WisdomTree Yield Enhanced U.S. Short-Term Aggregate Bond Fund (formerly, WisdomTree Barclays Yield Enhanced U.S. Short-Term Aggregate Bond Fund) – SHAG (Cboe BZX Exchange, Inc.)

Summary Prospectus – January 1, 2018, as amended June 29, 2018

Before you invest in the Fund, as defined below, you may want to review the Fund’s prospectus and statement of additional information (“SAI”), which contain more information about the Fund and the risks of investing in the Fund. The Fund’s current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund’s prospectus and SAI, as well as other information about the Fund, online at [www.wisdomtree.com/resource-library/prospectus-regulatory-reports](http://www.wisdomtree.com/resource-library/prospectus-regulatory-reports). You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to [getinfo@wisdomtree.com](mailto:getinfo@wisdomtree.com).

**Investment Objective**

The WisdomTree Yield Enhanced U.S. Short-Term Aggregate Bond Fund (the “Fund”) will seek to track the price and yield performance, before fees and expenses, of the Bloomberg Barclays U.S. Short Aggregate Enhanced Yield Index (the “Index”).

**Fees and Expenses of the Fund**

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

|                                                                                                                  |                      |
|------------------------------------------------------------------------------------------------------------------|----------------------|
| Shareholder Fees (fees paid directly from your investment)                                                       | None                 |
| Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment) |                      |
| Management Fees                                                                                                  | 0.20%                |
| Distribution and/or Service (12b-1) Fees                                                                         | None                 |
| Other Expenses                                                                                                   | 0.00% <sup>1</sup>   |
| Total Annual Fund Operating Expenses                                                                             | 0.20%                |
| Fee Waivers                                                                                                      | (0.08)% <sup>2</sup> |
| Total Annual Fund Operating Expenses After Fee Waivers                                                           | 0.12% <sup>2</sup>   |

1 Other Expenses are based on estimated amounts for the current fiscal year.

2 WisdomTree Asset Management, Inc. has contractually agreed to limit the Management Fee to 0.12% through December 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

**Example**

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year 3 Years  
 \$ 12 \$ 56

WisdomTree Trust Prospectus 1

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 44% of the average value of its portfolio, including TBA Transactions (as defined below), and 22% of the average value of its portfolio (excluding TBA Transactions).

### Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to broadly capture the short-term U.S. investment grade, fixed income securities market while seeking to enhance yield within desired risk parameters and constraints. The Index is comprised of those subgroups of the Bloomberg Barclays U.S. Aggregate Index (i.e., Treasuries, agencies, credit and securitized) with effective maturities generally shorter than five years (“ST Agg Universe”). The Index uses a rules-based approach to re-weight these subgroups to achieve higher yields, while managing risk through constraints on expected tracking error and turnover, as well as sector, duration, and credit exposure relative to the market value-weighted ST Agg Universe. Individual securities within a subgroup are market value-weighted within the subgroup. The Index is rebalanced on a monthly basis.

The Index draws from the ST Agg Universe, which consists of U.S. dollar-denominated securities, including U.S. Treasuries, U.S. Government-related bonds, corporate bonds, mortgage-backed pass-through securities, commercial mortgage-backed securities, and asset-backed securities that are publicly offered for sale in the United States. These securities feature fixed rate coupons and have at least \$300 million in par amount outstanding and one year to final maturity, with the exception of asset-backed securities and commercial mortgage-backed securities, which must have an original deal size of \$500 million, a minimum tranche size of \$25 million, and at least \$300 million of the original transaction still outstanding.

The duration of the Index is generally expected not to exceed the duration of the ST Agg Universe by more than 0.5 years. The ST Agg Universe has historically had a duration range between approximately two and three years. Duration is a measure used to determine the sensitivity of a portfolio to changes in interest rates with a longer duration portfolio being more sensitive to changes in interest rates. For example, the value of a fund with a portfolio duration of three years would be expected to drop by 3% for every 1% increase in interest rates.

The Index includes U.S. agency mortgage-backed pass-through securities, which are securities issued by entities such as Federal Home Loan Mortgage Corporation (“FHLMC”) and Federal National Mortgage Association (“FNMA”) that are backed by pools of mortgages. Most transactions in mortgage-backed pass-through securities occur through standardized contracts for future delivery in which the exact mortgage pools to be delivered are not specified until a few days prior to settlement, referred to as a “to-be-announced transaction” or “TBA Transaction.” In a TBA Transaction, the buyer and seller agree upon general trade parameters such as agency, settlement date, par amount and price. The actual pools delivered generally are determined two days prior to the settlement date; however, it is not anticipated that the Fund will receive pools, but instead will participate in rolling TBA Transactions. The Fund expects to enter into such contracts on a regular basis. The Fund, pending settlement of such contracts, will invest its assets in high-quality, liquid short-term instruments.

The Fund may invest up to 20% of its assets in other fixed income securities and/or such other investments, with characteristics similar to the Index constituents, that the Adviser and/or Sub-Adviser believe will help the Fund track the performance of the Index. Other fixed income securities will consist primarily of investment grade securities with similar risk characteristics as the Index components, but up to 5% of the Fund’s total assets may be held in non-investment grade securities (“junk bonds”) with credit ratings deemed to be of no less than BB.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

#### Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cash Redemption Risk.** The Fund generally redeems shares for cash or otherwise includes cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a ten-year duration would be expected to drop by approximately 10% in response to a 1% increase in interest rates.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments

relating to the Index.

WisdomTree Trust Prospectus 3

---

**Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Mortgage- and Asset-Backed Securities Risk.** Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of mortgage- and asset-backed securities. Mortgage- and asset-backed securities can also be subject to the risk of default on the underlying mortgages or other assets.

Mortgage- and asset-backed securities are subject to fluctuations in yield due to prepayment rates that may be faster or slower than expected. Default or bankruptcy of a counterparty to a mortgage-related transaction would expose the Fund to possible loss.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

#### Fund Performance

The Fund commenced operations on May 18, 2017, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

#### Management

##### Investment Adviser and Sub-Adviser

WisdomTree Asset Management serves as investment adviser to the Fund. Voya Investment Management Co., LLC ("Voya IM") serves as sub-adviser to the Fund.

##### Portfolio Managers

The Fund is managed by Voya IM's Multi-Sector Fixed Income Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Sean Banai, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Bob Kase, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Randall Parrish, CFA, Head of Credit and Senior High Yield Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Dave Goodson, Head of Securitized Investments and Senior Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Brian Timberlake, CFA, PhD, Head of Fixed Income Research, has been a portfolio manager of the Fund since its inception.

##### Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc., and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

#### Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

#### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
