Monmouth Real Estate Investment Corporation, a Maryland corporation, together with its consolidated subsidiaries (MREIC, the Company, or we), operates as a real estate investment trust (REIT) deriving its income primarily from real estate rental operations. The Company has elected to be taxed as a REIT under Sections 856-860 of the Internal Revenue Code (the Code), and intends to maintain its qualification as a REIT in the future. As a qualified REIT, with limited exceptions, the Company will not be taxed under Federal and certain state income tax laws at the corporate level on taxable income that it distributes to its shareholders. For special tax provisions applicable to REITs, refer to Sections 856-860 of the Code. The Company is subject to franchise taxes in several of the states in which the Company owns property.

The interim Consolidated Financial Statements furnished herein have been prepared in accordance with Accounting Principles Generally Accepted in the United States of America (U.S. GAAP) applicable to interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2015 are not necessarily indicative of the results that may be expected for the year ending September 30, 2016. For further information, refer to the Consolidated Financial Statements and footnotes thereto included in the Company's annual report on Form 10-K for the fiscal year ended September 30, 2015.

Use of Estimates

In preparing the financial statements in accordance with U.S. GAAP, management is required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods and related disclosure of contingent assets and liabilities. Actual results could differ from these estimates and assumptions.

#### Reclassification

Certain prior period amounts in the accompanying Consolidated Financial Statements have been reclassified to conform to the current period's presentation.

#### Lease Termination Income

Lease Termination Income is recognized in operating revenues when there is a signed termination agreement, all of the conditions of the agreement have been met, the tenant is no longer occupying the property and the termination consideration is probable of collection. Lease termination amounts are paid by tenants who want to terminate their lease obligations before the end of the contractual term of the lease by agreement with the Company.

## Table of Contents

During the three months ended December 31, 2014, the Company entered into a lease termination agreement with its tenant, Norton McNaughton of Squire, Inc. (Norton), whereby the Company received a lease termination fee of \$238,625 in December 2014, terminating the lease effective January 31, 2015. Prior to the lease termination, Norton was leasing the Company's 302,400 square foot building located in its Hanahan, SC location through April 29, 2015 at an annualized rent of approximately \$1,389,000, or \$4.54 per square foot. Prior to the lease termination, Norton sub-leased the Company's space to Science Applications International Corporation (SAIC). In conjunction with the lease termination, the Company simultaneously entered into a lease agreement for four years and three months with SAIC from February 1, 2015 through April 30, 2019 at an initial annualized rent of approximately \$1,406,000, or \$4.65 per square foot, with 2% increases each year.

The Company's lease with its tenant, Graybar Electric Company (Graybar), at its 26,340 square foot building located in Ridgeland (Jackson), MS has an early termination option which may be exercised at any time on the condition that the Company is provided with six months of notice. The Company has not received notice nor does the Company anticipate that this tenant will exercise its early termination option. Annual rent on both the U.S. GAAP straight-line rent basis and on the cash basis for this location is \$109,275, or \$4.15 per square foot and the lease expires in July 2019.

The Company's lease with its tenant, CHEP USA, Inc. (CHEP), at its 83,000 square foot building located in Roanoke, VA has an early termination option which may be exercised after August 2021, on the condition that the Company is provided with six months of notice and CHEP pays the Company a \$500,000 termination fee. The U.S. GAAP straight-line rent per annum for this location is approximately \$494,000, or \$5.94 per square foot and the cash basis is approximately \$463,800 or \$5.54 per square foot, and the lease expires in February 2025.

The Company's lease with its tenant, Pittsburgh Glass Works, LLC (PGW), at its 102,135 square foot building located in O'Fallon (St. Louis), MO has an early termination option which may be exercised after January 1, 2016 but before December 31, 2016, on the condition that the Company is provided with six months of notice and PGW pays the Company a \$213,462 termination fee. The Company has not received notice nor does the Company anticipate that this tenant will exercise its early termination option. Additionally, PGW has an early termination option which may be exercised after January 1, 2017, on the condition that the Company is provided with six months of notice and PGW pays the Company a \$106,731 termination fee. Other than the Company's leases with Graybar, CHEP and PGW, the Company does not have any other leases that contain an early termination option.

## Stock Compensation Plan

The Company has a Stock Option and Stock Award Plan, adopted in 2007 and amended and restated in 2010 (the 2007 Plan), authorizing the grant to officers and key employees of options to purchase up to 1,500,000 shares of common stock including up to 100,000 shares of restricted stock awarded to any one participant in any one fiscal year.

The Company accounts for awards of stock options and restricted stock in accordance with ASC 718-10, Compensation-Stock Compensation. ASC 718-10 requires that compensation cost for all stock awards be calculated and amortized over the service period (generally equal to the vesting period). The compensation cost for stock option grants is determined using option pricing models, intended to estimate the fair value of the awards at the grant date less estimated forfeitures. The compensation expense for restricted stock is recognized based on the fair value of the restricted stock awards less estimated forfeitures. The fair value of restricted stock awards is equal to the fair value of the Company's stock on the grant date. The amortization of compensation costs for stock options grants and restricted stock are included in General and Administrative Expenses in the accompanying Consolidated Statements of Income and amounted to \$104,961 and \$90,232 for the three months ended December 31, 2015 and 2014, respectively.

## Table of Contents

During the three months ended December 31, 2015, no shares of restricted stock were granted under the Company's 2007 Plan. During the three months ended December 31, 2015, four participants exercised options to purchase an aggregate of 115,000 shares of common stock at a weighted average exercise price of \$8.04 per share for total proceeds of \$924,300. As of December 31, 2015, a total of 546,646 shares were available to grant as stock options or as restricted stock and there were outstanding options to purchase 520,000 shares under the 2007 Plan. The aggregate intrinsic value of options outstanding as of December 31, 2015 was \$896,750 and the aggregate intrinsic value of options exercised during the three months ended December 31, 2015 was \$272,300.

## Recent Accounting Pronouncements

In January 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-01, "Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities," requires equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income, requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset, and eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. These changes become effective for the Company's fiscal year beginning October 1, 2018. Early application is permitted. The Company is currently in the process of evaluating the impact of the adoption on its consolidated financial statements and has not determined the effects of this update on the Company's financial position, results of operations or cash flows and disclosures at this time.

In September 2015, the FASB issued Accounting Standards Update ("ASU") 2015-16: Simplifying the Accounting for Measurement-Period Adjustments ("ASU 2015-16"), which eliminates the requirement to restate prior period financial statements for measurement period adjustments. The new guidance requires that the cumulative impact of a measurement period adjustment (including the impact on prior periods) be recognized in the reporting period in which the adjustment is identified. ASU 2015-16 is effective for interim and annual periods beginning after December 15, 2015. Early adoption is permitted. The Company does not expect the adoption of ASU 2015-16 to have a material effect on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest - Imputation of Interest (Topic 835): Simplifying the Presentation of Debt Issuance Costs ("ASU 2015-03"). The amendments in ASU 2015-03 require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. The amendments in ASU 2015-03 are effective for fiscal years beginning after December 15, 2015. Early adoption is permitted. In August 2015, the FASB issued ASU 2015-15: Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements ("ASU 2015-15") providing guidance regarding the presentation and subsequent measurement of debt issuance costs related to line-of-credit arrangements. Given the absence of authoritative guidance on this matter, the

SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on that line-of-credit arrangement. The Company is currently in the process of evaluating the impact the adoption of ASU 2015-03 and ASU 2015-15 will have on the Company's financial position or results of operations.

Table of Contents

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis (“ASU 2015-02”). ASU 2015-02 focuses to minimize situations under previously existing guidance in which a reporting entity was required to consolidate another legal entity in which that reporting entity did not have: (1) the ability through contractual rights to act primarily on its own behalf; (2) ownership of the majority of the legal entity’s voting rights; or (3) the exposure to a majority of the legal entity’s economic benefits. ASU 2015-02 affects reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. ASU 2015-02 will be effective for periods beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. The Company does not expect the adoption of ASU 2015-02 to have a material effect on the Company’s consolidated financial statements.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying Consolidated Financial Statements.

Segment Reporting

The Company’s primary business is the ownership, management, and expansion of real estate properties of well-located, modern industrial buildings leased primarily to investment grade tenants or their subsidiaries on long-term net leases. The Company reviews operating and financial information for each property on an individual basis and therefore, each property represents an individual operating segment. The Company evaluates financial performance using Net Operating Income (“NOI”) from property operations. NOI is defined as recurring Rental and Reimbursement Revenue, less Real Estate Taxes and Operating Expenses, such as insurance, utilities and repairs and maintenance. The Company has aggregated the properties into one reportable segment as the properties share similar long-term economic characteristics and have other similarities including the fact that they are operated as industrial properties subject to long-term net leases primarily to investment grade tenants or their subsidiaries.

NOTE 2 – NET INCOME PER SHARE

Basic Net Income per Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding during the period. Diluted Net Income per Common Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding plus the weighted-average number of net shares that would be issued upon exercise of stock options pursuant to the treasury stock method.

In addition, common stock equivalents of 81,902 and 156,401 shares are included in the diluted weighted average shares outstanding for the three months ended December 31, 2015 and 2014, respectively. Table of Contents

In addition to the Company's investments in Securities Available for Sale at Fair Value, the Company is required to disclose certain information about fair values of its other financial instruments. Estimates of fair value are made at a specific point in time based upon, where available, relevant market prices and information about the financial instrument. Such estimates do not include any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. For a portion of the Company's other financial instruments, no quoted market value exists. Therefore, estimates of fair value are necessarily based on a number of significant assumptions (many of which involve events outside the control of management). Such assumptions include assessments of current economic conditions, perceived risks associated with these financial instruments and their counterparties; future expected loss experience and other factors. Given the uncertainties surrounding these assumptions, the reported fair values represent estimates only, and therefore cannot be compared to the historical accounting model. The use of different assumptions or methodologies is likely to result in significantly different fair value estimates.

The fair value of Cash and Cash Equivalents approximates their current carrying amounts since all such items are short-term in nature. The fair value of variable rate Loans Payable approximates their current carrying amounts since such amounts payable are at approximately a weighted-average current market rate of interest. The estimated fair value of fixed rate mortgage notes payable is based on discounting the future cash flows at a year-end risk adjusted borrowing rate currently available to the Company for issuance of debt with similar terms and remaining maturities. These fair value measurements fall within level 2 of the fair value hierarchy. At December 31, 2015, the fixed rate Mortgage Notes Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to \$410,681,000 and the carrying value amounted to \$400,720,157. At December 31, 2015 the fixed rate Loans Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to \$5,008,000 and the carrying value amounted to \$4,979,502. When the Company acquires a property, it is required to fair value all of the assets and liabilities, including intangible assets and liabilities, relating to the properties acquired lease (See Note 3). Those fair value measurements fall within level 3 of the fair value hierarchy.

NOTE 8 – SUPPLEMENTAL CASH FLOW INFORMATION

Total expansion costs are expected to be approximately \$18,417,000 and will add approximately 312,000 additional rentable square feet. Approximately 246,000 square feet, or 79%, will be leased to Milwaukee Electric Tool Corporation (“Milwaukee Tool”) and the remaining 66,000 square feet, or 21%, will be leased to FedEx Ground Package System, Inc. Upon completion of the four expansions, annual rent will be increased by approximately \$1,705,000. Each property being expanded will provide for a new lease extension from the date of completion. Three of the expansions will provide for an additional ten years of term and the remaining one expansion leased to Milwaukee Tool will provide for an additional twelve years of term.

Approximately 80% of the additional square feet from the nine purchase commitments and the three buildings committed to be expanded are from properties leased to FedEx Ground Package System, Inc.

The initial annual rent of \$469,160, representing \$3.17 per square foot, will commence on March 1, 2016 with 2.5% annual increases thereafter.

During October 2015, the Company entered into a 5.25 year lease agreement for its previously vacant 106,507 square foot building located in Winston-Salem, NC through March 31, 2021. Interest Expense increased \$982,715, or 24%, for the three months ended December 31, 2015 as compared to the three months ended December 31, 2014. This increase is primarily due to an increase in the average balance of Mortgage Notes Payable due to the newly acquired properties in fiscal 2015 and 2016 and an increase in Loans Payable due to an increase in the amount drawn down on the Company's line of credit facility which was offset by a decrease in the weighted average interest rate. The weighted average interest rate of Mortgage Notes Payable and Loans Payable has decreased from 4.97% at December 31, 2014 to 4.28% at December 31, 2015, representing a decrease of 69 basis points.

## Funds From Operations and Core Funds From Operations

We assess and measure our overall operating results based upon an industry performance measure referred to as Funds From Operations (FFO), which management believes is a useful indicator of our operating performance. FFO is used by industry analysts and investors as a supplemental operating performance measure of a REIT. FFO, as defined by The National Association of Real Estate Investment Trusts (NAREIT), represents net income (loss) attributable to common shareholders, as defined by accounting principles generally accepted in the United States of America (U.S. GAAP), excluding extraordinary items, as defined under U.S. GAAP, gains or losses from sales of previously depreciated real estate assets, impairment charges related to depreciable real estate assets, plus certain non-cash items such as real estate asset depreciation and amortization. NAREIT created FFO as a non-U.S. GAAP supplemental measure of REIT operating performance. We define Core Funds From Operations (Core FFO) as FFO, excluding acquisition costs. We define Adjusted Funds from Operations (AFFO) as Core FFO, excluding stock compensation expense, depreciation of corporate office tenant improvements, amortization of financing costs, lease termination

income, net gain or loss on sale of securities transactions, U.S. GAAP straight-line rent adjustments and less recurring capital expenditures. We define recurring capital expenditures as all capital expenditures, excluding capital expenditures related to expansions at our current locations or capital expenditures that are incurred in conjunction with obtaining a new lease or a lease renewal. We believe that, as widely recognized measures of performance used by other REITs, FFO, Core FFO and AFFO may be considered by investors as supplemental measures to compare our operating performance to those of other REITs. FFO, Core FFO and AFFO exclude historical cost depreciation as an expense and may facilitate the comparison of REITs which have a different cost basis. The items excluded from FFO, Core FFO and AFFO are significant components in understanding the Company's financial performance.

FFO, Core FFO and AFFO (i) do not represent Cash Flow from Operations as defined by U.S. GAAP; (ii) should not be considered as an alternative to Net Income as a measure of operating performance or to Cash Flows from Operating, Investing and Financing Activities; and (iii) are not an alternative to cash flow as a measure of liquidity. FFO, Core FFO and AFFO, as calculated by the Company, may not be comparable to similarly titled measures reported by other REITs.
