Item 8.01 Other Events.

On March 19, 2010, Cytokinetics, Incorporated issued a press release announcing that the company has opened a Phase IIa "Evidence of Effect" (EoE) clinical trial of CK-2017357 for patients with amyotrophic lateral sclerosis (ALS), also known as Lou Gehrig's Disease. CK-2017357 is a fast skeletal muscle troponin activator and is the lead drug candidate that has emerged from the company's cardiac contractility program. CK-2017357 selectively activates the fast skeletal muscle troponin complex and increases its sensitivity to calcium, resulting in increased skeletal muscle force. In March 2010, CK-2017357 was granted an orphan-drug designation by the United States Food and Drug Administration (FDA) for the potential treatment of ALS.

A copy of the press release is filed as Exhibit 99.1 to this Current Report on Form 8-K, and is incorporated herein by reference.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following Exhibit is filed as part of this Current Report on Form 8-K:

Exhibit No. Description

99.1 Press Release, dated March 19, 2010.
