CREDO REPORTS RECORD FISCAL 2004 EARNINGS OF \$0.59 PER SHARE
Financial and Operational Results Set New Records

DENVER, COLORADO, January 11, 2005—CREDO Petroleum Corporation (NASDAQ: CRED) today reported record results for its fiscal year ended October 31, 2004. Net income rose 17% to \$3,650,000 on record production. This compares to net income of \$3,130,000 last year. On a per diluted share basis, net income was \$.59 compared to \$.52 last year. Revenue rose 21% to \$10,314,000 compared to \$8,491,000 last year. Cash flow from operating activities (before changes in operating assets and liabilities) jumped 28% to \$6,927,000.

Prior year net income includes \$.01 per share related to a one-time credit for the cumulative effect of adopting Financial Accounting Standards Board Statement No. 143, Accounting for Asset Retirement Obligations.

James T. Huffman, President said, "In 2004, we again established significant new records in virtually every operational and financial category, highlighted by a 21% return on equity without using leverage. More importantly, our 2004 performance extends a significant track record of superior performance that has gained CREDO recognition as one of America's best and fastest growing small companies as well as an outstanding performer among U.S. oil and gas companies (Forbes Magazine, Fortune Small Business Magazine, John S. Herold, Inc.)."

Fourth quarter net income fell to \$893,000 compared to \$1,146,000 last year. On a per diluted share basis, net income was \$.14 compared to \$.18 last year. Fourth quarter results fell below last year primarily because hedging reduced natural gas price realizations by \$.53 versus adding \$.64 in the same period last year, an after tax swing of \$379,000.

PRODUCTION VOLUMES SET FOURTH CONSECUTIVE ANNUAL RECORD

Production rose 18% in fiscal 2004 to a record 1.96 Bcfe (billion cubic feet of gas-equivalent) compared to 1.66 Bcfe last year. Natural gas production rose 18% to a record 1.71 Bcfg compared to 1.45 Bcfg last year. Crude oil and condensate sales rose 18% to 41,000 barrels.

Fourth quarter production fell 7% to 481 MMcfe (million cubic feet of gas equivalent) compared to 516 MMcfge last year due to the timing of new wells coming on production near the end of last year.

CAPITAL SPENDING AND RESERVES SET NEW RECORDS

Edgar Filing: CREDO PETROLEUM CORP - Form 8-K

Capital spending increased 30% to \$7,089,000, by far the highest level in company history. As a result, both reserves and production rose to new records.

Proved reserves rose 10% to 17.7 Bcfe for an eleventh consecutive annual record. Approximately 93% of total proved reserves are classified in the developed category. The company generally includes only minimal proved undeveloped reserves for offset drilling locations and Calliope candidate wells. Natural gas accounted for 86% of reserve volume.

The undiscounted value of reserves was \$77,612,000 at year-end, and the discounted value (at 10%) was \$44,551,000. Average wellhead prices used to calculate reserve values were \$5.84 per Mcf and \$50.43 per barrel.

The company added 3.6 Bcfe of new reserves, replacing 183% of its 2004 production. Per unit finding cost was \$1.98 per Mcfge (thousand cubic feet of gas equivalent). The company's finding costs have historically ranked in the best quartile of U.S. oil and gas companies. For the three years ending in 2003, CREDO's finding and development cost was the 14th lowest among U.S. oil and gas companies according to John S. Herold, Inc.

Net income per unit of production was \$1.87 per Mcfe, or \$11.19 per BOE. This compares to \$1.89 per Mcf, or \$11.32 per BOE, last year when John S. Herold, Inc. ranked CREDO 10th among all oil and gas companies worldwide. Herold has ranked the company in the top 15 worldwide oil and gas companies on this performance measure in each of the last three years.

PRODUCT PRICES REMAIN STRONG; ESTIMATED FISCAL 2005 PRODUCTION PARTIALLY HEDGED

Total natural gas price realizations for fiscal 2004 rose 2% to \$4.60 per Mcf compared to \$4.50 last year. Hedging transactions reduced gas price realizations by \$.42 per Mcf in 2004 compared to \$.07 last year. Net wellhead natural gas prices were \$5.02 per Mcf compared to \$4.57 last year. Wellhead oil prices rose 32% to \$36.57 per barrel compared to \$27.68 last year.

For the fourth quarter, total natural gas price realizations fell 4% to \$4.64 per Mcf compared to \$4.82 last year. Hedging transactions reduced gas price realizations by \$.53 per Mcf in the fourth quarter compared to an increase of \$.64 last year. Wellhead oil prices rose 87% to \$52.15 per barrel.

The company currently has open hedge positions totaling 380 MMcf covering the months of February through June 2005. The hedges represent about one-third of the company's estimated equivalent gas production for the period. Of the February and March hedges, 75% are collars with a \$6.12 floor and a \$7.95 ceiling and the remainder are short positions at \$6.51. Of the April through June hedges, 80% are collars with a \$5.50 floor and a \$6.75 ceiling and the remainder are short positions at \$6.38. All prices are NYMEX basis. Hedges for the months of November through January have been closed at a loss of \$180,000 (after tax). Average gas prices in the company's market areas are expected to be 15% to 17% below NYMEX prices due to basis differentials and transportation costs.

Huffman further stated, "Since natural gas prices are the single

Edgar Filing: CREDO PETROLEUM CORP - Form 8-K

most important driver of our financial results, we believe it is prudent to manage prices using periodic hedging. Unfortunately, hedging was the weakest area of our 2004 performance, as we left \$516,000 (after tax) on the table. Nevertheless, over the long term, we believe that hedging has benefited the company and its shareholders."

STRONG FINANCIAL CONDITION CONTINUES TO PROVIDE A SOLID FOUNDATION FOR GROWTH

At October 31, 2004, working capital was \$5,611,000. Total assets were \$30,976,000 including cash and short-term investments of \$6,889,000. Stockholders' equity was a record \$20,920,000. The company's only long-term debt is a \$297,000 exclusive license obligation that is payable over five years.

MANAGEMENT COMMENT

"CREDO's two core projects-Calliope Gas Recovery System and Northern Anadarko Basin drilling-continued to provide excellent reserve and production growth as well as superb financial results," Huffman said. "Our 2004 performance added to what has become a significant track record of superior performance both in the oil and gas industry and among all small companies. CREDO has creative people and projects that are both proven and repeatable. We are confident that focusing on fundamentals with a long-term view will continue to produce excellent results."

* * * * *

CREDO Petroleum Corporation is a publicly traded independent energy company headquartered in Denver, Colorado. The company is engaged in the exploration for and the acquisition, development and marketing of natural gas and crude oil in the Mid-Continent and Rocky Mountain regions. The company's stock is traded on the NASDAQ System under the symbol "CRED" and is quoted daily in the "NASDAQ Small-Cap Issues" section of The Wall Street Journal.

For 2004, cash flow from operating activities (before changes in operating assets and liabilities) consists of net income of \$3,650,000, DD&A of \$1,757,000, deferred income taxes of \$1,496,000. and other of \$24,000. For 2003, such cash flow consists of net income of \$3,130,000, DD&A of 1,333,000, deferred income taxes of \$1,016,000, and net of other credits of \$66,000.
