§ 5. Business Review and Prospects and Management's Discussion and Analysis

5.1 Business Review

The Chinese government implemented a more active fiscal policy and a tighter monetary policy in the first half of 2011, with an aim to enhancing and improving its management of the macro economy. The Chinese economy has continued its steady and robust growth, with GDP increasing by 9.6% in the first half of the year. Domestic demand for refined oil and chemical products grew steadily, but at a slower rate. According to the Company's statistics, domestic apparent consumption of oil products (including gasoline, diesel and kerosene) increased by 7.2% in the first half of the year, and consumption of ethylene equivalents increased by 1.9%.

Sinopec Corp. achieved outstanding results in the first half of 2011. We took full advantage of the integration of our upstream, midstream and downstream businesses, made great efforts to ensure sufficient supply in the domestic oil products market, actively expanded our petrochemical markets, strengthened our leverage on the synergies among production, sales and research, optimised our product mix, satisfied the needs of our customers and expanded our scale of operations.

5.1.1 Production and Operations

(1) Exploration and Production Segment

The price of international crude oil rose sharply in the first half of 2011. The average Platts Global Brent spot price was US\$111.16 per barrel, a year-over-year increase of 43.9%. The trend in domestic crude oil prices was basically the same as in the international market.

Movement of International Crude Oil Price

Sinopec Corp. has achieved excellent results in applying new technologies for exploration and production, particularly in solving the challenges of seismic study in complex piedmont tectonic belt, in increasing the drilling speed and efficiency in key regions. We have also made significant progress in conducting staged fracturing tests for horizontal wells in tight sandstone reservoirs. We have successfully undertaken staged fracturing of horizontal wells in our Zhenjing oil field and the Daniudi gas field in Ordos Basin, with a significant increase in production.

In oil exploration, we have made discoveries in three new territories - new strata, new types and new areas - in our matured fields in eastern China, the Tuofutai area of the Tahe oil field in western China, and the northern margin of the Junggar Basin. In gas exploration, we made new discoveries in deep marine facies and middle and shallow strata of the Yuanba area in northeastern Sichuan and in the shallow strata of the western Sichuan Basin. In oil-field development and production, we have made advances in improving the reserve development ratio, oil recovery rate and unit well productivity.

Domestically, Sinopec Corp. produced 150 million barrels of crude oil in the first half of 2011, a year-over-year increase of 0.7%, and 253.85 billion cubic feet of natural gas, an increase of 26.6%. Overseas production of crude oil dropped sharply due to the overhaul of offshore production machinery in the Angola oil field.

7.3 Changes in accounting policies

√ Applicable

o Not applicable

The IASB has issued a number of amendments to International IFRS and one new Interpretation that are first effective for the current accounting period of the Group. Of these, the following development is relevant to the Group's financial statements:

1AS 24 (revised 2009), Related party disclosures

Improvements to IFRS (2010)

1AS 24 (revised 2009) "Related party disclosures" simplifies the definition of "related party" and removes inconsistencies, which emphasises a symmetrical view of related party transactions. The revised standard also provides limited relief from disclosure of information by government-related entities in respect of transactions with the government to which the Group is related, or transactions with other entities related to the same government. The amendments to 1AS 24 have had no material impact on the Group's interim financial statements.

In the Improvements to IFRS (2010) omnibus standard, the IASB extended the scope of paragraph D8 of 1FRS 1, First time adoption of IFRS, for the use of the deemed cost exemption for an event-driven fair value. Under the amended standard, an entity is permitted to take as deemed cost the fair value of some or all of its assets and liabilities, when these fair values were determined under previous GAAP at one particular date because of a specific event which occurred during the period covered by its first financial statements prepared under 1FRS. Previously, IFRS 1 only permitted such valuations to be used as deemed cost if the event occurred before the date of the entity's transition to IFRS (being the start of the earliest comparative period included in the first set of 1FRS financial statements).

The Group's first financial statements prepared under IFRS were for the three year ended 31 December 1999 and for the six-month period ended 30 June 2000, with the start of the earliest comparative period being 1 January 1997. During that period and pursuant to applicable laws and regulations of the PRC, the Group's financial statements prepared under Accounting Standards for Business Enterprises and other relevant rules and regulations (collectively "PRC accounting standards") included leasehold land-use rights at deemed cost based on the valuation performed by independent valuers as at 30 September 1999. As these valuations were performed as of a date later than the date of transition to IFRS, the Group was not permitted to adopt these valuations as deemed cost for the purposes of its 1FRS financial statements and instead adopted the 1FRS policy that leasehold land use rights were measured at historical cost and therefore, the related revaluation gains arising from the revaluation in 1999 as mentioned above were not recognised. The Group has chosen to

adopt the amendments to IFRS I by making retrospective adjustments in order to eliminate the aforementioned differences between the Group's financial statements under IFRS and those under PRC GAAP. Specifically, the Group has retrospectively adjusted the amounts reported for previous periods in its IFRS financial statements to reflect the recognition of the leasehold land use rights at their deemed cost based on the valuation performed by the independent valuers as at 30 September 1999, with consequential adjustments for amortisation charged in subsequent periods.

7.4 The Group has no material accounting errors during the reporting period.

(6) Timing and method of interest payment

(i) Calculation of annual interest

Annual interest means the interest to be paid to the CB Holders on each anniversary of the date of issuance of the Convertible Bonds based on the aggregate nominal value of the Convertible Bonds, accrued from the date of issuance.

The formula for calculating annual interest: $I=B i$

I: means annual interest;

i: means annual interest rate of the Convertible Bonds.

(ii) Method of interest payment

A Interest of the Convertible Bonds will be accrued from the date of issuance and paid once a year.

B Interest payment date: Interest will be paid on each anniversary of the date of issuance of the Convertible Bonds. For the purpose of interest payment, a year means each period between two successive interest payment dates.

C Interest record date: An interest record date is the trading day immediately prior to the interest payment date each year and Sinopec Corp. will pay interest within five trading days following the interest payment date each year. Sinopec Corp. will not pay interest for such Convertible Bonds which have been applied to be converted into A Shares on or before the relevant interest record dates.

D CB Holders shall bear the taxes payable on interest income.

The vesting of interest and dividend for the year of conversion shall be determined by the Board in accordance with relevant laws and regulations and the provisions of the Shanghai Stock Exchange.

(7) Conversion period

The conversion period starts from the trading day immediately following the expiry of six months after the date of issuance of the Convertible Bonds until the maturity date.

(8) Determination and adjustment of conversion price

(i) The basis of determining the initial conversion price

The initial conversion price of the Convertible Bonds shall not be lower than (1) the average trading price of the A Shares of Sinopec Corp. within 20 trading days preceding the date of publication of the Offering Document (in the event that during such 20 trading days, the share price has been adjusted due to ex-rights or ex-dividend, the closing price of each of such trading days shall be determined after taking account into the ex-rights or ex-dividend), and (2) the average trading price of the A Shares of Sinopec Corp. on the trading day immediately preceding the date of the Offering Document. It will be proposed at the EGM for the Shareholders to authorise the Board (or any person authorised by the Board) to determine the actual initial conversion price with reference to the market conditions prior to the issuance of the Convertible Bonds and in consultation with the sponsor (the lead underwriter) for the issuance.

(ii) Adjustments to initial conversion price and applicable formula thereto

The conversion price is subject to adjustment, upon the occurrence of certain prescribed events which affect the share capital of Sinopec Corp., including but not limited to scrip dividend, capitalization issuance, issue of new shares, rights issue or cash dividend payment (excluding share issuance resulted from conversion(s) of the Convertible Bonds). The initial conversion price will be adjusted based on the following formulas (the numerical figures are rounded to two decimal place):

Scrip dividend or capitalization issue: $P1 = P0 / (1 + n)$;

Issuance of new Shares or rights issue: $P1 = (P0 + A k) / (1 + k)$;

The two above occurring concurrently: $P1 = (P0 + A k) / (1 + n + k)$;

Distribution of cash dividend: $P1=P0-D$;

The three above occurring concurrently: $P1= (P0-D - A k)/(1+n+k)$.

P0: means initial conversion price

n: means scrip dividend rate

k: means new share issue rate or rights issue rate

A: means price of new share issue or rights issue

D: means cash dividend per share

P1: means conversion price after adjustment

Where the abovementioned changes in shareholding and/or shareholder's interests occur, the conversion price will be adjusted accordingly. The adjustment to the conversion price, having been resolved by the Board, will be published in the form of an announcement on the media designated by the CSRC for information disclosure of listed companies. The announcement will indicate the date of adjustment to the conversion price, adjustment method and suspension period of share conversion (if required). An announcement will also be published (if required) on the website of the Hong Kong Stock Exchange if it is required by the Hong Kong Listing Rules and the Articles of Association. If the conversion price adjustment date is on or after the CB Holder's application for conversion, and before the share registration date, then such conversion will be based on the adjusted conversion price.

In the event that the rights and benefits of the CB Holders derived from share conversion rights are affected by the change in the Company's share class, quantity and/or shareholders' interest due to the possible share repurchase, consolidation, separation or any other action which may be taken by Sinopec Corp., Sinopec Corp. will adjust the conversion price based on the principles of fairness, justice, equality and protection of the CB Holders' rights. The conversion price will be adjusted based on relevant PRC laws and regulations and relevant provisions of the PRC securities regulatory authorities.

(9) Downward adjustment to conversion price

(i) Permitted adjustment magnitude

The conversion price may be subject to downward adjustments if, during the term of the Convertible Bonds, the closing prices of the A Shares in any 15

trading days out of any 30 consecutive trading days are lower than 80% of the prevailing conversion price. The Board may propose any such adjustments for the Shareholders to consider and seek their approval at a general meeting.

The above-mentioned proposal is subject to approval of two-thirds of the participating Shareholders with voting rights. Shareholders who are also CB Holders shall abstain from voting. The adjusted conversion price shall be not less than (a) the average trading price of the A Shares of Sinopec Corp. within 20 trading days preceding the general meeting of shareholders, (b) the average trading price of the A Shares of Sinopec Corp. on the day immediately before the general meeting of shareholders, (c) the net asset value per Share based on the latest audited financial statement, and (d) the nominal value per Share.

In the event that another adjustment of conversion price has been implemented in the aforementioned 30 trading days, the conversion price will be calculated based on the date prior to and after the adjustment, in accordance with the adjusted conversion price and closing price.

(ii) Procedures of adjustment to conversion price

If Sinopec Corp. decides to make a downward adjustment to the conversion price, Sinopec Corp. will publish an announcement in the print media and the website designated by the CSRC for information disclosure. The information disclosed will include the resolutions of general meeting of shareholders and the information disclosure will cover the magnitude of the adjustment, the adjustment date and the suspension period of share conversion. An announcement will also be published (if required) on the website of the Hong Kong Stock Exchange if it is required by the Hong Kong Listing Rules and the Articles of Association of Sinopec Corp..

(10) Conversion method of fractional share

The number of shares to be requested by the CB Holders for conversion shall be in whole number. The remaining balance of the fractional share will be paid by Sinopec Corp. to the CB Holders at par with accrued interest in cash within the five trading days after the date of conversion in accordance to the relevant regulations of Shanghai Stock Exchange and other regulatory authorities.

(11) Terms of redemption

(i) Terms of redemption at maturity

Within five trading days after the maturity of the Convertible Bonds, Sinopec Corp. will redeem all the Convertible Bonds which have not been converted into

A Shares of Sinopec Corp. at a certain ascent ratio of the nominal value (including the final term of interest). The Board (or any person authorised by the Board) shall determine the specific ascent ratio with reference to market conditions and in consultation with the sponsor (the lead underwriter) for the issuance subject to authorisation by the Shareholders.

(ii) Terms of conditional redemption

For any year in which interest is accrued, Sinopec Corp. may redeem the Convertible Bonds upon first time when the conditions for redemption are satisfied. If the redemption right is not exercised when first time the conditions for redemption are satisfied, such redemption right shall not be exercised in such year.

Formula for calculating current accrued interest: $IA = B \cdot i \cdot t / 365$

IA:	Accrued interest for the current period;
B:	Aggregate nominal value of the Convertible Bonds held by the CB Holders;
i:	Coupon interest rate of the Convertible Bonds; and
t:	Number of days of interest accrued, i.e. actual calendar days from the last interest payment date to the redemption date (excluding the redemption date).

In the event that any adjustment of share conversion price has been implemented in the aforementioned trading days, the conversion price will be calculated based on the date prior to and after the adjustment, in accordance with the adjusted conversion price and closing price.

In addition, when the outstanding balance of unconverted Convertible Bonds is below RMB30 million, the Board can decide whether to redeem all the outstanding Convertible Bonds based on the nominal value plus the accrued interest.

(12) Terms of sale back

During the term of the Convertible Bonds, if the use of the proceeds from the issuance of Convertible Bonds is substantially different from the application of proceeds disclosed in the Offering Document, and the change may be regarded as a change of use of proceeds according to relevant regulations of the CSRC or regarded by the CSRC as a change of use of proceeds, then the CB Holders are entitled to sell back all or part of the Convertible Bonds he holds to Sinopec Corp. at 103% of its nominal value (plus accrued interest).
