FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-35317

ATLAS RESOURCE PARTNERS, L.P.

(Exact name of registrant as specified in its charter)

Delaware 45-3591625
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

Park Place Corporate Center One 15275

1000 Commerce Drive, Suite 400

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

Pittsburgh, Pennsylvania

(Address of principal executive office)

(Zip code)

Registrant's telephone number, including area code: (800) 251-0171

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of outstanding common limited partner units of the registrant on May 12, 2016 was 102,429,220.

ATLAS RESOURCE PARTNERS, L.P.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1 – BASIS OF PRESENTATION

We are a publicly traded (NYSE: ARP) Delaware master-limited partnership (“MLP”) and an independent developer and producer of natural gas, crude oil and natural gas liquids (“NGL”) with operations in basins across the United States. We sponsor and manage tax-advantaged investment partnerships (the “Drilling Partnerships”), in which we coinvest, to finance a portion of our natural gas, crude oil and NGL production activities. Unless the context otherwise requires, references to “Atlas Resource Partners, L.P.,” “Atlas Resource Partners,” “the Partnership,” “we,” “us,” “our” and “our companies” refer to Atlas Resource Partners, L.P. and our consolidated subsidiaries.

Atlas Energy Group, LLC (“Atlas Energy Group” or “ATLS”; OTCQX: ATLS), our general partner, manages our operations and activities through its ownership interest. At March 31, 2016, Atlas Energy Group owned 100% of our general partner Class A units, all of the incentive distribution rights through which it manages and effectively controls us and an approximate 23.3% limited partner interest (20,962,485 common and 3,749,986 preferred limited partner units) in us.

In addition to its general and limited partner interest in us, ATLS also holds general and limited partner interests in Atlas Growth Partners, L.P. (“AGP”), a Delaware limited partnership and an independent developer and producer of natural gas, oil and NGLs, with operations primarily focused in the Eagle Ford Shale, and in Lightfoot Capital Partners, L.P. and Lightfoot Capital Partners GP, LLC, which incubate new MLPs and invest in existing MLPs.

At March 31, 2016, we had 102,427,347 common limited partner units issued and outstanding. The common units are a class of limited partner interests in us. The holders of common units are entitled to participate in partnership distributions, exercise the rights or privileges available to holders of common units and have limited liability as outlined in the partnership agreement.

The accompanying condensed consolidated financial statements, which are unaudited except that the balance sheet at December 31, 2015 was derived from audited financial statements, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission and are presented in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) for interim reporting. They do not include all disclosures normally made in financial statements contained in Form 10-K. It is suggested that these interim condensed consolidated financial statements be read in conjunction with the financial statements and the notes thereto included in our latest Annual Report on Form 10-K. In management’s opinion, all adjustments necessary for a fair presentation of our financial position, results of operations and cash flows for the periods disclosed have been made. Certain amounts in the prior year’s financial statements have been reclassified to conform to the current year presentation due to the adoption of certain accounting standards (see Notes 2 and 4). The results of operations for the interim periods presented may not necessarily be indicative of the results of operations for the full year.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

Our condensed consolidated financial statements include our accounts and the accounts of our wholly-owned subsidiaries. Transactions between us and other ATLS operations have been identified in the condensed consolidated financial statements as transactions between affiliates, where applicable. All material intercompany transactions have been eliminated.

On June 5, 2015, we acquired coal-bed methane producing natural gas assets in the Arkoma Basin in eastern Oklahoma from ATLS (the “Arkoma Acquisition”) for approximately \$31.5 million, net of purchase price adjustments. We funded the purchase price through the issuance of 6,500,000 common limited partner units. The Arkoma Acquisition had an effective date of January 1, 2015. We determined that the Arkoma Acquisition constituted a transaction between entities under common control. In comparison to the acquisition method of accounting, whereby the purchase price for the asset acquisition would have been allocated to identifiable Arkoma assets and liabilities based upon their fair values with any excess treated as goodwill, transfers between entities under common control require that assets and liabilities be recognized by the acquirer at historical carrying value at the date of transfer, with any difference between the purchase price and the net book value of the assets recognized as an adjustment to partners’ capital (deficit) on our condensed consolidated balance sheets. Also, in comparison to the acquisition method of accounting, whereby the results of operations and the financial position of the acquired Arkoma assets would have been included in our condensed consolidated financial statements from the date of acquisition, transfers between entities under common control require the acquirer to reflect the effect to the assets acquired and liabilities assumed and the related results of operations at the beginning of the period during which it was acquired and retrospectively adjust our prior period condensed consolidated financial statements to furnish comparative

information. As such, we reflected the impact of the Arkoma Acquisition on our condensed consolidated financial statements in the following manner:

- Recognized the assets acquired and liabilities assumed from the Arkoma Acquisition at their historical carrying value at the date of transfer, with any difference between the purchase price and the net book value of the assets recognized as an adjustment to partners' capital (deficit);
- Retrospectively adjusted the condensed consolidated financial statements for any date prior to June 5, 2015, the date of acquisition, to reflect our results on a consolidated basis with the results of the Arkoma assets as of or at the beginning of the respective period; and
- Adjusted the presentation of our condensed consolidated statements of operations for the three months ended March 31, 2015, to reflect the results of operations attributable to the Arkoma assets prior to the date of acquisition to determine income attributable to common limited partners.

Prior to the Arkoma Acquisition, the common limited partners did not participate in the net income (loss) of the Arkoma operations. Subsequent to the Arkoma Acquisition, the common limited partners participate in the net income (loss) of the Arkoma operations, which was determined after the deduction of the general partner's and the preferred unitholders' interests.

In April 2015, the Financial Accounting Standards Board ("FASB") updated the accounting guidance for earnings per unit ("EPU") of master limited partnerships ("MLP") applying the two-class method. The updated accounting guidance specifies that for general partner transfers (or "drop downs") to an MLP accounted for as a transaction between entities under common control, the earnings (losses) of the transferred business before the date of the transaction should be allocated entirely to the general partner's interest, and previously reported EPU of the limited partners should not change. Qualitative disclosures about how the rights to the earnings (losses) differ before and after the drop down transaction occurs are also required. We adopted this accounting guidance upon its effective date of January 1, 2016, which resulted in the following retrospective restatement:

Condensed Consolidated Statement of Operations Three Months Ended March 31, 2015:	Previously Filed	Adjustment	Restated
Common limited partners' interest	\$82,240	\$ (1,896)	\$80,344
General partner's interest	\$1,679	\$ 1,896	\$3,575
Net loss attributable to common limited partners per			
unit - basic	\$0.95	\$ (0.02)	\$0.93
Net loss attributable to common limited partners per			
unit - diluted	\$0.93	\$ (0.02)	\$0.91
 Condensed Consolidated Balance Sheet			
December 31, 2015:			
Common limited partners' interest	\$(260,276)	\$ (2,588)	\$(262,864)
General partners' interest	\$(33,642)	\$ 2,588	\$(31,054)

In accordance with established practice in the oil and gas industry, our condensed consolidated financial statements include our pro-rata share of assets, liabilities, income and lease operating and general and administrative costs and expenses of the Drilling Partnerships in which we have an interest. Such interests generally approximate 30%. Our

condensed consolidated financial statements do not include proportional consolidation of the depletion or impairment expenses of the Drilling Partnerships. Rather, we calculate these items specific to our own economics.

Use of Estimates

The preparation of our condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities that exist at the date of our condensed consolidated financial statements, as well as the reported amounts of revenue and costs and expenses during the reporting periods. Our condensed consolidated financial statements are based on a number of significant estimates, including revenue and expense accruals, depletion, depreciation and amortization and fair value of derivative instruments. The oil and gas industry principally conducts its business by processing actual transactions as many as 60 days after the month of delivery. Consequently, the most recent two months' financial results were recorded using estimated volumes and contract market prices. Actual results could differ from those estimates.

Liquidity and Capital Resources

We have historically funded our operations, acquisitions and cash distributions primarily through cash generated from operations, amounts available under our credit facilities and equity and debt offerings. Our future cash flows are subject to a number of variables, including oil and natural gas prices. Prices for oil and natural gas began to decline significantly during the fourth quarter of 2014 and have continued to decline and remain low in 2016. These lower commodity prices have negatively impacted our revenues, earnings and cash flows. Sustained low commodity prices will have a material and adverse effect on our liquidity position.

On May 10, 2016, we entered into a ninth amendment (the “Ninth Amendment”) to our Second Amended and Restated Credit Agreement, dated July 31, 2013 (as amended from time to time, the “Credit Agreement”), with Wells Fargo Bank, National Association, as administrative agent, and the lenders party thereto, to, among other things, waive the requirement that our ratio of current assets to current liabilities (as calculated pursuant to the Credit Agreement) not be less than 1.0 to 1.0 as of March 31, 2016 and waive the requirement that our ratio of the total First Lien Debt to EBITDA (as calculated pursuant to the Credit Agreement) not be greater than 2.75 to 1.0 as of March 31, 2016, and required us to repay \$2.5 million of outstanding borrowings. We are party to a Second Lien Credit Agreement, dated February 23, 2015, with certain lenders and Wilmington Trust, National Association, as administrative agent (the “Term Loan Facility”), which contains the same financial covenants as those in our Credit Agreement. Such financial covenants were automatically waived as a result of the Ninth Amendment to the Credit Agreement. Based on the terms of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$672.0 million of our outstanding amounts under the Credit Agreement and \$234.2 million of our outstanding amounts under the Term Loan Facility, net of \$10.0 million deferred financing costs and \$5.8 million unamortized discount, as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016.

Our borrowing base, and thus our borrowing capacity, under the Credit Agreement is impacted by the level of our oil and natural gas reserves. Downward revisions of our oil and natural gas reserves volume and value due to low commodity prices, the impact of lower estimated capital spending in response to lower prices, performance revisions, sales of assets or the incurrence of certain types of additional debt, among other items, could cause a reduction of our borrowing base in the future, and these reductions could be significant. Our Credit Agreement is currently in the process of its semi-annual redetermination. Based on projected market conditions, continued declines in commodity prices and recent conversations with our administrative agent, we expect that our borrowing base will be redetermined to a level below our outstanding borrowings of \$672.0 million under the Credit Agreement as of March 31, 2016. In the case of a borrowing base deficiency, our Credit Agreement requires us to repay the deficiency, which we are permitted to do in equal monthly installments over a four-month period, or deposit additional collateral to eliminate such deficiency. If our borrowing base is redetermined below our current outstanding borrowings and we are unable to repay the deficiency or deposit additional collateral to eliminate such deficiency, there would be substantial doubt regarding our ability to continue as a going concern.

In addition, if we are unable to remain in compliance with the covenants under our credit facilities or the indentures governing our Senior Notes (as defined in Note 4), absent relief from our lenders or noteholders, as applicable, we may be forced to repay or refinance such indebtedness. Upon the occurrence of an event of default, the lenders under our credit facilities or holders of our notes, as applicable, could elect to declare all amounts outstanding immediately due and payable and the lenders could terminate all commitments to extend further credit. If an event of default occurs (including if our borrowing base is redetermined below our current outstanding borrowings and we are unable to repay the deficiency or deposit additional collateral to eliminate such deficiency), or if other debt agreements cross-default, and the lenders under the affected debt agreements accelerate the maturity of any loans or other debt outstanding, we

will not have sufficient liquidity to repay all of our outstanding indebtedness, and as a result, there would be substantial doubt regarding our ability to continue as a going concern.

We continually monitor the capital markets and our capital structure and may make changes to our capital structure from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity, strengthening our balance sheet, meeting our debt service obligations and/or achieving cost efficiency. Although we have a significant hedge position for the remainder of 2016 through 2018, the forecasted long-term downturn in commodity prices has had a detrimental impact on our financial position. For example, we could pursue options such as refinancing, restructuring or reorganizing our indebtedness or capital structure or seek to raise additional capital through debt or equity financing to address our liquidity concerns and high debt levels. We are evaluating various options with the lenders under our Credit Agreement and Term Loan Facility, and holders of our Senior Notes, but there is no certainty that we will be able to implement any such options, and we cannot provide any assurances that any refinancing or changes in our debt or equity capital structure would be possible or that additional equity or debt financing could be obtained on acceptable terms, if at all, and such options may result in a wide range of outcomes for our stakeholders, including cancellation of debt income (“CODI”) which would be directly allocated to our unitholders and reported on such unitholders’ separate returns (see Item 1A – Risk Factors for additional information).

We also continue to implement various cost saving measures to reduce our capital, operating and general and administrative costs, including renegotiating contracts with contractors, suppliers and service providers, reducing the number of staff and contractors

and deferring and eliminating discretionary costs. We will continue to be opportunistic and aggressive in managing our cost structure and, in turn, our liquidity to meet our capital and operating needs. We cannot provide any assurances that any of these efforts will be successful or will result in cost reductions or cash flows or the timing of any such cost reductions or additional cash flows. It is also possible additional adjustments to our plan and outlook may occur based on market conditions and our needs at that time, which could include selling assets, liquidating all or a portion of our hedge portfolio, seeking additional partners to develop our assets, reducing or suspending the payments of distributions to preferred unitholders and/or reducing our planned capital program. In addition, to the extent commodity prices remain low or decline further, or we experience disruptions in our longer-term access to or cost of capital, our ability to fund future capital expenditures or growth projects may be further impacted.

Net Income Per Common Unit

Basic net income attributable to common limited partners per unit is computed by dividing net income attributable to common limited partners, which is determined after the deduction of the general partner's and the preferred unitholders' interests, by the weighted average number of common limited partner units outstanding during the period. Net income attributable to common limited partners is determined by deducting net income attributable to participating securities, if applicable, income attributable to preferred limited partners and net income attributable to the general partner's Class A units. The general partner's interest in net income is calculated on a quarterly basis based upon its Class A units and incentive distributions to be distributed for the quarter (see Note 10), with a priority allocation of net income to the general partner's incentive distributions, if any, in accordance with the partnership agreement, and the remaining net income allocated with respect to the general partner's and limited partners' ownership interests.

We present net income per unit under the two-class method for master limited partnerships, which considers whether the incentive distributions of a master limited partnership represent a participating security. The two-class method considers whether the partnership agreement contains any contractual limitations concerning distributions to the incentive distribution rights that would impact the amount of earnings to allocate to the incentive distribution rights for each reporting period. If distributions are contractually limited to the incentive distribution rights' share of currently designated available cash for distributions as defined under the partnership agreement, undistributed earnings in excess of available cash should not be allocated to the incentive distribution rights. Under the two-class method, our management believes the partnership agreement contractually limits cash distributions to available cash; therefore, undistributed earnings are not allocated to the incentive distribution rights.

Unvested unit-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and are included in the computation of earnings per unit pursuant to the two-class method. Phantom unit awards, which consist of common units issuable under the terms of our long-term incentive plan, contain non-forfeitable rights to distribution equivalents. The participation rights would result in a non-contingent transfer of value each time we declare a distribution or distribution equivalent right during the award's vesting period. However, unless the contractual terms of the participating securities require the holders to share in the losses of the entity, net loss is not allocated to the participating securities. As such, the net income utilized in the calculation of net income per unit must be after the allocation of only net income to the phantom units on a pro-rata basis.

The following is a reconciliation of net income allocated to the common limited partners for purposes of calculating net income attributable to common limited partners per unit (in thousands, except unit data):

	Three Months Ended March 31,	
	2016	2015
Net income	\$ 12,763	\$ 87,572
Preferred limited partner dividends	(3,648)	(3,653)
Net income attributable to common limited partners and the general partner	9,115	83,919
Less: General partner's interest	182	3,575
Net income attributable to common limited partners	8,933	80,344
Less: Net income attributable to participating securities – phantom units	25	644
Net income utilized in the calculation of net income attributable to common limited partners per unit - Basic	8,908	79,700
Plus: Convertible preferred limited partner dividends ⁽¹⁾	—	1,928
Net income utilized in the calculation of net income attributable to common limited partners per unit - Diluted	\$ 8,908	\$ 81,628

(1) For the three months ended March 31, 2016, distributions on our Class C convertible preferred units were excluded, because the inclusion of such preferred distributions would have been anti-dilutive.

Diluted net income attributable to common limited partners per unit is calculated by dividing net income attributable to common limited partners, less income allocable to participating securities, by the sum of the weighted average number of common limited partner units outstanding and the dilutive effect of unit option awards, convertible preferred units and warrants, as calculated by the treasury stock or if converted methods, as applicable. Unit options consist of common units issuable upon payment of an exercise price by the participant under the terms of our long-term incentive plan.

The following table sets forth the reconciliation of our weighted average number of common limited partner units used to compute basic net income attributable to common limited partners per unit with those used to compute diluted net income attributable to common limited partners per unit (in thousands):

	Three Months Ended March 31,	
	2016	2015
Weighted average number of common limited partner units—basic	102,403	85,529
Add effect of dilutive incentive awards	293	691
Add effect of dilutive convertible preferred limited partner units ⁽¹⁾	—	3,790
Weighted average number of common limited partner units—diluted	102,696	90,010

(1) For the three months ended March 31, 2016, potential common limited partner units issuable upon (a) conversion of our Class C preferred units and (b) exercise of the common unit warrants issued with the Class C preferred units were excluded from the computation of diluted earnings attributable to common limited partners per unit, because the inclusion of such units would have been anti-dilutive. As the Class D and Class E preferred units are

convertible only upon a change of control event, they are not considered dilutive securities for earnings per unit purposes.

Recently Issued Accounting Standards

In February 2016, the FASB updated the accounting guidance related to leases. The updated accounting guidance requires lessees to recognize a lease asset and liability at the commencement date of all leases (with the exception of short-term leases), initially measured at the present value of the lease payments. The updated guidance is effective for us as of January 1, 2019 and requires a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest period presented. We are currently in the process of determining the impact that the updated accounting guidance will have on our condensed consolidated financial statements.

In August 2015, the FASB updated the accounting guidance related to the balance sheet presentation of debt issuance costs specific to line of credit arrangements. The updated accounting guidance allows the option of presenting deferred debt issuance costs related to line-of-credit arrangements as an asset, and subsequently amortizing over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings. We adopted the updated accounting guidance effective January 1, 2016, and it did not have a material impact on our condensed consolidated financial statements.

In February 2015, the FASB updated the accounting guidance related to consolidation under the variable interest entity and voting interest entity models. The updated accounting guidance modifies the consolidation guidance for variable interest entities, limited partnerships and similar legal entities. We adopted this accounting guidance upon its effective date of January 1, 2016, and it did not have a material impact on our condensed consolidated financial statements.

In August 2014, the FASB updated the accounting guidance related to the evaluation of whether there is substantial doubt about an entity's ability to continue as a going concern. The updated accounting guidance requires an entity's management to evaluate whether there are conditions or events that raise substantial doubt about its ability to continue as a going concern within one year from the date the financial statements are issued and provide footnote disclosures, if necessary. We adopted this accounting guidance on January 1, 2016, and provided enhanced disclosures, as applicable, within our condensed consolidated financial statements.

In May 2014, the FASB updated the accounting guidance related to revenue recognition. The updated accounting guidance provides a single, contract-based revenue recognition model to help improve financial reporting by providing clearer guidance on when an entity should recognize revenue, and by reducing the number of standards to which an entity has to refer. In July 2015, the FASB voted to defer the effective date by one year to December 15, 2017 for annual reporting periods beginning after that date. The updated accounting guidance provides companies with alternative methods of adoption. We are currently in the process of determining the impact that the updated accounting guidance will have on our condensed consolidated financial statements and our method of adoption.

NOTE 3 – PROPERTY, PLANT AND EQUIPMENT

The following is a summary of property, plant and equipment at the dates indicated (in thousands):

	March 31, 2016	December 31, 2015	Estimated Useful Lives in Years
Natural gas and oil properties:			
Proved properties:			
Leasehold interests	\$ 504,958	\$ 503,586	
Pre-development costs	6,401	6,014	
Wells and related equipment	3,085,097	3,076,239	
Total proved properties	3,596,456	3,585,839	
Unproved properties	213,047	213,047	
Support equipment	45,136	44,921	

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

Total natural gas and oil properties	3,854,639	3,843,807	
Pipelines, processing and compression facilities	57,591	56,738	15 – 20
Rights of way	829	829	20 – 40
Land, buildings and improvements	9,798	9,798	3 – 40
Other	18,420	18,405	3 – 10
	3,941,277	3,929,577	
Less – accumulated depreciation, depletion and amortization	(2,766,232)	(2,737,966)	
	\$1,175,045	\$1,191,611	

During the three months ended March 31, 2016 and 2015, we recognized \$18.7 million and \$21.5 million, respectively, of non-cash property, plant and equipment additions, which were included within the changes in accounts payable and accrued liabilities on our condensed consolidated statements of cash flows.

We capitalize interest on borrowed funds related to capital projects only for periods that activities are in progress to bring these projects to their intended use. The weighted average interest rate used to capitalize interest on borrowed funds by us was 6.7% and 6.1% for the three months ended March 31, 2016 and 2015, respectively. The aggregate amount of interest capitalized by us was \$2.4 million and \$3.9 million for the three months ended March 31, 2016 and 2015, respectively.

For the three months ended March 31, 2016 and 2015, we recorded \$1.7 million and \$1.6 million, respectively, of accretion expense related to our asset retirement obligations within depreciation, depletion and amortization in our condensed consolidated statements of operations. For the three months ended March 31, 2016 and 2015, we incurred liabilities of \$2.8 million and \$0.2 million, respectively, in asset retirement obligations in our condensed consolidated balance sheet due to the liquidation of some of our Drilling Partnerships.

NOTE 4 - DEBT

Total debt consists of the following at the dates indicated (in thousands):

	March 31, 2016	December 31, 2015
Revolving credit facility	\$672,000	\$592,000
Term loan facility	244,159	243,783
7.75 % Senior Notes – due 2021	354,366	374,619
9.25 % Senior Notes – due 2021	312,055	324,080
Deferred financing costs	(28,820)	(31,055)
Total debt, net	1,553,760	1,503,427
Less current maturities	(906,156)	—
Total long-term debt, net	\$647,604	\$1,503,427

In April 2015, the FASB updated the accounting guidance related to the balance sheet presentation of debt issuance costs. The updated accounting guidance requires that debt issuance costs be presented as a direct deduction from the associated debt obligation. We adopted this accounting guidance upon its effective date of January 1, 2016. The retrospective effect of the reclassification resulted in the following changes:

Condensed Consolidated Balance Sheet	Previously Filed	Adjustment	Restated
December 31, 2015:			
Other assets, net	\$60,044	\$ (31,055)	\$28,989
Long-term debt, net	\$1,534,482	\$ (31,055)	\$1,503,427

Cash Interest. Total cash payments for interest by us were \$41.2 million and \$36.7 million for the three months ended March 31, 2016 and 2015, respectively.

Credit Facility

We are a party to a Credit Agreement with Wells Fargo Bank, National Association, as administrative agent, and the lenders party thereto, which provides for a senior secured revolving credit facility with a borrowing base of \$700.0 million as of March 31, 2016 and a maximum facility amount of \$1.5 billion scheduled to mature in July 2018. At March 31, 2016, \$672.0 million was outstanding under the credit facility.

Our borrowing base is scheduled for semi-annual redeterminations in May and November of each year. Up to \$20.0 million of the revolving credit facility may be in the form of standby letters of credit, of which \$4.2 million was outstanding at March 31, 2016. Our obligations under the facility are secured by mortgages on our oil and gas properties and first priority security interests in substantially all of our assets. Additionally, obligations under the facility are guaranteed by certain of our material subsidiaries, and any non-guarantor subsidiaries of ours are minor. At March 31, 2016, the weighted average interest rate on outstanding borrowings under the credit facility was 3.6%.

The Credit Agreement contains customary covenants including, without limitation, covenants that limit our ability to incur additional indebtedness (but which permits second lien debt in an aggregate principal amount of up to \$300.0 million and third lien debt that satisfies certain conditions including pro forma financial covenants), grant liens, make loans or investments, make distributions if a borrowing base deficiency or default exists or would result from the distribution, merger or consolidate with other persons, or engage in certain asset dispositions including a sale of all or substantially all of our assets. The Credit Agreement also requires us to maintain a ratio of First Lien Debt to EBITDA (ratio as defined in the Credit Agreement) of not greater than 2.75 to 1.00, and a ratio of current assets to current liabilities (ratio as defined in the Credit Agreement) of not less than 1.0 to 1.0 as of the last day of any fiscal quarter.

On May 10, 2016, we entered into the Ninth Amendment to the Credit Agreement, to, among other things, waive the requirement that our ratio of current assets to current liabilities (as calculated pursuant to the Credit Agreement) not be less than 1.0 to 1.0 as of March 31, 2016 and waive the requirement that our ratio of the total First Lien Debt to EBITDA (as calculated pursuant to the Credit Agreement) not be greater than 2.75 to 1.0 as of March 31, 2016, and required us to repay \$2.5 million of outstanding borrowings. As a result of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$672.0 million of our outstanding amounts under the Credit Agreement as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016. See Note 2 for additional disclosure regarding our liquidity and capital resources.

Our Credit Agreement is currently in the process of its semi-annual redetermination. Based on projected market conditions, continued declines in commodity prices and recent conversations with our administrative agent, we expect that our borrowing base will be redetermined to a level below our outstanding borrowings under the Credit Agreement as of March 31, 2016. In the case of a borrowing base deficiency, our Credit Agreement requires us to repay the deficiency, which we are permitted to do in equal monthly installments over a four-month period, or deposit additional collateral to eliminate such deficiency. See Note 2 for additional disclosure regarding our liquidity and capital resources.

Term Loan Facility

We are party to a Term Loan Facility, which provides for a second lien term loan in an original principal amount of \$250.0 million. The Term Loan Facility matures on February 23, 2020. The Term Loan Facility is presented in the table above net of unamortized discount of \$5.8 million at March 31, 2016.

Our obligations under the Term Loan Facility are secured on a second priority basis by security interests in all of our assets and those of our restricted subsidiaries that guarantee our existing first lien revolving credit facility. In addition, the obligations under the Term Loan Facility are guaranteed by our material restricted subsidiaries. At March 31, 2016, the weighted average interest rate on outstanding borrowings under the Term Loan Facility was 10.0%.

The Term Loan Facility contains customary covenants including, without limitation, covenants that limit our ability to make restricted payments, take on indebtedness, issue preferred stock, grant liens, conduct sales of assets and subsidiary stock, make distributions from restricted subsidiaries, conduct affiliate transactions and engage in other business activities. In addition, the Term Loan Facility contains covenants substantially similar to those in the Credit Agreement, including, among others, restrictions on swap agreements, debt of unrestricted subsidiaries, drilling and operating agreements and the sale or discount of receivables. The financial covenants of the Term Loan Facility were automatically waived as a result of the Ninth Amendment to the Credit Agreement. Based on the terms of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$234.2 million of our amounts outstanding on the Term Loan Facility, net of \$10.0 million deferred financing costs and \$5.8 million unamortized discount, as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016. See Note 2 for additional disclosure regarding our liquidity and capital resources.

Senior Notes

At March 31, 2016, we had \$354.4 million outstanding of our 7.75% senior unsecured notes due 2021 (“7.75% Senior Notes”). The 7.75% Senior Notes were presented net of a \$0.4 million unamortized discount as of March 31, 2016.

At March 31, 2016, we had \$312.1 million outstanding of our 9.25% senior unsecured notes due 2021 (“9.25% Senior Notes”). The 9.25% Senior Notes were presented net of a \$0.9 million unamortized discount as of March 31, 2016.

In January and February 2016, we executed transactions to repurchase portions of our senior unsecured notes. As of March 31, 2016, we repurchased approximately \$20.3 million of our 7.75% Senior Notes due 2021 and approximately \$12.1 million of our 9.25% Senior Notes for approximately \$5.5 million, which includes \$0.6 million of interest. As a result of these transactions, we recognized \$26.5 million as gain on early extinguishment of debt, net of accelerated amortization of deferred financing costs of \$0.9 million, for the three months ended March 31, 2016.

The 7.75% Senior Notes and 9.25% Senior Notes are guaranteed by certain of our material subsidiaries. The guarantees under the 7.75% Senior Notes and 9.25% Senior Notes are full and unconditional and joint and several, subject to certain customary automatic release provisions, including, in certain circumstances, the sale or other disposition of all or substantially all the assets of, or all of the equity interests in, the subsidiary guarantor, or the subsidiary guarantor is declared “unrestricted” for covenant purposes, and any subsidiaries of ours, other than the subsidiary guarantors, are minor. There are no restrictions on our ability to obtain cash or any other distributions of funds from the guarantor subsidiaries.

The indentures governing the 7.75% Senior Notes and 9.25% Senior Notes contain covenants including, without limitation, covenants that limit our ability to incur certain liens, incur additional indebtedness; declare or pay distributions if an event of default

has occurred; redeem, repurchase, or retire equity interests or subordinated indebtedness; make certain investments; or merge, consolidate or sell substantially all of our assets. We were in compliance with these covenants as of March 31, 2016.

NOTE 5 – DERIVATIVE INSTRUMENTS

We use a number of different derivative instruments, principally swaps and options, in connection with our commodity price risk management activities. We do not apply hedge accounting to any of our derivative instruments. As a result, gains and losses associated with derivative instruments are recognized in earnings.

We enter into commodity future option contracts to achieve more predictable cash flows by hedging our exposure to changes in commodity prices. At any point in time, such contracts may include regulated New York Mercantile Stock Exchange (“NYMEX”) futures and options contracts and non-regulated over-the-counter futures contracts with qualified counterparties. NYMEX contracts are generally settled with offsetting positions, but may be settled by the physical delivery of the commodity. Crude oil contracts are based on a West Texas Intermediate (“WTI”) index. NGL fixed price swaps are priced based on a WTI crude oil index, while ethane, propane, butane and iso butane contracts are priced based on the respective Mt. Belvieu price. These contracts were recorded at their fair values.

We recorded net derivative assets of \$354.8 million and \$357.7 million on our condensed consolidated balance sheets at March 31, 2016 and December 31, 2015, respectively. Of the \$15.9 million of deferred gains in accumulated other comprehensive income on our condensed consolidated balance sheet at March 31, 2016, we expect to reclassify \$12.1 million of gains to our condensed consolidated statement of operations over the next twelve month period as these contracts expire with the remaining gains of \$3.8 million being reclassified to our condensed consolidated statements of operations in later periods as the remaining contracts expire.

The following table summarizes the commodity derivative activity and presentation in our condensed consolidated statements of operations for the periods indicated (in thousands):

	Thre	
	Three Months	
	Ended March 31,	
	2016	2015
Portion of settlements associated with gains previously recognized within accumulated other comprehensive income, net of prior year offsets ⁽¹⁾	\$3,515	\$27,343
Portion of settlements attributable to subsequent mark to market gains	45,193	15,203
Total cash settlements on commodity derivative contracts	\$48,708	\$42,546
Gains recognized on cash settlement ⁽²⁾	\$5,788	\$3,203
Gains recognized on open derivative contracts ⁽²⁾	40,332	102,382
Gains on mark-to-market derivatives	\$46,120	\$105,585

- (1) Recognized in gas and oil production revenue.
- (2) Recognized in gain on mark-to-market derivatives.

16

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

The following table summarizes the gross fair values of our derivative instruments, presenting the impact of offsetting the derivative assets and liabilities included on our condensed consolidated balance sheets for the periods indicated (in thousands):

Offsetting Derivatives as of	Gross		Net Amount
	Amounts	Gross	
Recognized	Offset	Presented	
Offsetting Derivatives as of March 31, 2016			
Current portion of derivative assets	\$ 159,745	\$ —	\$ 159,745
Long-term portion of derivative assets	195,074	—	195,074
Total derivative assets	\$ 354,819	\$ —	\$ 354,819
Current portion of derivative liabilities	\$ —	\$ —	\$ —
Long-term portion of derivative liabilities	—	—	—
Total derivative liabilities	\$ —	\$ —	\$ —
Offsetting Derivatives as of December 31, 2015			
Current portion of derivative assets	\$ 159,460	\$ —	\$ 159,460
Long-term portion of derivative assets	198,262	—	198,262
Total derivative assets	\$ 357,722	\$ —	\$ 357,722
Current portion of derivative liabilities	\$ —	\$ —	\$ —
Long-term portion of derivative liabilities	—	—	—
Total derivative liabilities	\$ —	\$ —	\$ —

At March 31, 2016, we had the following commodity derivatives:

Type	Production Period Ending December 31,	Volumes ⁽¹⁾	Average Fixed Price ⁽¹⁾	Fair Value Asset (in thousands) ⁽²⁾	Total Type (in thousands) ⁽²⁾
Natural Gas – Fixed Price Swaps	2016 ⁽³⁾	40,354,500	\$ 4.226	\$ 80,594	
	2017	50,120,000	\$ 4.221	\$ 72,296	
	2018	40,300,000	\$ 4.168	\$ 51,782	
	2019	15,860,000	\$ 4.019	\$ 16,932	
					\$ 221,604
Natural Gas – Put Options – Drilling Partnerships	2016 ⁽³⁾	1,080,000	\$ 4.150	\$ 2,078	\$ 2,078
Crude Oil – Fixed Price Swaps	2016 ⁽³⁾	1,230,800	\$ 81.685	\$ 49,864	
	2017	1,200,000	\$ 77.610	\$ 39,372	
	2018	1,080,000	\$ 76.281	\$ 31,413	
	2019	540,000	\$ 68.371	\$ 10,488	

\$ 131,137
Total net assets \$ 354,819

- (1) Volumes for natural gas are stated in million British Thermal Units. Volumes for NGLs are stated in gallons. Volumes for crude oil are stated in barrels.
- (2) Fair value for natural gas fixed price swaps and natural gas put options are based on forward NYMEX natural gas prices, as applicable. Fair value of crude oil fixed price swaps are based on forward WTI crude oil prices, as applicable.
- (3) The production volumes for 2016 include the remaining nine months of 2016 beginning April 1, 2016.

NOTE 6 – FAIR VALUE OF FINANCIAL INSTRUMENTS

We use a market approach fair value methodology to value our outstanding derivative contracts. The fair value of a financial instrument depends on a number of factors, including the availability of observable market data over the contractual term of the underlying instrument. We separate the fair value of our financial instruments into the three level hierarchy (Levels 1, 2 and 3) based on our assessment of the availability of observable market data and the significance of non-observable data used to determine fair value. As of March 31, 2016 and December 31, 2015, all of our derivative financial instruments were classified as Level 2.

Information for financial instruments measured at fair value at March 31, 2016 and December 31, 2015 was as follows (in thousands):

As of March 31, 2016	Level 1	Level 2	Level 3	Total
Derivative assets				
Commodity swaps	\$ —	\$ 352,741	\$ —	\$ 352,741
Commodity puts	—	2,078	—	2,078
Total derivatives, fair value	\$ —	\$ 354,819	\$ —	\$ 354,819

As of December 31, 2015	Level 1	Level 2	Level 3	Total
Derivative assets				
Commodity swaps	\$ —	\$ 355,329	\$ —	\$ 355,329
Commodity puts	—	2,393	—	2,393
Total derivatives, fair value	\$ —	\$ 357,722	\$ —	\$ 357,722

Other Financial Instruments

Our other current assets and liabilities on our condensed consolidated balance sheets are considered to be financial instruments. The estimated fair values of these instruments approximate their carrying amounts due to their short-term nature and thus are categorized as Level 1. The estimated fair values of our long-term debt at March 31, 2016 and December 31, 2015, which consist of our Senior Notes and outstanding borrowings under our revolving credit and term loan facility (see Note 4), were \$1,026.0 million and \$907.8 million, respectively, compared with the carrying amounts of \$1,553.8 million and \$1,503.4 million, respectively. At March 31, 2016 and December 31, 2015, the carrying values of outstanding borrowings under our revolving credit facility (see Note 4), which bears interest at variable interest rates, approximated estimated fair value. The estimated fair values of our Senior Notes and the term loan facility were based upon the market approach and calculated using yields of our Senior Notes and the term loan credit facility as provided by financial institutions and thus were categorized as Level 3 values.

NOTE 7 — CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Relationship with ATLS. We do not directly employ any persons to manage or operate our business. These functions are provided by employees of ATLS and/or its affiliates. As of March 31, 2016 and December 31, 2015, we had a

\$7.2 million receivable and a \$1.3 million payable, respectively, to/from ATLS related to the timing of funding cash accounts related to general and administrative expenses, such as payroll and benefits, which was recorded in advances to/from affiliates in the condensed consolidated balance sheets.

Relationship with Drilling Partnerships. We conduct certain activities through, and a portion of our revenues are attributable to, sponsorship of the Drilling Partnerships. We serve as general partner and operator of the Drilling Partnerships and assume customary rights and obligations for the Drilling Partnerships. As the general partner, we are liable for the Drilling Partnerships' liabilities and can be liable to limited partners of the Drilling if we breach our responsibilities with respect to the operations of the Drilling Partnerships. We are entitled to receive management fees, reimbursement for administrative costs incurred and to share in the Drilling Partnership's revenue and costs and expenses according to the respective partnership agreements. In March 2016, we transferred \$36.7 million of investor capital raised and \$13.3 million of accrued well drilling and completion costs incurred to the Atlas Eagle Ford 2015 L.P. private drilling partnership for activities directly related to their program. We intend to continue to fund the Drilling Partnerships' operations and obligations, as necessary, until they are liquidated. Depending on commodity pricing and each of the Drilling Partnerships' reserves value, we expect to realize all outstanding receivables from the Drilling Partnerships' through the receipt of cash flows from their operations and/or the transfer of net assets and liabilities to us upon their liquidation. As of March 31, 2016 and December 31, 2015, we had receivables of \$7.9 million and a \$6.6 million, respectively, from certain of the Drilling Partnerships', which was recorded in accounts receivable in the condensed consolidated balance sheets. As of March 31, 2016 and December 31, 2015, we had payables of \$3.9 million and \$3.0 million, respectively, to certain of the Drilling Partnerships', which was recorded in accounts payable in the condensed consolidated balance sheets.

Relationship with AGP. At the direction of ATLS, we allocate indirect costs, such as rent and other general and administrative costs, to AGP based on the number of ATLS employees who devoted time to AGP's activities. In addition, Anthem Securities, Inc. ("Anthem"), a wholly owned subsidiary of us, acted as dealer manager for AGP's private placement offering, which was completed in June 2015. As the dealer manager, Anthem received compensation from AGP equal to a maximum of 12% of the gross proceeds of the private placement offering as selling commissions, marketing efforts, and other issuance costs. Anthem is currently acting as the dealer manager for AGP's issuance and sale in a continuous offering of up to a maximum agreement amount of 100,000,000 common units representing limited partner interests in AGP as further described in AGP's registration statement on Form S-1 (File No. 333-207537). AGP will pay Anthem (1) compensation equal to 3.00% of the gross proceeds of the offering (Anthem may reallow up to 1.50% of gross offering proceeds it receives as dealer manager fees to participating broker-dealers, but expects to reallow 1.25% of gross offering proceeds to participating broker-dealers); (2) 7.00% and 3.00% of aggregate gross proceeds from the sale of Class A common units and Class T common units, respectively, as sales commissions; (3) with respect to Class T common units, a distribution and unitholder servicing fee in the aggregate amount of 4.00% of the gross proceeds from the sale of Class T common units, which distribution and unitholder servicing fee will be withheld from cash distributions otherwise payable to the purchasers of Class T common units at a rate of \$0.025 per quarter per unit. As of March 31, 2016 and December 31, 2015, we had a \$3.8 million receivable and \$8.7 million payable, respectively, to/from AGP related to AGP's indirect cost allocation and dealer manager costs, which was recorded in advances to/from affiliates in the condensed consolidated balance sheets.

NOTE 8 — COMMITMENTS AND CONTINGENCIES

General Commitments

We are the ultimate managing general partner of the Drilling Partnerships and have agreed to indemnify each investor partner from any liability that exceeds such partner's share of Drilling Partnership assets. We have structured certain Drilling Partnerships to allow limited partners to have the right to present their interests for purchase. Generally for Drilling Partnerships with this structure, we are not obligated to purchase more than 5% to 10% of the units in any calendar year, no units may be purchased during the first five years after closing for the Drilling Partnership, and we may immediately suspend the presentment structure for a Drilling Partnership by giving notice to the limited partners that we do not have adequate liquidity for redemptions. In accordance with the Drilling Partnership agreement, the purchase price for limited partner interests would generally be based upon a percentage of the present value of future cash flows allocable to the interest, discounted at 10%, as of the date of presentment, subject to estimated changes by us to reflect current well performance, commodity prices and production costs, among other items. Based on our historical experience, as of March 31, 2016, our management believes that any such estimated liability for redemptions of limited partner interests in Drilling Partnerships which allow such transactions would not be material.

While our historical structure has varied, we have generally agreed to subordinate a portion of our share of Drilling Partnership gas and oil production revenue, net of corresponding production costs and up to a maximum of 50% of unhedged revenue, from certain Drilling Partnerships for the benefit of the limited partner investors until they have received specified returns, typically from 10% to 12% per year determined on a cumulative basis, over a specified period, typically the first five to eight years, in accordance with the terms of the partnership agreements. We periodically compare the projected return on investment for limited partners in a Drilling Partnership during the subordination period, based upon historical and projected cumulative gas and oil production revenue and expenses, with the return on investment subject to subordination agreed upon within the Drilling Partnership agreement. If the projected return on investment falls below the agreed upon rate, we recognize subordination as an estimated reduction

of our pro-rata share of gas and oil production revenue, net of corresponding production costs, during the current period in an amount that will achieve the agreed upon investment return, subject to the limitation of 50% of unhedged cumulative net production revenues over the subordination period. For Drilling Partnerships for which we have recognized subordination in a historical period, if projected investment returns subsequently reflect that the agreed upon limited partner investment return will be achieved during the subordination period, we will recognize an estimated increase in our portion of historical cumulative gas and oil net production, subject to a limitation of the cumulative subordination previously recognized. For the three months ended March 31, 2016 and 2015, \$0.1 million and \$0.5 million, respectively, of our gas and oil production revenues, net of corresponding production costs, from certain Drilling Partnerships were subordinated, which reduced gas and oil production revenues and expenses.

As of March 31, 2016, we are committed to expend approximately \$5.5 million, principally on drilling and completion expenditures.

Legal Proceedings

We are party to various routine legal proceedings arising out of the ordinary course of our business. Management believes that none of these actions, individually or in the aggregate, will have a material adverse effect on our financial condition or results of operations.

NOTE 9 –ISSUANCES OF UNITS

We have an equity distribution agreement with Deutsche Bank Securities Inc., as representative of the several banks named therein (the “Agents”). Pursuant to the equity distribution agreement, we may sell from time to time through the Agents common units representing limited partner interests of us having an aggregate offering price of up to \$100.0 million. Sales of common units may be made in negotiated transactions or transactions that are deemed to be “at-the-market” offerings as defined in Rule 415 of the Securities Act, including sales made directly on the New York Stock Exchange, the existing trading market for the common units, or sales made to or through a market maker other than on an exchange or through an electronic communications network. We pay each of the Agents a commission, which in each case shall not be more than 2.0% of the gross sales price of common units sold through such Agent. Under the terms of the equity distribution agreement, we may also sell common units from time to time to any Agent as principal for its own account at a price to be agreed upon at the time of sale. Any sale of common units to an Agent as principal would be pursuant to the terms of a separate terms agreement between us and such Agent. During the three months ended March 31, 2016, we issued 245,175 common limited partner units under the equity distribution program for net proceeds of \$0.2 million, net of approximately \$19,000 in commissions and offering expenses paid. During the three months ended March 31, 2015, we issued 420,586 common limited partner units under the equity distribution program for net proceeds of \$3.3 million, net of \$0.1 million in commissions and offering expenses paid.

In August 2015, we entered into a distribution agreement with MLV & Co. LLC, which we terminated and replaced in November 2015, when we entered into a distribution agreement with MLV and FBR Capital Markets & Co. in which we may sell our 8.625% Class D Cumulative Redeemable Perpetual Preferred Units (“Class D Preferred Units”) and Class E Cumulative Redeemable Perpetual Preferred Units (“Class E Preferred Units”). Under both the August 2015 ATM Agreement and the November 2015 ATM Agreement, we did not issue any Class D Preferred units nor Class E Preferred Units under the preferred equity distribution program for the three months ended March 31, 2016 and 2015.

On March 31, 2015, to partially pay our portion of a quarterly installment related to the Eagle Ford acquisition, we issued an additional 800,000 Class D Preferred Units to the seller at a value of \$25.00 per unit.

On January 12, 2016, we were notified by the NYSE that we were not in compliance with NYSE’s continued listing criteria under Section 802.01C of the NYSE Listed Company Manual because the average closing price of our common units had been less than \$1.00 for 30 consecutive trading days. We are working to remedy this situation in a timely manner as set forth in the applicable NYSE rules in order to maintain our listing on the NYSE.

NOTE 10 – CASH DISTRIBUTIONS

We have a monthly cash distribution program whereby we distribute all of our available cash (as defined in the partnership agreement) for that month to our unitholders within 45 days from the month end. If our common unit distributions in any quarter exceed specified target levels, ATLS will receive between 13% and 48% of such distributions in excess of the specified target levels. While outstanding, our Class B Preferred Units received regular quarterly cash distributions equal to the greater of (i) \$0.40 (or \$0.1333 per unit paid on a monthly basis) and (ii) the quarterly common unit distribution. Until the Board’s decision in May 2016 (as discussed below), while outstanding, our Class C Preferred Units receive regular quarterly cash distributions equal to the greater of (i) \$0.51 (or \$0.17 per unit paid on a monthly basis) and (ii) the quarterly common unit distribution. We pay quarterly distributions on our Class D Preferred Units at an annual rate of \$2.15625 per unit, \$0.5390625 per unit paid on a quarterly basis, or 8.625% of the \$25.00 liquidation preference. We pay quarterly distributions on our Class E Preferred Units at an

annual rate of \$2.6875 per unit, or \$0.671875 per unit on a quarterly basis, or 10.75% of the \$25.00 liquidation preference. On May 5, 2016, the Board of Directors elected to suspend our common unit and Class C preferred distributions, beginning with the month of March of 2016, due to the continued lower commodity price environment.

During the three months ended March 31, 2016, we paid three monthly cash distributions totaling approximately \$3.8 million to common limited partners (\$0.0125 per unit per month); \$1.9 million to Preferred Class C limited partners (\$0.17 per unit per month); and \$0.1 million to the General Partner Class A holder (\$0.0125 per unit per month). During the three months ended March 31, 2015, we paid three monthly cash distributions totaling approximately \$42.8 million to common limited partners (\$0.1966 per unit for both January and February 2015 and \$0.1083 per unit for March 2015); \$2.1 million to Preferred Class C limited partners (\$0.1966 per unit for both January and February 2015 and \$0.17 per unit for March 2015); and \$3.0 million to the General Partner Class A holder (\$0.1966 per unit for both January and February 2015 and \$0.1083 per unit for March 2015).

During the three months ended March 31, 2016, we paid a distribution of \$2.2 million to Class D Preferred limited partners (\$0.5390625 per unit) for the period October 15, 2015 through January 14, 2016. During the three months ended March 31, 2015, we paid a distribution of \$2.0 million to Class D Preferred limited partners (\$0.6169270 per unit) for the period October 2, 2014 through January 14, 2015.

During the three months ended March 31, 2016, we paid a distribution of \$0.2 million to Class E Preferred limited partners (\$0.671875 per unit) for the period October 15, 2015 through January 14, 2016. No distributions were paid to Class E Preferred limited partners during the three months ended March 31, 2015.

NOTE 11 – OPERATING SEGMENT INFORMATION

Our operations include three reportable operating segments. These operating segments reflect the way we manage our operations and make business decisions. Operating segment data for the periods indicated were as follows (in thousands):

	Three Months Ended	
	March 31, 2016	2015
Gas and oil production: ⁽³⁾		
Revenues	\$94,612	\$209,834
Operating costs and expenses	(35,842)	(45,498)
Depreciation, depletion and amortization expense	(26,580)	(40,118)
Segment income	\$32,190	\$124,218
Well construction and completion:		
Revenues	\$2,100	\$23,655
Operating costs and expenses	(1,826)	(20,570)
Segment income	\$274	\$3,085
Other partnership management: ⁽¹⁾		
Revenues	\$6,496	\$10,100
Operating costs and expenses	(4,457)	(4,615)
Depreciation, depletion and amortization expense	(3,465)	(2,873)
Segment income (loss)	\$(1,426)	\$2,612
Reconciliation of segment income (loss) to net income:		
Segment income (loss):		
Gas and oil production	\$32,190	\$124,218
Well construction and completion	274	3,085
Other partnership management	(1,426)	2,612
Total segment income	31,038	129,915
General and administrative expenses ⁽²⁾	(17,077)	(17,135)
Interest expense ⁽²⁾	(27,705)	(25,197)
Gain on early extinguishment of debt ⁽²⁾	26,498	—
Gain (loss) on asset sales and disposal ⁽²⁾	9	(11)
Net income	\$12,763	\$87,572
Reconciliation of segment revenues to total revenues:		
Gas and oil production ⁽³⁾	\$94,612	\$209,834
Well construction and completion	2,100	23,655
Other partnership management	6,496	10,100

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

Total revenues	\$ 103,208	\$ 243,589
Capital expenditures:		
Gas and oil production	\$ 11,945	\$ 32,192
Other partnership management	1,134	10,094
Corporate and other	91	212
Total capital expenditures	\$ 13,170	\$ 42,498

- (1) Includes revenues and expenses from well services, gathering and processing, administration and oversight, and other, net that do not meet the quantitative threshold for reporting segment information.
- (2) Gain (loss) on asset sales and disposal, general and administrative expenses, gain on early extinguishment of debt and interest expense have not been allocated to reportable segments as it would be impracticable to reasonably do so for the periods presented.
- (3) Gas and oil production segment revenues include gains on mark to market derivatives.

21

	March 31, 2016	December 31, 2015
Balance sheet:		
Goodwill:		
Well construction and completion	\$6,389	\$ 6,389
Other partnership management	7,250	7,250
Total goodwill	\$13,639	\$ 13,639
Total assets:		
Gas and oil production	\$1,524,980	\$ 1,551,450
Well construction and completion	7,170	27,039
Other partnership management	64,067	66,641
Corporate and other	83,280	54,819
Total assets	\$1,679,497	\$ 1,699,949

NOTE 12 – SUBSEQUENT EVENTS

Cash Distributions. On April 15, 2016, we paid a quarterly distribution of \$2.2 million to Class D Preferred limited partners (\$0.5390625 per unit) for the period January 15, 2016 through April 14, 2016.

On April 15, 2016, we paid a quarterly distribution of \$0.2 million to Class E Preferred limited partners (\$0.671875 per unit) for the period January 15, 2016 through April 14, 2016.

On May 5, 2016, the Board of Directors elected to suspend our common unit and Class C preferred distributions, beginning with the month of March of 2016, due to the continued lower commodity price environment.

Ninth Amendment to the Credit Agreement. On May 10, 2016, we entered into the Ninth Amendment to the Credit Agreement (see Note 4).

Long-Term Incentive Plan Vesting Delay. On May 12, 2016, due to the income tax ramifications of the potential options we are currently considering, the Board of Directors of our General Partner delayed the vesting date of approximately 110,000 units granted to employees and officers in until March 2017. The phantom units, which were set to vest on May 15, 2016, were originally granted in May 2012.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

When used in this Form 10-Q, the words "believes," "anticipates," "expects" and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties more particularly described in "Item 1A. Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2015. These risks and uncertainties could cause actual results to differ materially from the results stated or implied in this document. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly release the results of any revisions to forward-looking statements, which we may make to reflect events or circumstances after the date of this Form 10-Q or to reflect the occurrence of unanticipated events.

BUSINESS OVERVIEW

We are a publicly-traded (NYSE: ARP) Delaware master-limited partnership ("MLP") and an independent developer and producer of natural gas, crude oil and natural gas liquids ("NGL"), with operations in basins across the United States. We sponsor and manage tax-advantaged investment partnerships ("Drilling Partnerships"), in which we coinvest, to finance a portion of our natural gas, crude oil and natural gas liquid production activities.

Atlas Energy Group, LLC ("Atlas Energy Group" or "ATLS"; OTCQX: ATLS), our general partner, manages our operations and activities through its ownership interest. At March 31, 2016, Atlas Energy Group owned 100% of our general partner Class A units, all of the incentive distribution rights through which it manages and effectively controls us and an approximate 23.3% limited partner interest (20,962,485 common and 3,749,986 preferred limited partner units) in us.

In addition to its general and limited partner interest in us, ATLS also holds general and limited partner interests in Atlas Growth Partners, L.P. ("AGP"), a Delaware limited partnership and an independent developer and producer of natural gas, oil and NGLs, with operations primarily focused in the Eagle Ford Shale, and in Lightfoot Capital Partners, L.P. and Lightfoot Capital Partners GP, LLC, which incubate new MLPs and invest in existing MLPs.

FINANCIAL PRESENTATION

Our consolidated balance sheets at March 31, 2016 and December 31, 2015, and the consolidated statements of operations for the three months ended March 31, 2016 and 2015 include our accounts and our wholly-owned subsidiaries. Accounting principles generally accepted in the United States of America require management to make estimates and assumptions that affect the amounts reported in the consolidated balance sheets and related consolidated statements of operations. Actual balances and results could be different from those estimates. All significant intercompany transactions and balances have been eliminated in the consolidation of the financial statements.

RECENT DEVELOPMENTS

- Revolving credit facility amendment. On May 10, 2016, we entered into an amendment to our revolving credit agreement to waive the requirement of certain of our financial covenant ratios as of March 31, 2016. See our Liquidity and Capital Resources section for further details.
- Senior Note Repurchases. In January and February 2016, we executed transactions to repurchase approximately \$20.3 million of our unsecured 7.75% Senior Notes in 2021 and approximately \$12.1 million of our unsecured

9.25% Senior Notes for approximately \$5.5 million. As a result of these transactions, we recognized approximately \$26.5 million as gain on early extinguishment of debt in the first quarter of 2016. (See Item 1: “Financial Statements (Unaudited)” – Note 4 for further details).

·NYSE Compliance. On January 12, 2016, we were notified by the NYSE that we were not in compliance with NYSE’s continued listing criteria under Section 802.01C of the NYSE Listed Company Manual because the average closing price of the common units had been less than \$1.00 for 30 consecutive trading days. We are working to remedy this situation in a timely manner as set forth in the applicable NYSE rules in order to maintain our listing on the NYSE.

GENERAL TRENDS AND OUTLOOK

We expect our business to be affected by key trends in natural gas and oil production markets. Our expectations are based on assumptions made by us and information currently available to us. To the extent our underlying assumptions about or interpretations of available information prove to be incorrect, our actual results may vary materially from our expected results.

The natural gas, oil and natural gas liquids commodity price markets have suffered significant declines since the fourth quarter of 2014 through the first quarter of 2016. The causes of these declines are based on a number of factors, including, but not limited to, a significant increase in natural gas, oil and NGL production. While we anticipate continued high levels of exploration and production activities over the long-term in the areas in which we operate, fluctuations in energy prices can greatly affect production rates and investments in the development of new natural gas, oil and NGL reserves.

Our future gas and oil reserves, production, cash flow, our ability to make payments on our debt and our ability to make distributions to our unitholders, including ATLS, depend on our success in producing our current reserves efficiently, developing our existing acreage and acquiring additional proved reserves economically. We face the challenge of natural production declines and volatile natural gas, oil and NGL prices. As initial reservoir pressures are depleted, natural gas and oil production from particular wells decrease. We attempt to overcome this natural decline by drilling to find additional reserves and acquiring more reserves than we produce. To the extent we do not have sufficient capital, our ability to drill and acquire more reserves will be negatively impacted.

RESULTS OF OPERATIONS

Gas and Oil Production

Production Profile. Currently, we have focused our natural gas, crude oil and NGL production operations in various plays throughout the United States. Through March 31, 2016, we have established production positions in the following operating areas:

- South Texas - the Eagle Ford Shale, in which we and AGP acquired acreage and producing wells in November 2014;
- coal-bed methane producing natural gas assets in (1) the Raton Basin in northern New Mexico and the Black Warrior Basin in central Alabama, acquired in 2013; (2) the Central Appalachia Basin in West Virginia and Virginia, acquired in 2014, and; (3) the Arkoma Basin in eastern Oklahoma, acquired in 2015.
- the Rangely field in northwest Colorado, a mature tertiary CO₂ flood with low-decline oil production, where we have a 25% non-operated net working interest position which we acquired on June 30, 2014;
- the Appalachia Basin assets, including the Marcellus Shale, a rich, organic shale that generally contains dry, pipeline-quality natural gas, and the Utica Shale, which lies several thousand feet below the Marcellus Shale, is much thicker than the Marcellus Shale and trends primarily towards wet natural gas in the central region and dry gas in the eastern region; the Chattanooga Shale in northeastern Tennessee, which enables us to access other formations in that region such as the Monteagle and Ft. Payne Limestone; and the New Albany Shale in southwestern Indiana, a biogenic shale play with a long-lived and shallow decline profile;
- North Texas - the Barnett Shale and Marble Falls play, both in the Fort Worth Basin. The Barnett Shale contains mostly dry gas and the Marble Falls play contains liquids rich gas and oil.
- the Mid-Continent assets, including Mississippi Lime and Hunton plays in northwestern Oklahoma, an oil and NGL-rich area, and the Niobrara Shale assets in northeastern Colorado, a predominantly biogenic shale play that produces dry gas.

The following table presents the number of wells we drilled and the number of wells we turned in line, both gross and for our interest, during the three months ended March 31, 2016 and 2015:

	Three Months Ended
	March 31, 2016
	2015
Gross wells drilled:	
Barnett/Marble Falls	— 3
Mississippi Lime	— 2
Total	— 5
Net wells drilled ⁽¹⁾ :	
Barnett/Marble Falls	— 2
Mississippi Lime	— 1
Total	— 3
Gross wells turned in line ⁽²⁾⁽³⁾ :	
Barnett/Marble Falls	— 14
Eagle Ford	— 2
Mississippi Lime	— 5
Total	— 21
Net wells turned in line ⁽¹⁾⁽²⁾⁽³⁾ :	
Barnett/Marble Falls	— 4
Eagle Ford	— 1
Mississippi Lime	— 2
Total	— 7

(1) Includes (i) our percentage interest in the wells in which we have a direct ownership interest and (ii) our percentage interest in the wells based on our percentage ownership in our Drilling Partnerships.

(2) Wells turned in line refers to wells that have been drilled, completed, and connected to a gathering system.

(3) There were no exploratory wells drilled during the three months ended March 31, 2016 and 2015; there were no gross or net dry wells within our operating areas during the three months ended March 31, 2016 and 2015.

Production Volumes. The following table presents our total net natural gas, crude oil, and NGL production volumes per day in each of our operating areas and total production for the three months ended March 31, 2016 and 2015:

	Three Months Ended March 31,	
	2016	2015
Production volumes per day: ⁽¹⁾⁽²⁾		
Appalachia: ⁽³⁾		
Natural gas (Mcfed)	31,545	35,158
Oil (Bpd)	295	359
NGLs (Bpd)	290	240
Total (Mcfed)	35,054	38,752
Coal-bed Methane: ⁽³⁾		
Natural gas (Mcfed)	120,549	134,133
Oil (Bpd)	—	—
NGLs (Bpd)	—	—
Total (Mcfed)	120,549	134,133
Barnett/Marble Falls:		
Natural gas (Mcfed)	36,821	49,617
Oil (Bpd)	322	749
NGLs (Bpd)	1,457	2,274
Total (Mcfed)	47,497	67,755
Rangely:		
Natural gas (Mcfed)	—	—
Oil (Bpd)	2,354	2,361
NGLs (Bpd)	256	253
Total (Mcfed)	15,657	15,680
Eagle Ford:		
Natural gas (Mcfed)	389	500
Oil (Bpd)	1,362	1,550
NGLs (Bpd)	81	106
Total (Mcfed)	9,049	10,434
Mid-Continent: ⁽³⁾		
Natural gas (Mcfed)	5,246	7,931
Oil (Bpd)	231	514
NGLs (Bpd)	425	615
Total (Mcfed)	9,178	14,709
Total production volumes per day:		
Natural gas (Mcfed)	194,550	227,340
Oil (Bpd)	4,563	5,533
NGLs (Bpd)	2,509	3,488
Total (Mcfed)	236,983	281,463
Total production: ⁽¹⁾⁽²⁾		
Natural gas (MMcf)	17,704	20,461

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

Oil (000's Bbls)	415	498
NGLs (000's Bbls)	228	314
Total (MMcfe)	21,565	25,332

- (1) Production quantities consist of the sum of (i) our proportionate share of production from wells in which we have a direct interest, based on our proportionate net revenue interest in such wells, and (ii) our proportionate share of production from wells owned by the Drilling Partnerships in which we have an interest, based on our equity interest in each such Drilling Partnership and based on each Drilling Partnership's proportionate net revenue interest in these wells.
- (2) "MMcf" represents million cubic feet; "MMcfe" represent million cubic feet equivalents; "Mcf" represents thousand cubic feet per day; "Mcfed" represents thousand cubic feet equivalents per day; and "Bbls" and "Bpd" represent barrels and barrels per day. Barrels are converted to Mcfe using the ratio of approximately 6 Mcf to one barrel.
- (3) Appalachia includes our production located in Pennsylvania, Ohio, New York, West Virginia (excluding the Cedar Bluff area) and the Chattanooga (Tennessee) and New Albany (Indiana) Shales; Coal-bed methane includes our production located in the Raton Basin in northern New Mexico, the Black Warrior Basin in central Alabama, the Cedar Bluff area of West Virginia and Virginia, and the Arkoma Basin in eastern Oklahoma; Mid-Continent includes our production located in the Mississippi Lime and Hunton plays and the Niobrara Shale (northeastern Colorado).

Production Revenues, Prices and Costs. Our production revenues and estimated gas and oil reserves are substantially dependent on prevailing market prices for natural gas and oil. The following table presents our production revenues and average sales prices for our natural gas, oil, and natural gas liquids production for the three months ended March 31, 2016 and 2015 along with our average production costs, which include lease operating expenses, taxes, and transportation and compression costs, in each of the reported periods:

	Three Months Ended March 31,	
	2016	2015
Production revenues (in thousands): ⁽¹⁾		
Appalachia: ⁽²⁾		
Natural gas revenue	\$3,795	\$4,994
Oil revenue	1,201	2,213
Natural gas liquids revenue	25	241
Total revenues	\$5,021	\$7,448
Coal-bed Methane: ⁽²⁾		
Natural gas revenue	\$23,839	\$47,841

Barnett/Marble Falls:		
Lease operating expenses	\$0.97	\$1.41
Production taxes	0.17	0.18
Transportation and compression	0.21	0.07
	\$1.34	\$1.66
Rangely:		
Lease operating expenses	\$4.36	\$4.01
Production taxes	0.56	1.01
Transportation and compression	0.01	0.01
	\$4.92	\$5.03
Eagle Ford:		
Lease operating expenses	\$1.75	\$1.60
Production taxes	0.38	0.30
Transportation and compression	0.10	0.04
	\$2.23	\$1.94
Mid-Continent:		
Lease operating expenses	\$1.58	\$1.45
Production taxes	0.06	0.08
Transportation and compression	0.30	0.26
	\$1.94	\$1.79
Total production costs:		
Lease operating expenses ⁽⁶⁾	\$1.25	\$1.35
Production taxes	0.18	0.24
Transportation and compression	0.26	0.23
	\$1.69	\$1.82

⁽¹⁾ Production revenue excludes the impact of cash settlements on commodity derivative contracts not previously included within accumulated other comprehensive income following our decision to de-designate hedges beginning on January 1, 2015, consisting of \$28.5 million associated with natural gas derivative contracts and \$16.7 million

associated with crude oil derivative contracts for the three months ended March 31, 2016, and \$5.6 million associated with natural gas derivative contracts, \$7.9 million associated with crude oil derivative contracts, and \$1.7 million associated with natural gas liquids derivative contracts for the three months ended March 31, 2015 (see “Item 1. Financial Statements – Note 5”).

- (2) Appalachia includes our production located in Pennsylvania, Ohio, New York, West Virginia (excluding the Cedar Bluff area) and the Chattanooga (Tennessee) and New Albany (Indiana) Shales; Coal-bed methane includes our production located in the Raton Basin in northern New Mexico, the Black Warrior Basin in central Alabama, the Cedar Bluff area of West Virginia and Virginia, and the Arkoma Basin in eastern Oklahoma; Mid-Continent includes our production located in the Mississippi Lime and Hunton plays and Niobrara Shale (northeastern Colorado).
- (3) “Mcf” represents thousand cubic feet; “Mcf_e” represents thousand cubic feet equivalents; and “Bbl” represents barrels.
- (4) Excludes the impact of subordination of our production revenue to investor partners within our Drilling Partnerships for the three months ended March 31, 2016 and 2015. Including the effect of this subordination, the average realized gas sales price was \$3.37 per Mcf (\$1.74 per Mcf before the effects of financial hedging) and \$3.53 per Mcf (\$2.48 per Mcf before the effects of financial hedging) for the three months ended March 31, 2016 and 2015, respectively.
- (5) Includes the impact of cash settlements on commodity derivative contracts not previously included within accumulated other comprehensive income following our decision to de-designate hedges beginning on January 1, 2015, consisting of \$28.5 million associated with natural gas derivative contracts and \$16.7 million associated with crude oil derivative contracts for the three months ended March 31, 2016, and \$5.6 million associated with natural gas derivative contracts, \$7.9 million associated with crude oil derivative contracts, and \$1.7 million associated with natural gas liquids derivative contracts for the three months ended March 31, 2015 (see “Item 1. Financial Statements – Note 5”).

- (6) Excludes the effects of our proportionate share of lease operating expenses associated with subordination of our production revenue to investor partners within our Drilling Partnerships for the three months ended March 31, 2016 and 2015. Including the effects of these costs, Appalachia lease operating expenses were \$0.66 per Mcfe (\$0.97 per Mcfe for total production costs) and \$0.91 per Mcfe (\$1.30 per Mcfe for total production costs) for the three months ended March 31, 2016 and 2015, respectively. Including the effects of these costs, total lease operating expenses per Mcfe were \$1.23 per Mcfe (\$1.66 per Mcfe for total production costs) and \$1.33 per Mcfe (\$1.80 per Mcfe for total production costs) for the three months ended March 31, 2016 and 2015, respectively.

	Three Months Ended	
	March 31,	
	2016	2015
	(in thousands)	
Gas and oil production revenues	\$48,492	\$104,249
Gas and oil production costs	\$35,842	\$45,498
Total production costs per Mcfe	\$1.69	\$1.82

The \$55.8 million decrease in gas and oil production revenues consisted of a \$24.0 million decrease attributable to our Coal-bed Methane operations, a \$13.0 million decrease attributable to our Barnett Shale/Marble Falls operations, an \$8.9 million decrease associated with our Rangely operations, a \$4.2 million decrease attributable to our Eagle Ford operations, a \$3.3 million decrease attributable to our Mid-Continent operations and a \$2.4 million decrease attributable to our Appalachia operations.

The \$9.7 million decrease in gas and oil production expenses primarily consisted of a \$4.3 million decrease attributable to our Barnett Shale/Marble Falls operations, a \$3.1 million decrease attributable to our Coal-bed Methane operations, a \$1.4 million decrease attributable to our Appalachia operations, an \$0.8 million decrease attributable to our Mid-Continent operations and a \$0.1 million decrease attributable to our Rangely operations. Total production costs per Mcfe decreased between the periods primarily as a result of continued efforts to reduce operating costs in each of our areas of production.

PARTNERSHIP MANAGEMENT

Well Construction and Completion

Drilling Program Results. The number of wells we drill will vary within the partnership management segment depending on the amount of capital we raise through our Drilling Partnerships, the cost of each well, the depth or type of each well, the estimated recoverable reserves attributable to each well and accessibility to the well site. Well construction and completion revenues and costs and expenses incurred represent the billings and costs associated with the completion of wells for Drilling Partnerships we sponsor. The following table presents the amounts of Drilling Partnership investor capital raised and deployed, as well as sets forth information relating to these revenues and the related costs and number of net wells associated with these revenues during the periods indicated (dollars in thousands):

Three Months
Ended

Edgar Filing: Atlas Resource Partners, L.P. - Form 10-Q

	March 31,	
	2016	2015
Drilling partnership investor capital:		
Raised	\$—	\$—
Deployed	\$2,100	\$23,655
Average construction and completion:		
Revenue per well	\$4,200	\$2,290
Cost per well	3,652	1,991
Gross profit per well	\$548	\$299
Gross profit margin	\$274	\$3,085
Partnership net wells associated with revenue recognized ⁽¹⁾ :		
Appalachia - Utica	—	1
Marble Falls	—	5
Eagle Ford	1	—
Mississippi Lime	—	4
Total	1	10

⁽¹⁾Consists of Drilling Partnership net wells for which well construction and completion revenue was recognized on a percentage of completion basis.

29

The \$2.8 million decrease in well construction and completion gross profit margin consisted of a \$2.9 million decrease related to fewer wells recognized for revenue within our Drilling Partnerships, partially offset by a \$0.1 million increase associated with our higher gross profit margin per well. Average revenue and cost per well increased between periods due primarily to capital deployment for Eagle Ford Shale wells, which have a higher completion cost, during the three months ended March 31, 2016 in comparison to capital deployment primarily for lower cost Marble Falls wells during the prior year period. As our drilling contracts with the Drilling Partnerships are on a “cost-plus” basis, an increase or decrease in our average cost per well also results in a proportionate increase or decrease in our average revenue per well, which directly affects the number of wells we drill.

Administration and Oversight

Three Months
 Ended March
 31,
 2016 2015
 (in thousands)

Administration and oversight revenues \$455 \$1,259

Administration and oversight fee revenues represent supervision and administrative fees earned for the drilling and subsequent ongoing management of wells for our Drilling Partnerships. Typically, we receive a lower administration and oversight fee related to shallow, vertical wells we drill within the Drilling Partnerships, such as those in the Marble Falls play, as compared to deep, horizontal wells, such as those drilled in the Marcellus and Utica Shales. The following table presents the number of gross and net development wells we drilled for our Drilling Partnerships during three months ended March 31, 2016 and 2015. There were no exploratory wells drilled during the three months ended March 31, 2016 and 2015:

	Three Months Ended	March 31, 2016	2015
Gross partnership wells drilled:			
Barnett/Marble Falls	—	2	
Mississippi Lime/Hunton	—	2	
Total	—	4	
Net partnership wells drilled:			
Barnett/Marble Falls	—	2	
Mississippi Lime/Hunton	—	1	
Total	—	3	

The \$0.8 million decrease in administration and oversight fee revenues was due to a decrease in the number of wells spud within the current year period compared with the prior year period.

Well Services

Three Months
Ended

March 31,
2016 2015
(in thousands)

Well services revenues \$4,432 \$6,624

Well services expenses \$2,178 \$2,198

Well service revenue and expenses represent the monthly operating fees we charge and the work our service company performs, including work performed for our Drilling Partnership wells during the drilling and completing phase as well as ongoing maintenance of these wells and other wells for which we serve as operator.

The \$2.2 million decrease in well services revenue is primarily related to lower fee revenue associated with our salt water gathering and disposal systems within the Mississippi Lime and Marble Falls plays, which are utilized by our Drilling Partnership wells, and an increased number of wells having been shut in, which results in a reduction of the monthly operating fees which we charge the drilling partnerships.

30

Gathering and Processing

Three Months
Ended

March 31,
2016 2015
(in thousands)

Gathering and processing margin \$(784) \$(233)

Gathering and processing margin includes gathering fees we charge to our Drilling Partnership wells and the related expenses and gross margin for our processing plants in the New Albany Shale and the Chattanooga Shale. Generally, we charge a gathering fee to our Drilling Partnership wells equivalent to the fees we remit. In Appalachia, a majority of our Drilling Partnership wells are subject to a gathering agreement, whereby we remit a gathering fee of 16%. However, based on the respective Drilling Partnership agreements, we charge our Drilling Partnership wells a 13% gathering fee. As a result, some of our gathering expenses within our partnership management segment, specifically those in the Appalachian Basin, will generally exceed the revenues collected from the Drilling Partnerships by approximately 3%.

The \$0.6 million unfavorable movement in gathering and processing margin was principally due to lower gathering fees, particularly from our Marcellus Shale Drilling Partnership wells in Northeastern Pennsylvania, which are utilizing our gathering pipeline, in comparison with the prior year period.

OTHER REVENUES AND EXPENSES

Three Months
Ended

March 31,
2016 2015
(in thousands)

Other Revenues		
Gain on mark-to-market derivatives	\$46,120	\$105,585
Other, net	114	33
Other Expenses		
General and administrative	\$17,077	\$17,135
Depreciation, depletion and amortization	30,045	42,991
Interest expense	27,705	25,197
Gain (loss) on asset sales and disposal	9	(11)
Gain on extinguishment of debt	26,498	—

Gain on Mark-to-Market Derivatives. We recognize changes in the fair value of our derivatives immediately within gain (loss) on mark-to-market derivatives on our condensed consolidated statements of operations. The recognized gains are due to decreases in commodity future prices during each respective period.

Depreciation, Depletion and Amortization. The decrease in depreciation, depletion and amortization was primarily due to a \$13.5 million decrease in our depletion expense. The following table presents total depletion expense, depletion as a percent of gas and oil production revenue and depletion expense per Mcfe for our operations for the respective periods (in thousands, except for percentage and per Mcfe data):

	Three Months Ended	
	March 31, 2016	2015
Depletion expense:		
Total	\$26,580	\$40,118
Depletion expense as a percentage of gas and oil production revenue	55 %	38 %
Depletion per Mcfe	\$1.23	\$1.58

Depletion expense varies from period to period and is directly affected by changes in our gas and oil reserve quantities, production levels, product prices and changes in the depletable cost basis of our gas and oil properties. The decreases in depletion expense and depletion expense per Mcfe when compared with the comparable prior year period were due to impairments of our proved properties recorded in the third and fourth quarters of 2015 as a result of lower forecasted commodity prices, which reduced

the depletable cost basis of our proved gas and oil properties in the current quarter. The increase in the depletion expense as a percentage of gas and oil revenues when compared with the comparable prior year period was due to a decrease in our gas and oil revenues as a result of lower commodity prices and production volumes in the current quarter, partially offset by the decrease in depletion expense described above.

Interest Expense. The increase in our interest expense consisted of a \$3.8 million increase associated with our Term Loan Facility entered into February 2015, a \$1.5 million decrease in capitalized interest due to lower capital spending, a \$1.1 million increase associated with amortization of our deferred financing costs and a \$0.8 million increase associated with higher outstanding borrowings under our revolving credit facility, partially offset by a \$4.3 million decrease associated with accelerated amortization of our deferred financing costs resulting from a reduction of the borrowing base of our credit facility in February 2015 and a \$0.4 million decrease associated with interest expense on our Senior Notes due to our repurchases in January and February of 2016.

Gain on Early Extinguishment of Debt. The gain on early extinguishment of debt for the three months ended March 31, 2016 represents a \$26.5 million gain related to the repurchase of a portion of our 7.75% and 9.25% Senior Notes. Of the \$26.5 million gain, \$27.4 million related to the gain from the redemption of the principal values and accrued interest, partially offset by \$0.9 million related to the accelerated amortization of the related deferred financing costs.

LIQUIDITY AND CAPITAL RESOURCES

General

Our primary sources of liquidity are cash generated from operations, capital raised through our Drilling Partnerships, and borrowings under our revolving credit facility (see “Credit Facilities”). Our primary cash requirements, in addition to normal operating expenses, are for debt service, capital expenditures and distributions to our limited partners and general partner. In general, we expect to fund:

- cash distributions and maintenance capital expenditures through existing cash and cash flows from operating activities;
- expansion capital expenditures and working capital deficits through cash generated from operations, additional borrowings and capital raised through Drilling Partnerships; and
- debt service principal payments through additional borrowings as they become due or by the issuance of additional limited partner units or asset sales.

We have historically funded our operations, acquisitions and cash distributions primarily through cash generated from operations, amounts available under our credit facilities and equity and debt offerings. Our future cash flows are subject to a number of variables, including oil and natural gas prices. Prices for oil and natural gas began to decline significantly during the fourth quarter of 2014 and have continued to decline and remain low in 2016. These lower commodity prices have negatively impacted our revenues, earnings and cash flows. Sustained low commodity prices will have a material and adverse effect on our liquidity position.

On May 10, 2016, we entered into a ninth amendment (the “Ninth Amendment”) to our Second Amended and Restated Credit Agreement, dated July 31, 2013 (as amended from time to time, the “Credit Agreement”), with Wells Fargo Bank, National Association, as administrative agent, and the lenders party thereto, to, among other things, waive the requirement that our ratio of current assets to current liabilities (as calculated pursuant to the Credit Agreement) not be less than 1.0 to 1.0 as of March 31, 2016 and waive the requirement that our ratio of the total First Lien Debt to EBITDA (as calculated pursuant to the Credit Agreement) not be greater than 2.75 to 1.0 as of March 31, 2016, and required us to repay \$2.5 million of outstanding borrowings. We are party to a Second Lien Credit Agreement, dated

February 23, 2015, with certain lenders and Wilmington Trust, National Association, as administrative agent (the “Term Loan Facility”), which contains the same financial covenants as those in our Credit Agreement. Such financial covenants were automatically waived as a result of the Ninth Amendment to the Credit Agreement. Based on the terms of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$672.0 million of our outstanding amounts under the Credit Agreement and \$234.2 million of our outstanding amounts under the Term Loan Facility, net of \$10.0 million deferred financing costs and \$5.8 million unamortized discount, as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016.

Our borrowing base, and thus our borrowing capacity, under the Credit Agreement is impacted by the level of our oil and natural gas reserves. Downward revisions of our oil and natural gas reserves volume and value due to low commodity prices, the impact of lower estimated capital spending in response to lower prices, performance revisions, sales of assets or the incurrence of certain types of additional debt, among other items, could cause a reduction of our borrowing base in the future, and these reductions could be significant. Our Credit Agreement is currently in the process of its semi-annual redetermination. Based on projected market conditions, continued declines in commodity prices and recent conversations with our administrative agent, we expect that our

borrowing base will be redetermined to a level below our outstanding borrowings of \$672.0 million under the Credit Agreement as of March 31, 2016. In the case of a borrowing base deficiency, our Credit Agreement requires us to repay the deficiency, which we are permitted to do in equal monthly installments over a four-month period, or deposit additional collateral to eliminate such deficiency. If our borrowing base is redetermined below our current outstanding borrowings and we are unable to repay the deficiency or deposit additional collateral to eliminate such deficiency, there would be substantial doubt regarding our ability to continue as a going concern.

In addition, if we are unable to remain in compliance with the covenants under our credit facilities or the indentures governing our Senior Notes (as defined in Note 4), absent relief from our lenders or noteholders, as applicable, we may be forced to repay or refinance such indebtedness. Upon the occurrence of an event of default, the lenders under our credit facilities or holders of our notes, as applicable, could elect to declare all amounts outstanding immediately due and payable and the lenders could terminate all commitments to extend further credit. If an event of default occurs (including if our borrowing base is redetermined below our current outstanding borrowings and we are unable to repay the deficiency or deposit additional collateral to eliminate such deficiency), or if other debt agreements cross-default, and the lenders under the affected debt agreements accelerate the maturity of any loans or other debt outstanding, we will not have sufficient liquidity to repay all of our outstanding indebtedness, and as a result, there would be substantial doubt regarding our ability to continue as a going concern.

We continually monitor the capital markets and our capital structure and may make changes to our capital structure from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity, strengthening our balance sheet, meeting our debt service obligations and/or achieving cost efficiency. Although we have a significant hedge position for the remainder of 2016 through 2018, the forecasted long-term downturn in commodity prices has had a detrimental impact on our financial position. For example, we could pursue options such as refinancing, restructuring or reorganizing our indebtedness or capital structure or seek to raise additional capital through debt or equity financing to address our liquidity concerns and high debt levels. We are evaluating various options with the lenders under our Credit Agreement and Term Loan Facility, and holders of our Senior Notes, but there is no certainty that we will be able to implement any such options, and we cannot provide any assurances that any refinancing or changes in our debt or equity capital structure would be possible or that additional equity or debt financing could be obtained on acceptable terms, if at all, and such options may result in a wide range of outcomes for our stakeholders, including cancellation of debt income (“CODI”) which would be directly allocated to our unitholders and reported on such unitholders’ separate returns (see Item 1A – Risk Factors for additional information).

We also continue to implement various cost saving measures to reduce our capital, operating and general and administrative costs, including renegotiating contracts with contractors, suppliers and service providers, reducing the number of staff and contractors and deferring and eliminating discretionary costs. We will continue to be opportunistic and aggressive in managing our cost structure and, in turn, our liquidity to meet our capital and operating needs. We cannot provide any assurances that any of these efforts will be successful or will result in cost reductions or cash flows or the timing of any such cost reductions or additional cash flows. It is also possible additional adjustments to our plan and outlook may occur based on market conditions and our needs at that time, which could include selling assets, liquidating all or a portion of our hedge portfolio, seeking additional partners to develop our assets, reducing or suspending the payments of distributions to preferred unitholders and/or reducing our planned capital program. In addition, to the extent commodity prices remain low or decline further, or we experience disruptions in our longer-term access to or cost of capital, our ability to fund future capital expenditures or growth projects may be further impacted.

Cash Flows – Three Months Ended March 31, 2016 Compared with the Three Months Ended March 31, 2015

	Three Months Ended March 31,	
	2016	2015
Net cash used in operating activities	(34,919)	(1,871)
Net cash used in investing activities	(13,170)	(46,970)
Net cash provided by financing activities	66,021	36,176

The increase in cash flows used in operating activities when compared with the comparable prior year period was primarily due to:

- a decrease in our gas and oil production revenues, excluding the effects of hedging activities, of \$31.9 million due to lower commodity pricing and production volumes; and
- a decrease in our working capital of \$2.2 million primarily due to lower accounts receivable, as a result of revenue declines, lower subscription receivables, due to a decline in fund raising for well drilling activities, partially offset by a decrease in accounts payable and accrued liabilities, as a result of lower operating activities; partially offset by
- an increase in total cash settlements on commodity derivative contracts of \$6.2 million as a result of lower commodity pricing.

The decrease in cash flows used in investing activities when compared with the comparable prior year period was primarily due to:

- a decrease of \$29.3 million in capital expenditures due to lower capital expenditures related to our drilling activities; and
- a decrease of \$4.6 million in net cash paid for acquisitions due to adjustments in working capital settlements for our Eagle Ford acquisition.

The increase in cash flows provided by financing activities when compared with the comparable prior year period was primarily due to:

- an increase of \$217.0 million in net borrowings on our revolving credit facility;
- a decrease of \$41.7 million in distributions paid to unitholders primarily due to a reduction in our monthly cash distribution per common limited partner unit from \$0.1966 per unit to \$0.0125 per unit;
- a decrease of \$9.0 million related to the Arkoma transaction adjustment reflected in the first quarter 2015; and
- a decrease of \$13.4 million in deferred financing costs primarily related to the issuance of our \$250.0 million second lien term loan in the first quarter of 2015; partially offset by
- a decrease of \$242.5 million in net borrowings under our second lien term loan facility due to the second lien term loan proceeds of \$242.5 million, net of \$7.5 million in discount, issued in the first quarter 2015;
- a decrease of \$3.0 million in net proceeds from the issuance of common limited partner units in the first quarter of 2015 under our equity distribution programs; and
- an increase of \$5.5 million related to our senior note repurchases in the first quarter of 2016.

Capital Requirements

At March 31, 2016, the capital requirements of our natural gas and oil production primarily consist of expenditures to maintain or increase production margin in future periods, as well as land, gathering and processing, and other non-drilling capital expenditures. The following table summarizes our total capital expenditures, excluding amounts paid for acquisitions, for the periods presented (in thousands):

Three Months
Ended

	March 31,	
	2016	2015
Total capital expenditures	\$13,170	\$42,498

During the three months ended March 31, 2016, our total capital expenditures consisted primarily of \$7.6 million for wells drilled exclusively for our own account compared with \$12.3 million for the comparable prior year period, \$0.8 million of investments in our Drilling Partnerships compared with \$13.6 million for the prior year comparable period, \$1.2 million of leasehold acquisition costs compared with \$2.4 million for the prior year comparable period and \$3.6 million of corporate and other costs compared with \$14.2 million for the prior year comparable period.

We continuously evaluate acquisitions of gas and oil assets. In order to make any acquisitions in the future, we believe we will be required to access outside capital either through debt or equity placements or through joint venture operations with other energy companies. There can be no assurance that we will be successful in our efforts to obtain outside capital. As of March 31, 2016, we are committed to expend approximately \$5.5 million on drilling and completion and other capital expenditures, excluding acquisitions. We expect to fund these capital expenditures primarily with cash flow from operations, capital raised through our Drilling Partnerships and borrowings under our revolving credit facility.

OFF BALANCE SHEET ARRANGEMENTS

As of March 31, 2016, our off-balance sheet arrangements were limited to our letters of credit outstanding of \$4.2 million and commitments to spend \$5.5 million related to our drilling and completion and capital expenditures, excluding acquisitions.

We are the ultimate managing general partner of the Drilling Partnerships and have agreed to indemnify each investor partner from any liability that exceeds such partner's share of Drilling Partnership assets. We have structured certain Drilling Partnerships to allow limited partners to have the right to present their interests for purchase. Generally, for Drilling Partnerships with this structure, we are not obligated to purchase more than 5% to 10% of the units in any calendar year, no units may be purchased during the first five years after closing for the Drilling Partnership, and we may immediately suspend the presentment structure for a Drilling Partnership by giving notice to the limited partners that we do not have adequate liquidity for redemptions. In accordance with the Drilling Partnership agreement, the purchase price for limited partner interests would generally be based upon a percentage of the present value of future cash flows allocable to the interest, discounted at 10%, as of the date of presentment, subject to estimated changes by us to reflect current well performance, commodity prices and production costs, among other items. Based on our historical experience, as of March 31, 2016, we believe that any such estimated liability for redemptions of limited partner interests in Drilling Partnerships which allow such transactions would not be material.

CREDIT FACILITIES

Credit Facility

We are a party to a Credit Agreement with Wells Fargo Bank, National Association, as administrative agent, and the lenders party thereto, which provides for a senior secured revolving credit facility with a borrowing base of \$700.0 million as of March 31, 2016 and a maximum facility amount of \$1.5 billion scheduled to mature in July 2018. At March 31, 2016, \$672.0 million was outstanding under the credit facility.

Our borrowing base is scheduled for semi-annual redeterminations in May and November of each year. Up to \$20.0 million of the revolving credit facility may be in the form of standby letters of credit, of which \$4.2 million was outstanding at March 31, 2016. Our obligations under the facility are secured by mortgages on our oil and gas properties and first priority security interests in substantially all of our assets. Additionally, obligations under the facility are guaranteed by certain of our material subsidiaries, and any non-guarantor subsidiaries of ours are minor. At March 31, 2016, the weighted average interest rate on outstanding borrowings under the credit facility was 3.6%.

The Credit Agreement contains customary covenants including, without limitation, covenants that limit our ability to incur additional indebtedness (but which permits second lien debt in an aggregate principal amount of up to \$300.0 million and third lien debt that satisfies certain conditions including pro forma financial covenants), grant liens, make loans or investments, make distributions if a borrowing base deficiency or default exists or would result from the distribution, merger or consolidate with other persons, or engage in certain asset dispositions including a sale of all or substantially all of our assets. The Credit Agreement also requires us to maintain a ratio of First Lien Debt to EBITDA (ratio as defined in the Credit Agreement) of not greater than 2.75 to 1.00, and a ratio of current assets to current liabilities (ratio as defined in the Credit Agreement) of not less than 1.0 to 1.0 as of the last day of any fiscal quarter.

On May 10, 2016, we entered into the Ninth Amendment to the Credit Agreement to, among other things, waive the requirement that our ratio of current assets to current liabilities (as calculated pursuant to the Credit Agreement) not be less than 1.0 to 1.0 as of March 31, 2016 and waive the requirement that our ratio of the total First Lien Debt to EBITDA (as calculated pursuant to the Credit Agreement) not be greater than 2.75 to 1.0 as of March 31, 2016, and required us to repay \$2.5 million of outstanding borrowings. As a result of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$672.0 million of our outstanding amounts under the Credit Agreement as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016. See Note 2 for additional disclosure regarding our liquidity and capital resources.

Our Credit Agreement is currently in the process of its semi-annual redetermination. Based on projected market conditions, continued declines in commodity prices and recent conversations with our administrative agent, we expect that our borrowing base will be redetermined to a level below our outstanding borrowings under the Credit Agreement as of March 31, 2016. In the case of a borrowing base deficiency, our Credit Agreement requires us to repay the deficiency, which we are permitted to do in equal monthly installments over a four-month period, or deposit additional collateral to eliminate such deficiency. See our Liquidity and Capital Resources section for further details.

Term Loan Facility

We are party to a Term Loan Facility, which provides for a second lien term loan in an original principal amount of \$250.0 million. The Term Loan Facility matures on February 23, 2020. The Term Loan Facility is presented net of unamortized discount of \$5.8 million at March 31, 2016.

Our obligations under the Term Loan Facility are secured on a second priority basis by security interests in all of our assets and those of our restricted subsidiaries that guarantee our existing first lien revolving credit facility. In addition, the obligations under the Term Loan Facility are guaranteed by our material restricted subsidiaries. At March 31, 2016, the weighted average interest rate on outstanding borrowings under the Term Loan Facility was 10.0%.

The Term Loan Facility contains customary covenants including, without limitation, covenants that limit our ability to make restricted payments, take on indebtedness, issue preferred stock, grant liens, conduct sales of assets and subsidiary stock, make distributions from restricted subsidiaries, conduct affiliate transactions and engage in other business activities. In addition, the Term Loan Facility contains covenants substantially similar to those in the Credit Agreement, including, among others, restrictions on swap agreements, debt of unrestricted subsidiaries, drilling and operating agreements and the sale or discount of receivables. The financial covenants of the Term Loan Facility were automatically waived as a result of the Ninth Amendment to the Credit Agreement. Based on the terms of the Ninth Amendment to the Credit Agreement and uncertainty regarding future covenant compliance, we classified \$234.2 million of our amounts outstanding on the Term Loan Facility, net of \$10.0 million deferred financing costs and \$5.8 million unamortized discount, as current portion of long-term debt within our condensed consolidated balance sheet as of March 31, 2016. See our Liquidity and Capital Resources section for further details.

Senior Notes

At March 31, 2016, we had \$354.4 million outstanding of our 7.75% senior unsecured notes due 2021 (“7.75% Senior Notes”). The 7.75% Senior Notes were presented net of a \$0.4 million unamortized discount as of March 31, 2016.

At March 31, 2016, we had \$312.1 million outstanding of our 9.25% senior unsecured notes due 2021 (“9.25% Senior Notes”). The 9.25% Senior Notes were presented net of a \$0.9 million unamortized discount as of March 31, 2016.

In January and February 2016, we executed transactions to repurchase portions of our senior unsecured notes. As of March 31, 2016, we repurchased approximately \$20.3 million of our 7.75% Senior Notes due 2021 and approximately \$12.1 million of our 9.25% Senior Notes for approximately \$5.5 million, which includes \$0.6 million of interest. As a result of these transactions, we recognized \$26.5 million as gain on early extinguishment of debt, net of accelerated amortization of deferred financing costs of \$0.9 million, for the three months ended March 31, 2016.

The 7.75% Senior Notes and 9.25% Senior Notes are guaranteed by certain of our material subsidiaries. The guarantees under the 7.75% Senior Notes and 9.25% Senior Notes are full and unconditional and joint and several, subject to certain customary automatic release provisions, including, in certain circumstances, the sale or other disposition of all or substantially all the assets of, or all of the equity interests in, the subsidiary guarantor, or the subsidiary guarantor is declared “unrestricted” for covenant purposes, and any subsidiaries of ours, other than the subsidiary guarantors, are minor. There are no restrictions on our ability to obtain cash or any other distributions of funds from the guarantor subsidiaries.

The indentures governing the 7.75% Senior Notes and 9.25% Senior Notes contain covenants including, without limitation, covenants that limit our ability to incur certain liens, incur additional indebtedness; declare or pay distributions if an event of default has occurred; redeem, repurchase, or retire equity interests or subordinated indebtedness; make certain investments; or merge, consolidate or sell substantially all of our assets. We were in

compliance with these covenants as of March 31, 2016.

SECURED HEDGE FACILITY

At March 31, 2016, we had a secured hedge facility agreement with a syndicate of banks under which certain Drilling Partnerships have the ability to enter into derivative contracts to manage their exposure to commodity price movements. Under our revolving credit facility, we are required to utilize this secured hedge facility for future commodity risk management activity for our equity production volumes within the participating Drilling Partnerships. We, as the ultimate general partner of the Drilling Partnerships, administer the commodity price risk management activity for the Drilling Partnerships under the secured hedge facility and guarantee their obligations under it. Before executing any hedge transaction, a participating Drilling Partnership is required to, among other things, provide mortgages on its oil and gas properties and first priority security interests in substantially all of its assets to the collateral agent for the benefit of the counterparties. The secured hedge facility agreement contains covenants that limit each of the participating Drilling Partnership's ability to incur indebtedness, grant liens, make loans or investments, make distributions if a default under the secured hedge facility agreement exists or would result from the distribution, merge into or consolidate with other

persons, enter into commodity or interest rate swap agreements that do not conform to specified terms or that exceed specified amounts, or engage in certain asset dispositions including a sale of all or substantially all of its assets.

In addition, it will be an event of default under our revolving credit facility if we, as the ultimate general partner of the Drilling Partnerships, breach an obligation governed by the secured hedge facility, and the effect of such breach is to cause amounts owing under swap agreements governed by the secured hedge facility to become immediately due and payable.

ISSUANCE OF UNITS

We have an equity distribution agreement with Deutsche Bank Securities Inc., as representative of the several banks named therein (the “Agents”). Pursuant to the equity distribution agreement, we may sell from time to time through the Agents common units representing limited partner interests of us having an aggregate offering price of up to \$100.0 million. Sales of common units may be made in negotiated transactions or transactions that are deemed to be “at-the-market” offerings as defined in Rule 415 of the Securities Act, including sales made directly on the New York Stock Exchange, the existing trading market for the common units, or sales made to or through a market maker other than on an exchange or through an electronic communications network. We pay each of the Agents a commission, which in each case shall not be more than 2.0% of the gross sales price of common units sold through such Agent. Under the terms of the equity distribution agreement, we may also sell common units from time to time to any Agent as principal for its own account at a price to be agreed upon at the time of sale. Any sale of common units to an Agent as principal would be pursuant to the terms of a separate terms agreement between us and such Agent. During the three months ended March 31, 2016, we issued 245,175 common limited partner units under the equity distribution program for net proceeds of \$0.2 million, net of approximately \$4,000 in commissions and offering expenses paid. During the three months ended March 31, 2015, we issued 482,536 common limited partner units under the equity distribution program for net proceeds of \$3.9 million, net of \$0.1 million in commissions and offering expenses paid.

In August 2015, we entered into a distribution agreement with MLV & Co. LLC which we terminated and replaced in November 2015, when we entered into a distribution agreement with MLV and FBR Capital Markets & Co. in which we may sell our 8.625% Class D Cumulative Redeemable Perpetual Preferred Units (“Class D Preferred Units”) and Class E Cumulative Redeemable Perpetual Preferred Units (“Class E Preferred Units”). Under both the August 2015 ATM Agreement and the November 2015 ATM Agreement, the Partnership did not issue any Class D Preferred units nor Class E Preferred Units under the preferred equity distribution program for the three months ended March 31, 2016 and 2015.

On March 31, 2015, to partially pay our portion of a quarterly installment related to the Eagle Ford acquisition, we issued an additional 800,000 Class D Preferred Units to the seller at a value of \$25.00 per unit.

On January 12, 2016, we were notified by the NYSE that we were not in compliance with NYSE’s continued listing criteria under Section 802.01C of the NYSE Listed Company Manual because the average closing price of our common units had been less than \$1.00 for 30 consecutive trading days. We are working to remedy this situation in a timely manner as set forth in the applicable NYSE rules in order to maintain our listing on the NYSE.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Recently Issued Accounting Standards

See Notes 1, 2 and 4 to our condensed consolidated financial statements for additional information related to recently issued accounting standards.

For a more complete discussion of the accounting policies and estimates that we have identified as critical in the preparation of our condensed consolidated financial statements, please refer to our Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our potential exposure to market risks. The term "market risk" refers to the risk of loss arising from adverse changes in interest rates and commodity prices. The disclosures are not meant to be precise indicators of expected future losses, but rather indicators of reasonable possible losses. This forward-looking information provides indicators of how we view and manage our ongoing market risk exposures. All of the market risk-sensitive instruments were entered into for purposes other than trading.

General

All of our assets and liabilities are denominated in U.S. dollars, and as a result, we do not have exposure to currency exchange risks.

We are exposed to various market risks, principally fluctuating interest rates and changes in commodity prices. These risks can impact our results of operations, cash flows and financial position. We manage these risks through regular operating and financing activities and periodic use of derivative financial instruments such as forward contracts and interest rate cap and swap agreements. The following analysis presents the effect on our results of operations, cash flows and financial position as if the hypothetical changes in market risk factors occurred on March 31, 2016. Only the potential impact of hypothetical assumptions was analyzed. The analysis does not consider other possible effects that could impact our business.

We are subject to the risk of loss on our derivative instruments that we would incur as a result of non-performance by counterparties pursuant to the terms of their contractual obligations. We maintain credit policies with regard to our counterparties to minimize our overall credit risk. These policies require (i) the evaluation of potential counterparties' financial condition to determine their credit worthiness; (ii) the quarterly monitoring of our oil, natural gas and NGLs counterparties' credit exposures; (iii) comprehensive credit reviews on significant counterparties from physical and financial transactions on an ongoing basis; (iv) the utilization of contractual language that affords us netting or set off opportunities to mitigate exposure risk; and (v) when appropriate requiring counterparties to post cash collateral, parent guarantees or letters of credit to minimize credit risk. Our assets related to derivatives as of March 31, 2016 represent financial instruments from ten counterparties; all of which are financial institutions that have an "investment grade" (minimum Standard & Poor's rating of BBB+ or better) credit rating and are lenders associated with our revolving credit facility. Subject to the terms of our revolving credit facility, collateral or other securities are not exchanged in relation to derivatives activities with the parties in the revolving credit facility.

Interest Rate Risk. At March 31, 2016, \$672.0 million was outstanding under our revolving credit facility and \$244.2 million was outstanding under our term loan facility. Holding all other variables constant, a hypothetical 100 basis-point or 1% change in variable interest rates would change our consolidated interest expense for the twelve month period ending March 31, 2017 by approximately \$9.2 million.

Commodity Price Risk. Our market risk exposure to commodities is due to the fluctuations in the commodity prices and the impact those price movements have on our financial results. To limit our exposure to changing commodity prices, we use financial derivative instruments, including financial swap and option instruments, to hedge portions of our future production. The swap instruments are contractual agreements between counterparties to exchange obligations of money as the underlying commodities are sold. Under these swap agreements, we receive or pay a fixed price and receive or remit a floating price based on certain indices for the relevant contract period. Option instruments are contractual agreements that grant the right, but not the obligation, to purchase or sell commodities at a fixed price for the relevant period.

Holding all other variables constant, including the effect of commodity derivatives, a 10% change in average commodity prices would result in a change to our consolidated operating income for the twelve-month period ending March 31, 2017 of approximately \$3.9 million.

Realized pricing of our natural gas, oil, and NGL production is primarily driven by the prevailing worldwide prices for crude oil and spot market prices applicable to United States natural gas, oil and NGL production. Pricing for natural gas, oil and NGL production has been volatile and unpredictable for many years. To limit our exposure to changing natural gas, oil and NGL prices, we enter into natural gas and oil swap and put option contracts. At any point in time, such contracts may include regulated NYMEX futures and options contracts and non-regulated

over-the-counter (“OTC”) futures contracts with qualified counterparties. OTC contracts are generally financial contracts which are settled with financial payments or receipts and generally do not require delivery of physical hydrocarbons. NYMEX contracts are generally settled with offsetting positions, but may be settled by the delivery of natural gas. Crude oil contracts are based on a West Texas Intermediate (“WTI”) index. NGL fixed price swaps are priced based on a WTI crude oil index, while ethane, propane, butane and iso butane contracts are priced based on the respective Mt. Belvieu price.

38

At March 31, 2016, we had the following commodity derivatives:

Type	Production Period Ending December 31, Volumes ⁽¹⁾	Average Fixed Price ⁽¹⁾
Natural Gas – Fixed Price Swaps	2016 ⁽²⁾	40,354,500 \$ 4.226
	2017	50,120,000 \$ 4.221
	2018	40,300,000 \$ 4.168
	2019	15,860,000 \$ 4.019
Natural Gas – Put Options – Drilling Partnership	2016 ⁽²⁾	1,080,000 \$ 4.150
Crude Oil – Fixed Price Swaps	2016 ⁽²⁾	1,230,800 \$ 81.685
	2017	1,200,000 \$ 77.610
	2018	1,080,000 \$ 76.281
	2019	540,000 \$ 68.371

(1) Volumes for natural gas are stated in million British Thermal Units. Volumes for NGLs are stated in gallons. Volumes for crude oil are stated in barrels.

(2) The production volumes for 2016 include the remaining 9 months of 2016 beginning April 1, 2016.

ITEM 4: CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer and with the participation of our disclosure committee appointed by such officers, we have carried out an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2016, our disclosure controls and procedures were effective at the reasonable assurance level.

There have been no changes in our internal control over financial reporting during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1A: RISK FACTORS

There have been no material changes to the Risk Factors disclosed in Part I – Item 1A “–Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2015 except as follows.

We are currently primarily dependent on our credit facilities for liquidity. Any further reduction of the borrowing base under our revolving credit facility could reduce or eliminate our ability to borrow under the facility and may require us to repay indebtedness under our credit facilities earlier than anticipated, which would adversely impact our liquidity.

Subject to amounts reserved in the discretion of our Board of Directors to provide for the proper conduct of our business, our limited partnership agreement provides that we make distributions to our unitholders of available cash. Therefore, we have not historically accumulated cash to preserve liquidity and have been dependent on the capital markets and our credit facilities for liquidity. Although our Board of Directors elected to suspend our common unit distributions on May 5, 2016, if the constrained capital

markets conditions continue, we will continue to be primarily reliant on our credit facilities, and to the extent available, the excess of net cash provided by operating activities, for liquidity.

At March 31, 2016, \$672.0 million was outstanding under our revolving credit facility. The revolving credit facility is subject to semi-annual redeterminations of its borrowing base, based primarily on reserve reports, and is currently in the process of its semi-annual redetermination. Downward revisions of our oil and natural gas reserves volume and value due to low commodity prices, the impact of lower estimated capital spending in response to lower prices, performance revisions, sales of assets or the incurrence of certain types of additional debt, among other items, could cause a reduction of our borrowing base in the future, and these reductions could be significant. For example, as a result of lower commodity prices, in November 2015, the borrowing base decreased from \$750 million to \$700 million. Based on projected market conditions, continued declines in commodity prices and recent conversations with our administrative agent, we expect that our borrowing base will be redetermined to a level below our outstanding borrowings under the Credit Agreement as of March 31, 2016. Continued low commodity prices and the possible reserve write-downs that may result, along with the maturity schedule of our hedges, may impact future redeterminations.

In the case of a borrowing base deficiency, we will be required to repay the deficiency, which we are permitted to do in equal monthly installments over a four-month period, or deposit additional collateral to eliminate such deficiency. We may not have sufficient liquidity or unencumbered assets available to be deposited as collateral to eliminate any such deficiency. In such event, we may be required to have discussions with our lenders or take other actions, including those described in the preceding risk factor, to satisfy our obligations as a result of such a borrowing base redetermination. If we cannot make the required payments under our credit facilities, including as a result of a borrowing base redetermination to an amount below our outstanding borrowings, or the indentures governing our senior notes, an event of default would result thereunder as well as a cross-default under our other debt agreements.

Upon the occurrence of an event of default under our credit facilities (including, in the case of our revolving credit facility, if our borrowing base is redetermined below our current outstanding borrowings and we are unable to repay the deficiency or deposit additional collateral to eliminate such deficiency) or under the indenture governing our notes, the lenders under our credit facilities or holders of our notes, as applicable, could elect to declare all amounts outstanding immediately due and payable and the lenders could terminate all commitments to extend further credit. If an event of default occurs, or if other debt agreements cross-default, and the lenders under the affected debt agreements accelerate the maturity of any loans or other debt outstanding, we will not have sufficient liquidity to repay all of our outstanding indebtedness, and as a result, there would be substantial doubt regarding our ability to continue as a going concern. If we were unable to repay those amounts, the lenders could proceed against the collateral granted to them to secure that indebtedness. We have pledged a significant portion of our assets as collateral under our credit facilities. If the lenders accelerate the repayment of borrowings, we may not have sufficient assets to repay our credit facilities and our other liabilities.

We are currently considering, and may be required to make, changes to our capital structure to maintain sufficient liquidity, meet our debt obligations and manage and strengthen our balance sheet.

Our primary liquidity requirements, in addition to normal operating expenses, are for servicing our debt, capital expenditures and distributions to our limited partners and general partner. We have historically funded our operations, acquisitions and cash distributions primarily through cash generated from operations, amounts available under our credit facilities and equity and debt offerings. Our future cash flows are subject to a number of variables, including oil and natural gas prices, and due to the steep decline in commodity prices, our ability to obtain funding in the equity or capital markets has been, and may continue to be, constrained, and there can be no assurances that our liquidity requirements will continue to be satisfied given current commodity prices. If our sources of liquidity are not sufficient to fund our current or future liquidity needs, including as a result of any future borrowing base redetermination, we

may be required to take other actions, including those actions discussed below.

We continually monitor the capital markets and our capital structure and may make changes to our capital structure from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity, strengthening our balance sheet, meeting our debt service obligations and/or achieving cost efficiency. Although we have a significant hedge position for the remainder of 2016 through 2018, the forecasted long-term downturn in commodity prices has had a detrimental impact on our financial position. For example, we could pursue options such as refinancing, restructuring or reorganizing our indebtedness or capital structure or seek to raise additional capital through debt or equity financing to address our liquidity concerns and high debt levels. We are evaluating various options with the lenders under our Credit Agreement and Term Loan Facility, and holders of our Senior Notes, but there is no certainty that we will be able to implement any such options, and we cannot provide any assurances that any refinancing or changes in our debt or equity capital structure would be possible or that additional equity or debt financing could be obtained on acceptable terms, if at all, and such options may result in a wide range of outcomes for our stakeholders, including CODI which would be directly allocated to our unitholders and reported on such unitholders' separate returns.

We cannot provide any assurances that any of these efforts will be successful or will result in cost reductions or cash flows or the timing of any such cost reductions or additional cash flows. It is also possible additional adjustments to our plan and outlook may occur based on market conditions and our needs at that time, which could include: selling assets; reducing or delaying capital investments; seeking to raise additional capital; further liquidating all or a portion of our hedge portfolio; seeking additional partners to develop our assets; reducing our planned capital program; continuing to take, and potentially increasing, our cost saving measures to reduce costs, including renegotiation contracts with contractors, suppliers and service providers, reducing the number of staff and contractors and deferring and eliminating discretionary costs; or revising or delaying our other strategic plans.

Our ability to take these actions will depend on, among other things, the conditions of the capital markets and our financial condition at such time. To the extent commodity prices remain low or decline further, or we experience disruptions in the financial markets impacting our longer-term access to or cost of capital, our ability to fund future capital expenditures or growth projects may be further impacted. Due to the steep decline in commodity prices, we may not be able to obtain funding in the equity or capital markets on terms we find acceptable as the cost of obtaining money from the credit markets generally has increased as many lenders and institutional investors have increased interest rates, enacted tighter lending standards and reduced and, in some cases, ceased to provide any new funding. We cannot assure you that we would be able to implement the above actions, if necessary, on commercially reasonable terms, or at all, in a manner that would be permitted under the terms of our debt instruments or in a manner that does not negatively impact the price of our securities. Additionally, there can be no assurance that the above actions would allow us to meet our debt obligations and capital requirements.

We may engage in changes to our capital structure, such as transactions to reduce our indebtedness, that will generate taxable income (including cancellation of indebtedness income) allocable to unitholders, and income tax liabilities arising therefrom may exceed the value of a unitholder's investment in us.

We continually monitor the capital markets and our capital structure and may make changes to our capital structure from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity, strengthening our balance sheet, meeting our debt service obligations and/or achieving cost efficiency. As such, we are actively evaluating potential transactions to deleverage our balance sheet and manage our liquidity, which could include reducing our existing debt through debt exchanges, debt repurchases and other modifications and extinguishment of our existing debt. In the event we execute such a strategic transaction, we expect that we will recognize a significant amount of CODI, which will be allocated to our unitholders at the time of such transaction.

The amount of CODI generally will be equal to the excess of the adjusted issue price of the restructured debt over the value of the consideration received by debtholders in exchange for the debt. In certain cases, CODI can be realized even when existing debt is modified with no reduction in such debt's stated principal amount. We will not make a corresponding cash distribution with respect to such allocation of CODI. Therefore, any CODI will cause a unitholder to be allocated income with respect to our units with no corresponding distribution of cash to fund the payment of the resulting tax liability to the unitholder. Such CODI, like other items of our income, gain, loss, and deduction that are allocated to our unitholders, will be taken into account in the taxable income of the holders of our units as appropriate. CODI is not itself an additional tax due but is an amount that must be reported as ordinary income by the unitholder, potentially increasing such unitholder's tax liabilities.

Our unitholders may not have sufficient tax attributes (including allocated losses from our activities) available to offset such allocated CODI. Moreover, CODI that is allocated to our unitholders will be ordinary income, and, as a result, it may not be possible for our unitholders to offset such CODI by claiming capital losses with respect to their units, even if such units are cancelled for no consideration in connection with such a restructuring. Importantly, certain exclusions that are available with respect to CODI generally do not apply at the partnership level, and any solvent unitholder that is not in a Chapter 11 proceeding will be unable to rely on such exclusions.

CODI with respect to any future transaction will be allocated to our unitholders of record as of the opening of the New York Stock Exchange on the date on which such a strategic transaction closes (the “CODI Allocation Date”). No CODI should be allocated to a unitholder with respect to units which are sold prior to the CODI Allocation Date.

Each unitholder’s tax situation is different. The ultimate effect to each unitholder will depend on the unitholder’s individual tax position with respect to its units. Additionally, certain of our unitholders may have more losses available than other of our unitholders, and such losses may be available to offset some or all of the CODI that could be generated in a strategic transaction involving our debt. Accordingly, unitholders are highly encouraged to consult, and depend on, their own tax advisors in making such evaluation.

ITEM 5: OTHER INFORMATION

Ninth Amendment to Revolving Credit Facility

On May 10, 2016, we entered into the Ninth Amendment to the Credit Agreement to, among other things, waive the requirement that our ratio of current assets to current liabilities (as calculated pursuant to the Credit Agreement) not be less than 1.0 to 1.0 as of March 31, 2016 and waive the requirement that our ratio of the total First Lien Debt to EBITDA (as calculated pursuant to the Credit Agreement) not be greater than 2.75 to 1.0 as of March 31, 2016, and required us to repay \$2.5 million of outstanding borrowings. This summary of the Ninth Amendment does not purport to be complete and is subject to, and qualified in its entirety by, the full text of the Ninth Amendment filed as Exhibit 10.20, which is incorporated herein by reference.

Long-Term Incentive Plan Vesting Delay

On May 12, 2016, due to the income tax ramifications of potential transactions we are currently considering, the Board of Directors delayed the vesting of 110,000 units granted to employees, directors and officers, including Jeffrey M. Slotterback, our chief financial officer, until March 2017. The phantom units were set to vest between May 15, 2016 and September 1, 2016.

ITEM 6: EXHIBITS

Exhibit No. Description

- 2.1(a) Purchase and Sale Agreement, dated September 24, 2014, by and between Cinco Resources, Inc., Cima Resources, LLC, ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Resource Partners, L.P. The schedules to the Purchase and Sale Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request ⁽³⁰⁾
- 2.1(b) First Amendment to Purchase and Sale Agreement dated October 27, 2014, by and between Cinco Resources, Inc., Cima Resources, LLC, ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Resource Partners, L.P. ⁽³⁴⁾
- 2.1(c) Second Amendment to Purchase and Sale Agreement dated March 31, 2015, by and between Cinco Resources, Inc., Cima Resources, LLC, ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Resource Partners, L.P. ⁽³⁷⁾
- 2.2(a) Shared Acquisition and Operating Agreement, dated September 24, 2014, by and among ARP Eagle Ford, LLC and Atlas Growth Eagle Ford, LLC. The schedules to the Shared Acquisition and Operating Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request ⁽³⁰⁾
- 2.2(b)

Amended and Restated Shared Acquisition and Operating Agreement, effective as of September 24, 2014, by and among ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Eagle Ford Operating Company, LLC. The schedules to the Amended and Restated Shared Acquisition and Operating Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request.⁽¹⁴⁾

- 2.2(c) Addendum #2 to the Amended and Restated Shared Acquisition and Operating Agreement by and among ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Eagle Ford Operating Company, LLC, effective as of July 1, 2015. The schedules to Addendum #2 to the Amended and Restated Shared Acquisition and Operating Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request.⁽¹⁴⁾
- 2.2(d) Addendum #3 to the Amended and Restated Shared Acquisition and Operating Agreement by and among ARP Eagle Ford, LLC, Atlas Growth Eagle Ford, LLC and Atlas Eagle Ford Operating Company, LLC, effective as of September 30, 2015. The schedules to Addendum #3 to the Amended and Restated Shared Acquisition and Operating Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request.⁽¹⁴⁾
- 2.3 Purchase and Sale Agreement, dated May 18, 2015, by and between New Atlas Holdings, LLC and ARP Production Company, LLC. The schedules to the Purchase and Sale Agreement have been omitted pursuant to Item 601(b) of Regulation S-K. A copy of the omitted schedules will be furnished to the U.S. Securities and Exchange Commission supplementally upon request.⁽⁴⁰⁾
- 3.1 Certificate of Limited Partnership of Atlas Resource Partners, L.P.⁽²⁾

Exhibit No.	Description
3.2(a)	Amended and Restated Limited Partnership Agreement of Atlas Resource Partners, L.P. ⁽⁴⁾
3.2(b)	Amendment No. 1 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of July 25, 2012 ⁽¹²⁾
3.2(c)	Amendment No. 2 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of July 31, 2013 ⁽⁶⁾
3.2(d)	Amendment No. 3 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of October 2, 2014 ⁽³¹⁾
3.2(e)	Amendment No. 4 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of November 3, 2014 ⁽³³⁾
3.2(f)	Amendment No. 5 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of February 27, 2015 ⁽³⁹⁾
3.2(g)	Amendment No. 6 to Amended and Restated Agreement of Limited Partnership of Atlas Resource Partners, L.P. dated as of April 14, 2015 ⁽³⁸⁾
3.3(a)	Certificate of Formation of Atlas Resource Partners GP, LLC ⁽²⁾
3.3(b)	Certificate of Amendment to Certificate of Formation of Atlas Resource Partners GP, LLC dated as of November 3, 2014 ⁽³³⁾
3.4(a)	Second Amended and Restated Limited Liability Company Agreement of Atlas Resource Partners GP, LLC ⁽²⁴⁾
3.4(b)	Amendment No. 1 to Second Amended and Restated Limited Liability Company Agreement of Atlas Resource Partners GP, LLC dated as of November 3, 2014 ⁽³³⁾
3.4(c)	Third Amended and Restated Limited Liability Company Agreement of Atlas Energy Group, LLC, dated as of February 27, 2015 ⁽²⁶⁾
3.4(d)	Amendment No. 1 to the Third Amended and Restated Limited Liability Company Agreement of Atlas Energy Group, LLC, dated as of February 27, 2015 ⁽²⁶⁾
