SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934
For the quarterly period ended September 30, 2013
OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934
Commission File Number 0-29480

HERITAGE FINANCIAL CORPORATION
(Exact name of registrant as specified in its charter)

Washington 91-1857900
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

201 Fifth Avenue SW, Olympia, WA 98501
(Address of principal executive offices) (Zip Code)
(360) 943-1500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer x
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the last practicable date:

As of October 28, 2013 there were 16,210,802 shares of the registrant's common stock, no par value per share, outstanding.

Forward Looking Statements

“Safe Harbor” statement under the Private Securities Litigation Reform Act of 1995: This Form 10-Q contains forward-looking statements that are subject to risks and uncertainties, including, but not limited to: our ability to successfully integrate any acquired assets, liabilities, customers, systems, and management personnel through the acquisition of Valley Community Bancshares, Inc., Northwest Commercial Bank, Cowlitz Bank and Pierce Commercial Bank, or may in the future acquire, into our operations, and our ability to realize related revenue synergies and cost savings within expected time frames or at all, and any goodwill charges related thereto and costs or difficulties relating to the integration matters, including but not limited to customer and employee retention, which might be greater than expected; the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs and changes in our allowance for loan losses and provision for loan losses that may be impacted by deterioration in the housing and commercial real estate markets, which may lead to increased losses and non-performing assets in our loan portfolio, and may result in our allowance for loan losses no longer being adequate to cover actual losses, and require us to increase our allowance for loan losses; changes in general economic conditions, either nationally or in our market areas; changes in the levels of general interest rates, and the relative differences between short and long term interest rates, deposit interest rates, our net interest margin and funding sources; risks related to acquiring assets in or entering markets in which we have not previously operated and may not be familiar; fluctuations in the demand for loans, the number of unsold homes and other properties and fluctuations in real estate values in our market areas; results of examinations of us by the the Board of Governors of the Federal Reserve System ("Federal Reserve Board") and of our bank subsidiary by the Federal Deposit Insurance Corporation (the "FDIC"), the Washington State Department of Financial Institutions, Division of Banks (the "Washington DFI") or other regulatory authorities, including the possibility that any such regulatory authority may, among other things, require us to increase our allowance for loan losses, write-down assets, change our regulatory capital position or affect our ability to borrow funds or maintain or increase deposits, or impose additional requirements and restrictions on us, any of which could adversely affect our liquidity and earnings; legislative or regulatory changes that adversely affect our business including changes in regulatory policies and principles, including the interpretation of regulatory capital or other rules, including as a result of Basel III; our ability to control operating costs and expenses; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act and implementing regulations; further increases in premiums for deposit insurance; the use of estimates in determining fair value of certain of our assets, which estimates may prove to be incorrect and result in significant declines in valuation; difficulties in reducing risk associated with the loans on our condensed consolidated statement of financial condition; staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our workforce and potential associated charges; failure or security breach of computer systems on which we depend; our ability to retain key members of our senior management team; costs and effects of litigation, including settlements and judgments; our ability to implement our expansion strategy of pursuing acquisitions and de novo branching; increased competitive pressures among financial service companies; changes in consumer spending, borrowing and savings habits; the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions; adverse changes in the securities markets; inability of key third-party providers to perform their obligations to us; changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the Financial Accounting Standards Board, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; other economic, competitive, governmental, regulatory, and technological factors affecting our operations, pricing, products and services; and other risks detailed from time to time in our filings with the Securities and Exchange Commission ("SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2012.

The Company cautions readers not to place undue reliance on any forward-looking statements. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to the Company. The Company does not undertake and specifically disclaims any obligation to revise any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. These risks could cause our actual results for the remainder of 2013 and beyond to differ

materially from those expressed in any forward-looking statements by, or on behalf of, us, and could negatively affect the Company's operating and stock price performance.

As used throughout this report, the terms "we", "our", "us", or the "Company" refer to Heritage Financial Corporation and its consolidated subsidiary, unless the context otherwise requires.

HERITAGE FINANCIAL CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
For the Three and Nine Months Ended September 30, 2013 and 2012
(Unaudited)

(1) Description of Business and Basis of Presentation

(a) Description of Business

Heritage Financial Corporation (the “Company”) is a bank holding company incorporated in the State of Washington in August 1997. The Company is primarily engaged in the business of planning, directing and coordinating the business activities of its wholly-owned subsidiary Heritage Bank (the “Bank”). The Bank is a Washington-chartered commercial bank and its deposits are insured by the FDIC under the Deposit Insurance Fund (“DIF”). The Bank is headquartered in Olympia, Washington and conducts business from its forty-two branch offices located throughout Washington state and the greater Portland, Oregon area. The Bank’s business consists primarily of lending and deposit relationships with small businesses and their owners in its market areas and attracting deposits from the general public. The Bank also makes real estate construction and land development loans and consumer loans and originates first mortgage loans on residential properties located in western and central Washington State and the greater Portland, Oregon area. The Company has expanded its footprint during the past three years through acquisitions beginning with the FDIC-assisted acquisition of Cowlitz Bank, a Washington chartered commercial bank headquartered in Longview, Washington effective on July 30, 2010. Heritage Bank entered into a definitive agreement with the FDIC, pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Cowlitz Bank (the “Cowlitz Acquisition”). The Cowlitz Acquisition included nine branches of Cowlitz Bank, including its division Bay Bank, which opened as branches of Heritage Bank on August 2, 2010. It also included the Trust Services Division of Cowlitz Bank.

Effective November 5, 2010, Heritage Bank entered into a definitive agreement with the FDIC, pursuant to which Heritage Bank acquired certain assets and assumed certain liabilities of Pierce Commercial Bank, a Washington chartered commercial bank headquartered in Tacoma, Washington (the “Pierce Commercial Acquisition”). The Pierce Commercial Acquisition included one branch, which opened as a branch of Heritage Bank as of November 8, 2010. On September 14, 2012, the Company and the Bank entered into a definitive agreement to acquire Northwest Commercial Bank (“NCB”), a Washington chartered commercial bank headquartered in Lakewood, Washington (the “NCB Acquisition”). The NCB Acquisition was completed on January 9, 2013, with the merger of NCB into Heritage Bank. See Note 2, “Business Combinations” for additional information.

On March 11, 2013, the Company entered into a definitive agreement to acquire Valley Community Bancshares, Inc. (“Valley” or “Valley Community Bancshares”) and its wholly-owned subsidiary, Valley Bank, both headquartered in Puyallup, Washington (the “Valley Acquisition”). The Valley Acquisition was completed on July 15, 2013. See Note 2, “Business Combinations” for additional information.

On April 8, 2013, the Company announced the proposed merger of its two wholly-owned bank subsidiaries Central Valley Bank and Heritage Bank, with Central Valley Bank merging into Heritage Bank. The common control merger was completed on June 19, 2013 and on a consolidated basis had no accounting impact on the Company. Central Valley Bank now operates as a division of Heritage Bank.

Table of Contents

(b) Basis of Presentation

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with Generally Accepted Accounting Principles (“GAAP”), for interim financial information, pursuant to the rules and regulations of the SEC. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. These Condensed Consolidated Financial Statements and accompanying Notes should be read with our December 31, 2012 audited Consolidated Financial Statements and the accompanying Notes included in our Annual Report on Form 10-K (“2012 Annual Form 10-K”). In our opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three and nine months ended September 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. In preparing the Condensed Consolidated Financial Statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Actual results could differ from those estimates. Estimates related to the allowance for loan losses, other than temporary impairments in the fair value of investment securities, expected cash flows of purchased loans and related indemnification asset, fair value measurements, stock-based compensation, impairment of goodwill and other intangible assets and income taxes are particularly subject to change.

Certain prior period amounts have been reclassified to conform to the current period’s presentation. Reclassifications had no effect on prior periods’ net income or stockholders’ equity.

(c) Significant Accounting Policies

The significant accounting policies used in preparation of our Condensed Consolidated Financial Statements are disclosed in our 2012 Annual Form 10-K. There have not been any material changes in our significant accounting policies from those contained in our 2012 Annual Form 10-K disclosure for the year ended December 31, 2012.

(d) Recently Issued Accounting Pronouncements

Financial Accounting Standards Board (“FASB”) Accounting Standards Updated (“ASU”) 2011-11, Disclosures about Offsetting Assets and Liabilities, was issued in December 2011 to require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The adoption of the Update did not have a material effect on the Company’s Condensed Consolidated Financial Statements at the date of adoption.

FASB ASU 2012-6, Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution, was issued in October 2012. The objective of the Update is to address the diversity in practice about how to interpret the terms “on the same basis” and “contractual limitations” when subsequently measuring an indemnification asset. This Update is effective for fiscal years and interim periods beginning on or after December 15, 2012. Early adoption was permitted, and adoption was to be applied prospectively to indemnification assets existing as of the date of adoption. The adoption of this Update did not have a material effect on the Company’s Condensed Consolidated Financial Statements at the date of adoption as the Company previously accounted for its indemnification asset in a manner consistent with the Update.

FASB ASU 2013-2, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, was issued in February 2013. The Update requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income (loss) by component and to present either on the face of the statement where net income is presented, or in the notes, significant amounts reclassified out of accumulated other comprehensive income (loss) by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. The amendments are effective for annual and interim reporting periods beginning on or after December 15, 2012. The adoption of this Update did not have a material effect on the Company’s Condensed Consolidated Financial Statements. The additional disclosures are included in Note 7, “Accumulated Other Comprehensive (Loss) Income.”

Table of Contents

(2) Business Combinations

During the nine months ended September 30, 2013, the Company completed the acquisitions of Northwest Commercial Bank and Valley Community Bancshares, referred to jointly as the "NCB and Valley Acquisitions." There were no acquisitions completed during the year ended December 31, 2012.

Northwest Commercial Bank

On September 14, 2012, the Company and Heritage Bank entered into a definitive agreement to acquire NCB headquartered in Lakewood, Washington. NCB was a full service commercial bank that operated two branch locations in Lakewood and Auburn, Washington. Prior to the closing of the transaction, NCB redeemed its outstanding preferred stock of approximately \$2.0 million issued to the U.S. Department of Treasury in connection with its participation in the Troubled Asset Relief Program Capital Purchase Plan. The NCB Acquisition was completed on January 9, 2013 with the merger of NCB with and into Heritage Bank. After the NCB Acquisition, the NCB Lakewood branch was consolidated into one of Heritage Bank's full service banking offices in Lakewood, Washington.

In connection with the NCB Acquisition, the Company paid cash consideration of \$3.0 million, or \$5.50 per NCB share, to NCB shareholders on January 9, 2013. In addition, pursuant to the merger agreement, the NCB shareholders had the ability to potentially receive an additional cash payment based on an earn-out structure from the sale of a NCB asset included in "other real estate owned." This contingent payment was factored into the NCB liabilities assumed by Heritage Bank as of the January 9, 2013 acquisition date. This asset was sold by Heritage Bank in June 2013, and the \$491,000 of proceeds from the sale were paid to the NCB shareholders in July 2013. The payment of these proceeds did not impact the recorded bargain purchase gain on bank acquisition.

During the three and nine months ended September 30, 2013, the Company incurred NCB Acquisition-related costs (including conversion costs) of approximately \$5,000 and \$746,000, respectively.

Valley Community Bancshares

On March 11, 2013, the Company entered into a definitive agreement to acquire Valley Community Bancshares and its wholly-owned subsidiary, Valley Bank, both headquartered in Puyallup, Washington. The Valley Acquisition was completed on July 15, 2013. Valley operated eight branches prior to acquisition, of which only four are anticipated to be maintained by the Company. Of the four other branches, three leases will be terminated during the fourth quarter of 2013 and one owned branch building was considered held for sale at the time of acquisition.

Pursuant to the terms of the merger agreement, the shareholders of Valley common stock received \$19.50 per share in cash and 1.3611 shares of Heritage common stock per Valley share. The merger consideration for Valley consisted of cash and stock, with \$22.0 million paid in cash by the Company and 1,533,267 shares of the Company's common stock being issued with fair value of \$24.2 million. The Company also recognized \$157,000 in capitalized acquisition costs related to the issuance of its securities.

The Valley Acquisition resulted in \$16.4 million of goodwill. This goodwill is not deductible for tax purposes.

During the three and nine months ended September 30, 2013, the Company incurred Valley Acquisition-related costs (including conversion costs) of approximately \$161,000 and \$515,000, respectively.

Business Combination Accounting

The NCB and Valley Acquisitions constitute business acquisitions as defined by FASB Accounting Standards Codification ("ASC") 805, Business Combinations. The Business Combinations topic establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired and the liabilities assumed. Accordingly, the estimated fair values of the acquired assets, including the identifiable intangible assets, and the assumed liabilities in the acquisition were measured and recorded as of the acquisition dates.

Table of Contents

The fair value of the assets acquired and liabilities assumed in the NCB and Valley Acquisitions were as follows:

	Valley July 15, 2013 (In thousands)	NCB January 9, 2013
Assets		
Cash and cash equivalents	\$40,643	\$2,712
Other interest earning deposits	13,866	1,003
Investment securities available for sale	31,444	2,753
Investment securities held to maturity	22,908	—
Purchased non-covered loans receivable	117,071	51,509
Other real estate owned	—	2,279
Premises and equipment	6,558	214
FHLB stock	366	88
Accrued interest receivable	465	232
Core deposit intangible	916	156
Prepaid expenses and other assets	3,172	1,175
Deferred income taxes, net	(85) 2,873
Total assets acquired	\$237,324	\$64,994
Liabilities		
Deposits	\$207,013	\$60,442
Accrued expenses and other liabilities	342	1,186
Total liabilities assumed	207,355	61,628
Net assets acquired	\$29,969	\$3,366

Summaries of the net assets purchased and the estimated fair value adjustments and resulting bargain purchase gain or goodwill recognized from the NCB and Valley Acquisitions were as follows:

	Valley July 15, 2013 (In thousands)	NCB January 9, 2013
Cost basis of net assets on acquisition date	\$29,720	\$6,113
Consideration transferred	(46,323) (2,967
Fair value adjustments:		
Other interest earning deposits	162	7
Investment securities	—	(2
Purchased non-covered loans, net	(3,003) (3,299
Other real estate owned	—	(1,301
Premises and equipment	1,837	(69
Core deposit intangible	916	156
Prepaid expenses and other assets	323	(479
Deferred income tax, net	(125) 2,873
Certificates of deposit	(9) (11
Accrued expenses and other liabilities	149	(622
(Goodwill) bargain purchase gain recognized from the acquisition	\$(16,353) \$399

Table of Contents

Goodwill on bank acquisition represents the excess of the consideration transferred over the estimated fair value of the net assets acquired and liabilities assumed. A bargain purchase gain on bank acquisition represents the excess of the estimated fair value of the net assets acquired and liabilities assumed over the value of the consideration paid. The bargain purchase gain in the NCB Acquisition was influenced significantly by the net deferred tax asset acquired. NCB had significant net operating losses and as a result of its estimate of whether or not it was more likely than not that the net deferred tax asset would be realized, had recorded a full valuation allowance on the net deferred tax asset. The Company, however, has reviewed the net deferred tax asset and determined it is more likely than not that the net deferred tax asset would be realized by the Company.

The operating results of the Company for the three and nine months ended September 30, 2013 include the operating results produced by the net assets acquired from the NCB Acquisition since the January 9, 2013 acquisition date and from the Valley Acquisition since the July 15, 2013 acquisition date. The Company has considered the requirement of FASB ASC 805 related to the contribution of the NCB and Valley Acquisitions to the Company's results of operations. The table below presents only the significant results for the acquired businesses from the acquisition dates.

	NCB		Valley	Total	
	Three Months Ended September 30, 2013	Nine Months Ended September 30, 2013 (3)	Three and Nine Months Ended September 30, 2013 (3)	Three Months Ended September 30, 2013 (3)	Nine Months Ended September 30, 2013 (3)
	(In thousands)				
Interest income: Interest and fees on loans (1)	\$608	\$1,768	\$1,290	\$1,898	\$3,058
Interest income: Interest and fees on loans (2)	250	1,712	399	649	2,111
Interest income: Securities and other interest earning assets	29	87	150	179	237
Interest expense: Deposits	(62)	(219)	(66)	(128)	(285)
Provision for loan losses on purchased loans	(808)	(1,058)	—	(808)	(1,058)
Noninterest income	14	486	267	281	753
Noninterest expense	(117)	(1,341)	(829)	(946)	(2,170)
Net effect, pre-tax	\$(86)	\$1,435	\$1,211	\$1,125	\$2,646

(1) Includes the contractual interest income on the purchased other loans.

(2) Includes the accretion of the accretable yield on the purchased impaired loans and the accretion of the discount on the purchased other loans.

(3) NCB was effective January 9, 2013 and Valley was effective July 15, 2013.

The Company also considered the pro forma requirements of FASB ASC 805 and deemed it not necessary to provide pro forma financial statements as required under the standard as the NCB and Valley Acquisitions were not material to the Company. The Company believes that the historical NCB and Valley operating results are not considered of enough significance to be meaningful to the Company's results of operations.

Table of Contents

(3) Loans Receivable

The Company originates loans in the ordinary course of business. These loans are identified as “originated” loans. Disclosures related to the Company’s recorded investment in originated loans receivable generally exclude accrued interest receivable and net deferred loan origination fees and costs because they are insignificant. The Company has also acquired loans through FDIC-assisted and open bank transactions. Loans acquired in a business acquisition are designated as “purchased” loans. The Company refers to the purchased loans subject to the FDIC shared-loss agreements as “covered” loans, and those loans without shared-loss agreements are referred to as “non-covered” loans. Loans purchased with evidence of credit deterioration since origination for which it is probable that not all contractually required payments will be collected are accounted for under FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. These loans are identified as “purchased impaired” loans. Loans purchased that are not accounted for under FASB ASC 310-30 are accounted for under FASB ASC 310-20, Receivables—Nonrefundable Fees and Other Costs. These loans are identified as “purchased other” loans.

(a) Loan Origination/Risk Management

The Company originates loans in one of the four segments of the total loan portfolio: commercial business, real estate construction and land development, one-to-four family residential and consumer. Within these segments are classes of loans to which management monitors and assesses credit risk in the loan portfolios. The Company has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. Management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies, and nonperforming and potential problem loans. The Company also conducts external loan reviews and validates the credit risk assessment on a periodic basis and presents the results of these reviews to management. The loan review process complements and reinforces the risk identification and assessment decisions made by loan officers and credit personnel, as well as the Company’s policies and procedures. A discussion of the risk characteristics of each loan portfolio segment is as follows:

Commercial Business:

There are three significant classes of loans in the commercial portfolio segment, including commercial and industrial loans, owner-occupied commercial real estate and non-owner occupied commercial real estate. The owner and non-owner occupied commercial real estate are both considered commercial real estate loans. As the commercial and industrial loans carry different risk characteristics than the commercial real estate loans, they are discussed separately below.

Commercial and industrial. Commercial and industrial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial and industrial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may include a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate. The Company originates commercial real estate loans within its primary market areas. These loans are subject to underwriting standards and processes similar to commercial and industrial loans, in addition to those of real estate loans. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate involves more risk than other classes of loans in that the lending typically involves higher loan principal amounts, and payments on loans secured by real estate properties are dependent on successful operation and management of the properties. Repayment of these loans may be more adversely affected by conditions in the real estate market or the economy.

One-to-Four Family Residential:

The majority of the Company’s one-to-four family residential loans are secured by single-family residences located in its primary market areas. The Company’s underwriting standards require that single-family portfolio loans generally are owner-occupied and do not exceed 80% of the lower of appraised value at origination or cost of the underlying

collateral. Terms of maturity typically range from 15 to 30 years. Historically, the Company sold most single-family loans in the secondary market and retained a smaller portion in its loan portfolio. The process for originating and selling single-family loans wound down in early 2013.

15

Table of Contents

Real Estate Construction and Land Development:

The Company originates construction loans for one-to-four family residential and for five or more family residential and commercial properties. The one-to-four family residential construction loans generally include construction of custom homes whereby the home buyer is the borrower. The Company also provides financing to builders for the construction of pre-sold homes and, in selected cases, to builders for the construction of speculative residential property. Substantially all construction loans are short-term in nature and priced with variable rates of interest. Construction lending can involve a higher level of risk than other types of lending because funds are advanced partially based upon the value of the project, which is uncertain prior to the project's completion. Because of the uncertainties inherent in estimating construction costs as well as the market value of a completed project and the effects of governmental regulation of real property, the Company's estimates with regards to the total funds required to complete a project and the related loan-to-value ratio may vary from actual results. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project and the ability of the borrower to sell or lease the property or refinance the indebtedness. If the Company's estimate of the value of a project at completion proves to be overstated, it may have inadequate security for repayment of the loan and may incur a loss if the borrower does not repay the loan. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from the Company until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, governmental regulation of real property, general economic conditions and the availability of long-term financing.

Consumer:

The Company originates consumer loans and lines of credit that are both secured and unsecured. The underwriting process for this segment of loans ensures a qualifying primary and secondary source of repayment. Underwriting standards for home equity loans are significantly influenced by statutory requirements, which include, but are not limited to, a maximum loan-to-value percentage of 80%, collection remedies, the number of such loans a borrower can have at one time and documentation requirements. To monitor and manage consumer loan risk, policies and procedures are developed and modified, as needed. The majority of consumer loans are for relatively small amounts disbursed among many individual borrowers which reduces the credit risk for this type of loan. To further reduce the risk, trend reports are reviewed by management on a regular basis.

Originated loans receivable at September 30, 2013 and December 31, 2012 consisted of the following portfolio segments and classes:

	September 30, 2013	December 31, 2012
	(In thousands)	
Commercial business:		
Commercial and industrial	\$292,906	\$277,240

Table of Contents

The recorded investment of purchased covered loans receivable at September 30, 2013 and December 31, 2012 consisted of the following portfolio segments and classes:

	September 30, 2013	December 31, 2012
	(In thousands)	
Commercial business:		
Commercial and industrial	\$ 18,005	\$ 25,781
Owner-occupied commercial real estate	25,724	34,796
Non-owner occupied commercial real estate	14,901	13,028
Total commercial business	58,630	73,605
One-to-four family residential	4,797	5,027
Real estate construction and land development:		
One-to-four family residential	1,895	4,433
Five or more family residential and commercial properties	—	—
Total real estate construction and land development	1,895	4,433
Consumer	4,134	5,265
Gross purchased covered loans receivable	69,456	88,330
Allowance for loan losses	(5,972) (4,352
Purchased covered loans receivable, net	\$ 63,484	\$ 83,978

The September 30, 2013 and December 31, 2012 gross recorded investment balance of purchased impaired covered loans accounted for under FASB ASC 310-30 was \$44.0 million and \$59.0 million, respectively. The gross recorded investment balance of purchased other covered loans was \$25.5 million and \$29.3 million at September 30, 2013 and December 31, 2012, respectively. At September 30, 2013 and December 31, 2012, the recorded investment balance of purchased covered loans which are no longer covered under the FDIC shared-loss agreements was \$3.3 million and \$3.5 million, respectively.

Funds advanced on the purchased covered loans subsequent to acquisition, referred to as “subsequent advances,” are included in the purchased covered loan balances as these subsequent advances are covered under the shared-loss agreements. These subsequent advances are not accounted for under FASB ASC 310-30. The total balance of subsequent advances on the purchased covered loans was \$7.5 million and \$6.9 million as of September 30, 2013 and December 31, 2012, respectively.

Table of Contents

The recorded investment of purchased non-covered loans receivable at September 30, 2013 and December 31, 2012 consisted of the following portfolio segments and classes:

	September 30, 2013	December 31, 2012
	(In thousands)	
Commercial business:		
Commercial and industrial	\$57,205	\$24,763
Owner-occupied commercial real estate	68,292	13,211
Non-owner occupied commercial real estate	51,427	11,019
Total commercial business	176,924	48,993
One-to-four family residential	11,798	3,040
Real estate construction and land development:		
One-to-four family residential	339	513
Five or more family residential and commercial properties	3,837	864
Total real estate construction and land development	4,176	1,377
Consumer	12,591	10,713
Gross purchased non-covered loans receivable	205,489	64,123
Allowance for loan losses	(5,426) (5,117
Purchased non-covered loans receivable, net	\$200,063	\$59,006

The September 30, 2013 and December 31, 2012 gross recorded investment balance of purchased impaired non-covered loans accounted for under FASB ASC 310-30 was \$39.5 million and \$42.0 million, respectively. The recorded investment balance of purchased other non-covered loans was \$166.0 million and \$22.1 million at September 30, 2013 and December 31, 2012, respectively.

The loans purchased in the NCB and Valley Acquisitions on January 9, 2013 and July 15, 2013, respectively, are included in the purchased non-covered loans receivable balances shown above as of September 30, 2013. The estimated fair value of the purchased non-covered loans at the acquisition dates totaled \$51.5 million and \$117.1 million for NCB and Valley, respectively. The gross recorded investment balance of the NCB purchased impaired loans and the NCB purchased other loans was \$4.5 million and \$37.8 million at September 30, 2013, respectively. The gross recorded investment balance of the Valley purchased impaired loans and the Valley purchased other loans was \$3.0 million and \$110.6 million at September 30, 2013, respectively.

(b) Concentrations of Credit

Most of the Company's lending activity occurs within Washington State, and to a lesser extent Oregon State. The Company's primary market areas include Thurston, Pierce, King, Mason, Cowlitz and Clark counties in Washington and Multnomah County in Oregon, as well as other contiguous markets. The majority of the Company's loan portfolio consists of (in order of balances at September 30, 2013) non-owner occupied commercial real estate, commercial and industrial and owner occupied commercial real estate. As of September 30, 2013 and December 31, 2012, there were no concentrations of loans related to any single industry in excess of 10% of the Company's total loans.

(c) Credit Quality Indicators

As part of the on-going monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators including trends related to (i) the risk grade of the loans, (ii) the level of classified loans, (iii) net charge-offs, (iv) nonperforming loans, and (v) the general economic conditions of the United States of America, and specifically the states of Washington and Oregon. The Company utilizes a risk grading matrix to assign a risk grade to each of its loans. Loans are graded on a scale of 0 to 9, and a "W". A description of the general characteristics of the risk grades is as follows:

Grades 0 to 5: These grades are considered "pass grade" and includes loans with negligible to above average but acceptable risk. These borrowers generally have strong to acceptable capital levels and consistent earnings and debt

service capacity. Loans with the

18

Table of Contents

higher grades within the “pass” category may include borrowers who are experiencing unusual operating difficulties, but have acceptable payment performance to date. Increased monitoring of financials and/or collateral may be appropriate. Loans with this grade show no immediate loss exposure.

Grade “W”: This grade is considered “pass grade” and includes loans on management’s “watch list” and is intended to be utilized on a temporary basis for pass grade borrowers where a potentially significant risk-modifying action is anticipated in the near term.

Grade 6: This grade includes “Other Assets Especially Mentioned” (“OAEM”) loans in accordance with regulatory guidelines, and is intended to highlight loans with elevated risks. Loans with this grade show signs of deteriorating profits and capital, and the borrower might not be strong enough to sustain a major setback. The borrower is typically higher than normally leveraged, and outside support might be modest and likely illiquid. The loan is at risk of further decline unless active measures are taken to correct the situation.

Grade 7: This grade includes “Substandard” loans in accordance with regulatory guidelines, for which the Company has determined have a high credit risk. These loans also have well-defined weaknesses which make payment default or principal exposure likely, but not yet certain. The borrower may have shown serious negative trends in financial ratios and performance. Such loans may be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. Loans with this grade can be placed on accrual or nonaccrual status based on the Company’s accrual policy.

Grade 8: This grade includes “Doubtful” loans in accordance with regulatory guidelines, and the Company has determined these loans to have excessive credit risk. Such loans are placed on nonaccrual status and may be dependent upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. Additionally, these loans generally have a specific valuation allowance.

Grade 9: This grade includes “Loss” loans in accordance with regulatory guidelines, and the Company has determined these loans have the highest risk of loss. Such loans are charged-off or charged-down when payment is acknowledged to be uncertain or when the timing or value of payments cannot be determined. “Loss” is not intended to imply that the loan or some portion of it will never be paid, nor does it in any way imply that there has been a forgiveness of debt.

Loan grades for all commercial business loans and real estate construction and land development loans are established at the origination of the loan. One-to-four family residential loans and consumer loans (“non-commercial loans”) are not graded with a 0 to 9 at origination date as these loans are determined to be “pass graded” loans. These non-commercial loans may subsequently require a 0-9 risk grade if the credit department has evaluated the credit and determined it necessary to classify the loan. Loan grades are reviewed on a quarterly basis, or more frequently if necessary, by the credit department. Typically, an individual loan grade will not be changed from the prior period unless there is a specific indication of credit deterioration or improvement. Credit deterioration is evidenced by delinquency, direct communications with the borrower, or other borrower information that becomes known to management. Credit improvements are evidenced by known facts regarding the borrower or the collateral property.

The loan grades relate to the likelihood of losses in that the higher the grade, the greater the loss potential. Loans with a pass grade may have some inherent losses in the portfolios, but to a lesser extent than the other loan grades. These pass graded loans may also have a zero percent loss based on historical experience and current market trends. The OAEM loan grade is transitory in that the Company is waiting on additional information to determine the likelihood and extent of the potential loss. The likelihood of loss for OAEM graded loans, however, is greater than Watch graded loans because there has been measurable credit deterioration. Loans with a Substandard grade are generally loans for which the Company has individually analyzed for potential impairment. For Doubtful and Loss graded loans, the Company is almost certain of the losses, and the unpaid principal balances are generally charged-off to the realizable value.

Table of Contents

The following tables present the balance of the originated loans receivable by credit quality indicator as of September 30, 2013 and December 31, 2012.

	September 30, 2013				Total
	Pass	OAEM	Substandard	Doubtful

Consumer	28,748	—	156	10	28,914
Gross originated loans	\$823,451	\$13,413	\$38,756	\$961	\$876,581

The tables above include \$29.3 million and \$27.5 million of originated impaired loans as of September 30, 2013 and December 31, 2012, respectively, as detailed in the impaired loans section below. These impaired loans have been individually reviewed for probable incurred losses and have a specific valuation allowance, as necessary. The tables above also include potential problem loans. Potential problem loans are those loans that are currently accruing interest

and are not considered impaired, but which management is monitoring because the financial information of the borrower causes concern as to their ability to meet their loan repayment terms. Potential problem originated loans as of September 30, 2013 and December 31, 2012 were \$26.6 million and \$28.3 million, respectively.

Table of Contents

The balance of potential problem originated loans guaranteed by a governmental agency, which reduces the Company's credit exposure, was \$1.7 million and \$3.2 million as of September 30, 2013 and December 31, 2012, respectively.

The following tables present the recorded invested balance of the purchased covered and purchased noncovered loans receivable by credit quality indicator as of September 30, 2013 and December 31, 2012.

Total commercial business	1,991	576
One-to-four family residential	—	61
Consumer	10	163
Gross purchased other nonaccrual loans	\$2,001	\$800

(1) \$7,000 and \$39,000 of purchased other nonaccrual loans were covered by the FDIC shared-loss agreements at September 30, 2013 and December 31, 2012, respectively.

(e) Past due loans

The Company performs an aging analysis of past due loans using the categories of 30-89 days past due and 90 or more days past due. This policy is consistent with regulatory reporting requirements.

Table of Contents

The balances of originated past due loans, segregated by segments and classes of loans, as of September 30, 2013 and December 31, 2012 were as follows:

Consumer	10	231	55	338
Gross impaired purchased other loans	\$5,007	\$1,603	\$3,574	\$1,138

For the three and nine months ended September 30, 2013 and 2012 no interest income was recognized subsequent to a loan's classification as impaired.

(g) Troubled Debt Restructured Loans

A troubled debt restructured loan ("TDR") is a restructuring in which the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. TDRs are considered impaired and are separately measured for impairment under FASB ASC 310-10-35, whether on accrual or nonaccrual status.

Table of Contents

The recorded investment balance and related allowance for loan losses of accruing and non-accruing TDRs as of September 30, 2013 and December 31, 2012 were as follows:

	September 30, 2013		December 31, 2012	
	Accruing TDRs	Non-Accruing TDRs	Accruing TDRs	Non-Accruing TDRs
	(In thousands)			
Originated TDRs	\$ 19,590	\$ 3,983	\$ 15,039	\$ 9,311
Allowance for loan losses on originated TDRs	3,513	141	2,131	1,994
Purchased other TDRs	5,693	10	1,437	7
Allowance for loan losses on purchased other TDRs	958	3	76	2

The unfunded commitment to borrowers related to originated TDRs was \$4.5 million and \$1.5 million as of September 30, 2013 and December 31, 2012, respectively. There were \$243,000 and \$0 unfunded commitments to borrowers related to the purchased other TDRs as of September 30, 2013 and December 31, 2012, respectively. The increase in unfunded commitments related to TDRs was primarily due to the addition of one borrower relationship during the second quarter of 2013 with advancing availability on his construction loans.

Originated loans that were modified as TDRs during the three and nine months ended September 30, 2013 and 2012 are set forth in the following tables:

	Three Months Ended September 30, 2013		2012

Total originated TDRs	52	\$11,506	27	\$5,951

Number of contracts and outstanding principal balance represent loans which have balances as of period end dates (1) as certain loans may have been paid-down or charged-off during the three and nine months ended September 30, 2013 and 2012.

Includes subsequent payments after modifications and reflects the balance as of the end of the period. The Bank's (2) recorded investment in each loan at the date of modification did not change as a result of the modification as the Bank did not forgive any principal or interest balance as part of the modification.

Of the 52 loans modified during the nine months ended September 30, 2013, twelve loans with a total outstanding principal balance of \$4.8 million were previously reported as TDRs as of December 31, 2012. Of the 27 loans modified during the nine months ended September 30, 2012, nine loans with a total outstanding principal balance of \$2.4 million were previously reported as TDRs as of December 31, 2011. The Bank typically grants shorter extension periods to continually monitor the troubled credits despite the fact that the extended date might not be the date the Bank expects the cash flow. The Company does not consider these modifications a subsequent default of a TDR as new loan terms, specifically maturity dates, were granted. The potential losses related to these loans would have been considered in the period the loan was first reported as a TDR and adjusted, as necessary, in the current periods based on more recent information. The specific valuation allowance for TDRs that were modified during the nine months ended September 30, 2013 was \$1.5 million at September 30, 2013. The specific valuation allowance for those TDRs that were previously reported as TDRs as of December 31, 2012 was \$501,000 and the general allowance for loan losses for TDRs that were modified during the nine months ended September 30, 2013 that were not previously reported as TDRs was \$240,000 as of December 31, 2012.

Purchased other loans that were modified as TDRs during the three and nine months ended September 30, 2013 and 2012 are set forth in the following tables:

Consumer	1	3	—	—
Total purchased other TDRs	7	\$4,331	3	\$ 1,025

Number of contracts and outstanding principal balance represent loans which have balances as of period end dates (1) as certain loans may have been paid-down or charged-off during the three and nine months ended September 30, 2013 and 2012.

Includes subsequent payments after modifications and reflects the balance as of the end of the period. The Bank's (2) initial recorded investment in the loans did not change as a result of the modifications as the Bank did not forgive any principal or interest balance as part of the modifications.

The majority of the Bank's TDRs are a result of granting extensions to troubled credits which have already been adversely classified. We grant such extensions to reassess the borrower's financial status and to develop a plan for repayment. Certain modifications with extensions also include interest rate reductions, which is the second most prevalent concession. Certain TDRs were additionally re-amortized over a longer period of time. These modifications would all be considered a concession for a borrower that could not obtain similar financing terms from another source other than from the Bank.

The financial effects of each modification will vary based on the specific restructure. For the majority of the Bank's TDRs, the loans were interest-only with a balloon payment at maturity. If the interest rate is not adjusted and the modified terms are consistent with other similar credits being offered, the Bank may not experience any loss associated with the restructure. If, however, the restructure involves forbearance agreements or interest rate modifications, the Bank may not collect all the principal and interest based on the original contractual terms. The Bank estimates the necessary allowance for loan losses on TDRs using the same guidance as used for other impaired loans.

There were two originated commercial and industrial TDRs with a principal balance totaling \$702,000 that had been modified during the previous twelve months ended that subsequently defaulted during the three and nine months ended September 30, 2013. Both of these loans defaulted because they were past their modified maturity date. The Bank recorded a \$52,000 specific reserve for these defaulted TDRs as of September 30, 2013.

There were no originated TDRs that had been modified during the previous twelve months ended that subsequently defaulted during the three and nine months ended September 30, 2012.

There were no purchased other TDRs that had been modified during the previous twelve months ended that subsequently defaulted during the three and nine months ended September 30, 2013 and 2012.

(h) Purchased Impaired Loans

As indicated above, the Company purchased impaired loans from the Cowlitz, Pierce, NCB and Valley Acquisitions which are accounted for under FASB ASC 310-30.

Table of Contents

The following tables reflect the outstanding balance at September 30, 2013 and December 31, 2012 of the purchased impaired loans by acquisition:

	Cowlitz Bank	
	September 30, 2013	December 31, 2012
	(In thousands)	
Commercial business:		
Commercial and industrial	\$ 14,267	\$ 21,624
Owner-occupied commercial real estate	12,668	17,157
Non-owner occupied commercial real estate	11,693	12,908
Total commercial business	38,628	51,689
One-to-four family residential	3,997	4,262
Real estate construction and land development:		
One-to-four family residential	1,664	6,122
Five or more family residential and commercial properties	—	—
Total real estate construction and land development	1,664	6,122
Consumer	2,332	3,533
Gross purchased impaired covered loans	\$ 46,621	\$ 65,606

The total balance of subsequent advances on the purchased impaired covered loans was \$5.1 million and \$3.8 million as of September 30, 2013 and December 31, 2012, respectively. The Bank has the option to modify certain purchased covered loans which may terminate the FDIC shared-loss coverage on those modified loans. At both September 30, 2013 and December 31, 2012, the recorded investment balance of purchased impaired covered loans which are no longer covered under the FDIC shared-loss agreements was \$1.7 million. The Bank continues to report these loans in the covered portfolio as they are in a pool and they continue to be accounted for under FASB ASC 310-30. The FDIC indemnification asset has been properly adjusted to reflect the change in the loan status.

(1) The NCB Acquisition was completed on January 9, 2013 and the Valley Acquisition was completed on July 15, 2013.

On the acquisition dates, the amount by which the undiscounted expected cash flows of the purchased impaired loans exceeded the estimate fair value of the loan is the “accretable yield”. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the purchased impaired loan.

The following tables summarize the accretable yield on the purchased impaired loans resulting from the Cowlitz, Pierce, NCB and Valley Acquisitions for the three and nine months ended September 30, 2013 and 2012. As the NCB and Valley Acquisitions were completed in 2013, there are no balances for the three or nine months ended September 30, 2012.

	Three Months Ended September 30, 2013				
	Cowlitz Bank	Pierce Commercial Bank	NCB (1)	Valley (1)	Total
	(In thousands)				
Balance at the beginning of period	\$13,269	\$7,724	\$639	\$—	\$21,632
Accretion	(931)	(944)	(110)	(13)	(1,998)
Disposal and other	(3,270)	(203)	47)	(58)	(3,484)
Change in accretable yield	1,873	880	289	271	3,313
Balance at the end of period	\$10,941	\$7,457	\$865	\$200	\$19,463

	Nine Months Ended September 30, 2013				
	Cowlitz Bank	Pierce Commercial Bank	NCB (1)	Valley (1)	Total
	(In thousands)				
Balance at the beginning of period	\$14,286	\$7,352	\$—	\$—	\$21,638
Accretion	(3,394)	(3,277)	(200)	(13)	(6,884)
Disposal and other	(2,768)	1,859)	31)	(58)	(936)
Change in accretable yield	2,817	1,523	1,034	271	5,645
Balance at the end of period	\$10,941	\$7,457	\$865	\$200	\$19,463

Table of Contents

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2012	
	Cowlitz Bank	Pierce Commercial Bank	Cowlitz Bank	Pierce Commercial Bank
	(In thousands)			
Balance at the beginning of period	\$16,564	\$11,815	\$19,912	\$14,638
Accretion	(1,514) (1,578) (5,173) (4,734
Disposals and other	(535) (1,175) (921) (1,919
Change in accretable yield	882	873	1,579	1,950
Balance at the end of period	\$15,397	\$9,935	\$15,397	\$9,935

For the NCB Acquisition, the contractual cash flows were \$8.5 million and the expected cash flows were \$5.6 million, resulting in a non-accretable difference of \$2.9 million. As the fair value of these purchased impaired loans (1) at the January 9, 2013 NCB Acquisition date was \$4.9 million, this provides an accretable yield of \$745,000, which the Company included in the change in accretable yield in the quarter of acquisition.

For the Valley Acquisition, the contractual cash flows were \$5.1 million and the expected cash flows were \$4.4 million, resulting in a non-accretable difference of \$692,000. As the fair value of these purchased impaired loans at the July 15, 2013 Valley Acquisition date was \$4.1 million, this provides an accretable yield of \$271,000, which the Company included in the change in accretable yield in the quarter of acquisition.

Table of Contents

(4) Allowance for Loan Losses

The allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio. A summary of the changes in the originated loans' allowance for loan losses for the three and nine months ended September 30, 2013 and 2012 are as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
	(In thousands)			
Balance at the beginning of period	\$17,822	\$20,843	\$19,125	\$22,317
Charge-offs	(706) (588) (3,195) (3,883
Recoveries of loans previously charged-off	91	63	437	1,684
Provision for loan losses	150	215	990	415
Balance at the end of period	\$17,357	\$20,533	\$17,357	\$20,533

A summary of the changes in the purchased covered loans' allowance for loan losses for the three and nine months ended September 30, 2013 and 2012 are as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
	(In thousands)			
Balance at the beginning of period	\$5,769	\$3,973	\$4,352	\$3,963
Charge-offs	—	—	(40) (33
Provision for loan losses	203	164	1,660	207
Balance at the end of period	\$5,972	\$4,137	\$5,972	\$4,137

A summary of the changes in the purchased noncovered loans' allowance for loan losses for the three and nine months ended September 30, 2013 and 2012 are as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
	(In thousands)			
Balance at the beginning of period	\$4,789	\$4,667	\$5,117	\$4,635
Charge-offs	(88) (158) (285) (393
Provision for loan losses	725	428	594	695
Balance at the end of period	\$5,426	\$4,937	\$5,426	\$4,937

The purchased loans acquired in the Cowlitz, Pierce, NCB and Valley Acquisitions are subject to the Company's internal and external credit review. If and when credit deterioration occurs subsequent to the acquisition dates, a provision for loan losses will be charged to earnings for the full amount without regard to the FDIC shared-loss agreements for the covered loan balances. The portion of the estimated loss reimbursable from the FDIC is recorded in noninterest income and increases the FDIC indemnification asset.

Table of Contents

The following table details activity in the allowance for loan losses disaggregated on the basis of the Company's impairment method as of and for the three and nine months ended September 30, 2013:

(8) Stockholders' Equity

(a) Earnings Per Common Share

The following table illustrates the reconciliation of weighted average shares used for earnings per common share computations for the three and nine months ended September 30, 2013 and 2012:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
	(Dollars in thousands)			
Net income:				
Net income	\$3,290	\$2,863	\$8,865	\$10,227
Less: Dividends and undistributed earnings allocated to participating securities	(41) (37) (110) (135
Net income allocated to common shareholders	\$3,249	\$2,826	\$8,755	\$10,092
Basic:				
Weighted average common shares outstanding	16,163,205	15,149,292	15,485,086	15,301,868
Less: Restricted stock awards	(204,992) (194,405) (187,828) (177,911
Total basic weighted average common shares outstanding	15,958,213	14,954,887	15,297,258	15,123,957
Diluted:				
Basic weighted average common shares outstanding	15,958,213	14,954,887	15,297,258	15,123,957
Incremental shares from stock options	10,854	13,784	11,983	14,266
Total diluted weighted average common shares outstanding	15,969,067	14,968,671	15,309,241	15,138,223

Potential dilutive shares are excluded from the computation of earnings per share if their effect is anti-dilutive. For the three and nine months ended September 30, 2013 anti-dilutive shares outstanding related to options to acquire common stock totaled 145,943 and 173,294, respectively, as the assumed proceeds from exercise price, tax benefits and future compensation was in excess of the market value. For the three and nine months ended September 30, 2012 anti-dilutive shares outstanding related to options and warrants to acquire common stock totaled 227,044 and 257,231, respectively, as the assumed proceeds from exercise price, tax benefits and future compensation was in excess of the market value.

(b) Dividends

Common Stock: The timing and amount of cash dividends paid on our common stock depends on the Company's earnings, capital requirements, financial condition and other relevant factors. Dividends on common stock from the Company depend substantially upon receipt of dividends from the Bank, which is the Company's predominant sources of income. The following table summarizes the dividend activity for the nine months ended September 30, 2013 and subsequent through the date of this filing.

Declared	Cash Dividend per Share	Record Date	Paid or Payable
January 30, 2013	\$0.08	February 8, 2013	February 22, 2013
April 24, 2013	\$0.08	May 10, 2013	May 24, 2013
July 23, 2013	\$0.18	August 6, 2013	August 15, 2013
October 23, 2013	\$0.08	November 5, 2013	November 15, 2013

Table of Contents

The FDIC and the Washington DFI have the authority under their supervisory powers to prohibit the payment of dividends by Heritage Bank to the Company. Additionally, current guidance from the Federal Reserve Board provides, among other things, that dividends per share on the Company's common stock generally should not exceed earnings per share, measured over the previous four fiscal quarters. Current regulations allow the Company and its subsidiary bank to pay dividends on their common stock if the Company's or the Bank's regulatory capital would not be reduced below the statutory capital requirements set by the Federal Reserve Board and the FDIC.

(c) Stock Repurchase Program

The Company has had various stock repurchase programs since March 1999. On August 30, 2012, the Board of Directors approved the Company's tenth stock repurchase plan, authorizing the repurchase of up to 5% of the Company's outstanding shares of common stock, or approximately 757,000 shares. During the three and nine months ended September 30, 2013, the Company repurchased 544,000 shares at an average purchase price of \$15.88 per share under this tenth plan. In total, the Company has repurchased 596,900 shares at an average price of \$15.70 per share under this tenth plan. The Company repurchased 490 and 12,809 shares at an average price of \$16.01 and \$14.24 to pay withholding taxes on restricted stock that vested during the three and nine months ended September 30, 2013, respectively.

(9) Stock-Based Compensation

Stock options generally vest ratably over three years and expire five years after they become exercisable or vest ratably over four years and expire ten years from date of grant. Restricted stock awards issued generally have a five-year cliff vesting or four year ratable vesting schedule. The Company issues new shares to satisfy share option exercises and restricted stock awards. As of September 30, 2013, 109,036 shares remain available for future issuances under stock-based compensation plans.

(a) Stock Option Awards

For the three and nine months ended September 30, 2013, the Company recognized compensation expense related to stock options of \$13,000 and \$55,000, respectively. No related tax benefit was recognized for the three or nine months ended September 30, 2013. For the three and nine months ended September 30, 2012, the Company recognized compensation expense related to stock options of \$24,000 and \$83,000, respectively, and a related tax benefit of \$0 and \$1,000, respectively. As of September 30, 2013, the total unrecognized compensation expense related to non-vested stock options was \$42,000 and the related weighted average period over which it is expected to be recognized is approximately 0.65 years. The intrinsic value and cash proceeds from options exercised during the nine months ended September 30, 2013 totaled \$53,000 and \$192,000, respectively. The intrinsic value and cash proceeds from options exercised during the nine months ended September 30, 2012 totaled \$13,000 and \$53,000, respectively. The following tables summarize the stock option activity for the nine months ended September 30, 2013 and 2012.

	September 30, 2013

(b) Restricted and Unrestricted Stock Awards

For the three and nine months ended September 30, 2013, the Company recognized compensation expense related to restricted and unrestricted stock awards of \$204,000 and \$926,000, respectively, and a related tax benefit of \$71,000 and \$324,000, respectively. For the three and nine months ended September 30, 2012, the Company recognized compensation expense related to restricted stock awards of \$243,000 and \$800,000, respectively, and a related tax benefit of \$85,000 and \$280,000, respectively. As of September 30, 2013, the total unrecognized compensation expense related to non-vested restricted and unrestricted stock awards was \$2.2 million and the related weighted average period over which it is expected to be recognized is approximately 2.41 years. The vesting date fair value of restricted stock awards that vested during the nine months ended September 30, 2013 and 2012 was \$1.2 million and \$694,000, respectively.

The following tables summarize the restricted and unrestricted stock award activity for the nine months ended September 30, 2013 and 2012.

	September 30, 2013	
	Shares	Weighted-Average Grant Date Fair Value

Table of Contents

(10) Investment Securities

The Company's investment policy is designed primarily to provide and maintain liquidity, generate a favorable return on assets without incurring undue interest rate and credit risk, and complement our Bank's lending activities. Securities are classified as either available for sale or held to maturity when acquired.

(a) Securities by Type and Maturity

The amortized cost, gross unrealized gains and losses, and fair values of investment securities at the dates indicated were as follows:

Securities Available for Sale

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Table of Contents

The Company has evaluated these securities and has determined that, other than certain private residential collateralized mortgage obligations discussed below, the decline in their value is temporary. The unrealized losses are primarily due to unusually large spreads in the market for mortgage-related products. The fair value of the mortgage backed securities and the collateralized mortgage obligations is expected to recover as the securities approach their maturity date and/or as the pricing spreads narrow on mortgage-related securities. The Company has the ability and intent to hold the investments until recovery of the market value which may be the maturity date of the securities. For the private residential collateralized mortgage obligations, the Company estimated expected future cash flows of the securities by estimating the expected future cash flows of the underlying collateral and applying those collateral cash flows, together with any credit enhancements such as subordination interests owned by third parties, to the security. The expected future cash flows of the underlying collateral are determined using the remaining contractual cash flows adjusted for future expected credit losses (which considers current delinquencies and nonperforming assets, future expected default rates and collateral value by vintage and geographic region) and prepayments. The expected cash flows of the security are then discounted at the interest rate used to recognize interest income on the security to arrive at a present value amount. For the nine months ended September 30, 2013, there were six private residential collateralized mortgage obligations determined to be other-than-temporarily impaired. For the nine months ended September 30, 2012, there were six private residential collateralized mortgage obligations determined to be other-than-temporarily impaired. There were no impairment losses recognized during the three months ended September 30, 2013. The Company did not record losses through other comprehensive (loss) income for the nine months ended September 30, 2013 as all unrealized losses totaling \$26,000 for the nine months ended September 30, 2013 were deemed to be credit related. The Company recorded \$14,000 and \$52,000 in impairments not related to credit losses through other comprehensive (loss) income for the three and nine months ended September 30, 2012, respectively. The Company recorded \$0 and \$60,000 in losses through earnings for the three and nine months ended September 30, 2012, respectively, due to credit losses. The average discount interest rates used in the valuations of the present value as of September 30, 2013 and 2012 were 6.43% and 7.42%, respectively, and the average prepayment rate for each period was 6.0%.

The following table summarizes activity for the nine months ended September 30, 2013 and 2012 related to the amount of other-than-temporary impairments related to credit losses on held to maturity securities:

	Life-to-Date Gross Other- Than-Temporary Impairments	Life-to-Date Other-Than- Temporary Impairments Included in Other Comprehensive (Loss) Income	Life-to-Date Net Other- Than- Temporary Impairments Included in Earnings
	(In thousands)		
December 31, 2011	\$2,435	\$1,100	\$1,335

	\$2,547	\$1,152	\$1,395
December 31, 2012	\$2,565	\$1,152	\$1,413
Subsequent impairments September 30, 2013	26	—	26
	\$2,591	\$1,152	\$1,439

(c) Redemption-in-Kind

In May 2008, the Board of Trustees of the AMF Ultra Short Mortgage Fund (“Fund”) decided to activate the Fund’s redemption-in-kind provision because of the uncertainty in the mortgage backed securities market. Exiting

participants in the Fund were allowed to redeem and receive up to \$250,000 in cash per quarter or receive 100% of their investment in “like-kind” securities equal to their proportional ownership in the Fund. The Company elected to receive the like-kind securities.

Table of Contents

Details of private residential collateralized mortgage obligation securities received from the redemption-in-kind election as of September 30, 2013 were as follows:

Type of Security	Par Value	Amortized Cost	Fair Value (2)	Aggregate Unrealized Gain (Loss)	Year-to-date Change in Unrealized Gain	Year-to-date Impairment Charge	Life-to-date Impairment Charge (1)	Current Ratings				Below Investment Grade
								AAA	AA	A	BBB	
(Dollars in thousands)												
Alt-A	\$ 758	\$ 249	\$ 260	\$ 11	\$ 22	\$ 21	\$ 675	— %	— %	— %	— %	100 %
Prime	1,288	831	967	136	5	5	764	— %	— %	— %	9 %	91 %
Totals	\$ 2,046	\$ 1,080	\$ 1,227	\$ 147	\$ 27	\$ 26	\$ 1,439	— %	— %	— %	7 %	93 %

(1) Life-to-date impairment charge represents impairment charges recognized in earnings subsequent to redemption of the Fund.

(2) Level two valuation assumptions were used to determine the fair value of held to maturity securities in the Fund.

(d) Pledged Securities

The following table summarizes the amortized cost and fair value of available for sale and held to maturity securities that are pledged as collateral for the following obligations at September 30, 2013 and December 31, 2012:

	September 30, 2013		December 31, 2012	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(In thousands)				
Washington and Oregon state to secure public deposits	\$65,872	\$66,558	\$53,642	\$56,300
Federal Reserve Bank and FHLB to secure borrowing arrangements	—	—	6,231	6,245
Repurchase agreements	23,761	23,613	17,479	17,705
Total	\$89,633	\$90,171	\$77,352	\$80,250

(11) Federal Home Loan Bank Stock

The Bank is required to maintain an investment in the stock of the FHLB of Seattle in an amount equal to the greater of \$500,000 or 0.50% of residential mortgage loans and pass-through securities or an advance requirement to be confirmed on the date of the advance and 5.0% of the outstanding balance of mortgage loans sold to the FHLB of Seattle. At September 30, 2013 and December 31, 2012, the Bank was required to maintain an investment in the stock of FHLB of Seattle of at least \$1.3 million and \$1.2 million, respectively. The Bank maintained \$5.8 million and \$5.5 million in FHLB stock at September 30, 2013 and December 31, 2012, respectively. The stock has no contractual maturity and amounts in excess of the required minimum for FHLB membership may be redeemed at par subject to certain restrictions.

The Company evaluated its investment in FHLB of Seattle stock for other-than-temporary impairment, consistent with its accounting policy. Based on the Company's evaluation of the underlying investment, including the long-term nature of the investment, the liquidity position of the FHLB of Seattle, the actions being taken by the FHLB of Seattle to address its regulatory situation and the Company's intent and ability to hold the investment for a period of time sufficient to recover the par value, the Company did not recognize an other-than-temporary impairment loss on its FHLB of Seattle stock. Further, during the year ended December 31, 2012, the Federal Housing Finance Agency ("Finance Agency") granted the FHLB of Seattle authority to repurchase up to \$25 million of excess capital stock per

quarter at par (\$100 per share), provided they receive a non-objection for each quarter's repurchase from the Finance Agency. Even though the Company did not recognize an other-than-temporary impairment loss on its FHLB of Seattle stock during the nine months ended September 30, 2013 or 2012, further deterioration in the FHLB of Seattle's financial position may result in future impairment losses.

Table of Contents

(12) Goodwill

The Company's goodwill represents the excess of the purchase price over the fair value of net assets acquired in the purchases of North Pacific Bank in 1998, Western Washington Bancorp in 2006, and Valley on July 15, 2013. The Company's goodwill is assigned to the Bank and is evaluated for impairment at the Bank level (reporting unit). At September 30, 2013, the Company's step-one analysis concluded that the reporting unit's fair value was greater than its carrying value and therefore no goodwill impairment charges were required for the nine months ended September 30, 2013. The Company did not record goodwill impairment charges for the three or nine months ended September 30, 2013 or 2012. Even though there was no goodwill impairment at September 30, 2013, adverse events may impact the recoverability of goodwill and could result in a future impairment charge which could have a material impact on the Company's Condensed Consolidated Financial Statements.

(13) Fair Value Measurements

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1:

Valuations for assets and liabilities traded in active exchange markets, or interest in open-end mutual funds that allow the Company to sell its ownership interest back to the fund at net asset value on a daily basis. Valuations are obtained from readily available pricing sources for market transactions involving identical assets, liabilities, or funds.

Level 2:

Valuations for assets and liabilities traded in less active dealer, or broker markets, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or valuations using methodologies with observable inputs.

Level 3:

Valuations for assets and liabilities that are derived from other valuation methodologies, such as option pricing models, discounted cash flow models and similar techniques using unobservable inputs, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

(a) Recurring and Nonrecurring Basis

The Company used the following methods and significant assumptions to estimate fair value of certain assets on a recurring and nonrecurring basis:

Investment Securities Available for Sale and Held to Maturity:

The fair value of all investment securities are based upon the assumptions market participants would use in pricing the security. If available, investment securities are determined by quoted market prices (Level 1). For investment securities where quoted market prices are not available, fair values are calculated based on market prices on similar securities (Level 2). Level 2 includes U.S. Treasury, U.S. government and agency debt securities, municipal securities, corporate securities and mortgage-backed securities and collateralized mortgage obligations-residential. For investment securities where quoted prices or market prices of similar securities are not available, fair values are calculated by using observable and unobservable inputs such as discounted cash flows or other market indicators (Level 3). Security valuations are obtained from third party pricing services for comparable assets or liabilities.

Table of Contents**Impaired Loans:**

At the time a loan is considered impaired, its impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, a loan's observable market prices, or fair market value of the collateral if the loan is collateral-dependent. Impaired loans for which impairment is measured using the discounted cash flow approach are not considered to be measured at fair value because the loan's effective interest rate is not a fair value input, and for the purposes of fair value disclosures, the fair value of these loans are measured commensurate with non-impaired loans. Generally, the Company utilizes the fair market value of the collateral, which is commonly based on recent real estate appraisals, to measure impairment. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business (Level 3). Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Other Real Estate Owned:

Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in Level 3 classification of the inputs for determining fair value.

Appraisals for both collateral-dependent impaired loans and other real estate owned are performed by certified general appraisers for commercial properties or certified residential appraisers for residential properties whose qualifications and licenses have been reviewed and verified by the Company. Once received, the Company reviews the assumptions and approaches utilized in the appraisal as well as the resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. On a quarterly basis, the Company compares the actual selling price of collateral that has been liquidated to the most recent appraised value to determine what additional adjustment should be made to the appraisal value to arrive at fair value.

The following table summarizes the balances of assets measured at fair value on a recurring basis at September 30, 2013 and December 31, 2012.

	September 30, 2013			
	Total	Level 1	Level 2	Level 3
	(In thousands)

There were no transfers between Level 1 and Level 2 during the three or nine months ended September 30, 2013 or 2012.

The Company may be required to measure certain financial assets and liabilities at fair value on a nonrecurring basis. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets.

The tables below represent assets measured at fair value on a nonrecurring basis at September 30, 2013 and December 31, 2012 and the net losses (gains) recorded in earnings during the three and nine months ended September 30, 2013 and 2012.

	(Dollars in thousands)			
Impaired originated loans	\$14,420	Market approach	Adjustment for differences between the comparable sales	(35.1%) - 22.0%; (2.0%)
Purchased other impaired loans	\$1,170	Market approach	Adjustment for differences between the comparable sales	(5.0%) - 0.0%; (2.5%)
Other real estate owned	\$2,391	Market approach	Adjustment for differences between the comparable sales	(47.7%) - 5.0%; (27.6%)

(b) Fair Value of Financial Instruments

Because broadly traded markets do not exist for most of the Company's financial instruments, the fair value calculations attempt to incorporate the effect of current market conditions at a specific time. These determinations are subjective in nature, involve uncertainties and matters of significant judgment and do not include tax ramifications; therefore, the results cannot be determined with precision, substantiated by comparison to independent markets and may not be realized in an actual sale or immediate settlement of the instruments. There may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results. For all of these reasons, the aggregation of the fair value calculations presented herein do not represent, and should not be construed to represent, the underlying value of the Company.

Table of Contents

The tables below present the carrying value amount of the Company's financial instruments and their corresponding estimated fair values at the dates indicated.

Accrued interest payable	\$ 106	\$ 106	\$ 19	\$ 87	\$—

The methods and assumptions, not previously presented, used to estimate fair value are described as follows:

Cash and Cash Equivalents:

The fair value of financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to carrying value (Level 1).

Other Interest Earning Deposits:

These deposits with other banks have maturities greater than three months. The fair value is calculated based upon market prices for similar deposits (Level 2).

FHLB Stock:

FHLB of Seattle stock is not publicly traded, as such, it is not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Loans Receivable and Loans Held for Sale:

Except for impaired loans discussed previously, fair value is based on discounted cash flows using current market rates applied to the estimated life (Level 3). While these methodologies are permitted under U.S. GAAP, they are not based on the exit price concept of the fair value required under ASC 820-10, Fair Value Measurements and Disclosures, and generally produces a higher value.

Accrued Interest Receivable/Payable:

The fair value of accrued interest receivable/payable balances are determined using inputs and fair value measurements commensurate with the asset from which the accrued interest is generated. The carrying amounts of accrued interest approximate fair value (Level 1, Level 2, and Level 3).

Table of Contents

Deposits:

For deposits with no contractual maturity, the fair value is assumed to equal the carrying value (Level 1). The fair value of fixed maturity deposits is based on discounted cash flows using the difference between the deposit rate and the rates offered by the Company for deposits of similar remaining maturities (Level 2).

Securities Sold Under Agreement to Repurchase:

Securities sold under agreement to repurchase are short-term in nature, repricing on a daily basis. Fair value financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to carrying value (Level 1).

Off-Balance Sheet Financial Instruments:

The majority of our commitments to extend credit, standby letters of credit and commitments to sell mortgage loans carry current market interest rates if converted to loans. As such, no premium or discount was ascribed to these commitments (Level 1). They are excluded from the preceding tables.

(14) Subsequent Event

On October 23, 2013, the Company, along with the Bank, and Washington Banking Company (“Washington Banking”) and its wholly owned subsidiary bank, Whidbey Island Bank (“Whidbey”) jointly announced the signing of a merger agreement under which Heritage and Washington Banking will enter into a strategic merger with Washington Banking merging into Heritage. Immediately following the merger, Whidbey will merge into the Bank. Washington Banking branches will adopt the Heritage Bank name in all markets, with the exception of six branches in Whidbey Island markets which will continue to operate using the Whidbey Island Bank name. The corporate headquarters of the combined company will be in Olympia, Washington.

Under the terms of the merger agreement, Washington Banking shareholders will receive 0.89000 shares of Heritage common stock and \$2.75 in cash for each share of Washington Banking common stock. Based on the closing price of Heritage common stock of \$15.89 on October 23, 2013, the consideration value per share for Washington Banking was \$16.89, or approximately \$265.1 million in aggregate. Upon consummation, the shareholders of Washington Banking will own approximately 46% of the combined company and the shareholders of Heritage will own approximately 54%. As of September 30, 2013, Washington Banking had approximately \$1.6 billion in total assets.

The merger agreement has been unanimously approved by the boards of directors of Heritage and Washington Banking. The merger is subject to regulatory approvals, approval by Heritage and Washington Banking shareholders, and certain other customary closing conditions and is expected to close in the first half of 2014. The transaction is intended to qualify as a tax-free reorganization for U.S. federal income tax purposes and Washington Banking shareholders are not expected to recognize any taxable gain or loss in connection with the share exchange to the extent of the stock consideration received.

For further information, reference is made to the Form 8-K filed by the Company with the SEC on October 24, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is intended to assist in understanding the financial condition and results of the Company as of and for the three and nine months ended September 30, 2013. The information contained in this section should be read with the unaudited Condensed Consolidated Financial Statements and the accompanying Notes included herein, and the December 31, 2012 audited Consolidated Financial Statements and the accompanying Notes included in our Annual Report on Form 10-K for the year ended December 31, 2012.

Overview

Heritage Financial Corporation is a bank holding company, which primarily engages in the business activities of our wholly owned subsidiary, Heritage Bank. We provide financial services to our local communities with an ongoing strategic focus in expanding our commercial lending relationships, market area and a continual focus on asset quality. At September 30, 2013, we had total assets of \$1.67 billion and total stockholders' equity of \$216.6 million. The Company's business activities generally are limited to passive investment activities and oversight of its investment in the Bank. Accordingly, the information set forth in this report relates primarily to the Bank's operations.

Our business consists primarily of lending and deposit relationships with small businesses and their owners in our market areas and attracting deposits from the general public. We also originate real estate construction and land development loans, consumer loans and one-to-four family residential loans collateralized by residential properties located in western and central Washington State and the greater Portland, Oregon area.

Our core profitability depends primarily on our net interest income after provision for loan losses. Net interest income is the difference between interest income, which is the income that we earn on interest earning assets, comprised primarily of loans and investments, and interest expense, which is the amount we pay on our interest bearing liabilities, including primarily deposits. Management strives to match the repricing characteristics of the interest earning assets and interest bearing liabilities to protect net interest income from changes in market interest rates and changes in the shape of the yield curve. Like most financial institutions, our net interest income is affected significantly by general and local economic conditions, particularly changes in market interest rates, and by governmental policies and actions of regulatory agencies. Net interest income is additionally affected by changes in the volume and mix of interest earning assets, the interest earned on those assets, the volume and mix of interest bearing liabilities and the interest paid on those liabilities.

Our net income is affected by many factors, including the provision for loan losses. The provision for loan losses is dependent on changes in the loan portfolio and management's assessment of the collectability of the loan portfolio as well as prevailing economic and market conditions. The allowance for loan losses reflects the amount that the Company believes is appropriate to cover known and inherent credit losses in its loan portfolio.

Net income is also affected by noninterest income and noninterest expense. Noninterest income consists of a bargain purchase gain on bank acquisition, service charges and other fees, merchant Visa income (net), change in FDIC indemnification asset, and other income. Noninterest expense consists primarily of compensation and employee benefits, occupancy and equipment, data processing, professional services and other expenses. Compensation and employee benefits consist primarily of the salaries and wages paid to our employees, payroll taxes, expenses for retirement and other employee benefits. Occupancy and equipment expenses, which are the fixed and variable costs of buildings and equipment, consist primarily of lease payments, taxes, depreciation charges, maintenance and costs of utilities.

Results of operations may also be affected significantly by general and local economic and competitive conditions, governmental policies and actions of regulatory authorities. Other income and other expenses are also impacted by growth of operations and growth in the number of loan and deposit accounts through acquisitions and core banking business growth. Growth in operations affects other expenses primarily as a result of additional employees, branch facilities and marketing expense. Growth in the number of loan and deposit accounts affects other income, including service charges as well as other expenses such as data processing services, supplies, postage, telecommunications and other miscellaneous expenses.

Earnings Summary

Net income was \$0.20 per diluted common share for the three months ended September 30, 2013 compared to \$0.19 per diluted common share for the three months ended September 30, 2012. Net income for the three months ended September 30, 2013 was \$3.3 million compared to net income of \$2.9 million for the same period in 2012. The \$427,000 increase was primarily the result of a \$1.5 million increase in interest income and a \$1.1 million

57

Table of Contents

increase in noninterest income, partially offset by a \$1.8 million increase in noninterest expense and a \$271,000 increase in the provision for loan losses.

Net income was \$0.57 per diluted common share for the nine months ended September 30, 2013 compared to \$0.67 per diluted common share for the nine months ended September 30, 2012. Net income for the nine months ended September 30, 2013 was \$8.9 million compared to net income of \$10.2 million for the same period in 2012. The \$1.4 million decrease was primarily the result of a \$3.0 million increase in noninterest expense and a \$1.9 million increase in the provision for loan losses, partially offset by a \$1.7 million increase in noninterest income, a \$732,000 decrease in interest expense and a \$467,000 increase in interest income.

The efficiency ratio consists of noninterest expense divided by the sum of net interest income before provision for loan losses plus noninterest income. The Company's efficiency ratio decreased to 70.9% for the three months ended September 30, 2013 from 71.5% for the three months ended September 30, 2012. The decrease in the ratio for the three months ended September 30, 2013 is due primarily to the increase in the interest income as a result of the NCB and Valley Acquisitions and the increase in the noninterest income which was primarily the result of a \$596,000 gain on sale of a branch building. The Company's efficiency ratio increased to 71.6% for the nine months ended September 30, 2013 from 69.9% for the nine months ended September 30, 2012. The increase in the ratio for the nine months ended September 30, 2013 compared to same period in 2012 is due primarily to the increase in noninterest expense, largely as a result of the NCB and Valley Acquisitions and the Central Valley Bank merger. Noninterest expense also increased as a result of costs related to the core system conversion (appearing as data processing and professional service expenses) which was completed in October 2013. While growth strategies are being executed, the Company expects to incur higher expenses as evidenced in the current efficiency ratio. Expenses are expected to be more consistent with revenue in the future since these growth strategies are being implemented to produce long term positive results.

The efficiency ratio for the three and nine months ended September 30, 2013 was additionally impacted by a trending decline in the net interest margin. This impact is more evident in the nine months ended September 30, 2013 as the three months ended September 30, 2013 is diminished by the increase in net interest income from the Valley Acquisition.

Net Interest Income

Net interest income increased \$1.6 million, or 10.2%, to \$17.6 million for the three months ended September 30, 2013, compared with \$16.0 million for the same period in 2012. Net interest income increased \$1.2 million, or 2.5%, to \$50.1 million for the nine months ended September 30, 2013, compared with \$48.9 million in the same period for 2012. This increase in net interest income for both the three and nine months ended September 30, 2013 was primarily a result of the effects of the NCB and Valley Acquisitions, partially offset by a decrease in the net interest margin. The incremental accretion income related to the loans purchased in the NCB and Valley Acquisitions was \$648,000 and \$2.1 million for the three and nine months ended September 30, 2013, respectively. The following table presents the net interest margins and effects of the incremental accretion on purchased loans for the three and nine months ended September 30, 2013 and 2012:

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2013	2012	2013	2012	
Net interest margin, excluding incremental accretion on purchased loans (1)	4.29	% 4.60	% 4.37	% 4.72	%
Impact on net interest margin from incremental accretion on purchased loans (1)	0.38	% 0.49	% 0.51	% 0.51	%
Net interest margin	4.67	% 5.09	% 4.88	% 5.23	%

(1)

The incremental accretion income represents the amount of income recorded on the purchased loans above the contractual stated interest rate in the individual loan notes. This income results from the discount established at the time these loan portfolios were acquired and modified as a result of quarterly cash flow re-estimation.

Net interest income as a percentage of average earning assets (net interest margin) for the three months ended September 30, 2013, decreased 42 basis points to 4.67% from 5.09% for the same period in 2012. Net interest income as a percentage of average earning assets (net interest margin) for the nine months ended September 30,

Table of Contents

2013, decreased 35 basis points to 4.88% from 5.23% for the same period in 2012. The decrease in net interest margin for the three and nine months ended September 30, 2013 was primarily due to lower contractual loan note rates partially offset by the decreased costs of interest bearing deposits. The net interest spread for the three months ended September 30, 2013 decreased 38 basis points to 4.58% from 4.96% for the same period in 2012. The net interest spread for the nine months ended September 30, 2013 decreased 32 basis points to 4.77% from 5.09% for the same period in 2012.

The following table provides relevant net interest income information for the dates indicated. The average loan balances presented in the table are net of allowances for loan losses. Nonaccrual loans have been included in the tables as loans carrying a zero yield. Yields on tax-exempt securities and loans have not been stated on a tax-equivalent basis.

(1) Annualized

Total interest income increased \$1.5 million, or 8.8%, to \$18.5 million for the three months ended September 30, 2013, from \$17.0 million for the three months ended September 30, 2012. Total interest income increased \$467,000, or 0.9%, to \$52.9 million for the nine months ended September 30, 2013, from \$52.4 million for the nine months ended September 30, 2012. The increase in interest income for both the three and nine months ended September 30, 2013 was primarily due to the interest income recognized on the additional earning assets from the NCB and Valley Acquisitions, partially offset by lower contractual loan yields.

Table of Contents

The balance of average interest earning assets (including nonaccrual loans) increased \$249.0 million, or 20.0%, to \$1.49 billion for the three months ended September 30, 2013, from \$1.24 billion for the three months ended September 30, 2012. The balance of average interest earning assets (including nonaccrual loans) increased \$124.2 million, or 10.0%, to \$1.37 billion for the nine months ended September 30, 2013, from \$1.25 billion for the nine months ended September 30, 2012. The increase in average interest earning assets for both the three and nine months ended September 30, 2013 was due primarily to the NCB and Valley Acquisitions. The Bank acquired fair value of \$51.5 million in non-covered loans in the NCB Acquisition on January 9, 2013 and fair value of \$117.1 million in loans in the Valley Acquisition on July 15, 2013. Originated loans receivable, net increased \$29.4 million and \$87.4 million during the three and nine months ended September 30, 2013, respectively.

The yield on total interest earning assets decreased 50 basis points from 5.43% for the three months ended September 30, 2012 to 4.93% for the three months ended September 30, 2013. The yield on total interest earning assets decreased 45 basis points from 5.61% for the nine months ended September 30, 2012 to 5.16% for the nine months ended September 30, 2013. The decrease in the yield on interest earning assets for the three and nine months ended September 30, 2013 reflects the decrease in loan yields as a result of lower contractual loan rates and to a lesser extent the decrease in yields on investment securities. The effect of discount accretion on loan yields for the three months ended September 30, 2013 and September 30, 2012 was approximately 48 basis points and 60 basis points, respectively. The effect of discount accretion on loan yields for the nine months ended September 30, 2013 and September 30, 2012 was approximately 64 basis points for both periods. The decrease in discount accretion yield for the three months ended September 30, 2013 as compared to the same period in 2012 was due to payoffs of the purchased loans causing the recorded investment balance to which the yield is applied to decrease. The decrease as a result of declining loan balances is partially offset by the incremental income attributed to the NCB and Valley Acquisitions. For the three months ended September 30, 2013 and September 30, 2012, originated nonaccruing loans reduced the yield earned on loans by approximately five basis points and eight basis points, respectively. For the nine months ended September 30, 2013 and September 30, 2012, originated nonaccruing loans reduced the yield earned on loans by approximately six basis points and nine basis points, respectively. Originated nonaccrual loans totaled \$9.8 million at September 30, 2013 as compared to \$12.5 million at December 31, 2012.

Total interest expense decreased by \$124,000, or 11.5%, to \$952,000 for the three months ended September 30, 2013 from \$1.1 million for the three months ended September 30, 2012. Total interest expense decreased by \$732,000, or 20.6%, to \$2.8 million for the nine months ended September 30, 2013 from \$3.6 million for the nine months ended September 30, 2012. The decrease in interest expense was attributable to lower average rates paid on interest bearing liabilities, partially offset by higher average interest bearing liabilities.

The average cost of interest bearing liabilities decreased 13 basis points to 0.35% for the three months ended September 30, 2013 from 0.48% for the three months ended September 30, 2012. The average cost of interest bearing liabilities decreased 14 basis points to 0.38% for the nine months ended September 30, 2013 from 0.52% for the nine months ended September 30, 2012. Total average interest bearing liabilities increased by \$179.1 million, or 19.9%, to \$1.08 billion for the three months ended September 30, 2013 from \$897.9 million for the three months ended September 30, 2012. Total average interest bearing liabilities increased by \$80.1 million, or 8.8%, to \$987.5 million for the nine months ended September 30, 2013 from \$907.5 million for the nine months ended September 30, 2012. The increase in average interest bearing liabilities for the three and nine months ended September 30, 2013 was due primarily to the Valley Acquisition effective on July 15, 2013 which had approximately \$161.0 million of assumed interest bearing deposits and the NCB Acquisition effective on January 9, 2013 which had approximately \$40.8 million of interest bearing deposits. Additionally, the average interest bearing liabilities increased during the three and nine months ended September 30, 2013 as a result of \$26.8 million in non-maturity deposits from one customer which were deposited in first quarter 2013. Approximately \$10.6 million of these deposits remained as of September 30, 2013, which are expected to be completely withdrawn by the end of 2013. These increases in deposits were offset partially by deposit runoff.

Deposit interest expense decreased \$122,000, or 11.5%, to \$939,000 for the three months ended September 30, 2013 compared to \$1.1 million for the same quarter in 2012. Deposit interest expense decreased \$715,000, or 20.4%, to

\$2.8 million for the nine months ended September 30, 2013 compared to \$3.5 million for the nine months ended September 30, 2012. The decrease in deposit interest expense for the three and nine months ended September 30, 2013 is primarily a result of a 13 and 15 basis point decrease, respectively, in the average cost of interest bearing deposits, reflecting the lower interest rate environment in 2013 as compared to 2012.

Table of Contents

Provision for Loan Losses

The provision for loan losses for originated loans decreased \$65,000, or 30.2%, to \$150,000 for the three months ended September 30, 2013 from \$215,000 for the three months ended September 30, 2012. The provision for loan losses for originated loans increased \$575,000, or 138.6%, to \$990,000 for the nine months ended September 30, 2013 from \$415,000 for the nine months ended September 30, 2012. The amount of provision was calculated in accordance with the Company's methodology for determining the allowance for loan losses as discussed below. The Bank had net charge-offs on originated loans of \$615,000 for the three months ended September 30, 2013 compared to \$525,000 for the three months ended September 30, 2012. The net charge-offs for the nine months ended September 30, 2013 and 2012 were \$2.8 million and \$2.2 million, respectively. The net charge-offs for the three months ended September 30, 2013 were due primarily to \$419,000 in charge-offs related to one construction borrower whose collateral was sold during the period. The net charge-offs for the nine months ended September 30, 2013 were due primarily to three relationships totaling \$2.3 million in charge-offs. These borrowers either defaulted during the period or sold underlying collateral resulting in charge-offs for these originated loans.

Based on the change in mix and volume of the originated loan portfolio at September 30, 2013 compared to December 31, 2012, as well as the decrease in certain historical loss factors and improvements in certain environmental factors, the Company determined that it was appropriate that the provision for loan losses for originated loans for the three and nine months ended September 30, 2013 was lower than the charge-offs for the same periods. The ratio of net charge-offs to average total originated loans outstanding was 0.07% and 0.30% for the three and nine months ended September 30, 2013, respectively, compared to 0.06% and 0.26% for the three and nine months ended September 30, 2012, respectively.

The Bank has established a comprehensive methodology for determining the allowance for loan losses. On a quarterly basis the Bank performs an analysis taking into consideration pertinent factors underlying the credit quality of the loan portfolio. These factors include changes in the amount and composition of the loan portfolio, historical loss experience for various loan classes, changes in economic conditions, delinquency rates, a detailed analysis of individual loans on nonaccrual status, and other factors to determine the level of the allowance for loan losses. The allowance for loan losses on originated loans decreased by \$1.8 million, or 9.2%, to \$17.4 million at September 30, 2013 from \$19.1 million at December 31, 2012. As of September 30, 2013, the Bank identified \$29.3 million of impaired originated loans, which includes \$19.6 million of restructured originated performing loans. Of those impaired loans, \$18.5 million have no allowances for credit losses as their estimated collateral value is equal to or exceeds their carrying costs. The remaining \$10.8 million have related allowances for credit losses totaling \$4.2 million.

Based on the established comprehensive methodology, management deemed the allowance for loan losses on originated loans of \$17.4 million at September 30, 2013 (1.80% of total originated loans and 221.68% of nonperforming originated loans, net of amounts guaranteed by governmental agencies) appropriate to provide for probable incurred losses based on an evaluation of known and inherent risks in the loan portfolio at that date. The provision for loan losses on purchased loans for the three months ended September 30, 2013 totaled \$928,000 compared to \$592,000 for the three months ended September 30, 2012. The increase in provision expense for the three months ended September 30, 2013 was due substantially to three borrowers in our purchased noncovered other loans portfolio and one borrower in our purchased covered other loan portfolio who experienced financial difficulties during the period. After review of the borrowers' global cash flows, the Bank recorded specific reserves and a related provision for loan losses in the amount of \$1.1 million. The provision expense was partially offset by purchased impaired loans that experienced cash flows that were better than expected that generated a reversal of the previously recorded allowance for loan losses. The provision for loan losses on purchased loans for the nine months ended September 30, 2013 totaled \$2.3 million compared to \$902,000 for the nine months ended September 30, 2012. The increase in provision expense for the nine months ended September 30, 2013 was due to the previously mentioned borrowers as well as a collateral valuation adjustment of a purchased covered impaired loan and the resolution of a separate purchased covered impaired loan. Excluding these identified transactions, the purchased loans were generally

performing in accordance with or better than cash flow estimates from prior periods. As of the acquisition dates, purchased loans were recorded at their estimated fair value, incorporating our estimate of future expected cash flows until the ultimate resolution of these credits. To the extent actual or projected cash flows are less than previously estimated, additional provisions for loan losses on the purchased loan portfolios will be recognized immediately into earnings. To the extent actual or projected cash flows are more than previously estimated, the increase in cash flows is recognized immediately as a recapture of provision for loan losses up to the previously recognized provision for that pool of loans, if any, and then prospectively recognized in interest income as a yield adjustment.

Table of Contents

While the Bank believes it has established its existing allowances for loan losses in accordance with GAAP, there can be no assurance that bank regulators, in reviewing the Bank's loan portfolios, will not request the Bank to increase significantly its allowance for loan losses. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is appropriate or that increased provisions will not be necessary should the credit quality of the loans deteriorate. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations.

Noninterest Income

Total noninterest income increased \$1.1 million, or 69.1%, to \$2.6 million for the three months ended September 30, 2013 compared to \$1.5 million for the same period in 2012. Total noninterest income increased \$1.7 million, or 31.3%, to \$7.2 million for the nine months ended September 30, 2013 compared to \$5.5 million for the same period in 2012. The increase for both the three and nine months ended September 30, 2013 was due primarily to the gain on sale of a branch building held for sale of \$596,000 recognized in the three months ended September 30, 2013. The branch building was sold in connection with the relocation of the branch to a more favorable location. The effects of the change in the FDIC indemnification asset, net also impacted the increase in noninterest income. For the three and nine months ended September 30, 2013 compared to the same periods in 2012, the change in FDIC indemnification asset decreased \$142,000 and \$351,000, respectively. The change in the FDIC indemnification asset for the three and nine months ended September 30, 2013 was the result of a decrease in the amortization of the asset as a result of decreasing related covered loan balances and a decrease in the estimated FDIC additional losses, suggesting an improvement of purchased covered credits since prior periods. The increase in noninterest income for the nine months ended September 30, 2013 was also the result of the bargain purchase gain on bank acquisition of \$399,000 recorded in connection with the NCB Acquisition on January 9, 2013.

Noninterest Expense

Noninterest expense increased \$1.8 million, or 14.3%, to \$14.3 million during the three months ended September 30, 2013 compared to \$12.5 million for the three months ended September 30, 2012. The increase for the three months ended September 30, 2013 compared to the same period in 2012 was primarily the result of the following: increased compensation and employee benefits expense of \$790,000; increased occupancy and equipment expense of \$310,000; increased data processing expense of \$310,000 and increased professional services expense of \$120,000. The other expenses in noninterest expense also increased by \$418,000 for the three months ended September 30, 2013 compared to prior period due primarily to increased other loan expenses and increased core deposit intangible amortization as a result of the NCB and Valley Acquisitions. The increase in the noninterest expense for the three months ended September 30, 2013 was partially offset by a \$197,000 decrease expenses for in other real estate owned, net. Noninterest expense increased \$3.0 million, or 8.0%, to \$41.0 million during the nine months ended September 30, 2013 compared to \$38.0 million for the nine months ended September 30, 2012. The increase for the nine months ended September 30, 2013 compared to the same period in 2012 was primarily the result of the following: increased compensation and employee benefits expense of \$1.5 million; increased data processing expense of \$907,000; increased professional services expense of \$608,000 and increased occupancy and equipment expense of \$608,000; and was partially offset by a \$747,000 decrease in expenses for other real estate owned, net. The increases in noninterest expense for the three and nine months ended September 30, 2013 were primarily due to the NCB and Valley Acquisitions as well as expenses relating to a core system conversion completed in October 2013.

Income Tax Expense

The provision for income taxes increased by \$201,000, or 15.4%, to \$1.5 million for the three months ended September 30, 2013 from \$1.3 million for the three months ended September 30, 2012. The Company's effective tax rate was 31.5% for the three months ended September 30, 2013 compared to 31.4% for the same period in 2012. The increase in the Company's effective tax rate for three months ended September 30, 2013 compared to prior period in 2012 is due primarily to an increase in the income before federal income taxes, partially offset by the increase in the

amount of tax exempt income. The provision for income taxes decreased by \$682,000, or 14.1%, to \$4.2 million for the nine months ended September 30, 2013 from \$4.8 million for the nine months ended September 30, 2012. The Company's effective tax rate was 31.9% for the nine months ended September 30, 2013 compared to 32.1% for the same period in 2012. The decrease in the Company's effective tax rate for nine months ended September 30, 2013 is due primarily to the increase in the amount of tax exempt income in proportion to the total income.

Financial Condition Data

63

Table of Contents

Total assets were \$1.67 billion as of September 30, 2013 as compared to \$1.35 billion as of December 31, 2012. The \$328.9 million increase was due primarily to increases of \$141.1 million in purchased non-covered loans receivable, \$89.2 million in originated loans receivable, net, \$25.0 million in investment securities held to maturity, \$30.9 million in cash and cash equivalents, \$22.9 million in investment securities available for sale, \$16.4 million in goodwill, \$14.6 million in other interest earning deposits and \$9.3 million in premises and equipment, net. The increase was partially offset by a decrease in purchased covered loans, net of \$20.5 million. The increase in all assets except originated loans receivable was primarily as a result of the NCB and Valley Acquisitions which were completed on January 9, 2013 and July 15, 2013, respectively. Total fair value of assets purchased in the NCB Acquisition was \$65.0 million with \$51.5 million being non-covered loans. Total fair value of assets purchased in the Valley Acquisition was \$237.3 million with \$117.1 million being non-covered loans. The purchased covered loans, net decreased primarily as a result of prepayments and regular principal loan payments. The originated loans receivable increased as loan production outpaced loan payoffs.

Deposits increased by \$308.0 million, or 27.6%, to \$1.43 billion as of September 30, 2013 compared to \$1.12 billion as of December 31, 2012. The increase in deposits was due primarily to the \$60.4 million and \$207.0 million of NCB and Valley deposits, respectively, assumed at the respective acquisition dates. In addition, \$10.6 million in non-maturity deposits related to one customer, which are anticipated to be withdrawn by the end of 2013.

Securities sold under agreement to repurchase increased \$6.6 million, or 41.4%, to \$22.7 million as of September 30, 2013 from \$16.0 million as of December 31, 2012 primarily due to increases in customer balances. The accrued expenses and other liabilities decreased \$3.4 million, or 27.2%, from \$12.6 million at December 31, 2012 to \$9.2 million at September 30, 2013 due primarily to the decrease of approximately \$2.0 million related to draws on customer funds held for a construction project as well as a \$1.1 million decrease in outstanding cashiers checks. Total stockholders' equity increased by \$17.7 million, or 8.9%, to \$216.6 million as of September 30, 2013 from \$198.9 million at December 31, 2012. The increase during the nine months ended September 30, 2013 was due primarily to the issuance of 1.53 million shares of Heritage common stock with a fair value of \$24.4 million in the Valley Acquisition as well as \$8.9 million in net income and \$981,000 in stock based compensation expense, partially offset by \$8.8 million in stock repurchases, \$5.4 million in cash dividends and \$2.4 million in other comprehensive loss which was primarily the result of a decrease in the fair value of investment securities available for sale. The Company's capital position continues to remain strong at 12.9% of total assets as of September 30, 2013 compared to 14.8% at December 31, 2012.

Lending Activities

As indicated in the table below, total loans receivable, net of deferred loan fees (excluding loans held for sale) increased \$209.9 million, or 20.4%, to \$1.24 billion at September 30, 2013 from \$1.03 billion at December 31, 2012. Originated loans (excluding loans held for sale) increased \$87.8 million, or 10.0%, to \$964.4 million at September 30, 2013 from \$876.6 million at December 31, 2012. The non-covered purchased loans increased by \$141.4 million, or 220.5%, from \$64.1 million at December 31, 2012 to \$205.5 million at September 30, 2013 as a result of the NCB and Valley Acquisitions.

Total nonaccrual originated loans (1)(2)	9,759	12,458	
Other real estate owned, non-covered	3,812	5,406	
Total nonperforming originated assets	\$13,571	\$17,864	
Restructured originated performing loans:			
Commercial business	\$15,993	\$14,256	
One-to-four family residential	254	422	
Real estate construction and land development	3,343	361	
Total restructured originated performing loans(3)	\$19,590	\$15,039	
Accruing originated loans past due 90 days or more(4)	—	214	
Potential problem originated loans(5)	26,630	28,270	
Allowance for loan losses on originated loans	17,357	19,125	
Nonperforming originated loans to total originated loans(6)	0.81	% 1.28	%
Allowance for loan losses to total originated loans	1.80	% 2.19	%
Allowance for loan losses to nonperforming originated loans(6)	221.68	% 170.44	%
Nonperforming originated assets to total originated assets(6)	0.83	% 1.39	%

(1) \$5.1 million and \$9.3 million of nonaccrual originated loans were considered troubled debt restructurings at September 30, 2013 and December 31, 2012, respectively.

(2) \$1.9 million and \$1.2 million of nonaccrual originated loans were guaranteed by government agencies at September 30, 2013 and December 31, 2012, respectively.

(3) \$1.0 million and \$679,000 of restructured originated performing loans were guaranteed by government agencies at September 30, 2013 and December 31, 2012, respectively.

(4) There were no accruing originated loans past due 90 days or more that were guaranteed by government agencies at September 30, 2013 and there were \$6,000 of accruing originated loans past due 90 days or more guaranteed by government agencies at December 31, 2012.

(5) \$1.7 million and \$3.2 million of potential problem originated loans were guaranteed by government agencies at September 30, 2013 and December 31, 2012, respectively.

(6) Excludes portions guaranteed by government agencies.

Nonperforming originated assets decreased \$4.3 million to \$13.6 million, or 0.83% of total originated assets excluding portions guaranteed by governmental agencies, at September 30, 2013 from \$17.9 million, or 1.39% of total originated assets excluding portions guaranteed by governmental agencies, at December 31, 2012 due to decreases in both the nonperforming originated loans and other real estate owned. For the nine months ended September 30, 2013, the decrease in nonperforming loans was the result of principal payments of \$4.8 million, charge-offs of \$1.2 million and transfers to other real estate owned of \$438,000, offset by additions to nonperforming loans of \$3.8 million, which were primarily in the commercial business loan segment. The other real estate owned, non-covered balance decreased from \$5.4 million at December 31, 2012 to \$3.8 million at September 30, 2013 as a result of the sale of 26 properties with net proceeds of \$5.8 million and net gain of \$307,000 and a \$23,000 valuation increase for the nine months ended September 30, 2013, partially offset by the addition of \$4.0 million in other real estate owned of which \$2.3

million was a result of the NCB Acquisition.

Restructured originated performing loans were \$19.6 million and \$15.0 million as of September 30, 2013 and December 31, 2012, respectively. The \$4.6 million increase in the restructured performing originated loans for the nine months ended September 30, 2013 was primarily the result of one borrowing relationship totaling \$2.3 million.

Table of Contents

This borrower relationship is with a builder who primarily constructs single family dwellings. At September 30, 2013, there was no allowance for loan losses on this modified credit relationship as all balances were charged-down to their realizable value.

Potential problem originated loans as of September 30, 2013 and December 31, 2012 were \$26.6 million and \$28.3 million, respectively. Potential problem loans are those loans that are currently accruing interest and are not considered impaired, but which we are monitoring because the financial information of the borrower causes us concerns as to their ability to comply with their loan repayment terms. Loans that are past due 90 days or more and still accruing interest are both well secured and in the process of collection. The decrease in the potential problem loans was primarily the result of \$7.1 million of loans transferred to impaired loans, \$6.7 million of principal payoffs, \$3.8 million of regular payments of previously categorized potential problem loans and \$3.0 million of loan upgrades, offset partially by the downgrade of relationships totaling \$16.2 million during the nine months ended September 30, 2013. The majority of the downgrade was the result of two borrowing relationships totaling approximately \$5.9 million at September 30, 2013 which were downgraded during 2013.

Analysis of Allowance for Loan Losses

Management maintains an allowance for loan losses (“ALL”) to provide for estimated probable incurred credit losses inherent in the loan portfolio. The adequacy of the ALL is monitored through our ongoing quarterly loan quality assessments.

We assess the estimated probable incurred credit losses inherent in our loan portfolio by considering a number of elements including:

- Historical loss experience in a number of homogeneous classes of the loan portfolio;
- The impact of environmental factors, including:
 - Levels of and trends in delinquencies and impaired loans;
 - Levels and trends in charge-offs and recoveries;
 - Effects of changes in risk selection and underwriting standards, and other changes in lending policies, procedures and practices;
 - Experience, ability, and depth of lending management and other relevant staff;
 - National and local economic trends and conditions;
 - External factors such as competition, legal, and regulatory requirements; and
 - Effects of changes in credit concentrations.

We calculate an appropriate ALL for the non-classified and classified performing loans in our loan portfolio by applying historical loss factors for homogeneous classes of the portfolio, adjusted for changes to the above-noted environmental factors. We may record specific provisions for impaired loans, including loans on nonaccrual status and TDRs, after a careful analysis of each loan’s credit and collateral factors. Our analysis of an appropriate ALL combines the provisions made for our non-classified loans, classified loans, and the specific provisions made for each impaired loan.

While we believe we use the best information available to determine the allowance for loan losses, results of operations could be significantly affected if circumstances differ substantially from the assumptions used in determining the allowance. A further decline in local and national economic conditions, or other factors, could result in a material increase in the allowance for loan losses and may adversely affect the Company’s financial condition and results of operations. In addition, the determination of the amount of the allowance for loan losses is subject to review by bank regulators, as part of their routine examination process, which may result in the establishment of additional allowance allocations based upon their judgment of information available to them at the time of their examination.

Table of Contents

The following table provides information regarding changes in our allowance for originated loan losses for the three and nine months ended September 30, 2013 and 2012:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
	(Dollars in thousands)			
Originated loans outstanding at end of period	\$964,407	\$873,875	\$964,407	\$873,875
Average originated loans receivable during period	945,130	857,212	910,020	851,174
Allowance for originated loan losses at beginning of period	17,822	20,843	19,125	22,317
Provision for loan losses on originated loans	150	215	990	415
Charge offs:				
Commercial business	(241)	(363)	(2,419)	(2,555)
One-to-four family residential	—	(94)	—	(170)
Real estate construction and land development	(423)	—	(565)	(920)
Consumer	(42)	(131)	(211)	(238)
Total charge offs	(706)	(588)	(3,195)	(3,883)
Recoveries:				
Commercial business	19	57	319	1,533
Real estate construction and land development	—	—	32	125
Consumer	72	6	86	26
Total recoveries	91	63	437	1,684
Net charge offs	(615)	(525)	(2,758)	(2,199)
Allowance for originated loan losses at end of period	\$17,357	\$20,533	\$17,357	\$20,533
Allowance for originated loan losses to total originated loans receivable	1.80	% 2.35	% 1.80	% 2.35
Ratio of net charge offs during period to average originated loans receivable	(0.07)%	(0.06)%	(0.30)%	(0.26)%

The allowance for loan losses for originated loans decreased \$1.8 million to \$17.4 million at September 30, 2013 from \$19.1 million at December 31, 2012. The decrease was primarily due to net charge-offs recorded during the nine months ended September 30, 2013 of \$2.8 million. The allowance for loan losses was not increased despite loan growth in the originated portfolio primarily due to the generally improving credit quality of the portfolio as well as the change in mix and volume of loan types. Nonperforming originated loans to total originated loans excluding portions guaranteed by governmental agencies decreased to 0.81% at September 30, 2013 from 1.28% at December 31, 2012 and the allowance for loan losses to nonperforming originated loans excluding portions guaranteed by governmental agencies was 221.68% at September 30, 2013 and 170.44% at December 31, 2012. Potential problem originated loans decreased \$1.6 million to \$26.6 million at September 30, 2013 from \$28.3 million at December 31, 2012.

Based on management's assessment of loan quality and current economic conditions, the Company believes that its allowance for loan losses was appropriate to absorb the probable incurred losses and inherent risks of loss in the loan portfolio at September 30, 2013.

Liquidity and Capital Resources

Our primary sources of funds are customer deposits, loan principal and interest payments and interest earned on and proceeds from sales and maturities of investment securities. These funds, together with retained earnings, equity and other borrowed funds (as necessary), are used to make loans, acquire investment securities and

Table of Contents

other assets, and fund continuing operations. While maturities and scheduled amortization of loans are predictable sources of funds, deposit flows and prepayments are greatly influenced by the level of interest rates, economic conditions, and competition. In addition to customer deposits, management may utilize the use of brokered deposits on an as-needed basis.

As indicated in the table below, total deposits increased \$308.0 million, or 27.6%, to \$1.43 billion at September 30, 2013 from \$1.12 billion at December 31, 2012.

	September 30, 2013	% of Total		December 31, 2012	% of Total	
	(Dollars in thousands)					
Non-interest demand deposits	\$361,743	25.4	%	\$247,048	22.1	%
NOW accounts	350,361	24.6		303,487	27.2	
Money market accounts	233,177	16.3		157,728	14.1	
Savings accounts	160,586	11.3		120,781	10.8	
Total non-maturity deposits	1,105,867	77.6		829,044	74.2	
Certificate of deposit accounts	320,118	22.4		288,927	25.8	
Total deposits	\$1,425,985	100.0	%	\$1,117,971	100.0	%

Since December 31, 2012, non-maturity deposits (total deposits less certificate of deposit accounts) have increased \$276.8 million, or 33.4%, to \$1.11 billion from \$829.0 million and certificate of deposit accounts have increased \$31.2 million, or 10.8%, from \$288.9 million to \$320.1 million. The increase in total deposits is primarily the result of the deposits assumed in the NCB and Valley Acquisitions, which totaled \$60.4 million and \$207.0 million at the January 9, 2013 and July 15, 2013 acquisition dates, respectively. In addition, \$10.6 million of the increase in non-maturity deposits is due to one customer, which is expected to be withdrawn by the end of 2013. As a result of the change in volume and types of deposits, the percentage of certificate of deposit accounts to total deposits decreased to 22.4% at September 30, 2013 from 25.8% at December 31, 2012.

Borrowings may also be used on a short-term basis to compensate for reductions in other sources of funds (such as deposit inflows at less than projected levels). Borrowings may also be used on a longer-term basis to support expanded lending activities and match the maturity of repricing intervals of assets. The Bank is utilizing securities sold under agreement to repurchase as a supplement to our funding sources. Our repurchase agreements are secured by available for sale investment securities. At September 30, 2013, the Bank had securities sold under agreements to repurchase totaling \$22.7 million, an increase of \$6.6 million from \$16.0 million at December 31, 2012. The increase is the result of customer activity during the period.

We are required to maintain an adequate level of liquidity to ensure the availability of sufficient funds to fund loan originations and deposit withdrawals, satisfy other financial commitments, and fund operations. We generally maintain sufficient cash and short-term investments to meet short-term liquidity needs. At September 30, 2013, cash and cash equivalents totaled \$135.1 million, or 8.1% of total assets. We additionally had \$17.4 million of other interest earning deposits, of which \$4.6 million are scheduled to mature within one year of the September 30, 2013 balance sheet date. The fair value of investment securities available for sale totaled \$167.2 million at September 30, 2013; however, management generally does not consider those with maturities beyond one year to be a viable source of liquidity given that many securities available for sale are pledged to secure borrowing arrangements. The fair value of investment securities classified as either available for sale or held to maturity with maturities of one year or less amounted to \$4.8 million, or less than 0.29% of total assets. At September 30, 2013, the Bank maintained credit facilities with the FHLB of Seattle for \$261.5 million and credit facilities with the Federal Reserve Bank of San Francisco for \$37.6 million, of which there were no borrowings outstanding at September 30, 2013. The Bank also maintains advance lines with Zions Bank, Wells Fargo, US Bank and Pacific Coast Bankers' Bank to purchase federal funds totaling \$50.0 million as of September 30, 2013. There were no federal funds purchased as of September 30, 2013.

Stockholders' equity at September 30, 2013 was \$216.6 million compared with \$198.9 million at December 31, 2012. During the three months ended September 30, 2013, the Company issued 1.5 million of Heritage common stock with a fair value of \$24.2 million in the Valley Acquisition. During the nine months ended September 30, 2013, the Company realized net income of \$8.9 million, declared and paid cash dividends of \$5.4 million, recorded \$2.4 million in other comprehensive loss, recorded stock-based compensation expense totaling \$981,000, recorded \$166,000 related to the exercise of stock options, net of tax effect, and repurchased common stock for \$8.8 million.

Table of Contents

Capital Requirements

The Company is a bank holding company under the supervision of the Federal Reserve Board. Bank holding companies are subject to capital adequacy requirements of the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended, and the regulations of the Federal Reserve Board. Heritage Bank is a federally insured institution and thereby is subject to the capital requirements established by the FDIC. The Federal Reserve Board capital requirements generally parallel the FDIC requirements. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements and operations. Management believes the Company and Bank meet all capital adequacy requirement to which they are subject.

Pursuant to minimum capital requirements of the FDIC, Heritage Bank is required to maintain a leverage ratio (Tier 1 capital to average assets ratio) of 4% and risk-based capital ratios of Tier 1 capital and total capital (to total risk-weighted assets) of 4% and 8%, respectively. As of September 30, 2013 and December 31, 2012, the most recent regulatory notifications categorized Heritage Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the Bank's categories as of the date of this report.

On June 19, 2013, the Company merged its two subsidiary banks, Heritage Bank and Central Valley Bank, with Central Valley Bank being merged into Heritage Bank. Therefore, the tables below do not show the capital ratios for Central Valley Bank at September 30, 2013.

Table of Contents

	Minimum Requirements		Well-Capitalized Requirements		Actual		
	\$	%	\$	%	\$	%	
(Dollars in thousands)							
As of September 30, 2013:							
The Company consolidated							
Tier 1 leverage capital to average assets	\$64,189	4.0	% N/A	N/A	\$186,150	11.6	%
Tier 1 capital to risk-weighted assets	48,153	4.0	N/A	N/A	186,150	15.5	
Total capital to risk-weighted assets	96,307	8.0	N/A	N/A	201,367	16.7	
Heritage Bank							
Tier 1 leverage capital to average assets	64,192	4.0	80,240	5.0	180,483	11.3	
Tier 1 capital to risk-weighted assets	48,130	4.0	72,196	6.0	180,483	15.0	
Total capital to risk-weighted assets	96,261	8.0	120,326	10.0	195,696	16.3	
As of December 31, 2012:							
The Company consolidated							
Tier 1 leverage capital to average assets	\$53,756	4.0	% N/A	N/A	\$183,099	13.6	%
Tier 1 capital to risk-weighted assets	39,232	4.0	N/A	N/A	183,099	18.7	
Total capital to risk-weighted assets	78,464	8.0	N/A	N/A	195,561	19.9	
Heritage Bank							
Tier 1 leverage capital to average assets	47,112	4.0	58,890	5.0	149,613	12.7	
Tier 1 capital to risk-weighted assets	34,121	4.0	51,181	6.0	149,613	17.5	
Total capital to risk-weighted assets	68,241	8.0	85,302	10.0	160,457	18.8	
Central Valley Bank							
Tier 1 leverage capital to average assets	6,632	4.0	8,289	5.0	16,953	10.2	
Tier 1 capital to risk-weighted assets	5,081	4.0	7,622	6.0	16,953	13.4	
Total capital to risk-weighted assets	10,162	8.0	12,703	10.0	18,562	14.6	

In July 2013, the Federal banking regulators approved a final rule to implement the revised capital adequacy standards of the Basel Committee on Banking Supervision, commonly called Basel III, and to address relevant provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). The final rule strengthens the definition of regulatory capital, increases risk-based capital requirements, makes selected changes to the calculation of risk-weighted assets, and adjusts the prompt corrective action thresholds. Community banking organizations, such as

the Company and the Bank, become subject to the new rule on January 1, 2015 and certain provisions of the new rule will be phased in over the period of 2015 through 2019. The final rule:

Permits banking organizations that had less than \$15 billion in total consolidated assets as of December 31, 2009, or were mutual holding companies as of May 19, 2010, to include in Tier 1 capital trust preferred securities and cumulative perpetual preferred stock that were issued and included in Tier 1 capital prior to May 19, 2010, subject to a limit of 25% of Tier 1 capital elements, excluding any non-

Table of Contents

qualifying capital instruments and after all regulatory capital deductions and adjustments have been applied to Tier 1 capital.

Establishes new qualifying criteria for regulatory capital, including new limitations on the inclusion of deferred tax assets and mortgage servicing rights.

- Requires a minimum ratio of common equity Tier 1 capital to risk-weighted assets of 4.5%.
- Increases the minimum Tier 1 capital to risk-weighted assets ratio requirement from 4% to 6%.
- Retains the minimum total capital to risk-weighted assets ratio requirement of 8%.

Establishes a minimum leverage ratio requirement of 4%.

Retains the existing regulatory capital framework for 1-4 family residential mortgage exposures.

Permits banking organizations that are not subject to the advanced approaches rule, such as the Company and the Bank, to retain, through a one-time election, the existing treatment for most accumulated other comprehensive income, such that unrealized gains and losses on securities available for sale will not affect regulatory capital amounts and ratios.

Implements a new capital conservation buffer requirement for a banking organization to maintain a common equity capital ratio more than 2.5% above the minimum common equity Tier 1 capital, Tier 1 capital and total risk-based capital ratios in order to avoid limitations on capital distributions, including dividend payments, and certain discretionary bonus payments. The capital conservation buffer requirement will be phased in beginning on January 1, 2016 at 0.625% and will be fully phased in at 2.50% by January 1, 2019. A banking organization with a buffer of less than the required amount would be subject to increasingly stringent limitations on such distributions and payments as the buffer approaches zero. The new rule also generally prohibits a banking organization from making such distributions or payments during any quarter if its eligible retained income is negative and its capital conservation buffer ratio was 2.5% or less at the end of the previous quarter. The eligible retained income of a banking organization is defined as its net income for the four calendar quarters preceding the current calendar quarter, based on the organization's quarterly regulatory reports, net of any distributions and associated tax effects not already reflected in net income.

Increases capital requirements for past-due loans, high volatility commercial real estate exposures, and certain short-term commitments and securitization exposures.

- Expands the recognition of collateral and guarantors in determining risk-weighted assets.

Removes references to credit ratings consistent with the Dodd Frank Act and establishes due diligence requirements for securitization exposures.

The Company's management is currently evaluating the provisions of the final rule and their expected impact on the Company.

Quarterly, the Company reviews the potential payment of cash dividends to its common shareholders. The timing and amount of cash dividends paid on our common stock depends on the Company's earnings, capital requirements, financial condition and other relevant factors. Dividends on common stock from the Company depend substantially upon receipt of dividends from the Bank, which are the Company's predominant sources of income. On July 23, 2013, the Company's Board of Directors declared a regular cash dividend of \$0.08 per share and a special cash dividend of \$0.10 per share both payable on August 15, 2013, to shareholders of record on August 6, 2013. On October 23, 2013, the Company's Board of Directors declared a regular cash dividend of \$0.08 per share payable on November 15, 2013, to shareholders of record on November 5, 2013.

Table of Contents

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Our results of operations are highly dependent upon our ability to manage interest rate risk. We consider interest rate risk to be a significant market risk that could have a material effect on our financial condition and results of operations. Interest rate risk is measured and assessed on a quarterly basis. In our opinion, there has not been a material change in our interest rate risk exposure since the information disclosed in our Annual Report on Form 10-K for the year ended December 31, 2012.

We do not maintain a trading account for any class of financial instrument nor do we engage in hedging activities or purchase high-risk derivative instruments. Moreover, we have no material foreign currency exchange rate risk or commodity price risk.

ITEM 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

An evaluation of the Company's disclosure controls and procedure (as defined in Section 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934 (the "Act")) was carried out under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and the Company's Disclosure Committee as of the end of the period covered by this quarterly report. In designing and evaluating the Company's disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Based on their evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures as of September 30, 2013 are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Act) that occurred during the nine months ended September 30, 2013, that have materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting. The Company does not expect that its internal control over financial reporting will prevent all error and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is a party to certain legal proceedings incidental to its business. Management believes that the outcome of such currently pending proceedings, in the aggregate, will not have a material effect on our consolidated financial condition or results of operations.

Table of Contents

Item 1A. Risk Factors

There have been no material changes to the risk factors set forth in Part I. Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company has had various stock repurchase programs since March 1999. On August 30, 2012, the Board of Directors approved the Company's tenth stock repurchase plan, authorizing the repurchase of up to 5% of the Company's outstanding shares of common stock, or approximately 757,000 shares. During the three and nine months ended September 30, 2013, the Company repurchased 544,000 shares at an average purchase price of \$15.88 per share under this tenth plan. In total, the Company has repurchased 596,900 shares at an average price of \$15.70 per share under this tenth plan. The Company repurchased 490 and 12,809 shares at an average price of \$16.01 and \$14.24 to pay withholding taxes on restricted stock that vested during the three and nine months ended September 30, 2013, respectively.

The following table sets forth information about the Company's purchases of its outstanding common stock during the quarter ended September 30, 2013.

Period	Total Number of Shares Purchased(1)	Average Price Paid Per Share(1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1, 2013 – July 31, 2013	345,100	\$ 15.95	7,205,348	160,100
August 1, 2013 – August 31, 2013	199,356	15.66	7,205,348	160,100
September 1, 2013 – September 30, 2013	34	15.92	7,205,348	160,100
Total	544,490	\$ 15.84	7,205,348	160,100
