funds include real estate funds, private equity funds and hedge funds. The fair values of investments held in non-quoted investment funds are determined by management after taking into consideration information provided by the fund managers. Aegon reviews the valuations each month and performs analytical procedures and trending analyses to ensure the fair values are appropriate.

Derivatives

Where quoted market prices are not available, other valuation techniques, such as option pricing or stochastic modeling, are applied. The valuation techniques incorporate all factors that a typical market participant would consider and are based on observable market data when available. Models are validated before they are used and calibrated to ensure that outputs reflect actual experience and comparable market prices.

Fair values for exchange-traded derivatives, principally futures and certain options, are based on quoted market prices in active markets. Fair values for over-the-counter (OTC) derivatives represent amounts estimated to be received from or paid to a third party in settlement of these instruments. These derivatives are valued using pricing models based on the net present value of estimated future cash flows, directly observed prices from exchange-traded derivatives, other OTC trades, or external pricing services. Most valuations are derived from swap and volatility matrices, which are constructed for applicable indices and currencies using current market data from many industry standard sources. Option pricing is based on industry standard valuation models and current market levels, where applicable. The pricing of complex or illiquid instruments is based on internal models or an independent third party. For long-dated illiquid contracts, extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. To value OTC derivatives, management uses observed market information, other trades in the market and dealer prices.

Some OTC derivatives are so-called longevity derivatives. The payout of longevity derivatives is linked to publicly available mortality tables. The derivatives are measured using the present value of the best estimate of expected payouts of the derivative plus a risk margin. The best estimate of expected payouts is determined using best estimate of mortality developments. Aegon determined the risk margin by stressing the best estimate mortality developments to quantify the risk and applying a cost-of-capital methodology. The most significant unobservable input for these derivatives is the (projected) mortality development.

Aegon normally mitigates counterparty credit risk in derivative contracts by entering into collateral agreements where practical and in ISDA (International Swaps and Derivatives Association) master netting agreements for each of the Group's legal entities to facilitate Aegon's right to offset credit risk exposure. Changes in the fair value of derivatives attributable to changes in counterparty credit risk were not significant.

Embedded derivatives in insurance contracts including guarantees

All bifurcated guarantees for minimum benefits in insurance and investment contracts are carried at fair value. These guarantees include guaranteed minimum withdrawal benefits (GMWB) in the United States, United Kingdom and Japan which are offered on some variable annuity products and are also assumed from a ceding company; minimum investment return guarantees on insurance products offered in the Netherlands, including group pension and traditional products; variable annuities sold in Europe and Japan.

Since the price of these guarantees is not quoted in any market, the fair values of these guarantees are based on discounted cash flows calculated as the present value of future expected payments to policyholders less the present value of assessed rider fees attributable to the guarantees. Given the complexity and long-term nature of these guarantees which are unlike instruments available in financial markets, their fair values are determined by using stochastic models under a variety of market return scenarios. A variety of factors are considered including credit spread, expected market rates of return, equity and interest rate volatility, correlations of market returns, discount rates and actuarial assumptions. The most significant unobservable factor is discount rate. The credit spread used in the valuations of embedded derivatives in insurance contracts has decreased to 0.3% (December 31, 2016: 0.4%).

Unaudited

Table of Contents

Condensed Consolidated Interim Financial Statements 3Q 23
2017

The expected returns are based on risk-free rates. Aegon added a premium to reflect the credit spread as required. The credit spread is set by using the credit default swap (CDS) spreads of a reference portfolio of life insurance companies (including Aegon), adjusted to reflect the subordination of senior debt holders at the holding company level to the position of policyholders at the operating company level (who have priority in payments to other creditors). Aegon's assumptions are set by region to reflect differences in the valuation of the guarantee embedded in the insurance contracts.

Since many of the assumptions are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level III of the fair value hierarchy.

Effect of reasonably possible alternative assumptions

The effect of changes in unobservable inputs on fair value measurement were not significantly different than those that were applied to the consolidated financial statements as at and for the year ended December 31, 2016.

Fair value information about financial instruments not measured at fair value

The following table presents the carrying values and estimated fair values of financial assets and liabilities, excluding financial instruments which are carried at fair value on a recurring basis.

Fair value information about financial instruments not measured at fair value

<i>EUR millions</i>	Carrying amount September 30, 2017	Total estimated fair value September 30, 2017	Carrying amount December 31, 2016	Total estimated fair value December 31, 2016
Assets				
Mortgage loans - held at amortized cost	33,245	37,707	33,696	38,499
Private loans - held at amortized cost	3,412	3,808	3,166	3,569
Other loans - held at amortized cost	2,168	2,168	2,441	2,441

Liabilities

Subordinated borrowings - held at amortized cost	764	916	767	844
Trust pass-through securities - held at amortized cost	137	135	156	141
Borrowings - held at amortized cost	14,152	14,511	12,543	12,935
Investment contracts - held at amortized cost	16,697	17,071	19,217	19,748
Financial instruments for which carrying value approximates fair value				

Certain financial instruments that are not carried at fair value are carried at amounts that approximate fair value, due to their short-term nature and generally negligible credit risk. These instruments include cash and cash equivalents, short-term receivables and accrued interest receivable, short-term liabilities, and accrued liabilities. These instruments are not included in the table above.

17. Deferred expenses

<i>EUR millions</i>	Sept. 30, 2017	Dec. 31, 2016
Deferred policy acquisition costs (DPAC) for insurance contracts and investment contracts with discretionary participation features	9,831	10,882
Deferred cost of reinsurance	46	60
Deferred transaction costs for investment management services	410	481
Total deferred expenses	10,288	11,423

The divestment of the pay-out annuity and BOLI/COLI businesses in the US resulted in a write off regarding deferred policy acquisition costs of EUR 205 million. In addition, deferred policy acquisition costs are predominantly impacted by unfavorable currency translation adjustments.

18. Intangible assets

<i>EUR millions</i>	Sept. 30, 2017	Dec. 31, 2016
Goodwill	324	294
VOBA	1,178	1,399
Future servicing rights	100	64
Software	42	50
Other	37	12
Total intangible assets	1,682	1,820

Intangible assets, except for goodwill, are predominantly impacted by periodic amortization of balances and changes in foreign exchange rates. The acquisition of Cofunds Ltd. in January 2017 resulted in the addition of goodwill amounting to EUR 56 million and of customer intangibles (included in the line Other) amounting to EUR 29 million. The divestment of the payout annuity and BOLI/COLI businesses in the US resulted in a write off of VOBA of EUR 18 million. Future servicing rights increased by EUR 36 million mainly due to the acquisition of Nordea second-pillar pension fund. Refer to note 28 Acquisitions/divestments.

Interim dividend 2017

On September 13, 2017 Aegon paid an interim dividend 2017 in cash or stock at the election of the shareholder. The cash dividend amounted to EUR 0.13 per common share and the stock dividend amounted to one new Aegon common share for every 36 common shares held. Dividend paid on common shares B amounted to 1/40th of the dividend paid on common shares. The interim dividend 2017 is paid in cash or in stock at the election of the shareholder. The stock fraction is based on Aegon's average share price as quoted on Euronext Amsterdam, using the high and low of each of the five trading days from September 4 up to and including September 8, 2017. The value of the stock dividend and the cash dividend are approximately equal in value and 43% of shareholders elected to receive the stock dividend. The remaining 57% opted for cash dividend. The average share price calculated on this basis amounted to EUR 4.7033. The stock dividend and the cash dividend are approximately equal in value.

Final dividend 2016

The Annual General Meeting of Shareholders on May 19, 2017, approved a final dividend for the year 2016 of EUR 0.13 per common share in either cash or stock. The stock dividend amounted to one new Aegon common share for every 35 common shares held. After taking into account the interim dividend 2016 of EUR 0.13 per common share, this resulted in a total 2016 dividend of EUR 0.26 per common share. Final dividend for the year and total 2016 dividend per common share B amounted to 1/40th of the dividend paid on common shares.

The final dividend 2016 is paid in cash or in stock at the election of the shareholder. The value of the stock dividend and the cash dividend are approximately equal in value and 46% of shareholders elected to receive the stock dividend. Those who elected to receive a stock dividend received one Aegon common share for every 35 common shares held. The stock fraction is based on Aegon's average share price as quoted on Euronext Amsterdam, using the high and low of each of the five trading days from June 12 up to and including June 16, 2017. The average share price calculated on this basis amounted to EUR 4.5254. The dividend was paid as of June 23, 2017.

20. Insurance contracts

Insurance contracts decreased by EUR 8.7 billion to EUR 110.8 billion compared to December 31, 2016 mainly due to changes in foreign exchange rates.

21. Insurance contracts for account of policyholders

Insurance contracts for account of policyholders decreased by EUR 2.1 billion to EUR 118.8 billion compared to December 31, 2016. An increase in insurance liabilities driven by received gross premiums and deposits, and by an increase in the market value of underlying assets, was more than offset by changes in foreign exchange rates and insurance liabilities released. In addition, the reclassification to held for sale of the liabilities related to Aegon Ireland plc. of EUR 1.3 billion contributed to the decrease.

22. Investment contracts

Investment contracts decreased by EUR 2.6 billion to EUR 17.0 billion compared to December 31, 2016 mainly due to an accelerated reduction of run-off balances in the first quarter.

23. Investment contracts for account of policyholders

The decrease of Investment contracts for account of policyholders of EUR 8.7 billion to EUR 76.0 billion compared to December 31, 2016 includes the reclassification of the liabilities related to Aegon Ireland plc. as held for sale. Please refer to note 25 Assets and Liabilities held for sale for more details. In addition, changes in foreign exchange rates also contributed to the decrease.

24. Borrowings

<i>EUR millions</i>	Sept. 30, 2017	Dec. 31, 2016
Capital funding	2,299	2,386
Operational funding	12,403	10,766
Total borrowings	14,702	13,153

Included in borrowings is EUR 550 million relating to borrowings measured at fair value (December 31, 2016: EUR 610 million).

During the first nine months of 2017, the operational funding increased EUR 1.7 billion due to new FHLB advances and a EUR 0.5 billion covered bond issuance in the Netherlands. This was partly offset by a decrease of EUR 0.5 billion as a result of foreign exchange losses on the US dollar positions.

On July 18, 2017, Aegon redeemed unsecured notes with a coupon of 3%, issued in 2012. The principal amount of EUR 500 million was repaid with accrued interest. On August 30, 2017 Aegon issued EUR 500 million senior unsecured notes, due August 30, 2018. The notes were issued under Aegon's USD 6 billion debt issuance program at a price of 100.157%, and will carry a coupon of 0.00%.

25. Assets and Liabilities held for sale

Assets and liabilities held for sale include disposal groups whose carrying amount will be recovered principally through a sale transaction rather than through continuing operations. This relates to businesses for which a sale is agreed upon or a sale is highly probable at the balance sheet date but for which the transaction has not yet fully closed.

Aegon Ireland

On August 9, 2017, Aegon agreed to sell Aegon Ireland plc. The sales price will amount to 81% of the Solvency II Own Funds of Aegon Ireland at the end of 2017. As the transaction is contingent on certain closing and market conditions until closing of the transaction, the book loss is uncertain. The transaction is subject to customary regulatory approvals and is expected to close in the first quarter of 2018.

Aegon Ireland is included in the United Kingdom operating segment.

Aegon UK

In 2016, Aegon reclassified certain assets and liabilities to the assets and liabilities held for sale line, following the sale of its UK annuity portfolio. In 2017, following court approval on the Part VII¹ transfers, the sale of the annuity

portfolio to Rothesay Life and Legal & General was completed. As a consequence the assets held for sale which were on the balance sheet per December 31, 2016, of EUR 8,705 million and the liabilities held for sale on the balance sheet per December 31, 2016, of EUR 8,816 million have been derecognized. The UK annuity portfolio is included in the United Kingdom operating segment. Also refer to note 28 Acquisitions/divestments.

1 A Part VII transfer is a court-sanctioned legal transfer of some or all of the policies of one company to another governed by Part VII of the Financial Services and Markets Act 2000.

26. Capital management and solvency

Capital adequacy

The capitalization of the Aegon Group and its operating units is managed in relation to the most stringent of local regulatory requirements, rating agency requirements and/or self-imposed criteria. Aegon manages its Solvency II capital in relation to the required capital. Under Aegon's capital management framework the own funds are managed such that the Group Solvency II ratio remains within the target range of 150% - 200%. This target range has been updated (previous target range: 140% - 170%) in line with a revision of Aegon's group capital management policy.

Unaudited

Table of Contents

28

Together with this capital policy update, Aegon agreed with the Dutch Central Bank (DNB) to apply a revised method to calculate the Solvency II contribution of the Aegon US Insurance entities under Deduction & Aggregation (D&A), affecting Aegon's tiering of capital, retrospectively as of 2Q, 2017. It includes lowering of the conversion factor from 250% to 150% RBC Company Action Level and reducing own funds by a 100% RBC Company Action Level requirement to reflect transferability restrictions. The methodology is subject to annual review. This methodology is consistent with EIOPA's guidance on group solvency calculation in the context of equivalence, and in line with methods applied by other European peer companies. As a consequence, this adjustment improves the comparability of capital positions of European insurance groups with substantial insurance activities in the US. The impact on Tiering is included in the table in the Capital quality section below.

Capital quality

Aegon's capital consists of 3 Tiers as an indication of its quality, with Tier 1 capital ranking highest. The Group own funds do not include any impact from contingent liabilities potentially arising from unit-linked products sold, issued or advised on by Aegon in the Netherlands in the past as the potential liability cannot be reliably quantified at this point. Further, the available own funds number reflects Aegon's interpretation of Solvency II requirements which is subject to supervisory review.

The below table provides the composition of Aegon's available own funds across Tiers:

	September 30, 2017 ¹		December 31, 2016
	Available own funds	December 31, 2016 ¹ Available own funds	Available own funds
Tier 1 - unrestricted	10,162	10,081	10,656
Tier 1 - restricted	3,576	3,817	3,817
Tier 2	1,216	1,291	2,008
Tier 3	689	768	1,638
Total available own funds	15,644	15,957	18,119

¹ The tiering information is based on the revised method which was confirmed by DNB on August 8, 2017.

On a comparable basis, under the revised methodology Aegon's own funds reduced by EUR 1.9 billion at December 31, 2016. This is reflected through eliminating deferred tax balances, recorded in Tier 3 for an amount of EUR 0.9 billion and Tier 2 for an amount of EUR 0.7 billion and eliminating Tier 1 unrestricted of EUR 0.6 billion.

Edgar Filing: AEGON NV - Form 6-K

As at September 30, 2017, Tier 1 capital accounted for 88% of own funds (2016: 87%; pro forma number based on revised method), including EUR 3,077 million of junior perpetual capital securities (2016: EUR 3,309 million) and EUR 499 million of perpetual cumulative subordinated bonds (2016: EUR 508 million) which are both classified as grandfathered restricted Tier 1 capital.

The grandfathered restricted Tier 1 and Tier 2 capital instruments are grandfathered such that they are considered as capital under the Solvency II framework for up to 10 years as from January 1, 2016.

Tier 3 capital as of September 30, 2017, is comprised of deferred tax assets balances related to Solvency II entities.

29

IFRS equity compared to Solvency II own funds

<i>EUR millions</i>	September 30, 2017 ¹	December 31, 2016 ¹	December 31, 2016
Shareholders' Equity	19,842	20,520	20,520
IFRS adjustments for Other Equity Instruments and non controlling interests	3,806	3,821	3,821
Group Equity	23,648	24,341	24,341
Solvency II revaluations	(4,853)	(5,242)	(5,242)
Excess of Assets over Liabilities	18,795	19,100	19,100
Availability adjustments	(599)	(361)	(361)
Fungibility restrictions ²	(699)	(619)	(619)
Transferability restrictions ³	(1,852)	(2,162)	-
Available own funds	15,644	15,957	18,119

¹ The own funds information is based on the revised method which was confirmed by DNB on August 8, 2017.

² Amongst others, this contains the exclusion of Aegon Bank

³ This includes the transferability restriction related to the new RBC CAL conversion methodology

The Solvency II revaluations of EUR 4,853 million (2016: EUR 5,242 million) stem from the difference in valuation between IFRS and Solvency II frameworks, which can be grouped into three categories:

Items that are not recognized under Solvency II. The most relevant examples of this category for Aegon include Goodwill, DPAC and other intangible assets (EUR 2,037 million, 2016: EUR 2,118 million);

Items that have a different valuation treatment between IFRS and Solvency II. Solvency II is a market consistent framework hence all assets and liabilities are to be presented at fair value while IFRS also includes other valuation treatments in addition to fair value. The most relevant examples of this category for Aegon Group include Loans and Mortgages, Reinsurance Recoverables and Technical provisions. The revaluation difference stemming from this category amounted to EUR (1,805) million (2016: EUR (1,924) million) compared to the IFRS Statement of Financial Position;

The Net Asset Value of subsidiaries that are included under the Deduction & Aggregation method (on provisional equivalence or Standard Formula basis) in the Group Solvency II results. The revaluation difference stemming from this category amounted to EUR (5,351) million (2016: EUR (5,828) million) compared to the IFRS Statement of Financial Position.

The availability adjustments are changes to the availability of own funds of Aegon Group in accordance with Solvency II requirements. Examples include the adjustments for subordinated liabilities, ring-fenced fund, treasury

shares and foreseeable dividend (if applicable).

Fungibility restrictions limit the availability of own funds on Aegon Group level as prescribed by Supervisory Authorities. These limitations refer to charitable trusts in the Americas for which the local Supervisory Authority could limit the upstream of capital to the Group, and Aegon Bank which is under a different regulatory regime but under the same Supervisory Authority and therefore excluded for Solvency II purposes.

Finally, Transferability restrictions reflect the restrictions on US Life Companies DTA and capping of Tier 1 unrestricted own funds as a consequence of the new RBC CAL conversion methodology as described above.

[27. Commitments and contingencies](#)

The U.S. Securities and Exchange Commission is conducting a formal investigation related to certain investment strategies offered through mutual funds, variable products and separately managed accounts. These strategies used quantitative models developed by one of the former portfolio managers of Aegon's US investment management business unit. Among other things, the investigation relates to the operation of and/or the existence of errors in the quantitative models in question and related disclosures. The funds and strategies under review were sub-advised, advised or marketed by Aegon's US group companies. The models are no longer being used, although some of the funds are still being offered. The money management strategies are no longer being offered. Aegon is cooperating fully with the investigation.

Unaudited

Table of Contents

Condensed Consolidated Interim Financial Statements 3Q 2017	30
--	----

Government investigations, including this one, may result in the institution of administrative, injunctive or other proceedings and/or the imposition of monetary fines, penalties and/or disgorgement, as well as other remedies, sanctions, damages and restitutionary amounts. While Aegon is unable to predict what action, if any, the SEC might take and is unable to predict the costs to or other impact on Aegon of any such action, there can be no assurances that this matter or other government investigations will not have a material and adverse effect on Aegon's reputation, financial position, results of operations or liquidity.

There have been no other material changes in contingent assets and liabilities as reported in the 2016 consolidated financial statements of Aegon.

28. Acquisitions / divestments

On January 1, 2017, Aegon completed the acquisition of Cofunds Ltd., following regulatory approval. The purchase of the Cofunds Ltd. business was done through a sale and purchase agreement to acquire all the shares and platform assets. The total consideration of the acquisition amounted to GBP 147 million (EUR 171 million). The fair value of the net assets amounted to GBP 99 million (EUR 116 million), of which GBP 25 million (EUR 29 million) related to customer intangibles, resulting in goodwill of GBP 48 million (EUR 56 million). The value of the transferred customer investments as per January 1, 2017 amounted to approximately GBP 82 billion (EUR 96 billion) and is not recognized on Aegon's balance sheet.

On June 28, 2017, Aegon completed its transaction to divest its two largest US run-off businesses, the payout annuity business and Bank Owned Life Insurance/ Corporate Owned Life Insurance business (BOLI/COLI). Under the terms of the agreement, Aegon's Transamerica life subsidiaries has reinsured USD 14 billion of liabilities. The transaction resulted in a book gain of USD 250 million (EUR 231 million), reported in the line other income in the condensed consolidated income statement. The book gain consisted of a loss on the reinsurance transaction which is more than offset by the reclassification of gains from Other Comprehensive Income following the disposal of assets to fund the transaction.

The loss on the reinsurance transaction amounted to USD 1,813 million (EUR 1,675 million) being the difference of the reinsurance premium paid and the reinsurance asset received related to the insurance liabilities. Upon disposal an amount of USD 979 million (EUR 905 million) and USD 1,018 million (EUR 941 million) respectively related to revaluation reserves and cash flow hedging reserves has been reclassified from Other Comprehensive Income into the income statement. Gains on sale of certain assets carried at amortized cost backing the insurance liabilities amount to USD 94 million (EUR 87 million). Other expenses related to the transaction, including cost of sale, amounted to USD 28 million (EUR 26 million).

On June 30, 2017, following court approval on the Part VII transfer, the sale of the annuity portfolio to Rothesay Life has been completed. For more details related to the sale of the UK annuity portfolio, refer to the Annual Report 2016.

On August 2, 2017, Aegon Poland has received approval by the Polish Financial Supervision Authority to take over the management of the Nordea second-pillar pension fund.

Edgar Filing: AEGON NV - Form 6-K

On August 9, 2017, Aegon agreed to sell Aegon Ireland plc. The sales price will amount to 81% of the Solvency II Own Funds of Aegon Ireland at the end of 2017. This transaction further optimizes its portfolio of businesses. As the transaction is contingent on certain closing and market conditions until closing of the transaction, the book loss is uncertain. This divestment is expected to have an immaterial impact on income before tax and underlying earnings before tax going forward. The transaction is subject to customary regulatory approvals and is expected to close in the first quarter of 2018.

On September 22, 2017, following court approval on the Part VII transfer, the sale of the annuity portfolio to Legal & General has been completed. For more details related to the sale of the UK annuity portfolio, refer to the Annual Report 2016.

Share buyback

To neutralize the dilutive effect of the 2016 final dividend and the 2017 interim stock dividend paid in shares, Aegon is executing a program to repurchase 51,864,626 common shares. Aegon has committed to the repurchase of the common shares by engaging a third party to execute the transactions on its behalf. These transactions have commenced on October 2, 2017, and are expected to be completed on, or before, December 15, 2017. These shares will be held as treasury shares and will be used to cover future stock dividends.

Unirobe Meeùs Groep

On November 1, 2017, Aegon completed the sale of Unirobe Meeùs Groep (UMG), an independent financial advisory group, for a total consideration of EUR 295 million. The divestment will lead to a book gain of approximately EUR 180 million, which will be reported in Other income in the fourth quarter. As a consequence of this transaction annual income before tax and underlying earnings before tax will decrease by approximately EUR 20 million going forward.

Disclaimers**Cautionary note regarding non-IFRS-EU measures**

This document includes the following non-IFRS financial measures: underlying earnings before tax, income tax and income before tax. These non-IFRS measures are calculated by consolidating on a proportionate basis Aegon's joint ventures and associated companies. The reconciliation of these measures to the most comparable IFRS measure is provided in note 3 Segment information of Aegon's Condensed Consolidated Interim Financial Statements. Aegon believes that these non-IFRS measures, together with the IFRS information, provide meaningful supplemental information about the underlying operating results of

Forward-looking statements

The statements contained in this document that are not historical facts are forward-looking statements as defined in the US Private Securities Litigation Reform Act of 1995. The following are words that identify such forward-looking statements: aim, believe, estimate, target, intend, may, expect, anticipate, predict, project, counting on, plan, continue, want, forecast, goal, should, would, is confident, will, and similar expressions as they relate to Aegon. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Aegon undertakes no obligation to publicly update or revise any forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which merely reflect company expectations at the time of writing. Actual results may differ materially from expectations conveyed in forward-looking statements due to changes caused by various risks and uncertainties. Such risks and uncertainties include but are not limited to the following:

- Changes in general economic conditions, particularly in the United States, the Netherlands and the United Kingdom;

- Changes in the performance of financial markets, including emerging markets, such as with regard to:

- The frequency and severity of defaults by issuers in Aegon's fixed income investment portfolios;

- The effects of corporate bankruptcies and/or accounting restatements on the financial markets and the resulting decline in the value of equity and debt securities Aegon holds; and

- The effects of declining creditworthiness of certain public sector securities and the resulting decline in the value of government exposure that Aegon holds;

- Changes in the performance of Aegon's investment portfolio and decline in ratings of Aegon's counterparties;

- Consequences of a potential (partial) break-up of the euro;

- Consequences of the anticipated exit of the United Kingdom from the European Union;

- The frequency and severity of insured loss events;

- Changes affecting longevity, mortality, morbidity, persistence and other factors that may impact the profitability of Aegon's insurance products;

- Reinsurers to whom Aegon has ceded significant underwriting risks may fail to meet their obligations;

Changes affecting interest rate levels and continuing low or rapidly changing interest rate levels;
Changes affecting currency exchange rates, in particular the EUR/USD and EUR/GBP exchange rates;
Changes in the availability of, and costs associated with, liquidity sources such as bank and capital markets funding, as well as conditions in the credit markets in general such as changes in borrower and counterparty creditworthiness;
Increasing levels of competition in the United States, the Netherlands, the United Kingdom and emerging markets;
Changes in laws and regulations, particularly those affecting Aegon's operations' ability to hire and retain key personnel, taxation of Aegon companies, the products Aegon sells, and the attractiveness of certain products to its consumers;
Regulatory changes relating to the pensions, investment, and insurance industries in the jurisdictions in which Aegon operates;
Standard setting initiatives of supranational standard setting bodies such as the Financial Stability Board and the International Association of Insurance Supervisors or changes to such standards that may have an impact on regional (such as EU), national or US federal or state level financial regulation or the application thereof to Aegon, including the designation of Aegon by the Financial Stability Board as a Global Systemically Important Insurer (G-SII);
Changes in customer behavior and public opinion in general related to, among other things, the type of products Aegon sells, including legal, regulatory or commercial necessity to meet changing customer expectations;
Acts of God, acts of terrorism, acts of war and pandemics;
Changes in the policies of central banks and/or governments;
Lowering of one or more of Aegon's debt ratings issued by recognized rating organizations and the adverse impact such action may have on Aegon's ability to raise capital and on its liquidity and financial condition;
Lowering of one or more of insurer financial strength ratings of Aegon's insurance subsidiaries and the adverse impact such action may have on the premium writings, policy retention, profitability and liquidity of its insurance subsidiaries;
The effect of the European Union's Solvency II requirements and other regulations in other jurisdictions affecting the capital Aegon is required to maintain;
Litigation or regulatory action that could require Aegon to pay significant damages or change the way Aegon does business;
As Aegon's operations support complex transactions and are highly dependent on the proper functioning of information technology, a computer system failure or security breach may disrupt Aegon's business, damage its reputation and adversely affect its results of operations, financial condition and cash flows;
Customer responsiveness to both new products and distribution channels;
Competitive, legal, regulatory, or tax changes that affect profitability, the distribution cost of or demand for Aegon's products;
Changes in accounting regulations and policies or a change by Aegon in applying such regulations and policies, voluntarily or otherwise, which may affect Aegon's reported results and shareholders' equity;
Aegon's projected results are highly sensitive to complex mathematical models of financial markets, mortality, longevity, and other dynamic systems subject to shocks and unpredictable volatility. Should assumptions to these models later prove incorrect, or should errors in those models escape the controls in place to detect them, future performance will vary from projected results;
The impact of acquisitions and divestitures, restructurings, product withdrawals and other unusual items, including Aegon's ability to integrate acquisitions and to obtain the anticipated results and synergies from acquisitions;
Catastrophic events, either manmade or by nature, could result in material losses and significantly interrupt Aegon's business;
Aegon's failure to achieve anticipated levels of earnings or operational efficiencies as well as other cost saving and excess capital and leverage ratio management initiatives; and
This press release contains information that qualifies, or may qualify, as inside information within the meaning of Article 7(1) of the EU Market Abuse Regulation.

Further details of potential risks and uncertainties affecting Aegon are described in its filings with the Netherlands Authority for the Financial Markets and the US Securities and Exchange Commission, including the Annual Report.

These forward-looking statements speak only as of the date of this document. Except as required by any applicable law or regulation, Aegon expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Aegon's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.
