Asset Quality

Below we present the asset quality of our portfolio distributed in the AA-C ratings, comparing with the Financial System and Private Banks:

| | Dec/07 | Sep/07 | Dec/06 |
|--|--------|--------|--------|
|--|--------|--------|--------|

Edgar Filing: BANK BRADESCO - Form 6-K

| | | | |
|------------------|-------|-------|-------|
| Bradesco | 93.3% | 92.8% | 92.1% |
| Financial System | N/D | 91.5% | 90.6% |
| Private Banks | N/D | 92.3% | 91.2% |

The balance of Allowance for Doubtful Accounts (PDD) added up to R\$7.826 billion on December 31, 2007, R\$6.698 billion of which are required provisions and R\$1.128 billion are exceeding provisions.

Coverage Ratios

In the table below we show the coverage and delinquency ratios of our portfolio:

| | Dec/07 | Sep/07 | Dec/06 |
|--|--------|--------|--------|
| ADA (PDD)/Loan Portfolio | 6.0% | 6.4% | 6.9% |
| Loans overdue more than 60 days/Loan Portfolio | 4.0% | 4.2% | 4.5% |
| ADA (PDD)/Loans overdue more than 60 days | 148.3% | 150.4% | 155.1% |
| Credits overdue more than 90 days/Loan Portfolio | 3.3% | 3.5% | 3.6% |
| ADA (PDD)/Loans overdue more than 90 days | 180.6% | 182.4% | 191.9% |

Allowance for Doubtful Accounts (PDD) Expenses

In the period we recorded PDD expenses of R\$5.498 billion, a R\$1.086 billion or 24.6% increase compared to **12M06**, in line with the Loan Portfolio growth, which increased by 36.5% in the period, highlighting the 35.0% growth in the individual segment.

In the comparison between **4Q07** and **3Q07**, PDD Expenses increased by R\$118 million.

Deposits, Debentures, Subordinated Debts

In the table below we show the growth of these fundings:

| | R\$ million | | | Variation % | |
|---------------------------------|----------------|----------------|----------------|--------------|--------------|
| | Dec/07 | Sep/07 | Dec/06 | Year | Quarter |
| Demand deposits ¹ | 29,420 | 22,825 | 21,078 | 39.6% | 28.9% |
| Savings deposits | 32,813 | 30,231 | 27,612 | 18.8% | 8.5% |
| Time deposits + Debentures | 67,860 | 63,231 | 59,105 | 14.8% | 7.3% |
| Subordinated Debts ² | 15,850 | 13,441 | 11,949 | 32.6% | 17.9% |
| Total | 145,943 | 129,728 | 119,744 | 21.9% | 12.5% |

¹ The increase of the demand deposits, particularly verified in the last week of Dec/07, was influenced by the CPMF tax extinguishment, which caused the maintenance of funds in checking accounts for subsequent investment.

² Out of this amount, \$11,750 million was recorded for the purposes of calculation of the Basel Ratio.

Contingent Liabilities

In the table below, we highlight the balance of these liabilities:

| | R\$ million | | | Variation % | |
|---------------------------------------|--------------|--------------|--------------|--------------|-------------|
| | Dec/07 | Sep/07 | Dec/06 | Year | Quarter |
| Labor Proceedings | 1,492 | 1,228 | 1,268 | 17.7% | 21.5% |
| Civil Proceedings | 1,414 | 1,062 | 872 | 62.2% | 33.1% |
| Fiscal and Social Security Provisions | 6,311 | 6,465 | 5,084 | 24.1% | (2.4%) |
| Total | 9,217 | 8,755 | 7,224 | 27.6% | 5.3% |

Capital

Bradesco's Book Value of the Stockholders' Equity in December 2007 totaled R\$30.357 billion, while the Reference Stockholders' Equity reached R\$41.448 billion. Thus, the Capital Adequacy Ratio (BIS) stood at 14.0% in consolidated figures. Considering that the minimum BIS ratio established in Brazil is 11%, this margin enables Bradesco to increase its Loan Portfolio by around R\$80 billion. The Central Bank of Brazil (Bacen), through the Article 9 of Circular 3,367, allows the option to exclude, for purposes of determination of the Capital Adequacy Ratio, of the sold position in foreign currency, including tax effects, carried out with the purpose of providing hedge for the investments abroad. If Bradesco opted for this prerogative, the BIS Ratio on December 31, 2007 would have been of 16.6% (out of which 12.1% in Tier I).

Unrealized Gains

Unrealized Gains, represented by the difference between market values of assets and liabilities and their respective book values, stood at R\$4.709 billion in December/07 against R\$3.214 billion in December/06, a growth of R\$1.495 billion (note 32b).

Asset Management

Bradesco's Total Assets under Management reached R\$177.486 billion, comprising Investment Funds, Managed Portfolios and Third-Party Funds.

(*) (Adjusted Net Interest Income)/(Total Assets - Permanent Assets - Purchase and Sale Commitments).

In the comparison between **12M07** and **12M06**, the improvement of the R\$2.462 billion Adjusted Net Interest Income was due to:

- a R\$1.965 billion increase in the result from interest income operations, with R\$4.147 billion of increase in the average business volume and R\$2.182 billion of reduction of spreads; and
- the R\$497 million increase in non-interest income, resulting basically from loan recoveries of R\$245 million and higher Securities (TVM) and Treasury gains.

In the comparison between **4Q07** and **3Q07**, the R\$417 million increase was due to:

- the growth in interest income operations in the amount of R\$265 million, with R\$476 million of increase in the average business volume and R\$211 million of reduction of spreads; and
- the growth of the non-interest income, in the amount of R\$152 million, basically resulting from the higher loan recovery of R\$91 million and higher Securities (TVM) and Treasury gains in the quarter.

Net Interest Income Interest:

We show in the chart below, the NII of interest income operations. We point out the nominal growth in the period and the maintenance of the nearly 8.6% margin.

Breakdown of the Net Interest Income - Interest:

Below we show the origin of the Net Interest Income, pointing out the importance of the relative share of loan operations, which represented 67% of the total in Dec/07, against 63% in Dec/06.

Loan Net Interest Income - Interest:

We present below a summary of the loan activity, considering that:

- In the first line, we show the gross interest income, net of the cost of opportunity.
- In the second line, we show the net margin, that is, the result of the gross interest income net of losses, related to these credits. A consistent nominal growth can be observed, presenting an accumulated evolution of 14.3% in 2007. This result shows the correct strategy that Bradesco has been adopting in loan granting.
- In the third line, we show the delinquency cost, represented by allowances for doubtful accounts deducted by discounts granted added by loan recoveries.

In the comparison between **12M07 and 12M06**, the increase of R\$1.908 billion was due to:

- the growth of R\$691 million (39.3% increase) in the item Income from Cards , related to the increase of 21.6% of the cards base, from 57,942 thousand to 70,469 thousand, influenced by the consolidation of Amex Brasil;
- the increase in the volume of Loan Operations, specially for individuals, mainly the products Personal Loans and Vehicles , which was the main factor for the evolution of the item Revenues from Loan Operations , with an improvement of R\$391 million;
- segmentation of clients (Private, Prime, Corporate, SMEs and Retail), jointly with the realignment of fees and with the increase of the client base which pushed the item Checking Accounts , with a growth of R\$273 million; and
- the increase of 20.7% in the volume of funds under management, from R\$147.1 billion, on December 31, 2006 to R\$177.5 billion on December 31, 2007, which was the main factor for the growth of the item Fund

Management , whose evolution was R\$194 million.

In the comparison between **4Q07 and 3Q07**, the increase of R\$154 million was due to:

- the growth of R\$65 million, related to income from credit cards, resulting from the higher business volume arising from the increase of the typical economic activity in the last quarter;
-

Personnel Expenses

We present below the breakdown and the variations of personnel expenses, in the respective periods:

R\$ million

| | 12M07 | 12M06 | Variation % | 4Q07 | 3Q07 | Variation % |

In the comparison between **12M07** and **12M06**, the R\$638 million variation was derived from:

- the increase in payroll derived by the 2006 collective bargaining agreements (3.5%) and the 2007 (6.0%);
- higher employee and management profit sharing (PLR) expenses in the amount of R\$188 million;
- the consolidations of Amex Brasil, Credifar and BMC R\$93 million; and
- higher expenses with provisions for labor proceedings in the amount of R\$17 million.

In the comparison between **4Q07** and **3Q07**, the R\$182 million variation of personnel expenses non-structural, was derived from:

- higher provisions for labor proceedings R\$47 million; and
- higher employee and management profit sharing (PLR) expenses in the amount of R\$131 million.

Other Administrative Expenses

We show below the breakdown and variations of other administrative expenses, in the respective periods:

| TOTAL | 6,912 | 5,870 | 17.8% | 1,973 | 1,755 | 12.4% |

In the comparison between **12M07** and **12M06**, the variation of R\$1,042 million was a result of:

- the increase in business volumes;
- investments in the improvement and optimization of the technological platform (TI Melhorias Project);

- readjustments of contracts; and
 - the consolidation of companies acquired (R\$215 million). Not considering the effect of acquisitions, the variation of administrative expenses would be 14% in the year.
-

In the comparison between **4Q07** and **3Q07**, the variation of R\$218 million was a result of the increase in the business volume in the 4th quarter, especially third-party services, communication and transportation, and the seasonal increase in advertising expenses (R\$96 million). Not considering this seasonal increase, the variation of administrative expenses in 4Q07 would be 6.9% .

In 2007 Grupo Bradesco de Seguros e Previdência had a growth in the net income of 9.1%, reaching the amount of R\$2.355 billion (2006 - R\$2.159 billion) with an annual return of 29% which, until November 2007, it represented 23.6% of the net income of the entire Brazilian insurance market.

Revenues with insurance premiums, private pension contribution and annual revenues from certificated savings plans reached R\$21.5 billion (13.7% growth), which represented 25% of the insurance market revenues (until Nov/07). These revenues maintain the leadership of the Insurance Group in the segment of property and casualty, as well as in open private pension plans.

In addition to the 12.9% increase in production, the following factors contributed significantly to this result:
 the reduction of 4 points in the claims ratio (which even in absolute values was lower than in 2006);
 the drop of the administrative expenses x revenue ratio;
 the maintenance of the sales ratio in the same levels of the previous year; and
 the maintenance of the financial results in the same levels of 2007, despite the drop of the Selic rate in 2007 compared to 2006 (Selic 2006 of 15.08%/Selic of 2007 11.19%) .

As to the total number of insured individuals, not considering last quarters figures related to Indiana Seguros S.A., whose disinvestment was approved by SUSEP on December 12, 2007, Grupo Bradesco de Seguros e Previdência totaled 19.8 million insured individuals, recording a growth of 40% compared to 2006 figures.

Technical reserves amounted to R\$58.526 billion (35.9% of the insurance market until November 2007 - source: Susep and ANS) and their financial assets totaled R\$67.718 billion. Total assets had a growth of 21.1% compared to December 2006.

It is worth pointing out that in relation to solvency, the insurance Group is in compliance with the rules of Susep, which became effective as of January 1, 2008, and it is adequate inclusively to the world standards - Solvency II. Grupo Bradesco de Seguros e Previdência has a leverage of 2.7 of its stockholders equity, a level comparable to European and American companies, where insurance premiums usually do not exceed 3 times the stockholders equity.

Technical provisions in the individual health portfolio include provision to support insured individuals older than 59 years from plans prior to the Law 9,656/09, to equate remission benefits, as well as to face the difference among values resulting from the investment to premiums of readjustments authorized annually by ANS and the values calculated having as basis the price readjustment of the sector, which burden the average value of indemnified events. These provisions reflect the work that the Management of the Insurance Group developed, during the last years, in the sense to try to maintain a conservative provisioning policy for coverage of risks inherent to the business. Thus, if the current market conditions are maintained, mainly concerning claims levels, and the capacity to readjust premiums according to the medical inflation, Bradesco believes that the provisioning level is adequate for covering risks identified, pursuant to the respective technical notes.

Bradesco Saúde continues with an outstanding position, operating focused on the corporate segment. In December 2007, out of the 2.9 million insured individuals, 90.6% of the total belonged to the corporate segment.

The last quarter of 2007 will be remembered for the persistence of problems in the global financial markets, while in the internal scenario there was a new shock in food prices and acceleration of the growth of the activity and of the credit, causing greater inflationary pressures.

(Comments from the Economic Research and Studies Department)

The turbulence in the international financial markets, especially in the mortgage loan market of the US, continued during the last quarter of 2007. The central banks of the regions most affected by the crisis (US, Euro Zone and United Kingdom) operated in a coordinated manner, providing liquidity to the financial system and, in the case of the North American central bank, promoting substantial reductions in the interest rate. There was an important increase of the aversion to the risk and unfavorable impact on spreads of credit assets, which also had an impact on the risk premium of emerging countries. The growth expectation of the GDP for the US and for the European economy has been reduced. However, emerging countries, which already represent 50% of the global GDP, still show high growth rates, making the global growth to decelerate just a little.

Despite the deterioration of the international environment, the liquidity conditions for Brazil did not change a lot and, most important, the price of important commodities for the commercial guideline of the country continued in a high level, reflecting the firm growth in the emerging economies (specially the Asian one).

The exchange rate, the main potential transmission mechanism of external turbulences, confirmed the strength of the external accounts and showed a relative stability, fluctuating between R\$1.75 and R\$1.80 and with few moments above this level. We expect not many changes in this scenario for 2008. International reserves closed the year at US\$180.3 billion compared to US\$85.8 billion at the end of 2006. Jointly with a high trade balance, despite the reduction trend (we expect US\$32 billion for 2008, against US\$40.4 billion in 2007), the current level of international reserves should result in a lower volatility of the exchange rate and the fluctuation trend should stand at around R\$1.75. This comfortable situation of external accounts should also be favorable for future decisions about the risk rating level by rating agencies.

A new shock on food prices, both on those whose prices are formed in the international market and on products that essentially depend on domestic factors, had an unfavorable impact on the inflation of the last quarter. Thus, inflation measured by the Broad Consumer Price Index (IPCA) closed 2007 at 4.46%, near the target of the Central Bank. During 2008, we should notice a decrease of pressures on food prices, but secondary effects of the inflation acceleration in the second half of 2007 should keep inflation near 4.5% at the end of this year. For this reason, the scenario shows the maintenance of the interest rate at 11.25% during 2008.

The upward activity also confirms this expectation for the interest rate and allows the anticipation of a strong performance for the GDP in 2008. We expected a 5.3% growth of the GDP in 2007 and expect an expansion near 4.5% in 2008. The consumption increase of families has been sustained by the substantial growth of the actual income volume and of the loan expansion, which increased from 30.8% of the GDP at the end of 2006 to 34.8% of the GDP in 2007. The favorable outlook for the job market implies in a healthy environment for the loan expansion, with maintenance of a satisfactory level for delinquency. The trust of consumers and businessmen continues in a high level. The investment has presented a substantial expansion (we estimate a 12.8% growth of the gross formation of fixed capital in 2007) and the intentions to increase the productive capacity estimate a new significant growth in 2008.
