São Paulo, February 13, 2006- SADIA S.A. (BOVESPA: SDIA4; NYSE: SDA; LATIBEX: XSDI), the Brazilian leader in the processed food, poultry and pork industries, today announces the results for the fourth quarter of 2005 (4Q05). The Company's operating and financial information, approved by the Audit Committee on 31 January 2006, are shown in Brazilian Reals, unless stated otherwise, and are based on consolidated figures, as required by Brazilian corporate law. All comparisons made in this release are based on the same period in 2004 (4Q04), except where stated otherwise.

"Sadia's administration is pleased to present the Company's financial statement, which attests the continuous achievements obtained by all collaborators from the Company. A year of adverse environments, both in the domestic and international markets, Sadia surpassed many obstacles and finished the year of 2005 with a growth four times greater than that of the global economic activity. Throughout the year, we increased our productivity and registered operational records, with ratios similar to the highest in the global food Industry. This performance reflects the efforts placed in the dispute for new markets, in the optimization of our portfolio, in the cost management of raw materials and financial liabilities. The consolidation of the hedging policy against operational and financial exchange rate variations also generated positive results, that contributed towards the profit obtained in the year. The growth phase initiated last year gained a new impulse in 2005 and promises greater expansion in the upcoming years, with the implementation of three new facilities – for poultry and pork – in the State of Mato Grosso, done simultaneously to the continuous investments in the other plants, located in seven states in the country. Despite the low general activity for the country in 2005 and the fragility in demand, Sadia presented a 12% expansion in the total volume sold in the domestic market, specially due to the commercial team's effort, the exploration of new sales channels and an adjustment in the Company's product portfolio to better suit the Brazilian income, that seeks more competitive prices. In the export market, we exceeded the sales growth projections for the year, initially set between 10% and 12%: reaching a 16% expansion, despite sanitary problems in Brazil and the worldwide aggravation of the avian flu crisis, that imposed growing restrictions to the international commerce. We registered significant records throughout the year, with the historical R\$ 8.3 billion gross operational revenues, the R\$ 657.3 million net profit – almost 50% greater than last year's results – and the net profit margin of 9% for the year. This performance proves the Company's constant search for improvement, and will sustain the Company's future growth possibilities. For 2006, projections indicate stability in grain prices – our main raw material – and more optimistic perspectives towards the domestic economy. In the international environment, the Company continues searching for new markets, a scenario that will demand additional efforts from the commercial area. As the Company is aware of the challenges in incorporating the principles of sustainable development in its governance and daily routine in order to guarantee economic prosperity, social justice and environmental safety, Sadia has intensified the activities of the Strategic Committee of Sustainability, created in 2004, to systematize its processes and allow an approximation of all internal social initiatives in a responsive and integrated way. Still in 2005, the activities of the Sadia Sustainability Institute were intensified with the implementation of the 3S Program – Sadia Sustainable Swine Production Program in a pioneer way in the country, with the approval of Brazilian governmental entities and the United Nations. The 3S Program is being backed by BNDES loans and the future sales of carbon credits generated by the retention of the methane gas, after the installation of the biodigesters in the swine farms. The 3S Program contributes to the Kyoto Protocol objectives. In order to improve corporate governance levels and to align the interests of its shareholders, Sadia granted tag along rights to its preferred shares, answering the market expectations. Throughout the year, the increase in liquidity of Sadia's shares led to the Company becoming part of the Bovespa Index since September 2005. Facing all these advances, it is with great satisfaction that we deliver to our shareholders, together with more than 45 thousand of our employees, the economic and financial results of an even better Sadia." – Gilberto Tomazoni – Executive President – Sadia S.A.

**GROSS OPERATING REVENUE**

In 2005, Sadia exceeded the good performance of 2004 and registered new records in volumes and gross operational revenues. The R\$ 8.3 billion gross operating revenues increased 13.8% over 2004. Sales volumes reached 1.8 million tons, a 14.2% increase as compared to the same period last year.

This result reflects the Company's good performance, with a growth in revenues of 13.9% in the international market and 13.7% in the domestic market, despite the problems produced by the foot and mouth disease in Brazil, the concerns over avian flu in Europe and Asia and the sanitary inspectors strike in the 4Q05.

**GROSS OPERATING REVENUE - (R\$ THOUSAND) - MARKET BREAKDOWN**

## Edgar Filing: SADIA S.A. - Form 6-K

During 4Q05, commercial efforts allowed the Company to obtain R\$ 2.2 billion gross operational revenues, with a 11.2% expansion over 4Q04, and total volume of 475.5 thousand tons, surpassing in 6.8% the same period last year.

In the domestic market, sales volume reached 823.6 thousand tons, a 11.8% increase as compared to last year. Continuing the 2004 pattern, the processed products line led the domestic market sales, in line with the Company's strategy of focusing on more value added products. In 4Q05, the volume sold surpassed the average of the other quarters of the year, reaching 227.2 thousand tons, a 13.2% increase as compared to the 4Q04.

The business expansion in the external market resulted from, amongst other factors, the sales growth in the foreign market, the increase in international prices, the product portfolio revision and the realignment on more profitable clients and destinations. The portfolio adjustment was one of the main factors that allowed the Company to increase its profitability and to expand its client base, with the development of differentiated products. In the external market, sales surpassed the 1.0 million ton mark for the year, which represented a 16.2% increase over 2004 shipments. The poultry segment was the main driver for this performance, despite the aggravation of the avian flu crisis. Despite the 17.5% average appreciation of the real against the dollar in the last quarter, 248.3 thousand tons were shipped to the international market representing a 1.5% increase in volume as compared to same quarter last year.

<b>Total</b>	<b>7,316,546</b>	<b>8,327,999</b>	<b>13.8%</b>	<b>2,012,516</b>	<b>2,238,633</b>	<b>11.2%</b>

**DOMESTIC MARKET**

Gross operating revenue added up to R\$ 4.3 billion in 2005, which represented a 13.9% increase as compared to the same period last year. In the last quarter of the year, sales amounted to R\$ 1.2 billion, with the same increase of 13.9% as compared to the 4Q04.

The significant increase in revenues and volumes resulted, mainly, from a strategy based in the pulverization of the sales channels, the release of new products better suited for the consumer's purchasing power and in the improvement in managing the Company's brands. The strategy of reviewing the processed products portfolio compensated, in part, the fragility of the domestic demand.

The poultry segment registered a 34.3% increase in volumes sold, leading to a 23.3% increase in gross operating revenue. The acquisition of S6Frango, on January 2005 contributed to this growth and the increase in whole poultry sales. As whole poultry has lower prices per ton compared to poultry cuts, prices in this segment fell 8.4% for the year. In the 4Q05, sales volumes had an 11.4% increase while revenues grew 9.1% as compared to the same period last year. During this period the highlight was the Fiesta line in the poultry segment.

The highlight in sales, however, was achieved by the processed products segments, with a higher value added, and represented 77.4% of revenues in the domestic market. This result reflects the Company's efforts in adapting the product portfolio, aiming to supply the demand for differentiated products and to guarantee the leadership in several segments. This strategy allowed an increase of 11.3% in volumes and 11.6% in gross operating revenue. Despite the difficulty to pass on costs in the domestic market, the Company managed to keep its average prices at the same levels of those of last year.

In the 4Q05, the Company managed to achieve a 17.1% increase in volumes sold, by selling 171.4 thousand tons. This achievement results from the adoption of marketing and selling strategies. With the release of new more added value processed products, these strategies allowed the Company to finish the quarter with R\$ 902.9 million in revenues, a 14.6% increase when compared to the same period last year.

In the pork segment, the Company focused on sales to the international market, which led to a 30.5% retraction in domestic sales and a 4.2% decrease in gross operating revenue. This contraction in supply permitted a 38.0% increase in prices, which softened the decrease in revenues. This focus towards the international market was kept in the 4Q05, leading, thus, to a decrease of 28.0% in volumes and 11.2% in revenues.

**GROSS OPERATING REVENUE - DOMESTIC MARKET**

**AVERAGE PRICE - R\$/Kg - DOMESTIC MARKET**

**EXTERNAL MARKET**

The external market registered a strong demand for Sadia products in 2005, allowing a 13.7% increase in revenues, to R\$ 4.1 billion. The Company registered new records in sales volumes surpassing the 1.0 million ton mark for the year, which represented a 16.2% increase over 2004 shipments.

In the 4Q05, sales directed towards the external market generated a R\$ 1.0 billion gross operating revenue, a 8.2% increase as compared to the last quarter of 2004. Volumes sold had a 1.5% increase as compared to 4Q04.

The highlight in gross operating revenues was achieved by the poultry segment, which registered R\$ 2.9 billion, an amount 9.7% higher than that achieved the previous year. Sales volumes shipped to the international market amounted to 808.6 thousand, with a 15.0% increase as compared to 2004. The greater participation of whole poultry in the portfolio of products sold, due to an increase in sales to the Middle East and South America, resulted in a 4.7% decrease in average prices in this segment. In the 4Q05, the Company registered an increase of 4.4% in volumes sold and 13.1% in revenues, that added to R\$ 749.3 million. Prices for the quarter had a significant increase of 8.3% in local currency and a 27.3% increase in dollar terms as compared to the same quarter last year.

In the pork segment, sales to the external market registered a considerable increase, with the recovery of shipments to the Russian market (as in 2004 import quotas were established in this country), and the normalization of the pork production in Sadia. Annual sales of 105.8 thousand tons, represented a 33.9% increase as compared to 2004 and generated R\$ 592.4 million in revenues, an amount 37.8% greater than that obtained in local currency. The average prices registered almost a 3.0% increase in local currency, a 20.7% increase in dollar terms. In the last quarter of the year, revenues amounted to R\$ 113.8 million, a 3.8% reduction with sales of 22.3 thousand tons, volume 19.9% greater than the one achieved last year together with a 2.0% decrease in dollar term prices.

With sales of processed products in the external market, Sadia obtained R\$ 412,3 million, a 1.0% increase as compared to 2004. This amount is equivalent to shipments of 91.6 thousand tons, an amount 8.7% greater than the volumes sold last year. Despite the 9.4% increase in dollar term prices, the effort was not enough to compensate the 17.3% devaluation of the dollar against the Real for the year.

**GROSS OPERATING REVENUE - EXTERNAL MARKET**

**AVERAGE PRICE - R\$/Kg - EXTERNAL MARKET**

Sadia is a benchmark in the management of its animal stock. Nevertheless, the Company continues to improve its animal quality control systems, especially at this moment, when news of sanitary problems are gaining space and worrying several sectors of our economy. The Company is working on this issue with the utmost priority, at the highest level of its corporate governance structure and adopting several preventive measures.

As an indispensable factor to the reduction in the sanitary risk in its business, the Company awaits the implementation of the National Plan for the Prevention and Control of the Newcastle Decease and the Prevention of Avian Influenza.

The measure, which follows all OIE (World Organization for Animal Health) standards, will assure to international markets that Brazil maintains sanitary barriers between states, specific regulation on animal transportation, traceability, blood tests, capable laboratories and other controlling mechanisms that attest the production quality from the different states within the country. The measure allows that an eventual problem detected in a certain state – most of them as large as many European and Asian countries – will not affect producers from other states.

Sadia is in the direction of fully implementing the capacitation it needs to attend the rules of the National Plan for the Prevention and Control of the Newcastle Decease and the Prevention of Avian Influenza. Sadias's exports continue to be directed towards several markets, which confirm the trust in the quality of the Company's products, and also represents a risk mitigating factor for the Company.

**EXPORTS BY REGION - REVENUES**

**OPERATING RESULT**

Revenues obtained in the domestic market surpassed the value achieved in 2004, due to product portfolio improvement.

Exports registered a significant increase. Despite the growing restriction on the global poultry commerce, due to avian flu, the maintenance of import quotas by the Russian government, the federal inspectors strike, the foot and mouth disease outbreaks, and the appreciation of the real against the dollar, the Company expanded its operations in markets in which it is already present, creating products tailored made to meet consumer demands, which attest the Company's agility to seize new opportunities.

In the 4Q05, net operating revenue added to R\$ 2.0 billion, a 14.1% increase as compared to 4Q04. This performance results from larger sales volume and average price increases.

<b>GROSS MARGIN</b>	
<p>Cost of goods sold registered a 19.0% increase in 2005. Its relation to net operating revenues reached a 72.6% margin as compared to 70.7% in 2004. The necessity to acquire pork in the spot market, mainly in the first semester of the year, had a negative impact in the cost structure. Throughout the year, the end of this necessity, the efforts in cost management and the reduction in grain prices allowed a decrease in this margin to 70.4% for the 4Q05.</p> <p>Consequently, the Gross margin had a significant improvement throughout the year, registering gains of 4.8 percentage points when we compare the 29.6% margin obtained in the 4Q05 to the 24.8% margin from the 4Q04.</p>	

The ratio operating expenses (sales, administrative and other expenses) over net operating income registered a gain of 1.2 percentage points as it reached 18.6% in 2005, a smaller percentage as compared to the 19.8% achieved in 2004 reflecting, mainly, lower expenses incurred in the sales line. For the 4Q05 (period where this margin reaches its highest due to the holiday season), the margin reached 20.0%, an inferior level to the 20.7% registered in the 4Q04.

The sales expenses over net operating revenues registered a significant reduction: reaching 16.9% in 2005 against 18.2% in 2004. This performance reflects the aggressive plan to rationalize expenses, with the implementation of several measures, such as the renegotiation of contracts and greater logistics efficiency. When comparing the 4Q05 ratio (17.0%) to the 4Q04 (19.5%) there was even more an impressive gain of 2.5 percentage points.

**SALES EXPENSES OVER NET OPERATING REVENUES**

The administrative expenses over net operating revenues reached 0.7% in 2005, as compared to 0.9% in 2004, with an absolute reduction of R\$ 3.4 million.

Depreciation and amortization expenses added up to R\$ 194.7 million for the year, similar to last year's amount. Pursuing better accounting practices, in the second quarter of the year, Sadia reclassified its poultry and pork stock breeders from inventory to fixed assets.

Earnings before interest and taxes (LAJIR or EBIT), amounted to R\$ 640.8 million, a 6.5% increase as compared to 2004. Throughout the year, the efforts set in controlling expenses and the constant growth in revenues allowed the EBIT to reach R\$ 188.3 million in the 4Q05, a 169.3% increase as compared to the same period in 2004.

**EBIT - YEAR**

**EBIT - QUARTER**

**EBITDA**

EBITDA (earnings before interest, tax, depreciation and amortization) had a 6.3% increase, registering R\$ 895.5 million, against R\$ 842.6 million in 2004. The annual EBITDA margin over net operating revenues reached 12.2% against last year's 13.4%. As a consequence of Sadia's efforts in the pursue of a greater profitability, EBITDA margin reached 14.2% in the 4Q05.

EBITDA MARGIN	13.4%	12.2%	7.8%	14.2%

**FINANCIAL RESULTS**

Sadia's net financial results amounted to R\$ 236.0 million in 2005, against a R\$ 32.7 million net expense registered in 2004, when the Company decided to reduce its investments in Brazilian foreign debt securities, which led to a R\$ 110 million non recurrent financial expense. The financial results continue to be influenced by the Company's operational hedges, which are in conformity with the Company's Financial Policy.

Sadia continued its conservative financial strategy in 2005, preferring low volatility investments with maturities compatible to its financial obligations. The Company also maintained its funding through export finance, receivables and rural credit with favorable interest rates, which contributed to extend the average maturity of its debt and to decrease its interest obligations.

At the end of 2005, Sadia's net debt amounted to R\$ 471.9 million, a 31.9% increase as compared to the end of 2004. However, the hedge management and the better operational results allowed the net debt to stay below the forecasted amount. Net debt over equities ratio did not increase in the same pace, as it finished 2005 with 18.8% ratio against 17.8% on December 2004.

**NET DEBT TO EQUITY****NET DEBT TO EQUITY \*****EQUITY PICK UP**

The R\$ 152.4 million negative result in equity pick up for 2005 was due to the recognition of losses in the exchange rate variation in the participation of the Company's offshore subsidiaries.

However, for the 4Q05, the dollar appreciation accumulated in a R\$ 36.1 million positive result.

**NET INCOME**

Sadia's net income reached a record historical value of R\$ 657.3 million in 2005 surpassing in almost 50% the 2004 result. In the 4Q05, the net income amounted to R\$ 234.4 million, with a 11.9% margin, also the best ratio achieved by the Company, in its entire history. This performance is in line with the Company's strategy of revenue expansion, cost control and efficiency of results.

**NET INCOME - YEAR**

**NET INCOME - QUARTER**

**INVESTMENTS**

**CAPITAL EXPENDITURES - R\$ million**

An amount of R\$ 686.0 million was invested in 2005, of which R\$ 194.6 million (28.4%) were directed towards the processed products segment, R\$ 372.8 million (54.3%) towards poultry, R\$ 27.0 million (3.9%) to pork and the remaining R\$ 91.7 (13.4%) mainly to information technology. These investments were done in order to supply the growing demand in the domestic and external markets.

In September 2005, the Company announced a R\$ 1.5 billion investment plan in the state of Mato Grosso, to be distributed between 2006 and 2009. Sadia will be responsible for R\$800 million in investments while the remainder R\$ 700 million will be carried out by its out growers. The amount will be directed amongst other things towards the construction of two poultry slaughter houses and one pork slaughter house, generating 8 thousand direct jobs and 24 thousand indirect ones.

For 2006, the total expected investment is R\$ 850 million, of which R\$ 400 million will be directed towards the State of Mato Grosso units and the remaining towards new projects in Uberlândia (MG), Toledo and Ponta Grossa (PR), as well as expansions in units in the state of Santa Catarina. These investments will endorse better service to Sadia's customers, both domestic and international.

## **PERSPECTIVES**

Sadia has been promoting operational adjustments, increasing its capacity, improving its product portfolio and optimizing its logistics, which together with a perspective of price stability for grains and packaging this year, indicates that the Company is capable of achieving a 13% EBITDA margin for 2006 and to continuously grow its results in the upcoming years.

For the domestic market, Sadia anticipates a good sales performance, with a 13% estimated growth for 2006 as compared to 2005. This perspective takes into account a modest growth for GDP and inflation under control, which will lead the economy to grow in a constant and moderate pace. With the minimum wage increase, superior to inflation in nominal terms, this will allow the disposable income to grow. Moreover, there is also the effect of the creation of new job posts as a result of incentive measures taken towards civil construction, as well as being an election year. Therefore, a continuous income expansion is expected and thus, a similar effect on sales of value added products – at this moment the processed products already represent approximately 80% of Sadia's domestic sales.

For the external market, we have large commercial challenges, a consequence of adjustments in demand, pressure to maintain prices and the continuation of the unfavorable foreign exchange rate. It is our belief, however, that Sadia and Brazil are in a very solid position to face a more rigid environment than those of past years.

Sadia is a company that always works aiming to the future, difficulties and adversities faced at the moment have been dealt with a lot of work and creativity bringing solutions that have improved the Company's profitability and allowed its continuous growth.

With this belief, the Company is keeping its investment projects in new facilities and in the operational improvement of existing units, convinced that the Company and the country's competitive advantages will give even better results to our shareholders. These measures together with new investments, new products and new markets, will allow an increase in the Company's EBITDA margin of almost 1 percentage point per year, so that Sadia will reach a margin of 17% until 2010.

## **CAPITAL MARKETS**

Tag Along - With the aim of improving Corporate Governance practices and allow a better alignment of the interests of shareholders of common and preferred shares, it was approved in the Extraordinary General Assembly and in the Special Preferred Shareholders Meeting, held on December 15, 2005, the right, for the preferred shares to be included in a public offering resulting from the disposal, if any, of the Company's control (tag along rights), and thus entitle their holders to receive a price equal to eighty percent (80%) of the amount paid per common share which is an integral part of the control block.

## **SÃO PAULO STOCK EXCHANGE**

Due to the improved liquidity of its preferred shares, Sadia [SDIA4] became the only company in its segment to be part of the theoretical portfolio of the São Paulo Stock Exchange Index (IBOVESPA).

Despite the significant positive performance of 45.1% of Sadia's preferred shares, during the second semester of the year, while the Ibovespa had an increase of 33.6%, the Company's preferred shares showed a 10.4% increase in 2005, an inferior performance compared to the 27.7% increase of the Ibovespa for the year.

The average daily traded volume doubled as compared to 2004, from R\$ 6.1 million to R\$ 12.1 million. These volumes confirm Sadia as the leading traded stock in the food sector, with a 57.8% participation.

**Financial Volume – December 2005  
Food Sector in Bovespa**

**Preferred – Breakdown by Investor**

Sadia's preferred shares kept its balanced distribution amongst the several investor categories of Bovespa. The main highlight worth mentioning is the rise in foreign investor participation, which helped to increase the stock liquidity.

**Sadia PN vs. Ibovespa - Base 100 = 12/30/04**

**NEW YORK STOCK EXCHANGE**

In 2005 Sadia's level II ADRs [SDA] had a 33.1% positive performance, while the Dow Jones Index registered a negative performance of 0.6% for the year. The average daily traded volume tripled to US\$ 686.9 thousand (US\$ 268.6 thousand in 2004), and currently corresponds to 4.1% of all Sadia PN shares outstanding in December 2005.

**LATIBEX**

Sadia's PN shares are listed on the Latibex [XSDI], a market that trades stocks from Latin American companies on the Madrid Stock Exchange. In 2005, the average daily traded volume was € 29.0 thousand with a 47.6% positive performance.
