Form 10-Q
October 29, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-3247

CORNING INCORPORATED
(Exact name of registrant as specified in its charter)

New York
(State or other jurisdiction of incorporation or organization)

16-0393470
(I.R.S. Employer Identification No.)

One Riverfront Plaza, Corning, New York
(Address of principal executive offices)

14831
(Zip Code)

607-974-9000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Edgar Filing: CORNING INC /NY - Form 10-Q

Non-accelerated filer

Smaller reporting
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding as of October 15, 2014
Corning's Common Stock, \$0.50 par value per share	1,281,848,134 shares

CORNING INCORPORATED AND SUBSIDIARY COMPANIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

1. Significant Accounting Policies

Basis of Presentation

In these notes, the terms “Corning,” “Company,” “we,” “us,” or “our” mean Corning Incorporated and subsidiary companies.

The accompanying unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) and in accordance with U.S. GAAP for interim financial information. Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been omitted or condensed. These interim consolidated financial statements should be read in conjunction with Corning’s consolidated financial statements and notes thereto included in its Annual Report on Form 10-K for the year ended December 31, 2013 (“2013 Form 10-K”).

The unaudited consolidated financial statements reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of operations, financial position and cash flows for the interim periods presented. All such adjustments are of a normal recurring nature. The results for interim periods are not necessarily indicative of results which may be expected for any other interim period or for the full year.

Samsung Corning Precision Materials Co., Ltd. (“Samsung Corning Precision Materials”)

As further discussed in Note 10 (Acquisition), on January 15, 2014, Corning completed a series of strategic and financial agreements to acquire the common shares of Samsung Corning Precision Materials (“Acquisition”) previously held by Samsung Display Co., Ltd. (“Samsung Display”). As a result of these transactions, Corning is now the owner of 100% of the common shares of Samsung Corning Precision Materials, which we have consolidated into our results beginning in the first quarter of 2014. Operating under the name of Corning Precision Materials Co., Ltd. (“Corning Precision Materials”), the former Samsung Corning Precision Materials organization and operations were integrated into the Display Technologies segment in the first quarter of 2014.

Other Income (Expense), Net

“Other income (expense), net” in Corning’s consolidated statements of income includes the following (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Royalty income from Samsung Corning Precision Materials		\$ 14		\$ 43
Foreign currency exchange and hedge gain (loss), net	\$ 744	(33)	\$ 596	248
Net (gain) loss attributable to noncontrolling interests	(2)			1
Other, net	(22)	18	(7)	37
Total	\$ 720	\$ (1)	\$ 589	\$ 329

Beginning in the first quarter of 2014, due to the Acquisition and consolidation of Samsung Corning Precision Materials (now Corning Precision Materials), royalty income from Corning Precision Materials is no longer recognized in Corning’s consolidated statements of income.

Included in the line item Foreign currency exchange and hedge gain (loss), net, for the three and nine months ended September 30, 2014 and 2013 is the impact of purchased collars and average forward contracts which hedge our exposure to movements in the Japanese yen and its impact on our net earnings. In the three and nine months ended September 30, 2014, we recorded net pre-tax gains on our yen-denominated hedging programs in the amounts of \$764 million and \$621 million, respectively. These gains were driven by the mark-to-market of the purchased collars and average forward contracts, and occurred due to the significant weakening of the Japanese yen in the third quarter of 2014. We recorded a net loss in the amount of \$46 million in the third quarter of 2013 and a net gain in the amount of \$206 million for the nine months ended September 30, 2013. The gross notional value outstanding for purchase collars and average rate forwards which hedge our exposure to the Japanese yen at September 30, 2014 and December 31, 2013 was \$11 billion and \$6.8 billion, respectively.

In the second quarter of 2014, following the Acquisition, we entered into a portfolio of zero cost collars to hedge our exposure to movements in the Korean won and its impact on our net earnings. These zero cost collars have a gross notional value outstanding at September 30, 2014 of \$3 billion, and began settling quarterly in the third quarter of 2014 and will conclude at the end of 2015. The loss on the mark-to-market of these zero cost collars, which is also included in the line item Foreign currency exchange and hedge (loss) gain, net, was \$25 million and \$21 million, respectively, for the three and nine months ended September 30, 2014.

New Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. (ASU) 2014-09, Revenue from Contracts with Customers, as a new Topic, Accounting Standards Codification (ASC) Topic 606. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU is effective for annual periods beginning after December 15, 2016, including interim periods within that reporting period, and shall be applied retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. Early adoption is not permitted. We are currently assessing the potential impact of adopting this ASU on our financial statements and related disclosures.

2. Restructuring, Impairment and Other Charges

2014 Activity

For the nine months ended September 30, 2014, we recorded charges of \$51 million for workforce reductions, asset disposals and write-offs, and exit costs for restructuring activities in the Display Technologies, Optical Communications and Specialty Materials segments, with total cash expenditures estimated to be \$11 million.

In the fourth quarter of 2013, Corning implemented a global restructuring plan within several of our segments to better align our cost position. These actions consisted of workforce reductions, asset disposals and write-offs, and exit costs. We recorded charges of \$67 million associated with these actions, with total cash expenditures expected to be approximately \$40 million.

© 2014 Corning Incorporated. All Rights Reserved.

The following table summarizes the restructuring, impairment and other charges for the nine months ended September 30, 2014 (in millions):

	Reserve at January 1, 2014	Net charges/ (reversals)	Non cash adjustments	Cash payments	Reserve at September 30, 2014
Restructuring:					
Employee related costs	\$ 36	\$ 32	\$ (2)	\$ (27)	\$ 39
Other charges	8	5	(1)	(3)	9
Total restructuring activity	\$ 44	\$ 37	\$ (3)	\$ (30)	\$ 48
Impairment charges and disposal of long-lived assets		\$ 14			
Total restructuring, impairment and other charges		\$ 51			

Cash payments for employee-related costs related to the 2014 and 2013 restructuring actions are expected to be substantially completed in 2015.

2013 Activity

The following table summarizes the restructuring reserve activity for the nine months ended September 30, 2013 (in millions):

	Reserve at January 1, 2013	Net charges/ (reversals)	Cash payments	Reserve at September 30, 2013
Restructuring:				
Employee-related costs	\$ 38	\$ (1)	\$ (27)	\$ 10
Other charges (credits)	4		(3)	1
Total restructuring activity	\$ 42	\$ (1)	\$ (30)	\$ 11

Cash payments for the above restructuring activities were substantially completed in 2013.

3. Commitments, Contingencies and Guarantees

Dow Corning Corporation

Corning and The Dow Chemical Company (“Dow”) each own 50% of the common stock of Dow Corning Corporation (“Dow Corning”). In May 1995, Dow Corning filed for bankruptcy protection to address pending and claimed liabilities arising from breast implant product lawsuits. On June 1, 2004, Dow Corning emerged from Chapter 11 with a Plan of Reorganization (the “Plan”) which provided for the settlement or other resolution of implant claims. The Plan also included releases for Corning and Dow as shareholders in exchange for contributions to the Plan.

© 2014 Corning Incorporated. All Rights Reserved.

Under the Plan, Dow Corning has established and is funding a Settlement Trust and a Litigation Facility to provide a means for tort claimants to settle or litigate their claims. Inclusive of insurance, Dow Corning has paid approximately \$1.8 billion to the Settlement Trust. As of September 30, 2014, Dow Corning had recorded a liability of \$1.7 billion for future funding of the Settlement Trust. This amount reflects Dow Corning's estimate of the remaining obligation to fund the resolution of breast implant claims pursuant to the Plan. Future filing behaviors and the remaining level of funding that will be required are uncertain. Actual funding amounts may be materially different than the recorded liability. Dow Corning, with the assistance of a third party advisor, is in the process of assessing the impact of recent information about potential future claims experience, and, as a result, it is reasonably possible Dow Corning's estimate of the remaining obligation could materially change in the near term. Although Dow Corning is not yet able to estimate the impact of these matters, the implant liability currently reflects the maximum capped amount under the Plan; therefore, any future revision to the estimate is expected to result in a lower recorded liability. Any adjustment to Dow Corning's breast implant liability would impact the Company's earnings in proportion to the Company's 50 percent ownership interest in Dow Corning.

As a separate matter arising from its bankruptcy proceedings, Dow Corning is defending claims asserted by a number of commercial creditors who claim additional interest at default rates and enforcement costs, during the period from May 1995 through June 2004. As of September 30, 2014, Dow Corning has estimated the potential liability to these creditors to be within the range of \$98 million to \$320 million. As Dow Corning management believes no single amount within the range appears to be a better estimate than any other amount within the range, Dow Corning has recorded the minimum liability within the range. Should Dow Corning not prevail in this matter, Corning's equity earnings would be reduced by its 50% share of the amount in excess of \$98 million, net of applicable tax benefits.

Pittsburgh Corning Corporation and Other Asbestos Litigation

Corning and PPG Industries, Inc. ("PPG") each own 50% of the capital stock of Pittsburgh Corning Corporation ("PCC"). Over a period of more than two decades, PCC and several other defendants were named in numerous lawsuits involving claims alleging personal injury from exposure to asbestos. On April 16, 2000, PCC filed for Chapter 11 reorganization in the U.S. Bankruptcy Court for the Western District of Pennsylvania. At the time PCC filed for bankruptcy protection, there were approximately 11,800 claims pending against Corning in state court lawsuits alleging various theories of liability based on exposure to PCC's asbestos products and typically requesting monetary damages in excess of one million dollars per claim. Corning has defended those claims on the basis of the separate corporate status of PCC and the absence of any facts supporting claims of direct liability arising from PCC's asbestos products.

PCC Plan of Reorganization

Corning, with other relevant parties, has been involved in ongoing efforts to develop a Plan of Reorganization that would resolve the concerns and objections of the relevant courts and parties. On November 12, 2013, the Bankruptcy Court issued a decision confirming an Amended PCC Plan of Reorganization (the "Amended PCC Plan"). On September 30, 2014, the United States District Court for the Western District of Pennsylvania (the "District Court") affirmed the Bankruptcy Court's decision confirming the Amended PCC Plan. The lone objector may appeal that decision to the United States Court of Appeals for the Third Circuit. If that occurs, it would likely take many months for the confirmation of the Amended PCC Plan to be finally affirmed.

Under the Amended PCC Plan, Corning is required to contribute its equity interests in PCC and Pittsburgh Corning Europe N.V. ("PCE"), a Belgian corporation, and to contribute \$290 million in a fixed series of payments, recorded at present value. Corning has the option to use its shares rather than cash to make these payments, but the liability is fixed by dollar value and not the number of shares. The Amended PCC Plan requires Corning to make: 1) one

payment of \$70 million one year from the date the Amended PCC Plan becomes effective and certain conditions are met; and 2) five additional payments of \$35 million, \$50 million, \$35 million, \$50 million, and \$50 million, respectively, on each of the five subsequent anniversaries of the first payment, the final payment of which is subject to reduction based on the application of credits under certain circumstances.

© 2014 Corning Incorporated. All Rights Reserved.

-10-

Other Asbestos Litigation

In addition to the claims against Corning related to its ownership interest in PCC, Corning is also the defendant in approximately 9,700 other cases (approximately 37,400 claims) alleging injuries from asbestos related to its Corhart business and similar amounts of monetary damages per case. When PCC filed for bankruptcy protection, the Bankruptcy Court granted a preliminary injunction to suspend all asbestos cases against PCC, PPG and Corning – including these non-PCC asbestos cases (the “stay”). The stay remains in place as of the date of this filing. Under the Bankruptcy Court’s order confirming the Amended PCC Plan, the stay will remain in place until the Amended PCC Plan is finally affirmed. These non-PCC asbestos cases have been covered by insurance without material impact to Corning to date. As of September 30, 2014, Corning had received for these cases approximately \$19 million in insurance payments related to those claims. If and when the Bankruptcy Court’s confirmation of the Amended PCC Plan is finally affirmed, these non-PCC asbestos claims would be allowed to proceed against Corning. Corning has recorded in its estimated asbestos litigation liability an additional \$150 million for these and any future non-PCC asbestos cases.

Total Estimated Liability for the Amended PCC Plan and the Other Asbestos Litigation

The liability for the Amended PCC Plan and the other asbestos litigation was estimated to be \$701 million at September 30, 2014, compared with an estimate of liability of \$690 million at December 31, 2013. This \$701 million liability is comprised of \$261 million of the fair value of PCE, \$290 million for the fixed series of payments, and \$150 million for the non-PCC asbestos litigation, all referenced in the preceding paragraphs. With respect to the PCE liability, at September 30, 2014 and December 31, 2013, the fair value of \$261 million of our interest in PCE significantly exceeded its carrying value of \$164 million and \$167 million, respectively. There have been no impairment indicators for our investment in PCE and we continue to recognize equity earnings of this affiliate. At the time Corning recorded this liability, it determined it lacked the ability to recover the carrying amount of its investment in PCC and its investment was other than temporarily impaired. As a result, we reduced our investment in PCC to zero. As the fair value in PCE is significantly higher than book value, management believes that the risk of an additional loss in an amount materially higher than the fair value of the liability is remote. With respect to the liability for other asbestos litigation, the liability for non-PCC claims was estimated based upon industry data for asbestos claims since Corning does not have recent claim history due to the injunction issued by the Bankruptcy Court. The estimated liability represents the undiscounted projection of claims and related legal fees over the next 20 years. The amount may need to be adjusted in future periods as more data becomes available; however, we cannot estimate any additional losses at this time. The entire obligation is classified as a non-current liability as installment payments for the cash portion of the obligation under the Amended PCC Plan are not scheduled to commence until more than 12 months after the Plan becomes effective and the PCE portion of the obligation will be fulfilled through the direct contribution of Corning’s investment in PCE (currently recorded as a non-current other equity method investment).

Non-PCC Asbestos Cases Insurance Litigation

Several of Corning’s insurers have commenced litigation in state courts for a declaration of the rights and obligations of the parties under insurance policies affecting the non-PCC asbestos cases, including rights that may be affected by the potential resolutions described above. Corning is vigorously contesting these cases, and management is unable to predict the outcome of the litigation.

Other Commitments and Contingencies

We are required, at the time a guarantee is issued, to recognize a liability for the fair value or market value of the obligation it assumes. In the normal course of our business, we do not routinely provide significant third-party

guarantees. Generally, any third-party guarantees provided by Corning are limited to certain financial guarantees including stand-by letters of credit and performance bonds, and the incurrence of contingent liabilities in the form of purchase price adjustments related to attainment of milestones. When provided, these guarantees have various terms, and none of these guarantees are individually significant.

© 2014 Corning Incorporated. All Rights Reserved.

-11-

As of September 30, 2014 and December 31, 2013, contingent guarantees totaled a notional value of \$153 million and \$151 million, respectively. We believe a significant majority of these contingent guarantees will expire without being funded. We also were contingently liable for purchase obligations of \$300 million and \$126 million, at September 30, 2014 and December 31, 2013, respectively. The increase in purchase obligations from December 31, 2013 to September 30, 2014, was attributable to the acquisition of the remaining interests of Samsung Corning Precision Materials, which increased the amount of obligations at September 30, 2014 by \$166 million.

Product warranty liability accruals were considered insignificant at September 30, 2014 and December 31, 2013.

Corning is a defendant in various lawsuits, including environmental litigation, product-related suits, the Dow Corning and PCC matters, and is subject to various claims which arise in the normal course of business. In the opinion of management, the likelihood that the ultimate disposition of these matters will have a material adverse effect on Corning's consolidated financial position, liquidity, or results of operations, is remote. Other than certain asbestos related claims, there are no other material loss contingencies related to litigation.

Corning has been named by the Environmental Protection Agency ("the Agency") under the Superfund Act or by state governments under similar state laws, as a potentially responsible party for 15 hazardous waste sites. Under the Superfund Act, all parties who may have contributed any waste to a hazardous waste site, identified by the Agency, are jointly and severally liable for the cost of cleanup unless the Agency agrees otherwise. It is Corning's policy to accrue for its estimated liability related to Superfund sites and other environmental liabilities related to property owned by Corning based on expert analysis and continual monitoring by both internal and external consultants. At September 30, 2014 and December 31, 2013, Corning had accrued approximately \$28 million (undiscounted) and \$15 million (undiscounted), respectively, for the estimated liability for environmental cleanup and related litigation. Based upon the information developed to date, management believes that the accrued reserve is a reasonable estimate of the Company's liability and that the risk of an additional loss in an amount materially higher than that accrued is remote.

4. Debt

Based on borrowing rates currently available to us for loans with similar terms and maturities, the fair value of long-term debt was \$3.6 billion at September 30, 2014 and \$3.5 billion at December 31, 2013, compared to recorded book values of \$3.2 billion at September 30, 2014 and \$3.3 billion at December 31, 2013. The Company measures the fair value of its long-term debt using Level 2 inputs based primarily on current market yields for its existing debt traded in the secondary market.

2014

In the third quarter of 2014, we amended and restated our existing revolving credit facility. The amended facility provides a \$2 billion unsecured multi-currency line of credit and expires on September 30, 2019. At September 30, 2014, there were no outstanding amounts on this credit facility. The facility includes affirmative and negative covenants that Corning must comply with, including a leverage (debt to capital ratio) financial covenant. As of September 30, 2014, we were in compliance with all of the covenants.

At September 30, 2014, Corning had \$424 million in outstanding commercial paper as part of the Company's commercial paper program established in the second quarter of 2013. The estimated fair value of this commercial paper approximates its carrying value due to the short-term maturities.

2013

In the second quarter of 2013, the Company established a commercial paper program on a private placement basis, pursuant to which we may issue short-term, unsecured commercial paper notes up to a maximum aggregate principal amount outstanding at any time of \$1 billion. Under this program, the Company may issue the notes from time to time and will use the proceeds for general corporate purposes. The maturities of the notes will vary, but may not exceed 390 days from the date of issue. The interest rates will vary based on market conditions and the ratings assigned to the notes by credit rating agencies at the time of issuance. The Company's revolving credit facility is available to support obligations under the commercial paper program, if needed.

In the first quarter of 2013, we amended and restated our then-existing revolving credit facility. The 2013 amended facility provided a \$1 billion unsecured multi-currency line of credit that would have expired in March 2018. This facility was amended and restated by the \$2 billion facility entered into in the third quarter of 2014.

In the first quarter of 2013, Corning repaid the aggregate principal amount and accrued interest outstanding on the credit facility entered into in the second quarter of 2011 that allowed Corning to borrow up to Chinese Renminbi (RMB) 4 billion. The total amount repaid was approximately \$500 million. Upon repayment, the facility was terminated.

5. Income Taxes

Our provision for income taxes and the related effective income tax rates were as follows (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Provision for income taxes	\$ (395)	\$ (141)	\$ (747)	\$ (366)
Effective tax rate	28.0%	25.7%	33.5%	19.2%

For the three and nine months ended September 30, 2014, the effective income tax rate differed from the U.S. statutory rate of 35% primarily due to the following benefits:

- Rate differences on income (loss) of consolidated foreign companies, including the benefit of excess foreign tax credits attributable to a deemed distribution to the U.S. of a portion of foreign current year earnings;
 - Equity in earnings of nonconsolidated affiliates reported in the financials, net of tax; and
 - Tax incentives in foreign jurisdictions, primarily Taiwan.

These benefits were offset by discrete tax charges of \$102 million related to South Korean withholding tax on a dividend paid by Samsung Corning Precision Materials to Corning wholly owned foreign subsidiaries, and \$146 million attributable to a change in judgment on the realizability of certain foreign deferred taxes assets for the nine months ended September 30, 2014.

For the three and nine months ended September 30, 2013, the effective income tax rate differed from the U.S. statutory rate of 35% primarily due to the following benefits:

- Rate differences on income (loss) of consolidated foreign companies;
- Equity in earnings of nonconsolidated affiliates reported in the financials, net of tax; and
 - Tax incentives in foreign jurisdictions, primarily Taiwan.

In addition to the items noted above, the tax provision for the nine months ended September 30, 2013 reflects a \$54 million tax benefit to record the impact of the American Taxpayer Relief Act enacted on January 3, 2013 and made retroactive to 2012.

© 2014 Corning Incorporated. All Rights Reserved.

-13-

Corning's subsidiary in Taiwan is operating under tax holiday arrangements. The benefit of the arrangement phases out through 2018. The impact of the tax holiday on our effective tax rate is a reduction in the rate of 0.3 and 1.7 percentage points for the three months ended September 30, 2014 and 2013, respectively. The impact of the tax holiday on our effective tax rate is a reduction in the rate of 0.6 and 1.3 percentage points for the nine months ended September 30, 2014 and 2013, respectively.

In April 2011, South Korean tax authorities completed a tax audit of Samsung Corning Precision Materials. As a result, the tax authorities issued a pre-assessment of approximately \$46 million for an asserted underpayment of withholding tax on dividends paid from September 2006 through March 2009. Our first level of appeal was denied on October 5, 2011 and a formal assessment was issued. The assessment was paid in full in the fourth quarter of 2011, allowing us to continue the appeal process. On May 30, 2014, the Korean Tax Tribunal issued a ruling partially in favor of Samsung Corning Precision Materials, resulting in an \$18 million refund to Corning. Samsung Corning Precision Materials and Corning continue to appeal the remainder of the assessment and believe we will prevail when all available appeal remedies have been exhausted.

Corning continues to indefinitely reinvest substantially all of its foreign earnings, with the exception of approximately \$9 million of current earnings in 2014 that have very low or no tax cost associated with their repatriation. Our current analysis indicates that we have sufficient U.S. liquidity, including borrowing capacity, to fund foreseeable U.S. cash needs without requiring the repatriation of foreign cash. One time or unusual items that may impact our ability or intent to keep our foreign earnings and cash indefinitely reinvested include significant U.S. acquisitions, stock repurchases, shareholder dividends, changes in tax laws, derivative contract settlements or the development of tax planning ideas that allow us to repatriate earnings at little or no tax cost, and/or a change in our circumstances or economic conditions that negatively impact our ability to borrow or otherwise fund U.S. needs from existing U.S. sources. While it remains impracticable to calculate the tax cost of repatriating our total unremitted foreign earnings, such cost could be material to the results of operations of Corning in a particular period.

While we expect the amount of unrecognized tax benefits to change in the next 12 months, we do not expect the change to have a significant impact on the results of operations or our financial position.

6. Earnings per Common Share

The following table sets forth the computation of basic and diluted earnings per common share (in millions, except per share amounts):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Net income attributable to Corning Incorporated	\$ 1,014	\$ 408	\$ 1,484	\$ 1,540
Less: Series A convertible preferred stock dividend	24		70	
Net income available to common stockholders - basic	990	408	1,414	1,540
Plus: Series A convertible preferred stock dividend	24		70	
Net income available to common stockholders - diluted	\$ 1,014	\$ 408	\$ 1,484	\$ 1,540
Weighted-average common shares outstanding - basic	1,284	1,454	1,315	1,465
Effect of dilutive securities:				
Stock options and other dilutive securities	12	9	12	9
Series A convertible preferred stock dividend	115		109	
Weighted-average common shares outstanding - diluted	1,411	1,463	1,436	1,474
Basic earnings per common share	\$ 0.77	\$ 0.28	\$ 1.08	\$ 1.05
Diluted earnings per common share	\$ 0.72	\$ 0.28	\$ 1.03	\$ 1.04
Anti-dilutive potential shares excluded from diluted earnings per common share:				
Employee stock options and awards	23	36	24	40
Accelerated share repurchase forward contract			4	
Total	23	36	28	40

7. Available-for-Sale Investments

The following is a summary of the fair value of available-for-sale investments (in millions):

	Amortized cost		Fair value	
	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Bonds, notes and other securities:				
U.S. government and agencies	\$ 743	\$ 530	\$ 744	\$ 531
Equity securities	\$ 6		\$ 7	
Total short-term investments	\$ 749	\$ 530	\$ 751	\$ 531
Asset-backed securities	\$ 43	\$ 46	\$ 38	\$ 38
Total long-term investments	\$ 43	\$ 46	\$ 38	\$ 38

We do not intend to sell, nor do we believe it is more likely than not that we would be required to sell, the long-term investment asset-backed securities (which are collateralized by mortgages) before recovery of their amortized cost basis. It is possible that a significant degradation in the delinquency or foreclosure rates in the underlying assets could cause further temporary or other-than-temporary impairments in the future.

© 2014 Corning Incorporated. All Rights Reserved.

-15-

The following table summarizes the contractual maturities of available-for-sale securities at September 30, 2014 (in millions):

Less than one year	\$451
Due in 1-5 years	293
Due in 5-10 years	
Due after 10 years (1)	38
Total	\$782

(1) Includes \$38 million of asset-based securities that mature over time and are being reported at their final maturity dates.

Unrealized gains and losses, net of tax, are computed on a specific identification basis and are reported as a separate component of accumulated other comprehensive income in shareholders' equity until realized.

The following tables provide the fair value and gross unrealized losses of the Company's investments aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2014 and December 31, 2013 (dollars in millions):

	Number of securities in a loss position	September 30, 2014			
		12 months or greater		Total	
		Fair value	Unrealized losses (1)	Fair value	Unrealized losses
Asset-backed securities	21	\$ 38	\$ (4)	\$ 38	\$ (4)
Total long-term investments	21	\$ 38	\$ (4)	\$ 38	\$ (4)

(1) Unrealized losses in securities less than 12 months were not significant.

	Number of securities in a loss position	December 31, 2013			
		12 months or greater		Total	
		Fair value	Unrealized losses (1)	Fair value	Unrealized losses
Asset-backed securities	20	\$ 38	\$ (8)	\$ 38	\$ (8)
Total long-term investments	20	\$ 38	\$ (8)	\$ 38	\$ (8)

(1) Unrealized losses in securities less than 12 months were not significant.

As of September 30, 2014 and December 31, 2013, for securities that have credit losses, an unrealized loss on other than temporary impaired securities of \$4 million and \$6 million, respectively, is recognized in accumulated other comprehensive income.

Proceeds from sales and maturities of short-term investments totaled approximately \$954 million and \$1,449 million for the nine months ended September 30, 2014 and 2013, respectively.

8. Inventories

Inventories comprise the following (in millions):

	September 30, 2014	December 31, 2013
Finished goods	\$ 457	\$ 486
Work in process	245	234
Raw materials and accessories	323	311
Supplies and packing materials	302	239
Total inventories	\$ 1,327	\$ 1,270

9. Investments

Samsung Corning Precision Materials

Prior to December 2013, Corning owned 50% of its equity affiliate, Samsung Corning Precision Materials, Samsung Display owned 42.5% and three shareholders owned the remaining 7%. In the fourth quarter of 2013, in connection with a series of agreements with Samsung Display announced in October 2013, Corning acquired the minority interests of three shareholders in Samsung Corning Precision Materials for \$506 million, which included payment for the transfer of non-operating assets and the pro-rata portion of cash on the Samsung Corning Precision Materials balance sheet at September 30, 2013. The resulting transfer of shares to Corning increased Corning's ownership percentage of Samsung Corning Precision Materials from 50% to 57.5%. Because this transaction did not result in a change in control based on the governing documents of this entity, Corning did not consolidate this entity as of December 31, 2013.

As further discussed in Note 10 (Acquisition), on January 15, 2014, Corning completed the acquisition of the common shares of Samsung Corning Precision Materials previously held by Samsung Display. As a result of these transactions, Corning became the owner of 100% of the common shares of Samsung Corning Precision Materials, which were consolidated into our results beginning in the first quarter of 2014. Operating under the name of Corning Precision Materials, the former Samsung Corning Precision Materials organization and operations were integrated into the Display Technologies segment in the first quarter of 2014.

Dow Corning Corporation ("Dow Corning")

Summarized income statement information for Dow Corning is as follows for the three and nine months ended September 30, 2014 and prior year comparative periods: net sales \$1,520 million and \$4,545 million (2013: \$1,427 million and \$4,120 million), gross profit(1) \$351 million and \$1,071 million (2013: \$265 million and \$868 million) and net income attributable to Dow Corning \$176 million and \$476 million (2013: \$117 million and \$267 million). Dow Corning's net income in the three and nine months ended September 30, 2014 includes an after-tax (loss) gain on a derivative instrument of \$(20) million and \$63 million, respectively (2013: \$32 million and \$32 million). Additionally, for the three months ended September 30, 2014, Dow Corning's net income includes an energy tax credit of \$17 million and foreign tax credit of \$82 million.

(1)Gross profit for the three months ended September 30, 2014 includes R&D costs of \$70 million (2013: \$59 million) and selling expense of \$3 million (2013: \$4 million). Gross profit for the nine months ended September 30, 2014 includes R&D cost of \$207 million (2013: \$186 million) and selling expenses of \$9 million (2013: \$10 million).

10. Acquisition

On January 15, 2014, Corning consummated a series of strategic and financial agreements pursuant to the Framework Agreement with Samsung Display, previously announced on October 22, 2013, to acquire the remaining common shares of Samsung Corning Precision Materials. The transaction is expected to strengthen product and technology collaborations between the two companies and allow Corning to extend its leadership in specialty glass and drive earnings growth.

© 2014 Corning Incorporated. All Rights Reserved.

-17-

The Acquisition was accounted for under the purchase method of accounting in accordance with business combination accounting guidance. Accordingly, the preliminary purchase price was allocated to the assets acquired and liabilities assumed, based on their fair value on the date of Acquisition. The fair value was determined based on the fair value of consideration transferred for the remaining equity interest of Samsung Display's shares.

In connection with the purchase of Samsung Display's equity interest in Samsung Corning Precision Materials pursuant to the Framework Agreement, the Company designated a new series of its preferred stock as Fixed Rate Cumulative Convertible Preferred Stock, Series A, par value \$100 per share ("Preferred Stock"). As contemplated by the Framework Agreement, Samsung Display became the owner of 2,300 shares of Preferred Stock (with an issue price of \$1 million per share), of which 1,900 shares were issued in connection with the Acquisition and 400 shares were issued for cash.

Corning issued 1,900 shares of Preferred Stock as consideration in the Acquisition of Samsung Corning Precision Materials which had a fair value of \$1.9 billion on the acquisition date. The fair value was determined using an option pricing model based on the features of the Preferred Stock. That measure is based on Level 2 inputs observable in the market such as Corning's common stock price and dividend yield.

The Acquisition also includes a contingent consideration arrangement that potentially requires additional consideration to be paid between the parties in 2018: one based on projections of future revenues generated by the business of Samsung Corning Precision Materials for the period between the acquisition date and December 31, 2017, which is subject to a cap of \$665 million; and another based on the volumes of certain sales during the same period, which is subject to a separate cap of \$100 million. The fair value of the potential receipt of the contingent consideration in 2018 in the amount of \$196 million was estimated by applying an option pricing model using the Company's projections of Corning Precision Materials' future revenues. Changes in the fair value of the contingent consideration in future periods are valued using an option pricing model and are recorded in Corning's results in the period of the change. In the third quarter of 2014, we recorded a pre-tax adjustment in Selling, general and administrative expenses in the amount of \$77 million to reflect the increase in the fair value of the potential receipt of the contingent consideration.

The following table summarizes the total fair value of Samsung Corning Precision Materials at the acquisition date including the net consideration transferred to acquire the remaining 42.5% of Samsung Corning Precision Materials, the fair value of Corning's non-controlling interest in Samsung Corning Precision Materials pre- and post-acquisition and the amount of the implied fair value of the total entity for the purpose of allocating the purchase price to the acquired net assets.

	Samsung Display	Corning Incorporated	Samsung Corning Precision Materials
Net consideration applied to acquired assets			
Ownership percentage	42.5%	57.5%	100%
Fair value based on \$1.9 billion consideration transferred	\$ 1,911	\$ 2,588	\$ 4,499
Less contingent consideration - receivable	(196)	(265)	(461)
Net fair value of consideration @ 100%	1,715	2,323	4,038
Corning's loss on royalty contract	(136)	(184)	(320)
Fair value post-acquisition	\$ 1,579	\$ 2,139	\$ 3,718

Corning's fair value 57.5% post-acquisition	2,139
Total fair value at January 15, 2014	\$ 3,718

© 2014 Corning Incorporated. All Rights Reserved.

-18-

The \$1.9 billion fair value of consideration transferred for the remaining 42.5% interest in Samsung Corning Precision Materials plus the fair value of Corning's pre-acquisition fair value less the contingent consideration due Corning as of the acquisition date results in a net fair value for the total entity of \$4 billion.

As a result of the acquisition of Samsung Corning Precision Materials, Corning reacquired its technology license rights and effectively settled its pre-existing royalty contract with the acquired entity, Samsung Corning Precision Materials. With regard to the reacquired right, Corning engaged a third-party specialist to assist in assessing the fair value of this right and determined that the reacquired right had a value of zero. In addition, the Company assessed whether this royalty contract was favorable or unfavorable to Corning. It was determined that the contractual royalty rate of 3% as compared to the then current market rate of 12% was unfavorable to Corning. The effective settlement of the contract was valued using the Income Approach; specifically, a relief from royalty method. The amount by which the contract was unfavorable to Corning when compared to current market transactions for similar items resulted in a loss of \$320 million which was recorded on the acquisition date, representing 100% of the loss on the effective settlement of the contract. There were no stated contractual settlement provisions or previously recorded assets or liabilities to consider when determining the value associated with the settlement.

Because the pre-existing contract was unfavorable to Corning, a portion of the consideration transferred was deemed to be applicable to the effective settlement of the royalty contract between Corning and the acquiree, Samsung Corning Precision Materials. The \$320 million loss attributable to the settlement of the pre-existing arrangement was accounted for as a separate transaction from the business combination as follows:

- At acquisition, since the contract with Samsung Corning Precision Materials was effectively settled, Corning recognized a loss of \$320 million. Of the \$320 million, \$184 million effectively offset the portion of the gain on previously held equity investment attributable to Corning's interest in the royalty contract. As a result, the pre-acquisition fair value of Corning's 57.5% share of \$2.3 billion decreased to the fair value of \$2.1 billion post-acquisition; and
- At acquisition, since the seller, Samsung Display, was a 42.5% shareholder of Samsung Corning Precision Materials, 42.5%, or \$136 million, of the \$320 million loss to effectively settle the contract reduced the consideration transferred to acquire Samsung Display's interest in Samsung Corning Precision Materials. Accordingly, \$136 million of the consideration transferred was treated separately from the purchase price, resulting in the implied consideration transferred of approximately \$1.6 billion.

The net economic effect to Corning following the transaction was a net loss of \$136 million, constituting a \$320 million loss due to Corning's unfavorable contract and its share of the favorable contract in Samsung Corning Precision Materials of \$184 million.

The gain on the previously held equity investment was calculated based on the fair value of the entity immediately preceding the Acquisition. As the pre-existing contract was treated as a separate transaction, the pre-existing contract was not taken into consideration when calculating the gain on the previously held equity interest.

© 2014 Corning Incorporated. All Rights Reserved.

The net gain on previously owned equity was calculated as follows:

December 2013 Investment Balance	\$ 3,709
Dividend (1)	(1,574)
Other	(18)
Net investment book balance at 1/15/2014	\$ 2,117
Fair value Samsung Corning Precision Materials	\$ 4,038
57.5% of Samsung Corning Precision Materials (2)	2,323
Working capital adjustment and other	52
57.5% of the pre-acquisition fair value of assets	\$ 2,375
Gain on previously held equity investment (2)	\$ 258
Translation gain	136
Net gain	\$ 394

(1) In conjunction with the Framework Agreement, the parties agreed to have Samsung Corning Precision Materials distribute all cash and cash equivalents as a dividend to the shareholders of record as of December 31, 2013. The dividend was not part of the purchase price as the agreement was to distribute cash and cash equivalents as a dividend to the shareholders as soon as practicable. As such, at acquisition Corning did not have legal title to the cash to be distributed, although the dividend was distributed subsequent to the acquisition date. Therefore, the portion of Corning's share of the \$1.6 billion dividend received was accounted for in Corning's consolidated financial statements as if the dividend occurred at or immediately prior to the date of acquisition at which time Samsung Corning Precision Materials was still an equity method investment in Corning's consolidated financial statements.

(2) As Corning was a 57.5% shareholder at the date of acquisition, immediately preceding the acquisition of Samsung Corning Precision Materials, Corning recognized an asset and respective gain as part of the calculation of its previously held equity investment which included approximately \$184 million attributed to its economic interest in the royalty contract.

The following table summarizes the amounts of identified assets acquired and liabilities assumed at acquisition date. Corning has not completed its accounting for the Acquisition and its review of deferred taxes; therefore, amounts are subject to change.

Recognized amounts of identified assets acquired and liabilities assumed (in millions):	
Cash and cash equivalents (1)	\$ 133
Trade receivables	353
Inventory (3)	116
Property, plant and equipment (3)	3,615
Other current and non-current assets (3)	74
Debt – current	(32)
Accounts payable and accrued expenses (3)	(356)
Other current and non-current liabilities (3)	(307)
Total identified net assets (3)	3,596
Non-controlling interests	15
Fair value of Samsung Corning Precision Materials on acquisition date	(3,718)
Goodwill (2)(3)	\$ 107

(1)

Cash and cash equivalents are presented net of the 2014 dividend distributed subsequent to the Acquisition, in the amount of \$2.8 billion.

- (2) The goodwill recognized is not deductible for U.S. income tax purposes. The goodwill was allocated to the Display Technologies segment.
- (3) In the second and third quarters of 2014, the company recorded total measurement period adjustments of \$39 million for the Acquisition of Corning Precision Materials primarily related to accrual of contingent liabilities and employee benefit obligations.

© 2014 Corning Incorporated. All Rights Reserved.

The goodwill is primarily attributable to the workforce of the acquired business and the synergies expected to result from the integration of Corning Precision Materials. Acquisition-related costs of \$92 million in the nine months ended September 30, 2014 included costs for post-Acquisition compensation expense, legal, accounting, valuation and other professional services and were included in selling, general and administrative expenses in the Consolidated Statements of Income. Since the date of acquisition, the consolidation of Corning Precision Materials added \$1,331 million to Net sales. The impact to Net income of the consolidation of Corning Precision Materials is impracticable to calculate due to the level of integration within the Display Technologies segment and the significant amount of estimates that would be required.

Unaudited Pro Forma Financial Information

The unaudited pro forma combined consolidated statement of income for the three and nine months ended September 30, 2013, was derived from the unaudited financial statements of Corning and Samsung Corning Precision Materials for the three and nine months ended September 30, 2013, and is presented to show how Corning might have appeared had the Acquisition occurred as of January 1, 2013.

The unaudited pro forma combined consolidated financial information was prepared pursuant to the rules and regulations of the SEC. The unaudited pro forma adjustments reflecting the Acquisition have been prepared in accordance with the business combination accounting guidance and reflect the preliminary allocation of the purchase price to the acquired assets and liabilities based upon the preliminary estimate of fair values, using the assumptions set forth above.

Unaudited Pro Forma Financial Information (in millions, except per share data):

	Three months ended September 30, 2013	Nine months ended September 30, 2013
Net sales	\$ 2,554	\$ 7,431
Net income from continuing operations – basic	\$ 480	\$ 1,837
Net income from continuing operations – diluted	\$ 505	\$ 1,910
Earnings per common share attributable to common shareholders		
Basic	\$ 0.33	\$ 1.25
Diluted	\$ 0.32	\$ 1.20
Shares used in computing per share amounts		
Basic	\$ 1,454	\$ 1,465
Diluted	\$ 1,578	\$ 1,589

There were no other significant acquisitions for the nine months ended September 30, 2014, and for the year ended December 31, 2013.

© 2014 Corning Incorporated. All Rights Reserved.

11. Property, Net of Accumulated Depreciation

Property, net of accumulated depreciation follows (in millions):

	September 30, 2014	December 31, 2013
Land	\$ 474	\$ 121
Buildings	5,607	4,175
Equipment	14,089	12,286
Construction in progress	1,275	1,084
	21,445	17,666
Accumulated depreciation	(8,412)	(7,865)
Total	\$ 13,033	\$ 9,801

The increase in Property, net of accumulated depreciation in 2014 is primarily driven by the Acquisition of Samsung Corning Precision Materials, which added \$3.6 billion to this balance at acquisition.

In the three months ended September 30, 2014 and 2013, interest costs capitalized as part of Property, net of accumulated depreciation were \$9 million and \$8 million, respectively. In the nine months ended September 30, 2014 and 2013, interest costs capitalized as part of Property, net of accumulated depreciation, were \$31 million and \$25 million, respectively.

Manufacturing equipment includes certain components of production equipment that are constructed of precious metals. At September 30, 2014 and December 31, 2013, the recorded value of precious metals totaled \$3.2 billion and \$2.2 billion, respectively. Depletion expense for precious metals in the three months ended September 30, 2014 and 2013 was \$3 million and \$4 million, respectively. Depletion expense for precious metals in the nine months ended September 30, 2014 and 2013 totaled \$16 million and \$15 million, respectively. The consolidation of Corning Precision Materials added approximately \$1.1 billion in precious metals and approximately \$3 million of depletion expense for the nine months ended September 30, 2014.

12. Goodwill and Other Intangible Assets

The carrying amount of goodwill by segment for the periods ended September 30, 2014 and December 31, 2013 is as follows (in millions):

	Display Technologies	Optical Communications	Specialty Materials	Life Sciences	Total
Balance at December 31, 2013	\$ 9	\$ 240	\$ 150	\$ 603	\$ 1,002
Goodwill (1)	68		54		122
Measurement period adjustments (2)	39				39
Foreign currency translation adjustment	(1)	(1)	(4)	(15)	(21)
Balance at September 30, 2014	\$ 115	239	200	588	1,142

(1) The Company recorded the Acquisition of Samsung Corning Precision Materials and a small acquisition in the Specialty Materials segment in the first quarter of 2014. Refer to Note 10 (Acquisition) to the Consolidated

Financial Statements for additional information on the Acquisition of Samsung Corning Precision Materials.

- (2) In the second and third quarters of 2014, the company recorded measurement period adjustments of \$39 million for the Acquisition of Samsung Corning Precision Materials primarily related to the accrual of contingent liabilities and employee benefit obligations.

© 2014 Corning Incorporated. All Rights Reserved.

-22-

Corning's gross goodwill balances for the periods ended September 30, 2014 and December 31, 2013 were \$7.6 billion and \$7.5 billion, respectively. Accumulated impairment losses were \$6.5 billion for the periods ended September 30, 2014 and December 31, 2013, and were generated entirely through goodwill impairments related to the Optical Communications segment recorded primarily in 2001.

Other intangible assets are as follows (in millions):

	September 30, 2014			December 31, 2013		
	Gross	Accumulated amortization	Net	Gross	Accumulated amortization	Net
Amortized intangible assets:						
Patents, trademarks, and trade names	\$ 304	\$ 147	\$ 157	\$ 290	\$ 138	\$ 152
Customer lists and other	416	62	354	436	48	388
Total	\$ 720	\$ 209	\$ 511	\$ 726	\$ 186	\$ 540

Corning's amortized intangible assets are primarily related to the Optical Communications and Life Sciences segments. The net carrying amount of intangible assets decreased during the first nine months of 2014, primarily due to amortization of \$25 million and foreign currency translation adjustments, offset by a small acquisition.

Amortization expense related to these intangible assets is estimated to be \$34 million for 2014, \$33 million for 2015 and \$32 million annually from 2016 to 2019.

13. Employee Retirement Plans

The following table summarizes the components of net periodic benefit cost for Corning's defined benefit pension and postretirement health care and life insurance plans (in millions):

	Pension benefits				Postretirement benefits			
	Three months ended September 30,		Nine months ended September 30,		Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013	2014	2013	2014	2013
Service cost	\$ 30	\$ 16	\$ 62	\$ 53	\$ 4	\$ 3	\$ 9	\$ 10
Interest cost	42	33	118	99	10	10	28	29
Expected return on plan assets	(45)	(42)	(131)	(126)				
Amortization of net loss						3		11
Amortization of prior service cost (credit)	1	1	4	3	(3)	(1)	(5)	(4)
Recognition of actuarial gain				(41)				
Total pension and postretirement benefit expense (credit)	\$ 28	\$ 8	\$ 53	\$ (12)	\$ 11	\$ 15	\$ 32	\$ 46

© 2014 Corning Incorporated. All Rights Reserved.

14. Hedging Activities

Undesignated Hedges

The table below includes a total gross notional value for the translated earnings contracts of \$13.9 billion at September 30, 2014 (at December 31, 2013: \$6.8 billion), including purchased and zero cost collars of \$4.4 billion (at December 31, 2013: \$5.9 billion) and average rate forwards of \$9.5 billion (at December 31, 2013: \$0.9 billion). With respect to the purchased collars and zero cost collars, the gross notional amount includes the value of both the put and call options. However, due to the nature of the purchased and zero cost collars, either the put or the call option can be exercised at maturity. As of September 30, 2014, the total net notional value of the purchased collars and zero cost collars was \$2.3 billion (at December 31, 2013: \$3 billion).

The following tables summarize the gross notional amounts and respective fair values of Corning's derivative financial instruments on a gross basis for September 30, 2014 and December 31, 2013 (in millions):

	U.S. Dollar		Asset derivatives		Liability derivatives			
	Gross notional amount		Balance sheet location	Fair value		Balance sheet location	Fair value	
	2014	2013		2014	2013		2014	2013
Derivatives designated as hedging instruments								
Foreign exchange contracts	\$ 150	\$ 433	Other current assets	\$ 8	\$ 8	Other accrued liabilities		\$ (3)
			Other assets	1				
Interest rate contracts	550	550				Other liabilities	\$ (18)	(28)
Derivatives not designated as hedging instruments								
Foreign exchange contracts	1,118	804	Other current assets	17	20	Other accrued liabilities	(11)	(3)
Translated earnings contracts	13,899	6,826	Other current assets	378	344	Other accrued liabilities	(18)	(3)
			Other assets	477	90	Other liabilities	(8)	
Total derivatives	\$15,717	\$ 8,613		\$ 881	\$ 462		\$ (55)	\$ (37)

The following table summarizes the effect of derivative financial instruments on Corning's consolidated financial statements for the three months ended September 30, 2014 and 2013 (in millions):

Effect of derivative instruments on the consolidated financial statements for the three months ended September 30					
Derivatives in hedging relationships	Gain recognized in other comprehensive income (OCI)		Location of gain reclassified from accumulated OCI into income (effective)	Gain reclassified from accumulated OCI into income (effective) (1)	
	2014	2013		2014	2013
-			Sales	\$ 1	
Interest rate contracts		\$ 3	Cost of sales	2	\$ 9
Foreign exchange contracts	\$ 11	(3)	Other (expense) income, net		17
Total cash flow hedges	\$ 11	\$ 0		\$ 3	\$ 26

(1) The amount of hedge ineffectiveness for the three months ended September 30, 2014 and 2013 was insignificant.

The following table summarizes the effect of derivative financial instruments on Corning's consolidated financial statements for the nine months ended September 30, 2014 and 2013 (in millions):

Effect of derivative instruments on the consolidated financial statements for the nine months ended September 30					
Derivatives in hedging relationships	Gain/(loss) recognized in other comprehensive income (OCI)		Location of gain reclassified from accumulated OCI into income (effective)	Gain reclassified from accumulated OCI into income (effective) (1)	
	2014	2013		2014	2013
-			Sales	\$ 1	
Interest rate contracts		\$ 40	Cost of sales	2	\$ 28
Foreign exchange contracts	\$ 6	48	Other (expense) income, net		48
Total cash flow hedges	\$ 6	\$ 88		\$ 3	\$ 76

(1) The amount of hedge ineffectiveness for the nine months ended September 30, 2014 and 2013 was insignificant.

The following table summarizes the effect on the consolidated financial statements relating to Corning's derivative financial instruments (in millions):

Undesignated derivatives	Location of gain/(loss) recognized in income	Gain/(loss) recognized in income (1)			
		Three months ended September 30,		Nine months ended September 30,	
		2014	2013	2014	2013

15. Fair Value Measurements

Fair value standards under U.S. GAAP define fair value, establish a framework for measuring fair value in applying generally accepted accounting principles, and require disclosures about fair value measurements. The standards also identify two kinds of inputs that are used to determine the fair value of assets and liabilities: observable and unobservable. Observable inputs are based on market data or independent sources while unobservable inputs are based on the Company's own market assumptions. Once inputs have been characterized, the inputs are prioritized into one of three broad levels (provided in the table below) used to measure fair value. Fair value standards apply whenever an entity is measuring fair value under other accounting pronouncements that require or permit fair value measurement and require the use of observable market data when available.

The following tables provide fair value measurement information for the Company's major categories of financial assets and liabilities measured on a recurring basis (in millions):

	September 30, 2014	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Current assets:				
Short-term investments	\$ 762	\$ 762		
Other current assets (1)	\$ 404		\$ 404	
Non-current assets:				
Other assets (1)(2)	\$ 789		\$ 516	\$ 273
Current liabilities:				
Other accrued liabilities (1)	\$ 29		\$ 29	
Non-current liabilities:				
Other liabilities (1)	\$ 26		\$ 26	

(1) Derivative assets and liabilities include foreign exchange contracts, including forwards, zero-cost and purchased collars, together with interest rate swaps which are measured using observable quoted prices for similar assets and liabilities.

(2) Other assets include asset-backed securities which are measured using observable quoted prices for similar assets and a contingent consideration asset which was measured by applying an option pricing model using projected future Corning Precision Materials' revenue.

	December 31, 2013	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Current assets:				
Short-term investments	\$ 531	\$ 531		
Other current assets (1)	\$ 372		\$ 372	
Non-current assets:				

Edgar Filing: CORNING INC /NY - Form 10-Q

Other assets (1)(2)	\$	128	\$	128
Current liabilities:				
Other accrued liabilities (1)	\$	9	\$	9
Non-current liabilities:				
Other liabilities (1)	\$	28	\$	28

(1) Derivative assets and liabilities include foreign exchange contracts, including forwards and purchased collars, together with interest rate swaps which are measured using observable quoted prices for similar assets and liabilities.

(2) Other assets include asset-backed securities which are measured using observable quoted prices for similar assets.

© 2014 Corning Incorporated. All Rights Reserved.

As a result of the Acquisition of Samsung Corning Precision Materials, the Company has contingent consideration that was measured using unobservable (Level 3) inputs. This contingent consideration arrangement potentially requires additional consideration to be paid between the parties in 2018: one based on projections of future revenues generated by the business of Corning Precision Materials for the period between the acquisition date and December 31, 2017, which is subject to a cap of \$665 million; and another based on the volumes of certain sales during the same period, which is subject to a separate cap of \$100 million. The fair value of the potential receipt of the contingent consideration in 2018 in the amount of \$196 million recognized on the acquisition date was estimated by applying an option pricing model using the Company's projection of future revenues generated by Corning Precision Materials. Changes in the fair value of the contingent consideration in future periods are valued using an option pricing model and are recorded in Corning's results in the period of the change. In the third quarter of 2014, the fair value of the potential receipt of the contingent consideration in 2018 is estimated to be \$273 million. Corning recorded a pre-tax adjustment in the amount of \$77 million to reflect the increase in the fair value which is mainly due to the movement in foreign exchange rate.

As of December 31, 2013, the Company did not have any financial assets or liabilities that were measured on a recurring basis using unobservable (or Level 3) inputs.

16. Shareholders' Equity

Fixed Rate Cumulative Convertible Preferred Stock, Series A

On January 15, 2014, Corning designated a new series of its preferred stock as Fixed Rate Cumulative Convertible Preferred Stock, Series A, par value \$100 per share, and issued 1,900 shares of Preferred Stock at an issue price of \$1 million per share, for an aggregate issue price of \$1.9 billion, to Samsung Display in connection with the Acquisition of its equity interests in Samsung Corning Precision Materials. Corning also issued to Samsung Display an additional amount of Preferred Stock at closing, for an aggregate issue price of \$400 million in cash.

Dividends on the Preferred Stock are cumulative and accrue at the annual rate of 4.25% on the per share issue price of \$1 million. The dividends are payable quarterly as and when declared by the Company's board of directors. The Preferred Stock ranks senior to our common stock with respect to payment of dividends and rights upon liquidation. The Preferred Stock is not redeemable except in the case of a certain deemed liquidation event, the occurrence of which is under the control of the Company. The Preferred Stock is convertible at the option of the holder and the Company upon certain events, at a conversion rate of 50,000 shares of Corning's common stock per one share of Preferred Stock, subject to certain anti-dilution provisions. As of September 30, 2014, the Preferred Stock has not been converted, and none of the anti-dilution provisions have been triggered. Following the seventh anniversary of the closing of the Acquisition, the Preferred Stock will be convertible, in whole or in part, at the option of the holder. The Company has the right, at its option, to cause some or all of the shares of Preferred Stock to be converted into Common Stock, if, for 25 trading days (whether or not consecutive) within any period of 40 consecutive trading days, the closing price of Common Stock exceeds \$35 per share. If the aforementioned right becomes exercisable before the seventh anniversary of the closing, the Company must first obtain the written approval of the holders of a majority of the Preferred Stock before exercising its conversion right. The Preferred Stock does not have any voting rights except as may be required by law.

Share Repurchases

On October 31, 2013, as part of the share repurchase program announced on April 24, 2013 (the “2013 Repurchase Program”), Corning entered into an accelerated share repurchase (“ASR”) agreement with JP Morgan Chase Bank, National Association, London Branch (“JPMC”). Under the ASR agreement with JPMC, Corning agreed to purchase \$1 billion of its common stock, in total, with an initial delivery by JPMC of 47.1 million shares based on the current market price, and payment of \$1 billion made by Corning to JPMC. The payment to JPMC was recorded as a reduction to shareholders’ equity, consisting of an \$800 million increase in treasury stock, which reflects the value of the initial 47.1 million shares received upon execution, and a \$200 million decrease in other-paid-in capital, which reflects the value of the stock held back by JPMC pending final settlement. On January 28, 2014, the ASR agreement with JPMC was completed. Corning received an additional 10.5 million shares on January 31, 2014 to settle the ASR agreement. In total, Corning purchased 57.6 million shares based on the average daily volume weighted-average price of Corning’s common stock during the term of the ASR agreement with JPMC, less a discount. Additionally, in the first quarter of 2014, we repurchased 26.7 million shares of common stock on the open market for approximately \$484 million as part of the 2013 Repurchase Program. The 2013 Repurchase Program was completed in the first quarter of 2014.

On March 3, 2014, as part of the \$2.0 billion share repurchase program announced on October 22, 2013 and made effective concurrent with the closing of Corning’s Acquisition of Samsung Corning Precision Materials on January 15, 2014, Corning entered into an ASR agreement with Citibank N.A. (“Citi”). Under the ASR agreement with Citi, Corning agreed to purchase \$1.25 billion of its common stock, with an initial delivery by Citi of 52.5 million shares based on the current market price, and payment of \$1.25 billion made by Corning to Citi. On May 28, 2014, the ASR agreement with Citi was completed, and Corning received an additional 8.7 million shares to settle the ASR agreement. In total, Corning purchased 61.2 million shares based on the average daily volume weighted-average price of Corning’s common stock during the term of the ASR agreement with Citi, less a discount.

In addition to the shares repurchased through the ASR agreement, in the three and nine months ended September 30, 2014, we repurchased 9.6 million and 27.6 million shares of common stock on the open market for approximately \$200 million and \$567 million, respectively, as part of the share repurchase program made effective on January 15, 2014.

Accumulated Other Comprehensive Income

In the nine months ended September 30, 2014 and 2013, the primary changes in accumulated other comprehensive income (“AOCI”) were related to the foreign currency translation component. A summary of changes in the foreign currency translation adjustment component of AOCI is as follows (in millions):

	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Beginning balance	\$ 629	\$ 373	\$ 492	\$ 1,174
Other comprehensive (loss) income	(600)	76	(313)	(477)
Equity method affiliates	(76)	241	(226)	(7)
Net current-period other comprehensive (loss) income	(676)	317	(539)	(484)
Ending balance	\$ (47)	\$ 690	\$ (47)	\$ 690

In the first quarter of 2014, a \$136 million cumulative foreign currency translation gain was released to income as a result of the step acquisition of Corning Precision Materials and included in the gain on previously held equity investment.

There were no material tax effects related to foreign currency translation gains and losses.

-28-

17. Share-based Compensation

Stock Compensation Plans

The Company measures and recognizes compensation cost for all share-based payment awards made to employees and directors based on estimated fair values. Fair values for stock options were estimated using a multiple-point Black-Scholes valuation model. Share-based compensation cost was approximately \$19 million and \$15 million for the three months ended September 30, 2014 and 2013, respectively, and approximately \$47 million and \$40 million for the nine months ended September 30, 2014 and 2013, respectively. Amounts for all periods presented included compensation expense for employee stock options and time-based restricted stock and restricted stock units.

Stock Options

Corning's stock option plans provide non-qualified and incentive stock options to purchase authorized but unissued shares, or treasury shares, at the market price on the grant date and generally become exercisable in installments from one to five years from the grant date. The maximum term of a stock option is 10 years from the grant date.

The following table summarizes information concerning stock options outstanding including the related transactions under the stock option plans for the nine months ended September 30, 2014:

	Number of Shares (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term in Years	Aggregate Intrinsic Value (in thousands)
Options Outstanding as of December 31, 2013	57,139	\$17.83		
Granted	1,591	21.01		
Exercised	(8,000)	12.33		
Forfeited and Expired	(606)	17.30		
Options Outstanding as of September 30, 2014	50,124	18.81	4.67	\$156,052
Options Expected to Vest as of September 30, 2014	49,998	18.82	4.67	155,206
Options Exercisable as of September 30, 2014	36,845	20.39	3.47	78,022

The aggregate intrinsic value (market value of stock less option exercise price) in the preceding table represents the total pretax intrinsic value, based on the Company's closing stock price on September 30, 2014, which would have been received by the option holders had all option holders exercised their "in-the-money" options as of that date.

As of September 30, 2014, there was approximately \$15 million of unrecognized compensation cost related to stock options granted under the plans. The cost is expected to be recognized over a weighted-average period of 1.4 years. Compensation cost related to stock options was approximately \$9 million and \$7 million for the three months ended September 30, 2014 and 2013, respectively, and approximately \$20 million and \$18 million for the nine months ended September 30, 2014 and 2013, respectively.

Proceeds received from the exercise of stock options were \$98 million and \$54 million for the nine months ended September 30, 2014 and 2013, respectively. Proceeds received from the exercise of stock options were included in financing activities on the Company's Consolidated Statements of Cash Flows. The total intrinsic value of options exercised for the nine months ended September 30, 2014 and 2013 was approximately \$60 million and \$38 million, respectively, which is currently deductible for tax purposes. However, these tax benefits were not fully recognized due to net operating loss and credit carryforwards available to the Company. Refer to Note 5 (Income Taxes) to the consolidated financial statements.

© 2014 Corning Incorporated. All Rights Reserved.

The following range of inputs were used for the valuation of option grants under our Stock Option Plans:

	Three months ended September 30,				Nine months ended September 30,			
	2014		2013		2014		2013	
Expected volatility	45.7	- 45.7%	46.6	- 47.0%	45.7	- 46.2%	46.6	- 47.4%
Weighted-average volatility	45.7	- 45.7%	46.7	- 46.7%	45.7	- 46.2%	46.7	- 47.3%
Expected dividends	1.98	- 1.98%	2.68	- 2.68%	1.90	- 2.09%	2.68	- 3.02%
Risk-free rate	2.0	- 2.0%	1.8	- 2.2%	2.0	- 2.2%	0.8	- 2.2%
Average risk-free rate	2.0	- 2.0%	2.2	- 2.2%	2.0	- 2.2%	1.1	- 2.2%
Expected term (in years)	7.2	- 7.2	5.8	- 7.2	7.2	- 7.2	5.8	- 7.1
Pre-vesting departure rate	0.5	- 0.5%	0.4	- 4.1%	0.5	- 0.5%	0.4	- 4.1%

Expected volatility is based on a blended approach defined as the weighted average of the short-term implied volatility, the most recent volatility for the period equal to the expected term, and the most recent 15-year historical volatility. The expected term assumption is the period of time the options are expected to be outstanding, and is calculated using a combination of historical exercise experience adjusted to reflect the current vesting period of options being valued, and partial life cycles of outstanding options. The risk-free rate assumption is the implied rate for a zero-coupon U.S. Treasury bond with a term equal to the option's expected term. The ranges in the table above reflect results from separate groups of employees exhibiting different exercise behavior.

Incentive Stock Plans

The Corning Incentive Stock Plan permits restricted stock and restricted stock unit grants, either determined by specific performance goals or issued directly and, in most instances, subject to the possibility of forfeiture and without cash consideration. Restricted stock and restricted stock units under the Incentive Stock Plan are granted at the closing market price on the grant date, contingently vest over a period of generally one to ten years, and generally have contractual lives of one to ten years. The fair value of each restricted stock grant or restricted stock unit awarded under the Incentive Stock Plan was estimated on the date of grant.

Time-Based Restricted Stock and Restricted Stock Units:

Time-based restricted stock and restricted stock units are issued by the Company on a discretionary basis, and are payable in shares of the Company's common stock upon vesting. The fair value is based on the closing market price of the Company's stock on the grant date. Compensation cost is recognized over the requisite vesting period and adjusted for actual forfeitures before vesting.

The following table represents a summary of the status of the Company's non-vested time-based restricted stock and restricted stock units as of December 31, 2013, and changes which occurred during the nine months ended September 30, 2014:

	Shares (000's)	Weighted Average Grant-Date Fair Value
Non-vested shares and share units at December 31, 2013	6,108	\$ 14.58
Granted	1,476	20.44
Vested	(1,587)	17.34
Forfeited	(119)	14.73
Non-vested shares and share units at September 30, 2014	5,878	\$ 15.30

© 2014 Corning Incorporated. All Rights Reserved.

As of September 30, 2014, there was approximately \$31 million of unrecognized compensation cost related to non-vested time-based restricted stock and restricted stock units compensation arrangements granted under the Incentive Stock Plan. The cost is expected to be recognized over a weighted-average period of 1.7 years. Compensation cost related to time-based restricted stock and restricted stock units was approximately \$10 million and \$8 million for the three months ended September 30, 2014 and 2013, respectively, and approximately \$27 million and \$22 million for the nine months ended September 30, 2014 and 2013, respectively.

18. Significant Customers

For the three and nine months ended September 30, 2014, Corning had one customer that individually accounted for 10% or more of the Company's consolidated net sales. For the three months ended September 30, 2013, Corning had one customer that individually accounted for 10% or more of the Company's consolidated net sales. For the nine months ended September 30, 2013, Corning did not have a customer that individually accounted for 10% or more of the Company's consolidated net sales.

19. Reportable Segments

Our reportable segments are as follows:

- Display Technologies – manufactures liquid crystal display (“LCD”) glass for flat panel displays.
- Optical Communications – manufactures carrier network and enterprise network components for the telecommunications industry.
- Environmental Technologies – manufactures ceramic substrates and filters for automotive and diesel applications.
- Specialty Materials – manufactures products that provide more than 150 material formulations for glass, glass ceramics and fluoride crystals to meet demand for unique customer needs.
- Life Sciences – manufactures glass and plastic labware, equipment, media and reagents to provide workflow solutions for scientific applications.

All other reportable segments that do not meet the quantitative threshold for separate reporting are grouped as “All Other.” This group is primarily comprised of development projects and results for new product lines.

We prepared the financial results for our reportable segments on a basis that is consistent with the manner in which we internally disaggregate financial information to assist in making internal operating decisions. We included the earnings of equity affiliates that are closely associated with our reportable segments in the respective segment's net income. We have allocated certain common expenses among segments differently than we would for stand-alone financial information prepared in accordance with U.S. GAAP. Segment net income may not be consistent with measures used by other companies. The accounting policies of our reportable segments are the same as those applied in the consolidated financial statements.

(1) Depreciation expense for Corning's reportable segments includes an allocation of depreciation of corporate property not specifically identifiable to a segment.

(2) Research, development and engineering expenses include direct project spending that is identifiable to a segment.

(3) Many of Corning's administrative and staff functions are performed on a centralized basis. Where practicable, Corning charges these expenses to segments based upon the extent to which each business uses a centralized function. Other staff functions, such as corporate finance, human resources and legal, are allocated to segments, primarily as a percentage of sales.

A reconciliation of reportable segment net income to consolidated net income follows (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Net income of reportable segments	\$ 574	\$ 497	\$ 1,348	\$ 1,491
Non-reportable segments	(41)	(32)	(140)	(91)
Unallocated amounts:				
Net financing costs (1)	(27)	(3)	(86)	(65)

Net income	\$ 1,014	\$ 408	\$ 1,484	\$ 1,540

(1) Net financing costs include interest income, interest expense and investment gains associated with benefit plans.

(2)

Primarily represents the equity earnings of Dow Corning, which, for the three months ended September 30, 2014, includes our portion of a mark-to-market loss on a derivative instrument of \$(8) million (after-tax), an energy tax credit of \$8 million (after-tax), and a foreign tax credit of \$38 million (after-tax). For the nine months ended September 30, 2014, the equity earnings of Dow Corning included our portion of a mark-to-market gain on a derivative instrument of \$29 million (after-tax). For the three and nine months ended September 30, 2013, the equity earnings of Dow Corning includes our portion of gains in the amounts of approximately \$30 million for the resolution of contract disputes against customers relating to enforcement of long-term supply agreements and \$16 million for the positive impact of the settlement of a derivative, along with a charge of \$4 million related to the impact of a tax valuation allowance. Also included in the nine months ended September 30, 2013, an \$11 million restructuring charge for our share of costs for headcount reductions and asset write-offs.

(3) For the nine months ended September 30, 2013, Corning recorded a \$54 million tax benefit for the impact of the American Taxpayer Relief Act enacted on January 3, 2013 and made retroactive to 2012.

© 2014 Corning Incorporated. All Rights Reserved.

The sales of each of our reportable segments are concentrated across a relatively small number of customers. In the three months ended September 30, 2014, the following number of customers, which individually accounted for 10% or more of each segment's sales, represented the following concentration of segment sales:

- In the Display Technologies segment, three customers accounted for 60% of total segment sales.
- In the Optical Communications segment, one customer accounted for 13% of total segment sales.
- In the Environmental Technologies segment, three customers accounted for 89% of total segment sales.
 - In the Specialty Materials segment, three customers accounted for 50% of total segment sales.
 - In the Life Sciences segment, two customers accounted for 47% of total segment sales.

In the nine months ended September 30, 2014, the following number of customers, which individually accounted for 10% or more of each segment's sales, represented the following concentration of segment sales:

- In the Display Technologies segment, three customers accounted for 61% of total segment sales.
- In the Optical Communications segment, one customer accounted for 10% of total segment sales.
- In the Environmental Technologies segment, three customers accounted for 88% of total segment sales.
 - In the Specialty Materials segment, three customers accounted for 48% of total segment sales.
 - In the Life Sciences segment, two customers accounted for 45% of total segment sales.

A significant amount of specialized manufacturing capacity for our Display Technologies segment is concentrated in Asia. It is at least reasonably possible that the operation of a facility could be disrupted. Due to the specialized nature of the assets, it would not be possible to find replacement capacity quickly. Accordingly, loss of these facilities could produce a near-term severe impact on our display business and the Company as a whole.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ORGANIZATION OF INFORMATION

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") provides a historical and prospective narrative on the Company's financial condition and results of operations. This interim MD&A should be read in conjunction with the MD&A in our 2013 Form 10-K. The various sections of this MD&A contain a number of forward-looking statements that involve a number of risks and uncertainties. Words such as "anticipates," "expects," "intends," "plans," "goals," "believes," "seeks," "estimates," "continues," "may," "will," and variations of these words and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, uncertain events or assumptions, and other characterizations of future events or circumstances are forward-looking statements. Such statements are based on our current expectations and could be affected by the uncertainties and risk factors described in this filing and in "Risk Factors" in Part I, Item 1A of our 2013 Form 10-K, and as may be updated in our Forms 10-Q. Our actual results may differ materially, and these forward-looking statements do not reflect the potential impact of any divestitures, mergers, acquisitions, or other business combinations that had not been completed as of September 30, 2014.

Our MD&A includes the following sections:

- Overview
- Results of Operations
- Core Performance Measures
 - Reportable Segments
- Capital Resources and Liquidity
- Critical Accounting Estimates
 - New Accounting Standards
 - Environment
- Forward-Looking Statements

OVERVIEW

The impact of the Acquisition of the remaining equity interests in our affiliate Samsung Corning Precision Materials, now known as Corning Precision Materials, combined with strong business performance in both the Environmental Technologies and Optical Communications segments, drove an increase in sales of 23% and 25%, respectively, in the three and nine months ended September 30, 2014, when compared to the same periods last year. Net income increased significantly in the third quarter of 2014, up 149%, driven by the net gain on our yen-denominated hedging program, the consolidation of Corning Precision Materials and the resulting cost reductions and efficiencies gained through synergies and the positive impact of the change in the contingent consideration fair value resulting from the Acquisition. The increase was offset somewhat by price declines slightly outpacing volume increases in the Display Technologies segment and the negative impact of the depreciation of the Japanese yen versus the U.S. dollar exchange rate. Net income decreased slightly in the nine months ended September 30, 2014, when compared to the same period last year, driven by tax-related items which occurred in the second quarter, the negative impact of the depreciation of the Japanese yen versus the U.S. dollar exchange rate and the absence of several favorable events which occurred in 2013. These negative events were somewhat offset by the net gain on our yen-denominated hedging program, an increase in equity earnings from Dow Corning and higher net income in the Environmental Technologies segment.

Net sales in the third quarter of 2014 increased by \$473 million to \$2,540 million, when compared to the third quarter of 2013. The increase in net sales was due to the following items:

- Higher sales in the Display Technologies segment, driven by the consolidation of Corning Precision Materials, which increased sales by \$463 million, and an increase in volume in the mid-teens in percentage terms, offset somewhat by price declines in the mid-teens and the negative impact of the Japanese yen versus the U.S. dollar exchange rate in the amount of \$69 million;
- An increase in net sales in the Optical Communications segment in the amount of \$48 million, driven by an increase in sales of carrier network products in the amount of \$39 million, largely due to growth in North America, and an increase of \$9 million in enterprise network products; and
- An increase of \$57 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America. Automotive substrate products also increased, up \$14 million, due to higher demand in Europe and China.

Net sales in the nine months ended September 30, 2014 increased by \$1,448 million to \$7,311 million, when compared to the same period in 2013. The increase in net sales was due to the following items:

- Higher sales in the Display Technologies segment, driven by the consolidation of Corning Precision Materials, which increased sales by \$1,331 million, and an increase in volume in the high-single digits in percentage terms, offset somewhat by price declines in the mid-teens in percentage terms and the negative impact of the Japanese yen versus the U.S. dollar exchange rate in the amount of \$226 million;
- An increase in net sales in the Optical Communications segment in the amount of \$256 million, driven by an increase in sales of carrier network products in the amount of \$211 million, largely due to growth in North America and Europe, up \$77 million and \$60 million, respectively, the \$50 million impact of a small acquisition and the consolidation of an investment due to a change in control which occurred at the end of the second quarter of 2013 and an increase of \$45 million in enterprise network products; and
- An increase of \$161 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America.

In the third quarter of 2014, we generated net income of \$1,014 million or \$0.72 per share, compared to net income of \$408 million or \$0.28 per share for the same period in 2013. When compared to the same period last year, the increase in net income was due largely to the following items (amounts presented after-tax):

- The positive net impact of our yen-denominated hedge programs, driven by the weakening of the Japanese yen in 2014, in the amount of \$493 million;
- The impact of the consolidation of Corning Precision Materials, as well as cost reductions and efficiencies gained through synergies;
- The impact of the change in the fair value of the contingent consideration resulting from the acquisition of Corning Precision Materials in the amount of \$60 million;
- A \$29 million increase in equity earnings from Dow Corning, driven by favorable tax events and an increase in volume; and
- Higher net income in the Environmental Technologies segment, up \$25 million, driven by an increase in demand for our diesel products.

The increase in net income for the three months ended September 30, 2014 was offset somewhat by the following items (amounts presented after-tax):

- The negative impact from the Japanese yen versus the U.S. dollar exchange rate in the amount of \$37 million;
- Price declines in the mid-teens in percentage terms slightly outpacing an increase in volume in the mid-teens; and
 - A decrease in net income in the amount of \$38 million in the Specialty Materials segment.

In the nine months ended September 30, 2014, we generated net income of \$1,484 million or \$1.03 per share, compared to net income of \$1,540 million or \$1.04 per share for the same period in 2013. When compared to the same period last year, the decrease in net income was due largely to the following items (amounts presented after-tax):

- Several tax-related items in the amount of \$185 million, including the establishment of deferred tax valuation allowances in Japan and Germany, and the absence of a tax benefit in the amount of \$54 million recorded in the first quarter of 2013 related to the impact of the American Taxpayer Relief Act enacted on January 3, 2013 retroactive to 2012;
- A dividend withholding tax in the amount of \$102 million on Corning's share of the dividend from Samsung Corning Precision Materials distributed subsequent to the Acquisition of the remaining equity interests of the affiliate;
- The negative impact from the Japanese yen versus the U.S. dollar exchange rate in the amount of \$130 million;
- Price declines in the mid-teens in percentage terms outpacing an increase in volume in the high-single digits; and
- The absence of the \$26 million gain recognized on the true-up to our 2012 pension liability and the \$11 million gain resulting from the change in control of an equity investment, occurring in the second quarter of 2013.

The decrease in net income for the nine months ended September 30, 2014 was offset somewhat by the following items (amounts presented after-tax):

- The positive net impact of our yen-denominated hedge programs, driven by the weakening of the Japanese yen in 2014, in the amount of \$418 million;
- The impact of the consolidation of Corning Precision Materials, as well as cost reductions and efficiencies gained through synergies;
- An increase of \$89 million in equity earnings from Dow Corning, driven by favorable tax events of \$38 million, Corning's share of a mark-to-market gain on a derivative instrument in the amount of \$29 million and an increase in volume; and
- A \$52 million increase in net income in the Environmental Technologies segment, driven by an increase in demand for our diesel products.

Our key priorities for 2014 remain similar to those from previous years: protect our financial health and invest in the future. During the first nine months of 2014, we made the following progress toward these priorities:

© 2014 Corning Incorporated. All Rights Reserved.

Protecting Financial Health

Our balance sheet remains strong, and we generated positive cash flow from operating activities:

- We ended the third quarter of 2014 with \$6.1 billion of cash, cash equivalents and short-term investments, an increase from the balance at December 31, 2013 of \$5.2 billion, and well above our debt balance at September 30, 2014 of \$3.7 billion. The increase in cash was driven by the consolidation of Corning Precision Materials beginning in the first quarter of 2014, and the cash received from Samsung Display for the additional issuance of Preferred Stock in connection with the Acquisition, offset by the cash paid for our share repurchases.
- Our debt to capital ratio increased from 13% reported at December 31, 2013 to 14% at September 30, 2014, driven by an increase in the amount of outstanding commercial paper and our share repurchase program.
- Operating cash flow in the nine months ended September 30, 2014 was \$3,597 million, an increase of \$2,094 million when compared to the first nine months of 2013, driven by a dividend from Samsung Corning Precision Materials distributed subsequent to the Acquisition of the remaining equity interests of the affiliate.

Investing In Our Future

Corning is one of the world's leading innovators in materials science. For more than 160 years, Corning has applied its unparalleled expertise in specialty glass, ceramics, and optical physics to develop products that have created new industries and transformed people's lives. During 2014, we will maintain our innovation strategy focused on growing our existing businesses, developing opportunities adjacent or closely related to our existing technical and manufacturing capabilities, and investing in long-range opportunities in each of our market segments. When compared to the same periods in 2013, our spending levels for research, development and engineering declined slightly to 8% of sales in the three and nine months ended September 30, 2014.

We continue to work on new products, including glass substrates for high performance displays and LCD applications, diesel filters and substrates, and the optical fiber, cable and hardware and equipment that enable fiber-to-the-premises, and next generation data centers. In addition, we are focusing on wireless solutions for diverse venue applications, such as distributed antenna systems, fiber to the cell site and fiber to the antenna. We have focused our research, development and engineering spending to support the advancement of new product attributes for our Corning® Gorilla® Glass suite of products. We will continue to focus on adjacent glass opportunities which leverage existing materials or manufacturing processes, including Corning® Willow™ Glass, our ultra-slim flexible glass substrate for use in next-generation consumer electronic technologies.

Capital spending totaled \$740 million and \$682 million for the nine months ended September 30, 2014 and 2013, respectively. Spending in the first nine months of 2014 was driven primarily by the Display Technologies segment, and focused on finishing line optimization and tank rebuilds. We expect our 2014 capital spending to be approximately \$1.1 billion. We expect that approximately \$500 million will be directed toward our Display Technologies segment, of which approximately \$107 million is related to capital projects started in 2012 and 2013.

Corporate Outlook

Our recent Acquisition of the remaining equity interests in our affiliate Samsung Corning Precision Materials will drive sales growth in 2014. In our Display Technologies segment, we expect our market share to stabilize and price declines to be moderate. We anticipate the overall LCD glass retail market in 2014, as measured in square feet of glass, will increase by 10%, driven by the combination of an increase in retail sales of LCD televisions and the demand for larger television screen sizes. We also expect sales to grow in our Optical Communications and Environmental Technologies segments. We anticipate a rise in global demand for Corning's carrier network products, combined with growth of enterprise network products, will drive increased sales in our Optical Communications segment. We expect growth in Environmental Technologies due to higher demand for our heavy duty diesel products driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America. We

expect sales of light-duty diesel products to improve due to higher volume in Europe and automotive substrate product sales to increase due to higher demand in Europe and China. Net income may be negatively impacted by the effect of movements in foreign exchange rates. We may take advantage of acquisition opportunities that support the long-term strategies of our businesses. We remain confident that our strategy to grow through global innovation, while preserving our financial stability, will enable our continued long-term success.

Net Sales

For the three months ended September 30, 2014, net sales increased by \$473 million when compared to the same period in 2013. Driving the growth in net sales are the following items:

- An increase in the Display Technologies segment in the amount of \$361 million, driven by the consolidation of Corning Precision Materials, which increased sales by \$463 million, and an increase in volume in the mid-teens in percentage terms, offset somewhat by price declines in the mid-teens and the negative impact of the Japanese yen versus the U.S. dollar exchange rate in the amount of \$69 million;
- An increase in the Optical Communications segment in the amount of \$48 million, driven by an increase in sales of carrier network products in the amount of \$39 million and an increase of \$9 million in enterprise network products. Specifically, the following items impacted sales within the carrier network products group in the three months ended September 30, 2014, when compared to the same period in 2013:
 - o Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America, up \$17 million;
 - o An increase of \$11 million in sales of hardware and equipment products in South America;
 - o An increase of \$8 million in wireless product sales; and
 - o Lower sales of optical fiber, driven by a \$21 million decrease in China, offset somewhat by higher sales in North America and Europe, increasing by \$7 million and \$5 million, respectively.
- An increase of \$57 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America. Automotive substrate products also increased, up \$14 million, due to higher demand in Europe and China.

Net sales in the nine months ended September 30, 2014 increased by \$1,448 million to \$7,311 million, when compared to the same period in 2013. The increase in net sales was due to the following items:

- An increase in the Display Technologies segment in the amount of \$996 million, driven by the consolidation of Corning Precision Materials, which increased sales by \$1,331 million, and an increase in volume in the high-single digits in percentage terms, offset somewhat by price declines in the mid-teens and the negative impact of the Japanese yen versus the U.S. dollar exchange rate in the amount of \$226 million;
- An increase in the Optical Communications segment in the amount of \$256 million, driven by an increase in sales of carrier network products in the amount of \$211 million and an increase of \$45 million in enterprise network products. Specifically, the following items impacted sales within the carrier network products group in the first nine months of 2014, when compared to the same period in 2013:
 - o Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America and Europe, up \$77 million and \$60 million, respectively;
 - o The impact of a full three quarters of sales from a small acquisition and the consolidation of an investment due to a change in control which occurred at the end of the second quarter of 2013, which added approximately \$50 million; and
 - o Lower sales of optical fiber, driven by a \$50 million decrease in China, offset slightly by higher sales in North America and Europe, increasing by \$17 million and \$18 million, respectively.
- An increase of \$161 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America.

Although the impact of fluctuations in foreign currency exchange rates did not materially impact net sales in our Optical Communications, Environmental Technologies, Life Sciences and Specialty Materials segments, the impact of the fluctuation in the Japanese yen had a negative impact of approximately \$69 million and \$226 million, respectively,

on net sales in our Display Technologies segment in the three and nine months ended September 30, 2014.

-40-

Cost of Sales

The types of expenses included in the cost of sales line item are: raw materials consumption, including direct and indirect materials; salaries, wages and benefits; depreciation and amortization; production utilities; production-related purchasing; warehousing (including receiving and inspection); repairs and maintenance; inter-location inventory transfer costs; production and warehousing facility property insurance; rent for production facilities; and other production overhead.

Gross Margin

In the three and nine months ended September 30, 2014, gross margin dollars increased by \$188 million and \$502 million, respectively, when compared to the same periods in 2013, driven largely by the consolidation of Corning Precision Materials and higher volume and improved manufacturing efficiencies in the Environmental Technologies segment. As a percentage of net sales, gross margin decreased when compared to the same periods last year, due primarily to the impact of the depreciation of the Japanese yen versus the U.S. dollar in the amounts of \$66 million and \$206 million, respectively, price declines in the mid-teens in percentage terms in our Display Technologies segment and the impact of inventory builds in 2013 in the Optical Communications and Specialty Materials segments that did not repeat in 2014, offset somewhat by the positive impact of the consolidation of Corning Precision Materials.

Selling, General and Administrative Expenses

For the three months ended September 30, 2014, selling, general and administrative expenses decreased by \$9 million, driven by the positive impact of a contingent consideration fair value adjustment of \$77 million and cost control measures implemented by our segments, offset somewhat by \$24 million of additional expense from the consolidation of Corning Precision Materials and an increase of \$19 million in share-based and performance-based compensation expenses. As a percentage of net sales, selling, general and administrative expenses decreased to 10%, when compared to 13% in the third quarter of 2013, driven by the contingent consideration fair value gain of \$77 million.

For the nine months ended September 30, 2014, selling, general and administrative expenses increased by \$179 million, driven by \$72 million of additional expense from the consolidation of Corning Precision Materials, an increase of \$33 million in share-based and performance-based compensation expenses and an increase of approximately \$92 million in acquisition-related costs, including \$72 million of post-combination compensation expense, offset somewhat by the positive impact of a contingent consideration fair value adjustment of \$77 million and cost control measures implemented by our segments. As a percentage of net sales, selling, general and administrative expenses were 13%, consistent with the same period in 2013, due to the increase in expenses related to the Acquisition largely being offset by the contingent consideration fair value adjustment.

The types of expenses included in the selling, general and administrative expenses line item are: salaries, wages and benefits; stock-based compensation expense; travel; sales commissions; professional fees; and depreciation and amortization, utilities and rent for administrative facilities.

Research, Development and Engineering Expenses

For the three and nine months ended September 30, 2014, research, development and engineering expenses increased by \$15 million and \$64 million, respectively, when compared to the same periods last year. Driving the increase was the consolidation of Corning Precision Materials, which added approximately \$19 million and \$56 million, respectively. As a percentage of net sales, research, development and engineering expenses were 8% in the three and nine months ended September 30, 2014, slightly lower than the same periods in 2013.

Equity in Earnings of Affiliated Companies

The following provides a summary of equity in earnings of affiliated companies (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Samsung Corning Precision Materials		\$ 74		\$ 319
Dow Corning Corporation	\$ 88	57	\$ 234	138
All other	7	7	9	20
Total equity earnings	\$ 95	\$ 138	\$ 243	\$ 477

Equity earnings of affiliated companies decreased in the three and nine months ended September 30, 2014, when compared to the same periods last year, reflecting the Acquisition and consolidation of Samsung Corning Precision Materials, offset somewhat by an increase in equity earnings from Dow Corning. Equity earnings from Dow Corning in the three and nine months ended September 30, 2014 increased substantially, up 54% and 70%, respectively, when compared to the same periods in 2013, despite the absence of several favorable non-operating items which occurred in the third quarter of 2013 totaling \$46 million. The increase in the third quarter of 2014 was driven by the following items:

- An increase in equity earnings of \$23 million in the silicones segment, driven by favorable tax adjustments in the amount of \$41 million and an increase in volume, offset somewhat by the absence of two positive non-operating items recorded in the third quarter of 2013 in the amount of \$36 million, Corning's share of a mark-to-market loss on a derivative instrument in the amount of \$10 million and the effect of higher inventory costs.
- An increase in equity earnings of \$8 million in the polysilicon segment, driven by an increase in volume and a gain in the amount of \$9 million related to energy tax credits, offset slightly by the absence of a \$10 million gain on a settlement of a long-term sales agreement recorded in the third quarter of 2013.

Equity earnings from Dow Corning increased by \$96 million in the nine months ended September 30, 2014, when compared to the same period in 2013, driven by the following items:

- An increase in equity earnings of \$53 million in the silicones segment, driven by favorable tax adjustments in the amount of \$41 million, Corning's share of a mark-to-market gain on a derivative instrument in the amount of \$32 million and an increase in volume, offset somewhat by the effect of higher inventory costs and the absence of two positive non-operating items recorded in the third quarter of 2013 in the amount of \$36 million.
- An increase in equity earnings of \$44 million in the polysilicon segment, driven by higher volume, the absence of \$11 million in restructuring charges incurred in the first half of 2013, a gain in the amount of \$9 million related to energy tax credits and the settlement of a long-term sales agreement in the first quarter of 2014 in the amount of \$9 million.

Other Income (Expense), Net

"Other income (expense), net" in Corning's consolidated statements of income includes the following (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Royalty income from Samsung Corning Precision Materials		\$ 14		\$ 43
Foreign currency exchange and hedge gain (loss), net	\$ 744	(33)	\$ 596	248
Net (gain) loss attributable to noncontrolling interests	(2)			1
Other, net	(22)	18	(7)	37

Total	\$ 720	\$ (1)	\$ 589	\$ 329
-------	--------	--------	--------	--------

© 2014 Corning Incorporated. All Rights Reserved.

Beginning in the first quarter of 2014, due to the Acquisition and consolidation of Samsung Corning Precision Materials (now Corning Precision Materials), royalty income from Corning Precision Materials is no longer recognized in Corning's consolidated statement of income.

Included in the line item Foreign currency exchange and hedge gain (loss), net, for the three and nine months ended September 30, 2014 and 2013 is the impact of purchased collars and average forward contracts which hedge our exposure to movements in the Japanese yen and its impact on our net earnings. In the three and nine months ended September 30, 2014, we recorded net pre-tax gains on our yen-denominated hedging programs in the amounts of \$764 million and \$621 million, respectively. These gains were driven by the mark-to-market of the purchased collars and average forward contracts, and occurred due to the significant weakening of the Japanese yen in 2014. We recorded a net loss in the amount of \$46 million in the third quarter of 2013 and a net gain in the amount of \$206 million for the nine months ended September 30, 2013. The gross notional value outstanding for purchase collars and average rate forwards which hedge our exposure to the Japanese yen at September 30, 2014 and December 31, 2013 was \$11.0 billion and \$6.8 billion, respectively.

In the second quarter of 2014, following the Acquisition, we entered into a portfolio of zero cost collars to hedge our exposure to movements in the Korean won and its impact on our net earnings. These zero cost collars have a gross notional value outstanding at September 30, 2014 of \$2.9 billion, and began settling quarterly in the third quarter of 2014 and will conclude at the end of 2015. The loss on the mark-to-market of these zero cost collars, which is also included in the line item Foreign currency exchange and hedge gain (loss), net, was \$25 million and \$21 million, respectively, for the three and nine months ended September 30, 2014.

Income Before Income Taxes

Income before income taxes for the three and nine months ended September 30, 2014, was negatively impacted by the depreciation of the Japanese yen versus the U.S. dollar in the amount of \$54 million and \$181 million, respectively.

Provision for Income Taxes

Our provision for income taxes and the related effective income tax rates were as follows (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Provision for income taxes	\$ (395)	\$ (141)	\$ (747)	\$ (366)
Effective tax rate	28.0%	25.7%	33.5%	19.2%

For the three and nine months ended September 30, 2014, the effective income tax rate differed from the U.S. statutory rate of 35% primarily due to the following benefits:

- Rate differences on income (loss) of consolidated foreign companies, including the benefit of excess foreign tax credits attributable to a deemed distribution to the U.S. of a portion of foreign current year earnings;
 - Equity in earnings of nonconsolidated affiliates reported in the financials net of tax; and
 - Tax incentives in foreign jurisdictions, primarily Taiwan.

These benefits were offset principally by discrete tax charges of \$102 million related to South Korean withholding tax on a dividend paid by Samsung Corning Precision Materials to Corning wholly-owned foreign subsidiaries and \$146 million attributable to a change in judgment on the realizability of certain foreign deferred tax assets for the nine months ended September 30, 2014.

For the three and nine months ended September 30, 2013, the effective income tax rate differed from the U.S. statutory rate of 35% primarily due to the following benefits:

- Rate differences on income (loss) of consolidated foreign companies;
- Equity in earnings of nonconsolidated affiliates reported in the financials, net of tax; and
 - Tax incentives in foreign jurisdictions, primarily Taiwan.

Refer to Note 5 (Income Taxes) to the consolidated financial statements for additional information.

Net Income Attributable to Corning Incorporated

As a result of the above, our net income and per share data is as follows (in millions, except per share amounts):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Net income attributable to Corning Incorporated	\$ 1,014	\$ 408	\$ 1,484	\$ 1,540
Basic earnings per common share	\$ 0.77	\$ 0.28	\$ 1.08	\$ 1.05
Diluted earnings per common share	\$ 0.72	\$ 0.28	\$ 1.03	\$ 1.04
Shares used in computing per share amounts				
Basic earnings per common share	1,284	1,454	1,315	1,465
Diluted earnings per common share	1,411	1,463	1,436	1,474

Comprehensive Income

For the three months ended September 30, 2014, comprehensive income decreased by \$381 million when compared to the same period in 2013, driven by the negative impact of the change in foreign currency translation gains and losses, offset by an increase of \$606 million in net income attributable to Corning Incorporated. In the three months ended September 30, 2014, we recognized a loss of \$676 million compared to a gain of \$317 million in the same period in 2013. The losses recognized in 2014 were driven by unfavorable movements in the translation rates of Japanese yen, Korean won and the Euro to the U.S. dollar.

For the nine months ended September 30, 2014, comprehensive income decreased by \$158 million when compared to the same period in 2013, driven by the increase in foreign currency translation losses and a decrease of \$56 million in net income attributable to Corning Incorporated. In the nine months ended September 30, 2014, we recognized a loss of \$539 million compared to a loss of \$484 million in the same period in 2013. The losses recognized in 2014 were driven by unfavorable movements in the translation rates of Japanese yen, Korean won and the Euro to the U.S. dollar.

Refer to Note 16 (Shareholders' Equity) to the consolidated financial statements for additional information.

CORE PERFORMANCE MEASURES

In managing the Company and assessing our financial performance, we supplement certain measures provided by our consolidated financial statements with measures adjusted to exclude certain items, to arrive at Core Performance measures. We believe reporting Core Performance measures provides investors greater transparency to the information used by our management team to make financial and operational decisions. Net sales, equity in earnings of affiliated companies, and net income are adjusted to exclude the impacts of changes in the Japanese yen and Korean won, the impact of the purchased and zero cost collars, average forward contracts and other yen-related transactions, acquisition-related costs, discrete tax items, restructuring and restructuring-related charges, certain litigation-related expenses, pension mark-to-market adjustments, and other items which do not reflect on-going operating results of the Company or our equity affiliates. Management discussion and analysis on our reportable segments has also been adjusted for these items, as appropriate. These measures are not prepared in accordance with U.S. Generally Accepted Accounting Principles (“GAAP”). We believe investors should consider these non-GAAP measures in evaluating our results as they are more indicative of our core operating performance and how management evaluates our operational results and trends. These measures are not, and should not be viewed as a substitute for U.S. GAAP reporting measures. For a reconciliation of non-GAAP performance measures and a further discussion of the measures, please see “Reconciliation of Non-GAAP Measures” below.

RESULTS OF OPERATIONS – CORE PERFORMANCE MEASURES

Selected highlights from our continuing operations, excluding certain items, follow (in millions):

	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30,			September 30,		
	2014	2013		2014	2013	
Core net sales	\$ 2,649	\$ 2,108	26%	\$ 7,615	\$ 5,943	28%
Core equity in earnings of affiliated companies	\$ 76	\$ 121	(37)%	\$ 195	\$ 474	(59)%
Core earnings	\$ 568	\$ 487	17%	\$ 1,556	\$ 1,387	12%

Core Net Sales

Core net sales in the third quarter of 2014, which excludes the impact of changes in the Japanese yen, Korean won and other certain items, totaled \$2,649 million, an increase of \$541 million, or 26%, when compared to the same period in 2013. Driving this growth are the following items:

- An increase in the Display Technologies segment in the amount of \$430 million, driven by the consolidation of Corning Precision Materials, which increased core sales by \$504 million, and an increase in volume in the mid-teens in percentage terms, offset somewhat by price declines in the mid-teens;
- An increase in the Optical Communications segment in the amount of \$48 million, driven by an increase in sales of carrier network products in the amount of \$39 million and an increase of \$9 million in enterprise network products. Specifically, the following items impacted sales within the carrier network products group in the three months ended September 30, 2014, when compared to the same period in 2013:
 - o Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America, up \$17 million;
 - o An increase of \$11 million in sales of hardware and equipment products in South America;
 - o An increase of \$8 million in wireless product sales; and
 - o Lower sales of optical fiber, driven by a \$21 million decrease in China, offset somewhat by higher sales in North America and Europe, increasing by \$7 million and \$5 million, respectively.
-

An increase of \$57 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America. Automotive substrate products also increased, up \$14 million, due to higher demand in Europe and China.

© 2014 Corning Incorporated. All Rights Reserved.

Core net sales in the nine months ended September 30, 2014 increased by \$1,672 million to \$7,615 million, when compared to the same period in 2013. The increase in core net sales was due to the following items:

- An increase in the Display Technologies segment in the amount of \$1,222 million, driven by the consolidation of Corning Precision Materials, which increased sales by \$1,437 million, and an increase in volume in the high-single digits in percentage terms, offset somewhat by price declines in the mid-teens;
- An increase in the Optical Communications segment in the amount of \$256 million, driven by an increase in sales of carrier network products in the amount of \$211 million and an increase of \$45 million in enterprise network products. Specifically, the following items impacted sales within the carrier network products group in the first nine months of 2014, when compared to the same period in 2013:
 - o Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America and Europe, up \$77 million and \$60 million, respectively;
 - o The impact of a full three quarters of sales from a small acquisition and the consolidation of an investment due to a change in control which occurred at the end of the second quarter of 2013, which added approximately \$50 million; and
 - o Lower sales of optical fiber, driven by a \$50 million decrease in China, offset slightly by higher sales in North America and Europe, increasing by \$17 million and \$18 million, respectively.
- An increase of \$161 million in the Environmental Technologies segment, due mainly to an increase in demand for our heavy duty diesel products, driven by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America.

Core Equity in Earnings of Affiliated Companies

The following provides a summary of core equity in earnings of affiliated companies (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Samsung Corning Precision Materials		\$ 85		\$ 335
Dow Corning Corporation*	\$ 68	28	\$ 177	114
All other	8	8	18	25
Total equity earnings	\$ 76	\$ 121	\$ 195	\$ 474

*In 2013, we excluded the operating results of Dow Corning's consolidated subsidiary Hemlock Semiconductor, a producer of polycrystalline silicon, to remove the impact of the severe unpredictability and instability in the polysilicon market.

The following table reconciles the non-GAAP financial measure of equity earnings from Dow Corning to its most directly comparable GAAP financial measure:

	Equity Earnings			
	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
As reported	\$ 88	\$ 57	\$ 234	\$ 138
Hemlock Semiconductor operating results (3)		3		(1)
Hemlock Semiconductor non-operating results (3)(7)		(10)		(1)
Equity in earnings of affiliated companies (9)	(20)	(22)	(57)	(22)
Core Performance measures	\$ 68	\$ 28	\$ 177	\$ 114

See Part 1, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Results of Operations – Core Performance Measures, “Items which we exclude from GAAP measures to arrive at Core Performance measures” for the descriptions of the footnoted reconciling items.

-46-

Core equity earnings of affiliated companies decreased in the three and nine months ended September 30, 2014, when compared to the same period last year, reflecting the Acquisition and consolidation of Corning Precision Materials. Core equity earnings from Dow Corning in the three and nine months ended September 30, 2014 increased considerably, up \$40 million and \$63 million, respectively, driven by the following items:

- An increase in core equity earnings of \$29 million and \$24 million, respectively, in the silicones segment, driven by favorable tax adjustments in the amount of \$19 million and an increase in volume, offset slightly by the effect of higher inventory costs.
- An increase in core equity earnings of \$11 million and \$36 million, respectively, in the polysilicon segment, driven by an increase in volume and a gain in the amount of \$2 million related to energy tax credits.

Core Earnings

When compared to the same period last year, core earnings increased in the three months ended September 30, 2014 by \$81 million, or 17%, driven by the following items (amounts presented after-tax):

- The impact of the consolidation of Corning Precision Materials, as well as cost reductions and efficiencies gained through synergies;
- A \$37 million increase in core equity earnings from Dow Corning, driven by favorable tax events and an increase in volume; and
- Higher net income in the Environmental Technologies segment, up \$25 million, driven by an increase in demand for our diesel products.

When compared to the same period last year, core earnings increased in the nine months ended September 30, 2014 by \$169 million, or 12%, driven by the following items (amounts presented after-tax):

- The impact of the consolidation of Corning Precision Materials, as well as cost reductions and efficiencies gained through synergies;
- An increase of \$59 million in core equity earnings from Dow Corning, driven by favorable tax events and an increase in volume; and
- A \$52 million increase in net income in the Environmental Technologies segment, driven by an increase in demand for our diesel products.

The amount of net periodic pension expense or credit included in core earnings for the three months ended September 30, 2014 and 2013 was expense of \$28 million and \$8 million, respectively, and for the nine months ended September 30, 2014 and 2013 was expense of \$53 million and a credit of \$12 million, respectively. Refer to Note 13 (Employee Benefit Plans) to the Consolidated Financial Statements for additional information.

Core Earnings per Common Share

The following table sets forth the computation of core basic and core diluted earnings per common share (in millions, except per share amounts):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Core earnings attributable to Corning Incorporated	\$ 568	\$ 487	\$ 1,556	\$ 1,387
Less: Series A convertible preferred stock dividend	24		70	
Core earnings available to common stockholders - basic	544	487	1,486	1,387
Add: Series A convertible preferred stock dividend	24		70	
Core earnings available to common stockholders - diluted	\$ 568	\$ 487	\$ 1,556	\$ 1,387
Weighted-average common shares outstanding - basic	1,284	1,454	1,315	1,465
Effect of dilutive securities:				
Stock options and other dilutive securities	12	9	12	9
Series A convertible preferred stock	115		109	
Weighted-average common shares outstanding - diluted	1,411	1,463	1,436	1,474
Core basic earnings per common share	\$ 0.42	\$ 0.33	\$ 1.13	\$ 0.95
Core diluted earnings per common share	\$ 0.40	\$ 0.33	\$ 1.08	\$ 0.94

Reconciliation of Non-GAAP Measures

We utilize certain financial measures and key performance indicators that are not calculated in accordance with GAAP to assess our financial and operating performance. A non-GAAP financial measure is defined as a numerical measure of a company's financial performance that (i) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the comparable measure calculated and presented in accordance with GAAP in the statement of income or statement of cash flows, or (ii) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the comparable measure as calculated and presented in accordance with GAAP in the statement of income or statement of cash flows.

Core net sales, core equity earnings of affiliated companies and core earnings are non-GAAP financial measures utilized by our management to analyze financial performance without the impact of items that are driven by general economic conditions and events that do not reflect the underlying fundamentals and trends in the Company's operations.

© 2014 Corning Incorporated. All Rights Reserved.

The following tables reconcile our non-GAAP financial measures to their most directly comparable GAAP financial measure.

Three months ended September 30, 2014

	Net sales	Equity earnings	Income before taxes	Net income	Effective tax rate	Earnings per share
As reported	\$ 2,540	\$ 95	\$ 1,409	\$ 1,014	28%	\$ 0.72

© 2014 Corning Incorporated. All Rights Reserved.

Items which we exclude from GAAP measures to arrive at Core Performance measures are as follows:

- (1) Constant-currency adjustments:

Constant-yen: Because a significant portion of Corning’s LCD glass business revenues and manufacturing costs are denominated in Japanese yen, management believes it is important to understand the impact on core earnings of translating yen into dollars. Presenting results on a constant-yen basis mitigates the translation impact of the Japanese yen, and allows management to evaluate performance period over period, analyze underlying trends in our businesses, and establish operational goals and forecasts. We use an internally derived management rate of ¥93, which is aligned to our yen portfolio of purchased collars, and have restated all periods presented based on this rate in order to effectively remove the impact of changes in the Japanese yen.

Constant-won: Following the Acquisition of Samsung Corning Precision Materials and because a significant portion of Samsung Corning Precision Materials’ (now Corning Precision Materials) costs are denominated in Korean won, management believes it is important to understand the impact on core earnings from translating won into dollars. Presenting results on a constant-won basis mitigates the translation impact of the Korean won, and allows management to evaluate performance period over period, analyze underlying trends in our businesses, and establish operational goals and forecasts without the variability caused by the fluctuations caused by changes in the rate of this currency. We use an internally derived management rate of 1,100, which is consistent with historical prior period averages of the won. We have not recast prior periods presented as the impact is not material to Corning in those periods.
- (2) Purchased and zero cost collars, average forward contracts and other yen-related transactions: We have excluded the impact of our yen-denominated purchased collars, average forward contracts, and other yen-related transactions for each period presented. Additionally, we are also excluding the impact of our portfolio of Korean won-denominated zero cost collars which we entered into in the second quarter of 2014. By aligning an internally derived rate with our portfolio of purchased collars and average forward contracts, and excluding other yen-related transactions and the constant-currency adjustments, we have materially mitigated the impact of changes in the Japanese yen.
- (3) Results of Dow Corning’s consolidated subsidiary, Hemlock Semiconductor: In 2013, we excluded the results of Dow Corning’s consolidated subsidiary, Hemlock Semiconductor, a producer of polycrystalline silicon, to remove the operating and non-operating items and events which have caused severe unpredictability and instability in earnings beginning in 2012. These events were primarily driven by the macro-economic environment. Specifically, the negative impact of the determination by the Chinese Ministry of Commerce (“MOFCOM”), which imposes provisional anti-dumping duties on solar-grade polysilicon imports from the United States, and the impact of asset write-offs, offset by the benefit of large payments required under Hemlock Semiconductor customers’ “take-or-pay” contracts, are events that are unrelated to Dow Corning’s core operations, and that have, or could have, significant impacts to this business. Beginning in 2014, due to the stabilization of the polycrystalline silicon industry, we will no longer exclude the operating results of Hemlock Semiconductor from core performance measures.
- (4) Acquisition-related costs: These expenses include intangible amortization, inventory valuation adjustments and external acquisition-related deal costs.
- (5) Discrete tax items: This represents the removal of discrete adjustments attributable to changes in tax law and changes in judgment about the realizability of certain deferred tax assets. This item also includes the income tax effects of adjusting from a GAAP tax rate to a core earnings tax rate.
- (6) Certain litigation-related charges: These adjustments relate to the Pittsburgh Corning Corporation (PCC) asbestos litigation.

- (7) Restructuring, impairment and other charges. In the third quarter of 2014, amount includes other expenses and disposal costs not classified as restructuring expense.
- (8) Liquidation of subsidiary: The partial impact of non-restructuring related items due to the decision to liquidate a consolidated subsidiary that is not significant.
- (9) Equity in earnings of affiliated companies: These adjustments relate to items which do not reflect expected on-going operating results of our affiliated companies, such as restructuring, impairment and other charges and settlements under “take-or-pay” contracts.
- (10) Impacts from the Acquisition of Samsung Corning Precision Materials: Pre-acquisition gains and losses on previously held equity investment and other gains and losses related to the Acquisition, including post-combination expenses, fair value adjustments to the indemnity asset related to contingent consideration and the impact of the withholding tax on a dividend from Samsung Corning Precision Materials.
- (11) Pension mark-to-market adjustment: Mark-to-market pension gains and losses, which arise from changes in actuarial assumptions and the difference between actual and expected returns on plan assets and discount rates. In accordance with GAAP, Corning recognizes pension actuarial gains and losses outside of the corridor, where the corridor is equal to 10% of the greater of the benefit obligation or the market-related value of plan assets at the beginning of the year, for our defined benefit pension plans annually in the fourth quarter of each year and whenever a plan is remeasured or valuation estimates are finalized. Actuarial gains and losses occur when actual experience differs from the estimates used to allocate the change in value of pension plans to expense throughout the year or when assumptions change, as they may each year. Significant factors that can contribute to the recognition of actuarial gains and losses include changes in discount rates, differences between actual and expected returns on plan assets, and other changes in actuarial assumptions such as life expectancy of plan participants. Management believes that pension actuarial gains and losses are primarily financing activities that are more reflective of changes in current conditions in global financial markets, and are not directly related to the underlying performance of our businesses. For further information on the actuarial assumptions and plan assets referenced above, see Management’s Discussion and Analysis of Financial Condition and Results of Operations, under Critical Accounting Estimates - Employee Retirement Plans, and Note 13, Employee Retirement Plans, of Notes to the Consolidated Financial Statements.
- (12) Gain on change in control of equity investment: Gain as a result of certain changes to the shareholder agreement of an equity company, resulting in Corning having a controlling interest that requires consolidation of this investment.

REPORTABLE SEGMENTS

Our reportable segments are as follows:

- Display Technologies – manufactures liquid crystal display glass for flat panel displays.
- Optical Communications – manufactures carrier network and enterprise network components for the telecommunications industry.
- Environmental Technologies – manufactures ceramic substrates and filters for automotive and diesel applications.
- Specialty Materials – manufactures products that provide more than 150 material formulations for glass, glass ceramics and fluoride crystals to meet demand for unique customer needs.
- Life Sciences – manufactures glass and plastic labware, equipment, media and reagents to provide workflow solutions for scientific applications.

All other reportable segments that do not meet the quantitative threshold for separate reporting are grouped as “All Other.” This group is primarily comprised of development projects and results for new product lines.

We prepared the financial results for our reportable segments on a basis that is consistent with the manner in which we internally disaggregate financial information to assist in making internal operating decisions. We included the earnings of equity affiliates that are closely associated with our reportable segments in the respective segment’s net income. We have allocated certain common expenses among segments differently than we would for stand-alone financial information prepared in accordance with U.S. GAAP. The Display Technologies, Optical Communications, Environmental Technologies, Specialty Materials and Life Sciences segments include non-GAAP measures which are not prepared in accordance with GAAP. We believe investors should consider these non-GAAP measures in evaluating our results as they are more indicative of our core operating performance and with how management evaluates our operational results and trends. These measures are not, and should not be viewed as a substitute for GAAP reporting measures. For a reconciliation of non-GAAP performance measures to the most directly comparable GAAP financial measure, please see “Reconciliation of non-GAAP Measures” below. Segment net income may not be consistent with measures used by other companies. The accounting policies of our reportable segments are the same as those applied in the consolidated financial statements.

Display Technologies

The following tables provide net sales and other data for the Display Technologies segment (in millions):

-55-

As Reported

When compared to the third quarter of 2013, the increase in net sales of \$361 million in the third quarter of 2014 was due to the Acquisition of the remaining equity interests of our affiliate Samsung Corning Precision Materials, and the consolidation of this entity, which added \$463 million in net sales. Price declines in the mid-teens in percentage terms slightly outpaced an increase in volume in the mid-teens, which was driven by sales of larger-sized LCD televisions and supply chain preparations for the upcoming holiday season. Sequentially, price declines were more moderate than the second quarter, as anticipated. The depreciation of the Japanese yen versus the U.S. dollar adversely impacted net sales by \$69 million.

Net income in the Display Technologies segment increased by \$69 million, or 22%, in the three months ended September 30, 2014, when compared to the same period last year, and was largely driven by the following items (amounts presented after-tax):

- The consolidation of Corning Precision Materials and the resulting cost reductions and efficiencies gained through synergies; and
- The impact of the change in the fair value of the contingent consideration resulting from the acquisition of Corning Precision Materials in the amount of \$60 million.

The increase in net income was offset somewhat by the following items (amounts presented after-tax):

- The impact of price declines in the mid-teens in percentage terms slightly outpacing volume gains in the mid-teens; and
- The depreciation of the Japanese yen versus the U.S. dollar in the amount of \$39 million, offset somewhat by the increase in realized gains on our yen-denominated hedge programs in the amount of \$18 million.

When compared to the same period last year, the increase of \$996 million in net sales in the nine months ended September 30, 2014, was due to the Acquisition of the remaining equity interests of our affiliate Samsung Corning Precision Materials, and the consolidation of this entity, which added \$1,331 million in net sales. This impact was somewhat offset by price declines in the mid-teens in percentage terms, which more than offset an increase in volume in the high-single digits, and the depreciation of the Japanese yen versus the U.S. dollar, which adversely impacted net sales by \$226 million.

Net income in the Display Technologies segment decreased by \$126 million, or 13%, in the nine months ended September 30, 2014, when compared to the same period last year. The positive impact of an increase in volume in the high-single digits, the \$60 million change in the fair value of the contingent consideration resulting from the acquisition of Corning Precision Materials and the impact of the consolidation of Corning Precision Materials were more than offset by the following items:

- The impact of price declines in the mid-teens in percentage terms;
- The depreciation of the Japanese yen versus the U.S. dollar in the amount of \$132 million, offset somewhat by the increase in realized gains on our yen-denominated hedge programs in the amount of \$115 million;
- Restructuring and acquisition-related expenses in the amounts of \$31 million and \$37 million, respectively; and
 - The absence of royalty income from Samsung Corning Precision Materials.

Core Performance

When compared to the third quarter of 2013, the increase in core net sales of \$430 million, or 62%, in the third quarter of 2014 was due to the Acquisition of the remaining equity interests of our affiliate Samsung Corning Precision Materials, and the consolidation of this entity, which added \$504 million in net sales. Although LCD glass volume

increased in the mid-teens in percentage terms in the third quarter of 2014, this increase was slightly outpaced by price declines in the mid-teens. Sequentially, price declines were more moderate than the second quarter, as anticipated.

© 2014 Corning Incorporated. All Rights Reserved.

Core earnings in the Display Technologies segment increased by \$43 million, or 14%, in the three months ended September 30, 2014, when compared to the same period last year. The positive impact of an increase in volume in the mid-teens and the consolidation of Corning Precision Materials and the resulting cost reductions and efficiencies gained through synergies were partially offset by the impact of price declines in the mid-teens in percentage terms.

When compared to the same period last year, the increase in core net sales of \$1,222 million, or 61%, in the nine months ended September 30, 2014, was due to the Acquisition of the remaining equity interests of our affiliate Corning Precision Materials, and the consolidation of this entity, which added \$1,437 million in net sales. Although volume increased in the high-single digit in the first nine months of 2014, this increase was more than offset by price declines in the mid-teens in percentage terms.

Core earnings in the Display Technologies segment increased by \$58 million, or 6%, in the nine months ended September 30, 2014, when compared to the same period last year. The positive impact of the consolidation of Corning Precision Materials and an increase in volume in the high-single digits were partially offset by the impact of price declines in the mid-teens in percentage terms and the absence of royalty income from Corning Precision Materials.

The Display Technologies segment has a concentrated customer base comprised of LCD panel and color filter makers primarily located in China, Japan and Taiwan. For the three and nine months ended September 30, 2014, three customers of the Display Technologies segment that individually accounted for more than 10% of segment net sales, accounted for approximately 60% and 61%, respectively, of total segment sales when combined. Our customers face the same global economic dynamics as we do in this market. Our near-term sales and profitability would be impacted if any individual customers were unable to continue to purchase our products.

Outlook:

We anticipate the overall LCD glass retail market in 2014, as measured in square feet of glass, will increase 10%, driven by the combination of an increase in retail sales of LCD televisions and the demand for larger television screen sizes. We expect Corning's share of the market in 2014 will remain consistent with our share in 2013.

In the fourth quarter, the Company anticipates its LCD glass volume will be consistent to down slightly when compared to the third quarter of 2014, and in line with or slightly better than the overall glass market volume. We expect sequential LCD glass price declines in the fourth quarter of 2014 will be more moderate and in the range we experienced throughout most of 2013.

The end market demand for LCD televisions, monitors and notebooks is dependent on consumer retail spending, among other things. We are cautious about the potential negative impacts that economic conditions, particularly a global economic recession, excess market capacity and world political tensions could have on consumer demand. While the LCD industry has grown rapidly in recent years, economic volatility along with consumer preferences for panels of differing sizes, prices, or other factors may lead to pauses in market growth. Therefore, it is possible that glass manufacturing capacity may exceed demand from time to time but we believe that we have levers to proactively manage our capacity to adjust to fluctuations in demand. We may incur further charges in this segment to reduce our workforce and consolidate capacity. In addition, changes in foreign exchange rates, principally the Japanese yen, will continue to impact the sales and profitability of this segment. In order to mitigate this risk, Corning entered into a series of foreign exchange contracts to hedge our exposure to movements in the Japanese yen and its impact on our earnings.

Optical Communications

The following tables provide net sales and other data for the Optical Communications segment (in millions):

As Reported	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30,			September 30,

-58-

As Reported

In the third quarter of 2014, net sales of the Optical Communications segment increased by \$48 million, or 7%, when compared to the third quarter of 2013, driven by a \$39 million increase in sales of our carrier network products. Specifically, the following items impacted sales within the carrier network products group in the third quarter of 2014:

- Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America, up \$17 million;
 - An increase of \$11 million in sales of hardware and equipment products in South America;
 - An increase of \$8 million in wireless product sales; and
- Lower sales of optical fiber, driven by a \$21 million decrease in China, offset somewhat by higher sales in North America and Europe, increasing by \$7 million and \$5 million, respectively.

Sales of enterprise network products also increased in the third quarter of 2014, up \$9 million, when compared to the same period in 2013, driven by higher sales of data center products in Europe.

In the nine months ended September 30, 2014, net sales of the Optical Communications segment increased by \$256 million, or 15%, when compared to the first nine months of 2013, driven by a \$211 million increase in sales of our carrier network products. Specifically, the following items impacted sales within the carrier network products group in the first nine months of 2014:

- Higher sales of cable and hardware and equipment products used in fiber-to-the-home solutions in North America and Europe, up \$77 million and \$60 million, respectively;
- The impact of a full three quarters of sales from a small acquisition and the consolidation of an investment due to a change in control which occurred at the end of the second quarter of 2013, which added approximately \$50 million; and
- Lower sales of optical fiber, driven by a \$50 million decrease in China, offset slightly by higher sales in North America and Europe, increasing by \$17 million and \$18 million, respectively.

Sales of enterprise network products also increased in the first nine months of 2014, up \$45 million, when compared to the same period in 2013, due to strong sales in all regions of the world, led by an increase of \$18 million for data center and LAN products in Europe, and higher sales of wireless products in the amount of \$12 million.

Net income increased by \$6 million, or 10%, in the third quarter of 2014, when compared to the third quarter of 2013, driven by the significant increase in volume for carrier network products in North America and Europe, an increase in worldwide enterprise network product volume and increased manufacturing efficiencies through cost reductions and productivity improvements, offset by growth in lower margin product lines and price declines in fiber and cable products.

Although sales increased by 15% in the nine months ended September 30, 2014, net income declined by 10%. Strong volume in both carrier and enterprise network products was offset by optical fiber price declines in China, higher operating expenses, unfavorable mix in carrier products, and the absence of the inventory build we experienced in the first half of 2013. Restructuring charges and acquisition costs of \$12 million and \$6 million, respectively, and the absence of two favorable non-operating items that occurred in the second quarter of 2013 in the amount of \$20 million, also negatively impacted the results of this segment.

Movements in foreign exchange rates did not significantly impact the results of this segment in the three and nine months ended September 30, 2014.

Core Performance

When compared to the same periods last year, core earnings in the three and nine months ended September 30, 2014 increased by \$5 million, or 8%, and \$12 million, or 8%, respectively, driven by strong volume in both carrier and enterprise network products, offset by optical fiber price declines in China, higher operating expenses, unfavorable mix in carrier products, and the absence of the inventory build we experienced in the first half of 2013.

For the three and nine months ended September 30, 2014, one customer of the Optical Communications segment, which accounted for more than 10% of total segment sales, accounted for 13% and 10%, respectively, of total segment sales.

Outlook:

Optical Communications fourth-quarter sales are expected to increase by a mid-single digit percentage year over year.

Environmental Technologies

The following tables provide net sales and other data for the Environmental Technologies segment (in millions):

	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30, 2014	2013		September 30, 2014	2013	
As Reported						
Net sales:						
Automotive	\$ 135	\$ 121	12%	\$ 404	\$ 366	10%
Diesel	147	104	41%	438	315	39%
Total net sales	\$ 282	\$ 225	25%	\$ 842	\$ 681	24%
Net income	\$ 57	\$ 32	78%	\$ 147	\$ 95	55%
	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30, 2014	2013		September 30, 2014	2013	
Core Performance						
Net sales	\$ 282	\$ 225	25%	\$ 842	\$ 681	24%
Core earnings	\$ 57	\$ 32	78%	\$ 147	\$ 92	60%

The following table reconciles the non-GAAP financial measures for the Environmental Technologies segment with our financial statements presented in accordance with GAAP (in millions):

	Three months ended September 30, 2013		Nine months ended September 30, 2013	
	Sales	Net income	Sales	Net income
As reported	\$ 225	\$ 32	\$ 681	\$ 95
Pension mark-to-market adjustment (11)				(3)
Core performance	\$ 225	\$ 32	\$ 681	\$ 92

See Part 1, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Results of Operations – Core Performance Measures, "Items which we exclude from GAAP measures to arrive at Core Performance measures" for the descriptions of the footnoted reconciling items.

As Reported

In the three and nine months ended September 30, 2014, net sales of this segment increased by \$57 million, or 25%, and \$161 million, or 24%, respectively, when compared to the same periods in 2013, driven by higher sales across all product lines. Driving the increase was higher demand for our heavy duty diesel products propelled by new governmental regulations in Europe and increased demand for Class 8 vehicles in North America. Sales of light-duty diesel products also improved due to higher volume in Europe. Automotive substrate product sales increased due to higher demand in Europe and China.

When compared to the same periods last year, net income in the three and nine months ended September 30, 2014 improved significantly, up 78% and 55%, respectively, driven by improvements in manufacturing efficiency and strong volume gains across both automotive and diesel product lines. Improving market conditions for heavy-duty diesel products and higher European sales of light-duty diesel products, combined with an increase in automotive vehicle builds, drove the increase. Higher costs associated with facility expansion projects and the absence of the pension mark-to-market gain in 2013 somewhat offset the increase in net income.

Movements in foreign exchange rates did not significantly impact the results of this segment in the three and nine months ended September 30, 2014.

Core Performance

When compared to the same periods last year, core earnings in the three and nine months ended September 30, 2014 increased by \$25 million, or 78%, and \$55 million, or 60%, respectively, driven by improvements in manufacturing efficiency and strong volume gains across both automotive and diesel product lines. Improving market conditions for heavy-duty diesel products and higher European and North American sales of light-duty diesel products, combined with an increase in automotive vehicle builds, drove the increase. Higher fixed costs associated with facility expansion projects somewhat offset the increase in net income.

The Environmental Technologies segment sells to a concentrated customer base of catalyzer and emission control systems manufacturers. Although our sales are to the emission control systems manufacturers, who then sell to automotive and diesel engine manufacturers, the use of our substrates and filters is generally required by the specifications of the automotive and diesel engine manufacturers. For the three and nine months ended September 30, 2014, three customers of the Environmental Technologies segment, which individually accounted for more than 10% of segment net sales, accounted for approximately 89% and 88%, respectively, of total segment sales when combined. While we are not aware of any significant customer credit issues with our direct customers, our near-term sales and profitability would be impacted if any individual customers were unable to continue to purchase our products.

Outlook:

For the Environmental Technologies segment, fourth-quarter year-over-year sales are anticipated to increase by a high single-digit percentage when compared to the fourth quarter of 2013, driven by continued strength for heavy-duty diesel products.

Pension mark-to-market adjustment (11)				(3)
Core performance	\$ 326	\$ 65	\$ 885	\$ 157

See Part 1, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Results of Operations – Core Performance Measures, "Items which we exclude from GAAP measures to arrive at Core Performance measures" for the descriptions of the footnoted reconciling items.

As Reported

Net sales for the three and nine months ended September 30, 2014 in the Specialty Materials segment remained consistent when compared to the same periods in 2013. Corning Gorilla Glass price declines almost entirely offset an increase in volume for Corning Gorilla Glass and higher sales for our advanced optics products, led by improvements in the specialty glass market.

© 2014 Corning Incorporated. All Rights Reserved.

-62-

When compared to the same periods last year, the decrease in net income for the three and nine months ended September 30, 2014 was driven by lower prices for Corning Gorilla Glass and the impact of charges related to the closure of production lines in Japan, offset somewhat by an increase in volume for both Corning Gorilla Glass and advanced optics products. Additionally, higher production costs and the absence of the inventory build we experienced in the first half of 2013 negatively impacted the nine month comparison.

Movements in foreign exchange rates did not significantly impact the results of this segment in the three and nine months ended September 30, 2014.

Core Performance

When compared to the same periods last year, core earnings in the three and nine months ended September 30, 2014 decreased by \$13 million, or 20%, and \$29 million, or 18%, respectively, driven by lower prices for Corning Gorilla Glass, offset partially by Corning Gorilla Glass and advanced optics product volume improvements and lower operating expenses. Additionally, the absence of the inventory build we experienced in the first half of 2013 negatively impacted the nine month comparison.

For the three and nine months ended September 30, 2014, three customers of the Specialty Materials segment, which individually accounted for more than 10% of segment net sales, accounted for 50% and 48%, respectively, of total segment sales when combined.

Outlook:

Specialty Materials segment sales are expected to decrease sequentially by a low-to-mid teen digit percentage in the fourth quarter, reflecting the absence of new product launches that occurred in the third quarter of 2014.

Life Sciences

The following tables provide net sales and net income for the Life Sciences segment (in millions):

As Reported	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30, 2014	September 30, 2013		September 30, 2014	September 30, 2013	
Net sales	\$ 214	\$ 215		\$ 647	\$ 641	1%
Net income	\$ 19	\$ 20	(5)%	\$ 54	\$ 57	(5)%

Core Performance	Three months ended		% change 14 vs. 13	Nine months ended		% change 14 vs. 13
	September 30, 2014	September 30, 2013		September 30, 2014	September 30, 2013	
Net sales	\$ 214	\$ 215		\$ 647	\$ 641	1%
Core earnings	\$ 22	\$ 23	(4)%	\$ 65	\$ 71	(8)%

© 2014 Corning Incorporated. All Rights Reserved.

The following tables reconcile the non-GAAP financial measures for the Life Sciences segment with our financial statements presented in accordance with GAAP (in millions):

	Three months ended September 30, 2014		Nine months ended September 30, 2014	
	Sales	Net income	Sales	Net income
As reported	\$ 214	\$ 19	\$ 647	\$ 54
Acquisition-related costs (4)		3		11
Core performance	\$ 214	\$ 22	\$ 647	\$ 65

	Three months ended September 30, 2013		Nine months ended September 30, 2013	
	Sales	Net income	Sales	Net income
As reported	\$ 215	\$ 20	\$ 641	\$ 57
Acquisition-related costs (4)		3		17
Pension mark-to-market adjustment (11)				(3)
Core performance	\$ 215	\$ 23	\$ 641	\$ 71

See Part 1, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Results of Operations – Core Performance Measures, "Items which we exclude from GAAP measures to arrive at Core Performance measures" for the descriptions of the footnoted reconciling items.

As Reported

Net sales for the three months ended September 30, 2014 remained relatively consistent with the same period in the prior year. Net sales for the nine months ended September 30, 2014 increased by \$6 million, driven by growth in North America and China.

When compared to the same periods in 2013, net income in the three and nine months ended September 30, 2014 decreased by \$1 million and \$3 million, respectively, driven by less favorable customer and product mix and the absence of the pension mark-to-market gain in 2013, offset slightly by higher volume and lower acquisition costs. Acquisition-related costs were lower in the first nine months of 2014 due to higher spending in 2013 related to the acquisition of the Discovery Labware business in the fourth quarter of 2012.

Movements in foreign exchange rates did not significantly impact the results of this segment in the three and nine months ended September 30, 2014.

Core Performance

When compared to the same periods last year, core earnings in the three and nine months ended September 30, 2014 decreased by \$1 million and \$6 million, respectively, driven by less favorable customer and product mix, offset slightly by higher volume.

For the three and nine months ended September 30, 2014, two customers of the Life Sciences segment, which individually accounted for more than 10% of net sales, accounted for 47% and 45%, respectively, of net sales when combined.

Outlook:

In the fourth quarter of 2014, Life Sciences segment sales are expected to be consistent with the fourth quarter of 2013.

All Other

All other segments that do not meet the quantitative threshold for separate reporting have been grouped as “All Other.” This group is primarily comprised of the results for new product lines and development projects that involve the use of various technologies for new products such as advanced flow reactors and adjacency businesses in pursuit of thin, strong glass. This segment also includes results for certain corporate investments such as Eurokera and Keraglass equity affiliates, which manufacture smooth cooktop glass/ceramic products.

The following table provides net sales and other data for All Other (in millions):

	Three months ended		%	Nine months ended		%
	September 30,		change	September 30,		change
	2014	2013	14 vs. 13	2014	2013	14 vs. 13
Net sales	\$ 10	\$ 3	233%	\$ 34	\$ 6	467%
Research, development and engineering expenses	\$ 43	\$ 33	30%	\$ 119	\$ 104	14%
Equity in earnings of affiliated companies	\$ 4	\$ 4		\$ 13	\$ 13	
Net loss	\$ (41)	\$ (32)	(28)%	\$ (140)	\$ (91)	(54)%

The results of this segment in the three and nine months ended September 30, 2014 reflect the net sales and net loss incurred for a development project which was not part of segment results in the three and nine months ended September 30, 2013.

CAPITAL RESOURCES AND LIQUIDITY

Financing and Capital Resources

The following items impacted Corning’s financing and capital structure in the three months ended September 30, 2014 and 2013:

2014

In the third quarter of 2014, we amended and restated our existing revolving credit facility. The amended facility provides a \$2 billion unsecured multi-currency line of credit and expires on September 30, 2019. At September 30, 2014, there were no outstanding amounts on this credit facility. The facility includes affirmative and negative covenants that Corning must comply with, including a leverage (debt to capital ratio) financial covenant. As of September 30, 2014, we were in compliance with all of the covenants.

At September 30, 2014, Corning had \$424 million in outstanding commercial paper as part of the Company’s commercial paper program established in the second quarter of 2013. The estimated fair value of this commercial paper approximates its carrying value due to the short-term maturities.

2013

In the second quarter of 2013, the Company established a commercial paper program on a private placement basis, pursuant to which we may issue short-term, unsecured commercial paper notes up to a maximum aggregate principal amount outstanding at any time of \$1 billion. Under this program, the Company may issue the notes from time to time and will use the proceeds for general corporate purposes. The maturities of the notes will vary, but may not exceed 390 days from the date of issue. The interest rates will vary based on market conditions and the ratings assigned to the notes by credit rating agencies at the time of issuance. The Company’s revolving credit facility is available to support obligations under the commercial paper program, if needed.

In the first quarter of 2013, we amended and restated our then-existing revolving credit facility. The 2013 amended facility provided a \$1 billion unsecured multi-currency line of credit that would have expired in March 2018. This facility was amended and restated by the \$2 billion facility entered into in the third quarter of 2014.

© 2014 Corning Incorporated. All Rights Reserved.

-65-

In the first quarter of 2013, Corning repaid the aggregate principal amount and accrued interest outstanding on the credit facility entered into in the second quarter of 2011 that allowed Corning to borrow up to Chinese Renminbi (RMB) 4 billion. The total amount repaid was approximately \$500 million. Upon repayment, the facility was terminated.

Share Repurchase Program

In the first quarter of 2014, the share repurchase program announced on October 22, 2013 was made effective concurrent with the closing of Corning's Acquisition of Samsung Corning Precision Materials on January 15, 2014. This program authorizes the Company to repurchase up to \$2 billion of our common stock by December 31, 2015. At September 30, 2014, there was \$182.8 million remaining to purchase shares under this authorization.

Fixed Rate Cumulative Convertible Preferred Stock, Series A

On January 15, 2014, Corning designated a new series of its preferred stock as Fixed Rate Cumulative Convertible Preferred Stock, Series A, par value \$100 per share, and issued 1,900 shares of Preferred Stock at an issue price of \$1 million per share, for an aggregate issue price of \$1.9 billion, to Samsung Display in connection with the Acquisition of its equity interests in Samsung Corning Precision Materials. Corning also issued to Samsung Display an additional amount of Fixed Rate Cumulative Convertible Preferred Stock at closing, for an aggregate issue price of \$400 million in cash.

Dividends on the Preferred Stock are cumulative and accrue at the annual rate of 4.25% on the per share issue price of \$1 million. The dividends are payable quarterly as and when declared by the Company's board of directors. The Preferred Stock ranks senior to our common stock with respect to payment of dividends and rights upon liquidation. The Preferred Stock is not redeemable except in the case of a certain deemed liquidation event, the occurrence of which is under the control of the Company. The Preferred Stock is convertible at the option of the holder and the Company upon certain events, at a conversion rate of 50,000 shares of Corning's common stock per one share of Preferred Stock, subject to certain anti-dilution provisions. As of September 30, 2014, the Preferred Stock has not been converted, and none of the anti-dilution provisions have been triggered. Following the seventh anniversary of the closing of the Acquisition, the Preferred Stock will be convertible, in whole or in part, at the option of the holder. The Company has the right, at its option, to cause some or all of the shares of Preferred Stock to be converted into Common Stock, if, for 25 trading days (whether or not consecutive) within any period of 40 consecutive trading days, the closing price of Common Stock exceeds \$35 per share. If the aforementioned right becomes exercisable before the seventh anniversary of the closing, the Company must first obtain the written approval of the holders of a majority of the Preferred Stock before exercising its conversion right. The Preferred Stock does not have any voting rights except as may be required by law.

Capital Spending

Capital spending totaled \$740 million and \$682 million for the nine months ended September 30, 2014 and 2013, respectively. Spending in the first nine months of 2014 was driven primarily by the Display Technologies segment, and focused on finishing line optimization and tank rebuilds. We expect our 2014 capital spending to be approximately \$1.1 billion. We expect that approximately \$500 million will be directed toward our Display Technologies segment, of which approximately \$107 million is related to capital projects started in 2012 and 2013.

Cash Flow

Summary of cash flow data (in millions):

	Nine months ended September 30,	
	2014	2013
Net cash provided by operating activities	\$ 3,597	\$ 1,503

Edgar Filing: CORNING INC /NY - Form 10-Q

Net cash used in investing activities	\$ (753)	\$ (575)
Net cash used in financing activities	\$ (1,846)	\$ (1,347)

© 2014 Corning Incorporated. All Rights Reserved.

-66-

Net cash provided by operating activities increased significantly in the nine months ended September 30, 2014, when compared to the same period last year, due to a dividend of approximately \$1.6 billion received from Samsung Corning Precision Materials and a decrease in inventory in the Optical Communications segment, Environmental Technologies and Specialty Materials segments, offset somewhat by lower net income.

Net cash used in investing activities was higher in the nine months ended September 30, 2014, when compared to the same period last year, due to an increase in short-term investments, an investment in an unconsolidated subsidiary and higher capital spending, offset partially by the realized gains on our yen-denominated purchased collars.

Net cash used in financing activities in the nine months ended September 30, 2014 increased when compared to the same period last year, driven by our share repurchase programs, somewhat offset by the issuance of commercial paper, cash received from the issuance of preferred stock and the absence of the retirement of long-term debt in the first quarter of 2013.

Key Balance Sheet Data

Balance sheet and working capital measures are provided in the following table (dollars in millions):

	As of September 30, 2014	As of December 31, 2013
Working capital	\$ 7,875	\$ 7,145
Current ratio	4.7:1	5.1:1
Trade accounts receivable, net of allowances	\$ 1,601	\$ 1,253
Days sales outstanding	57	58
Inventories	\$ 1,327	\$ 1,270
Inventory turns	4.1	3.6
Days payable outstanding (1)	35	47
Long-term debt	\$ 3,228	\$ 3,272
Total debt to total capital	14%	13%

(1) Includes trade payables only.

Credit Rating

Our credit ratings remain the same as those disclosed in our 2013 Form 10-K.

RATING AGENCY	Rating Long-Term Debt	Outlook last update
Fitch	A-	Stable May 17, 2011
Standard & Poor's	A-	Stable December 16, 2013
Moody's	A3	Stable September 12, 2011

Management Assessment of Liquidity

We ended the third quarter of 2014 with approximately \$6.1 billion of cash, cash equivalents, and short-term investments. The Company has adequate sources of liquidity and we are confident in our ability to generate cash to meet existing or reasonably likely future cash requirements. Our cash, cash equivalents, and short-term investments are held in various locations throughout the world and are generally unrestricted. At September 30, 2014, approximately 79% of the consolidated amount was held outside of the U.S. Almost all of the amounts held outside the U.S. are indefinitely reinvested in our foreign operations but are available for repatriation, subject to relevant tax consequences, which may be significant in a particular period. We utilize a variety of tax planning and financing strategies in an effort to ensure that our worldwide cash is available in those locations where it is needed.

From time to time, we may issue debt, the proceeds of which may be used to refinance certain debt maturities and for general corporate purposes.

Share Repurchases

On October 31, 2013, as part of the share repurchase program announced on April 24, 2013 (the “2013 Repurchase Program”), Corning entered into an accelerated share repurchase (“ASR”) agreement with JP Morgan Chase Bank, National Association, London Branch (“JPMC”). Under the ASR agreement with JPMC, Corning agreed to purchase \$1 billion of its common stock, in total, with an initial delivery by JPMC of 47.1 million shares based on the current market price, and payment of \$1 billion made by Corning to JPMC. The payment to JPMC was recorded as a reduction to shareholders’ equity, consisting of an \$800 million increase in treasury stock, which reflects the value of the initial 47.1 million shares received upon execution, and a \$200 million decrease in other-paid-in capital, which reflects the value of the stock held back by JPMC pending final settlement. On January 28, 2014, the ASR agreement with JPMC was completed. Corning received an additional 10.5 million shares on January 31, 2014 to settle the ASR agreement. In total, Corning purchased 57.6 million shares based on the average daily volume weighted-average price of Corning’s common stock during the term of the ASR agreement with JPMC, less a discount. Additionally, in the first quarter of 2014, we repurchased 26.7 million shares of common stock on the open market for approximately \$484 million as part of the 2013 Repurchase Program. The 2013 Repurchase Program was completed in the first quarter of 2014.

On March 3, 2014, as part of the \$2 billion share repurchase program announced on October 22, 2013 and made effective concurrent with the closing of Corning’s Acquisition of Samsung Corning Precision Materials on January 15, 2014, Corning entered into an ASR agreement with Citibank N.A. (“Citi”). Under the ASR agreement with Citi, Corning agreed to purchase \$1.25 billion of its common stock, with an initial delivery by Citi of 52.5 million shares based on the current market price, and payment of \$1.25 billion made by Corning to Citi. On May 28, 2014, the ASR agreement with Citi was completed, and Corning received an additional 8.7 million shares to settle the ASR agreement. In total, Corning repurchased 61.2 million shares based on the average daily volume weighted-average price of Corning’s common stock during the term of the ASR agreement with Citi, less a discount.

In addition to the shares repurchased through the ASR agreement, in the three and nine months ended September 30, 2014, we repurchased 9.6 million and 27.6 million shares of common stock on the open market for approximately \$200 million and \$567 million, respectively, as part of the share repurchase program made effective on January 15, 2014.

Other

We complete comprehensive reviews of our significant customers and their creditworthiness by analyzing their financial statements at least annually, and more frequently for customers where we have identified the potential for increased risk. We closely monitor customer payment patterns and business developments that may signal possible customer credit issues. We have not identified any customer credit issues that would have a material impact on our

liquidity.

© 2014 Corning Incorporated. All Rights Reserved.

-68-

Our major source of funding for the remainder of 2014 and beyond will be our operating cash flow and our existing balances of cash, cash equivalents, short-term investments and proceeds from any issuances of debt. We believe we have sufficient liquidity for the next several years to fund operations, share repurchase programs, acquisitions, the asbestos litigation, research and development, capital expenditures, scheduled debt repayments and dividend payments.

Corning also has access to a \$2 billion unsecured committed revolving credit facility. This credit facility includes a leverage ratio financial covenant. The required leverage ratio, which measures debt to total capital, is a maximum of 50%. At September 30, 2014, our leverage using this measure was 14% and we are in compliance with the financial covenant.

In the first quarter of 2013, Corning repaid the aggregate principal amount and accrued interest outstanding on the credit facility entered into in the second quarter of 2011 that allowed Corning to borrow up to Chinese Renminbi (RMB) 4.0 billion. The total amount repaid was approximately \$500 million. Upon repayment, this facility was terminated.

Our debt instruments contain customary event of default provisions, which allow the lenders the option of accelerating all obligations upon the occurrence of certain events. In addition, some of our debt instruments contain a cross default provision, whereby an uncured default in excess of a specified amount on one debt obligation of the Company, also would be considered a default under the terms of another debt instrument. As of September 30, 2014, we were in compliance with all such provisions.

Management is not aware of any known trends or any known demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in a material increase or decrease in our liquidity. In addition, other than items discussed, there are no known material trends, favorable or unfavorable, in our capital resources and no expected material changes in the mix and relative cost of such resources.

Off Balance Sheet Arrangements

There have been no material changes outside the ordinary course of business in our off balance sheet arrangements as disclosed in our 2013 Form 10-K under the caption "Off Balance Sheet Arrangements."

Contractual Obligations

There have been no material changes outside the ordinary course of business in the contractual obligations disclosed in our 2013 Form 10-K under the caption "Contractual Obligations."

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements requires management to make estimates and assumptions that affect amounts reported therein. The estimates that required management's most difficult, subjective or complex judgments are described in our 2013 Form 10-K and remain unchanged through the first nine months of 2014. For certain items, additional details are provided below.

Impairment of Assets Held for Use

We are required to assess the recoverability of the carrying value of long-lived assets when an indicator of impairment has been identified. We review our long-lived assets in each quarter in which impairment indicators are present. We must exercise judgment in assessing whether an event of impairment has occurred.

Manufacturing equipment includes certain components of production equipment that are constructed of precious metals, primarily platinum and rhodium. These metals are not depreciated because they have very low physical losses and are repeatedly reclaimed and reused in our manufacturing process over a very long useful life. Precious metals are reviewed for impairment as part of our assessment of long-lived assets. This review considers all of the Company's precious metals that are either in place in the production process; in reclamation, fabrication, or refinement in anticipation of re-use; or awaiting use to support increased capacity. Precious metals are only acquired to support our operations and are not held for trading or other purposes.

At September 30, 2014 and December 31, 2013, the average carrying value of precious metals was higher than the fair market value by \$130 million and \$164 million, respectively. These precious metals are utilized by the Display and Specialty Materials segments. Corning believes these precious metal assets to be recoverable due to the significant positive cash flow in both segments. The potential for impairment exists in the future if negative events significantly decrease the cash flow of these segments. Such events include, but are not limited to, a significant decrease in demand for products or a significant decrease in profitability in our Display Technologies or Specialty Materials segments.

NEW ACCOUNTING STANDARDS

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. (ASU) 2014-09, Revenue from Contracts with Customers, as a new Topic, Accounting Standards Codification (ASC) Topic 606. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU is effective for annual periods beginning after December 15, 2016, including interim periods within that reporting period, and shall be applied retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. Early adoption is not permitted. We are currently assessing the potential impact of adopting this ASU on our financial statements and related disclosures.

ENVIRONMENT

Corning has been named by the Environmental Protection Agency ("the Agency") under the Superfund Act or by state governments under similar state laws, as a potentially responsible party for 15 hazardous waste sites. Under the Superfund Act, all parties who may have contributed any waste to a hazardous waste site, identified by the Agency, are jointly and severally liable for the cost of cleanup unless the Agency agrees otherwise. It is Corning's policy to accrue for its estimated liability related to Superfund sites and other environmental liabilities related to property owned by Corning based on expert analysis and continual monitoring by both internal and external consultants. At September 30, 2014 and December 31, 2013, Corning had accrued approximately \$28 million (undiscounted) and \$15 million (undiscounted), respectively, for the estimated liability for environmental cleanup and related litigation. Based upon the information developed to date, management believes that the accrued reserve is a reasonable estimate of the Company's liability and that the risk of an additional loss in an amount materially higher than that accrued is remote.

FORWARD-LOOKING STATEMENTS

The statements in this Quarterly Report on Form 10-Q, in reports subsequently filed by Corning with the Securities and Exchange Commission (“SEC”) on Forms 8-K, and related comments by management that are not historical facts or information and contain words such as “anticipates,” “expects,” “intends,” “plans,” “goals,” “believes,” “seeks,” “estimates,” “forecasts,” “likely,” and similar expressions are forward-looking statements. Forward-looking statements involve risks and uncertainties that may cause the actual outcome to be materially different. Such risks and uncertainties include, but are not limited to:

- global business, financial, economic and political conditions;
 - tariffs and import duties;
- currency fluctuations between the U.S. dollar and other currencies, primarily the Japanese yen, Korean won, Euro, and New Taiwan dollar, and our ability to mitigate the financial impact on our net earnings and cash flows from the movements in these currencies, which includes the use of derivatives;
 - product demand and industry capacity;
 - competitive products and pricing;
- availability and costs of critical components and materials;
 - new product development and commercialization;
 - order activity and demand from major customers;
 - fluctuations in capital spending by customers;
- possible disruption in commercial activities due to terrorist activity, armed conflict, political or financial instability, natural disasters, or major health concerns;
- effect on our operations, including commercial disruption, resulting from cyber-attacks and theft of intellectual property or commercial information;
 - unanticipated disruption to equipment, facilities, or operations;
 - facility expansions and new plant start-up costs;
 - effect of regulatory and legal developments;
 - ability to pace capital spending to anticipated levels of customer demand;
- credit rating and ability to obtain financing and capital on commercially reasonable terms;
 - adequacy and availability of insurance;
 - acquisition and divestiture activities;
 - rate of technology change;
 - level of excess or obsolete inventory;
- ability to enforce patents and protect intellectual property and trade secrets;
 - adverse litigation;
 - product and components performance issues;
 - retention of key personnel;
 - stock price fluctuations;
 - trends for the continued growth of the Company’s businesses;
- the ability of research and development projects to produce revenues in future periods;
 - a downturn in demand or decline in growth rates for LCD glass substrates;
- customer ability, most notably in the Display Technologies segment, to maintain profitable operations and obtain financing to fund their manufacturing expansions and ongoing operations, and pay their receivables when due;
 - loss of significant customers;
 - fluctuations in supply chain inventory levels;
- equity company activities, principally at Dow Corning Corporation;
- changes to our assessments about the realizability of our deferred tax assets that are based on estimates of our future results, the prudence and feasibility of possible tax planning strategies, and the economic environments in which we do business;

Edgar Filing: CORNING INC /NY - Form 10-Q

- changes in tax laws and regulations;
- changes in accounting rules and standards;
- the potential impact of legislation, government regulations, and other government action and investigations;
 - temporary idling of capacity or delaying expansion;
- the ability to implement productivity, consolidation and cost reduction efforts and to realize anticipated benefits;
 - restructuring actions and charges; and
 - other risks detailed in Corning's SEC filings.

© 2014 Corning Incorporated. All Rights Reserved.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk Disclosures

As noted in our 2013 Form 10-K, we operate and conduct business in many foreign countries and as a result are exposed to fluctuations between the U.S. dollar and other currencies. Volatility in the global financial markets could increase the volatility of foreign currency exchange rates which would, in turn, impact our sales and net income. For a discussion of our exposure to market risk and how we mitigate that risk, refer to Part II, Item 1A, Risk Factors in this Quarterly Report on Form 10-Q and Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risks, contained in our 2013 Form 10-K.

During the first and second quarter of 2014 the Company entered into a series of average rate forwards with no associated premium, which partially hedge the impact of Japanese yen translation on the Company's projected 2015, 2016 and 2017 net income. In the second quarter of 2014, as a result of the acquisition of the remaining interests in Samsung Corning Precision, we entered into a portfolio of zero cost collars to hedge our exposure to movements in the Korean won and its impact on our net earnings through the end of 2015. At September 30, 2014, the total gross notional value for the translated earnings contracts was \$13.9 billion (at December 31, 2013: \$6.8 billion), including purchased collars and zero cost collars of \$4.4 billion (at December 31, 2013: \$5.9 billion) and average rate forwards of \$9.5 billion (at December 31, 2013: \$0.9 billion). With respect to the purchased collars and zero cost collars, the gross notional amount includes the value of both the put and call options. However, due to the nature of the purchased collars and zero cost collars, either the put or the call option can be exercised at maturity. As of September 30, 2014, the total net notional value of the purchased collars and zero cost collars was \$2.3 billion (at December 31, 2013: \$3 billion).

The fair value of our open foreign exchange forward and option contracts is most significantly impacted by fluctuations in the Japanese yen and Korean won. At September 30, 2014, a hypothetical 10% adverse movement in Japanese yen and Korean won exchange rates could result in an unrealized loss in fair value of these instruments of \$1,059 million (at December 31, 2013: \$398 million) and \$94 million (at December 31, 2013: \$0), respectively. Changes in fair values of these instruments are ultimately offset in the period of settlement by changes in the fair value of the underlying exposure. Prior to settlement, the unrealized fair value changes could cause material volatility in our earnings.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision of and with the participation of Corning's management, including our chief executive officer and chief financial officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended), as of September 30, 2014, the end of the period covered by this report. Based on that evaluation, we have concluded that the Company's disclosure controls and procedures were effective as of that date. Corning's disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Corning in the reports that it files or submits under the Exchange Act is accumulated and communicated to Corning's management, including Corning's principal executive and principal financial officers, or other persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

An evaluation of our internal controls over financial reporting was also performed to determine whether any changes have occurred during the period covered by this Report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. On January 15, 2014, the Company completed the acquisition of the remaining equity interests of our equity affiliate Samsung Corning Precision Materials (now Corning Precision Materials). The Company is in the process of reviewing Corning Precision Materials' operations and evaluating the impact of Corning Precision Materials on Corning's internal controls over financial reporting. See Note 10 (Acquisition) to the unaudited interim consolidated financial statements included in this quarterly report on Form 10-Q for a discussion of the acquisition and related financial data. Excluding the acquisition of Corning Precision Materials, the chief executive officer and chief financial officer concluded that there was no change in Corning's internal control over financial reporting that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Part II – Other Information

ITEM 1. LEGAL PROCEEDINGS

Dow Corning Corporation. See our 2013 Form 10-K, Part 1, Item 3. For updates to estimated liabilities as of September 30, 2014, see Part I, Item 1, Financial Statements, Note 3 (Commitments and Contingencies) of the Notes to Unaudited Consolidated Financial Statements included under Item 1 of this quarterly report, which is incorporated herein by reference.

Pittsburgh Corning Corporation and Other Asbestos Litigation. See our 2013 Form 10-K, Part I, Item 3. For updates regarding the proceedings and estimated liabilities as of September 30, 2014, see Part I, Item 1, Financial Statements, Note 3 (Commitments and Contingencies) of the Notes to Unaudited Consolidated Financial Statements included under Item 1 of this quarterly report, which is incorporated herein by reference.

Environmental Litigation. See our 2013 Form 10-K, Part I, Item 3.

Chinese Anti-dumping Investigation Involving Single-Mode Optical Fiber Produced in India. See our 2013 Form 10-K, Part I, Item 3. On August 13, 2014, MOFCOM announced its final determination in this investigation assessing a 24.5% dumping margin on CTIPL's exports to China. The dumping margins will remain in effect until August 13, 2019.

Chinese Anti-dumping Investigation Involving Optical Fiber Preforms Produced in the United States. See our 2014 Form 10-Q for the Period Ending March 31, 2014 (“Q1 2014 10-Q”), Part II, Item 1. On September 10, 2014, MOFCOM held an injury hearing, in which Corning participated and presented strong evidence of non-injury. We subsequently submitted a detailed non-injury brief and economic report further supporting the absence of threat of injury to the Chinese industry.

Seoul Guarantee Insurance Co. and other creditors against Samsung Group and affiliates. See our 2013 Form 10-K, Part I, Item 3.

Demodulation, Inc. See our 2013 Form 10-K, Part I, Item 3.

Grand Jury Subpoena. See our 2013 Form 10-K, Part I, Item 3 and Q1 2014 10-Q, Part II, Item 1.

ITEM 1A. RISK FACTORS

In addition to other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our 2013 Form 10-K for the year ended December 31, 2013, which could materially impact our business, financial condition or future results. Risks disclosed in our 2013 Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem immaterial may materially adversely impact our business, financial condition or operating results.
