1077 XX Amsterdam
The Netherlands

Not Applicable
(I.R.S. Employer Identification No.)

Not Applicable

Edgar Filing: CORE LABORATORIES N V - Form 10-Q

(Address of principal executive offices) (Zip Code)

(31-20) 420-3191

(Registrant's telephone number, including area code)

None

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Smaller reporting	Emerging growth
Accelerated filer	Non-accelerated filercompany	company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of common shares of the registrant, par value EUR 0.02 per share, outstanding at April 24, 2019 was 44,353,347.

CORE LABORATORIES N.V.

NOTES TO THE UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of Core Laboratories N.V. and its subsidiaries for which we have a controlling voting interest and/or a controlling financial interest. These financial statements have been prepared in accordance with United States ("U.S.") generally accepted accounting principles ("GAAP") for interim financial information using the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not include all of the information and footnote disclosures required by U.S. GAAP and should be read in conjunction with the audited financial statements and the summary of significant accounting policies and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2018 (the "2018 Annual Report").

Core Laboratories N.V. uses the equity method of accounting for investments in which it has less than a majority interest and over which it does not exercise control but does exert significant influence. We use the cost method to record certain other investments in which we own less than 20% of the outstanding equity and do not exercise control or exert significant influence. Non-controlling interests have been recorded to reflect outside ownership attributable to consolidated subsidiaries that are less than 100% owned. In the opinion of management, all adjustments considered necessary for a fair statement of the results for the interim periods presented have been included in these financial statements. Furthermore, the operating results presented for the three months ended March 31, 2019 may not necessarily be indicative of the results that may be expected for the year ending December 31, 2019.

Core Laboratories N.V.'s balance sheet information for the year ended December 31, 2018 was derived from the 2018 audited consolidated financial statements but does not include all disclosures in accordance with U.S. GAAP.

References to "Core Lab", the "Company", "we", "our" and similar phrases are used throughout this Quarterly Report on Form 10-Q and relate collectively to Core Laboratories N.V. and its consolidated subsidiaries.

We operate our business in two reportable segments. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

Reservoir Description: Encompasses the characterization of petroleum reservoir rock, fluid and gas samples to increase production and improve recovery of oil and gas from our clients' reservoirs. We provide laboratory based analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry. We also provide proprietary and joint industry studies based on these types of analysis.

Production Enhancement: Includes services and products relating to reservoir well completions, perforations, stimulations and production. We provide integrated diagnostic services to evaluate and monitor the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects. Certain reclassifications were made to prior period amounts in order to conform to the current period presentation. These reclassifications had no impact on the reported net income or cash flows for the three months ended March 31, 2018.

2. INVENTORIES

Inventories consisted of the following (in thousands):

Edgar Filing: CORE LABORATORIES N V - Form 10-Q

March 31, December 31,

	2019	2018
Finished goods	\$ 28,038	\$ 26,636
Parts and materials	19,023	13,704
Work in progress	3,086	5,324
Total inventories	\$ 50,147	\$ 45,664

8

[Return to Index](#)

We include freight costs incurred for shipping inventory to our clients in the Cost of product sales caption in the accompanying Consolidated Statements of Operations.

3. SIGNIFICANT ACCOUNTING POLICIES UPDATE

Our significant accounting policies are detailed in "Note 2: Summary of Significant Accounting Policies" of our Annual Report on Form 10-K for the year ended December 31, 2018. Significant changes to our accounting policies as a result of adopting Topic 842 - Leases are discussed below:

Leases

We have operating leases primarily consisting of offices and lab space, machinery and equipment and vehicles. We determine if an arrangement is a lease at inception. Operating leases are included in operating lease right of use ("ROU") assets, other current liabilities and long-term operating lease liabilities in our Consolidated Balance Sheet. Finance leases are included in property and equipment, other current liabilities and other long term liabilities in our Consolidated Balance Sheet.

Lease assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at commencement date. Where our lease does not provide an implicit rate, we estimate the discount rate used to discount the future minimum lease payments using our incremental borrowing rate and other information available at the commencement date. The ROU assets also include all initial direct costs incurred. Our lease term may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option.

4. CONTRACT ASSETS AND CONTRACT LIABILITIES

Contract assets and liabilities result due to the timing of revenue recognition, billings and cash collections.

Contract assets include our right to payment for goods and services already transferred to a customer when the right to payment is conditional on something other than the passage of time, for example contracts where we recognize revenue over time but do not have a contractual right to payment until we complete the performance obligations. Contract assets are included in our accounts receivable and are not material as of March 31, 2019.

Contract liabilities consist of advance payments received and billings in excess of revenue recognized. We generally receive up-front payments relating to our consortia studies; we recognize revenue over the life of the study as the testing and analysis results are made available to our consortia members. We record billings in excess of revenue recognized for contracts with a duration less than twelve months as unearned revenue. We classify contract liabilities for contracts with a duration greater than twelve months as current or non-current based on the timing of when we expect to recognize revenue. The current portion of contract liabilities is included in unearned revenue and the non-current portion of contract liabilities is included in other long-term liabilities in our consolidated balance sheet.

The balance of contract assets and contract liabilities consisted of the following (in thousands):

	March 31, December 31,	
	2019	2018
Contract assets		
Current	\$ 791	\$ 1,145
Non-Current	244	188
	\$ 1,035	\$ 1,333

Contract Liabilities		
Current	\$ 7,595	\$ 5,963
Non-current	1,154	1,401
	\$ 8,749	\$ 7,364

9

[Return to Index](#)

	March 31,
	2019
Estimate of when contract liabilities will be recognized	
within 12 months	\$ 7,595
within 12 to 24 months	1,154
greater than 24 months	-

We did not recognize any impairment losses on our receivables and contract assets for the three months ended March 31, 2019.

5. ACQUISITIONS

In 2018, we acquired a business providing downhole technologies associated with perforating systems for \$49.1 million in cash. These downhole technologies will significantly enhance Core Lab's Production Enhancement operations and its ability to bring new and innovative product offerings to our clients. We have estimated the fair value of tangible assets acquired to be \$4.3 million, and intangible assets, including patents, customer-relationship benefits, non-compete agreements and trade secrets to be \$3.8 million. We have accounted for this acquisition by allocating the purchase price to the net assets acquired based on their estimated fair values at the date of acquisition which resulted in an increase to goodwill of \$41.0 million. We have not finalized the assessment of the fair values of assets acquired and liabilities assumed; estimates of certain assets and liabilities require significant judgments and assumptions, and our estimates of acquisition date fair value will be determined upon finalization of our analysis. The fair value estimates are subject to adjustment during the measurement period subsequent to the acquisition date, not to exceed one year. The acquisition is included in the Production Enhancement business segment.

The acquisition of this business did not have a material impact on our Consolidated Balance Sheet or Consolidated Statements of Operations.

6. DISCONTINUED OPERATIONS

In 2018, in a continuing effort to streamline our business and align our business strategy for further integration of services and products, the Company committed to divest the business of our full range of permanent downhole monitoring systems and related services, which had been part of our Production Enhancement segment. We are in the final stages of negotiating the divestiture of this business.

The associated results of operations are separately reported as Discontinued Operations for all periods presented on the Consolidated Statements of Operations. Balance sheet items for this discontinued business, including an allocation of goodwill from the Production Enhancement segment, have been reclassified to Other current assets and Other current liabilities in the Consolidated Balance Sheet. Cash flows from this discontinued business are shown in the table below. As such, the results from continuing operations for the Company and segment highlights for Production Enhancement, exclude these discontinued operations.

Selected data for this discontinued business consisted of the following (in thousands):

	Three Months Ended March 31	
	2019	2018
Services	\$699	\$ 476
Product sales	1,768	530
Total Revenue	2,467	1,006
Cost of services, exclusive of depreciation expense shown below	345	561
Cost of product sales, exclusive of depreciation expense shown below	1,642	822
Depreciation and amortization	-	58
Other (income) expense	(26)	8
Operating Income	506	(443)
Income tax expense (benefit)	247	(97)
Income (loss) from discontinued operations, net of income taxes	\$259	\$ (346)

	March 31, December 31,	
	2019	2018
Current assets	\$ 4,310	\$ 3,712
Non-current assets	1,832	1,848
Total assets	\$ 6,142	\$ 5,560
Current liabilities	\$ 1,781	\$ 1,633
Non-current liabilities	83	82
Total liabilities	\$ 1,864	\$ 1,715

Net cash provided by operating activities of discontinued operations for the three months ended March 31, 2019 and 2018 was \$0.7 million and \$0.5 million, respectively.

7. LONG-TERM DEBT

We have no financing lease obligations. Long-term debt is as follows (in thousands):

	March 31,	December 31,
	2019	2018
Senior Notes	\$ 150,000	\$ 150,000
Credit Facility	147,000	142,000
Total long-term debt	297,000	292,000
Less: Debt issuance costs	(2,104)	(2,230)
Long-term debt, net	\$ 294,896	\$ 289,770

We have two series of senior notes outstanding with an aggregate principal amount of \$150 million ("Senior Notes") issued in a private placement transaction. Series A consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.01% and are due in full on September 30, 2021. Series B consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.11% and are due in full on September 30, 2023. Interest on each series of the Senior Notes is payable semi-annually on March 30 and September 30.

11

[Return to Index](#)

The aggregate borrowing commitment under our revolving credit facility (the "Credit Facility") is \$300 million. The Credit Facility provides an option to increase the commitment under the Credit Facility by an additional \$100 million to bring the total borrowings available to \$400 million if certain prescribed conditions are met by the Company. The Credit Facility bears interest at variable rates from LIBOR plus 1.375% to a maximum of LIBOR plus 2.00%. Any outstanding balance under the Credit Facility is due June 19, 2023, when the Credit Facility matures. Our available capacity at any point in time is reduced by borrowings outstanding at the time and outstanding letters of credit which totaled \$17.7 million at March 31, 2019, resulting in an available borrowing capacity under the Credit Facility of \$135.3 million. In addition to those items under the Credit Facility, we had \$13.3 million of outstanding letters of credit and performance guarantees and bonds from other sources as of March 31, 2019.

The terms of the Credit Facility and Senior Notes require us to meet certain covenants, including, but not limited to, an interest coverage ratio (consolidated EBITDA divided by interest expense) and a leverage ratio (consolidated net indebtedness divided by consolidated EBITDA), where consolidated EBITDA (as defined in each agreement) and interest expense are calculated using the most recent four fiscal quarters. The Credit Facility has the more restrictive covenants with a minimum interest coverage ratio of 3.0 to 1.0 and a maximum leverage ratio of 2.5 to 1.0. The terms of our Credit Facility allow us to negotiate in good faith to amend any ratio or requirement to preserve the original intent of the agreement if any change in accounting principle would affect the computation of any financial ratio or requirement of the Credit Facility. The adoption on January 1, 2019 of ASU 2016-02 does not affect the calculation of consolidated EBITDA under the agreement. We believe that we are in compliance with all such covenants contained in our credit agreements. Certain of our material, wholly-owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million. See Note 15 - Derivative Instruments and Hedging Activities.

The estimated fair value of total debt at March 31, 2019 and December 31, 2018 approximated the book value of total debt. The fair value was estimated using Level 2 inputs by calculating the sum of the discounted future interest and principal payments through the date of maturity.

8. PENSION

Defined Benefit Plan

We provide a noncontributory defined benefit pension plan covering substantially all of our Dutch employees ("Dutch Plan") who were hired prior to 2000. The pension benefit is based on years of service and final pay or career average pay, depending on when the employee began participating. The benefits earned by the employees are immediately vested.

The following table summarizes the components of net periodic pension cost under the Dutch Plan (in thousands):

	Three Months Ended March 31, 2019 2018	
Service cost	\$192	\$349
Interest cost	260	300
Expected return on plan assets	(232)	(259)

Edgar Filing: CORE LABORATORIES N V - Form 10-Q

Amortization of prior service cost	(25)	(21)
Amortization of actuarial loss	15	84
Net periodic pension cost	\$210	\$453

During the three months ended March 31, 2019, we contributed \$0.6 million to fund the estimated 2019 premiums on investment contracts held by the Dutch Plan.

12

[Return to Index](#)

9. COMMITMENTS AND CONTINGENCIES

We have been and may from time to time be named as a defendant in legal actions that arise in the ordinary course of business. These include, but are not limited to, employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with the provision of our services and products. A liability is accrued when a loss is both probable and can be reasonably estimated. During the three months ended March 31, 2019, we recorded contingent liabilities in the amount of \$3.2 million associated with these claims.

10. EQUITY

During the three months ended March 31, 2019, we repurchased 7,226 of our common shares for \$0.5 million, which were surrendered to us pursuant to the terms of a stock-based compensation plan in consideration of the participants' tax burdens that may result from the issuance of common shares under that plan. Such common shares, unless canceled, may be reissued for a variety of purposes such as future acquisitions, non-employee director stock awards or employee stock awards. We distributed 24,155 treasury shares upon vesting of stock-based awards during the three months ended March 31, 2019.

In February, 2019, we paid a quarterly dividend of \$0.55 per share of common stock. In addition, on April 16, 2019, we declared a quarterly dividend of \$0.55 per share of common stock for shareholders of record on April 26, 2019 and payable on May 21, 2019.

Accumulated other comprehensive income (loss) consisted of the following (in thousands):

	March 31, December 31,	
	2019	2018
Prior service cost	\$ 575	\$ 593
Unrecognized net actuarial loss	(6,232)	(6,243)
Fair value of derivatives, net of tax	(138)	194
Total accumulated other comprehensive (loss)	\$ (5,795)	\$ (5,456)

11. EARNINGS PER SHARE

We compute basic earnings per common share by dividing net income attributable to Core Laboratories N.V. by the weighted average number of common shares outstanding during the period. Diluted earnings per common and potential common shares include additional shares in the weighted average share calculations associated with the incremental effect of dilutive restricted stock awards and contingently issuable shares, as determined using the treasury stock method. The following table summarizes the calculation of weighted average common shares outstanding used in the computation of diluted earnings per share (in thousands):

Three Months Ended March 31, 2019 2018	
---	--

Edgar Filing: CORE LABORATORIES N V - Form 10-Q

Weighted average basic common shares outstanding	44,323	44,179
Effect of dilutive securities:		
Performance shares	393	231
Restricted stock	18	53
Weighted average diluted common and potential common shares outstanding	44,734	44,463

13

[Return to Index](#)

12. OTHER (INCOME) EXPENSE, NET

The components of other (income) expense, net, were as follows (in thousands):

	Three Months Ended March 31,	
	2019	2018
Sale of assets	\$(246)	\$(152)
Results of non-consolidated subsidiaries	(73)	(58)
Foreign exchange	37	432
Rents and royalties	(106)	(94)
Employment-related charges	3,200	-
Return on pension assets and other pension costs	260	300
Other, net	(699)	(571)
Total other (income) expense, net	\$2,373	\$(143)

Foreign exchange gains and losses are summarized in the following table (in thousands):

	Three Months Ended March 31,	
(Gains) losses by currency	2019	2018
British Pound	\$13	\$(128)
Canadian Dollar	59	115
Euro	(90)	246
Other currencies, net	55	199
Total loss, net	\$37	\$432

13. INCOME TAX EXPENSE

The effective tax rates for the three months ended March 31, 2019 and 2018 were (217.6)% and 18.1%, respectively. In the first quarter of 2019, we recorded net income tax benefit of \$27.6 million compared to income tax expense of \$5.3 million in the same period in 2018. This was due to a corporate restructuring which resulted in a net tax benefit of \$58.5 million, and tax expense of \$26.7 million related to unremitted earnings of foreign subsidiaries that we no longer consider to be indefinitely reinvested, each of which was a discrete item to the quarter ended March 31, 2019. In addition, the effective tax rate was impacted by changes in activity levels in jurisdictions with differing tax rates. Excluding discrete items, the effective tax rate was 19.7% and 20.9% for the three months ended March 31, 2019 and 2018, respectively.

14. LEASES

We have operating leases primarily consisting of offices and lab space, machinery and equipment and vehicles. The components of lease expense are as follows (in thousands):

14

[Return to Index](#)

	Three Months Ended March 31, 2019
Lease Cost	
Operating lease cost	\$ 4,752
Short-term lease cost	294
Variable lease cost	119
Total lease cost	\$ 5,165
Other Information	
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	\$ 4,597
Right-of-use assets obtained in exchange for new lease obligations:	
Operating leases	\$ 3,670
	9.21
Weighted-average remaining lease term- operating leases	years
Weighted-average discount rate - operating leases	5.01 %

Scheduled undiscounted cash flows for non-cancellable leases at March 31, 2019 consist of the following (in thousands):

	Operating Leases
Remainder of 2019	\$ 12,641
2020	13,816
2021	11,275
2022	9,841
2023	8,284
Thereafter	41,542
Total undiscounted lease payments	\$ 97,399
Less: Imputed Interest	(20,306)
Total lease liabilities	\$ 77,093

We adopted ASU 2017-06 using the cumulative effect transition method on January 1, 2019. As required, the following disclosure is provided for periods prior to adoption. Scheduled minimum rental commitments under non-cancellable operating leases at December 31, 2018, consist of the following (in thousands):

	Operating Leases
2019	\$ 16,267
2020	12,572
2021	9,774
2022	7,955
2023	4,938
Thereafter	14,815
Total commitments	\$ 66,321

The Company has elected to apply the short-term lease exemption to all of its classes of underlying assets. Accordingly, no ROU asset or lease liability is recognized for leases with a term of twelve months or less.

The Company has elected to apply the practical expedient for combining lease and non-lease components for vehicle leases and elected not to apply the practical expedient for combining lease and non-lease components to all other classes of underlying assets.

15. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We are exposed to market risks related to fluctuations in interest rates. To mitigate these risks, we utilize derivative instruments in the form of interest rate swaps. We do not enter into derivative transactions for speculative purposes.

15

[Return to Index](#)

Interest Rate Risk

Our Credit Facility bears interest at variable rates from LIBOR plus 1.375% to a maximum of LIBOR plus 2.00%. As a result of two interest rate swap agreements, we are subject to interest rate risk on debt in excess of \$50 million drawn on our Credit Facility.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million to hedge changes in the variable rate interest expense on \$50 million of our existing or replacement LIBOR-priced debt. Under the first swap agreement of \$25 million, we have fixed the LIBOR portion of the interest rate at 1.73% through August 29, 2019, and under the second swap agreement of \$25 million, we have fixed the LIBOR portion of the interest rate at 2.5% through August 29, 2024. Each swap is measured at fair value and recorded in our Consolidated Balance Sheet as an asset or liability. They are designated and qualify as cash flow hedging instruments and are highly effective. Unrealized losses are deferred to shareholders' equity as a component of accumulated other comprehensive gain (loss) and are recognized in income as an increase or decrease to interest expense in the period in which the related cash flows being hedged are recognized in expense.

At March 31, 2019, we had fixed rate long-term debt aggregating \$200 million and variable rate long-term debt aggregating \$97 million, after taking into account the effect of the swaps.

The fair values of outstanding derivative instruments are as follows (in thousands):

	Fair Value of Derivatives		
	March 31,	December 31,	Balance Sheet
	2019	2018	Classification
Derivatives designated as hedges:			
5 year interest rate swap	\$78	\$ 135	Other long-term assets
10 year interest rate swap	(434)	(70)) Other long-term assets (liabilities)
	\$(356)	\$ 65	

The fair value of all outstanding derivatives was determined using a model with inputs that are observable in the market (Level 2) or can be derived from or corroborated by observable data.

The effect of the interest rate swaps on the Consolidated Statement of Operations was as follows (in thousands):

	Three Months Ended March 31,		
	2019	2018	Income Statement
	2019	2018	Classification
Derivatives designated as hedges:			
5 year interest rate swap	\$(49)	\$ 8	Increase (decrease) to interest expense
10 year interest rate swap	—	56	Increase to interest expense

\$(49) \$ 64

16

[Return to Index](#)

16. FINANCIAL INSTRUMENTS

The Company's only financial assets and liabilities which are measured at fair value on a recurring basis relate to certain aspects of the Company's benefit plans and our derivative instruments. We use the market approach to value certain assets and liabilities at fair value using significant other observable inputs (Level 2) with the assistance of a third-party specialist. We do not have any assets or liabilities measured at fair value on a recurring basis using quoted prices in an active market (Level 1) or significant unobservable inputs (Level 3). Gains and losses related to the fair value changes in the deferred compensation assets and liabilities are recorded in General and administrative expense in the Consolidated Statements of Operations. Gains and losses related to the fair value of the interest rate swaps are recorded in Other comprehensive income. The following table summarizes the fair value balances (in thousands):

	Total	Fair Value Measurement at March 31, 2019		
		Level 1	Level 2	Level 3
Assets:				
Deferred compensation assets ⁽¹⁾	\$45,824	\$—	\$45,824	\$ —
5 year interest rate swap	78	—	78	—
	\$45,902	\$—	\$45,902	\$ —
Liabilities:				
Deferred compensation plan	\$35,911	\$—	\$35,911	\$ —
10 year interest rate swap	434	—	434	—
	\$36,345	\$—	\$36,345	\$ —

	Total	Fair Value Measurement at December 31, 2018		
		Level 1	Level 2	Level 3
Assets:				
Deferred compensation assets ⁽¹⁾	\$42,161	\$—	\$42,161	\$ —
5 year interest rate swap	135	—	135	—
	\$42,296	\$—	\$42,296	\$ —
Liabilities:				
Deferred compensation plan	\$33,287	\$—	\$33,287	\$ —
10 year interest rate swap	70	—	70	—
	\$33,357	\$—	\$33,357	\$ —

(1)Deferred compensation assets consist of the cash surrender value of life insurance policies and are intended to assist in the funding of the deferred compensation agreements.

17. SEGMENT REPORTING

We operate our business in two reportable segments. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

Reservoir Description: Encompasses the characterization of petroleum reservoir rock, fluid and gas samples to increase production and improve recovery of oil and gas from our clients' reservoirs. We provide laboratory based analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry. We also provide proprietary and joint industry studies based on these types of analysis.

Production Enhancement: Includes services and products relating to reservoir well completions, perforations, stimulations and production. We provide integrated diagnostic services to evaluate and monitor the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

17

[Return to Index](#)

Results for these segments are presented below. We use the same accounting policies to prepare our segment results as are used to prepare our Consolidated Financial Statements. All interest and other non-operating income (expense) is attributable to Corporate & Other and is not allocated to specific segments. Summarized financial information concerning our segments is shown in the following table (in thousands):

	Reservoir Description	Production Enhancement	Corporate & Other ¹	Consolidated
Three Months Ended March 31, 2019				
Revenue from unaffiliated clients	\$ 103,292	\$ 65,902	\$ —	\$ 169,194
Inter-segment revenue	96	44	(140)	—
Segment operating income	6,179	9,912	323	16,414
Total assets (at end of period)	342,617	290,734	158,409	791,760
Capital expenditures	1,902	2,851	430	5,183
Depreciation and amortization	3,987	1,183	417	5,587
Three Months Ended March 31, 2018				
Revenue from unaffiliated clients	\$ 100,809	\$ 69,209	\$ —	\$ 170,018
Inter-segment revenue	47	51	(98)	—
Segment operating income (loss)	14,757	17,687	(128)	32,316
Total assets (at end of period)	319,830	217,935	59,375	597,140
Capital expenditures	2,181	1,847	415	4,443
Depreciation and amortization	4,248	1,002	568	5,818

(1) "Corporate & Other" represents those items that are not directly related to a particular segment, eliminations and the assets and liabilities of discontinued operations.

18. RECENT ACCOUNTING PRONOUNCEMENTS

Pronouncements Adopted in 2019

In February 2016, the FASB issued ASU 2016-02 ("Leases"), which introduces the recognition of lease assets and lease liabilities by lessees for those leases classified as operating leases under previous guidance. The new standard establishes a right-of-use ("ROU") model that requires a lessee to record an ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. In July 2018, the FASB issued ASU 2018-11 ("Targeted Improvements to Leases"), which provides companies with an additional transition method that allows the effects of the adoption of the new standard to be recognized as a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. We elected this optional transition method for adoption. The adoption of this standard on January 1, 2019 had a material impact to our Consolidated Balance Sheet; but not to our Consolidated Statement of Operations or Cash Flows. The most significant impact was the recognition of \$77.5 million of ROU assets and liabilities for operating leases, while our accounting for finance leases remained substantially unchanged.

Pronouncements Not Yet Effective

In June 2016, the FASB issued ASU 2016-13 ("Measurement of Credit Losses on Financial Instruments") which replaces the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The new standard is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. We are evaluating the impact that the adoption of this standard will have on our consolidated financial statements, including accounting policies, processes and systems.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion summarizes the financial position of Core Laboratories N.V. and its subsidiaries as of March 31, 2019 and should be read in conjunction with (i) the unaudited consolidated interim financial statements and notes thereto included elsewhere in this Quarterly Report on Form 10-Q ("Quarterly Report") and (ii) the audited consolidated financial statements and accompanying notes to our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 (the "2018 Annual Report").

General

Core Laboratories N.V. is a limited liability company incorporated and domiciled in the Netherlands. It was established in 1936 and is one of the world's leading providers of proprietary and patented reservoir description and production enhancement services and products to the oil and gas industry. These services and products can enable our clients to improve reservoir performance and increase oil and gas recovery from their producing fields. Core Laboratories N.V. has over 70 offices in more than 50 countries and employs approximately 4,700 people worldwide.

References to "Core Lab", the "Company", "we", "our" and similar phrases are used throughout this Quarterly Report and relate collectively to Core Laboratories N.V. and its consolidated affiliates.

We operate our business in two reportable segments: Reservoir Description and Production Enhancement. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

Reservoir Description: Encompasses the characterization of petroleum reservoir rock, fluid and gas samples to increase production and improve recovery of oil and gas from our clients' reservoirs. We provide laboratory based analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry. We also provide proprietary and joint industry studies based on these types of analysis.

Production Enhancement: Includes services and products relating to reservoir well completions, perforations, stimulations and production. We provide integrated diagnostic services to evaluate and monitor the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Certain statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations section, including those under the headings "Outlook" and "Liquidity and Capital Resources", and in other parts of this Quarterly Report, are forward-looking. In addition, from time to time, we may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. Forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "believe", "expect", "anticipate", "estimate", "continue", or other similar words, including statements as to the intent, belief, or current expectations of our directors, officers, and management with respect to our future operations, performance, or positions or which contain other forward-looking information. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, no assurances can be given that the future results indicated, whether expressed or implied, will be achieved. While we believe that these statements are and will be accurate, our actual results and experience may differ materially from the anticipated results or other expectations expressed in our statements due to a variety of risks and uncertainties.

[Return to Index](#)

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. For a more detailed discussion of some of the foregoing risks and uncertainties, see "Item 1A - Risk Factors" in our 2018 Annual Report and in Part II of this Quarterly Report, as well as the other reports filed by us with the Securities and Exchange Commission ("SEC").

Outlook

As part of our long-term growth strategy, we continue our efforts to expand our market presence by opening or expanding facilities in strategic areas and realizing synergies within our business lines subject to client demand and market conditions. We believe our market presence provides us a unique opportunity to service clients who have global operations whether they are international oil companies, national oil companies, or independent oil companies.

We are encouraged by the increased focus of our major clients regarding capital management, return on invested capital, free cash flow, and returning capital back to their shareholders, as opposed to a focus on production growth at any cost. The companies adopting value versus volume metrics tend to be the more technologically sophisticated operators and form the foundation of Core's worldwide client base. We expect to benefit from our clients' shift in focus from strictly production growth to employing higher technological solutions in their efforts to maximize economic production growth and estimated ultimate recovery ("EUR").

Crude oil prices peaked in October 2018 and decreased over 40% by December 2018; however, crude oil prices rebounded and strengthened in the first quarter of 2019. The price of crude oil at the end of the first quarter of 2019 improved approximately 30% from the end of the fourth quarter of 2018.

The U.S. completion growth rate appears to be moderating until certain logistical bottlenecks are addressed (e.g. primarily supply chain logistics and take-away restrictions are resolved in the Permian Basin). In addition, an emerging trend to larger pad drilling sites, increasing from six to eight wells up to 24 wells, will create an increase in drilled but uncompleted wells over the next several quarters. Combined, these issues could impact the rate of revenue growth opportunity for any company that is reliant on completions as a catalyst for growth.

After five years of muted investment in international, offshore and deepwater projects, oil companies announced more than 30 final investment decisions ("FIDs") in 2018, an increase of more than 20% from 2017. The renewed investment at a global level is critical in order to meet future supply needs. Recognition of the need for investment is evidenced by the FIDs announced over the last two years and Wood McKenzie's estimation of another 30 upstream projects for 2019. These international, offshore and deepwater projects continue to progress in their initial phases of planning, mobilizing equipment and initial drilling of wells. However, Core Lab anticipates a slowing in further project announcements until confidence in the balance of global crude-oil markets is restored. The revenue opportunity for Reservoir Description occurs once the well has been drilled and core and fluid samples are taken and analyzed.

We continue to focus on large-scale core analyses and reservoir fluid characterization studies in the Eagle Ford, the Permian Basin and the Gulf of Mexico, along with Guyana, Malaysia and other international locations such as offshore South America, and the Middle East, including Kuwait and the United Arab Emirates. We also focus on complex completions in unconventional tight-oil reservoirs, technological solutions and services for increasing daily productions and EURs.

Results of Operations

Our results of operations as a percentage of applicable revenue were as follows (in thousands):

"NM" means not meaningful

*Percentage based on applicable revenue rather than total revenue

Operating Results for the Three Months Ended March 31, 2019 Compared to the Three Months Ended March 31, 2018 and December 31, 2018

Services Revenue

Services revenue, which is tied more to activities associated with the exploration and production of oil and gas outside the U.S., of \$120.3 million in the first quarter of 2019 was relatively flat compared to \$119.8 million and \$120.8 million in the first quarter of 2018 and fourth quarter of 2018, respectively. Crude oil prices strengthened throughout 2018 until the fourth quarter, when they temporarily dropped some 40%. However, the crude oil prices rebounded and strengthened during the first quarter of 2019, which provides a more positive outlook and support for larger and longer-term projects. Although our clients announced final investment decisions in 2018 for several projects outside the U.S. and in offshore environments, significant activity on these projects will not start until later in 2019 and wells must be drilled and/or completed, stimulated, cored and have reservoir fluid samples collected, before we see a revenue opportunity.

International activity remained effectively flat through 2018 as most international development projects continued to be funded largely from operating budgets, however capital spending directed towards international projects is

anticipated to expand during 2019. We continue to focus on large-scale core analyses and reservoir fluids characterization studies in the Eagle Ford, the Permian Basin and the Gulf of Mexico, along with Guyana, Malaysia and other international locations such as offshore South America, and the Middle East, including Kuwait and the United Arab Emirates.

22

[Return to Index](#)

Product Sales Revenue

Product sales revenue, which is tied more to the completion of wells in North America, of \$48.9 million in the first quarter of 2019, decreased 2.6% year-over-year from \$50.2 million in the first quarter of 2018 and decreased 6.7% from \$52.4 million for the fourth quarter of 2018. Our product sales revenue is primarily driven by completions of wells in the North American market and, more specifically, the activity associated with the completion of each stage in a wellbore. The sharp decrease of crude oil prices during the fourth quarter of 2018 combined with the supply chain logistics and take-away restrictions associated with the Permian Basin resulted in decreased activity for the U.S. onshore market at the end of the fourth quarter. This sharp decrease in the U.S. onshore activity continued into the first quarter of 2019. We continue to benefit from our clients' acceptance of new products which were led by our newly introduced technologies, including our HERO® PerFRAC perforating system.

Cost of Services, excluding depreciation

Cost of services increased to \$92.4 million in the three months ended March 31, 2019 compared to \$83.3 million and \$85.4 million in the three months ended March 31, 2018 and December 31, 2018, respectively. Cost of services expressed as a percentage of services revenue increased to 77% for the three months ended March 31, 2019, compared to 70% and 71% in the three months ended March 31, 2018 and December 31, 2018, respectively. The increase in Cost of services during the three months ended March 31, 2019 was primarily due to compensation and related charges.

Cost of Product Sales, excluding depreciation

Cost of product sales decreased to \$35.0 million in the three months ended March 31, 2019 compared to \$36.0 million and \$40.3 million in the three months ended March 31, 2018 and December 31, 2018, respectively. Cost of product sales expressed as a percentage of product sales revenue was 72% for the three months ended March 31, 2019, flat compared to 72% and decreased from the 77% for the three months ended March 31, 2018 and December 31, 2018, respectively. Cost of product sales as a percentage of product sales revenue is primarily reflective of how our fixed cost structure is absorbed by revenue.

General and Administrative Expense

General and administrative ("G&A") expense includes corporate management and centralized administrative services that benefit our operations. G&A expense for the three months ended March 31, 2019 was \$17.4 million compared to \$12.7 million and \$24.7 million for the three months ended March 31, 2018 and December 31, 2018, respectively. The variances are primarily due to changes in compensation expense during those periods, including additional stock compensation expense of \$7.2 million and \$9.9 million recorded in the three months ended March 31, 2019 and December 31, 2018, respectively, for retirement eligible employees.

Depreciation and Amortization Expense

Depreciation and amortization expense for the three months ended March 31, 2019 was \$5.6 million compared to \$5.8 million and \$5.7 million for the three months ended March 31, 2018 and December 31, 2018, respectively.

Other (Income) Expense, Net

The components of other (income) expense, net, were as follows (in thousands):

	Three Months Ended March 31,	
	2019	2018
Sale of assets	\$(246)	\$(152)
Results of non-consolidated subsidiaries	(73)	(58)
Foreign exchange	37	432
Rents and royalties	(106)	(94)
Employment-related charges	3,200	-
Return on pension assets and other pension costs	260	300
Other, net	(699)	(571)
Total other (income) expense, net	\$2,373	\$(143)

Foreign exchange (gain) loss, net by currency is summarized in the following table (in thousands):

	Three Months Ended March 31,	
(Gains) losses by currency	2019	2018
British Pound	\$13	\$(128)
Canadian Dollar	59	115
Euro	(90)	246
Other currencies, net	55	199
Total loss, net	\$37	\$432

Interest Expense

Interest expense for the three months ended March 31, 2019 was \$3.7 million compared to \$3.1 million and \$3.6 million for the three months ended March 31, 2018 and December 31, 2018, respectively. The variances are primarily due to changes in the aggregated variable rate debt taken in the respective quarters in 2018 and 2019.

Income Tax Expense

The effective tax rate for the three months ended March 31, 2019 and 2018 was (217.6)% and 18.1%, respectively. In the first quarter of 2019, we recorded net income tax benefit of \$27.6 million compared to income tax expense of \$5.3 million in the same period in 2018. This was due to a corporate restructuring which resulted in a net tax benefit of \$58.5 million, and tax expense of \$26.7 million related to unremitted earnings of foreign subsidiaries that we no longer consider to be indefinitely reinvested, each of which was a discrete item to the quarter ended March 31, 2019. In addition, the effective rate was impacted by changes in activity levels in jurisdictions with differing tax rates. Excluding discrete items, the effective tax rate was 19.7% for the three months ended March 31, 2019.

The tax benefit of the corporate restructuring is reflected as a deferred tax asset on the Consolidated Balance Sheet which will be realized over the years 2019 until 2033.

Discontinued Operations

In 2018, in a continuing effort to streamline our business and align our business strategy for further integration of services and products, the Company committed to divest the business of our full range of permanent downhole monitoring systems and related services, which have been part of our Production Enhancement segment. We are in the final stages of negotiating the divestiture of this business.

See Note 6, Discontinued Operations for additional information.

24

[Return to Index](#)

Segment Analysis

We operate our business in two reportable segments. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields. The following tables summarize our results by segment (in thousands):

	Three Months				Three Months			
	Ended		2019/2018		Ended		Q1 / Q4	
	March 31, 2019	2018	\$ Change	% Change	December 31, 2018	\$ Change	% Change	
Revenue:								
Reservoir Description	\$ 103,292	\$ 100,809	\$ 2,483	2%	\$ 106,557	\$ (3,265)	(3)%	
Production Enhancement	65,902	69,209	(3,307)	(5)%	66,650	(748)	(1)%	
Consolidated	\$ 169,194	\$ 170,018	\$ (824)	—	\$ 173,207	\$ (4,013)	(2)%	
Operating income (loss):								
Reservoir Description	\$ 6,179	\$ 14,757	\$ (8,578)	(58)%	\$ 10,374	\$ (4,195)	(40)%	
Production Enhancement	9,912	17,687	(7,775)	(44)%	7,682	2,230	29%	
Corporate and Other ¹	323	(128)	451	NM	(78)	401	NM	
Consolidated	\$ 16,414	\$ 32,316	\$ (15,902)	(49)%	\$ 17,978	\$ (1,564)	(9)%	

(1) "Corporate and Other" represents those items that are not directly related to a particular segment.

"NM" means not meaningful

Reservoir Description

Revenue from the Reservoir Description segment of \$103.3 million for the first quarter of 2019 increased 2% from \$100.8 million in the first quarter of 2018, and decreased 3% from \$106.6 million in the fourth quarter of 2018. This segment's operations continue to work on large-scale, long-term, crude-oil and liquefied natural gas ("LNG") projects with an emphasis on producing fields located in offshore developments and international markets. We continue to focus on large-scale core analyses and reservoir fluids characterization studies in the Asia-Pacific areas, offshore Europe and Africa, offshore South America, North America, and the Middle East.

Operating income of \$6.2 million in the first quarter of 2019 decreased 58% year-over-year compared to \$14.8 million in the first quarter of 2018 and decreased 40% sequentially from \$10.4 million in the fourth quarter of 2018. The year-over-year decrease was due to additional expense recorded for stock compensation related to retirement eligible employees and employment-related charges of \$7.9 million and \$6.3 million in the three months ended March 31, 2019 and December 31, 2018, respectively.

Operating margins were 6% in the first quarter of 2019, down from 15% during the first quarter of 2018 and down from 10% during the fourth quarter of 2018.

[Return to Index](#)

Production Enhancement

Revenue from the Production Enhancement segment, largely focused on North American unconventional tight-oil reservoirs and complex completions and stimulations, was \$65.9 million in the first quarter of 2019, a decrease of 5% year-over-year from \$69.2 million in the first quarter of 2018 and a decrease of 1% sequentially from \$66.7 million in the fourth quarter of 2018. The significant decrease in the crude oil commodity price in the fourth quarter of 2018, resulted in a decrease of drilling and well completion activities in the U.S. onshore market at the end of the fourth quarter 2018. The lower level of drilling and well completion activity continued into the first quarter of 2019. However, our clients continue to seek technological solutions for increasing daily production and estimated ultimate recoveries from their reservoirs and we continue to benefit from our clients' acceptance of new services and products which were led by the FLOWPROFILER EDS™ and HERO® PerFRAC technologies.

Operating income in the first quarter of 2019 was \$9.9 million, a decrease from \$17.7 million, or 44%, in the first quarter of 2018 and an increase from \$7.7 million, or 29%, in the fourth quarter of 2018. The increased profitability sequentially is due to increased demand for our higher margin services and products. The first quarter of 2019 and fourth quarter of 2018 both include additional stock compensation expense of \$2.5 million and \$3.6, respectively, for retirement eligible employees.

Operating margins were 15% in the first quarter of 2019, down from 26% in the first quarter of 2018 up from 12% for the fourth quarter of 2018.

Liquidity and Capital Resources

General

We have historically financed our activities through cash on hand, cash flows from operations, bank credit facilities, equity financing and the issuance of debt. Cash flows from operating activities provides the primary source of funds to finance operating needs, capital expenditures, our dividend and share repurchase program. As we are a Netherlands holding company, we conduct substantially all of our operations through subsidiaries. Our cash availability is largely dependent upon the ability of our subsidiaries to pay cash dividends or otherwise distribute or advance funds to us. There are no restrictions preventing any of our subsidiaries from repatriating earnings, and there are no restrictions or income taxes associated with distributing cash to the parent company through loans or advances. As of March 31, 2019, \$11.8 million of our \$13.2 million of cash was held by our foreign subsidiaries.

Cash Flows

The following table summarizes cash flows (in thousands):

	Three months ended		2019/2018	
	March 31, 2019	2018		% Change
Cash flows provided by/(used in):				
Operating activities	\$25,156	\$23,093	9	%
Investing activities	(5,205)	(4,617)	13	%
Financing activities	(19,861)	(19,632)	1	%
Net change in cash and cash equivalents	\$90	\$(1,156)	(108))%

Cash flows provided by operating activities for the first three months of 2019 compared to the same period in 2018 increased primarily due to increased net income offset by changes in working capital.

The increase in cash flows used in investing activities during the first three months of 2019 compared to the same period in 2018 was primarily attributable to increased capital expenditures in 2019.

26

[Return to Index](#)

Cash flows used in financing activities for the first three months of 2019 was relatively flat compared to the same period in 2018. During the first three months of 2019, we increased our debt by \$5 million, as compared to increasing it by \$8 million during the first three months of 2018. In the first three months of 2019, we repurchased 7,226 shares of our common stock for an aggregate purchase price of \$0.5 million compared to the repurchase of 30,298 shares for an aggregate purchase price of \$3.3 million during the same period in 2018. During the first three months of 2019, we used \$24.4 million to pay dividends, which is consistent with the amount paid for the same period in 2018.

We utilize the non-GAAP financial measure of free cash flow to evaluate our cash flows and results of operations. Free cash flow is defined as net cash provided by operating activities (which is the most directly comparable GAAP measure) less cash paid for capital expenditures. Management believes that free cash flow provides useful information to investors regarding the cash available in the period that was in excess of our needs to fund our capital expenditures and operating activities. Free cash flow is not a measure of operating performance under GAAP, and should not be considered in isolation nor construed as an alternative to operating profit, net income (loss) or cash flows from operating, investing or financing activities, each as determined in accordance with GAAP. Free cash flow does not represent residual cash available for distribution because we may have other non-discretionary expenditures that are not deducted from the measure. Moreover, since free cash flow is not a measure determined in accordance with GAAP and thus is susceptible to varying interpretations and calculations, free cash flow as presented, may not be comparable to similarly titled measures presented by other companies. The following table reconciles this non-GAAP financial measure to the most directly comparable measure calculated and presented in accordance with GAAP (in thousands):

	Three months ended March 31,		2019/2018	
	2019	2018	% Change	
Free cash flow calculation:				
Net cash provided by operating activities	\$25,156	\$23,093	9	%
Less: cash paid for capital expenditures	5,183	4,443	17	%
Free cash flow	\$19,973	\$18,650	7	%

The increase in free cash flow for the first three months of 2019 compared to the same period in 2018 was primarily due to increased net income offset by changes in working capital.

Notes, Credit Facilities and Available Future Liquidity

We have two series of senior notes outstanding with an aggregate principal amount of \$150 million ("Senior Notes") issued in a private placement transaction. Series A consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.01% and are due in full on September 30, 2021. Series B consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.11% and are due in full on September 30, 2023. Interest on each series of the Senior Notes is payable semi-annually on March 30 and September 30.

The aggregate borrowing commitment under our Credit Facility is \$300 million. The Credit Facility provides an option to increase the commitment under the Credit Facility by an additional \$100 million to bring the total borrowings available to \$400 million if certain prescribed conditions are met by the Company. The Credit Facility bears interest at variable rates from LIBOR plus 1.375% to a maximum of LIBOR plus 2.00%. Any outstanding balance under the Credit Facility is due June 19, 2023, when the Credit Facility matures. Our available capacity at any point in time is reduced by borrowings outstanding at the time and outstanding letters of credit which totaled \$17.7 million at March 31, 2019, resulting in an available borrowing capacity under the Credit Facility of \$135.3 million. In addition to those items under the Credit Facility, we had \$13.3 million of outstanding letters of credit and performance guarantees and bonds from other sources as of March 31, 2019.

The terms of the Credit Facility and Senior Notes require us to meet certain covenants, including, but not limited to, an interest coverage ratio (consolidated EBITDA divided by interest expense) and a leverage ratio (consolidated net indebtedness divided by consolidated EBITDA), where consolidated EBITDA (as defined in each agreement) and interest expense are calculated using the most recent four fiscal quarters. The Credit Facility has the more restrictive covenants with a minimum interest coverage ratio of 3.0 to 1.0 and a maximum leverage ratio of 2.5 to 1.0. The terms of our Credit Facility allow us to negotiate in good faith to amend any ratio or requirement to preserve the original intent of the agreement if any change in

27

[Return to Index](#)

accounting principle would affect the computation of any financial ratio or requirement of the Credit Facility. The adoption on January 1, 2019 of ASU 2016-02 does not affect the calculation of consolidated EBITDA under the agreement. We believe that we are in compliance with all such covenants contained in our credit agreements. Certain of our material, wholly-owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million. See Note 15 - Derivative Instruments and Hedging Activities.

Our ability to maintain and grow our operating income and cash flow depends, to a large extent, on continued investing activities. We believe our future cash flows from operations, supplemented by our borrowing capacity and the ability to issue additional equity, should be sufficient to fund our debt requirements, capital expenditures, working capital, dividend payments and future acquisitions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A. "Quantitative and Qualitative Disclosures About Market Risk" in our 2018 Annual Report.

Item 4. Controls and Procedures

A complete discussion of our controls and procedures is included in our 2018 Annual Report.

Disclosure Controls and Procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of March 31, 2019 at the reasonable assurance level.

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. Further, the design of disclosure controls and internal control over financial reporting must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Changes in Internal Control Over Financial Reporting

There have been no changes in our system of internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fiscal quarter ended March 31, 2019, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

See Note 9 to our Consolidated Interim Financial Statements in Part I, Item 1 of this Quarterly Report.

Item 1A. Risk Factors

Our business faces many risks. Any of the risks discussed in this Quarterly Report or our other SEC filings could have a material impact on our business, financial position or results of operations. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operations. For a detailed discussion of the risk factors that should be understood by any investor contemplating investment in our securities, please refer to "Item 1A - Risk Factors" in our 2018 Annual Report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

None.

Issuer Repurchases of Equity Securities

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares That May Yet be Purchased Under the Program (2)(3)
January 1 - 31, 2019 (1)	-	\$ -	—	4,000,218
February 1 - 28, 2019 (1)	41	\$ 69.87	—	4,000,327
March 1 - 31, 2019 (1)	7,185	\$ 67.37	—	4,017,147
Total	7,226	\$ 67.38	—	

(1) During the quarter 7,226 shares were surrendered to us by participants in a stock-based compensation plan to settle any personal tax liabilities which may result from the award.

(2) In connection with our initial public offering in September 1995, our shareholders authorized our Management Board to repurchase up to 10% of our issued share capital for a period of 18 months. This authorization was renewed at subsequent annual or special shareholder meetings. The repurchase of shares in the open market is at the discretion of management pursuant to this shareholder authorization.

(3) We distributed 24,155 treasury shares upon vesting of stock-based awards during the three months ended March 31, 2019.
