Supplemental disclosures of non-cash investing activities:

During the three months ended March 31, 2016 and 2015, liabilities of \$6,778 and \$169, respectively, were incurred but not paid in connection with our purchase of aircraft and engines.

During the three months ended March 31, 2016 and 2015, engines and equipment totaling \$12,806 and \$86, respectively, were transferred from Held for Operating Lease to Held for Sale

During the three months ended March 31, 2016, an aircraft of \$2,925 was transferred from Property, equipment and furnishings to Assets Held for Lease.

See accompanying notes to the unaudited consolidated financial statements.

Table of Contents

Notes to Unaudited Consolidated Financial Statements

1. Summary of Significant Accounting Policies

(a) Basis of Presentation:

Our unaudited consolidated financial statements include the accounts of Willis Lease Finance Corporation and its subsidiaries (“we” or the “Company”) and have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for reporting on Form 10-Q. Pursuant to such rules and regulations, certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto, together with Management’s Discussion and Analysis of Financial Condition and Results of Operations, contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of only normal and recurring adjustments) necessary to present fairly our financial position as of March 31, 2016 and December 31, 2015, and the results of our operations for the three months ended March 31, 2016 and 2015, and our cash flows for the three months ended March 31, 2016 and 2015. The results of operations and cash flows for the period ended March 31, 2016 are not necessarily indicative of the results of operations or cash flows which may be reported for the remainder of 2016.

(b) Principals of Consolidation:

We evaluate all entities in which we have an economic interest firstly to determine whether for accounting purposes the entity is a variable interest entity or voting interest entity. If the entity is a variable interest entity we consolidate the financial statements of that entity if we are the primary beneficiary of the entities’ activities. If the entity is a voting interest entity we consolidate the entity when we have a majority of voting interests. All inter-company balances are eliminated upon consolidation.

(c) Fair Value Measurements:

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs, to the extent possible. We use a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, to measure fair value which are the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Table of Contents

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

We determine fair value of long-lived assets held and used, such as Equipment held for operating lease and Equipment held for sale, by reference to independent appraisals, quoted market prices (e.g. an offer to purchase) and other factors. An impairment charge is recorded when the carrying value of the asset exceeds its fair value.

The following table shows by level, within the fair value hierarchy, the Company's assets measured at fair value on a nonrecurring basis during the three months ended March 31, 2016 and 2015, and the gains (losses) recorded during the three months ended March 31, 2016 and 2015 on those assets:

	Assets at Fair Value								Total Losses	
	March 31, 2016				March 31, 2015				Three Months Ended	
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	2016	2015
Equipment held for sale	\$ 3,307	\$ —	\$ 3,307	\$ —	\$ —	\$ —	\$ —	\$ —	\$ (2,036)	\$ (24)

At March 31, 2016, the Company used Level 2 inputs to measure equipment held for sale. Level 2 inputs include quoted prices for similar assets in inactive markets.

An impairment charge is recorded when the carrying value of the asset exceeds its fair value. A write-down of equipment totaling \$2.0 million was recorded in the three months ended March 31, 2016 due to a management decision to consign one engine for part-out and sale, in which the asset's net book value exceeded the estimated proceeds. A write-down of equipment totaling \$24,000 was recorded in the three months ended March 31, 2015 to decrease the book value to zero for certain parts arising from part-out of an engine that will not be sold.

(d) Reclassifications:

Reclassifications have been made to our consolidated financial statements for the prior periods to conform to classifications used during the three months ended March 31, 2016.

(e) Foreign Currency Translation:

The Company's foreign investments have been converted at rates of exchange at March 31, 2016. The changes in exchange rates in our foreign investments reported under the equity method are included in stockholders' equity as accumulated other comprehensive income.

(f) Recent Accounting Pronouncements:

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The updated guidance changes how companies account for certain aspects of share-based payment awards to employees, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The update to the standard is effective for the Company beginning January 1, 2017, with early application permitted. The Company is currently evaluating the impact the guidance will have on the Consolidated Financial Statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases" (topic 842). Under the new standard, the accounting for leases by lessors would basically remain unchanged from the existing concepts in ASC 840, Leases. In addition, FASB has decided that lessors would be precluded from recognizing selling profit and revenue at lease commencement for any sales-type or direct finance lease that does not transfer control of the underlying asset to the lessee. The standard will be effective for public business entities for annual periods (including interim periods),

Table of Contents

beginning after December 15, 2018, and early adoption will be permitted. The Company is currently evaluating the potential impact the adoption of the standard will have on its consolidated financial condition, results of operations or cash flows.

In July 2015, the FASB issued ASU 2015-11, Simplifying the Measurement of Inventory, which simplifies the measurement of inventory by requiring certain inventory to be measured at the lower of cost or net realizable value. The amendments in this ASU are effective for fiscal years beginning after December 15, 2016 and for interim periods therein. We are evaluating the impact that this new guidance will have on our consolidated financial position.

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs". ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with the accounting treatment for debt discounts. We have adopted ASU 2015-03 during the three-month period ended March 31, 2016. Other assets and Long-term debt, net of discount have been restated as of December 31, 2015 to reflect the retroactive reclassification of \$12.6 million of debt issuance costs that have been reclassified from Other assets to Notes payable.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which supersedes previous revenue recognition guidance. The new standard requires that a company recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration the company expects to receive in exchange for those goods or services. Companies will need to use more judgment and estimates than under the guidance currently in effect, including estimating the amount of variable revenue to recognize over each identified performance obligation. Additional disclosures will be required to help users of financial statements understand the nature, amount and timing of revenue and cash flows arising from contracts. In July 2015, the FASB deferred the effective date for annual reporting periods beginning after December 15, 2017 (including interim reporting periods within those periods). Early adoption is permitted to the original effective date of December 15, 2016 (including interim reporting periods within those periods). The amendments may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. The Company is currently evaluating the impact of adopting this new guidance on the consolidated financial statements.

2. Management Estimates

These financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States.

The preparation of consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to residual values, estimated asset lives, impairments and bad debts. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes that the accounting policies on revenue recognition, maintenance reserves and expenditures, useful life of equipment, asset residual values, asset impairment and allowance for doubtful accounts are critical to the results of operations.

If the useful lives or residual values are lower than those estimated by us, upon sale of the asset a loss may be realized. Significant management judgment is required in the forecasting of future operating results, which are

Table of Contents

used in the preparation of projected undiscounted cash-flows and should different conditions prevail, material impairment write-downs may occur.

3. Investments

On May 25, 2011, we entered into an agreement with Mitsui & Co., Ltd. to participate in a joint venture formed as a Dublin-based Irish limited company — Willis Mitsui & Company Engine Support Limited (“WMES”) for the purpose of acquiring and leasing jet engines. Each partner holds a fifty percent interest in the joint venture and the Company uses the equity method in recording investment activity. The Company made \$4.6 million of capital contributions to WMES, received \$1.2 million in distributions and recorded \$1.2 million as deferred gain as a result of the Company selling four engines to WMES during the three months ended March 31, 2016.

On June 3, 2014 we entered into an agreement with China Aviation Supplies Import & Export Corporation Limited (“CASC”) to participate in a joint venture named CASC Willis Engine Lease Company Limited (“CASC Willis”), a new joint venture based in Shanghai, China. Each partner holds a fifty percent interest in the joint venture and the Company uses the equity method in recording investment activity. In October 2014, each partner made a \$15.0 million initial capital contribution representing the up-front funding for the new joint venture. The new company will acquire and lease jet engines to Chinese airlines and will concentrate on meeting the fast growing demand for leased commercial aircraft engines and aviation assets in the People’s Republic of China. The investment has been reduced to \$13.7 million as of March 31, 2016 as a result of a foreign currency translation adjustment of \$0.4 million partially offset by the Company’s share of CASC Willis reported income of \$0.1 million during the three months ended March 31, 2016.

Three Months Ended March 31, 2016	WMES	CASC	Total
	(in thousands)		
Investment in joint ventures as of December 31, 2015	\$ 27,272	\$ 14,023	\$ 41,295
Capital contribution	4,610	—	4,610
Earnings from joint venture	60	127	187
Deferred gain on engine sale	(1,212)	—	(1,212)
Distribution	(1,167)	—	(1,167)
Foreign Currency Translation Adjustment	—	(441)	(441)
Investment in joint ventures as of March 31, 2016	\$ 29,563	\$ 13,709	\$ 43,272

“Other revenue” on the Consolidated Statement of Income includes management fees earned of \$0.6 million and \$0.4 million during the three months ended March 31, 2016 and 2015, respectively, related to the servicing of engines for the WMES lease portfolio. “Gain on sale of equipment” on the Consolidated Statement of Income includes \$1.2 million for the three months ended March 31, 2016 related to the sale of four engines to WMES for \$46.1 million. As 50% owners of WMES, we deferred the \$1.2 million gain to our investment which will be amortized over a 15-year period to a 55% residual value.

Table of Contents

4. Notes Payable

Notes payable consisted of the following:

March 31, December 31,

Edgar Filing: WILLIS LEASE FINANCE CORP - Form 10-Q

	2016	2015
	(in thousands)	
Credit facility at a floating rate of interest of LIBOR plus 2.75%, secured by engines. The facility has a committed amount of \$700.0 million at March 31, 2016, which revolves until the maturity date of June 2019.	\$ 539,000	\$ 549,000
WEST II Series 2012-A term notes payable at a fixed rate of interest of 5.50%, maturing in September 2037. Secured by engines.	294,337	300,467
Note payable at fixed interest rates ranging from 2.60% to 2.97%, maturing in July 2024. Secured by an aircraft.	15,719	16,135
Note payable at a variable interest rate of LIBOR plus 2.25%, maturing in January 2018. Secured by engines.	12,739	13,082
Notes payable	861,795	878,684
Less: unamortized debt issuance costs	(11,764)	(12,595)
Total notes payable	\$ 850,031	\$ 866,089

At March 31, 2016 , we had a revolving credit facility to finance the acquisition of aircraft engines for lease as well as for general working capital purposes. On April 20, 2016 we entered into a Third Amended and Restated Credit Agreement which increased the revolving credit facility to \$890.0 million from \$700.0 million and extended the term to April 2021. This \$890 million revolving credit facility has an accordion feature up to \$1 billion. The

Table of Contents

initial interest rate on the facility is LIBOR plus 2.75%. Quarterly, the interest rate is adjusted based on the Company's leverage ratio, as calculated under the terms of the revolving credit facility.

For further information on our debt instruments, see the "Notes Payable" note in Part II, Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2015.

The following is a summary of the aggregate maturities of our long-term debt at March 31, 2016:

Year	(in thousands)
2016	\$ 17,091
2017	23,624
2018	33,294
2019	562,430
2020	23,031
Thereafter	202,325
	\$ 861,795

5. Stock-Based Compensation Plans

Our 2007 Stock Incentive Plan (the 2007 Plan) was adopted on May 24, 2007. Under this 2007 Plan, a total of 2,000,000 shares are authorized for stock based compensation available in the form of either restricted stock or stock options. On May 28, 2015, the Company's shareholders authorized an increase in the number of shares of Common Stock available for grant by 800,000 shares bringing the total to 2,800,000 shares authorized. 2,371,962 shares of restricted stock were granted under the 2007 Stock Incentive Plan by March 31, 2016. Of this amount, 152,534 shares of restricted stock were cancelled and returned to the pool of shares which could be granted under the 2007 Stock Incentive Plan resulting in a net number of 580,572 shares which were available as of March 31, 2016 for future issuance under the 2007 Incentive Plan. The fair value of the restricted stock awards equaled the stock price at the date

of grants. The following table summarizes restricted stock activity during the year ended December 31, 2015 and the three months ended March 31, 2016.

	Shares
Restricted stock at December 31, 2014	525,356
Granted in 2015 (vesting over 3 years)	125,000
Granted in 2015 (vesting over 4 years)	5,000
Granted in 2015 (vesting on first anniversary from date of issuance)	16,440
Vested in 2015	(275,201)
Restricted stock at December 31, 2015	396,595
Granted in 2016 (vesting over 2 years)	20,000
Granted in 2016 (vesting over 3 years)	75,000
Granted in 2016 (vesting over 4 years)	13,250
Vested in 2016	(61,083)
Cancelled in 2016	(17,166)
Restricted stock at March 31, 2016	426,596

All cancelled shares have reverted to the share reserve and are available for issuance at a later date, in accordance with the 2007 Plan.

Our accounting policy is to recognize the associated expense of such awards on a straight-line basis over the vesting period. At March 31, 2016, the stock compensation expense related to the restricted stock awards that will be recognized over the average remaining vesting period of 2.0 years totals \$5.9 million. At March 31, 2016, the intrinsic value of unvested restricted stock awards is \$9.2 million. The 2007 Plan terminates on May 24, 2017.

Table of Contents

6. Income Taxes

Income tax expense for the three months ended March 31, 2016 and March 31, 2015 was \$2.9 million and \$1.4 million, respectively. The effective tax rates for the three months ended March 31, 2016 and March 31, 2015 were 43.7% and 38.5%, respectively. The increase was primarily due to the impact of the IRS code 162(m) calculation for executive compensation for the three months ended March 31, 2016.

The Company records tax expense or benefit for unusual or infrequent items discretely in the period in which they occur. Our tax rate is subject to change based on changes in the mix of assets leased to domestic and foreign lessees, the proportions of revenue generated within and outside of California, the amount of executive compensation exceeding \$1.0 million as defined in IRS code 162(m) and numerous other factors, including changes in tax law.

7. Fair Value of Financial Instruments

The carrying amount reported in the consolidated balance sheets for cash and cash equivalents, restricted cash, operating lease related receivable and accounts payable approximates fair value because of the immediate or short-term maturity of these financial instruments.

The carrying amount of the Company's outstanding balance on its Notes Payable as of March 31, 2016 and December 31, 2015 was estimated to have a fair value of approximately \$872.9 million and \$890.1 million, respectively, based on the fair value of estimated future payments calculated using the prevailing interest rates at each period end.

8. Operating Segments

The Company operates in two business segments: (i) Leasing and Related Operations which involves acquiring and leasing, primarily pursuant to operating leases, commercial aircraft, aircraft engines and other aircraft equipment and the selective purchase and resale of commercial aircraft engines and other aircraft equipment and (ii) Spare Parts Sales which involves the purchase and resale of after-market engine and airframe parts, whole engines, engine modules and portable aircraft components and leasing of engines destined for disassembly and sale of parts.

The Company evaluates the performance of each of the segments based on profit or loss after general and administrative expenses and inter-company allocation of interest expense. While the Company believes there are synergies between the two business segments, the segments are managed separately because each requires different

business strategies.

14

Table of Contents

The following tables present a summary of the operating segments (amounts in thousands):

For the three months ended March 31, 2016	Leasing and		Eliminations (1)	Total
	Related Operations	Spare Parts Sales

operating segments

Total assets as of March 31, 2016	\$ 1,252,992	\$ 24,468	\$ —	\$ 1,277,460
Total assets as of December 31, 2015	\$ 1,269,396	\$ 26,586	\$ —	\$ 1,295,982

9. Subsequent Events

On April 20, 2016 we entered into a Third Amended and Restated Credit Agreement which increased the revolving credit facility to \$890.0 million from \$700.0 million and extended the term to April 2021. This \$890 million revolving credit facility has an accordion feature up to \$1 billion. The initial interest rate on the facility is LIBOR plus 2.75%. Quarterly, the interest rate is adjusted based on the Company's leverage ratio, as calculated under the terms of the revolving credit facility.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Our core business is acquiring and leasing, primarily pursuant to operating leases, commercial aircraft engines and related aircraft equipment; and the selective purchase and sale of commercial aircraft engines (collectively "equipment"). In 2013, we launched Willis Aeronautical Services, Inc. ("Willis Aero"), a wholly-owned subsidiary, whose primary focus is the sale of aircraft engine parts and materials through the acquisition or consignment of aircraft and engines from third parties.

Critical Accounting Policies and Estimates

There have been no material changes to our critical accounting policies and estimates from the information provided in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates included in our 2015 Form 10-K.

Results of Operations

Three months ended March 31, 2016, compared to the three months ended March 31, 2015:

Lease Rent Revenue. Lease rent revenue for the three months ended March 31, 2016 increased 12.1% to \$28.1 million from the comparable period in 2015. This increase primarily reflects a higher average portfolio utilization in the current period, which translated into a higher amount of equipment on lease. The aggregate net book value of lease equipment at March 31, 2016 and 2015 was \$1,101.6 million and \$1,050.9 million, respectively, an increase of 4.8%. The average utilization for the three months ended March 31, 2016 and 2015 was 87% and 81%, respectively. At March 31, 2016 and 2015, approximately 90% and 83%, respectively, of equipment held for lease by book value was on lease.

During the three months ended March 31, 2016, we added \$42.1 million of equipment and capitalized costs to the lease portfolio. During the three months ended March 31, 2015, we added \$2.7 million of equipment and capitalized costs to the lease portfolio.

Maintenance Reserve Revenue. Our maintenance reserve revenue for the three months ended March 31, 2016 increased 11.8% to \$15.8 million from \$14.1 million for the comparable period in 2015. The increase was due to higher maintenance reserve revenues related to the termination of long term leases and higher maintenance reserves billed reflecting increased usage of engines under lease resulting from higher portfolio utilization in the three months ended March 31, 2016 than in the year ago period.

Spare Parts and Equipment Sales. Spare parts and equipment sales for the three months ended March 31, 2016 were \$2.6 million compared to \$2.2 million in the comparable period in 2015. The increase was due to the growth in spare parts sales due to an increase in inventory acquisitions.

Gain on Sale of Leased Equipment. During the three months ended March 31, 2016, we sold one airframe, six engines and other related equipment generating a net gain of \$3.0 million. During the three months ended March 31, 2015, we sold one engine and sold other related equipment generating a net gain of \$0.7 million.

Other Revenue. Our other revenue consists primarily of management fee income, lease administration fees and third party consignment commissions earned by Willis Aero. Other revenue increased to \$1.0 million from \$0.8 million for the comparable period in 2015 primarily due to an increase in fees earned related to engines managed on behalf of third parties.

Depreciation and Amortization Expense. Depreciation and amortization expense decreased 6.0% to \$16.6 million for the three months ended March 31, 2016 from \$17.7 million in the comparable period in 2015, due to

Table of Contents

certain engines becoming fully depreciated during the quarter. As of July 1, 2015, we adjusted the depreciation for certain older engine types. It is our policy to review estimates regularly to reflect the cost of equipment over the useful life of these engines. The 2015 change in depreciation estimate did not have a material impact on depreciation in the current period.

Cost of Spare Parts and Equipment Sales. Cost of spare parts and equipment sales was \$1.9 million for the three months ended March 31, 2016 compared to \$1.5 million for the comparable period in 2015. Gross margin on parts sales for the three months ended March 31, 2016 quarter was 26.6% compared to 31.2% for the comparable period in 2015 primarily due to a change in the mix of parts sold in 2016.

Write-down of Equipment. Write-down of equipment was \$2.0 million and \$0.0 million in the three months ended March 31, 2016 and 2015, respectively. A write-down of equipment totaling \$2.0 million was recorded in the three months ended March 31, 2016 due to a management decision to consign one engine for part-out and sale, in which the asset's net book value exceeded the estimated proceeds. A write-down of equipment totaling \$24,000 was recorded in the three months ended March 31, 2015 due to a management decision to consign an engine for part-out and sale, in which the asset's net book value exceeds the estimated proceeds from part-out.

General and Administrative Expenses. General and administrative expenses increased 17.8% to \$11.8 million for the three months ended March 31, 2016, from \$10.0 million in the comparable period in 2015, due primarily to increased legal expense (\$0.6 million), higher salary expense (\$0.5 million) due to increased head count, higher contingency bonus resulting from improved operating profits (\$0.4 million), and higher corporate aircraft expense (\$0.4 million).

Technical Expense. Technical expenses consist of the cost of engine repairs, engine thrust rental fees, outsourced technical support services, engine storage and freight costs. These expenses decreased 7.4% to \$1.7 million for the three months ended March 31, 2016 compared to the year ago period due to lower engine technical services expense (\$0.2 million) due to lower engine returns. This decrease was partially offset by higher maintenance costs (\$0.1 million) due to increased repair activity.

Net Finance Costs. Net finance costs increased 18.9% to \$10.0 million for the three months ended March 31, 2016, from \$8.4 million in the comparable period in 2015, due primarily to a gain on the extinguishment of debt of \$1.2 million recorded during the three months ended March 31, 2015 partially offset by higher average debt balances in the current quarter compared to the year ago period. The average notes payable balances at March 31, 2016 and 2015, were \$880.1 million and \$841.9 million, respectively, an increase of 4.5%. As of March 31, 2016, \$551.7 million of our debt is tied to one-month U.S. dollar LIBOR which increased from an average of 0.17% for the three months ended March 31, 2015 to an average of 0.43% for the three months ended March 31, 2016 (average of month-end rates). As of March 31, 2016 and 2015, one-month LIBOR was 0.43% and 0.18%, respectively.

Income Tax Expense. Income tax expense for the three months ended March 31, 2016 and 2015 was \$2.9 million and \$1.4 million, respectively. The effective tax rates for the three months ended March 31, 2016 and 2015 were 43.7% and 38.5%, respectively. This increase was due to the impact of the IRS code 162(m) calculation for executive compensation during the three months ended March 31, 2016.

The Company records tax expense or benefit for unusual or infrequent items discretely in the period in which they occur. Our tax rate is subject to change based on changes in the mix of assets leased to domestic and foreign lessees, the proportions of revenue generated within and outside of California, the amount of executive compensation exceeding \$1.0 million as defined in IRS code 162(m) and numerous other factors, including changes in tax law.

Liquidity and Capital Resources

We finance our growth through borrowings secured by our equipment lease portfolio. Cash of approximately \$20.0 million and \$31.0 million in the three-month periods ended March 31, 2016 and 2015, respectively, was

Table of Contents

derived from this activity. In these same time periods, \$36.9 million and \$28.6 million, respectively, was used to pay down related debt. Cash flow from operating activities was \$20.1 million and \$20.6 million in the three-month periods ended March 31, 2016 and 2015, respectively.

At March 31, 2016, \$4.7 million in cash and cash equivalents and restricted cash were held in foreign subsidiaries. We do not intend to repatriate the funds held in foreign subsidiaries to the United States. In the event that we decide to repatriate these funds to the United States, we would be required to accrue and pay taxes upon the repatriation.

Our primary use of funds is for the purchase of equipment for lease. Purchases of equipment (including capitalized costs) totaled \$44.4 million and \$17.9 million for the three-month periods ended March 31, 2016 and 2015, respectively.

Cash flows from operations are driven significantly by payments made under our lease agreements, which comprise lease rent revenue, security deposits and maintenance reserves, and are offset by net finance costs and general and administrative costs. Note that cash received from maintenance reserve arrangements for some of our engines on lease are restricted per our WEST II debt agreement. Cash from WEST II engine maintenance reserve payments, that can be used to fund future maintenance events, are held in the restricted cash account equal to the maintenance obligations projected for the subsequent six months, and are subject to a minimum balance of \$9.0 million. The lease revenue stream, in the short-term, is at fixed rates while a portion of our debt is at variable rates. If interest rates increase, it is unlikely we could increase lease rates in the short term and this would cause a reduction in our earnings and operating cash flows. Lease rent revenue and maintenance reserves are also affected by the amount of equipment off-lease. Approximately 90%, by book value, of our assets were on lease at March 31, 2016 and December 31, 2015. The average utilization rate was 87% and 81% for the three-month periods ended March 31, 2016 and March 31, 2015, respectively. If there is any increase in off-lease rates or deterioration in lease rates that are not offset by reductions in interest rates, there will be a negative impact on earnings and cash flows from operations.

Notes payable consisted of the following:

	March 31, 2016	December 31, 2015
	(in thousands)	
Credit facility at a floating rate of interest of LIBOR plus 2.75%, secured by engines. The facility has a committed amount of \$700.0 million at March 31, 2016, which revolves until the maturity date of June 2019.	\$ 539,000	\$ 549,000
WEST II Series 2012-A term notes payable at a fixed rate of interest of 5.50%, maturing in September 2037. Secured by engines.	294,337	300,467

Edgar Filing: WILLIS LEASE FINANCE CORP - Form 10-Q

Note payable at fixed interest rates ranging from 2.60% to 2.97%, maturing in July 2024. Secured by an aircraft.	15,719	16,135
Note payable at a variable interest rate of LIBOR plus 2.25%, maturing in January 2018. Secured by engines.	12,739	13,082
Notes payable	861,795	878,684
Less: unamortized debt issuance costs	(11,764)	(12,595)
Total notes payable	\$ 850,031	\$ 866,089

At March 31, 2016 , we had a revolving credit facility to finance the acquisition of aircraft engines for lease as well as for general working capital purposes. On April 20, 2016 we entered into a Third Amended and Restated

Table of Contents

Credit Agreement which increased the revolving credit facility to \$890.0 million from \$700.0 million and extended the term to April 2021. This \$890 million revolving credit facility has an accordion feature up to \$1 billion. The initial interest rate on the facility is LIBOR plus 2.75%. Quarterly, the interest rate is adjusted based on the Company's leverage ratio, as calculated under the terms of the revolving credit facility.

Virtually all of the above debt is subject to our ongoing compliance with the covenants of each financing, including debt/equity ratios, minimum tangible net worth and minimum interest coverage ratios, and other eligibility criteria including customer and geographic concentration restrictions. In addition, under these facilities, we can typically borrow up to 85% of an engine's net book value and 65% of spare part's net book value. Therefore we must have other available funds for the balance of the purchase price of any new equipment to be purchased or we will not be permitted to draw on these facilities. The facilities are also cross-defaulted against other facilities. If we do not comply with the covenants or eligibility requirements, we may not be permitted to borrow additional funds and accelerated payments may become necessary. Additionally, much of the above debt is secured by engines to the extent that engines are sold, repayment of that portion of the debt could be required.

At March 31, 2016, we are in compliance with the covenants specified in the revolving credit facility, including the Interest Coverage Ratio requirement of at least 2.25 to 1.00, and the Total Leverage Ratio requirement to remain below 5.00 to 1.00. As defined in the revolving credit facility Credit Agreement, the Interest Coverage Ratio is the ratio of Earnings before Interest, Taxes, Depreciation and Amortization and other one-time charges (EBITDA) to Consolidated Interest Expense and the Total Leverage Ratio is the ratio of Total Indebtedness to Tangible Net Worth. At March 31, 2016, we are in compliance with the covenants specified in the WEST II indenture and servicing agreement.

For further information on our debt instruments, see the "Notes Payable" note in Part II, Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2015.

Approximately \$22.9 million of our debt is repayable during the next 12 months. Such repayments consist of scheduled installments due under term loans. Repayments are funded by the use of unrestricted cash reserves and from cash flows from ongoing operations. The table below summarizes our contractual commitments at March 31, 2016:

	Total	Payment due by period (in thousands)			
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Long-term debt obligations	\$ 861,795	\$ 22,939	\$ 56,964	\$ 585,343	\$ 196,549
Interest payments under long-term debt	145,062	35,287	66,663	28,428	14,684

obligations					
Operating lease obligations	2,715	1,119	1,427	169	-
Total	\$ 1,009,572	\$ 59,345	\$ 125,054	\$ 613,940	\$ 211,233

We have estimated the interest payments due under long-term debt by applying the interest rates applicable at March 31, 2016 to the remaining debt, adjusted for the estimated debt repayments identified in the table above. Actual interest payments made will vary due to changes in the rates for one-month LIBOR.

We believe our equity base, internally generated funds and existing debt facilities are sufficient to maintain our level of operations for the next twelve months. A decline in the level of internally generated funds, resulting from an increase in the amount of equipment off-lease or a decrease in availability under our existing debt facilities, would impair our ability to sustain our level of operations. We continually discuss additions to our capital base with our commercial and investment banks. If we are not able to access additional capital, our ability to grow

Table of Contents

our asset base consistent with historical trends will be impaired and our future growth limited to that which can be funded from internally generated capital.

Recent Accounting Pronouncements

A discussion of recent accounting pronouncements is included in the Notes to Condensed Consolidated Financial Statements of this Form 10-Q in "Note 1. Summary of Significant Accounting Policies" under the heading "Recent Accounting Pronouncements" and is incorporated herein by reference.

Management of Interest Rate Exposure

At March 31, 2016, \$551.7 million of our borrowings were on a variable rate basis at various interest rates tied to one-month LIBOR. Our equipment leases are generally structured at fixed rental rates for specified terms. Increases in interest rates could narrow or result in a negative spread, between the rental revenue we realize under our leases and the interest rate that we pay under our borrowings. We periodically enter into interest rate derivative instruments to mitigate our exposure to interest rate risk and not to speculate or trade in these derivative products. We currently have no interest rate swap agreements in place.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our primary market risk exposure is that of interest rate risk. A change in LIBOR rates would affect our cost of borrowing. Increases in interest rates, which may cause us to raise the implicit rates charged to our customers, could result in a reduction in demand for our leases. Alternatively, we may price our leases based on market rates so as to keep the fleet on-lease and suffer a decrease in our operating margin due to interest costs that we are unable to pass on to our customers. As of March 31, 2016, \$551.7 million of our outstanding debt is variable rate debt. We estimate that for every one percent increase or decrease in interest rates on our variable rate debt (net of derivative instruments), our annual interest expense would increase or decrease \$5.5 million.

We are also exposed to currency devaluation risk. All of our leases require payment in U.S. dollars. During the three months ended March 31, 2016, 91% of our lease rent revenues came from non-United States domiciled lessees. If these lessees' currency devalues against the U.S. dollar, the lessees could potentially encounter difficulty in making their lease payments.

No customer accounted for more than 10% of total lease rent revenue during the three months ended March 31, 2016 and 2015.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures. Based on management's evaluation (with the participation of our Chief Executive Officer (CEO) and Interim Chief Financial Officer (CFO)), as of the end of the period covered by this report, our CEO and CFO have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), are effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Inherent Limitations on Controls

Management, including the CEO and CFO, does not expect that our disclosure controls and procedures will prevent or detect all error and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs.

(b) Changes in internal control over financial reporting. There has been no change in our internal control over financial reporting during our fiscal quarter ended March 31, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) None.

(b) None.

(c) Issuer Purchases of Equity Securities. On September 27, 2012, the Company announced that its Board of Directors has authorized a plan to repurchase up to \$100.0 million of its common stock over the next 5 years. The Board of Directors reaffirmed the repurchase plan on April 21, 2015. This plan extends the previous plan authorized on December 8, 2009, and increases the number of shares authorized for repurchase to up to \$100.0 million.

Common stock repurchases, under our authorized plan, in the three months ended March 31, 2016 were as follows:

Period	Total Number of Shares Purchased (in thousands, except per share data)	Average Price per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans
January 1, 2016 - January 31, 2016	—	\$ —	—	\$ 61,779
February 1, 2016 - February 29, 2016	—	\$ —	—	\$ 61,779
March 1, 2016 - March 31, 2016	200	\$ 21.95	200	\$ 57,389
Total	200	\$ 21.95	200	\$ 57,389

ITEM 5. OTHER INFORMATION

As previously disclosed in a Form 8-K filed on November 13, 2015, Donald A. Nunemaker, announced his decision to retire as President of the Company, effective March 31, 2016 or shortly thereafter. Following a professionally conducted search and as previously disclosed in a Form 8-K filed on January 20, 2016, the Company promoted its Chief Investment Officer, Brian R. Hole, to the office of President, effective as of April 1, 2016.

Table of Contents

As previously disclosed in a Form 8-K filed on January 25, 2016, our Chief Financial Officer, Bradley S. Forsyth, announced his resignation from the Company effective as of February 18, 2016. While searching for a permanent replacement and as previously disclosed in a Form 8-K filed on February 5, 2016, the Company has retained the temporary services of Ernest J. Furtado, who is serving as our Interim Chief Financial Officer. Mr. Furtado recently retired from Textainer Group Holdings Limited, where he had served as Senior Vice President, Chief Financial Officer, Chief Accounting Officer and Secretary. Mr. Furtado is signing this Form 10-Q as he is currently performing the function of the Company's principal financial officer.
