☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934  
For the quarterly period ended **June 30, 2009**

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 1-8097

**ENSCO International Incorporated**

(Exact name of registrant as specified in its charter)

**DELAWARE**

(State or other jurisdiction of  
incorporation or organization)

**76-0232579**

(I.R.S. Employer  
Identification No.)

**500 North Akard Street**

**Suite 4300**

**Dallas, Texas**

(Address of principal executive offices)

**75201-3331**

(Zip Code)

Registrant's telephone number, including area code: **(214) 397-3000**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

## Edgar Filing: ENSCO INTERNATIONAL INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐  
No ☒

There were 142,444,604 shares of Common Stock, \$.10 par value, of the registrant outstanding as of July 22, 2009.

**FORWARD-LOOKING STATEMENTS**

This report contains forward-looking statements that are subject to a number of risks and uncertainties and are based on information as of the date of this report. We assume no obligation to update these statements based on information after the date of this report.

Forward-looking statements include words or phrases such as "anticipate," "believe," "estimate," "expect," "intend," "plan," "project," "could," "may," "might," "should," "will" and words and phrases of similar import. The forward-looking statements include, but are not limited to, statements regarding future operations, industry trends or conditions and the business environment; statements regarding future levels of, or trends in, utilization, day rates, revenues, operating expenses, contract term, contract backlog, capital expenditures, insurance, financing and funding; statements regarding future construction (including construction in progress and completion thereof), enhancement, upgrade or repair of rigs and timing thereof; statements regarding future mobilization, relocation or other movement of rigs and timing thereof; statements regarding future availability or suitability of rigs and timing thereof; and statements regarding the likely outcome of litigation, legal proceedings, investigations or insurance or other claims and timing thereof.

Forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including:

industry conditions and competition, including changes in rig supply and demand or new technology,  
risks associated with the current global economic crisis and its impact on capital markets and liquidity,  
prices of oil and natural gas in general and the current depressed prices in particular and the impact of commodity prices upon future levels of drilling activity and expenditures,  
further declines in rig activity which may cause us to idle or stack additional rigs,  
excess rig availability or supply resulting from delivery of new drilling rigs,  
heavy concentration of our rig fleet in premium jackups,  
cyclical nature of the industry,  
worldwide expenditures for oil and natural gas drilling,  
changes in the timing of revenue recognition resulting from the deferral of revenues payable by our customers (which are recognized over the contract term upon commencement of drilling operations) for mobilization of our drilling rigs, time waiting on weather or time in shipyards,  
operational risks, including hazards created by severe storms and hurricanes,  
risks associated with offshore rig operations or rig relocations in general and in foreign jurisdictions in particular,  
renegotiation, nullification, cancellation or breach of contracts or letters of intent with customers or other parties, including failure to negotiate definitive contracts following announcements or receipt of letters of intent,  
inability to collect receivables,  
changes in the dates new contracts actually commence,  
changes in the dates our rigs will enter a shipyard, be delivered, return to service or enter service,  
risks inherent to domestic and foreign shipyard rig construction, repair or enhancement, including risks associated with concentration of our ENSCO 8500 Series® rig construction contracts in a single foreign shipyard,  
unexpected delays in equipment delivery and engineering or design issues following shipyard delivery,  
availability of transport vessels to relocate rigs,  
environmental or other liabilities, risks or losses, whether related to hurricane damage, losses or liabilities (including wreckage or debris removal) in the Gulf of Mexico or otherwise, that may arise in the future and are not covered by insurance or indemnity in whole or in part,  
limited availability or high cost of insurance coverage for certain perils such as hurricanes in the Gulf of Mexico or associated removal of wreckage or debris,  
self-imposed or regulatory limitations on drilling locations in the Gulf of Mexico during hurricane season,

## Edgar Filing: ENSCO INTERNATIONAL INC - Form 10-Q

impact of current and future government laws and regulation affecting the oil and gas industry in general and our operations in particular, including taxation as well as repeal or modification of same,  
governmental action and political and economic uncertainties, including expropriation, nationalization, confiscation or deprivation of our assets,  
terrorism or military action impacting our operations, assets or financial performance,  
our ability to attract and retain skilled personnel,  
outcome of litigation, legal proceedings, investigations, or insurance or other claims,  
adverse changes in foreign currency exchange rates, including their impact on the fair value measurement of our derivative financial instruments,  
potential long-lived asset or goodwill impairments, and  
potential reduction in fair value of our auction rate securities.

In addition to the numerous factors described above, you should carefully read and consider "Item 1A. Risk Factors" in Part I and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II of our Annual Report on Form 10-K for the year ended December 31, 2008, as updated in this report.

**PART I - FINANCIAL INFORMATION**

**Item 1. *Financial Statements***

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Shareholders  
ENSCO International Incorporated:

We have reviewed the condensed consolidated balance sheet of ENSCO International Incorporated and subsidiaries as of June 30, 2009, the related condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2009 and 2008, and the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2009 and 2008. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of ENSCO International Incorporated and subsidiaries as of December 31, 2008, and the related consolidated statements of income and cash flows for the year then ended (not presented herein); and in our report dated February 26, 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2008, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

**Table of Contents**

**ENSCO INTERNATIONAL INCORPORATED AND SUBSIDIARIES  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)**

**Note 1 - Unaudited Condensed Consolidated Financial Statements**

We prepared the accompanying condensed consolidated financial statements of ENSCO International Incorporated and subsidiaries (the "Company" or "EnSCO") in accordance with accounting principles generally accepted in the United States of America ("GAAP"), pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") included in the instructions to Form 10-Q and Article 10 of Regulation S-X. The financial information included in this report is unaudited but, in our opinion, includes all adjustments (consisting of normal recurring adjustments) that are necessary for a fair presentation of our financial position, results of operations and cash flows for the interim periods presented. The December 31, 2008 condensed consolidated balance sheet data were derived from our 2008 audited consolidated financial statements but do not include all disclosures required by GAAP. Certain previously reported amounts have been reclassified to conform to the current year presentation. The preparation of our condensed consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities, the related revenues and expenses and disclosures of gain and loss contingencies as of the date of the financial statements. Actual results could differ from those estimates.

The financial data for the three-month and six-month periods ended June 30, 2009 and 2008 included herein have been subjected to a limited review by KPMG LLP, our independent registered public accounting firm. The accompanying independent registered public accounting firm's review report is not a report within the meaning of Sections 7 and 11 of the Securities Act of 1933, and the independent registered public accounting firm's liability under Section 11 does not extend to it.

Results of operations for the three-month and six-month periods ended June 30, 2009 are not necessarily indicative of the results of operations that will be realized for the year ending December 31, 2009. It is recommended that these condensed consolidated financial statements be read in conjunction with our audited consolidated financial statements and notes thereto for the year ended December 31, 2008 included in our Annual Report on Form 10-K filed with the SEC on February 26, 2009.

**Note 2 - Noncontrolling Interests**

On January 1, 2009, we adopted SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements" ("SFAS 160"). This standard amends Accounting Research Bulletin No. 51, "Consolidated Financial Statements", to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 clarifies that a noncontrolling interest should be reported as equity in the consolidated financial statements and requires net income attributable to both the parent and the noncontrolling interest to be disclosed separately on the face of the consolidated statement of income. The presentation and disclosure requirements of SFAS 160 require retrospective application to all prior periods presented.

In accordance with SFAS 160, we classified noncontrolling interests as equity on our condensed consolidated balance sheets as of June 30, 2009 and December 31, 2008 and presented net income attributable to noncontrolling interests separately on our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2009 and 2008. Prior year amounts were previously included in other liabilities and contract drilling expense on our consolidated balance sheets and consolidated statements of income, respectively. Local third parties hold a noncontrolling ownership interest in three of our international subsidiaries. No changes in the ownership interests of these subsidiaries occurred during the six-month period ended June 30, 2009.

## Table of Contents

Income from continuing operations attributable to Ensco during the three-month and six-month periods ended June 30, 2009 and 2008 was as follows (in millions):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Income from continuing operations	\$226.3	\$288.1	\$452.1	\$556.9
Income from continuing operations attributable to noncontrolling interests	(1.1)	(1.2)	(2.5)	(2.9)
Income from continuing operations attributable to Ensco	\$225.2	\$286.9	\$449.6	\$554.0

Income (loss) from discontinued operations, net, for the three-month and six-month periods ended June 30, 2009 and 2008 was attributable to Ensco.

### Note 3 - Earnings Per Share

On January 1, 2009, we adopted FASB Staff Position EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities". This staff position addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share ("EPS") under the two-class method described in SFAS No. 128, "Earnings Per Share". Non-vested share awards granted to our employees and non-employee directors contain nonforfeitable dividend rights and, therefore, are now considered participating securities. We have prepared our current period basic and diluted EPS computations and retrospectively revised our comparative prior period computations to exclude net income allocated to non-vested share awards.

The following table is a reconciliation of net income attributable to Ensco common shares used in our basic and diluted EPS computations for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Net income attributable to Ensco	\$200.3	\$296.7	\$421.0	\$568.7
Net income allocated to non-vested share awards	(2.4)	(3.2)	(5.1)	(5.4)
Net income attributable to Ensco common shares	\$197.9	\$293.5	\$415.9	\$563.3

The following table is a reconciliation of the weighted-average common shares used in our basic and diluted EPS computations for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Weighted-average common shares - basic	140.3	142.7	140.2	142.7
Potentially dilutive share options	.1	.5	.0	.5
Weighted-average common shares - diluted	140.4	143.2	140.2	143.2

**Table of Contents**

Antidilutive share options totaling 1.1 million and 268,000 were excluded from the computation of diluted EPS during the three-month periods ended June 30, 2009 and 2008, respectively. Antidilutive share options totaling 1.3 million and 628,000 were excluded from the computation of diluted EPS during the six-month periods ended June 30, 2009 and 2008, respectively.

**Note 4 - Derivative Financial Instruments**

On January 1, 2009, we adopted SFAS No. 161, "Disclosures about Derivative and Hedging Activities" ("SFAS 161"). This standard amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"), to change the disclosure requirements for derivative instruments and hedging activities. SFAS 161 requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations and (c) how derivative instruments and related hedged items affect an entity's financial position, operating results and cash flows.

We use derivative financial instruments ("derivatives") to reduce our exposure to various market risks, primarily foreign currency risk. We maintain a foreign currency risk management strategy that utilizes derivatives to reduce our exposure to unanticipated fluctuations in earnings and cash flows caused by changes in foreign currency exchange rates. Although no interest rate related derivatives were outstanding as of June 30, 2009 and December 31, 2008, we occasionally employ an interest rate risk management strategy that utilizes derivatives to minimize or eliminate unanticipated fluctuations in earnings and cash flows arising from changes in, and volatility of, interest rates. We minimize our credit risk relating to our derivative counterparties by transacting with multiple, high-quality financial institutions, thereby limiting exposure to individual counterparties, and by monitoring the financial condition of our counterparties. We do not enter into derivatives for trading or other speculative purposes.

All derivatives were recorded on our condensed consolidated balance sheets at fair value. Accounting for the gains and losses resulting from changes in the fair value of derivatives depends on the use of the derivative and whether it qualifies for hedge accounting in accordance with SFAS 133. As of June 30, 2009 and December 31, 2008, our condensed consolidated balance sheets included net foreign currency derivative assets of \$1.6 million and net foreign currency derivative liabilities of \$20.3 million, respectively. See "Note 7 - Fair Value Measurements" for additional information on the fair value measurement of our derivatives.

Derivatives recorded at fair value in our condensed consolidated balance sheets as of June 30, 2009 and December 31, 2008 consisted of the following (in millions):

	<u>Derivative Assets</u>		<u>Derivative Liabilities</u>	
	<u>June 30,</u> <u>2009</u>	<u>December 31,</u> <u>2008</u>	<u>June 30,</u> <u>2009</u>	<u>December 31,</u> <u>2008</u>
Foreign currency forward contracts - current <sup>(1)</sup>	\$8.2	\$ .3	\$6.7	\$25.8
Foreign currency forward contracts - non-current <sup>(2)</sup>	1.1	5.1	1.3	.0
<b>Total derivatives designated as hedging instruments</b>	<b>9.3</b>	<b>5.4</b>	<b>8.0</b>	<b>25.8</b>
Foreign currency forward contracts - current <sup>(1)</sup>	.3	.1	.0	.0
<b>Total derivatives not designated as hedging instruments</b>	<b>.3</b>	<b>.1</b>	<b>.0</b>	<b>.0</b>
<b>Total derivatives</b>	<b>\$9.6</b>	<b>\$5.5</b>	<b>\$8.0</b>	<b>\$25.8</b>

(1) Derivative assets and liabilities which have maturity dates equal to or less than twelve months from the respective balance sheet dates were included in other current assets and accrued liabilities and other, respectively, on our condensed consolidated balance sheets.

(2) Derivative assets and liabilities which have maturity dates greater than twelve months from the respective balance sheet dates were included in other assets, net, and other liabilities, respectively, on our condensed consolidated balance sheets.

**Table of Contents**

We utilize derivatives to hedge forecasted foreign currency denominated transactions ("cash flow hedges"), primarily to reduce our exposure to foreign currency risk associated with the portion of our remaining ENSCO 8500 Series® construction obligations denominated in Singapore dollars and contract drilling expenses denominated in various other currencies. As of June 30, 2009, we had cash flow hedges outstanding to exchange an aggregate \$419.3 million for foreign currencies, including \$270.2 million for Singapore dollars, \$74.8 million for British pounds, \$37.9 million for Australian dollars and \$36.4 million for various other foreign currencies.

Gains and losses on derivatives designated as cash flow hedges in accordance with SFAS 133 included in our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2009 and 2008 were as follows (in millions):

*Three Months Ended June 30, 2009 and 2008*

<u>Derivatives Designated as Cash Flow Hedges</u>	<u>Gain Recognized in Other Comprehensive Income ("OCI") on Derivatives (Effective Portion)</u>		<u>Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)</u>		<u>Gain or (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)(1)</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
Foreign currency forward contracts(2)	\$14.2	\$2.2	\$(5.0)	\$2.6	\$4.1	\$(.3)
Interest rate swap contracts(3)	--	--	(.1)	(.2)	--	--
<b>Total</b>	<b>\$14.2</b>	<b>\$2.2</b>	<b>\$(5.1)</b>	<b>\$2.4</b>	<b>\$4.1</b>	<b>\$(.3)</b>

*Six Months Ended June 30, 2009 and 2008*

<u>Derivatives Designated as Cash Flow Hedges</u>	<u>Gain or (Loss) Recognized in OCI on Derivatives (Effective Portion)</u>		<u>Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)</u>		<u>Gain or (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)(1)</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
Foreign currency forward contracts(2)	\$(1.2)	\$5.4	\$(14.8)	\$4.6	\$(2.4)	\$.1
Interest rate swap contracts(3)	--	--	(.3)	(.4)	--	--
<b>Total</b>	<b>\$(1.2)</b>	<b>\$5.4</b>	<b>\$(15.1)</b>	<b>\$4.2</b>	<b>\$(2.4)</b>	<b>\$.1</b>

- (1) Gains and losses recognized in income for ineffectiveness and amounts excluded from effectiveness testing were included in other income, net, in our condensed consolidated statements of income.
- (2) Gains and losses on derivatives reclassified from AOCI into income (effective portion) were included in contract drilling expense in our condensed consolidated statements of income.
- (3) Losses on derivatives reclassified from accumulated other comprehensive income ("AOCI") into income (effective portion) were included in other income, net, in our condensed consolidated statements of income.

**Table of Contents**

We have net assets and liabilities denominated in numerous foreign currencies and use various methods to manage our exposure to foreign currency risk. We predominantly structure our drilling contracts in U.S. dollars, which significantly reduces the portion of our cash flows and assets denominated in foreign currencies. We occasionally enter into derivatives that hedge the fair value of recognized foreign currency denominated assets or liabilities but do not designate such derivatives as hedging instruments, or the derivatives otherwise do not qualify for hedge accounting under SFAS 133. In these situations, a natural hedging relationship generally exists whereby changes in the fair value of the derivatives offset changes in the fair value of the underlying hedged items. As of June 30, 2009, we had derivatives not designated as hedging instruments outstanding to exchange an aggregate \$43.5 million for foreign currencies, including \$13.6 million for Danish kroner, \$11.8 million for Australian dollars, \$8.8 million for British pounds and \$9.3 million for various other currencies.

Net gains of \$3.2 million and \$1.5 million associated with our derivatives not designated as hedging instruments under SFAS 133 were included in other income, net, in our condensed consolidated statements of income for the quarters ended June 30, 2009 and 2008, respectively. Net gains of \$2.2 million and \$4.7 million associated with our derivatives not designated as hedging instruments under SFAS 133 were included in other income, net, in our condensed consolidated statements of income for the six-month periods ended June 30, 2009 and 2008, respectively.

If we were to incur a hypothetical 10% adverse change in foreign currency exchange rates, net unrealized losses associated with our foreign currency denominated assets and liabilities and related derivatives as of June 30, 2009 would approximate \$39.6 million, including \$26.8 million related to our Singapore dollar exposures. All of our outstanding derivatives mature during the next three years.

As of June 30, 2009, the estimated amount of net unrealized gains associated with derivatives, net of tax, that will be reclassified to earnings during the next twelve months was as follows (in millions):

Net unrealized gains to be reclassified to contract drilling expense	\$ .9
Net unrealized losses to be reclassified to other income, net	(.6)
<hr/>	
Net unrealized gains to be reclassified to earnings	\$ .3

**Note 5 - Share-Based Compensation**

During the quarter ended June 30, 2009, we granted 115,002 share options to certain officers as annual equity awards made pursuant to our 2005 Long-Term Incentive Plan ("LTIP"). The share options granted become exercisable in annual 33% increments over a three-year period and, to the extent not exercised, expire on the seventh anniversary of the date of grant. The following table summarizes the value of share options granted during the quarter ended June 30, 2009 (per share):

Weighted-average grant-date fair value	\$17.17
Weighted-average exercise price	\$41.29

The exercise price of share options granted during the period equals the market value of the underlying stock on the date of grant. The fair value of each option award was estimated on the date of grant using the Black-Scholes option valuation model with the following weighted-average assumptions for the quarter ended June 30, 2009:

Risk-free interest rate	1.8%
Expected life (in years)	3.9
Expected volatility	53.3%
Dividend yield	.2%

**Table of Contents**

Expected volatility is based on the historical volatility of our common stock over the period of time equivalent to the expected term of the options granted. The expected term of options granted is derived from historical exercise patterns over a period of time equivalent to the contractual term of the options granted. We have not experienced significant differences in the historical exercise patterns among employees, officers and non-employee directors for them to be considered separately for valuation purposes. The risk-free interest rate is based on the implied yield of U.S. Treasury zero-coupon issues on the date of grant with a remaining term approximating the expected term of the options granted.

During the quarter ended June 30, 2009, we granted 526,383 non-vested share awards to our employees, officers and non-employee directors for annual equity awards and for equity awards granted to new or recently promoted employees, pursuant to our LTIP. Grants of non-vested share awards generally vest at a rate of 20% per year, as determined by a committee of the Board of Directors. Beginning in June 2009, non-vested share awards granted to certain officers vest at a rate of 33% per year. All non-vested share awards have voting and dividend rights effective on the date of grant and are measured using the market value of our common stock on the date of grant. The weighted-average grant-date fair value of non-vested share awards granted during the quarter ended June 30, 2009 was \$40.83 per share.

**Note 6 - Comprehensive Income**

Accumulated other comprehensive loss as of June 30, 2009 and December 31, 2008 was comprised of net unrealized losses on derivative instruments, net of tax. The components of comprehensive income, net of tax, for the three-month and six-month periods ended June 30, 2009 and 2008 were as follows (in millions):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>	<b><u>2009</u></b>	<b><u>2008</u></b>
Net income	\$201.4	\$297.9	\$423.5	\$571.6
Other comprehensive income:				
Net change in fair value of derivatives	14.2	2.2	(1.2)	5.4
Reclassification of unrealized gains and losses on derivatives from other comprehensive loss (income) into net income	5.1	(2.4)	15.1	(4.2)
Net other comprehensive income (loss)	19.3	(.2)	13.9	1.2
Comprehensive income	220.7	297.7	437.4	572.8
Comprehensive income attributable to noncontrolling interests	(1.1)	(1.2)	(2.5)	(2.9)
Comprehensive income attributable to Ensco	\$219.6	\$296.5	\$434.9	\$569.9

**Table of Contents****Note 7 - Fair Value Measurements**

The following fair value hierarchy table categorizes information regarding our assets and liabilities measured at fair value on a recurring basis as of June 30, 2009 and December 31, 2008 (in millions):

**Assets Measured at Fair Value on a Recurring Basis**

	<b>Quoted Prices in Active Markets for Identical Assets (Level 1)</b>	<b>Significant Other Observable Inputs (Level 2)</b>	<b>Significant Unobservable Inputs (Level 3)</b>	<b>Total</b>
<u>As of June 30, 2009</u>				
Auction rate securities	\$ --	\$ --	\$61.6	\$61.6
Derivative instruments, net	--	1.6	--	1.6
<b>Total financial assets</b>	<b>\$ --</b>	<b>\$ 1.6</b>	<b>\$61.6</b>	<b>\$63.2</b>

As of December 31, 2008

Auction rate securities	\$ --	\$ --	\$64.2	\$64.2
<b>Total financial assets</b>	<b>\$ --</b>	<b>\$ --</b>	<b>\$64.2</b>	<b>\$64.2</b>
Derivative instruments, net	\$ --	\$20.3	\$ --	\$20.3
<b>Total financial liabilities</b>	<b>\$ --</b>	<b>\$20.3</b>	<b>\$ --</b>	<b>\$20.3</b>

*Derivative Instruments*

Our derivative instruments were measured at fair value on a recurring basis using Level 2 inputs as of June 30, 2009 and December 31, 2008. See "Note 4 - Derivative Financial Instruments" for additional information on our derivatives, including a description of our foreign currency hedging activities and related methodologies used to manage foreign currency risk. The fair value measurement of our derivatives was based on market prices that are generally observable for similar assets or liabilities at commonly quoted intervals.

**Table of Contents***Auction Rate Securities*

As of June 30, 2009 and December 31, 2008, we held long-term debt instruments with variable interest rates that periodically reset through an auction process ("auction rate securities") totaling \$69.7 million and \$72.3 million (par value), respectively. Auction rate securities were classified as long-term investments on our condensed consolidated balance sheets. Our auction rate securities were originally acquired in January 2008 and have maturity dates ranging from 2025 to 2047. Our auction rate securities were measured at fair value on a recurring basis using significant Level 3 inputs as of June 30, 2009 and December 31, 2008. The following table summarizes our fair value measurements using significant Level 3 inputs, and changes therein, for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended</b>		<b>Six Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>	<b><u>2009</u></b>	<b><u>2008</u></b>
Beginning Balance	\$61.9	\$79.9	\$64.2	\$ --
(Settlements) purchases	(.3)	(9.7)	(2.6)	73.3
Unrealized losses*	--	(.2)	--	(3.3)
Realized losses	--	--	--	--
Transfers in and/or out of Level 3	--	--	--	--
Ending balance	\$61.6	\$70.0	\$61.6	\$70.0

\* Unrealized losses were included in other income, net, in our condensed consolidated statements of income.

Before utilizing Level 3 inputs in our fair value measurement, we considered whether observable inputs were available. As a result of continued auction failures, quoted prices for our auction rate securities did not exist as of June 30, 2009. Accordingly, we concluded that Level 1 inputs were not available. Brokerage statements received from the five broker/dealers that held our auction rate securities included their estimated market value as of June 30, 2009. Four broker/dealers valued our auction rate securities at par and the fifth valued our auction rate securities at 93% of par. Due to the lack of transparency into the methodologies used to determine the estimated market values, we have concluded that estimated market values provided on our brokerage statements do not constitute valid inputs, and we do not utilize them in measuring the fair value of our auction rate securities.

**Table of Contents**

We determined that use of a valuation model was the best available technique for measuring the fair value of our auction rate securities. We used an income approach valuation model to estimate the price that would be received in exchange for our auction rate securities in an orderly transaction between market participants ("exit price") as of June 30, 2009. The exit price was derived as the weighted-average present value of expected cash flows over various periods of illiquidity, using a risk-adjusted discount rate that was based on the credit risk and liquidity risk of our auction rate securities.

While our valuation model was based on both Level 2 (credit quality and interest rates) and Level 3 inputs, we determined that Level 3 inputs were most significant to the overall fair value measurement, particularly the estimates of risk-adjusted discount rates and ranges of expected periods of illiquidity. We believe that we have the ability to maintain our investment in these securities until they are redeemed, repurchased or sold in a market that facilitates orderly transactions.

*Other Financial Instruments*

During the second quarter of 2009, we adopted FASB Staff Position No. FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments". This staff position amends SFAS No. 107, "Disclosures about Fair Value of Financial Instruments", to require disclosures about the fair value of financial instruments of publicly-traded companies for interim reporting periods as well as in annual financial statements. This staff position also amends APB Opinion No. 28, "Interim Financial Reporting", to require the aforementioned disclosures in summarized financial information at interim reporting periods.

The carrying values and estimated fair values of our debt instruments as of June 30, 2009 and December 31, 2008 were as follows (in millions):

	<b>June 30, 2009</b>		<b>December 31, 2008</b>	
	<b><u>Carrying Value</u></b>	<b><u>Estimated Fair Value</u></b>	<b><u>Carrying Value</u></b>	<b><u>Estimated Fair Value</u></b>
4.65% Bonds, including current maturities	\$ 51.8	\$ 56.7	\$ 54.0	\$ 62.1
6.36% Bonds, including current maturities	82.3	94.0	88.7	103.9
7.20% Debentures	148.8	144.9	148.8	140.3

The estimated fair value of our 7.20% Debentures was determined using quoted market prices. The estimated fair values of our 4.65% Bonds and 6.36% Bonds were determined using an income approach valuation model. The estimated fair value of our cash and cash equivalents, receivables, trade payables and other liabilities approximated their carrying values as of June 30, 2009 and December 31, 2008.

**Table of Contents**

**Note 8 - Discontinued Operations**

*ENSCO 69*

From May 2007 to June 2009, ENSCO 69 was contracted to Petrosucre, a subsidiary of Petróleos de Venezuela S.A., the national oil company of Venezuela ("PDVSA"). PDVSA subsidiaries reportedly lack funds and, since late 2008, generally have not been paying their contractors and service providers. In January 2009, we suspended drilling operations on ENSCO 69 after Petrosucre failed to satisfy its contractual obligations and meet commitments relative to the payment of past due invoices. Petrosucre then took over complete control of ENSCO 69 drilling operations utilizing Petrosucre employees and a portion of the Venezuelan rig crews we had utilized. When Petrosucre initially advised us that it temporarily was taking over operations on the rig, we placed our supervisory rig personnel on ENSCO 69 to observe Petrosucre's operations.

On April 30, 2009, we submitted a notice of termination to Petrosucre for non-payment of past due invoices. The terms of the ENSCO 69 drilling contract provided for termination of the contract upon Petrosucre's failure to satisfy its contractual payment obligations during the 30-day period subsequent to our notice. On June 4, 2009, after Petrosucre's failure to satisfy its contractual payment obligations, failure to reach a mutually acceptable agreement with us and denial of our request to demobilize ENSCO 69 from Venezuela, Petrosucre advised that it would not return the rig and would continue to operate it without our consent. Petrosucre further advised that it would release ENSCO 69 after a six-month period, subject to a mutually agreed accord addressing the resolution of all remaining obligations under the ENSCO 69 drilling contract. On June 6, 2009, we terminated our contract with Petrosucre and removed all remaining EnSCO employees from the rig. On July 17, 2009, we received an \$11.5 million payment from Petrosucre, which represented less than 25% of the \$47.9 million contractually due to us as of June 30, 2009.

Due to Petrosucre's longstanding failure to satisfy its contractual obligations and meet payment commitments, and in consideration of the Venezuelan government's recent nationalization of assets owned by international oil and gas companies and oilfield service companies, we believe it is remote that ENSCO 69 will be returned to us by Petrosucre and operated again by EnSCO. Therefore, we recorded the disposal of ENSCO 69 during the quarter ended June 30, 2009, and both the ENSCO 69 results of operations and loss on disposal were reclassified as discontinued operations in our condensed consolidated statements of income. We have filed an insurance claim under our package policy, which includes coverage for certain political risks, and are evaluating legal remedies against Petrosucre for contractual and other ENSCO 69 related damages.

ENSCO 69 had a net book value of \$17.3 million and inventory and other assets totaling \$800,000. In connection with the disposal of ENSCO 69, we recognized a pre-tax loss of \$18.1 million, which was classified as loss on disposal of discontinued operations, net, in our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2009.

After considering the \$11.5 million payment received on July 17, 2009, we recognized a \$5.4 million bad debt provision during the quarter ended June 30, 2009 to fully reserve our remaining net receivable from Petrosucre. We had previously recognized bad debt provisions of \$2.6 million and \$14.3 million during the quarters ended March 31, 2009 and December 31, 2008, respectively. Bad debt provisions recognized during the three-month and six-month periods ended June 30, 2009 were included in loss on discontinued operations, net, in our condensed consolidated statements of income. We did not recognize revenue associated with ENSCO 69 drilling operations subsequent to January 2009 when Petrosucre initially assumed control of our rig. We deferred \$14.1 million of revenue earned during the period between January 2009 and our termination of the ENSCO 69 drilling contract in June 2009.

**Table of Contents**

The ENSCO 69 drilling contract is governed by Venezuelan law and there can be no assurances relative to the recovery of outstanding contract entitlements. As of June 30, 2009, ENSCO 69 had an insured value of \$65.0 million under a package policy, including coverage for certain political risks, subject to a \$10.0 million deductible. We are in the early stages of the insurance claim process and, therefore, were unable to conclude that collection of insurance proceeds associated with the loss of ENSCO 69 was probable as of June 30, 2009. Accordingly, no ENSCO 69 related insurance recoveries were recognized in our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2009.

*ENSCO 74*

In September 2008, ENSCO 74 was lost as a result of Hurricane Ike. Thereafter, we conducted extensive aerial and sonar reconnaissance but failed to locate the rig hull. The rig was a total loss, as defined under the terms of our insurance policies. In March 2009, the sunken hull of ENSCO 74 was located on the seabed approximately 95 miles from the original drilling location when it was reportedly struck by an oil tanker. The operating results of ENSCO 74 were reclassified as discontinued operations in our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2008. See "Note 9 - Contingencies" for additional information on the loss of ENSCO 74.

The following table summarizes our (loss) income from discontinued operations for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended</b>		<b>Six Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>	<b><u>2009</u></b>	<b><u>2008</u></b>
Revenues	\$ --	\$27.7	\$ 4.8	\$48.1
Operating expenses	9.3	11.9	19.6	24.1
Operating (loss) income before income taxes	(9.3)	15.8	(14.8)	24.0
Income tax expense	3.8	6.0	2.0	9.3
Loss on disposal of discontinued operations, net	(11.8)	--	(11.8)	--
(Loss) income from discontinued operations	\$(24.9)	\$ 9.8	\$(28.6)	\$14.7

Debt and interest expense are not allocated to our discontinued operations.

**Note 9 - Contingencies***FCPA Internal Investigation*

Following disclosures by other offshore service companies announcing internal investigations involving the legality of amounts paid to and by customs brokers in connection with temporary importation of rigs and vessels into Nigeria, the Audit Committee of our Board of Directors and management commenced an internal investigation in July 2007. The investigation initially focused on our payments to customs brokers relating to the temporary importation of ENSCO 100, our only rig that recently operated offshore Nigeria.

**Table of Contents**

As is customary for companies operating offshore Nigeria, we had engaged independent customs brokers to process customs clearance of routine shipments of equipment, materials and supplies and to process the ENSCO 100 temporary importation permits, extensions and renewals. One or more of the customs brokers that our subsidiary in Nigeria used to obtain the ENSCO 100 temporary import permits, extensions and renewals also provided this service to other offshore service companies that have undertaken Foreign Corrupt Practices Act ("FCPA") compliance internal investigations.

The principal purpose of our investigation was to determine whether any of the payments made to or by our customs brokers were inappropriate under the anti-bribery provisions of the FCPA or whether any violations of the recordkeeping or internal accounting control provisions of the FCPA occurred. Our Audit Committee engaged a Washington, D.C. law firm with significant experience in investigating and advising upon FCPA matters to assist in the internal investigation.

Following notification to the Audit Committee and to KPMG LLP, our independent registered public accounting firm, in consultation with the Audit Committee's outside legal counsel, we voluntarily notified the United States Department of Justice and SEC that we had commenced an internal investigation. We expressed our intention to cooperate with both agencies, comply with their directives and fully disclose the results of the investigation. The internal investigation process has involved extensive reviews of documents and records, as well as production to the authorities, and interviews of relevant personnel. In addition to the temporary importation of ENSCO 100, the investigation has examined our customs clearance of routine shipments and immigration activities in Nigeria.

Our internal investigation has essentially been concluded. A meeting to review the results of the investigation with the authorities was held on February 24, 2009. We expect to discuss a possible negotiated disposition with the authorities during the second half of 2009. It currently is anticipated that the matter will be concluded within that period.

Although we believe the U.S. authorities will take into account our voluntary disclosure, our cooperation with the agencies and the remediation and compliance enhancement activities that are underway, we are unable to predict the ultimate disposition of this matter, whether we will be charged with violation of the anti-bribery, recordkeeping or internal accounting control provisions of the FCPA or whether the scope of the investigation will be extended to other issues in Nigeria or to other countries. We also are unable to predict what potential corrective measures, fines, sanctions or other remedies, if any, the agencies may seek against us or any of our employees.

In November 2008, our Board of Directors approved enhanced FCPA compliance recommendations issued by the Audit Committee's outside counsel, and the Company embarked upon an enhanced compliance initiative that included appointment of a Chief Compliance Officer and a Director - Corporate Compliance. We have engaged consultants to assist us in implementing the compliance recommendations approved by our Board of Directors, which will include an enhanced compliance policy, increased training and testing, prescribed contractual provisions for our service providers that interface with foreign government officials, due diligence for the selection of such service providers and an increased Company-wide awareness initiative that includes periodic issuance of FCPA Alerts.

Since ENSCO 100 completed its contract commitment and departed Nigeria in August 2007, this matter is not expected to have a material effect on or disrupt our current operations. As noted above, we are unable to predict the outcome of this matter or estimate the extent to which we may be exposed to any resulting potential liability, sanctions or significant additional expense.

**Table of Contents**

*ENSCO 74 Loss*

In September 2008, ENSCO 74 was lost as a result of Hurricane Ike and was presumed to have sunk in the Gulf of Mexico, however, portions of its legs remained underwater adjacent to the customer's platform. Thereafter, we conducted extensive aerial and sonar reconnaissance but failed to locate the rig hull. The rig was a total loss, as defined under the terms of our insurance policies.

In March 2009, the sunken rig hull of ENSCO 74 was located on the seabed approximately 95 miles from the original drilling location when it was reportedly struck by an oil tanker. Following discovery of the sunken rig hull, we removed the hydrocarbons remaining onboard and began planning for removal of the wreckage. As an interim measure, the wreckage has been appropriately marked, and the U.S. Coast Guard has issued a Notice to Mariners.

Physical damage to our rigs caused by a hurricane, the associated "sue and labor" costs to mitigate the insured loss and removal, salvage and recovery costs are all covered by our property insurance policies subject to a \$50.0 million per occurrence retention (deductible). The insured value of ENSCO 74 was \$100.0 million, and we have received the net \$50.0 million due for loss of the rig.

Coverage for ENSCO 74 sue and labor costs and wreckage and debris removal costs under our property insurance policies is limited to \$25.0 million and \$50.0 million, respectively. Supplemental wreckage and debris removal coverage is provided under our liability insurance policies, subject to an annual aggregate limit of \$500.0 million. We also have a customer contractual indemnification that provides for reimbursement of any ENSCO 74 wreckage and debris removal costs that are not recovered under our insurance policies.

We believe it is probable that we will be required to remove the leg sections of ENSCO 74 remaining adjacent to the customer's platform because they may interfere with the customer's future operations. We also believe it is probable that we will be required to remove the ENSCO 74 rig hull and related debris from the seabed due to the navigational risk it imposes. We estimate the leg removal costs could range from \$16.0 million to \$30.0 million, and the hull and related debris removal costs could range from \$30.0 million to \$55.0 million. A \$16.0 million liability, representing the low end of the range of estimated leg removal costs, and a corresponding receivable for recovery of those costs, was recorded as of June 30, 2009. A \$30.0 million liability, representing the low end of the range of estimated hull and related debris removal costs, and a corresponding receivable for recovery of those costs, was recorded as of June 30, 2009. The aggregate \$46.0 million liability and receivable for the leg and hull and related debris removal costs were included in accrued liabilities and other and other assets, net, on our June 30, 2009 condensed consolidated balance sheet.

On March 17, 2009, we received notice from counsel representing certain underwriters in a subrogation claim alleging that ENSCO 74 caused a pipeline to rupture during Hurricane Ike. The letter requests that we retain all documents/records concerning the ENSCO 74 loss and permit the underwriters' representatives to attend the salvage operations and participate in a joint survey of the rig. The underwriters' counsel has advised that the subrogated claim is in the amount of \$22.0 million to \$25.0 million and indicated that the letter was submitted due to the proximity (approximately 2 miles) of the pipeline to the sunken ENSCO 74 hull and the assumed path of the rig. An investigation of the matter is in process. Based on information currently available, we have not concluded that it is probable that a liability exists with respect to this matter.

On March 18, 2009, the owner of the oil tanker that struck the hull of ENSCO 74 commenced civil litigation against us seeking monetary damages in the aggregate amount of \$10.0 million for losses incurred. Based on information currently available, primarily the adequacy of available defenses, we have not concluded that it is probable a liability exists with respect to the claim of the tanker owner.

On June 9, 2009, we received notice from legal counsel representing another pipeline owner which reportedly sustained damages to a subsea pipeline. The letter asserts these unquantified damages may have been caused by ENSCO 74 during Hurricane Ike. We presently are unable to determine whether the pipeline damages were caused by ENSCO 74 or the extent of the cost and losses associated with the damage. Based on information currently available, we have not concluded that it is probable that a liability exists with respect to this matter.

## **Table of Contents**

We have liability insurance policies that provide coverage for third-party claims such as the tanker and pipeline claims, subject to a \$10.0 million per occurrence self-insured retention (in the event of multiple occurrences the self-insured retention is \$15.0 million for two occurrences and \$1.0 million for each occurrence thereafter) and an annual aggregate limit of \$500.0 million. Although we do not expect the final disposition of the claims associated with the ENSCO 74 loss to have a material adverse effect upon our financial position, operating results or cash flows, there can be no assurances as to the ultimate outcome.

### *ENSCO 29 Wreck Removal*

A portion of the ENSCO 29 platform drilling rig was lost over the side of a customer's platform as a result of Hurricane Katrina during 2005. Although beneficial ownership of ENSCO 29 was transferred to our insurance underwriters when the rig was determined to be a total loss, management believes we may be legally required to remove ENSCO 29 wreckage and debris from the seabed and currently estimates that the removal cost could range from \$5.0 million to \$15.0 million. Our property insurance policies include coverage for ENSCO 29 wreckage and debris removal costs up to \$3.8 million. We also have liability insurance policies that provide specified coverage for wreckage and debris removal costs in excess of the \$3.8 million coverage provided under our property insurance policies.

Our liability insurance underwriters have issued letters reserving rights and effectively denying coverage by questioning the applicability of coverage for the potential ENSCO 29 wreckage and debris removal costs. In August 2007, we commenced litigation against certain underwriters alleging breach of contract, wrongful denial, bad faith and other claims which seek a declaration that removal of wreckage and debris is covered under our liability insurance, monetary damages, attorneys' fees and other remedies. The litigation is in an early stage and is currently pending a decision from the United States Court of Appeals.

While we anticipate that any ENSCO 29 wreckage and debris removal costs incurred will be largely or fully covered by insurance, a \$1.2 million provision, representing the portion of the \$5.0 million low end of the range of estimated removal cost we believe is subject to liability insurance coverage, was recognized during 2006.

### *Asbestos Litigation*

In August 2004, we and certain current and former subsidiaries were named as defendants, along with numerous other third-party companies as co-defendants, in three multi-party lawsuits filed in the Circuit Courts of Jones County (Second Judicial District) and Jasper County (First Judicial District), Mississippi. The lawsuits sought an unspecified amount of monetary damages on behalf of individuals alleging personal injury or death, primarily under the Jones Act, purportedly resulting from exposure to asbestos on drilling rigs and associated facilities during the period 1965 through 1986.

In compliance with the Mississippi Rules of Civil Procedure, the individual claimants in the original multi-party lawsuits whose claims were not dismissed were ordered to file either new or amended single plaintiff complaints naming the specific defendant(s) against whom they intended to pursue claims. As a result, out of more than 600 initial multi-party claims, we have been named as a defendant by 65 individual plaintiffs. Of these claims, 62 claims or lawsuits are pending in Mississippi state courts and three are pending in the U.S. District Court as a result of their removal from state court.

The Mississippi state court cases are under an informal stay of discovery issued by a Special Master presiding over these matters while discovery is conducted for a designated group of plaintiffs, several of which involve us. To date, written discovery and plaintiff depositions have taken place in seven cases pending against us. No further activity will occur in these cases until they are selected for trial. Currently, none of the cases pending against us in Mississippi have been set for trial. Plaintiffs and defendants have until August 15, 2009 to select plaintiffs to fill five trial settings during 2010.

## **Table of Contents**

The three cases pending in federal court were consolidated with 441 other lawsuits filed by a Houston law firm. These cases were referred to a Magistrate Judge, who ordered parties to conduct general discovery in these matters. Discovery specific to each plaintiff will take place at a later designated time, if deemed necessary by the parties and the court.

We intend to vigorously defend against these claims and have filed responsive pleadings preserving all defenses and challenges to jurisdiction and venue. However, discovery is still ongoing and, therefore, available information regarding the nature of all pending claims is limited. At present, we cannot reasonably determine how many of the claimants may have valid claims under the Jones Act or estimate a range of potential liability exposure, if any.

In addition to the pending cases in Mississippi, we have eight other asbestos or lung injury claims pending against us in litigation in various other jurisdictions. Although we do not expect the final disposition of the Mississippi and other asbestos lawsuits to have a material adverse effect upon our financial position, operating results or cash flows, there can be no assurances as to the ultimate outcome of the lawsuits.

### *Working Time Directive*

Legislation known as the U.K. Working Time Directive ("WTD") was introduced in August 2003 and may be applicable to our employees and employees of other drilling contractors that work offshore in United Kingdom ("U.K.") territorial waters or in the U.K. sector of the North Sea. Certain trade unions representing offshore employees have claimed that drilling contractors are not in compliance with the WTD in respect of paid time off (vacation time) for employees working offshore on a rotational basis (generally equal time working and off).

A Labor Tribunal in Aberdeen, Scotland, rendered decisions in claims involving other offshore drilling contractors and offshore service companies on February 21, 2008. The Tribunal decisions effectively held that employers of offshore workers in the U.K. sector employed on an equal time on/time off rotation are obligated to accord such rotating personnel two-weeks annual paid time off from their scheduled offshore work assignment period. Both sides of the matter, employee and employer groups, appealed the Tribunal decision. The appeals were heard by the Employment Appeal Tribunal ("EAT") in December 2008.

In an opinion rendered on March 9, 2009, the EAT determined that the time off work enjoyed by U.K. offshore oil and gas workers, typically 26 weeks per year, meets the amount of annual leave employers must provide to employees under the WTD. The employer group was successful in all arguments on appeal, as the EAT determined that the statutory entitlement to annual leave under the WTD can be discharged through normal field break arrangements for offshore workers. As a consequence of the EAT decision, an equal on/off time offshore rotation has been deemed to be fully compliant with the WTD.

The employee group (led by a trade union) was granted leave to appeal to the highest civil court in Scotland (the Court of Session). The trade unions initially submitted an application for a direct reference to the European Court of Justice, which recently was withdrawn. It is expected that a Court of Session ruling on the appeal will not be made for several years.

We also received inquiries from and responded to the Danish and Dutch authorities regarding applicability of the WTD as adopted by Denmark and The Netherlands to employees on our rigs operating in the Danish and Dutch sectors of the North Sea.

Based on information currently available, we do not expect the ultimate resolution of these matters to have a material adverse effect on our financial position, operating results or cash flows.

### *Other Matters*

In connection with an audit of employee payroll-related returns of an international subsidiary, the local taxing authority issued a letter to us during the second quarter of 2009 communicating its position related to the applicability of certain tax exemptions provided by various tax treaties to non-resident employees of the subsidiary. We believe that the local taxing authority's position is inconsistent with established and current tax law in the jurisdiction. We estimate our exposure associated with this matter to be approximately \$5.5 million, but sufficient evidence exists to enable us to conclude that our defenses are adequate and a liability is not probable.

**Table of Contents**

In addition to the foregoing, we are named defendants in certain other lawsuits, claims or proceedings incidental to our business and are involved from time to time as parties to governmental investigations or proceedings, including matters related to taxation, arising in the ordinary course of business. Although the outcome of such lawsuits or other proceedings cannot be predicted with certainty and the amount of any liability that could arise with respect to such lawsuits or other proceedings cannot be predicted accurately, management does not expect these matters to have a material adverse effect on our financial position, operating results or cash flows.

**Note 10 - Segment Information**

Our business consists of four operating segments: (1) Deepwater, (2) Asia Pacific, (3) Europe/Africa and (4) North and South America. Each of our four operating segments provides one service, contract drilling. Segment information for the three-month and six-month periods ended June 30, 2009 and 2008 is presented below. General and administrative expense and depreciation expense incurred by our corporate office are not allocated to our operating segments for purposes of measuring segment operating income and were included in "Reconciling Items." Assets not allocated to our operating segments consisted primarily of cash and cash equivalents and goodwill and were also included in "Reconciling Items."

**Note 11 - Subsequent Events**

During the second quarter of 2009, we adopted SFAS No. 165, "Subsequent Events" (as amended) which establishes general standards regarding the accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Adoption of this standard did not result in significant changes in the subsequent events that we are required to recognize or disclosure in our financial statements.

We evaluated subsequent events through July 23, 2009, the date these condensed consolidated financial statements were filed with the SEC. On July 17, 2009, we received an \$11.5 million payment from Petrosucre, a subsidiary of PDVSA. Petrosucre took over complete control of ENSCO 69 in January 2009, and we terminated our drilling contract with Petrosucre in June 2009 after it failed to satisfy contractual obligations and meet payment commitments. See "Note 8 - Discontinued Operations" for additional information on ENSCO 69.

**Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations***

**BUSINESS ENVIRONMENT**

Depressed oil and natural gas prices and the weak global economy have caused operators in virtually all markets to curtail their shallow water drilling programs leading to a significant decline in jackup rig demand. Although oil and natural gas prices increased during the quarter ended June 30, 2009, we believe incremental drilling activity will be constrained until the global economy shows meaningful signs of recovery. Current economic conditions and depressed commodity prices are expected to continue their adverse effect on jackup rig demand during the remainder of 2009 and possibly beyond.

As a result of depressed oil and natural gas prices and the weak global economy, jackup rig demand has declined, resulting in an increased number of available rigs. In addition, it has been reported that 2009 newbuild jackup and semisubmersible rigs will increase the worldwide fleet of drilling rigs by almost 10%. Of the 28 jackup rigs projected for delivery during 2009, eleven were delivered during the first six months of the year. The majority of jackup rigs scheduled for delivery during the remainder of 2009 are not contracted.

Of the 18 semisubmersible rigs projected for delivery during 2009, seven were delivered during the first six months of the year. Although the majority of semisubmersible rigs scheduled for delivery during the remainder of 2009 are contracted, operators have expressed interest in subletting contracted rigs in an attempt to minimize costs until oil and natural gas prices and the global economy recover.

It is unlikely that the market in general, or any geographic region in particular, will be able to fully absorb newbuild rig deliveries, especially in light of the existing oversupply of available jackup rigs and depressed rig demand. For additional information concerning the potential risks and uncertainties newbuild rigs may have on our business, our industry and global supply, see "Item 1A. Risk Factors" in Part I and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II of our Annual Report on Form 10-K for the year ended December 31, 2008, as updated in this report.

*Deepwater*

Although depressed oil and natural gas prices resulted in a modest decline in demand for ultra-deepwater semisubmersible rigs, we expect operators to continue the majority of their ongoing investments in deepwater projects. Deepwater semisubmersible rig day rates declined slightly during the first six months of 2009 as compared to record-high day rates achieved during 2008, partially due to the abundance of sublet slots made available by operators. Despite the recent increase in sublet activity, we anticipate continued high utilization of the worldwide ultra-deepwater semisubmersible rig fleet for the foreseeable future. Day rates for the remainder of 2009 and beyond will depend in large part on the length and magnitude of the current global economic crisis and on expectations of future oil and natural gas prices.

In addition to ENSCO 8500, which commenced a four-year drilling contract in June 2009, and ENSCO 8501, which was delivered in June 2009 and is expected to commence drilling operations under a three-and-a-half-year contract in October 2009, we have five ENSCO 8500 Series® rigs under construction with scheduled delivery dates during the first and fourth quarters of 2010, the second half of 2011 and the first and second half of 2012. Two of the five ENSCO 8500 Series® rigs under construction have secured long-term drilling contracts in the Gulf of Mexico and three are without contracts. Our ENSCO 7500 ultra-deepwater semisubmersible rig is operating under a long-term contract in Australia.

**Table of Contents**

*Asia Pacific*

During the first half of 2008, Asia Pacific jackup rig utilization remained high and day rates stabilized as strong rig demand was offset by new rig deliveries. During the latter half of 2008, jackup rig demand was significantly impacted by the decline in oil and natural gas prices and the global economic crisis, resulting in a significant reduction in utilization and day rates through the first six months of 2009. With limited contract opportunities currently available and an expected increase in the supply of available jackup rigs from newbuild deliveries, cancelled tenders and unexercised contract extension options, we anticipate that utilization and day rates will remain under pressure for the remainder of 2009.

*Europe/Africa*

Our Europe/Africa offshore drilling operations are mainly conducted in northern Europe. During 2008, shortfalls in rig availability in this region led to sustained high utilization levels and a slight increase in day rates. Although utilization and day rates remained high during the first quarter of 2009, the decline in oil and natural gas prices during the latter half of 2008 resulted in several cancelled tenders and unexercised contract extension options. Tender activity in the region during the second quarter was minimal, and we expect this trend to continue for the remainder of the year. We anticipate that this market will experience excess rig availability in the near-term, which will result in a decline in utilization and day rates during the remainder of 2009.

*North and South America*

Demand for jackup rigs in the Gulf of Mexico stabilized during 2008, and jackup rig supply continued to decline as rigs were relocated to more economically attractive regions. As a result, utilization levels and day rates began to improve during the first half of 2008. In September 2008, damage caused by Hurricanes Gustav and Ike reduced the supply of available jackup rigs, however, the reduction was more than offset by a decrease in demand resulting from the global economic crisis and decline in oil and natural gas prices. As a result, utilization and day rates declined significantly during the first six months of 2009. With depressed oil and natural gas prices, a weakened global economy and the threat of severe weather during hurricane season, we expect continued declines in jackup rig demand resulting in low utilization and day rates for the remainder of the year.

**Table of Contents**

A growing portion of our North and South America offshore drilling operations are conducted in Mexico, where demand for rigs increased during 2008 as Petróleos Mexicanos, the national oil company of Mexico ("PEMEX"), accelerated drilling activities in an attempt to offset continued depletion of its major oil and natural gas fields. During the first six months of 2009, demand for jackup rigs in Mexico remained high and day rates remained comparable with international rates despite the global economic crisis and depressed oil and natural gas prices. PEMEX is expected to issue additional tenders during the next several quarters, however, it is unclear whether these requirements relate to renewals of incumbent rigs. We expect future day rates to face pressure as drilling contractors with idle rigs in other geographic regions pursue contract opportunities in Mexico.

**RESULTS OF OPERATIONS**

The following table highlights our condensed consolidated results of operations for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>	<b><u>2009</u></b>	<b><u>2008</u></b>
Revenues	\$511.6	\$609.4	\$1,020.9	\$1,169.3
Operating expenses				
Contract drilling (exclusive of depreciation)	177.8	203.0	341.5	381.6
Depreciation	49.3	46.7	96.5	92.4
General and administrative	16.0	13.8	28.0	26.5
Operating income	268.5	345.9	554.9	668.8
Other income, net	6.9	6.8	2.6	11.3
Provision for income taxes	49.1	64.6	105.4	123.2
Income from continuing operations	226.3	288.1	452.1	556.9
(Loss) income from discontinued operations, net	(24.9)	9.8	(28.6)	14.7
Net income	201.4	297.9	423.5	571.6
Less: Net income attributable to noncontrolling interests	(1.1)	(1.2)	(2.5)	(2.9)
Net income attributable to Ensco	\$200.3	\$296.7	\$ 421.0	\$ 568.7

**Table of Contents**

For the quarter ended June 30, 2009, revenues declined by \$97.8 million, or 16%, and operating income declined by \$77.4 million, or 22%, as compared to the prior year quarter. The declines were primarily due to decreased utilization of jackup rigs across our worldwide fleet, partially offset by an increase in average day rates earned by our contracted jackup rigs in North and South America and ENSCO 7500. For the six-month period ended June 30, 2009, revenues declined by \$148.4 million, or 13%, and operating income declined by \$113.9 million, or 17%, as compared to the prior year period. The declines were primarily due to decreased utilization of our Asia Pacific and North and South America jackup fleets, partially offset by an increase in average day rates earned by our contracted jackup rigs in North and South America.

Oil and natural gas prices have declined substantially from their 2008 levels. As a result, operators continue to defer and/or curtail drilling programs, which will likely result in a reduction in demand for drilling rigs and a decline in utilization and day rates. If current economic conditions persist, we believe it is unlikely the operating results achieved during 2008 and the six-month period ended June 30, 2009 will be sustained during the remainder of the year.

**Rig Locations, Utilization and Average Day Rates**

We manage our business through four operating segments. Our jackup rigs are mobile and occasionally move between operating segments in response to market conditions and contract opportunities. The following table summarizes our offshore drilling rigs by segment and rigs under construction as of June 30, 2009 and 2008:

	<b><u>June 30,</u></b> <b><u>2009</u></b>	<b><u>June 30,</u></b> <b><u>2008</u></b>
Deepwater(1)(2)	3	1
Asia Pacific	20	20
Europe/Africa	10	10
North and South America	13	13
Under construction(1)(2)(3)	5	6
Total(4)	51	50

- (1) During the third quarter of 2008, we accepted delivery of ENSCO 8500 and mobilized the rig to the Gulf of Mexico. The rig commenced operations in the Gulf of Mexico under a four-year contract in June 2009.
- (2) During the second quarter of 2009, we accepted delivery of ENSCO 8501 which is currently mobilizing to the Gulf of Mexico from Singapore. ENSCO 8501 is expected to commence drilling operations in the Gulf of Mexico under a three-and-a-half-year contract in October 2009.
- (3) During the third quarter of 2008, we entered into an agreement to construct ENSCO 8506 with delivery expected during the second half of 2012.
- (4) The total number of rigs for each period excludes rigs reclassified as discontinued operations.

**Table of Contents**

The following table summarizes our rig utilization and average day rates from continuing operations by operating segment for the three-month and six-month periods ended June 30, 2009 and 2008:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
<b>Rig Utilization<sup>(1)</sup></b>				
Deepwater	96%	98%	98%	97%
Asia Pacific <sup>(3)</sup>	63%	91%	70%	94%
Europe/Africa	87%	97%	93%	98%
North and South America	72%	100%	70%	95%
Total	72%	95%	76%	95%

<b>Average Day Rates<sup>(2)</sup></b>				
Deepwater	\$490,865	\$365,496	\$490,865	\$323,215
Asia Pacific <sup>(3)</sup>	144,517	152,906	154,093	148,023
Europe/Africa	219,715	217,710	219,309	215,435
North and South America	119,190	93,333	119,127	89,605
Total	\$171,439	\$154,454	\$169,656	\$150,958

- (1) Rig utilization is derived by dividing the number of days under contract, including days associated with compensated mobilizations, by the number of days in the period.
- (2) Average day rates are derived by dividing contract drilling revenues, adjusted to exclude certain types of non-recurring reimbursable revenues and lump sum revenues, by the aggregate number of contract days, adjusted to exclude contract days associated with certain mobilizations, demobilizations, shipyard contracts and standby contracts.
- (3) Rig utilization and average day rates for the Asia Pacific operating segment include our jackup rigs only. The ENSCO I barge rig has been excluded.

Detailed explanations of our operating results, including discussions of revenues, contract drilling expense and depreciation expense by operating segment, are provided below.

**Table of Contents****Operating Income**

Our business consists of four operating segments: (1) Deepwater, (2) Asia Pacific, (3) Europe/Africa and (4) North and South America. Each of our four operating segments provides one service, contract drilling. Segment information for the three-month and six-month periods ended June 30, 2009 and 2008 is presented below. General and administrative expense and depreciation expense incurred by our corporate office are not allocated to our operating segments for purposes of measuring segment operating income and were included in "Reconciling Items."

## **Table of Contents**

### *Deepwater*

Deepwater revenues for the quarter ended June 30, 2009 increased by \$35.1 million, or 108%, as compared to the prior year quarter. The increase in revenues was due to an increase in the day rate earned by ENSCO 7500, the recognition of ENSCO 7500 mobilization revenues and the commencement of ENSCO 8500 drilling operations in June 2009. In October 2008, we amended the ENSCO 7500 drilling contract and agreed to relocate the rig to Australia where we commenced drilling operations under a new contract in April 2009 at a day rate of approximately \$550,000. Revenues earned during the mobilization period were deferred and are being recognized ratably over the firm commitment period of the contract (April 2009 through September 2010) at a rate of approximately \$170,000 per day. Contract drilling expense increased by \$14.0 million, or 144%, due to an increase in mobilization expense and personnel costs associated with ENSCO 7500 and, to a lesser extent, the commencement of ENSCO 8500 drilling operations. Depreciation expense increased by \$1.4 million, or 61%, primarily due to ENSCO 8500, which was placed into service in June 2009.

Deepwater revenues for the six-month period ended June 30, 2009 increased by \$10.5 million, or 18%, as compared to the prior year period. The increase in revenues was due to an increase in the day rate earned by ENSCO 7500, the recognition of ENSCO 7500 mobilization revenues and the commencement of ENSCO 8500 drilling operations in June 2009, partially offset by the deferral of ENSCO 7500 revenues during the rig's mobilization to Australia. Contract drilling expense increased by \$10.3 million, or 57%, due to an increase in mobilization expense and personnel costs associated with ENSCO 7500 and, to a lesser extent, the commencement of ENSCO 8500 drilling operations. Depreciation expense increased by \$1.5 million, or 33%, primarily due to ENSCO 8500 as noted above.

### *Asia Pacific*

Asia Pacific revenues for the quarter ended June 30, 2009 declined by \$102.0 million, or 39%, as compared to the prior year quarter. The decline in revenues was primarily due to a decline in utilization to 63% from 91% in the prior year quarter. The decline in utilization occurred due to lower levels of spending by oil and gas companies in response to the significant decline in oil and natural gas prices during the latter half of 2008 coupled with excess rig availability in the region. Contract drilling expense declined by \$28.3 million, or 32%, as compared to the prior year quarter, primarily due to the impact of decreased utilization and a decline in repair and maintenance expense. Depreciation expense increased by 5% primarily due to the ENSCO 53 capital enhancement project completed during the second quarter of 2009 and depreciation on minor upgrades and improvements completed during 2008 and the first half of 2009.

Asia Pacific revenues for the six-month period ended June 30, 2009 declined by \$136.3 million, or 26%, as compared to the prior year period. The decline in revenues was primarily due to a decline in utilization to 70% from 94% in the prior year period, partially offset by a 4% increase in average day rates. The decline in utilization occurred due to lower levels of spending by oil and gas companies as noted above, coupled with excess rig availability in the region. The increase in average day rates resulted from higher levels of spending by oil and gas companies during 2008 prior to the decline in oil and natural gas prices. Contract drilling expense declined by \$36.8 million, or 22%, as compared to the prior year period, primarily due to the impact of decreased utilization and a decline in repair and maintenance expense. Depreciation expense increased by 4% primarily due to the ENSCO 53 capital enhancement project completed during the second quarter of 2009 and depreciation on minor upgrades and improvements completed during 2008 and the first half of 2009.

## **Table of Contents**

### *Europe/Africa*

Europe/Africa revenues for the quarter ended June 30, 2009 declined by \$25.8 million, or 13%, as compared to the prior year quarter. The decline was primarily due to a decline in utilization to 87% from 97% in the prior year quarter. The decline in utilization occurred due to lower levels of spending by oil and gas companies in response to the significant decline in oil and natural gas prices during the latter half of 2008. Contract drilling expense declined by \$11.6 million, or 18%, as compared to the prior year quarter, primarily due to a decline in mobilization expense and the impact of decreased utilization. Depreciation expense increased by 2% due to depreciation on minor upgrades and improvements to our Europe/Africa fleet completed during 2008 and the first half of 2009.

Europe/Africa revenues for the six-month period ended June 30, 2009 declined by \$21.2 million, or 5%, as compared to the prior year period. The decline was primarily due to a decline in utilization to 93% from 98% in the prior year period. The decline in utilization occurred due to lower levels of spending by oil and gas companies as noted above. Contract drilling expense declined by \$16.0 million, or 13%, as compared to the prior year quarter, primarily due to a decline in mobilization expense and the impact of decreased utilization, partially offset by an increase in repair and maintenance expense. Depreciation expense increased by 3% due to depreciation on minor upgrades and improvements to our Europe/Africa fleet completed during 2008 and the first half of 2009.

### *North and South America*

North and South America revenues for the quarter ended June 30, 2009 declined by \$5.1 million, or 5%, as compared to the prior year quarter. The decline was primarily due to a decline in utilization to 72% from 100% in the prior year quarter, largely offset by a 28% increase in average day rates. The decline in utilization occurred due to lower levels of spending by oil and gas companies in response to the significant decline in oil and natural gas prices during the latter half of 2008. The increase in average day rates was largely due to the relocation of ENSCO 89, ENSCO 93 and ENSCO 98 to Mexico and ENSCO 68 to Venezuela during the second half of 2008 or first half of 2009, where day rates are generally higher than the Gulf of Mexico. Contract drilling expense increased by \$700,000, or 2%, as compared to the prior year quarter. Incremental expenses associated with operating in Mexico and Venezuela were largely offset by the impact of decreased utilization in the Gulf of Mexico. Depreciation expense increased by 2% due to the ENSCO 89 and ENSCO 93 capital enhancement projects completed during the second quarter of 2009 and depreciation on minor upgrades and improvements to our North and South America fleet completed during 2008 and the first half of 2009.

North and South America revenues for the six-month period ended June 30, 2009 declined by \$1.4 million as compared to the prior year period. The decline was primarily due to a decline in utilization to 70% from 95% in the prior year period, largely offset by a 33% increase in average day rates. The decline in utilization occurred due to lower levels of spending by oil and gas companies as noted above. The increase in average day rates was largely due to the relocation of ENSCO 89, ENSCO 93 and ENSCO 98 to Mexico and ENSCO 68 to Venezuela as noted above. Contract drilling expense increased by \$2.4 million, or 3%, as compared to the prior year period, due to an increase in repair and maintenance and mobilization expense in addition to incremental expenses associated with operating in Mexico and Venezuela, partially offset by the impact of decreased utilization. Depreciation expense increased by 3% primarily due to ENSCO 93 capital enhancement projects completed during the second quarter of 2009 and first quarter of 2008, the ENSCO 89 capital enhancement project completed during the second quarter of 2009 and depreciation on minor upgrades and improvements to our North and South America fleet completed during 2008 and the first half of 2009.

### *Other*

General and administrative expense for the three-month and six-month periods ended June 30, 2009 increased by \$2.2 million, or 16%, and \$1.5 million, or 6%, respectively, as compared to the respective prior year periods. The increases were primarily attributable to a \$1.9 million expense incurred during the quarter ended June 30, 2009 in connection with a separation agreement with our Senior Vice President of Operations.

**Other Income, Net**

Other income, net, for the three-month and six-month periods ended June 30, 2009 and 2008 was as follows (in millions):

	<b>Three Months Ended</b>		<b>Six Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>	<b><u>2009</u></b>	<b><u>2008</u></b>
Interest income	\$ .4	\$3.7	\$ 1.1	\$ 8.7
Interest expense, net:				
Interest expense	(5.3)	(5.1)	(10.6)	(10.8)
Capitalized interest	5.3	5.1	10.6	10.8
<hr/>				
Other, net	--	--	--	--
	6.5	3.1	1.5	2.6
<hr/>				
	\$6.9	\$6.8	\$ 2.6	\$11.3
<hr/>				

Interest income for the three-month and six-month periods ended June 30, 2009 declined as compared to the respective prior year periods due to lower average interest rates, partially offset by an increase in amounts invested. Interest expense for the three-month and six-month periods ended June 30, 2009 was comparable with prior year periods.

Other, net, for the three-month and six-month periods ended June 30, 2009 included net foreign currency exchange gains of \$6.5 million and \$500,000, respectively.

Other, net, for the quarter ended June 30, 2008 included net foreign currency exchange gains of \$3.3 million. Other, net, for the six-month period ended June 30, 2008 included net foreign currency exchange gains of \$5.8 million, partially offset by \$3.3 million of unrealized losses associated with the valuation of our auction rate securities. See Note 7 to our condensed consolidated financial statements for additional information on the fair value measurement of our auction rate securities.

**Provision for Income Taxes**

The provision for income taxes for the quarter ended June 30, 2009 declined by \$15.5 million as compared to the prior year quarter. The decline was attributable to decreased profitability and a decrease in the effective tax rate from 18.3% for the quarter ended June 30, 2008 to 17.8% for the quarter ended June 30, 2009. The decline in the effective rate was primarily due to the impact of a \$6.2 million net benefit resulting from the finalization of a prior period tax return, partially offset by a decline in the relative portion of our earnings generated by our international subsidiaries whose earnings are being permanently reinvested and taxed at lower rates.

The provision for income taxes for the six-month period ended June 30, 2009 declined by \$17.8 million as compared to the prior year period. The decline was primarily attributable to decreased profitability, partially offset by an increase in the effective tax rate from 18.1% for the six-month period ended June 30, 2008 to 18.9% for the six-month period ended June 30, 2009, primarily due to a decline in the relative portion of our earnings generated by our international subsidiaries as noted above.

**Discontinued Operations***ENSCO 69*

From May 2007 to June 2009, ENSCO 69 was contracted to Petrosucre, a subsidiary of PDVSA, the national oil company of Venezuela. PDVSA subsidiaries reportedly lack funds and, since late 2008, generally have not been paying their contractors and service providers. In January 2009, we suspended drilling operations on ENSCO 69 after Petrosucre failed to satisfy its contractual obligations and meet commitments relative to the payment of past due invoices. Petrosucre then took over complete control of ENSCO 69 drilling operations utilizing Petrosucre employees and a portion of the Venezuelan rig crews we had utilized. When Petrosucre initially advised us that it temporarily was taking over operations on the rig, we placed our supervisory rig personnel on ENSCO 69 to observe Petrosucre's operations.

**Table of Contents**

On April 30, 2009, we submitted a notice of termination to Petrosucre for non-payment of past due invoices. The terms of the ENSCO 69 drilling contract provided for termination of the contract upon Petrosucre's failure to satisfy its contractual payment obligations during the 30-day period subsequent to our notice. On June 4, 2009, after Petrosucre's failure to satisfy its contractual payment obligations, failure to reach a mutually acceptable agreement with us and denial of our request to demobilize ENSCO 69 from Venezuela, Petrosucre advised that it would not return the rig and would continue to operate it without our consent. Petrosucre further advised that it would release ENSCO 69 after a six-month period, subject to a mutually agreed accord addressing the resolution of all remaining obligations under the ENSCO 69 drilling contract. On June 6, 2009, we terminated our contract with Petrosucre and removed all remaining EnSCO employees from the rig.

Due to Petrosucre's longstanding failure to satisfy its contractual obligations and meet payment commitments, and in consideration of the Venezuelan government's recent nationalization of assets owned by international oil and gas companies and oilfield service companies, we believe it is remote that ENSCO 69 will be returned to us by Petrosucre and operated again by EnSCO. We have filed an insurance claim under our package policy, which includes coverage for certain political risks, and are evaluating legal remedies against Petrosucre for contractual and other ENSCO 69 related damages. ENSCO 69 operating results for the three-month and six-month periods ended June 30, 2009 and 2008 were reclassified as discontinued operations in our condensed consolidated statements of income. See Note 8 to our condensed consolidated financial statements for additional information on ENSCO 69.

*ENSCO 74*

In September 2008, ENSCO 74 was lost as a result of Hurricane Ike. Thereafter, we conducted extensive aerial and sonar reconnaissance but failed to locate the rig hull. The rig was a total loss, as defined under the terms of our insurance policies. In March 2009, the sunken hull of ENSCO 74 was located on the seabed approximately 95 miles from the original drilling location when it was reportedly struck by an oil tanker. The operating results of ENSCO 74 were reclassified as discontinued operations in our condensed consolidated statements of income for the three-month and six-month periods ended June 30, 2008. See Note 9 to our condensed consolidated financial statements for additional information on the loss of ENSCO 74.

The following table summarizes our (loss) income from discontinued operations for the three-month and six-month periods ended June 30, 2009 and 2008 (in millions):

	<b>Three Months Ended</b>		<b>Six Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Revenues	\$ --	\$27.7	\$ 4.8	\$48.1
Operating expenses	9.3	11.9	19.6	24.1
Operating (loss) income before income taxes	(9.3)	15.8	(14.8)	24.0
Income tax expense	3.8	6.0	2.0	9.3
Loss on disposal of discontinued operations, net	(11.8)	--	(11.8)	--
(Loss) income from discontinued operations	\$(24.9)	\$ 9.8	\$(28.6)	\$14.7

**Fair Value Measurements**

Our auction rate securities were measured at fair value as of June 30, 2009 and December 31, 2008 using significant Level 3 inputs. See Note 7 to our condensed consolidated financial statements for additional information on our fair value measurements.

## **Table of Contents**

As a result of continued auction failures, quoted prices for our auction rate securities did not exist as of June 30, 2009 and, accordingly, we concluded that Level 1 inputs were not available. We determined that use of a valuation model was the best available technique for measuring the fair value of our auction rate securities. We used an income approach valuation model to estimate the price that would be received in exchange for our auction rate securities in an orderly transaction between market participants ("exit price") as of June 30, 2009. The exit price was derived as the weighted-average present value of expected cash flows over various periods of illiquidity, using a risk-adjusted discount rate that was based on the credit risk and liquidity risk of our auction rate securities.

While our valuation model was based on both Level 2 (credit quality and interest rates) and Level 3 inputs, we determined that Level 3 inputs were most significant to the overall fair value measurement, particularly the estimates of risk-adjusted discount rates and ranges of expected periods of illiquidity. We reviewed these inputs to our valuation model, evaluated the results and performed sensitivity analysis on key assumptions. Based on our review, we concluded that the fair value measurement of our auction rate securities as of June 30, 2009 was appropriate.

Based on the results of our June 30, 2009 fair value measurement, we recognized unrealized losses of \$100,000 and \$300,000 for the three-month and six-month periods ended June 30, 2009, respectively, which were largely offset by the reversal of unrealized losses associated with \$300,000 and \$2.6 million (par value) of auction rate securities redeemed at par during the three-month and six-month periods ended June 30, 2009, respectively. Net unrealized losses on our auction rate securities were included in other income, net, in our condensed consolidated statements of income.

The carrying values of our auction rate securities, classified as long-term investments on our condensed consolidated balance sheets, were \$61.6 million and \$64.2 million as of June 30, 2009 and December 31, 2008, respectively. We anticipate realizing the \$69.7 million (par value) of our auction rate securities on the basis that we intend to hold them until they are redeemed, repurchased or sold in a market that facilitates orderly transactions.

Assets measured at fair value using significant Level 3 inputs constituted 1% of our total assets as of June 30, 2009 and December 31, 2008.

## **LIQUIDITY AND CAPITAL RESOURCES**

Although our business has historically been very cyclical, we have relied on our cash flow from continuing operations to meet liquidity needs and fund the majority of our cash requirements. We have maintained a strong financial position through the disciplined and conservative use of debt. A substantial portion of our cash flow is invested in the expansion and enhancement of our fleet of drilling rigs in general and construction of our ENSCO 8500 Series® rigs in particular.

We believe the current global economic crisis and depressed oil and natural gas prices will lead to a continued decline in jackup rig utilization and day rates during the remainder of 2009, the extent of which is currently unknown. It is likely that this will result in a decline in our cash flow from operations during the remainder of 2009 and possibly beyond. Based on our \$882.0 million of cash and cash equivalents as of June 30, 2009 and our current contractual backlog, we believe our remaining \$1,356.0 million of contractual obligations associated with the construction of our ENSCO 8500 Series® rigs will be fully or substantially funded from existing cash and cash equivalents and future operating cash flow. We may decide to access debt markets to raise additional capital or increase liquidity as necessary.

During the six-month period ended June 30, 2009, our primary source of cash was \$586.2 million generated from continuing operations. Our primary uses of cash for the same period included \$471.5 million for the construction, enhancement and other improvement of our drilling rigs, including \$328.5 invested in the construction of our ENSCO 8500 Series® rigs.

**Table of Contents**

During the six-month period ended June 30, 2008, our primary source of cash was \$396.4 million generated from continuing operations. Our primary uses of cash for the same period included \$414.7 million for the construction, enhancement and other improvement of our drilling rigs, including \$345.3 million invested in the construction of our ENSCO 8500 Series® rigs, and \$111.2 million for the repurchase of our common stock.

Detailed explanations of our liquidity and capital resources for the six-month periods ended June 30, 2009 and 2008 are set forth below.

**Cash Flow and Capital Expenditures**

Our cash flow from continuing operations and capital expenditures on continuing operations for the six-month periods ended June 30, 2009 and 2008 were as follows (in millions):

	<b>Six Months Ended</b>	
	<b>June 30,</b>	
	<b><u>2009</u></b>	<b><u>2008</u></b>
Cash flow from continuing operations	\$586.2	\$396.4
Capital expenditures on continuing operations		
New rig construction	\$328.5	\$345.3
Rig enhancements	88.3	22.1
Minor upgrades and improvements	54.7	47.3
	\$471.5	\$414.7

Cash flow from continuing operations increased by \$189.8 million, or 48%, for the six-month period ended June 30, 2009 as compared to the prior year period. The increase resulted primarily from a \$148.3 million decline in tax payments and a \$75.9 million decline in our investment in trading securities, offset by a \$30.0 million decline in cash receipts from contract drilling services.

We continue to expand the size and quality of our drilling rig fleet. We have five ENSCO 8500 Series® ultra-deepwater semisubmersible rigs under construction with scheduled delivery dates in the first and fourth quarters of 2010, the second half of 2011 and the first and second half of 2012. Two of the five rigs under construction have secured long-term drilling contracts in the Gulf of Mexico, and three are presently without contracts.

Based on our current projections, we expect capital expenditures during 2009 to include approximately \$530.0 million for construction of our ENSCO 8500® Series rigs, approximately \$160.0 million for rig enhancement projects and approximately \$100.0 million for minor upgrades and improvements. Depending on market conditions and opportunities, we may make additional capital expenditures to upgrade rigs and construct or acquire additional rigs.

**Table of Contents****Financing and Capital Resources**

Our long-term debt, total capital and long-term debt to total capital ratios as of June 30, 2009 and December 31, 2008 are summarized below (in millions, except percentages):

	<b><u>June 30,</u></b> <b><u>2009</u></b>	<b><u>December 31,</u></b> <b><u>2008</u></b>
Long-term debt	\$ 265.7	\$ 274.3
Total capital*	\$5,387.2	\$4,951.2
Long-term debt to total capital	4.9%	5.5%

\*Total capital consists of long-term debt and Ensco stockholders' equity.

We have a \$350.0 million unsecured revolving credit facility (the "Credit Facility") with a syndicate of banks that matures in June 2010. We had no amounts outstanding under the Credit Facility as of June 30, 2009 and December 31, 2008. We filed a Form S-3 Registration Statement with the SEC on January 13, 2009, which provides us the ability to issue debt and/or equity securities. The registration statement was immediately effective and expires in January 2012. We currently maintain an investment grade credit rating of Baa1 from Moody's Investors Service and BBB+ from Standard & Poor's Ratings Services.

As of June 30, 2009, we had an aggregate \$134.1 million outstanding under two separate bond issues guaranteed by the United States Maritime Administration which require semiannual principal and interest payments. We also make semiannual interest payments on \$150.0 million of 7.20% debentures due during 2027.

Our Board of Directors has authorized the repurchase of up to \$1,500.0 million of our common stock. From inception of our stock repurchase programs in March 2006 through December 31, 2008, we repurchased an aggregate 16.5 million shares at a cost of \$937.6 million (an average cost of \$56.79 per share). No shares were repurchased under our Board-authorized stock repurchase programs during the six-month period ended June 30, 2009. As of June 30, 2009, \$562.4 million remained available for repurchases of our outstanding common stock under Board-authorized stock repurchase programs.

**Liquidity**

Our liquidity position as of June 30, 2009 and December 31, 2008 is summarized in the table below (in millions, except ratios):

	<b><u>June 30,</u></b> <b><u>2009</u></b>	<b><u>December 31,</u></b> <b><u>2008</u></b>
Cash and cash equivalents	\$ 882.0	\$789.6
Working capital	\$1,082.4	\$973.0
Current ratio	3.4	3.3

We expect to fund our short-term liquidity needs, including contractual obligations and anticipated capital expenditures, as well as any dividends, stock repurchases or working capital requirements, from our cash and cash equivalents and operating cash flow. We expect to fund our long-term liquidity needs, including contractual obligations, anticipated capital expenditures and dividends, from our cash and cash equivalents, investments, operating cash flow and, if necessary, funds borrowed under future financing arrangements.

## **Table of Contents**

We believe the current global economic crisis and depressed oil and natural gas prices will lead to a continued decline in our cash flow from operations during the remainder of 2009 and possibly beyond. Based on our \$882.0 million of cash and cash equivalents as of June 30, 2009 and our current contractual backlog, we believe our remaining \$1,356.0 million of contractual obligations associated with the construction of our ENSCO 8500 Series® rigs will be fully or substantially funded from existing cash and cash equivalents and future operating cash flow. We may decide to access debt markets to raise additional capital or increase liquidity as necessary.

In addition to \$882.0 million of cash and cash equivalents, we also held \$69.7 million (par value) of investments in auction rate securities as of June 30, 2009, which were classified as long-term investments on our condensed consolidated balance sheet. Although we acquired these securities with the intention of selling them in the near-term, we plan to hold them until they can be redeemed by issuers, repurchased by brokerage firms or sold in a market that facilitates orderly transactions. We do not expect to experience liquidity problems if we hold these securities indefinitely.

## **MARKET RISK**

### *Derivatives*

We use derivatives to reduce our exposure to various market risks, primarily foreign currency risk. We maintain a foreign currency risk management strategy that utilizes derivatives to reduce our exposure to unanticipated fluctuations in earnings and cash flows caused by changes in foreign currency exchange rates. We occasionally employ an interest rate risk management strategy that utilizes derivatives to minimize or eliminate unanticipated fluctuations in earnings and cash flows arising from changes in, and volatility of, interest rates.

We utilize derivatives to hedge forecasted foreign currency denominated transactions, primarily to reduce our exposure to foreign currency risk associated with the portion of our remaining ENSCO 8500 Series® construction obligations denominated in Singapore dollars and contract drilling expenses denominated in various other currencies. As of June 30, 2009, approximately \$305.5 million of the aggregate remaining contractual obligations associated with our ENSCO 8500 Series® construction projects was denominated in Singapore dollars, of which \$255.0 million was hedged through foreign currency forward contracts.

We have net assets and liabilities denominated in numerous foreign currencies and use various methods to manage our exposure to changes in foreign currency exchange rates. We predominantly structure our drilling contracts in U.S. dollars, which significantly reduces the portion of our cash flows and assets denominated in foreign currencies. We also employ various strategies, including the use of derivatives, to match foreign currency denominated assets with equal or near equal amounts of foreign currency denominated liabilities, thereby minimizing exposure to earnings fluctuations caused by changes in foreign currency exchange rates.

We utilize derivative instruments and undertake foreign currency hedging activities in accordance with our established policies for the management of market risk. We minimize our credit risk relating to the counterparties of our derivatives by transacting with multiple, high-quality financial institutions, thereby limiting exposure to individual counterparties, and by monitoring the financial condition of our counterparties. We do not enter into derivative instruments for trading or other speculative purposes. We believe that our use of derivative instruments and related hedging activities does not expose us to material foreign currency risk, interest rate risk, commodity price risk, credit risk or any other material market or price risk.

As of June 30, 2009, we had foreign currency forward contracts outstanding to exchange an aggregate \$462.8 million for various foreign currencies, including \$270.2 million for Singapore dollars. If we were to incur a hypothetical 10% adverse change in foreign currency exchange rates, net unrealized losses associated with our foreign currency denominated assets and liabilities and related foreign currency forward contracts as of June 30, 2009 would approximate \$39.6 million, including \$26.8 million related to our Singapore dollar exposures. All of our foreign currency forward contracts mature during the next three years.

## **Table of Contents**

### *Auction Rate Securities*

We have generated a substantial cash balance, portions of which are invested in securities that meet our requirements for quality and return. Investment of our cash exposes us to market risk. We held \$69.7 million (par value) of auction rate securities with a carrying value of \$61.6 million as of June 30, 2009. We intend to hold these securities until they can be redeemed by issuers, repurchased by brokerage firms or sold in a market that facilitates orderly transactions. Due to significant uncertainties related to the auction rate securities market, we will be exposed to the risk of changes in the fair value of these securities in future periods.

To measure the fair value of our auction rate securities as of June 30, 2009, we used an income approach valuation model to estimate the price that would be received in exchange for our auction rate securities in an orderly transaction between market participants ("exit price"). The exit price was derived as the weighted-average present value of expected cash flows over various periods of illiquidity, using a risk-adjusted discount rate that was based on the credit risk and liquidity risk of our auction rate securities. If we were to incur a hypothetical 10% adverse change in the periods of illiquidity and a 10% adverse change in the risk-adjusted discount rate, the additional net unrealized losses on our auction rate securities as of June 30, 2009 would approximate \$2.1 million. See Note 7 to our condensed consolidated financial statements for additional information on our auction rate securities.

## **CRITICAL ACCOUNTING POLICIES**

The preparation of our consolidated financial statements and related disclosures in conformity with GAAP requires management to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Our significant accounting policies are included in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2008 included in our Annual Report on Form 10-K filed with the SEC on February 26, 2009. These policies, along with our underlying judgments and assumptions made in their application, have a significant impact on our consolidated financial statements. We identify our critical accounting policies as those that are the most pervasive and important to the portrayal of our financial position and operating results, and that require the most difficult, subjective and/or complex judgments by management regarding estimates in matters that are inherently uncertain. Our critical accounting policies are those related to property and equipment, impairment of long-lived assets and goodwill and income taxes.

### *Property and Equipment*

As of June 30, 2009, the carrying value of our property and equipment totaled \$4,234.2 million, which represented 67% of total assets. This carrying value reflects the application of our property and equipment accounting policies, which incorporate management's estimates, judgments and assumptions relative to the capitalized costs, useful lives and salvage values of our rigs.

We develop and apply property and equipment accounting policies that are designed to appropriately and consistently capitalize those costs incurred to enhance, improve and extend the useful lives of our assets and expense those costs incurred to repair or maintain the existing condition or useful lives of our assets. The development and application of such policies requires judgments and assumptions by management relative to the nature of, and benefits from, expenditures on our assets. We establish property and equipment accounting policies that are designed to depreciate our assets over their estimated useful lives. The judgments and assumptions used by management in determining the estimated useful lives of our property and equipment reflect both historical experience and expectations regarding future operations, utilization and performance of our assets. The use of different estimates, judgments and assumptions in the establishment of our property and equipment accounting policies, especially those involving the useful lives of our rigs, would likely result in materially different carrying values of assets and operating results.

For additional information on the useful lives of our drilling rigs, including an analysis of the impact of various changes in useful life assumptions, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates" in Part II of our Annual Report on Form 10-K for the year ended December 31, 2008.

## **Table of Contents**

### *Impairment of Long-Lived Assets and Goodwill*

We evaluate the carrying value of our property and equipment, primarily our drilling rigs, when events or changes in circumstances indicate that the carrying value of such rigs may not be recoverable. Generally, extended periods of idle time and/or inability to contract rigs at economical rates are an indication that a rig may be impaired. However, the offshore drilling industry has historically been highly cyclical, and it is not unusual for rigs to be unutilized or underutilized for significant periods of time and subsequently resume full or near full utilization when business cycles change. Likewise, during periods of supply and demand imbalance, rigs are frequently contracted at or near cash break-even rates for extended periods of time until day rates increase when demand comes back into balance with supply. Impairment situations may arise with respect to specific individual rigs, groups of rigs, such as a specific type of drilling rig, or rigs in a certain geographic location. Our rigs are mobile and may generally be moved from markets with excess supply, if economically feasible. Our jackup rigs and ultra-deepwater semisubmersible rigs are suited for, and accessible to, broad and numerous markets throughout the world.

We test goodwill for impairment on an annual basis, or when events or changes in circumstances indicate that a potential impairment exists. The goodwill impairment test requires us to identify reporting units and estimate the fair value of those units as of the testing date. Our four operating segments represent our reporting units in accordance with SFAS No. 142, "Goodwill and Other Intangible Assets (as amended)". In most instances, our calculation of the fair value of our reporting units is based on estimates of future discounted cash flows to be generated by our drilling rigs, which reflect management's judgments and assumptions regarding future industry conditions and operations, including expected utilization, day rates, expense levels and capital requirements for each of our drilling rigs. If the aggregate fair value of our reporting units exceeds our market capitalization, we evaluate the reasonableness of the implied control premium which includes a comparison to implied control premiums from recent market transactions within our industry or other relevant benchmark data. To the extent that the implied control premium based on the aggregate fair value of our reporting units is not reasonable, we adjust the discount rate used in our discounted cash flow model and reduce the estimated fair values of our reporting units accordingly.

If the estimated fair value of a reporting unit exceeds its carrying value, its goodwill is considered not impaired. If the estimated fair value of a reporting unit is less than its carrying value, we estimate the implied fair value of the reporting unit's goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to such excess. In the event we dispose of drilling rig operations that constitute a business, goodwill would be allocated in the determination of gain or loss on disposal. Based on our goodwill impairment test performed as of December 31, 2008, there was no impairment of goodwill.

If the global economic environment continues to deteriorate and/or our expectations relative to future offshore drilling industry conditions decline, we may conclude that the fair value of one or more of our reporting units has more-likely-than-not declined below its carrying amount and perform a goodwill impairment test. If, at the time of the goodwill impairment test, management's judgments and assumptions regarding future industry conditions and operations have diminished, or if the market value of our common stock has declined, we may conclude that the goodwill of one or more of our reporting units has been impaired. It is reasonably possible that the judgments and assumptions inherent in our goodwill impairment test may change in response to future market conditions.

Asset impairment evaluations are, by nature, highly subjective. In most instances they involve expectations of future cash flows to be generated by our drilling rigs, which reflect management's judgments and assumptions regarding future industry conditions and operations, as well as management's estimates of expected utilization, day rates, expense levels and capital requirements. The estimates, judgments and assumptions used by management in the application of our asset impairment policies reflect both historical experience and an assessment of current operational, industry, market, economic and political environments. The use of different estimates, judgments, assumptions and expectations regarding future industry conditions and operations would likely result in materially different asset carrying values and operating results.

**Table of Contents**

*Income Taxes*

We conduct operations and earn income in numerous international countries and are subject to the laws of tax jurisdictions within those countries, as well as U.S. Federal and state tax laws. As of June 30, 2009, we had a \$344.1 million net deferred income tax liability, a \$16.2 million liability for income taxes currently payable and a \$33.4 million liability for unrecognized tax benefits.

The carrying values of deferred income tax assets and liabilities reflect the application of our income tax accounting policies in accordance with SFAS No. 109, "Accounting for Income Taxes" ("SFAS 109"), and are based on management's estimates, judgments and assumptions regarding future operating results and levels of taxable income, as well as management's judgments regarding the interpretation of the provisions of SFAS 109. Carryforwards and tax credits are assessed for realization as a reduction of future taxable income by using a more-likely-than-not determination.

In December 2007, substantially all of the undistributed earnings of our non-U.S. subsidiaries were distributed to our U.S. parent. A U.S. deferred tax liability has not been recognized for the remaining undistributed earnings of our non-U.S. subsidiaries because it is their intention to reinvest such earnings indefinitely. Should our non-U.S. subsidiaries elect to make a distribution of these earnings, or be deemed to have made a distribution of them through application of various provisions of the Internal Revenue Code, we may be subject to additional U.S. income taxes.

The carrying values of liabilities for income taxes currently payable and unrecognized tax benefits reflect our application of the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109", and are based on management's interpretation of applicable tax laws and incorporate management's estimates, judgments and assumptions regarding the use of tax planning strategies in various taxing jurisdictions. The use of different estimates, judgments and assumptions in connection with accounting for income taxes, especially those involving the deployment of tax planning strategies, may result in materially different carrying values of income tax assets and liabilities and operating results.

We operate in many international jurisdictions where tax laws relating to the offshore drilling industry are not well developed. In jurisdictions where available statutory law and regulations are incomplete or underdeveloped, we obtain professional guidance and consider existing industry practices before utilizing tax planning strategies and meeting our tax obligations.

## **Table of Contents**

Tax returns are routinely subject to audit in most jurisdictions and tax liabilities are occasionally finalized through a negotiation process. While we have not historically experienced significant adjustments to previously recognized tax assets and liabilities as a result of finalizing tax returns, there can be no assurance that significant adjustments will not arise in the future. In addition, there are several factors that could cause the future level of uncertainty relating to our tax liabilities to increase, including the following:

- During recent years, the portion of our overall operations conducted in international tax jurisdictions has increased, and we currently anticipate that this trend will continue.
- In order to utilize tax planning strategies and conduct international operations efficiently, our subsidiaries frequently enter into transactions with affiliates that are generally subject to complex tax regulations and are frequently reviewed by tax authorities.
- We may conduct future operations in certain tax jurisdictions where tax laws are not well developed, and it may be difficult to secure adequate professional guidance.
- Tax laws, regulations, agreements and treaties change frequently, requiring us to modify existing tax strategies to conform to such changes.

## **NEW ACCOUNTING PRONOUNCEMENTS**

In June 2009, the FASB issued SFAS No. 168, "The 'FASB Accounting Standards Codification' and the Hierarchy of Generally Accepted Accounting Principles" ("SFAS 168"). SFAS 168 establishes the "FASB Accounting Standards Codification" ("Codification"), as the source of authoritative U.S. GAAP recognized by the FASB for non-governmental entities. All existing accounting standards will be superseded and accounting literature not included in the Codification will be considered non-authoritative. Subsequent issuances of new standards will be in the form of Accounting Standards Updates that will be included in the Codification. Generally, the Codification is not expected to change U.S. GAAP. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. Adoption of SFAS 168 will require us to adjust references to authoritative accounting literature in our financial statements, but will not affect our financial position, operating results or cash flows.

### **Item 3. *Quantitative and Qualitative Disclosures About Market Risk***

Information required under Item 3. has been incorporated into "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk".

### **Item 4. *Controls and Procedures***

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures, as defined in Rule 13a-15 under the Securities and Exchange Act of 1934 (the "Exchange Act"), are effective.

During the fiscal quarter ended June 30, 2009, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents**

**PART II - OTHER INFORMATION**

**Item 1. *Legal Proceedings***

*FCPA Internal Investigation*

Following disclosures by other offshore service companies announcing internal investigations involving the legality of amounts paid to and by customs brokers in connection with temporary importation of rigs and vessels into Nigeria, the Audit Committee of our Board of Directors and management commenced an internal investigation in July 2007. The investigation initially focused on our payments to customs brokers relating to the temporary importation of ENSCO 100, our only rig that recently operated offshore Nigeria.

As is customary for companies operating offshore Nigeria, we had engaged independent customs brokers to process customs clearance of routine shipments of equipment, materials and supplies and to process the ENSCO 100 temporary importation permits, extensions and renewals. One or more of the customs brokers that our subsidiary in Nigeria used to obtain the ENSCO 100 temporary import permits, extensions and renewals also provided this service to other offshore service companies that have undertaken Foreign Corrupt Practices Act ("FCPA") compliance internal investigations.

The principal purpose of our investigation was to determine whether any of the payments made to or by our customs brokers were inappropriate under the anti-bribery provisions of the FCPA or whether any violations of the recordkeeping or internal accounting control provisions of the FCPA occurred. Our Audit Committee engaged a Washington, D.C. law firm with significant experience in investigating and advising upon FCPA matters to assist in the internal investigation.

Following notification to the Audit Committee and to KPMG LLP, our independent registered public accounting firm, in consultation with the Audit Committee's outside legal counsel, we voluntarily notified the United States Department of Justice and SEC that we had commenced an internal investigation. We expressed our intention to cooperate with both agencies, comply with their directives and fully disclose the results of the investigation. The internal investigation process has involved extensive reviews of documents and records, as well as production to the authorities, and interviews of relevant personnel. In addition to the temporary importation of ENSCO 100, the investigation has examined our customs clearance of routine shipments and immigration activities in Nigeria.

Our internal investigation has essentially been concluded. A meeting to review the results of the investigation with the authorities was held on February 24, 2009. We expect to discuss a possible negotiated disposition with the authorities during the second half of 2009. It currently is anticipated that the matter will be concluded within that period.

Although we believe the U.S. authorities will take into account our voluntary disclosure, our cooperation with the agencies and the remediation and compliance enhancement activities that are underway, we are unable to predict the ultimate disposition of this matter, whether we will be charged with violation of the anti-bribery, recordkeeping or internal accounting control provisions of the FCPA or whether the scope of the investigation will be extended to other issues in Nigeria or to other countries. We also are unable to predict what potential corrective measures, fines, sanctions or other remedies, if any, the agencies may seek against us or any of our employees.

**Table of Contents**

In November 2008, our Board of Directors approved enhanced FCPA compliance recommendations issued by the Audit Committee's outside counsel, and the Company embarked upon an enhanced compliance initiative that included appointment of a Chief Compliance Officer and a Director - Corporate Compliance. We have engaged consultants to assist us in implementing the compliance recommendations approved by our Board of Directors, which will include an enhanced compliance policy, increased training and testing, prescribed contractual provisions for our service providers that interface with foreign government officials, due diligence for the selection of such service providers and an increased Company-wide awareness initiative that includes periodic issuance of FCPA Alerts.

Since ENSCO 100 completed its contract commitment and departed Nigeria in August 2007, this matter is not expected to have a material effect on or disrupt our current operations. As noted above, we are unable to predict the outcome of this matter or estimate the extent to which we may be exposed to any resulting potential liability, sanctions or significant additional expense.

*ENSCO 74 Loss*

In September 2008, ENSCO 74 was lost as a result of Hurricane Ike and was presumed to have sunk in the Gulf of Mexico, however, portions of its legs remained underwater adjacent to the customer's platform. Thereafter, we conducted extensive aerial and sonar reconnaissance but failed to locate the rig hull. The rig was a total loss, as defined under the terms of our insurance policies.

In March 2009, the sunken rig hull of ENSCO 74 was located on the seabed approximately 95 miles from the original drilling location when it was reportedly struck by the oil tanker SKS Satilla. Following discovery of the sunken rig hull, we removed the hydrocarbons remaining onboard and began planning for removal of the wreckage. As an interim measure, the wreckage has been appropriately marked, and the U.S. Coast Guard has issued a Notice to Mariners.

On March 18, 2009, SKS OBO & Tankers AS and Kristen Gehard Jebsen Skipsrederi AS, the owner and manager of the SKS Satilla, commenced civil litigation in the U.S. District Court for the Southern District of Texas against us seeking monetary damages in the aggregate amount of \$10.0 million for losses incurred. Based on information currently available, primarily the adequacy of available defenses, we have not concluded that it is probable a liability exists with respect to the claim of the tanker owner.

We have liability insurance policies that provide coverage for third-party claims such as the tanker and pipeline claims, subject to a \$10.0 million per occurrence self-insured retention (in the event of multiple occurrences the self-insured retention is \$15.0 million for two occurrences and \$1.0 million for each occurrence thereafter) and an annual aggregate limit of \$500.0 million. Although we do not expect the final disposition of the claim associated with the ENSCO 74 loss to have a material adverse effect upon our financial position, operating results or cash flows, there can be no assurances as to the ultimate outcome.

**Table of Contents**

*ENSCO 29 Wreck Removal*

A portion of the ENSCO 29 platform drilling rig was lost over the side of a customer's platform as a result of Hurricane Katrina during 2005. Although beneficial ownership of ENSCO 29 was transferred to our insurance underwriters when the rig was determined to be a total loss, management believes we may be legally required to remove ENSCO 29 wreckage and debris from the seabed and currently estimates that the removal cost could range from \$5.0 million to \$15.0 million. Our property insurance policies include coverage for ENSCO 29 wreckage and debris removal costs up to \$3.8 million. We also have liability insurance policies that provide specified coverage for wreckage and debris removal costs in excess of the \$3.8 million coverage provided under our property insurance policies.

Our liability insurance underwriters have issued letters reserving rights and effectively denying coverage by questioning the applicability of coverage for the potential ENSCO 29 wreckage and debris removal costs. In August 2007, we commenced litigation in the Texas District Court of Dallas County against certain underwriters at Lloyd's of London and other insurance companies, Bryan Johnson and BC Johnson Associates, LLC (collectively "the Underwriters") alleging breach of contract, wrongful denial, bad faith and other claims which seek a declaration that removal of wreckage and debris is covered under our liability insurance, monetary damages, attorneys' fees and other remedies. The Underwriters removed the case to the United States District Court for the Northern District of Texas, Dallas Division. The case was then remanded back to the Texas District Court by the United States District Court. The Underwriters subsequently appealed the remand to the United States Court of Appeals. The litigation is in an early stage and is currently pending a decision from the United States Court of Appeals.

While we anticipate that any ENSCO 29 wreckage and debris removal costs incurred will be largely or fully covered by insurance, a \$1.2 million provision, representing the portion of the \$5.0 million low end of the range of estimated removal cost we believe is subject to liability insurance coverage, was recognized during 2006.

*Asbestos Litigation*

In August 2004, we and certain current and former subsidiaries were named as defendants, along with numerous other third-party companies as co-defendants, in three multi-party lawsuits filed in the Circuit Courts of Jones County (Second Judicial District) and Jasper County (First Judicial District), Mississippi. The lawsuits sought an unspecified amount of monetary damages on behalf of individuals alleging personal injury or death, primarily under the Jones Act, purportedly resulting from exposure to asbestos on drilling rigs and associated facilities during the period 1965 through 1986.

## **Table of Contents**

In compliance with the Mississippi Rules of Civil Procedure, the individual claimants in the original multi-party lawsuits whose claims were not dismissed were ordered to file either new or amended single plaintiff complaints naming the specific defendant(s) against whom they intended to pursue claims. As a result, out of more than 600 initial multi-party claims, we have been named as a defendant by 65 individual plaintiffs. Of these claims, 62 claims or lawsuits are pending in Mississippi state courts and three are pending in the U.S. District Court as a result of their removal from state court.

The Mississippi state court cases are under an informal stay of discovery issued by a Special Master presiding over these matters while discovery is conducted for a designated group of plaintiffs, several of which involve us. To date, written discovery and plaintiff depositions have taken place in seven cases pending against us. No further activity will occur in these cases until they are selected for trial. Currently, none of the cases pending against us in Mississippi have been set for trial. Plaintiffs and defendants have until August 15, 2009 to select plaintiffs to fill five trial settings during 2010.

The three cases pending in federal court were consolidated with 441 other lawsuits filed by a Houston law firm. These cases were referred to a Magistrate Judge, who ordered parties to conduct general discovery in these matters. Discovery specific to each plaintiff will take place at a later designated time, if deemed necessary by the parties and the court.

We intend to vigorously defend against these claims and have filed responsive pleadings preserving all defenses and challenges to jurisdiction and venue. However, discovery is still ongoing and, therefore, available information regarding the nature of all pending claims is limited. At present, we cannot reasonably determine how many of the claimants may have valid claims under the Jones Act or estimate a range of potential liability exposure, if any.

In addition to the pending cases in Mississippi, we have eight other asbestos or lung injury claims pending against us in litigation in various other jurisdictions. Although we do not expect the final disposition of the Mississippi and other asbestos lawsuits to have a material adverse effect upon our financial position, operating results or cash flows, there can be no assurances as to the ultimate outcome of the lawsuits.

### *Other Matters*

In addition to the foregoing, we are named defendants in certain other lawsuits, claims or proceedings incidental to our business and are involved from time to time as parties to governmental investigations or proceedings, including matters related to taxation, arising in the ordinary course of business. Although the outcome of such lawsuits or other proceedings cannot be predicted with certainty and the amount of any liability that could arise with respect to such lawsuits or other proceedings cannot be predicted accurately, management does not expect these matters to have a material adverse effect on our financial position, operating results or cash flows.

**Table of Contents**

**Item 1A. Risk Factors**

There are numerous factors that affect our business and results of operations, many of which are beyond our control. In addition to information set forth in this quarterly report, you should carefully read and consider "Item 1A. Risk Factors" in Part I and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II of our Annual Report on Form 10-K for the year ended December 31, 2008, which contains descriptions of significant factors that might cause the actual results of operations in future periods to differ materially from those currently anticipated or expected. Except as set forth below, there have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2008.

***THE POTENTIAL FOR GULF OF MEXICO HURRICANE RELATED WINDSTORM DAMAGE OR LIABILITIES COULD RESULT IN UNINSURED LOSSES AND MAY CAUSE US TO ALTER OUR OPERATING PROCEDURES DURING HURRICANE SEASON, WHICH COULD ADVERSELY AFFECT OUR BUSINESS.***

Certain areas in and near the Gulf of Mexico experience hurricanes and other extreme weather conditions on a relatively frequent basis. Some of our drilling rigs in the Gulf of Mexico are located in areas that could cause them to be susceptible to damage and/or total loss by these storms, and we have a larger concentration of jackup rigs in the Gulf of Mexico than most of our competitors. Damage caused by high winds and turbulent seas could result in rig loss or damage, termination of drilling contracts on lost or severely damaged rigs or curtailment of operations on damaged drilling rigs with reduced or suspended day rates for significant periods of time until the damage can be repaired. Moreover, even if our drilling rigs are not directly damaged by such storms, we may experience disruptions in our operations due to damage to our customers' platforms and other related facilities in the area. Our drilling operations in the Gulf of Mexico have been impacted by hurricanes, including the total loss of one jackup rig during 2004, one platform rig during 2005 and one jackup rig during 2008, with associated loss of contract revenues and potential liabilities. We currently have eight jackup rigs in the Gulf of Mexico (one of which will be relocated to Mexico during the third quarter of 2009), one ultra-deepwater semisubmersible rig in the Gulf of Mexico and one ultra-deepwater semisubmersible rig mobilizing to the Gulf of Mexico from Singapore.

Insurance companies incurred substantial losses in the offshore drilling, exploration and production industries as a consequence of hurricanes that occurred in the Gulf of Mexico during 2004, 2005 and 2008. Accordingly, insurance companies have substantially reduced the levels of insurance coverage available for losses arising from named tropical storm or hurricane damage in the Gulf of Mexico ("windstorm damage") and have dramatically increased the cost of windstorm coverage. In discussions with insurance brokers and underwriters concerning our 2009 mid-year, annual insurance renewal, we were advised that coverage for risks associated with Gulf of Mexico windstorm damage had limited capacity and would be very costly. The tight insurance market not only applies to coverage related to Gulf of Mexico windstorm damage or loss of our drilling rigs, but also impacts coverage for potential liabilities to third parties associated with property damage, personal injury or death and environmental liabilities as well as coverage for removal of wreckage and debris associated with hurricane losses.

**Table of Contents**

Upon renewal of our annual insurance policies effective July 1, 2009, we obtained \$450.0 million of annual coverage for our ultra-deepwater semisubmersible rig hull and machinery losses arising from Gulf of Mexico windstorm damage with a \$50.0 million per occurrence self-insured retention (deductible). However, due to the significant premium, high self-insured retention and limited coverage, we decided not to purchase windstorm insurance for our jackups remaining in the Gulf of Mexico. Accordingly, we have retained the risk for loss or damage of the eight jackup rigs remaining in the Gulf of Mexico arising out of windstorm damage.

Our current limited windstorm insurance coverage exposes us to a significant level of risk due to jackup rig damage or loss related to severe weather conditions caused by Gulf of Mexico hurricanes. Moreover, our current liability insurance policies only provide coverage for Gulf of Mexico windstorm exposures for removal of wreckage and debris in excess of \$50.0 million per occurrence as respects our jackup and ultra-deepwater semisubmersible rig operations.

We have established operational procedures designed to mitigate risk to our jackup rigs in the Gulf of Mexico during hurricane season. In addition to procedures designed to better secure the drilling package on jackup rigs, improve jackup leg stability and increase the air gap to position the hull above waves, our procedures involve analysis of prospective drilling locations, which may include enhanced bottom surveys. These procedures may result in a decision to decline to operate on a customer designated location during hurricane season notwithstanding that the location, water depth and other standard operating conditions are within a rig's normal operating range. Our procedures and the associated regulatory requirements addressing Mobile Offshore Drilling Unit operations in the Gulf of Mexico during hurricane season, coupled with our decision to retain (self-insure) certain windstorm related risks, may result in a significant reduction in the utilization of our jackup rigs in the Gulf of Mexico.

As noted above, we have a \$50.0 million per occurrence deductible for windstorm loss or damage to our ultra-deepwater semisubmersible rig in the Gulf of Mexico and have elected not to purchase loss or damage insurance coverage for our eight jackup rigs in the area. Moreover, we have retained the risk for the first \$50.0 million of liability exposure for removal of wreckage and debris resulting from windstorm related exposures associated with our rigs in the Gulf of Mexico. These retained exposures for property loss or damage and liabilities associated with Gulf of Mexico hurricanes could have a material adverse effect on our financial position, operating results and cash flows if we sustain significant uninsured or underinsured losses or liabilities as a result of Gulf of Mexico hurricanes.

**Table of Contents**

***THE LOSS OF ENSCO 74 MAY EXPOSE US TO COSTS ASSOCIATED WITH REMOVAL OF WRECKAGE AND DEBRIS, LIABILITIES FOR PROPERTY LOSS OR DAMAGE, PERSONAL INJURY OR DEATH OR ENVIRONMENTAL LIABILITIES THAT MAY NOT BE FULLY RECOVERABLE UNDER OUR INSURANCE OR CONTRACTUAL INDEMNITIES.***

In September 2008, ENSCO 74 was lost as a result of Hurricane Ike and was presumed to have sunk in the Gulf of Mexico, however, portions of its legs remained underwater adjacent to the customer's platform. Thereafter, we conducted extensive aerial and sonar reconnaissance but failed to locate the rig hull. In March 2009, the sunken rig hull of ENSCO 74 was located on the seabed approximately 95 miles from the original drilling location when it was reportedly struck by the oil tanker SKS Satilla. Following discovery of the sunken rig hull, we removed the hydrocarbons remaining onboard and began planning for removal of the wreckage. As an interim measure, the wreckage has been appropriately marked, and the U.S. Coast Guard has issued a Notice to Mariners.

We are involved in civil litigation in the U.S. District Court in the Southern District of Texas in which the owners of the tanker SKS Satilla are seeking monetary damages for losses incurred when the tanker reportedly struck the sunken hull of ENSCO 74. Additionally, we have received notice from counsel representing certain underwriters at Lloyd's of London and various London market insurance companies in a subrogation claim alleging that ENSCO 74 caused a pipeline owned by EPCO, Inc. to rupture during Hurricane Ike. The underwriters' counsel has advised that the notice was submitted due to the proximity (approximately 2 miles) of the pipeline to the sunken ENSCO 74 hull and the assumed path of the rig. We also recently received notice from legal counsel representing Sea Robin Pipeline Company, LLC, which reportedly sustained damages to a subsea pipeline. The letter asserts these unquantified damages may have been caused by ENSCO 74 in the aftermath of Hurricane Ike. We presently are unable to determine whether the damage to these pipelines was caused by ENSCO 74 or the extent of the repair cost and other losses associated with the damage.

We are exposed to costs associated with removal of wreckage or debris for the ENSCO 74 legs that remain underwater adjacent to the customer's platform and the sunken rig hull and related debris. Although we expect the cost of removal of the leg sections and the hull and related debris to be covered by available insurance and contractual indemnification, we may not be fully protected from such costs, liability or exposure. Moreover, although appropriately marked following issuance of a U.S. Coast Guard Notice to Mariners, the sunken hull of ENSCO 74 may expose us to liabilities as a hazard to navigation and may also expose us to various potential liabilities for property loss or damage, personal injury or death and environmental liabilities, including penalties, fines and clean-up costs.

Our liability insurance may not fully protect us from cost, liability or exposure associated with the loss of ENSCO 74, and is subject to a \$10.0 million per occurrence self-insured retention (in the event of multiple occurrences the self-insured retention is \$15.0 million for two occurrences and \$1.0 million for each occurrence thereafter) and an annual aggregate limit of \$500.0 million. See Note 8 and Note 9 to our condensed consolidated financial statements for additional information on the loss of ENSCO 74.

**Table of Contents**

***WE MAY INCUR ASSET IMPAIRMENTS AS A RESULT OF THE DETERIORATING GLOBAL ECONOMY AND THE POTENTIAL RESULTING DECLINE IN DEMAND FOR OFFSHORE DRILLING RIGS.***

We evaluate the carrying value of our property and equipment, primarily our drilling rigs, when events or changes in circumstances indicate that the carrying value of such rigs may not be recoverable. The offshore drilling industry historically has been highly cyclical, and it is not unusual for rigs to be unutilized or underutilized for significant periods of time and subsequently resume full or near full utilization when business cycles change. Likewise, during periods of supply and demand imbalance, rigs are frequently contracted at or near cash break-even rates for extended periods of time until day rates increase when demand comes back into balance with supply. However, if the global economic environment continues to deteriorate and the offshore drilling industry were to incur a significant prolonged downturn, impairment charges may occur with respect to specific individual rigs, groups of rigs, such as a specific type of drilling rig, or rigs in a certain geographic location.

We test goodwill for impairment on an annual basis, or when events or changes in circumstances indicate that a potential impairment exists. The goodwill impairment test requires us to identify reporting units and estimate the fair value of those units as of the testing date. In most instances, our calculation of the fair value of our reporting units is based on estimates of future discounted cash flows to be generated by our drilling rigs, which reflect management's judgments and assumptions regarding future industry conditions and operations, including expected utilization, day rates, expense levels and capital requirements for each of our drilling rigs. If the aggregate fair value of our reporting units exceeds our market capitalization, we evaluate the reasonableness of the implied control premium. If we determine the implied control premium is not reasonable, we adjust the discount rate in our discounted cash flow model and reduce the estimated fair values of our reporting units accordingly.

If the global economic environment continues to deteriorate and/or our expectations relative to future offshore drilling industry conditions decline, we may conclude that the fair value of one or more of our reporting units has more-likely-than-not decreased below its carrying amount and perform a goodwill impairment test. If, at the time of the goodwill impairment test, management's judgments and assumptions regarding future industry conditions and operations have diminished, or if the market value of our common stock has declined, we may conclude that the goodwill of one or more of our reporting units has been impaired.

***CHANGES IN LAWS, EFFECTIVE INCOME TAX RATES OR ADVERSE OUTCOMES RESULTING FROM EXAMINATION OF OUR TAX RETURNS COULD ADVERSELY AFFECT OUR FINANCIAL RESULTS.***

Our future effective income tax rates could be adversely affected by changes in tax laws, both domestically and internationally. The current U.S. administration has proposed sweeping tax reforms which would significantly increase the tax obligations of U.S. multi-national corporations such as Ensco. The proposed legislation, if enacted, would have a significant adverse effect on our financial position, operating results and cash flows.

Our future effective tax rates could also be adversely affected by lower than anticipated earnings in countries where we have lower statutory rates and higher than anticipated earnings in countries where we have higher statutory rates, by changes in the valuation of our deferred tax assets and liabilities or by changes in tax treaties, regulations, accounting principles or interpretations thereof in one or more countries in which we operate. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that such examinations will not have an adverse effect on our financial condition, operating results or cash flows.

**Table of Contents****Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds***

The table below provides a summary of our repurchases of common stock during the quarter ended June 30, 2009:

<b><u>Issuer Purchases of Equity Securities</u></b>				
<b><u>Period</u></b>	<b><u>Total Number of Shares Purchased</u></b>	<b><u>Average Price Paid per Share</u></b>	<b><u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u></b>	<b><u>Approximate Dollar Value of Shares that May Yet Be Purchased Under Plans or Programs</u></b>
April 1 - April 30	23,670	\$26.72	--	\$562,000,000
May 1 - May 31	9,059	34.53	--	\$562,000,000
June 1 - June 30	70,353	41.20	--	\$562,000,000
Total	103,082	\$37.29	--	

During the quarter ended June 30, 2009, our repurchases of common stock were from employees and directors in connection with the settlement of income tax withholding obligations arising from the vesting of share awards.

Our Board of Directors has authorized the repurchase of up to \$1,500.0 million of our common stock. No shares were repurchased under our Board-authorized stock repurchase programs during the quarter ended June 30, 2009.

**Table of Contents****Item 4. Submission of Matters to a Vote of Security Holders**

We held our Annual Meeting of Stockholders on May 28, 2009 (the "2009 Annual Meeting"). There were 141,815,649 shares of our common stock entitled to vote at the 2009 Annual Meeting based on the March 31, 2009 record date, of which 120,020,408 shares, or approximately 85%, were present and voting in person or by proxy at the 2009 Annual Meeting. The following matters, detailed descriptions of which were contained in our proxy statement dated April 14, 2009, were voted on at the 2009 Annual Meeting:

- (i) Election of three Class I Directors, each for a three-year term:

	<u><b>Votes For</b></u>	<u><b>Votes Against</b></u>	<u><b>Votes Abstain</b></u>
C. Christopher Gaut	113,397,563	6,549,547	73,298
Gerald W. Haddock	117,351,874	2,540,461	128,073
Paul E. Rowsey, III	118,266,019	1,678,210	76,179

The terms of the following Directors continued after the meeting: Daniel W. Rabun, J. Roderick Clark, David M. Carmichael, Thomas L. Kelly II, Keith O. Rattie and Rita M. Rodriguez.

- (ii) Approval of an amendment to the 2005 Long-Term Incentive Plan and reapproval of the material terms of the performance goals therein for purposes of Section 162(m) of the Internal Revenue Code:

<u><b>Votes For</b></u>	<u><b>Votes Against</b></u>	<u><b>Votes Abstain</b></u>	<u><b>Broker Non-Votes</b></u>
82,009,675	24,372,686	125,514	13,512,533

- (iii) Ratification of the Audit Committee's appointment of KPMG LLP as the Company's independent registered public accounting firm for 2009:

<u><b>Votes For</b></u>	<u><b>Votes Against</b></u>	<u><b>Votes Abstain</b></u>
119,251,406	715,570	53,432
