TITANIUM METALS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2012
(Unaudited)

Note 1 – Basis of presentation and organization

Basis of presentation. The unaudited Condensed Consolidated Financial Statements contained in this Quarterly Report have been prepared on the same basis as the audited Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2011 that we filed with the Securities and Exchange Commission (“SEC”) on February 29, 2012 (“2011 Annual Report”). They include the accounts of Titanium Metals Corporation and its majority owned subsidiaries (collectively referred to as “TIMET”). Unless otherwise indicated, references in this report to “we”, “us” or “our” refer to TIMET and its subsidiaries, taken as a whole. All material intercompany transactions and balances with consolidated subsidiaries have been eliminated. In our opinion, we have made all necessary adjustments (which include only normal recurring adjustments) in order to state fairly, in all material respects, our consolidated financial position, results of operations and cash flows as of the dates and for the periods presented. We have condensed or omitted certain information and footnote disclosures (including those related to the Consolidated Balance Sheet at December 31, 2011) normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). Our results of operations for the interim periods ended September 30, 2012 may not be indicative of our operating results for the full year. The Condensed Consolidated Financial Statements contained in this Quarterly Report should be read in conjunction with the 2011 Consolidated Financial Statements contained in our 2011 Annual Report. Our first three fiscal quarters reported are the approximate 13-week periods ending on the Saturday generally nearest to March 31, June 30 and September 30. Our fourth fiscal quarter and fiscal year always end on December 31. For presentation purposes, our financial statements and the accompanying notes have been presented as ended on March 31, June 30, September 30 and December 31, as applicable.

Organization. At September 30, 2012, Contran Corporation and its subsidiaries held 29.5% of our outstanding common stock. Substantially all of Contran's outstanding voting stock is held by trusts established for the benefit of certain children and grandchildren of Harold C. Simmons, of which Mr. Simmons is sole trustee, or is held by Mr. Simmons or persons or other entities related to Mr. Simmons. At September 30, 2012, Mr. Simmons and his spouse owned an aggregate of 15.7% of our common stock, and the Combined Master Retirement Trust (“CMRT”), a trust sponsored by Contran to permit the collective investment by trusts that maintain the assets of certain employee benefit plans adopted by Contran and certain related companies, held an additional 8.8% of our common stock. Mr. Simmons is the sole trustee of the CMRT and a member of the trust investment committee for the CMRT. Consequently, Mr. Simmons may be deemed to control each of Contran and us.

Note 2 – Fair value of financial instruments

Carrying amounts of certain of our financial instruments including, among others, cash and cash equivalents and accounts receivable, approximate fair value because of their short maturities. We carry our investments in marketable equity securities at fair value based upon quoted market prices, and the carrying values of our notes receivable from affiliates approximate fair value because the applicable interest rates are variable based upon stated market indices. The carrying value of our indebtedness approximates fair value because the applicable interest rates are variable based upon stated market indices, which represent Level 2 inputs within the fair value hierarchy.

Note 3 – Notes receivable from affiliates

From time to time, companies related to Contran will have loans and advances outstanding between them and various related parties pursuant to term and demand notes. These loans and advances are generally entered into for specific transactions or cash management purposes.

- 8 -

The following table summarizes the aggregate outstanding principal balances on our notes receivable from affiliates as of December 31, 2011 and September 30, 2012:

	December 31, 2011	September 30, 2012
	(In millions)	
Notes receivable from affiliates:		
CompX	\$22.2	\$20.5
Contran unsecured revolving demand promissory note	24.6	-
Other	1.4	1.4
Total notes receivable from affiliates	48.2	21.9
Less current portion of notes receivable from affiliates	27.0	2.4
Noncurrent notes receivable from affiliates	\$21.2	\$19.5

Following the establishment of our U.S. credit facility in February 2012, the terms of the Contran unsecured revolving demand promissory note were amended to increase the interest rate on outstanding borrowings on or after March 1, 2012 to prime plus 2.75%, which exceeds the prevailing interest rate under our U.S. credit facility.

Note 4 – Inventories

	December 31, 2011	September 30, 2012
	(In millions)	
Raw materials	\$187.9	\$257.5
Work-in-process	315.4	366.1
Finished products	116.1	152.3
Inventory consigned to customers	31.2	37.6
Supplies	26.9	31.3
Total inventories Total inventories	\$677.5	\$844.8

Note 5 – Marketable securities

Our marketable securities include investments in the publicly traded shares of related parties, including NL Industries, Inc., Kronos Worldwide, Inc. and Valhi, Inc., each a majority owned subsidiary of Contran, and certain mutual funds. All of our marketable securities are classified as available-for-sale, which are carried at fair value using quoted market prices in active markets for each marketable security, representing inputs from the highest level (level 1) within the fair value hierarchy. Because we have classified all of our marketable securities as available-for-sale, any unrealized gains or losses on the securities are recognized through other comprehensive income.

Edgar Filing: TITANIUM METALS CORP - Form 10-Q

The following table summarizes the market value of our marketable securities as of December 31, 2011 and September 30, 2012:

Marketable security	Fair value measurement level	Market value	Cost basis (In millions)	Unrealized gain (loss)
As of December 31, 2011:				
Noncurrent assets:				
Valhi	1	\$128.4	\$64.3	\$64.1
NL	1	2.9	2.5	0.4
Kronos	1	6.7	6.4	0.3
Total noncurrent marketable securities		\$138.0	\$73.2	\$64.8
As of September 30, 2012:				
Current assets:				
Mutual funds	1	\$9.9	\$9.8	\$0.1
Noncurrent assets:				
Valhi	1	\$77.7	\$64.3	\$13.4
NL	1	2.6	2.5	0.1
Kronos	1	5.5	6.4	(0.9)
Total noncurrent marketable securities		\$85.8	\$73.2	\$12.6

At September 30, 2012, we held approximately 1.9% of Valhi's outstanding common stock, approximately 0.5% of NL's outstanding common stock and 0.3% of Kronos' outstanding common stock.

From time to time during 2011 and 2012, we also held investments in various mutual funds which had a primary investment objective of holding corporate and government debt securities from U.S. and other markets. These funds have daily liquidity and were held for the temporary investment of cash available for our operations in order to generate a higher return than would be available if such funds were invested in an asset qualifying for classification as a cash equivalent, and accordingly, we have classified our investments in these mutual funds as a current asset.

Because we have classified all of our investments in marketable securities as available-for-sale, any unrealized gains or losses are recognized through other comprehensive income. With respect to our investment in Kronos, our cost basis for such investment has exceeded its market value for less than one month, and we consider the decline in market price of these investments to be temporary at September 30, 2012. We considered all available evidence in reaching this conclusion, including our ability and intent to hold these investments for a reasonable period of time sufficient for the recovery of fair value.

Note 6 – Property and equipment

	December 31, 2011	September 30, 2012
	(In millions)	
Land and improvements	\$15.2	\$15.5
Buildings and improvements	70.5	79.9
Computer equipment and software	70.8	72.0
Manufacturing equipment and other	594.9	622.0
Construction in progress	48.4	64.1
Total property and equipment	799.8	853.5
Less accumulated depreciation	414.0	451.1
Total property and equipment, net	\$385.8	\$402.4

Note 7 – Other noncurrent assets

	December 31, 2011	September 30, 2012
	(In millions)	
Prepaid conversion services	\$37.2	\$35.3
Other	57.5	67.5
Total other noncurrent assets	\$94.7	\$102.8

Note 8 – Accrued and other current liabilities

	December 31, 2011	September 30, 2012
	(In millions)	
Employee related	\$42.2	\$37.0
Customer advances	16.4	23.0
Deferred revenue	15.0	14.3
Other	14.8	17.4
Total accrued and other current liabilities	\$88.4	\$91.7

Note 9 – Long-term debt

	December 31, 2011	September 30, 2012
	(In millions)	
U.S. credit facility	\$-	\$102.8
Other	2.5	2.5
Total debt	\$2.5	\$105.3
Less current maturities	-	0.5
Total long-term debt	\$2.5	\$104.8

Credit facilities - As of September 30, 2012, we had outstanding borrowings of \$102.8 million under our U.S. credit facility. The average annualized interest rate on our U.S. credit facility was 2.8% as of September 30, 2012 and 3.3% for the nine-month period ended September 30, 2012.

In June 2012, we replaced our credit facility in the U.K. with a £22.5 million credit facility that matures on March 31, 2015. Interest on outstanding borrowings generally accrues at a rate of LIBOR plus 1.6%, and all other terms are substantially similar to our previous U.K. credit facility. There were no outstanding borrowings under the U.K. credit facility at September 30, 2012 and our previous U.K., facility at December 31, 2011.

Restrictions and other – Our credit facilities contain certain restrictive covenants customary in lending transactions of this type. In some cases, we are required to maintain certain financial ratios, such as a fixed charge coverage ratio. We are in compliance with all of our debt covenants at September 30, 2012. We believe we will be able to comply with the financial covenants contained in each of our credit facilities until maturity of such facilities; however, if future operating results differ materially from our expectations, we may be unable to maintain compliance.

Note 10 – Employee benefits

Defined benefit pension plans. The components of the net periodic pension expense are set forth below:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2012	2011	2012
	(In millions)			
Service cost	\$0.7	\$0.1	\$2.2	\$0.4
Interest cost	4.3	3.9	12.7	11.7
Expected return on plan assets	(4.6)	(4.6)	(13.6)	(13.7)
Amortization of net losses	2.5	2.1	7.5	6.2
Amortization of prior service costs	0.1	0.1	0.3	0.4
Total pension expense	\$3.0	\$1.6	\$9.1	\$5.0

Postretirement benefits other than pensions (“OPEB”). The components of net periodic OPEB expense are set forth below:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2012	2011	2012
	(In millions)			
Service cost	\$-	\$-	\$0.5	\$0.1
Interest cost	0.1	0.1	0.6	0.4
Amortization of net gains	(0.1)	(0.1)	(0.5)	(0.2)
Amortization of prior service credit	(0.3)	(0.3)	(0.7)	(1.0)
Recognition of prior service credit due to benefit curtailment	-	-	(2.1)	-
Total OPEB income	\$(0.3)	\$(0.3)	\$(2.2)	\$(0.7)

In the second quarter of 2011, we amended the benefit formula and the service requirements for certain of our U.S. employees as part of the ratification of a new collective bargaining agreement. Such amendment resulted in the immediate recognition of \$2.1 million of previously unrecognized prior service credit due to the benefit curtailment which resulted in a curtailment gain included as a reduction to cost of sales.

Note 11 – Other income and expense

In August 2009, we filed a claim in the bankruptcy proceedings of Tronox Incorporated, which operates a manufacturing site adjacent to our Henderson, Nevada plant site. In our claim, we asserted that Tronox's operations at its manufacturing site contribute to the groundwater contamination at our site discussed in Note 13, and that Tronox should therefore be responsible for reimbursing us for a portion of the cost of our remediation activities. In February 2011, Tronox emerged from bankruptcy upon the effectiveness of their plan of reorganization. As part of the Tronox plan of reorganization, in February 2011 we received (i) 49,963 shares of common stock of the reorganized Tronox and (ii) an additional 46,617 shares of such common stock that we purchased for an aggregate of \$1.3 million in cash pursuant to the exercise of our right to participate in a Tronox common stock rights offering, in both cases in satisfaction of our claim. The aggregate fair value of the consideration we received in February 2011 upon Tronox's emergence from bankruptcy, using the over-the-counter quoted market price of such common stock on the date Tronox's plan of reorganization became effective (a level 2 input in the fair value hierarchy), in excess of our cost basis was \$10.6 million (\$0.04 per diluted share, net of income taxes) and is included in other operating income. Subsequently, in March 2011 we sold all of our shares of Tronox common stock in an over-the-counter market transaction and realized a gain of \$1.3 million which is included in other non-operating expense.

In the second quarter of 2012, we received two payments on an insurance claim related to certain damaged property, resulting in other non-operating income of \$1.6 million (\$0.01 per diluted share, net of income taxes). We expect additional insurance recoveries upon final resolution of our claim.

Note 12 – Income taxes

	Nine months ended September 30,	
	2011	2012
	(In millions)	
Expected income tax expense, at 35%	\$47.1	\$41.6
Non-U.S. tax rates	(1.5)	(2.6)
U.S. state income taxes, net	1.7	1.9
Domestic manufacturing credit	(2.8)	(2.1)
U.K. tax rate change	1.5	1.7
Other, net	1.1	0.4
Total income tax expense	\$47.1	\$40.9

In each of the third quarters of 2011 and 2012, the United Kingdom enacted certain changes in their income tax laws, including successive reductions of the U.K. corporate income tax rate. We have a net deferred income tax asset in the U.K., and we measure our net deferred taxes using the applicable enacted tax rates. The effect of any change in the applicable enacted tax rate is recognized in the period of enactment. Accordingly, we reported a decrease in our net deferred tax asset in the U.K. of \$1.5 million in the third quarter of 2011 and \$1.7 million in the third quarter of 2012, each recognized as a component of our provision for income taxes.

In the third quarter of 2012, France enacted certain changes in their income tax laws, including a 3% nondeductible surtax on all dividend distributions which is assessed at the time of the distribution against the company making such distribution. Consequently, our French subsidiary will be required to pay an additional 3% tax on all future dividend distributions. Our undistributed earnings in France are deemed to be permanently reinvested, and such tax will be recognized as part of our income tax expense in the period during which the dividend is declared and will be remitted

to the French government in accordance with the applicable tax law. During the third quarter of 2012, we made no dividend distributions from our French subsidiary. At September 30, 2012, our French subsidiary has undistributed earnings of approximately \$40.0 million that, if distributed, would be subject to the 3% surtax.

- 14 -

Note 13 – Commitments and contingencies

Environmental matters. As a result of Environmental Protection Agency (“EPA”) inspections, in April 2009 the EPA issued a Notice of Violation (“Notice”) to us alleging that we violated certain provisions of the Resource Conservation and Recovery Act and the Toxic Substances Control Act (“TSCA”) at our Henderson plant. We responded to EPA and are currently in discussions with them concerning the nature and extent of required follow-up testing and potential remediation that may be required. In addition, we are currently performing work in accordance with an approved plan to address certain matters raised in the Notice.

In May 2010, EPA notified us alleging two unrelated violations of the recordkeeping and reporting requirements of TSCA at our Henderson plant and initiated an investigation of our Morgantown plant under these provisions of TSCA. In June 2010, with EPA approval, we conducted a voluntary self-audit of TSCA compliance at all of our U.S. facilities and disclosed the results of the self-audit to the EPA, including our findings with respect to areas of non-compliance. During the third quarter of 2012, we entered a consent agreement with EPA regarding the settlement of substantially all areas of non-compliance and paid a civil penalty. We do not expect the consequences of any remaining areas of non-compliance to have a material effect on our results of operations, financial condition or liquidity.

As part of our continuing environmental assessment with respect to our plant site in Henderson, in 2008 we completed and submitted to the Nevada Department of Environmental Protection (“NDEP”) a Remedial Alternative Study (“RAS”) with respect to the groundwater located beneath the plant site. The RAS, which was submitted pursuant to an existing agreement between the NDEP and us, addressed the presence of certain contaminants in the plant site groundwater that require remediation. The NDEP completed its review of the RAS and our proposed remedial alternatives, and the NDEP issued its record of decision in February 2009, which selected our preferred groundwater remedial alternative action plan. We commenced implementation of the plan in 2009. In connection with our implementation of the plan, which may be subject to change as remediation proceeds, we are undertaking soil remediation to address source areas associated with conveyance ditches previously used by several companies in the BMI complex, the cost of which is covered by insurance.

We had \$2.1 million accrued at September 30, 2012 for remediation activities anticipated at our Henderson plant site, including amounts accrued at the lower end of the range of estimated costs for the groundwater remedial action plan selected by the NDEP in its record of decision and for additional soil remediation. We will continue evaluating alternative methods and timing for all of our remediation activities, and if necessary, we may revise our estimated costs in the future. We estimate the upper end of the range of reasonably possible costs related to all of our environmental matters, in excess of our existing accrual, to be approximately \$2.4 million. We expect these estimated costs to be incurred over a remediation period of at least five years.

Legal proceedings. We record liabilities related to legal proceedings when estimated costs are probable and reasonably estimable. Such accruals are adjusted as further information becomes available or circumstances change. Estimated future costs are not discounted to their present value. It is not possible to estimate the range of costs for certain matters. No assurance can be given that actual costs will not exceed accrued amounts or that costs will not be incurred with respect to matters as to which no problem is currently known or where no estimate can presently be made. Further, additional legal proceedings may arise in the future.

In November 2011, a purported shareholder derivative lawsuit was filed in Delaware Chancery court by one of our stockholders (Louisiana Municipal Police Retirement System v. Harold C. Simmons, et al. (Delaware Chancery Court C.A. No. 7059-CS) (“LAMPERS”)) and names each of the current members of our Board of Directors as defendants and us as a nominal defendant. The lawsuit alleges Mr. Simmons, who is deemed to be a controlling shareholder, caused us to enter into related party transactions with affiliated companies (“Past Transactions”) for which Mr. Simmons is also deemed to control that are unfair to us. The lawsuit alleges each of the directors breached their fiduciary duties to us

and the minority stockholders. The plaintiff seeks unspecified damages, costs and attorneys fees.

- 15 -

In December 2011, a similar purported shareholder derivative lawsuit was filed in federal court in the Northern District of Texas by another TIMET stockholder (Bert Bauman v. Harold C. Simmons, et al. (United States District Court, Northern District of Texas Case No. 3:11-CV-3607)(“Bauman”)) and names as defendants each of the current members of our Board of Directors, our current Chief Executive and Chief Financial Officers and Contran Corporation, and us as a nominal defendant. As with the LAMPERS action, the Bauman lawsuit alleges Mr. Simmons caused us to enter into related party transactions with affiliates that are unfair to us. The action brings claims for breach of fiduciary duty, unjust enrichment and waste of corporate assets. The action also claims the director defendants violated U.S. securities laws by failing to properly disclose the related party transactions in our proxy statement. The defendants have filed a motion to dismiss this lawsuit for plaintiff’s failure to make demand upon our directors to consider the merits of plaintiff’s claim. The defendants have withdrawn this motion without prejudice, however, pending the proposed settlement with the plaintiffs described below.

In October 2012, we and the other defendants entered into a proposed settlement of the LAMPERS lawsuit. The proposed settlement is subject to approval by the Delaware Court of Chancery at a hearing before the court on January 9, 2013. If the settlement is approved by the court, the lawsuit will be dismissed with prejudice, and we will adopt a new related party transaction policy. In addition, a committee of our independent directors will investigate the Past Transactions and prepare a report about its findings. A summary of the committee’s report will be included in our 2013 proxy statement. It is our expectation that if the settlement is approved by the court, the Bauman lawsuit also will be dismissed with prejudice.

Note 14 – Business segment information

Our production facilities are located in the United States, United Kingdom, France and Italy, and our products are sold throughout the world. Our President and Chief Executive Officer functions as our chief operating decision maker (“CODM”), and the CODM receives consolidated financial information about us. He makes decisions concerning resource utilization and performance analysis on a consolidated and global basis. We have one reportable segment, our worldwide “Titanium melted and mill products” segment. The following table provides supplemental information to our Condensed Consolidated Financial Statements:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2011	2012	2011	2012
	(In millions, except product shipment data)			
Titanium melted and mill products:				
Melted product net sales	\$34.4	\$29.6	\$105.5	\$96.6
Mill product net sales	206.3	211.5	625.4	657.2
Other titanium product sales	21.8	16.6	55.7	62.4
Total net sales	\$262.5	\$257.7	\$786.6	\$816.2
Melted product shipments:				
Volume (metric tons)	1,565	1,300	4,850	4,245
Average selling price (per kilogram)	\$22.00	\$22.75	\$21.75	\$22.75
Mill product shipments:				
Volume (metric tons)	3,955	3,965	12,085	12,070
Average selling price (per kilogram)	\$52.15	\$53.35	\$51.75	\$54.45

Note 15 – Subsequent event:

On November 9, 2012, we entered into a definitive merger agreement with Precision Castparts Corp. (“PCC”), under which PCC has agreed to acquire all of our outstanding shares of common stock. Under the terms of the merger agreement, PCC will commence by November 20, 2012 an all-cash tender offer to acquire 100% of our outstanding shares of common stock at a price of \$16.50 per share, net to the tendering holding in cash. PCC will acquire any shares of our common stock that are not purchased in the tender offer in a second-step merger, at the same price per share paid in the tender offer. Completion of the tender offer will be subject to certain closing conditions, including a tender of a majority of our outstanding shares of common stock held by stockholders other than Contran and its affiliates, who in the aggregate own approximately 54% of our outstanding shares of common stock, and the receipt of anti-trust approvals in the United States and the European Union. The tender offer is expected to be completed in December 2012, subject to fulfillment of the conditions. Contran and certain of its affiliates, who collectively hold approximately 45% of our outstanding shares of common stock, have committed to tender their shares in the tender offer. There can be no assurance that the tender offer will be completed, or if completed, that it will be completed in December 2012.

The tender offer described above has not yet commenced, and the information provided above is neither an offer to purchase nor a solicitation of an offer to sell. At the time the tender offer is commenced, PCC will file with the SEC and mail to our stockholders a Tender Offer Statement on Schedule TO, and we will file with the SEC and mail to our stockholders a Tender Offer Solicitation/Recommendation Statement on Schedule 14D-9 in connection with the transaction. These will contain important information about PCC, TIMET, the transaction and other related matters. Investors and security holders are urged to read each of these documents carefully when they are available.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The statements contained in this Quarterly Report on Form 10-Q ("Quarterly Report") that are not historical facts, including, but not limited to, statements found in the Notes to Condensed Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), are forward-looking statements that represent management's beliefs and assumptions based on currently available information. Forward-looking statements can generally be identified by the use of words such as "believes," "intends," "may," "will," "looks," "should," "could," "anticipates," "expects" or comparable terminology or by discussions of strategic trends. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we do not know if these expectations will prove to be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly affect expected results. Actual future results could differ materially from those described in such forward-looking statements, and we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that could cause actual results to differ materially are the risks and uncertainties discussed in this Quarterly Report, including risks and uncertainties in those portions referenced above and those described from time to time in our other filings with the SEC which include, but are not limited to:

- the cyclicity of the commercial aerospace industry;
- the performance of our customers, our vendors and us under our long-term agreements;
- the existence, amendment or renewal of certain long-term agreements;
- the difficulty in forecasting demand for titanium products;
- global economic, financial and political conditions;
- global production capacity for titanium;
- changes in product pricing and costs;
- the impact of long-term contracts with vendors on our ability to reduce or increase supply;
- the possibility of labor disruptions;
- fluctuations in currency exchange rates;
- fluctuations in the market price of marketable securities;
- uncertainties associated with new product or new market development;
- the availability of raw materials and services;
- changes in raw material prices and other operating costs (including energy costs);
- possible disruption of business or increases in the cost of doing business resulting from terrorist activities or global conflicts;
- possible disruption of business or increases in the cost of doing business resulting from natural disasters or other accidents impacting us, our customers or our vendors;
- competitive products and strategies; and
- other risks and uncertainties.

Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected.

The following discussion and analysis should be read in conjunction with our Condensed Consolidated Financial Statements and related notes included elsewhere in this Quarterly Report and with our Consolidated Financial Statements and the information under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations," which are included in our 2011 Annual Report.

EXECUTIVE SUMMARY

General overview. We are a vertically integrated producer of titanium sponge, melted products and a variety of mill products for commercial aerospace, military, industrial and other applications. We are one of the world's leading producers of titanium melted products (ingot, electrode and slab) and mill products (billet, bar, plate, sheet and strip). We are the only producer with major titanium production facilities in both the United States and Europe, the world's principal markets for titanium. The titanium metals industry is highly competitive on a worldwide basis. We compete primarily on the basis of price, quality of products, technical support and the availability of products to meet customers' delivery schedules.

Our business is more dependent on commercial aerospace demand than is the overall titanium industry. Demand for titanium products within the commercial aerospace sector is derived from both jet engine components (e.g., blades, discs, rings and engine cases) and airframe components (e.g., bulkheads, tail sections, landing gear, wing supports and fasteners). Deliveries of titanium generally precede aircraft deliveries by about one year, and our business cycle generally correlates to this timeline, although the actual timeline can vary considerably depending on the titanium product.

The following factors have the most impact on our reported operating results and also represent our key performance indicators:

- Melted and mill product sales volume and price
- Raw materials and other manufacturing costs

Financial overview. We reported net income attributable to TIMET stockholders of \$18.6 million, or \$0.11 per diluted share, in the third quarter of 2012 as compared to \$25.0 million, or \$0.14 per diluted share, in the third quarter of 2011. We reported net income attributable to TIMET stockholders of \$74.3 million, or \$0.42 per diluted share, in the first nine months of 2012 as compared to \$85.4 million, or \$0.48 per diluted share, in the first nine months of 2011. Our net income for both 2012 periods is lower principally due to lower operating income resulting from the net effects of higher average selling prices and lower sales volumes of industrial-grade products in 2012. Additionally, operating income for the first nine months of 2011 was favorably impacted by a first quarter \$10.6 million (\$0.04 per diluted share, net of income taxes) gain on settlement of a claim to recover certain groundwater remediation costs attributable to a third-party manufacturing facility adjacent to our Henderson facility.

RESULTS OF OPERATIONS

Quarter ended September 30, 2012 compared to quarter ended September 30, 2011

Summarized financial information. The following table summarizes certain information regarding our results of operations for the three months ended September 30, 2011 and 2012. Our reported average selling prices reflect actual selling prices after the effects of currency exchange rates, customer and product mix and other related factors throughout the periods presented.

	Three months ended September 30,					
	2011	% of total net sales		2012	% of total net sales	
	(In millions, except product shipment data)					
Net sales:						
Melted products	\$34.4	13	%	\$29.6	12	%
Mill products	206.3	79	%	211.5	82	%
Other titanium products	21.8	8	%	16.6	6	%
Total net sales	262.5	100	%	257.7	100	%
Cost of sales	207.4	79	%	207.4	80	%
Gross margin	55.1	21	%	50.3	20	%
Selling, general, administrative and development expense	17.1	6	%	17.7	7	%
Other income, net	0.5	-		0.1	-	
Operating income	\$38.5	15	%	\$32.7	13	%
Melted product shipments:						
Volume (metric tons)	1,565			1,300		
Average selling price (perkilogram)	\$22.00			\$22.75		
Mill product shipments:						
Volume (metric tons)	3,955			3,965		
Average selling price (perkilogram)	\$52.15			\$53.35		

Net sales. Our net sales declined \$4.8 million in the third quarter of 2012 compared to the same period of 2011. The decrease in net sales was principally the result of reduced volumes for industrial products, partially offset by increased average selling prices. Reduced volumes of industrial-grade melted and mill product sales, which generally have project-oriented demand and sell at lower prices than more complex aerospace-grade products, contributed to increased average selling prices and decreased overall shipment volumes during the third quarter of 2012. A continuation of strong demand for our mill products within the commercial aerospace sector offset reduced industrial-grade mill product sales volume. Average selling price increases were driven by annual adjustments under certain of our long-term agreements and a higher mix of aerospace products during the 2012 period, partially offset by the negative effect of changes in currency exchange rates as the dollar strengthened versus the pound sterling and the

euro in the 2012 period, as discussed below.

Cost of sales and gross margin. Our cost of sales was unchanged for each of the third quarters of 2011 and 2012. Cost of sales for the quarter ended September 30, 2012 increased as a percentage of net sales primarily due to lower margins on industrial-grade mill products sold during the third quarter of 2012.

Our gross margin decreased \$4.8 million in the third quarter of 2012 compared to the third quarter of 2011. The favorable effect from the change in product mix for our mill products was more than offset by the negative impact of lower melted product sales volumes.

- 20 -

Operating income. Operating income for the third quarter of 2012 declined \$5.8 million compared to the same period of 2011, consistent with the decline in gross margin discussed above.

Income taxes. Our effective income tax rate was 39% for the third quarter of 2012 and 38% for the same period in 2011. We operate in multiple tax jurisdictions, and as a result, the geographic mix of our pre-tax income or loss can impact our overall effective tax rate. Our effective rates in the third quarter of 2011 and 2012 were higher than the U.S. statutory rate primarily due to the net effects of (i) the positive impact of earnings being generated in lower tax rate jurisdictions, (ii) the positive impact of the domestic production activities deduction and (iii) the negative impact of U.K. tax rate changes which were enacted in the third quarters in each of 2011 and 2012.

Nine months ended September 30, 2012 compared to nine months ended September 30, 2011

Summarized financial information. The following table summarizes certain information regarding our results of operations for the nine months ended September 30, 2011 and 2012. Our reported average selling prices reflect actual selling prices after the effects of currency exchange rates, customer and product mix and other related factors throughout the periods presented.

	Nine months ended September 30,					
	2011	% of total net sales		2012	% of total net sales	
	(In millions, except product shipment data)					
Net sales:						
Melted products	\$105.5	13	%	\$96.6	12	%
Mill products	625.4	80	%	657.2	81	%
Other titanium products	55.7	7	%	62.4	7	%
Total net sales	786.6	100	%	816.2	100	%
Cost of sales	620.4	79	%	646.5	79	%
Gross margin	166.2	21	%	169.7	21	%
Selling, general, administrative and development expense	48.6	6	%	52.6	6	%
Other income, net	12.5	2	%	1.4	-	
Operating income	\$130.1	17	%	\$118.5	15	%
Melted product shipments:						
Volume (metric tons)	4,850			4,245		
Average selling price (perkilogram)	\$21.75			\$22.75		
Mill product shipments:						
Volume (metric tons)	12,085			12,070		
Average selling price (perkilogram)	\$51.75			\$54.45		

Net sales. Our net sales improved \$29.6 million for the first nine months of 2012 compared to the first nine months of 2011. The increase in net sales was principally the result of increased average selling prices for melted and mill products, partially offset by reduced melted product volumes during the first nine months of 2012. Average selling prices increased 5% for both melted and mill products, principally driven by annual adjustments under certain of our long-term agreements, partially offset by the negative effect of changes in currency exchange rates as the dollar strengthened versus the pound sterling and the euro in the 2012 period, as discussed below. Additionally, reduced volumes of industrial-grade melted and mill product sales, which generally have project-oriented demand and sell at lower prices than more complex aerospace-grade products, contributed to increased average selling prices and decreased overall shipment volumes during the first nine months of 2012. Temporary fluctuations in the aerospace supply-chain inventory levels have impacted our melted product sales volume, but a continuation of strong demand for our mill products within the commercial aerospace sector largely offset the effects of reduced sales volume of our industrial-grade mill products.

Cost of sales and gross margin. For the first nine months of 2012, our cost of sales was \$26.1 million higher compared to the first nine months of 2011. Cost of sales for the nine months ended September 30, 2012 increased primarily due to higher manufacturing costs associated with a higher proportion of more complex products. In addition, cost of sales in the first nine months of 2011 includes the favorable impact of a previously-disclosed \$2.1 million curtailment gain.

For the first nine months of 2012, our gross margin was \$3.5 million higher compared to the first nine months of 2011, reflecting the positive impacts of a favorable change in product mix, partially offset by the impact of lower sales volumes in the current period. Our gross margin percentage was consistent across both periods as increases in selling prices were offset by increases in manufacturing costs.

Operating income. Operating income declined \$11.6 million in the first nine months of 2012 compared to the same period of 2011, primarily reflecting the first quarter 2011 \$10.6 million gain on settlement of a claim to recover certain groundwater remediation costs attributable to a third-party facility adjoining one of our plant sites.

Income taxes. Our effective income tax rate was 34% for the first nine months of 2012 and 35% for the same period in 2011. We operate in multiple tax jurisdictions, and as a result, the geographic mix of our pre-tax income or loss can impact our overall effective tax rate. Our effective rate in the first nine months of 2012 was lower than the U.S. statutory rate primarily due to the net effects of (i) the positive impact of earnings being generated in lower tax rate jurisdictions, (ii) the positive impact of the domestic production activities deduction and (iii) the negative impact of a U.K. tax rate change which was enacted in the third quarter 2012. Our effective rate in the first nine months of 2011 was the same as the U.S. statutory rate primarily due to the offsetting effects of (i) the positive impact of earnings being generated in lower tax rate jurisdictions, (ii) the positive impact of the domestic production activities deduction and (iii) the negative impact of a U.K. tax rate change which was enacted in the third quarter of 2011.

European operations

We have substantial operations located in the United Kingdom, France and Italy. Approximately 43% of our sales originated in Europe for the nine months ended September 30, 2012, a portion of which were denominated in foreign currency, principally the British pound sterling or the euro. Certain raw material costs, principally purchases of titanium sponge and alloys for our European operations, are denominated in U.S. dollars, while labor and other production costs are primarily denominated in local currencies. The functional currencies of our European subsidiaries are those of their respective countries. Our European operations may incur borrowings denominated in U.S. dollars or in their respective functional currencies. Our export sales from the U.S. are denominated in U.S. dollars and are not subject to currency exchange rate fluctuations. We do not use currency contracts to hedge our currency exposures.

The translated U.S. dollar value of our foreign sales and operating results are subject to currency exchange rate fluctuations which may favorably or adversely impact reported earnings and may affect the comparability of period-to-period operating results. By applying the exchange rates prevailing during the prior year period to our local currency results of operations for the current year period, the translation impact of currency rate fluctuations can be estimated. The U.S. dollar strengthened against the British pound and euro in the three and nine months ended September 30, 2012 as compared to the corresponding periods in 2011. These fluctuations in foreign currency exchange rates had the following effects on our sales and operating income:

	Three months ended September 30, 2012 vs. 2011	Nine months ended September 30, 2012 vs. 2011
	(In millions)	
Decrease in:		
Net sales	\$(8.2)	\$ (18.4)
Operating income	(0.8)	(2.6)

Outlook

Product deliveries for the first nine months of 2012 reflect continued strong sales of mill products to the commercial aerospace supply chain, although reduced sales of industrial-use titanium mill and melted products contributed to overall volumes being lower than the comparable year-to-date 2011 period. Overall, commercial aerospace industry drivers remain positive, and we expect our operating results in the fourth quarter 2012 to exceed those for our third quarter of this year.

The continued development and production of next-generation aircraft, combined with the resurgence in orders for recently reintroduced legacy models with new, fuel-efficient engines and a strong original equipment manufacturer order backlog, are indicators that our industry has entered the sustained growth period anticipated by industry experts. Based on the industry's estimated timelines for fleet replacement and commercial aircraft production, we anticipate production rates throughout the commercial aerospace supply chain will continue to be strong and accelerate over the next several years. Projected aircraft deliveries over a longer time horizon are also expected to remain strong as fuel efficiency and expansion of the global fleet in developing areas, such as Asia, the Middle East and South America, are expected to support future demand. Based on current industry dynamics and subject to temporary fluctuations resulting from adjustments of inventory levels within the supply chain, we expect continued strong commercial aerospace mill product deliveries for the remainder of the year and foreseeable future and believe that our manufacturing flexibility and efficiencies will allow us to largely mitigate the impact of increased titanium feedstock costs. Demand growth in industrial markets is expected to significantly increase as global economic conditions improve. Regardless of economic conditions, we believe our customer supply agreements, which secure major positions on the engines and structures for key growth platforms, will bolster our core aerospace business for the foreseeable future.

We continue to enhance our ability to meet our current and prospective customers' needs and strengthen our position as a trusted supplier in markets where technical ability and precision are critical. We have been successful over the past several years in establishing significant manufacturing and raw material flexibility and cost efficiencies throughout our manufacturing processes, and together with the benefit of our customer long-term agreements, we believe these core strengths will serve us well in the current environment of strong demand and have positioned us to

seize the opportunities that arise in the future. Our fiscal discipline and industry expertise have allowed us to manage our production rates and costs effectively while investing capital conservatively and maintaining a strong balance sheet. We believe our financial strength and operating flexibility position us to take advantage of opportunities to strengthen and expand our presence in key markets.

- 23 -

LIQUIDITY AND CAPITAL RESOURCES

Our consolidated cash flows for the nine months ended September 30, 2011 and 2012 are presented below. The following should be read in conjunction with our Condensed Consolidated Financial Statements and notes thereto.

	Nine months ended September 30,	
	2011	2012
	(In millions)	
Cash provided by (used in):		
Operating activities	\$(14.2)	\$(68.2)
Investing activities	(72.6)	(31.3)
Financing activities	(107.1)	62.0
Net cash used in operating, investing and financing activities	\$(193.9)	\$(37.5)

Operating activities. Cash flow from operations is a primary source of our liquidity. Changes in pricing, production volume and customer demand, among other things, could significantly affect our liquidity. Trends in cash flows from operating activities, excluding changes in assets and liabilities, have generally been similar to the trends in operating income. Changes in assets and liabilities result primarily from the timing of production, sales and purchases. Changes in assets and liabilities tend to even out over time. However, period to period relative changes in assets and liabilities can significantly affect the comparability of cash flows from operating activities. Our cash from operating activities decreased \$54.0 million, from \$14.2 million used during the first nine months of 2011 to \$68.2 million used in the first nine months of 2012 primarily due to the net effects of the following factors:

- decreased operating income in 2012 of \$1.0 million (excluding the impact of the \$10.6 million non-cash settlement received from Tronox during the first quarter of 2011 discussed in Note 11 to our Condensed Consolidated Financial Statements);
- net cash used from the relative changes in our receivables, inventories, payables and accruals and other operating assets and liabilities increased by \$45.2 million in 2012 resulting primarily from increased inventories to support higher production levels and decreases to payables and accrued liabilities associated with the timing of payments partially offset by higher collections of receivables; and
 - higher cash paid for income taxes in 2012 of \$7.9 million due to the timing of payments.

Relative changes in working capital can have significant effects on cash flows from operating activities. As shown below, our average days sales outstanding (“DSO”) remained consistent in each of the periods presented over the last twelve months reflecting our continued focus on collection discipline and maintaining strong customer relationships.

As shown below, our average number of days sales in inventory (“DSI”) increased from December 31, 2011 to September 30, 2012. The overall increase in average DSI was primarily the result of the higher inventory levels to support our outlook for inventory requirements and strategic stocking of certain raw materials and, to a lesser extent, rising costs of certain raw materials. We will continue to maintain appropriate inventory levels based on our sales order backlog and projected production volumes, and our inventory levels are expected to decrease by the end of the year as we expect sales volumes to exceed raw material purchases.

For comparative purposes, we have also provided average DSO and DSI for the comparative prior year periods in the table below:

	December 31, 2010	September 30, 2011	December 31, 2011	September 30, 2012
DSO	52 days	59 days	55 days	58 days
DSI	243 days	246 days	294 days	357 days

Investing activities. Cash flows used in our investing activities decreased from \$72.6 million in the first nine months of 2011 to \$31.3 million in the first nine months of 2012 primarily due to the net effects of the following factors:

- Capital expenditures of \$32.2 million during the first nine months of 2011 and \$53.9 million in the same period of 2012;
- Purchases of marketable securities of affiliates of \$35.1 million in the first nine months of 2011 and none in the same period of 2012;
- Net proceeds from sale of mutual funds and other marketable securities of \$5.2 million in the first nine months of 2011 and net purchases of mutual funds and other marketable securities of \$9.4 million in the same period of 2012; and
- Investing activity on various notes receivables from affiliates (discussed in Note 3 to our Consolidated Financial Statements), including net loans of \$8.5 million during the first nine months of 2011 and net collections of \$26.3 million in the same period of 2012.

Financing activities. We had the following significant items included in our cash flows from financing activities:

- Net borrowings from indebtedness of \$102.8 million in the first nine months of 2012 and none in the same period of 2011;
- Dividends paid on our common stock of \$26.8 million in the first nine months of 2011 and \$39.3 million in the first nine months of 2012;
- Dividends paid to the noncontrolling interest in subsidiary of \$3.4 million in the first nine months of 2011 and none in the same period of 2012; and
- Treasury stock purchases of \$76.8 million in the first nine months of 2011 and \$1.4 million in the first nine months of 2012.

We expect to borrow additional amounts under our revolving credit facilities during the remainder of 2012 to finance the capital spending as discussed below.

Debt Obligations. At September 30, 2012, there was approximately \$102.8 million outstanding under our \$200 million U.S. revolving credit facility that matures in February 2017.

Future cash requirements

Liquidity. Our primary sources of liquidity on an ongoing basis are our cash flow from operating activities and borrowings under various credit facilities. We generally use these amounts to (i) fund capital expenditures, (ii) repay indebtedness incurred primarily for working capital purposes and (iii) provide for the payment of dividends. From time-to-time we will incur indebtedness, generally to (i) fund short-term working capital needs, (ii) refinance existing indebtedness, (iii) make investments in marketable and other securities (including the acquisition of securities issued by our subsidiaries and affiliates) or (iv) fund major capital expenditures or the acquisition of other assets outside the ordinary course of business.

- 25 -

We routinely evaluate our liquidity requirements, capital needs and availability of resources in view of, among other things, our alternative uses of capital, debt service requirements, the cost of debt and equity capital and estimated future operating cash flows. As a result of this process, we have in the past, or in light of our current outlook, may in the future, seek to raise additional capital, modify our common and preferred dividend policies, restructure ownership interests, incur, refinance or restructure indebtedness, repurchase shares of common stock, sell assets, or take a combination of such steps or other steps to increase or manage our liquidity and capital resources. In the normal course of business, we investigate, evaluate, discuss and engage in acquisition, joint venture, strategic relationship and other business combination opportunities in the titanium, specialty metal and other industries. In the event of any future acquisition or joint venture opportunities, we may consider using then-available liquidity, issuing equity securities or incurring indebtedness.

At September 30, 2012, we had aggregate cash and cash equivalents and current marketable securities of \$20.6 million, and we had borrowing availability under our existing credit facilities of \$143.0 million, including \$95.0 million under our U.S. revolving credit facility. We are in compliance with all of our debt covenants at September 30, 2012. We could borrow all available amounts under each of our credit facilities without violating our existing debt covenants. Our non-U.S. subsidiaries held \$10.4 million of our aggregate cash and cash equivalents and all of our current marketable securities at September 30, 2012. Based upon our expectations of our operating performance, the anticipated demands on our cash resources, borrowing availability under our U.S. and European credit facilities and anticipated borrowing capacity after the maturity of these credit facilities, we expect to have sufficient liquidity to meet our obligations for the short-term (defined as the next twelve-month period) and our long-term obligations.

Capital expenditures. We currently estimate we will invest a total of approximately \$75 million to \$85 million for capital expenditures during 2012. Our planned capital expenditures include projects to drive increased operating efficiency, properly maintain equipment and expand the productive capacity at our melting facilities, including a project we have commissioned at our facility in Morgantown, Pennsylvania. As part of our expansion plans, we are implementing plasma melting technology to enhance our capabilities to meet the growing demand for complex, high-temperature alloys utilized more extensively in new generation aircraft engines. Capital spending for 2012 is expected to be funded by existing cash resources and available credit facilities.

We continue to evaluate additional opportunities to improve or augment productive assets including capital projects, acquisitions or other investments which, if consummated, any required funding would be provided by existing cash resources or borrowings under our U.S. and European credit facilities.

Contractual commitments. Except as noted above, there have been no other material changes to our contractual commitments discussed in our 2011 Annual Report.

Off-balance sheet arrangements. There have been no material changes to our off-balance sheet arrangements discussed in our 2011 Annual Report.

Recent accounting pronouncements. There have been no recent accounting pronouncements requiring disclosure.

Critical accounting policies. For a discussion of our critical accounting policies, refer to Part I, Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates" in our 2011 Annual Report. There have been no changes in our critical accounting policies during the first nine months of 2012.

Affiliate transactions. Corporations that may be deemed to be controlled by or affiliated with Mr. Simmons sometimes engage in (i) intercorporate transactions such as guarantees, management and expense sharing arrangements, shared fee arrangements, joint ventures, partnerships, loans, options, advances of funds on open account, and sales, leases and exchanges of assets, including securities issued by both related and unrelated parties, and (ii) common investment and acquisition strategies, business combinations, reorganizations, recapitalizations, securities repurchases, and purchases and sales (and other acquisitions and dispositions) of subsidiaries, divisions or other business units, which transactions have involved both related and unrelated parties and have included transactions which resulted in the acquisition by one related party of a publicly-held minority equity interest in another related party. We continuously consider, review and evaluate such transactions, and understand that Contran and related entities consider, review and evaluate such transactions. Depending upon the business, tax and other objectives then relevant, it is possible that we might be a party to one or more such transactions in the future. See Notes 3 and 5 to our Condensed Consolidated Financial Statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk, including foreign currency exchange rates, commodity prices and security prices. There have been no material changes in these market risks since we filed our 2011 Annual Report, and we refer you to the report for a complete description of these risks.

Item 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. We maintain a system of disclosure controls and procedures. The term "disclosure controls and procedures," as defined by regulations of the SEC, means controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit to the SEC under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions to be made regarding required disclosure. Each of Bobby D. O'Brien, our Chief Executive Officer, and James W. Brown, our Chief Financial Officer, have evaluated the design and operating effectiveness of our disclosure controls and procedures as of September 30, 2012. Based upon their evaluation, these executive officers have concluded that our disclosure controls and procedures were effective as of September 30, 2012.

Scope of management's report on internal control over financial reporting. We also maintain internal control over financial reporting. The term "internal control over financial reporting," as defined by regulations of the SEC, means a process designed by, or under the supervision of, our principal executive and principal financial officers, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our Consolidated Financial Statements.

Changes in internal control over financial reporting. There have been no changes to our internal control over financial reporting during the quarter ended September 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Refer to our 2011 Annual Report and Note 13 to our Condensed Consolidated Financial Statements for descriptions of certain previously reported legal proceedings.

Item 1A. RISK FACTORS

There have been no material changes in the first nine months of 2012 with respect to our risk factors presented in Item 1A in our 2011 Annual Report on Form 10-K.
