Notes to Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying financial statements have been prepared in accordance with the requirements for interim financial statements and, accordingly, they are condensed and omit certain disclosures, which would appear in audited annual financial statements. The financial statements as of March 31, 2006 and for the interim periods ended March 31, 2005 and 2006 are unaudited and, in the opinion of management, include all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation. The financial information as of December 31, 2005 has been derived from the audited financial statements as of that date. For further information, refer to the financial statements and the notes included in First Reliance Bancshares, Inc.'s 2005 audited financial statements in Form 10-KSB.

Note 2 - Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting, and / or disclosure of financial information by the Company.

In February 2006, the FASB issued SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* an amendment of FASB Statements No. 133 and 140. This Statement amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. This Statement resolves issues addressed in SFAS No. 133 Implementation Issue No. D1, *Application of Statement 133 to Beneficial Interests in Securitized Financial Assets*. SFAS No. 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company does not believe that the adoption of SFAS No. 155 will have a material impact on its financial position, results of operations and cash flows.

In March 2006, the FASB issued SFAS No. 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement No. 140. This Statement amends FASB No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, with respect to the accounting for separately recognized servicing assets and servicing liabilities. SFAS No. 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract; requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable; permits an entity to choose its subsequent measurement methods for each class of separately recognized servicing assets and servicing liabilities; at its initial adoption, permits a one-time reclassification of available-for-sale securities to trading securities by entities with recognized servicing rights, without calling into question the treatment of other available-for-sale securities under Statement 115, provided that the available-for-sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value; and requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities. An entity should adopt SFAS No. 156 as of the beginning of its first fiscal year that begins after September 15, 2006. The Company does not believe the adoption of SFAS No. 156 will have a material impact on its financial position, results of operations and cash flows.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations and cash flows.

Note 3 Equity Incentive Plan

During the first quarter of 2006, the Company adopted the 2006 Equity Incentive Plan. The 2006 Equity Incentive Plan provides for the granting of dividend equivalent rights, options, performance unity awards, phantom shares, stock appreciation rights, and stock awards of up to 350,000 shares of the Company's common stock to officers, employees, directors, consultants, and other service providers of the Company, or any Affiliate of the Company.

During the first quarter of 2006, the Company granted 45,774 stock appreciation rights. The stock appreciation right entitles the individual to receive the excess of the fair market value from the grant date to the exercise date in a settlement of Company stock. The Company has funded the liability through charges to earnings. The accrued liability for the stock appreciation rights at March 31, 2006 was \$5,536.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 3 Equity Incentive Plan *continued*

During the three months ended March 31, 2006, the Company granted 6,796 shares of restricted stock, pursuant to the 2006 Equity Incentive Plan. The shares cliff vest in three years and are fully vested on March 28, 2009. The weighted average fair value of restricted stock granted in three months ended March 31, 2006 was \$14.86. Compensation cost associated with the grant was \$8,294 for the three months ended March 31, 2006.

Note 4 - Stock-Based Compensation

On January 1, 2006, the Company adopted the fair value recognition provisions of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123(R), *Accounting for Stock-Based Compensation*, to account for compensation costs under its stock option and other equity incentive plans. The Company previously utilized the intrinsic value method under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees (as amended)* (APB 25). Under the intrinsic value method prescribed by APB 25, no compensation costs were recognized for the Company's stock options because the option exercise price in its plans equals the market price on the date of grant. Prior to January 1, 2006, the Company only disclosed the pro forma effects on net income and earnings per share as if the fair value recognition provisions of SFAS 123(R) had been utilized.

During the second quarter of 2005, the Company accelerated the vesting of all outstanding options and recognized the pro forma effects in that quarter. No options have been issued since June 2005. As discussed in Note 3, compensation expense related to stock appreciation rights amounted to \$5,536 for the first quarter of 2006. The following table illustrates the effect on net income and earnings per share as if the fair value based method had been applied to all outstanding and unvested awards in each period.

We caution readers of this report that such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of us to be materially different from those expressed or implied by such forward-looking statements. Although we believe that our expectations of future performance is based on reasonable assumptions within the bounds of our knowledge of our business and operations, there can be no assurance that actual results will not differ materially from our expectations.

Factors which could cause actual results to differ from expectations include, among other things:

- the challenges, costs and complications associated with the continued development of our branches;
- the potential that loan charge-offs may exceed the allowance for loan losses or that such allowance will be increased as a result of factors beyond the control of us;
- our dependence on senior management;
- competition from existing financial institutions operating in our market areas as well as the entry into such areas of new competitors with greater resources, broader branch networks and more comprehensive services;
- adverse conditions in the stock market, the public debt market, and other capital markets (including changes in interest rate conditions);
- changes in deposit rates, the net interest margin, and funding sources;
- inflation, interest rate, market, and monetary fluctuations;
- risks inherent in making loans including repayment risks and value of collateral;
- the strength of the United States economy in general and the strength of the local economies in which we conduct operations may be different than expected resulting in, among other things, a deterioration in credit quality or a reduced demand for credit, including the resultant effect on our loan portfolio and allowance for loan losses;
- fluctuations in consumer spending and saving habits;
- the demand for our products and services;
- technological changes;
- the challenges and uncertainties in the implementation of our expansion and development strategies;
- the ability to increase market share;
- the adequacy of expense projections and estimates of impairment loss;
- the impact of changes in accounting policies by the Securities and Exchange Commission;
- unanticipated regulatory or judicial proceedings;
- the potential negative effects of future legislation affecting financial institutions (including without limitation laws concerning taxes, banking, securities, and insurance);
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- the timely development and acceptance of products and services, including products and services offered through alternative delivery channels such as the Internet;
- the impact on our business, as well as on the risks set forth above, of various domestic or international military or terrorist activities or conflicts;
- other factors described in this report and in other reports we have filed with the Securities and Exchange Commission; and
- our success at managing the risks involved in the foregoing.

Critical Accounting Policies

We have adopted various accounting policies which govern the application of accounting principles generally accepted in the United States in the preparation of our financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements at December 31, 2005 as filed on our annual report on Form 10-KSB. Certain accounting policies involve significant judgments and assumptions by us which have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on the historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates which could have a major impact on our carrying values of assets and liabilities and our results of operations.

We believe the allowance for loan losses is a critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for description of our processes and methodology for determining our allowance for loan losses.

Regulatory Matters

We are not aware of any current recommendations by regulatory authorities which, if they were to be implemented, would have a material effect on liquidity, capital resources or operations.

Results of Operations

Net Interest Income

For the three months ended March 31, 2006, net interest income was \$4,008,669, which is an increase of \$968,161, or 31.84%, over the same period in 2005. Interest income from loans, including fees, increased \$2,091,986, or 48.59%, from the three months ended March 31, 2005 to the comparable period in 2006 and is primarily due to an increase in our loan portfolio. Interest expense for the three months ended March 31, 2006 was \$3,015,658 compared to \$1,592,462 for the same period in 2005. The increase is primarily attributable to an increase in savings and time deposit accounts. The net interest margin realized on earning assets was 4.28% for the three months ended March 31, 2006, as compared to 4.23% for the three months ended March 31, 2005. The interest rate spread was 4.69% for the three months ended March 31, 2006 as compared to 4.20% for the three months ended March 31, 2005. The margin and spread increases were due to the increase in rates on interest earning assets outpacing the increase in rates on interest paying liabilities.

Provision and Allowance for Loan Losses

The provision for loan losses is the charge to operating earnings that we feel is necessary to maintain the allowance for loan losses at an adequate level. For the three months ended March 31, 2006, the provision for loan losses was \$250,285. For the three months ended March 31, 2005, the provision for loan losses was \$172,552. Based on present information, we believe the allowance for loan losses was adequate at March 31, 2006 to meet presently known and inherent risks in the loan portfolio. The allowance for loan losses was 1.10% and 1.07% of total loans at March 31, 2006 and 2005, respectively. There are risks inherent in making all loans, including risks with respect to the period of time over which loans may be repaid, risks resulting from changes in economic and industry conditions, risks inherent in dealing with individual borrowers, and, in the case of a collateralized loan, risks resulting from uncertainties about the future value of the collateral. We maintain an allowance for loan losses based on, among other things, historical experience, an evaluation of economic conditions, and regular reviews of delinquencies and loan portfolio quality. The allowance is based upon a number of assumptions about future events, which management believes to be reasonable, but which may not prove to be accurate. Thus, there is a risk that charge-offs in future periods could exceed the allowance for loan losses or that substantial additional increases in the allowance for loan losses could be required. Additions to the allowance for loan losses would result in a decrease in net income and, possibly, in capital.

FIRST RELIANCE BANCSHARES, INC.

Noninterest Income

Noninterest income during the three months ended March 31, 2006 was \$938,455, an increase of \$380,222, or 68.11%, from the comparable period in 2005. The increase is primarily a result of an increase in residential mortgage origination fees from \$105,497 for the three months ended March 31, 2005 to \$358,450 for the three months ended March 31, 2006. This is an increase of \$252,953, or 239.77%. Other noninterest income increased 71.03% to \$117,980 for the three months ended March 31, 2006. This increase is attributable to the company purchasing additional bank owned life insurance policies.

Noninterest Expense

Total noninterest expense for the three months ended March 31, 2006 was \$3,885,285, an increase of \$1,017,604, or 35.49% over the three months ended March 31, 2005. The primary reason was the \$534,555 increase in salaries and employee benefits over the two periods as we continued to hire employees and expand into the Charleston, South Carolina market. In addition, occupancy expense increased \$130,591, or 82.45%, for the three months ending March 31, 2006 as compared to the three months ending March 31, 2005. This increase is also primarily a result of additional expenses associated with the growth of the Bank through its expansion into the Charleston and Lexington markets. Other operating expenses increased 43.92% to \$1,193,086 for the three months ended March 31, 2006. This increase is primarily a result of a successful marketing campaign.

Income Taxes

The income tax provision for the three months ended March 31, 2006 and for the three months ended March 31, 2005 was \$237,851 and \$172,909, respectively. The provision was based on an effective tax rate of 29.31% and 30.96% for the three months ended March 31, 2006 and for the three months ended March 31, 2005, respectively.

Net Income

The combination of the above factors resulted in net income, after income tax provisions, for the three months ended March 31, 2006 and for the three months ended March 31, 2005 of \$573,703 and \$385,599, respectively. Net income before taxes for the two periods was \$811,554 and \$558,508, respectively. The net income results for both periods are primarily due to significant increases in loan volume during each respective period.

Assets and Liabilities

During the first three months of 2006, total assets increased \$17,033,251 or 4.23%, when compared to December 31, 2005. The primary source of growth in assets was the increase in loans receivable. Gross loans increased by \$15,452,817 or 4.96%, during the first three months of 2006, from \$311,544,385 at December 31, 2005 to \$ 326,997,202 at March 31, 2006. Total deposits increased \$20,668,914 or 6.18%, over total deposits of \$334,436,898 at December 31, 2005 to \$355,105,812 at March 31, 2006. The largest increase in deposits was in other time deposit accounts, which increased \$14,546,884 or 19.97%, to \$87,392,005 at March 31, 2006. The primary reasons for increases in our net loans and deposits are provided below. Cash surrender value life insurance increased 130.39% to \$8,644,788 at March 31, 2006. This increase is attributable to the company adding bank owned life insurance policies on key personnel. FHLB advances decreased 21.28% to \$18,500,000 for the three months ended March 31, 2006. This decrease is attributable to the company's decision to reduce alternative borrowings and rely more on core deposits from branch expansions.

Investment Securities

Investment securities classified as available for sale totaled \$37,356,234 at March 31, 2006. This total represents an increase of \$234,755, or 0.63%, since December 31, 2005. We also purchased additional stock during the quarter that brought the balance of nonmarketable equity securities to \$1,956,350 at March 31, 2006.

FIRST RELIANCE BANCSHARES, INC.

Loans

Net loans increased \$15,278,177, or 4.96%, during the three months ended March 31, 2006. The primary reason for the significant growth is a result of our ability to compete favorably with other financial institutions in our market areas. Balances within the major loans receivable categories as of March 31, 2006 and December 31, 2005 are as follows:

	March 31, 2006	December 31, 2005
Mortgage loans on real estate

FIRST RELIANCE BANCSHARES, INC.**Deposits**

Total deposits increased \$20,668,914, or 6.18%, from December 31, 2005. Time deposits \$100,000 and over comprised the largest category of deposits, totaling \$114,849,844 at March 31, 2006. Expressed in percentages, noninterest-bearing deposits increased 10.47% and all other interest-bearing deposits increased 5.61%.

Balances within the major deposit categories as of March 31, 2006 and December 31, 2005 are as follows:

	March 31, 2006	December 31, 2005
Noninterest-bearing transaction accounts	\$ 43,331,022	\$ 39,222,574

Total deposits	\$ 355,105,812	\$ 334,436,898

Included in total deposits at March 31, 2006 and December 31, 2005 were brokered deposits of \$48,732,002 and \$51,148,185, respectively.

Advances from Federal Home Loan Bank

Advances from the Federal Home Loan Bank of Atlanta totaled \$18,500,000 as of March 31, 2006. The following schedule summarizes the maturities

Maturing on	Interest Rate	Principal
04/10/06	2.60%	1,000,000

Liquidity

The company has reduced its borrowing from FHLB by \$5,000,000 in 2006, to \$18,500,000 for the quarter ended March 31, 2006. This reduction is a result of successful branch expansion and core deposit growth in new markets. Liquidity needs are met through scheduled maturities of loans and investments on the asset side and through pricing policies on the liability side for interest-bearing deposit accounts and advances from the Federal Home Loan Bank. The level of liquidity is measured by the loan-to-deposits ratio, this was at 92.08% at March 31, 2006 and 93.15% at December 31, 2005.

Securities available-for-sale, which totaled \$37,356,234 at March 31, 2006, serve as a ready source of liquidity. We also have lines of credit available with correspondent banks to purchase federal funds for periods from one to fourteen days. At March 31, 2006, unused lines of credit totaled \$31,500,000. Based on qualifying collateral reports filed on a quarterly basis with the Federal Home Loan Bank, we also have a line of credit to borrow funds from the Federal Home Loan Bank up to \$63,309,850 as of March 31, 2006. As of March 31, 2006, we had borrowed \$18,500,000 on this line.

FIRST RELIANCE BANCSHARES, INC.

Capital Resources

Total shareholders' equity increased \$996,693 from December 31, 2005 to \$30,647,328 at March 31, 2006. The main reason for this increase was net income generated by the Company's operations, which totaled \$573,703 for the three months ended March 31, 2006. In addition, proceeds generated from the exercise of stock options totaled \$412,968 during the period.

We are subject to various regulatory capital requirements administered by the federal banking agencies. Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum ratios of Tier 1 and total capital as a percentage of assets and off-balance-sheet exposures, adjusted for risk weights ranging from 0% to 100%. Our Tier 1 capital consists of common stockholders' equity, excluding the unrealized gain or loss on securities available-for-sale, minus certain intangible assets. Our Tier 2 capital consists of the allowance for loan losses subject to certain limitations. Total capital for purposes of computing the capital ratios consists of the sum of Tier 1 and Tier 2 capital. The regulatory minimum requirements are 4% for Tier 1 and 8% for total risk-based capital.

We are also required to maintain capital at a minimum level based on adjusted quarterly average assets, which is known as the leverage ratio. Only the strongest banks are allowed to maintain capital at the minimum requirement of 3%. All others are subject to maintaining ratios 1% to 2% above the minimum.

The following summarizes the Company and Bank's risk-based capital at March 31, 2006:

	<u>Company</u>	<u>Bank</u>

FIRST RELIANCE BANCSHARES, INC.**Off-Balance Sheet Risk**

Through its operations, the Bank has made contractual commitments to extend credit in the ordinary course of its business activities. These commitments are legally binding agreements to lend money to the Bank's customers at predetermined interest rates for a specified period of time. At March 31, 2006 the Bank had issued commitments to extend credit of \$63,873,986 and standby letters of credit of \$1,692,599 through various types of commercial lending arrangements. Approximately \$54,080,000 of these commitments to extend credit had variable rates.

The following table sets forth the length of time until maturity for unused commitments to extend credit and standby letters of credit at March 31, 2006:

<i>(Dollars in thousands)</i>	Within One Month	After One Through Three Months	After Three Through Twelve Months	Within One Year	Greater Than One Year	Total
Unused commitments to extend credit	\$ 8,433	\$ 3,205	\$ 16,994	\$ 28,632	\$ 35,242	\$ 63,874
Standby letters of credit		313	1,078	1,391	302	1,693
Totals	\$ 8,433	\$ 3,518	\$ 18,072	\$ 30,023	\$ 35,544	\$ 65,567

The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on its credit evaluation of the borrower. Collateral varies but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate.

Item 3 - Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates. Our market risk arises principally from interest rate risk inherent in our lending, deposit, and borrowing activities. Management actively monitors and manages its interest rate risk exposure. In addition to other risks that we manage in the normal course of business, such as credit quality and liquidity, management considers interest rate risk to be a significant market risk that could potentially have a material effect on our financial condition and results of operations. Other types of market risks, such as foreign currency risk and commodity price risk, do not arise in the normal course of our business activities.

The primary objective of asset and liability management is to manage interest rate risk and achieve reasonable stability in net interest income throughout interest rate cycles. This is achieved by maintaining the proper balance of rate-sensitive earning assets and rate-sensitive interest-bearing liabilities. The relationship of rate-sensitive earning assets to rate-sensitive interest-bearing liabilities is the principal factor in projecting the effect that fluctuating interest rates will have on future net interest income. Rate-sensitive assets and liabilities are those that can be repriced to current market rates within a relatively short time period. Management monitors the rate sensitivity of earning assets and interest-bearing liabilities over the entire life of these instruments, but places particular emphasis on the next twelve months. At March 31, 2006, on a cumulative basis through 12 months, rate-sensitive assets exceeded rate-sensitive liabilities by approximately \$40 million. This asset-sensitive position is largely attributable to variable rate loans.

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, our principal executive officer and principal financial officer have evaluated the effectiveness of our disclosure controls and procedures (Disclosure Controls). Disclosure Controls, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act), are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this Annual Report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

FIRST RELIANCE BANCSHARES, INC.

Our management, including the CEO and CFO, does not expect that our Disclosure Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based upon their controls evaluation, our CEO and CFO have concluded that our Disclosure Controls are effective at a reasonable assurance level.

There have been no changes in our internal controls over financial reporting during our first fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
