Item 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Period Ending June, 2004)
Unaudited financial data

Edgar Filing: PIONEER OIL & GAS - Form 10QSB

The discussion and analysis contained herein should be read in conjunction with the preceding financial statements and the information contained in the Company's 10KSB. Except for the historical information contained herein, the matters discussed in this 10 QSB contain forward looking statements within the meaning of Section 27a of the Securities Act of 1933, as amended, and Section 21e of the Securities Exchange Act of 1934, as amended, that are based on management's beliefs and assumptions, current expectations, estimates, and projections. Statements that are not historical facts, including without limitation statements which are preceded by, followed by or include the words "believes," "anticipates," "plans," "expects," "may," "should," or similar expressions are forward-looking statements. Many of the factors that will determine the company's future results are beyond the ability of the Company to control or predict. These statements are subject to risks and uncertainties and, therefore, actual results may differ materially. All subsequent written and oral forward-looking statements attributable to the Company, or persons acting on its behalf, are expressed qualified in their entirety by these cautionary statements. The Company disclaims any obligation to update any forward-looking statements whether as a result of new information, future events or otherwise.

Important factors that may include, but are not limited to: the risk of a significant natural disaster, the inability of the Company to insure against certain risks, fluctuations in commodity prices, the inherent limitations in the ability to estimate oil and gas reserves, changing government regulations, as well as general market conditions, competition and pricing, and other risks detailed from time to time in the Company's SEC reports, copies of which are available upon request from the Company.

Results of Operations -

Total Revenue for the third fiscal quarter decreased from \$884,825 in fiscal 2003 to \$463,503 in fiscal 2004. For the nine-month period revenues decreased from \$1,490,944 to \$1,233,044. The decrease in revenue for the three-month and nine-month periods was entirely due to lower project and lease sales income. Project and lease sale income decreased from \$504,348 to \$18,750 for the three month period and from \$538,185 to \$37,500 for the ninth month period.

Total oil and gas sales (including royalty revenue) increased 18 percent from \$377,371 to \$443,253 in the third quarter and 26 percent from \$946,153 to \$1,191,044 for the nine-month period. These increases were due primarily to increased gas production and higher product prices. Average oil prices for the quarter increased from \$25.14 bbl to \$34.19 bbl while gas prices increased from \$4.27 MCF to \$5.02 MCF. For the nine-month period, average oil prices increased from \$25.47 bbl to \$30.58 bbl while gas prices increased from \$3.46 to \$4.73. Gas production for the nine-month period increased by 11 percent primarily due to increased production on our Hunter Mesa properties. Oil production decreased 14 percent for the nine-month period due to down time on our operated properties and natural production declines. For the three-month period oil production decreased four percent for similar reasons while gas production decreased 3 percent due to decreased production for one month (correcting a prior overpayment) in the Hunter Mesa properties.

Project and lease sales income for the nine-month period decreased from \$538,185 in 2003 to \$37,500 in 2004. This was primarily due to the sale of about two-thirds of our Uinta Basin Overpressured Gas Prospect in 2003. The company is currently marketing the remainder of the prospect.

Costs of operations decreased from \$142,451 to \$137,727 for the quarter and increased from \$398,975 to \$459,973 for the nine-month period. These changes

Edgar Filing: PIONEER OIL & GAS - Form 10QSB

were primarily due to variations in payments to working interest partners due to varying production and product prices.

General and administrative expenses decreased from \$75,603 to \$73,204 for the quarter and increased from \$233,706 to \$254,115 for the nine-month period.

The Company's net income for the third quarter (fiscal 2004) was \$138,654 compared to net income of \$203,516 for the third fiscal quarter 2003. For the nine-month period (fiscal 2004) the Company posted net income of \$246,439 compared to a net income of \$162,384 for fiscal 2003.

Liquidity and Capital Resources

During the nine-months of fiscal 2003 cash provided by operating activities was \$351,155 while investing activities required \$27,429. Net cash used in financing activities was \$21,945.

Cash provided by operating activities for the nine-months of fiscal 2003 was \$742,688. Cash provided by operating activities for the same period for fiscal 2004 was \$351,155.

The company substantially increased its resale leases by \$715,769 to \$935,446 during the nine-month period. This was due to purchasing trend acreage on nine prospects in the central Utah overthrust near Wolverine Gas and Oil's recent major oil discovery. IHS Energy information services reported that Wolverine completed a well pumping 960 barrels of oil per day about three miles southeast of Sigurd in south-central Utah. This well was followed up by another productive well currently being completed.

IHS Energy stated that these discoveries "promise to open a new oil-producing province in the Rockies."

Pioneer's acreage position in the central Utah overthrust area consists of approximately 24,000 gross and 12,000 net acres.
