Notes to Consolidated Financial Statements

(Unaudited)

#### NOTE 1 – BASIS OF FINANCIAL STATEMENT PRESENTATION AND PRINCIPLES OF CONSOLIDATION

The accompanying unaudited interim consolidated financial statements of BancorpSouth, Inc. (the "Company") have been prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") and follow general practices within the industries in which the Company operates. For further information, refer to the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. In the opinion of management, all adjustments necessary for a fair presentation of the consolidated financial statements have been included and all such adjustments were of a normal, recurring nature. The results of operations for the three-month and six-month periods ended June 30, 2014 are not necessarily indicative of the results to be expected for the full year. Certain 2013 amounts have been reclassified to conform with the 2014 presentation.

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, BancorpSouth Bank (the "Bank") and Gumtree Wholesale Insurance Brokers, Inc., and the Bank's wholly-owned subsidiaries, BancorpSouth Insurance Services, Inc., BancorpSouth Investment Services, Inc., BancorpSouth Municipal Development Corporation and BancorpSouth Bank Securities Corporation.

#### NOTE 2 – LOANS AND LEASES

The Company's loan and lease portfolio is disaggregated into the following segments: commercial and industrial; real estate; credit card; and all other loans and leases. The real estate segment is further disaggregated into the following classes: consumer mortgage; home equity; agricultural; commercial and industrial-owner occupied; construction, acquisition and development; and commercial real estate. A summary of gross loans and leases by segment and class as of the dates indicated follows:

<sup>\*</sup> Excludes the Greater Memphis Area.

The Company's loan concentrations which exceed 10% of total loans are reflected in the preceding tables. A substantial portion of construction, acquisition and development loans are secured by real estate in markets in which the Company is located. The Company's loan policy generally prohibits the use of interest reserves on loans originated after March 2010. Certain of the construction, acquisition and development loans were structured with interest-only terms. A portion of the consumer mortgage and commercial real estate portfolios originated through the permanent financing of construction, acquisition and development loans. The prolonged economic downturn has negatively impacted many borrowers' and guarantors' ability to make payments under the terms of the loans as their liquidity has been depleted. Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate owned ("OREO") are susceptible to changes in real estate values in the corresponding market areas. Continued economic distress could negatively impact additional borrowers' and guarantors' ability to repay their debt which would make more of the Company's loans collateral dependent.

The following tables provide details regarding the aging of the Company's loan and lease portfolio, net of unearned income, by segment and class at June 30, 2014 and December 31, 2013:

The Company utilizes an internal loan classification system to grade loans according to certain credit quality indicators. These credit quality indicators include, but are not limited to, recent credit performance, delinquency, liquidity, cash flows, debt coverage ratios, collateral type and loan-to-value ratio. The Company's internal loan classification system is compatible with classifications used by the Federal Deposit Insurance Corporation, as well as other regulatory agencies. Loans may be classified as follows:

Pass: Loans which are performing as agreed with few or no signs of weakness. These loans show sufficient cash flow, capital and collateral to repay the loan as agreed.

Special Mention: Loans where potential weaknesses have developed which could cause a more serious problem if not corrected.

Substandard: Loans where well-defined weaknesses exist that require corrective action to prevent further deterioration.

Doubtful: Loans having all the characteristics of Substandard and which have deteriorated to a point where collection and liquidation in full is highly questionable.

Loss: Loans that are considered uncollectible or with limited possible recovery.

Impaired: Loans for which it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement and for which a specific impairment reserve has been considered.

The following tables provide details of the Company's loan and lease portfolio, net of unearned income, by segment, class and internally assigned grade at June 30, 2014 and December 31, 2013:

Loans considered impaired under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 310, Receivables ("FASB ASC 310"), are loans for which, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. The Company's recorded investment in loans considered impaired exclusive of accruing TDRs at June 30, 2014 and December 31, 2013 was \$30.1 million and \$54.9 million,

respectively. At June 30, 2014 and December 31, 2013, \$6.2 million and \$11.0 million, respectively, of those impaired loans had a valuation allowance of \$1.4 million and \$4.1 million, respectively. The remaining balance of impaired loans of \$24.0 million and \$44.0 million at June 30, 2014 and December 31, 2013, respectively, were charged down to fair value, less estimated selling costs which approximated net realizable value. Therefore, such loans did not have an associated valuation allowance. Impaired loans that were characterized as TDRs totaled \$7.4 million and \$19.1 million at June 30, 2014 and December 31, 2013, respectively. The average recorded investment in impaired loans was \$35.6 million and \$41.2 million for the three months and six months ended June 30, 2014, respectively, and \$103.5 million for the year ended December 31, 2013.

Non-performing loans and leases ("NPLs") consist of non-accrual loans and leases, loans and leases 90 days or more past due and still accruing, and loans and leases that have been restructured (primarily in the form of reduced interest rates and modified payment terms) because of the borrower's weakened financial condition or bankruptcy proceedings. The following table presents information concerning NPLs as of the dates indicated:

	June 2014	*	201	3	Dece 2013	ember 31,
	(In the	ousands)				
Non-accrual loans and leases	\$	64,533	\$	149,542	\$	92,173
Loans and leases 90 days or more past due, still accruing	2,40	6	1,44	40	1,22	6
Restructured loans and leases still accruing	6,71	2	16,9	953	27,0	07
Total non-performing loans and leases	\$	73,651	\$	167,935	\$	120,406

The Bank's policy for all loan classifications provides that loans and leases are generally placed in non-accrual status if, in management's opinion, payment in full of principal or interest is not expected or payment of principal or interest is more than 90 days past due, unless such loan or lease is both well-secured and in the process of collection. At June 30, 2014, the Company's geographic NPL distribution was concentrated primarily in its Alabama, Mississippi and Tennessee markets, including the greater Memphis, Tennessee area, a portion of which is in northwest Mississippi and Arkansas. The following table presents the Company's nonaccrual loans and leases by segment and class as of the dates indicated:

	June 30, 2014 2013		December 31, 2013

In the normal course of business, management will sometimes grant concessions, which would not otherwise be considered, to borrowers that are experiencing financial difficulty. Loans identified as meeting the criteria set out in FASB ASC 310 are identified as TDRs. The concessions granted most frequently for TDRs involve reductions or delays in required payments of principal and interest for a specified period, the rescheduling of payments in accordance with a bankruptcy plan or the charge-off of a portion of the loan. In most cases, the conditions of the credit also warrant nonaccrual status, even after the restructure occurs. Other conditions that warrant a loan being considered a TDR include reductions in interest rates to below market rates due to bankruptcy

plans or by the bank in an attempt to assist the borrower in working through liquidity problems. As part of the credit approval process, the restructured loans are evaluated for adequate collateral protection in determining the appropriate accrual status at the time of restructure. TDRs recorded as nonaccrual loans may generally be returned to accrual status in periods after the restructure if there has been at least a six-month period of sustained repayment performance by the borrower in accordance with the terms of the restructured loan and the interest rate at the time of restructure was at or above market for a comparable loan. During the second quarter of 2014, the most common concessions that were granted involved rescheduling payments of principal and interest over a longer amortization period, granting a period of reduced principal payment or interest only payment for a limited time period, or the rescheduling of payments in accordance with a bankruptcy plan.

The following tables summarize the financial effect of TDRs recorded during the periods indicated:

The Company incurred total foreclosed property expenses of \$4.2 million and \$3.2 million for the three months ended June 30, 2014 and 2013, respectively. Realized net losses on dispositions and holding losses on valuations of these properties, a component of total foreclosed property expenses, were \$3.2 million and \$2.0 million for the three months ended June 30, 2014 and 2013, respectively. The Company incurred total foreclosed property expenses of \$6.8 million and \$5.6 million for the six months ended June 30, 2014 and 2013, respectively. Realized net losses on dispositions and holding losses on valuations of these properties, a component of total foreclosed property expenses, were \$5.6 million and \$3.2 million for the six months ended June 30, 2014 and 2013, respectively.

#### **NOTE 5 – SECURITIES**

A comparison of amortized cost and estimated fair values of available-for-sale securities as of June 30, 2014 and 2013, respectively and December 31, 2013 follows:

	June 30, 2014

Based upon a review of the credit quality of these securities, and considering that the issuers were in compliance with the terms of the securities, management had no intent to sell these securities, and it was more likely than not that the Company would not be required to sell the securities prior to recovery of costs. Therefore, the

impairments related to these securities were determined to be temporary. No other-than-temporary impairment was recorded during the first six months of 2014.

#### NOTE 6 - PER SHARE DATA

Basic earnings per share ("EPS") are calculated using the two-class method. The two-class method provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of basic EPS. Diluted EPS is computed using the weighted-average number of shares determined for the basic EPS computation plus the shares resulting from the assumed exercise of all outstanding share-based awards using the treasury stock method. Weighted-average antidilutive stock options to purchase approximately 414,000 and approximately 69,000 shares of Company common stock with a weighted average exercise price of \$24.32 and \$24.89 per share for the three months and six months ended June 30, 2014, respectively, were excluded from diluted shares. Antidilutive other equity awards of approximately 10,000 and 5,000 shares of Company common stock for both the three months and six months ended June 30, 2014, respectively, were also excluded from diluted shares. Weighted-average antidilutive stock options to purchase 1.7 million and 1.9 million shares of Company common stock with a weighted average exercise price of \$23.41 and \$23.39 per share for the three months and six months ended June 30, 2013, respectively, were excluded from diluted shares. Antidilutive other equity awards of approximately 4,000 and 2,000 shares of Company common stock for both the three months and six months ended June 30, 2013, respectively, were excluded from diluted shares. The following table provides a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for the periods shown:

<sup>(2)</sup> Recognized employee benefit plan net periodic benefit cost include amortization of unrecognized transition amount, recognized prior service cost and recognized net loss. For more information, see Note 9 - Pension Benefits.

#### NOTE 8 – GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amounts of goodwill by operating segment for the six months ended June 30, 2014 were as follows:

		mmunity nking		surance gencies	То	tal
	(In	thousands)				
Balance as of December 31, 2013	\$	217,618	\$	69,182	\$	286,800
Goodwill recorded during the period	-		4,6	598	4,6	98
Balance as of June 30, 2014	\$	217,618	\$	73,880	\$	291,498

The goodwill recorded in the Company's Insurance Agencies reporting segment during the first six months of 2014 was related to an insurance agency acquired during the second quarter of 2014.

The Company's policy is to assess goodwill for impairment at the reporting segment level on an annual basis or sooner if an event occurs or circumstances change which indicate that the fair value of a reporting segment is below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Accounting standards require management to estimate the fair value of each reporting segment in assessing impairment at least annually. The Company's annual assessment date is during the Company's fourth quarter. No events occurred during the first six months of 2014 that indicated the necessity of an earlier goodwill impairment assessment.

In the current economic environment, forecasting cash flows, credit losses and growth in addition to valuing the Company's assets with any degree of assurance is very difficult and subject to significant changes over very short periods of time. Management will continue to update its analysis as circumstances change. As market conditions continue to be volatile and unpredictable, impairment of goodwill related to the Company's reporting segments may be necessary in future periods.

The following tables present information regarding the components of the Company's identifiable intangible assets for the dates and periods indicated:

As of As of

June 30, 2014 December 31, 2013

Gross Carrying Accumulated Gross Carrying Accumulated Amount Amortization Amount Amortization

#### NOTE 10 – RECENT PRONOUNCEMENTS

There are currently no new accounting standards that have been issued that will have a significant impact on the Company's financial position, results of operations or cash flows upon adoption.

### NOTE 11 - SEGMENT REPORTING

The Company is a financial holding company with subsidiaries engaged in the business of banking and activities closely related to banking. The Company determines reportable segments based upon the services offered, the significance of those services to the Company's financial condition and operating results and management's regular review of the operating results of those services. The Company's primary segment is Community Banking, which includes providing a full range of deposit products, commercial loans and consumer loans. The Company has also designated two additional reportable segments -- Insurance Agencies and General Corporate and Other. The Company's insurance agencies serve as agents in the sale of commercial lines of insurance and full lines of property and casualty, life, health and employee benefits products and services. The General Corporate and Other operating segment includes mortgage lending, trust services, credit card activities, investment services and other activities not allocated to the Community Banking or Insurance Agencies operating segments.

Results of operations and selected financial information by operating segment for the three-month and six-month periods ended June 30, 2014 and 2013 were as follows:

Depreciation and amortization	11,51	6	1,778		1,487		14,7	81

The increase in income for the General, Corporate and Other division for the three-months and six-months ended June 30, 2014 compared to the same periods in 2013 is mainly due to the voluntary early retirement expense of \$10.9 million pre-tax that was recorded during the second quarter of 2013 with no similar expenses recorded during the second quarter of 2014.

### NOTE 12 - MORTGAGE SERVICING RIGHTS

Mortgage servicing rights ("MSRs"), which are recognized as a separate asset on the date the corresponding mortgage loan is sold, are recorded at fair value as determined at each accounting period end. An estimate of the fair value of the Company's MSRs is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Data and assumptions used in the fair value calculation related to MSRs as of the dates indicated were as follows:

	June 30,		December 31,
	2014	2013	2013
	(Dollars in t	housands)	
	\$	\$	\$
Unpaid principal balance	5,630,192	5,393,580	5,577,325
Weighted-average prepayment speed (CPR)	11.3	12.4	10.3
Discount rate (annual percentage)	10.3	10.8	10.3
Weighted-average coupon interest rate (percentage)	4.1	4.2	4.2
Weighted-average remaining maturity (months)	312.0	307.0	310.0
Weighted-average servicing fee (basis points)	26.6	26.7	26.6

Because the valuation is determined by using discounted cash flow models, the primary risk inherent in valuing the MSRs is the impact of fluctuating interest rates on the estimated life of the servicing revenue stream. The use of different estimates or assumptions could also produce different fair values. The Company does not hedge the change in fair value of MSRs and, therefore, the Company is susceptible to significant fluctuations in the fair value of its MSRs in changing interest rate environments.

The Company has only one class of mortgage servicing asset comprised of closed end loans for one-to-four family residences, secured by first liens. The following table presents the activity in this class for the periods indicated:

	2014		2013	
		nousands)		27.002
Fair value as of January 1	\$	54,662	\$	37,882
Additions:				
Origination of servicing assets	4,025	5	8,280	
Changes in fair value:				
Due to payoffs/paydowns	(2,75)	4)	(3,444)	4)
Due to change in valuation inputs or assumptions				
used in the valuation model	(3,65)	(8)	6,289	
Other changes in fair value	(3)		(6)	
Fair value as of June 30	\$	52,272	\$	49,001

All of the changes to the fair value of the MSRs are recorded as part of mortgage lending noninterest revenue on the income statement. As part of mortgage lending noninterest revenue, the Company recorded contractual servicing fees of \$3.8 million and \$3.6 million and late and other ancillary fees of approximately \$306,000 and \$310,000 for the three months ended June 30, 2014 and 2013, respectively. The Company recorded contractual servicing fees of \$7.5 million and \$7.1 million and late and other ancillary fees of approximately \$640,000 and \$670,000 for the six months ended June 30, 2014 and 2013, respectively.

### NOTE 13 – DERIVATIVE INSTRUMENTS AND OFFSETTING ASSETS AND LIABILITIES

The derivatives held by the Company include commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans. The Company's objective in obtaining the forward commitments is to mitigate the interest rate risk associated with the commitments to fund the fixed-rate mortgage loans. Both the commitments to fund fixed-rate mortgage loans and the forward commitments to sell individual fixed-rate mortgage loans are reported at fair value, with adjustments being recorded in current period earnings, and are not accounted for as hedges. At June 30, 2014, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$151.3 million with a carrying value and fair value reflecting a loss of \$1.0 million. At

June 30, 2013, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$298.6 million with a carrying value and fair value reflecting a gain of \$7.0 million. At June 30, 2014, the notional amount of commitments to fund individual fixed-rate mortgage loans was \$114.2 million with a carrying value and fair value reflecting a gain of \$3.5 million. At June 30, 2013, the notional amount of commitments to fund individual fixed-rate mortgage loans was \$173.7 million with a carrying value and fair value reflecting a gain of approximately \$292,000.

The Company also enters into derivative financial instruments in the form of interest rate swaps to meet the financing, interest rate and equity risk management needs of its customers. Upon entering into these interest rate swaps to meet customer needs, the Company enters into offsetting positions to minimize interest rate and equity risk to the Company. These derivative financial instruments are reported at fair value with any resulting gain or loss recorded in current period earnings. These instruments and their offsetting positions are recorded in other assets and other liabilities on the consolidated balance sheets. As of June 30, 2014, the notional amount of customer related derivative financial instruments was \$352.7 million with an average maturity of 53 months, an average interest receive rate of 2.5% and an average interest pay rate of 5.6%. As of June 30, 2013, the notional amount of customer related derivative financial instruments was \$465.0 million with an average maturity of 57 months, an average interest receive rate of 2.5% and an average interest pay rate of 5.6%.

Certain financial instruments such as derivatives, may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements or similar agreements. The Bank's derivative transactions with upstream financial institution counterparties are generally executed under International Swaps and Derivative Association master agreements which include "right of set-off" provisions. In such cases there is generally a legally enforceable right to offset recognized amounts and there may be an intention to settle such amounts on a net basis. Nonetheless, the Bank does not generally offset such financial instruments for financial reporting purposes.

The following tables present components of financial instruments eligible for offsetting for the periods indicated:

	June 30, 2014						Gross Amounts Not Offset in the Consolidated Balance Sheet Financial

### NOTE 14 – FAIR VALUE DISCLOSURES

<sup>&</sup>quot;Fair value" is defined by FASB ASC 820, Fair Value Measurements and Disclosure ("FASB ASC 820"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between

market participants at the measurement date. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The hierarchy is broken down into the following three levels, based on the reliability of inputs:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs for the asset or liability that reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

Determination of Fair Value

The Company uses the valuation methodologies listed below to measure different financial instruments at fair value. An indication of the level in the fair value hierarchy in which each instrument is generally classified is included. Where appropriate, the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Available-for-sale securities. Available-for-sale securities are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities. The Company's available-for-sale securities that are traded on an active exchange, such as the New York Stock Exchange, are classified as Level 1. Available-for-sale securities valued using matrix pricing are classified as Level 2. Available-for-sale securities valued using matrix pricing that has been adjusted to compensate for the present value of expected cash flows, market liquidity, credit quality and volatility are classified as Level 3.

Mortgage servicing rights. The Company records MSRs at fair value on a recurring basis with subsequent remeasurement of MSRs based on change in fair value. An estimate of the fair value of the Company's MSRs is determined by utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. All of the Company's MSRs are classified as Level 3. For additional information about the Company's valuation of MSRs, see Note 12, Mortgage Servicing Rights.

Derivative instruments. The Company's derivative instruments consist of commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans. Fair value of these derivative instruments is measured on a recurring basis using recent observable market prices. The Company also enters into interest rate swaps to meet the financing, interest rate and equity risk management needs of its customers. The fair value of these instruments is either an observable market price or a discounted cash flow valuation using the terms of swap agreements but substituting original interest rates with prevailing interest rates ranging from 1.50% to 3.65%. The Company also considers the associated counterparty credit risk when determining the fair value of these instruments. The Company's interest rate swaps, commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans are classified as Level 3.

Loans held for sale. In the second quarter of 2014 the Company elected to carry Loans held for sale at fair value. The fair value of loans held for sale is based on commitments outstanding from investors as well as what secondary markets are currently offering for portfolios with similar characteristics. Therefore, loans held for sale are subjected

to recurring fair value adjustments and are classified as Level 2. The Company obtains quotes, bids or pricing indications on all or part of these loans directly from the buyers. Premiums and discounts received or to be received on the quotes, bids or pricing indications are indicative of the fact that the cost is lower or higher than fair value. Loans held for sale prior to the second quarter of 2014 were carried at the lower of cost or estimated fair value and were subject to nonrecurring fair value adjustments.

Impaired loans. Loans considered impaired under FASB ASC 310 are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans are subject to nonrecurring fair value adjustments to reflect (1) partial write-downs that are based on the observable market price or current appraised value of the collateral, or (2) the full charge-off of the loan carrying value. All of the Company's impaired loans are classified as Level 3.

Other real estate owned. OREO is carried at the lower of cost or estimated fair value, less estimated selling costs and is subject to nonrecurring fair value adjustments. Estimated fair value is determined on the basis of independent appraisals and other relevant factors less an average of 7% for estimated selling costs. All of the Company's OREO is classified as Level 3.

Off-Balance sheet financial instruments. The fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreement and the present creditworthiness of the counterparties. The Company has reviewed the unfunded portion of commitments to extend credit as well as standby and other letters of credit, and has determined that the fair value of such financial instruments is not material. The Company classifies the estimated fair value of credit-related financial instruments as Level 3.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Fair Value of Financial Instruments

FASB ASC 825, Financial Instruments ("FASB ASC 825"), requires that the Company disclose estimated fair values for its financial instruments. Fair value estimates, methods and assumptions are set forth below for the Company's financial instruments.

Cash and Due From Banks. The carrying amounts for cash and due from banks approximate fair values due to their immediate and shorter-term maturities.

Loans and Leases. Fair values are estimated for portfolios of loans and leases with similar financial characteristics. The fair value of loans and leases is calculated by discounting scheduled cash flows through the estimated maturity using rates the Company would currently offer customers based on the credit and interest rate risk inherent in the loan or lease. Assumptions regarding credit risk, cash flows and discount rates are judgmentally determined using available market and borrower information. Estimated maturity represents the expected average cash flow period, which in some instances is different than the stated maturity. This entrance price approach results in a calculated fair value that would be different than an exit or estimated actual sales price approach and such differences could be significant. All of the Company's loans and leases are classified as Level 3.

Deposit Liabilities. Under FASB ASC 825, the fair value of deposits with no stated maturity, such as noninterest bearing demand deposits, interest bearing demand deposits and savings, is equal to the amount payable on demand as of the reporting date. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the prevailing rates offered for deposits of similar maturities. The Company's noninterest bearing demand deposits, interest bearing demand deposits and savings are classified as Level 1. Certificates of deposit are classified as Level 2.

Debt. The carrying amounts for federal funds purchased and repurchase agreements approximate fair value because of their short-term maturity. The fair value of the Company's fixed-term Federal Home Loan Bank ("FHLB") advances is based on the discounted value of contractual cash flows. The discount rate is estimated using the prevailing rates available for advances of similar maturities. The fair value of the Company's junior subordinated debt is based on market prices or dealer quotes. The Company's federal funds purchased, repurchase agreements and junior subordinated debt are classified as Level 1. FHLB advances are classified as Level 2.

Lending Commitments. The Company's lending commitments are negotiated at prevailing market rates and are relatively short-term in nature. As a matter of policy, the Company generally makes commitments for fixed-rate loans for relatively short periods of time. Therefore, the estimated value of the Company's lending commitments approximates the carrying amount and is immaterial to the financial statements. The Company's lending commitments are classified as Level 2. The Company's off-balance sheet commitments including letters of credit, which totaled \$100.6 million at June 30, 2014, are funded at current market rates at the date they are drawn upon. It is management's opinion that the fair value of these commitments would approximate their carrying value, if drawn upon.

The following table presents carrying and fair value information of financial instruments at June 30, 2014 and December 31, 2013:

			December 31,		
	Carrying Value	Fair Value	Carrying Value	Fair Value	
	varue	value	value	varue

### NOTE 16 – COMMITMENTS AND CONTINGENT LIABILITIES

The nature of the Company's business ordinarily results in a certain amount of claims, litigation, investigations and legal and administrative cases and proceedings. Although the Company and its subsidiaries have developed policies and procedures to minimize the impact of legal noncompliance and other disputes, and endeavored to provide reasonable insurance coverage, litigation and regulatory actions present an ongoing risk.

The Company and its subsidiaries are engaged in lines of business that are heavily regulated and involve a large volume of financial transactions and potential transactions with numerous customers or applicants. From time to time, borrowers, customers, former employees and other third parties have brought actions against the Company or its subsidiaries, in some cases claiming substantial damages. Financial services companies are subject to the risk of class action litigation and, from time to time, the Company and its subsidiaries are subject to such actions brought against it. Additionally, the Bank is, and management expects it to be, engaged in a number of foreclosure proceedings and other collection actions as part of its lending and leasing collections activities, which, from time to time, have resulted in counterclaims against the Bank. Various legal proceedings have arisen and may arise in the future out of claims against entities to which the Company is a successor as a result of business combinations. The Company's insurance has deductibles, and will likely not cover all such litigation or other proceedings or the costs of defense. The Company and its subsidiaries may also be subject to enforcement actions by federal or state regulators, including the Securities and Exchange Commission, the Federal Reserve, the FDIC, the Consumer Financial Protection Bureau, the

Department of Justice, state attorneys general and the Mississippi Department of Banking and Consumer Finance.

When and as the Company determines it has meritorious defenses to the claims asserted, it vigorously defends against such claims. The Company will consider settlement of claims when, in management's judgment and in consultation with counsel, it is in the best interests of the Company to do so.

The Company cannot predict with certainty the cost of defense, the cost of prosecution or the ultimate outcome of litigation and other proceedings filed by or against it, its directors, management or employees, including remedies or damage awards. On at least a quarterly basis, the Company assesses its liabilities and contingencies in connection with outstanding legal proceedings as well as certain threatened claims (which are not considered incidental to the ordinary conduct of the Company's business) utilizing the latest and most reliable information available. For matters where a loss is not probable or the amount of the loss cannot be estimated, no accrual is established. For matters where it is probable the Company will incur a loss and the amount can be reasonably estimated, the Company establishes an accrual for the loss. Once established, the accrual is adjusted periodically to

reflect any relevant developments. The actual cost of any outstanding legal proceedings or threatened claims, however, may turn out to be substantially higher than the amount accrued. Further, the Company's insurance will not cover all such litigation, other proceedings or claims, or the costs of defense.

While the final outcome of any legal proceedings is inherently uncertain, based on the information available, advice of counsel and available insurance coverage, management believes that the litigation-related expense of \$11.2 million accrued as of June 30, 2014 is adequate and that any incremental liability arising from the Company's legal proceedings and threatened claims, including the matters described herein and those otherwise arising in the ordinary course of business, will not have a material adverse effect on the Company's business or consolidated financial condition. It is possible, however, that future developments could result in an unfavorable outcome for or resolution of any one or more of the lawsuits in which the Company or its subsidiaries are defendants, which may be material to the Company's results of operations for a given fiscal period.

On August 16, 2011, a shareholder filed a putative derivative action purportedly on behalf of the Company in the Circuit Court of Lee County, Mississippi, against certain current and past executive officers and members of the Board of Directors of the Company. The plaintiff in this shareholder derivative lawsuit asserts that the individual defendants violated their fiduciary duties by allegedly issuing materially false and misleading statements regarding the Company's business and financial results. The plaintiff is seeking to recover alleged damages to the Company in an unspecified amount, equitable and/or injunctive relief, and attorney's fees. A motion to dismiss filed by the defendants is pending decision by the Court. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations.

On May 18, 2010, the Bank was named as a defendant in a class action lawsuit filed by an Arkansas customer of the Bank in the U.S. District Court for the Northern District of Florida. The suit challenges the manner in which overdraft fees were charged and the policies related to posting order of debit card and ATM transactions. The suit also makes a claim under Arkansas' consumer protection statute. The plaintiff is seeking to recover damages in an unspecified amount and equitable relief. The case was transferred to pending multi-district litigation in the U.S. District Court for the Southern District of Florida wherein an order was entered certifying a class in this case. The consolidated pretrial proceedings in the multi-district litigation court have concluded and the case has been remanded to the U.S. District Court for the Northern District of Florida for further proceedings. There are significant uncertainties involved in any purported class action litigation. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations. However, there can be no assurance that an adverse outcome or settlement would not have a material adverse effect on the Company's consolidated results of operations for a given fiscal period.

On July 31, 2014, a law firm announced that it had filed a purported class-action lawsuit against the Company and its Chief Executive Officer and Chief Financial Officer in the United States District Court for the Middle District of Tennessee on behalf of certain purchasers of the Company's common stock. As of the filing date of this Form 10-Q, the Company has not been served with process as to the lawsuit. The filing alleges that the defendants made materially false and misleading statements regarding the Company's procedures, systems and process related to certain of its compliance programs. With no service of process and the July 31, 2014 filing date, the Company lacks sufficient information as to the subject suit, therefore cannot determine the probability of any unfavorable outcome, if any, to the Company at this time.

NOTE 17 - LONG-TERM DEBT

In 2002, the Company issued \$128.9 million in 8.15% Junior Subordinated Debt Securities to BancorpSouth Capital Trust I (the "Trust"), a business trust. The Trust used the proceeds from the issuance of five million shares of 8.15% trust preferred securities, \$25 face value per share, to acquire the 8.15% Junior Subordinated Debt Securities. Both the Junior Subordinated Debt Securities and the trust preferred securities mature on January 28, 2032, and are callable at the option of the Company. The Company redeemed the Junior Subordinated Debt Securities and the related trust preferred securities at par on August 12, 2013. As a result of the redemption, a pre-tax charge of \$2.9 million was recorded during the third quarter of 2013 to write-off unamortized issuance costs.

On August 8, 2013, the Company entered into a Credit Agreement with U.S. Bank National Association ("U.S. Bank") as a lender and administrative agent, and First Tennessee Bank, National Association, as a lender.

The Credit Agreement includes an unsecured revolving loan of up to \$25.0 million that terminates and the outstanding balance of which is payable in full on August 8, 2015, and an unsecured multi-draw term loan of up to \$60.0 million, which commitment terminated on February 28, 2014 and the outstanding balance of which is payable in full on August 8, 2018. The proceeds from the term loan may be used to repurchase trust preferred securities, and the proceeds from the revolving loan may be used for working capital, capital expenditures and other lawful corporate purposes. Borrowings under the Credit Agreement bear interest at a Eurocurrency or base rate plus, in each case, an applicable interest rate margin.

The Company had long-term borrowings from U.S. Bank totaling \$52.3 million at June 30, 2014 and \$48.2 million at December 31, 2013. The Company also had long-term borrowings from FHLB of \$31.5 million at June 30, 2014 and \$33.5 million at December 31, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

#### FORWARD-LOOKING STATEMENTS

Certain statements contained in this report may not be based upon historical facts and are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements may be identified by their reference to a future period or periods or by the use of forward-looking terminology such as "anticipate," "believe," "could," "estimate," "expect," "foresee," "intend," "may," "might," "plan," "will," or "would" or future or conditional verb tenses and variations or negatives such terms. These forward-looking statements include, without limitation, those relating to the terms, timing and closings of the proposed mergers with Ouachita Bancshares Corp. and Central Community Corporation, the ongoing discussions regarding, and the Company's possible entry into, the consent order proposed by the FDIC and any remedial measures and related requirements that may arise therfrom, the Company's undertaking and performance of the necessary actions to remediate and fully resolve those concerns regarding the Company's procedures, systems and processes related to certain of its compliance programs, including its Bank Secrecy Act and anti-money-laundering programs, that have been identified by its federal bank regulators, the findings and results of the investigation by the CFPB of the Company's fair lending practices, the acceptance by customers of Ouachita Bancshares Corp. and Central Community Corporation of the Company's products and services if the proposed mergers close, the outcome of any instituted, pending or threatened material litigation, amortization expense for intangible assets, goodwill impairments, loan impairment, utilization of appraisals and inspections for real estate loans, maturity, renewal or extension of construction, acquisition and development loans, net interest revenue, fair value determinations, the amount of the Company's non-performing loans and leases, additions to OREO, credit quality, credit losses, liquidity, off-balance sheet commitments and arrangements, valuation of mortgage servicing rights, allowance and provision for credit losses, continued weakness in the economic environment, early identification and resolution of credit issues, utilization of non-GAAP financial measures, the ability of the Company to collect all amounts due according to the contractual terms of loan agreements, the Company's reserve for losses from representation and warranty obligations, the Company's foreclosure process related to mortgage loans, the resolution of non-performing loans that are collaterally dependent, real estate values, fully-indexed interest rates, interest rate risk, interest rate sensitivity,

calculation of economic value of equity, impaired loan charge-offs, troubled debt restructurings, diversification of the Company's revenue stream, liquidity needs and strategies, sources of funding, net interest margin, declaration and payment of dividends, cost saving initiatives, improvement in the Company's efficiencies, operating expense trends, future acquisitions and consideration to be used therefore, the impact of litigation regarding debit card fees and the impact of certain claims and ongoing, pending or threatened litigation, administrative and investigatory matters. The Company cautions readers not to place undue reliance on the forward-looking statements contained in this report, in that actual results could differ materially from those indicated in such forward-looking statements as a result of a variety of factors. These factors may include, but are not limited to, the ability of the Company to resolve to the satisfaction of its federal bank regulators those identified concerns regarding the Company's procedures, systems and processes related to certain of its compliance programs, including its Bank Secrecy Act and anti-money laundering programs, the Company's ability to comply with the consent order proposed by the FDIC if the Company enters into such consent order, the findings and results of the Consumer Financial Protection Bureau in its review of the Company's fair lending practices, the ability of the Company, Ouachita Bancshares Corp. and Central Community Corporation

to obtain regulatory approval of and close the proposed mergers, the potential impact upon the Company of the delay in the closings, if any, of these proposed mergers, conditions in the financial markets and economic conditions generally, the adequacy of the Company's provision and allowance for credit losses to cover actual credit losses, the credit risk associated with real estate construction, acquisition and development loans, losses resulting from the significant amount of the Company's other real estate owned, limitations on the Company's ability to declare and pay dividends, the impact of legal, administrative and investigatory matters and proceedings, the availability of capital on favorable terms if and when needed, liquidity risk, governmental regulation, including the Dodd Frank Act, and supervision of the Company's operations, the short-term and long-term impact of changes to banking capital standards on the Company's regulatory capital and liquidity, the impact of regulations on service charges on the Company's core deposit accounts, the susceptibility of the Company's business to local economic and environmental conditions, the soundness of other financial institutions, changes in interest rates, the impact of monetary policies and economic factors on the Company's ability to attract deposits or make loans, volatility in capital and credit markets, reputational risk, the impact of hurricanes or other adverse weather events, any requirement that the Company write down goodwill or other intangible assets, diversification in the types of financial services the Company offers, the Company's ability to adapt its products and services to evolving industry standards and consumer preferences, competition with other financial services companies, risks in connection with completed or potential acquisitions, the Company's growth strategy, interruptions or breaches in the Company's information system security, the failure of certain third party vendors to perform, unfavorable ratings by rating agencies, dilution caused by the Company's issuance of any additional shares of its common stock to raise capital or acquire other banks, bank holding companies, financial holding companies and insurance agencies, other factors generally understood to affect the assets, business, cash flows, financial condition, liquidity, prospects and/or results of operations of financial services companies and other factors detailed from time to time in the Company's press releases, reports and other filings with the Securities and Exchange Commission. Forward-looking statements speak only as of the date that they were made, and, except as required by law, the Company does not undertake any obligation to update or revise forward-looking statements to reflect events or circumstances that occur after the date of this report.

#### **OVERVIEW**

BancorpSouth, Inc. (the "Company") is a regional financial holding company headquartered in Tupelo, Mississippi with \$13.0 billion in assets at June 30, 2014. BancorpSouth Bank (the "Bank"), the Company's wholly-owned banking subsidiary, has commercial banking operations in Mississippi, Tennessee, Alabama, Arkansas, Texas, Louisiana, Florida and Missouri. The Bank's insurance agency subsidiary also operates an office in Illinois. The Bank and its insurance agency and brokerage subsidiaries provide commercial banking, leasing, mortgage origination and servicing, insurance, brokerage and trust services to corporate customers, local governments, individuals and other financial institutions through an extensive network of branches and offices.

Management's discussion and analysis provides a narrative discussion of the Company's financial condition and results of operations. For a complete understanding of the following discussion, please refer to the unaudited consolidated financial statements for the three-month and six-month periods ended June 30, 2014 and 2013 and as of December 31, 2013 and the notes to such financial statements found under "Part I, Item 1. Financial Statements" of this report. This discussion and analysis is based on such reported financial information.

As a financial holding company, the financial condition and operating results of the Company are heavily influenced by economic trends nationally and in the specific markets in which the Company's subsidiaries provide financial services. Generally, during recent years, the pressures of the national and regional economic cycle created a difficult operating environment for the financial services industry. The Company was not immune to such pressures and the economic downturn had a negative impact on the Company and its customers in all of the markets that it

serves. While this impact was reflected in the credit quality measures during 2010 and 2011, the Company's financial condition improved during 2012 and 2013 and is continuing to improve during the first six months of 2014 as reflected by decreases in the allowance for credit losses, gross charge-offs, total NPLs and total non-performing assets ("NPAs"), when compared to prior periods.

Management believes that the Company is better positioned with respect to overall credit quality as evidenced by the continued improvement in credit quality metrics especially when comparing June 30, 2014 to December 31, 2013 and June 30, 2013. Management believes, however, that future weakness in the economic environment could adversely affect the strength of the credit quality of the Company's assets overall. Therefore, management will continue to focus on early identification and resolution of any credit issues.

The largest source of the Company's revenue is derived from the operation of its principal operating subsidiary, the Bank. The financial condition and operating results of the Bank are affected by the level and volatility of interest rates on loans, investment securities, deposits and other borrowed funds, and the impact of economic downturns on loan demand, collateral value and creditworthiness of existing borrowers. The financial services industry is highly competitive and heavily regulated. The Company's success depends on its ability to compete aggressively within its markets while maintaining sufficient asset quality and cost controls to generate net income.

The Company's debit card revenue remained relatively stable for the comparable three-month period ended June 30, 2014 and 2013. During 2012, the Company's debit card revenue decreased as a result of the Durbin Amendment. The Federal Reserve's final rule implementing the Durbin Amendment was challenged in court, with a lower court ruling adverse to the Federal Reserve's implementation of the final rule being reversed on appeal. The effect of subsequent rule changes, if any by the Federal Reserve are uncertain, but could impact the Company's debit card revenue in future reporting periods.

The information that follows is provided to enhance comparability of financial information between periods and to provide a better understanding of the Company's operations:

In addition to financial ratios based on measures defined by U.S. GAAP, the Company utilizes tangible shareholders' equity, tangible asset and tangible book value per share measures when evaluating the performance of the Company. Tangible shareholders' equity is defined by the Company as total shareholders' equity less goodwill and identifiable intangible assets. Tangible assets are defined by the Company as total assets less goodwill and identifiable intangible assets. Management believes the ratio of tangible shareholders' equity to tangible assets to be important to investors who are interested in evaluating the adequacy of the Company's capital levels. Tangible book value per share is defined by the Company as tangible shareholders' equity divided by total common shares outstanding. Management believes that tangible book value per share is important to investors who are interested in changes from period to period in book value per share exclusive of changes in intangible assets. The following table reconciles tangible shareholders' equity, tangible assets and tangible book value per share as presented above to U.S. GAAP financial measures as reflected in the Company's unaudited consolidated financial statements:

#### FINANCIAL HIGHLIGHTS

The Company reported net income of \$30.9 million for the second quarter of 2014, compared to net income of \$20.8 million for the same quarter of 2013. For the first six months of 2014, the Company reported net income \$59.3 million compared to net income of \$41.6 million for the first six months of 2013. A factor contributing to the increase in net income for the three months and six months ended June 30, 2014 was the increase in net interest income, as net interest revenue was \$103.1 million for the second quarter of 2014, compared to \$98.2 million for the second quarter

of 2013. The increase in net interest revenue is a result of a larger decrease in interest expense associated with interest-bearing liabilities than the decrease in interest revenue associated with interest-earning assets. The increase in net interest revenue was also a result of the decrease in the provision for credit losses, as no provision was recorded in the second quarter and first six months of 2014, compared to a provision of \$3.0 million and \$7.0 million for the second quarter and first six months of 2013. The decrease in the provision for credit losses reflected the impact of a decrease in NPL formation during the first six months of 2014, as NPLs decreased from \$120.4 million at December 31, 2013 to \$73.7 million at June 30, 2014. Net charge-offs decreased to \$2.6 million, or 0.11% of average loans and leases, during the second quarter of 2014, compared to \$4.6 million, or 0.21% of average loans and leases, during the first six months of 2014, compared to \$6.1 million, or 0.13% of average loans and leases, during the first six months of 2014, compared to \$10.4 million, or 0.24% of average loans and leases, during the first six months of 2013.

During 2013 and the first six months of 2014, the Company continued its focus on improving credit quality and reducing NPLs, especially in the real estate construction, acquisition and development loan portfolio as

evidenced by the decrease in that portfolio's nonaccrual loans by \$8.4 million to \$9.2 million at June 30, 2014 from \$17.6 million at December 31, 2013 and a decrease of \$30.1 million from \$39.3 million at June 30, 2013.

The primary source of revenue for the Company is the net interest revenue earned by the Bank. Net interest revenue is the difference between interest earned on loans, investments and other earning assets and interest paid on deposits and other obligations. Net interest revenue was \$103.1 million for the second quarter of 2014, an increase of \$4.9 million, or 5.0%, from \$98.2 million for the second quarter of 2013. Net interest revenue was \$204.6 million for the first six months of 2014, an increase of \$8.3 million, or 4.2%, from \$196.3 million for the first six months of 2013. Net interest revenue is affected by the general level of interest rates, changes in interest rates and changes in the amount and composition of interest earning assets and interest bearing liabilities. The Company's objective is to manage those assets and liabilities to maximize net interest revenue, while balancing interest rate, credit, liquidity and capital risks. The increase in net interest revenue for the second quarter and first six months of 2014 compared to the second quarter and first six months of 2013 was primarily a result of the larger decrease in interest expense than the decrease in interest revenue as the rates paid on interest-bearing liabilities declined by a greater amount than the yield on earning assets. The decline in earning asset yields was primarily a result of the declining loan yields as interest rates continue to be at historically low levels with this decline somewhat offset by the decrease in lower yielding short-term investments. Rates paid on interest-bearing liabilities decreased as a result of reduced average balances and rates on interest bearing demand and other time deposits, as well as the reduction in the average balance and rate on junior subordinated debt resulting from the redemption of the 8.15% trust preferred securities.

Interest revenue decreased approximately \$500,000, or 0.5%, in the second quarter of 2014 compared to the second quarter of 2013 and decreased \$2.9 million, or 1.3%, for the first six months of 2014 compared to the first six months of 2013. The Company has managed to replace loan runoff with new loan production, primarily in its Alabama, Texas and Louisiana markets. The decrease in interest revenue was offset by the decrease in interest expense, as the Company experienced a decrease in interest bearing and other time deposit and their corresponding rates, which resulted in a decrease in interest expense of \$5.4 million, or 39.0%, in the second quarter of 2014 compared to the second quarter of 2013 and a decrease of \$11.3 million, or 39.1%, for the first six months of 2014 compared to the first six months of 2013. The Company also redeemed the 8.15% trust preferred securities during the third quarter of 2013, which contributed to the reduction in interest expense for the second quarter of 2014.

The Company attempts to diversify its revenue stream by increasing the amount of revenue received from mortgage lending operations, insurance agency activities, brokerage and securities activities and other activities that generate fee income. Management believes this diversification is important to reduce the impact of fluctuations in net interest revenue on the overall operating results of the Company. Noninterest revenue decreased \$6.3 million, or 8.2%, for the second quarter of 2014 compared to the second quarter of 2013 and decreased \$11.1 million, or 7.5%, for the first six months of 2014 compared to the first six months of 2013. One of the primary contributors to the decrease in noninterest revenue for the second quarter and first six months of 2014 compared to the second quarter and first six months of 2013 was the decrease in mortgage lending revenue to \$9.1 million for the second quarter of 2014 compared to \$17.9 million for the second guarter of 2013 and to \$12.5 million for the first six months of 2014 compared to \$30.2 million for the first six months of 2013. Mortgage origination volume decreased 33.1% to \$291.0 million for the second quarter of 2014 compared to \$435.0 million for the second quarter of 2013 and decreased 43.3% to \$488.1 million for the first six months of 2014 compared to \$860.8 million for the first six months of 2013. The decrease in mortgage origination volume contributed to a decrease in origination revenue to \$8.8 million for the second guarter of 2014, compared to \$10.5 million for the second guarter of 2013 and to \$10.7 million for the first six months of 2014 compared to \$19.7 million for the first six months of 2013. The decrease in mortgage lending revenue was also impacted by the change in fair value of MSRs. The fair value of MSRs decreased \$2.1 million during the second quarter of 2014 compared to an increase of \$5.3 million during the second quarter of 2013 and decreased \$3.7 million for the first six months of 2014 compared to an increase of \$6.3 million for the first six months of 2013.

The increase in insurance commissions that are received from insurance carriers are primarily a result of new policies and growth from existing customers coupled with the revenue contributed by the acquisition of certain assets of GEM in December 2013 and Knox in April 2014. There were no significant non-recurring noninterest revenue items during the first six months of 2014 or 2013.

Total noninterest expense decreased 10.1% to \$128.0 million for the second quarter of 2014 compared to \$142.3 million for the second quarter of 2013 and decreased 8.3% to \$254.7 million for the first six months of 2014 compared to \$277.6 million for the first six months of 2013. Salaries and employee benefits expense decreased to \$74.7 million and \$153.6 million for the second quarter and first six months of 2014, respectively, compared to \$78.3 million and \$157.7 million for the second quarter and first six months of 2013, respectively. The decrease in

salaries and employee benefits for the comparable periods was primarily related to decreases in incentive, retirement and group health expenses during 2014. A pre-tax charge of \$10.9 million was recorded during the second quarter of 2013 related to additional benefits offered under the voluntary early retirement program to certain employees that met job classification, age and years-of-service criteria.

Legal expense decreased to \$3.0 million and \$4.9 million in the second quarter and first six months of 2014, respectively, from \$3.9 million and \$13.3 million in the second quarter and first six months of 2013, respectively. The decrease in legal expense was primarily a result of a charge of \$6.8 million to legal expense during the first six months of 2013 that was recorded to increase the litigation accrual related to various legal matters with no related charge deemed necessary during the first six months of 2014. The Company continues to focus attention on controlling noninterest expense. The major components of net income are discussed in more detail below.

#### **RESULTS OF OPERATIONS**

Net Interest Revenue

Net interest revenue is the difference between interest revenue earned on assets, such as loans, leases and securities, and interest expense paid on liabilities, such as deposits and borrowings, and continues to provide the Company with its principal source of revenue. Net interest revenue is affected by the general level of interest rates, changes in interest rates and changes in the amount and composition of interest-earning assets and interest bearing liabilities. The Company's long-term objective is to manage interest-earning assets and interest-bearing liabilities to maximize net interest revenue, while balancing interest rate, credit and liquidity risk. Net interest margin is determined by dividing fully taxable equivalent net interest revenue by average earning assets. For purposes of the following discussion, revenue from tax-exempt loans and investment securities has been adjusted to a fully taxable equivalent ("FTE") basis, using an effective tax rate of 35%. The following table presents average interest earning assets, average interest bearing liabilities, net interest revenue-FTE, net interest margin-FTE and net interest rate spread for the three months and six months ended June 30, 2014 and 2013:

- (1) Includes taxable equivalent adjustment to interest of \$1.7 million and \$1.6 million for the six months ended June 30, 2014 and 2013, respectively, using an effective tax rate of 35%
- (2) Includes non-accrual loans
- (3) Includes taxable equivalent adjustment to interest of \$4.0 million and \$4.2 million for the six months ended June 30, 2014 and 2013, respectively, using an effective tax rate of 35%

Net interest revenue-FTE for the three-month period ended June 30, 2014 increased \$4.8 million, or 4.7%, compared to the same period in 2013. Net interest revenue-FTE for the six-month period ended June 30, 2014 increased \$8.1 million, or 4.0%, compared to the same period in 2013. The increase in net interest revenue-FTE was

primarily a result of the smaller decrease in interest revenue-FTE than the decrease in interest expense as the yield on earning assets increased slightly while the yields on interest-bearing liabilities decreased 21 basis points and 23 basis points for the comparable three-month and six-month periods. The slight increase in earning asset yields was primarily a result of the decrease in average lower yielding short term investments coupled with growth in loans during 2014. Yields on interest-bearing liabilities decreased as a result of rate decreases in virtually all interest bearing liability categories, but especially in junior subordinated debt as a result of the redemption of the 8.15% trust preferred securities.

Interest revenue-FTE for the three-month period ended June 30, 2014 decreased approximately \$580,000, or 0.5%, compared to the same period in 2013. Interest revenue-FTE for the six-month period ended June 30, 2014 decreased \$3.2 million, or 1.4%, compared to the same period in 2013. The increase in interest revenue-FTE for these periods was a result of the declining loan yields, as interest rates continued to be at historically low levels, being more than offset by loan growth noticed during the first six months of 2014 combined with the decrease in lower rate average short term investments. The yield on average interest-earning assets increased 6 basis points for the second quarter of 2014 compared to the same period in 2013 and 1 basis point for the first six months of 2014 compared to the same period in 2013. Average interest-earning assets decreased \$234.2 million, or 1.9%, for the three-month period ended June 30, 2014, compared to the same period in 2013. Average interest-earning assets decreased \$215.1 million, or 1.8%, for the six-month period ended June 30, 2014, compared to the same period in 2013.

Interest expense for the three-month period ended June 30, 2014 decreased \$5.4 million, or 39.0%, compared to the same period in 2013. Interest expense for the six-month period ended June 30, 2014 decreased \$11.3 million, or 39.1%, compared to the same period in 2013. The decrease in interest expense for these periods was a result of the decrease in interest bearing and other time deposit and their corresponding rates. Also, 8.15% trust preferred securities were redeemed during the third quarter of 2013 resulting in a decrease in interest expense related to junior subordinated debt securities, as well as in the rates paid on those securities. This combined activity resulted in an overall decrease in the average rate paid of 21 basis points for the second quarter of 2014 compared to the second quarter of 2013 and 23 basis points for the first six months of 2014 compared to the same period in 2013. Average interest bearing liabilities decreased \$497.1 million, or 5.5%, for the three-month period ended June 30, 2014 compared to the same period in 2013. Average interest bearing liabilities decreased in average interest bearing liabilities for these periods was a result of decreases in average interest bearing demand deposits and other time deposits, as well as decreases in average junior subordinated debt resulting from the redemption of the 8.15% trust preferred securities during the third quarter of 2013.

Net interest margin was 3.59% for the three months ended June 30, 2014, an increase of 23 basis points from 3.36% for the three months ended June 30, 2013. Net interest margin was 3.57% for the six months ended June 30, 2014, an increase of 20 basis points from 3.37% for the six months ended June 30, 2013. The increase in the net interest margin for these periods was due to the yield on earning assets increasing by 6 basis points and 1 basis point for the comparable three-month and six-month periods compared to a decline in the yield on interest-bearing liabilities of 21 basis points and 23 basis points for the comparable three-month and six-month periods coupled with a smaller decline in average earning assets than the decline in average interest bearing liabilities. The slight increase in the earning asset yield was primarily a result of the lower yielding short-term investments being used to fund loan growth at rates higher than those noticed on the short-term investments while the decrease in average rates paid on interest bearing liabilities was related to decreases in interest bearing and other time deposits and junior subordinated debt and their corresponding rates.

The interest rate sensitivity gap is the difference between the maturity or re-pricing opportunities of interest sensitive assets and interest sensitive liabilities for a given period of time. A prime objective of the Company's asset/liability management is to maximize net interest margin while maintaining a reasonable mix of interest sensitive assets and liabilities. The following table presents the Company's interest rate sensitivity at June 30, 2014:

	Interest Rate Sensitivity - Maturing or Repricing Opportunities						
			91	Days	Over One		
	0  to  9	90	to		Year to	Over	
	Days		On	ie Year	Five Years	Five Years	
	(In the	ousands)

Other	-		-		33	-	
Total interest bearing liabilities	6,604	,170	93	6,452	855,948	59,114	
Interest rate sensitivity gap	\$ (2	,758,208)	\$	1,191,099	\$ 4,147,017	\$ 758,853	
Cumulative interest sensitivity gap	\$ (2	,758,208)	\$	(1,567,109)	\$ 2,579,908	\$ 3,338,761	

In the event interest rates increase after June 30, 2014, based on this interest rate sensitivity gap, the Company could experience decreased net interest revenue in the following one-year period, as the cost of funds could increase at a more rapid rate than interest revenue on interest-earning assets. However, the Company's historical repricing sensitivity on interest-bearing demand deposits and savings suggests that these deposits, while having the ability to reprice in conjunction with rising market rates, often exhibit less repricing sensitivity to a change in market rates, thereby somewhat reducing the exposure to rising interest rates. In the event interest rates decline after June 30, 2014, based on this interest rate sensitivity gap, it is possible that the Company could experience slightly increased net interest revenue in the following one-year period. However, any potential benefit to net interest revenue in a falling rate environment is mitigated by implied rate floors on interest-bearing demand deposits and savings resulting from the historically low interest rate environment. It should be noted that the balances shown in the table above are at June 30, 2014 and may not be reflective of positions at other times during the year or in subsequent periods. Allocations to specific interest rate sensitivity periods are based on the earlier of maturity or repricing dates. The elevated liability sensitivity in the 0 to 90 day category as compared to other categories was primarily a result of the Company's utilization of shorter term, lower cost deposits to fund earning assets.

As of June 30, 2014, the Bank had \$2.0 billion in variable rate loans with interest rates determined by a floor, or minimum rate. This portion of the loan portfolio had an average interest rate earned of 4.22%, an average maturity of 82 months and a fully-indexed interest rate of 3.83% at June 30, 2014. The fully-indexed interest rate is the interest rate that these loans would be earning without the effect of interest rate floors. While the Bank benefits from interest rate floors in the current interest rate environment, loans currently earning their floored interest rate may not

experience an immediate impact on the interest rate earned should key indices rise. Key indices include, but are not limited to, the Bank's prime rate, the Wall Street Journal prime rate and the London Interbank Offering Rate. At June 30, 2014, the Company had \$681.9 million, \$1.6 billion and \$655.5 million in variable rate loans with interest rates tied to the Bank's prime rate, the Wall Street Journal prime rate and the London Interbank Offering Rate, respectively. The Bank's net interest margin may be negatively impacted by the timing and magnitude of a rise in key indices.

#### Interest Rate Risk Management

Interest rate risk refers to the potential changes in net interest income and Economic Value of Equity ("EVE") resulting from adverse movements in interest rates. EVE is defined as the net present value of the balance sheet's cash flow. EVE is calculated by discounting projected principal and interest cash flows under the current interest rate environment. The present value of asset cash flows less the present value of liability cash flows derives the net present value of the Company's balance sheet. The Company's Asset / Liability Committee utilizes financial simulation models to measure interest rate exposure. These models are designed to simulate the cash flow and accrual characteristics of the Company's balance sheet. In addition, the models incorporate assumptions about the direction and volatility of interest rates, the slope of the yield curve, and the changing composition of the Company's balance sheet arising from both strategic plans and customer behavior. Finally, management makes assumptions regarding loan and deposit growth, pricing, and prepayment speeds.

The sensitivity analysis included in the tables below delineates the percentage change in net interest income and EVE derived from instantaneous parallel rate shifts of plus and minus 400, 300, 200 and 100 basis points. The impact of minus 400, 300, 200 and 100 basis point rate shocks as of June 30, 2014 and 2013 was not considered meaningful because of the historically low interest rate environment. However, the risk exposure should be mitigated by any downward rate shifts. Variances were calculated from the base case scenario, which reflected prevailing market rates, and the net interest income forecasts used in the calculations spanned 12 months for each scenario.

For the tables below, average life assumptions and beta values for non-maturity deposits were estimated based on the historical behavior rather than assuming an average life of one day and a beta value of 1, or 100%. Historical behavior suggests that non-maturity deposits have longer average lives for which to discount expected cash flows and lower beta values for which to re-price expected cash flows. The former results in a higher premium derived from the present value calculation, while the latter results in a slower rate of change and lower change in interest rate paid given a change in market rates. Both have a positive impact on the EVE calculation for rising rate shocks. Calculations using these assumptions are designed to delineate more precise risk exposure under the various shock scenarios. While the falling rate shocks are not considered meaningful in the historically low interest rate environment, the risk profile would be negatively impacted by downward rate shifts under these assumptions.

	Net Interest Income % Variance from Base Case

Provision for Credit Losses and Allowance for Credit Losses

In the normal course of business, the Bank assumes risks in extending credit. The Bank manages these risks through underwriting in accordance with its lending policies, loan review procedures and the diversification of its loan and lease portfolio. Although it is not possible to predict credit losses with certainty, management regularly reviews the characteristics of the loan and lease portfolio to determine its overall risk profile and quality.

The provision for credit losses is the periodic cost of providing an allowance or reserve for estimated probable losses on loans and leases. The Board of Directors has appointed a Credit Committee, composed of senior management and loan administration staff which meets on a quarterly basis to review the recommendations of several internal working groups developed for specific purposes including the allowance for loans and lease losses, impairments and charge-offs. The allowance for loan and lease losses group ("ALLL group") bases its estimates of credit losses on three primary components: (1) estimates of inherent losses that may exist in various segments of performing loans and leases; (2) specifically identified losses in individually analyzed credits; and (3) qualitative factors that may impact the performance of the loan and lease portfolio. Factors such as financial condition of the borrower and guarantor, recent credit performance, delinquency, liquidity, cash flows, collateral type and value are used to assess credit risk. Expected loss estimates are influenced by the historical losses experienced by the Bank for loans and leases of comparable creditworthiness and structure. Specific loss assessments are performed for loans and leases of significant size and delinquency based upon the collateral protection and expected future cash flows to determine the amount of impairment under FASB ASC 310, Receivables ("FASB ASC 310"). In addition, qualitative factors such as changes in economic and business conditions, concentrations of risk, loan and lease growth, acquisitions and changes in portfolio risk resulting from regulatory changes are considered in determining the adequacy of the level of the allowance for credit losses.

Attention is paid to the quality of the loan and lease portfolio through a formal loan review process. An independent loan review department of the Bank is responsible for reviewing the credit rating and classification of individual credits and assessing trends in the portfolio, adherence to internal credit policies and procedures and other factors that may affect the overall adequacy of the allowance for credit losses. The ALLL group is responsible for ensuring that the allowance for credit losses provides coverage of both known and inherent losses. The ALLL group meets at least quarterly to determine the amount of adjustments to the allowance for credit losses. The ALLL group is composed of senior management from the Bank's loan administration and finance departments. In 2010, the Bank established a real estate risk management group and an impairment group. The real estate risk management group oversees compliance with regulations and U.S. GAAP related to lending activities where real estate is the primary collateral. The

impairment group is responsible for evaluating loans that have been specifically identified through various channels, including examination of the Bank's watch list, past due listings, findings of the internal loan review department, loan officer assessments and loans to borrowers or industries known to be experiencing problems. For all loans identified, the responsible loan officer in conjunction with his or her credit administrator is required to prepare an impairment analysis to be reviewed by the impairment group. The impairment group deems that a loan is impaired if it is probable that the Company will be unable to collect all the contractual principal and interest on the loan. The impairment group also evaluates the circumstances surrounding the loan in order to determine if the loan officer used the most appropriate method for assessing the impairment of the loan (i.e., present value of expected future cash flows, observable market price or fair value of the underlying collateral). The impairment group meets on a monthly basis.

If concessions are granted to a borrower as a result of its financial difficulties, the loan is classified as a TDR and analyzed for possible impairment as part of the credit approval process. TDRs are reserved in accordance with FASB ASC 310 in the same manner as impaired loans that are not TDRs. Should the borrower's financial

condition, collateral protection or performance deteriorate, warranting reassessment of the loan rating or impairment, additional reserves may be required.

Loans of \$500,000 or more that become 60 or more days past due are identified for review by the impairment group, which decides whether an impairment exists and to what extent a specific allowance for credit loss should be made. Loans that do not meet these requirements may also be identified by management for impairment review, particularly if the loan is a small loan that is part of a larger relationship. Loans subject to such review are evaluated as to collateral dependency, current collateral value, guarantor or other financial support and likely disposition. Each such loan is individually evaluated for impairment. The impairment evaluation of real estate loans generally focuses on the fair value of underlying collateral obtained from appraisals, as the repayment of these loans may be dependent on the liquidation of the collateral. In certain circumstances, other information such as comparable sales data is deemed to be a more reliable indicator of fair value of the underlying collateral than the most recent appraisal. In these instances, such information is used in determining the impairment recorded for the loan. As the repayment of commercial and industrial loans is generally dependent upon the cash flow of the borrower or guarantor support, the impairment evaluation generally focuses on the discounted future cash flows of the borrower or guarantor support, as well as the projected liquidation of any pledged collateral. The impairment group reviews the results of each evaluation and approves the final impairment amounts, which are then included in the analysis of the adequacy of the allowance for credit losses in accordance with FASB ASC 310. Loans identified for impairment are placed in non-accrual status.

The Company's policy is to obtain an appraisal at the time of loan origination for real estate collateral securing a loan of \$250,000 or more, consistent with regulatory guidelines. The Company's policy is to obtain an updated appraisal when certain events occur, such as the refinancing of the debt, the renewal of the debt or events that indicate potential impairment. A new appraisal is generally ordered for loans greater than \$500,000 that have characteristics of potential impairment such as delinquency or other loan-specific factors identified by management, when a current appraisal (dated within the prior 12 months) is not available or when a current appraisal uses assumptions that are not consistent with the expected disposition of the loan collateral. In order to measure impairment properly at the time that a loan is deemed to be impaired, a staff appraiser may estimate the collateral fair value based upon earlier appraisals, sales contracts, approved foreclosure bids, comparable sales, officer estimates or current market conditions until a new appraisal is received. This estimate can be used to determine the extent of the impairment on the loan. After a loan is deemed to be impaired, it is management's policy to obtain an updated appraisal on at least an annual basis. Management performs a review of the pertinent facts and circumstances of each impaired loan, such as changes in outstanding balances, information received from loan officers and receipt of re-appraisals, on a monthly basis. As of each review date, management considers whether additional impairment should be recorded based on recent activity related to the loan-specific collateral as well as other relevant comparable assets. Any adjustment to reflect further impairments, either as a result of management's periodic review or as a result of an updated appraisal, are made through recording additional loan loss provisions or charge-offs.

At June 30, 2014, impaired loans totaled \$30.1 million, which was net of cumulative charge-offs of \$7.5 million. Additionally, the Company had specific reserves for impaired loans of \$1.4 million included in the allowance for credit losses. Impaired loans at June 30, 2014 were primarily from the Company's commercial real estate and construction, acquisition and development portfolios. Impaired loan charge-offs are determined necessary when management does not anticipate any future recovery of collateral values. The loans were evaluated for impairment based on the fair value of the underlying collateral securing the loan. As part of the impairment review process, appraisals are used to determine the property values. The appraised values that are used are generally based on the disposition value of the property, which assumes Bank ownership of the property "as-is" and a 180-360 day marketing period. If a current appraisal or one with an inspection date within the past 12 months using the necessary assumptions is not available, a new third-party appraisal is ordered. In cases where an impairment exists and a current appraisal is not available at the time of review, a staff appraiser may determine an estimated value based upon earlier appraisals, the sales contract, approved foreclosure bids, comparable sales, comparable appraisals, officer estimates or current market conditions until a new appraisal is received. After a new appraisal is received, the value used in the

review will be updated and any adjustments to reflect further impairments are made. Appraisals are obtained from state-certified appraisers based on certain assumptions which may include foreclosure status, bank ownership, OREO marketing period of 180-360 days, costs to sell, construction or development status and the highest and best use of the property. A staff appraiser may make adjustments to appraisals based on sales contracts, comparable sales and other pertinent information if an appraisal does not incorporate the effect of these assumptions.

When a guarantor is relied upon as a source of repayment, it is the Company's policy to analyze the strength of the guaranty. This analysis varies based on circumstances, but may include a review of the guarantor's personal and business financial statements and credit history, a review of the guarantor's tax returns and the preparation of a cash flow analysis of the guarantor. Management will continue to update its analysis on individual guarantors as circumstances change. Because of the continued weakness in the economy, subsequent analyses may result in the identification of the inability of some guarantors to perform under the agreed upon terms.

Any loan or portion thereof which is classified as "loss" by regulatory examiners or which is determined by management to be uncollectible, because of factors such as the borrower's failure to pay interest or principal, the borrower's financial condition, economic conditions in the borrower's industry or the inadequacy of underlying collateral, is charged off.

The following table provides an analysis of the allowance for credit losses for the periods indicated:

	Three months ended June 30,				Six months ended June 30,

loans and leases, net of unearned income (annualized) Allowance for credit losses to loans	0.00	0.00%		0.14%		0.00%		0.16%	
and leases, net of unearned income	1.58	1.58%		1.86%		1.58%		1.86%	

Net charge-offs decreased \$2.0 million, or 43.5%, in the second quarter of 2014 compared to the second quarter of 2013 and decreased \$4.3 million, or 41.4%, in the first six months of 2014 compared to the first six months of 2013. Decreases in net charge-offs in the first six months of 2014, coupled with a decline in NPLs, improvement in criticized assets and nonaccrual loan formation, contributed to no provision for credit losses being recorded in the second quarter of 2014 compared to a provision of \$3.0 million in the second quarter of 2013.

Annualized net charge-offs as a percentage of average loans and leases decreased to 0.11% for the second quarter of 2014, compared to 0.21% for the second quarter of 2013 and 0.13% for the first six months of 2014, compared to 0.24% for the same period in 2013. This decrease was primarily a result of decreased net losses within the real estate construction, acquisition and development and consumer real estate segment of the Company's loan and lease portfolio. The losses experienced in these segments were primarily a result of the weakened financial condition of the corresponding borrowers and guarantors. These borrowers' weakened state hindered their ability to service their loans with the Company, which caused a number of loans to become collateral dependent. Once it is determined a loan's repayment is dependent upon the underlying collateral, the loan is charged down to net realizable value or a specific reserve is allocated to the loan. This process resulted in the decreased level of charge-offs in the second quarter of 2014 compared to the second quarter of 2013, as updated appraisals came in closer to loan carrying values. Total recoveries were \$3.0 million and \$7.6 million for the three-month and six-month periods ended June 30, 2014, respectively, compared to \$7.7 million and \$11.6 million for the three-month and six-month periods ended June 30, 2013, respectively, with 58.0% of the second quarter 2014 recoveries being noticed in the real estate construction, acquisition and development and consumer mortgages real estate portfolios.

No provision for credit losses was recorded for the second quarter and first six months of 2014, compared to \$3.0 million and \$7.0 million for the second quarter and first six months of 2013, respectively. The decrease in the provision for credit losses for these periods was a result of the decrease in net charge-offs, a decline in the formation of new non-accrual loans, including fewer loans being identified for impairment, continued stabilization in values of previously impaired loans, and a significant decrease in NPLs. As of June 30, 2014 and 2013, 46.7% and 70.6%, respectively, of nonaccrual loans had been charged down to net realizable value or had specific reserves to reflect recent appraised values. As a result, impaired loans had an aggregate net book value of 80.0% and 68% of their contractual principal balance at June 30, 2014 and 2013, respectively. Non-accrual loans not impaired are loans that either fall below the impairment threshold or are not determined to be collaterally dependant.

The allowance for credit losses decreased \$13.9 million to \$147.1 million at June 30, 2014 compared to \$161.0 million at June 30, 2013. The decrease was a result of improving credit metrics since June 30, 2013, including reductions in classified, non-performing and impaired loans and lower net charge-off levels.

The breakdown of the allowance by loan and lease category is based, in part, on evaluations of specific loan and lease histories and on economic conditions within specific industries or geographical areas. Accordingly, because all of these conditions are subject to change, the allocation is not necessarily indicative of the breakdown of any future allowance or losses. The following table presents (i) the breakdown of the allowance for credit losses by segment and class and (ii) the percentage of each segment and class in the loan and lease portfolio to total loans and leases at the dates indicated:

<sup>\*</sup> Included in Wealth Management revenue on the Consolidated Statement of Income

The Company's revenue from mortgage lending typically fluctuates as mortgage interest rates change and is primarily attributable to two activities - origination and sale of new mortgage loans and servicing mortgage loans. Since the Company does not hedge the change in fair value of its MSRs, mortgage revenue can be significantly affected by changes in the valuation of MSRs in changing interest rate environments. The Company's normal practice is to originate mortgage loans for sale in the secondary market and to either retain or release the associated MSRs with the loan sold. The Company records MSRs at fair value on a recurring basis with subsequent remeasurement of MSRs based on change in fair value in accordance with FASB ASC 860, Transfers and Servicing.

In the course of conducting the Company's mortgage lending activities of originating mortgage loans and selling those loans in the secondary market, various representations and warranties are made to the purchasers of the mortgage loans. These representations and warranties also apply to underwriting the real estate appraisal opinion of value for the collateral securing these loans. Under the representations and warranties, failure by the Company to comply with the underwriting and/or appraisal standards could result in the Company being required to repurchase the mortgage loan or to reimburse the investor for losses incurred (i.e., make whole requests) if such failure cannot be cured by the Company within the specified period following discovery. During the first six months of 2014, ten mortgage loans totaling approximately \$181,000 were repurchased or otherwise settled as a result of underwriting and appraisal standard exceptions or make whole requests. A loss of approximately \$181,000 was recognized related to these repurchased or otherwise settled as a result of underwriting and appraisal standard exceptions or make whole requests. A loss of approximately \$541,000 was recognized related to these repurchased or make whole loans.

At June 30, 2014, the Company had accrued \$1.1 million for its estimate of losses from representation and warranty obligations. The reserve was based on the Company's repurchase and loss trends, and quantitative and qualitative factors that may result in anticipated losses different than historical loss trends, including loan vintage, underwriting characteristics and macroeconomic trends.

Management believes that the Company's foreclosure process related to mortgage loans continues to operate effectively. Before beginning the foreclosure process, a mortgage loan foreclosure working group of the Bank reviews the identified delinquent loan. All documents and activities related to the foreclosure process are executed in-house by mortgage department personnel.

Origination revenue, a component of mortgage lending revenue, is comprised of gains or losses from the sale of the mortgage loans originated, origination fees, underwriting fees and other fees associated with the origination of loans. Mortgage loan origination volumes of \$291.0 million and \$435.0 million produced origination revenue of \$8.8 million and \$10.5 million for the quarters ended June 30, 2014 and 2013, respectively. Mortgage loan origination volumes of \$488.1 million and \$860.8 million produced origination revenue of \$10.7 million and \$19.7 million for the first six months ended June 30, 2014 and 2013, respectively. The decrease in mortgage origination revenue for the three months ended June 30, 2014 compared to June 30, 2013 is a result of interest rate volatility during the quarter, the decrease in origination volume and the strategic decision to portfolio shorter term mortgage originations.

Revenue from the servicing process, another component of mortgage lending revenue, includes fees from the actual servicing of loans. Revenue from the servicing of loans was \$4.1 million and \$3.9 million for the quarters ended June 30, 2014 and 2013, respectively. For the six months ended June 30, 2014 and 2013, revenue from the servicing of loans was \$8.2 million and \$7.7 million, respectively.

Changes in the fair value of the Company's MSRs are generally a result of changes in mortgage interest rates from the previous reporting date. An increase in mortgage interest rates typically results in an increase in the fair value of the MSRs while a decrease in mortgage interest rates typically results in a decrease in the fair value of MSRs. The fair value of MSRs is also impacted by principal payments, prepayments and payoffs on loans in the servicing portfolio. Decreases in value from principal payments, prepayments and payoffs were \$1.6 million and \$1.7 million for the second quarter of 2014 and 2013, respectively. Decreases in value from principal payments, prepayments and payoffs were \$2.8 million and \$3.4 million for the six months ended June 30, 2014 and 2013, respectively. The Company does not hedge the change in fair value of its MSRs and is susceptible to significant fluctuations in their value in a changing interest rate environment. Reflecting this sensitivity to interest rates, the fair value of MSRs decreased \$2.1 million and increased \$5.3 million for the second quarter of 2014 and 2013, respectively and decreased \$3.7 million and increased \$6.3 million for the first six months of 2014 and 2013, respectively.

Credit card, debit card and merchant fees, increased slightly for the comparable three-month and six-month periods as a result of new account volume noticed since June 30, 2013. Deposit service charge revenue remained relatively stable when comparing the three-month and six-month periods ended June 30, 2014 and 2013.

Net security gains of approximately \$5,000 and \$1,000 for the three-month and six-months periods ended June 30, 2014, respectively, and gains of approximately \$3,000 and \$22,000 for the three-month and six-month periods ended June 30, 2013, respectively, were a result of calls of available-for-sale securities.

Insurance commissions increased for the second quarter and first six months of 2014 compared to the second quarter and first six months of 2013 as a result of new policies and growth from existing customers coupled with the revenue contributed by the acquisition of certain assets of GEM in December 2013 and of Knox in April 2014. Trust income increased during the second quarter and first six months of 2014 compared to the second quarter and first six months of 2013 primarily as a result of increases in the assets under management or in custody combined with fees generated by customers added since June 30, 2013. Annuity fees increased 28.0% and 43.0% for the comparable three-month and six-month periods of 2014 compared to the same periods of 2013 as a result of more annuity sales during the first six months of 2014. Brokerage commissions and fees decreased by 27.0% and 25.9% for the comparable three-month and six month periods, respectively, as a result of the decrease in sales of real estate investment trust products. Bank-owned life insurance revenue remained relatively stable when comparing the second quarter and first six months of 2014 to the second quarter and first six months of 2013. Other miscellaneous income, which includes safe deposit box rental income, gain or loss on disposal of assets, and other non-recurring revenue items remained relatively stable for the comparable three-month and six-month periods of 2014 and 2013.

## Noninterest Expense

The components of noninterest expense for the three months and six months ended June 30, 2014 and 2013 and the corresponding percentage changes are shown in the following tables:

Salaries and employee benefits expense for the three months and six months ended June 30, 2014 decreased \$3.5 million and \$4.1 million, respectively, compared to the same periods in 2013 as a result of decreases in incentive, retirement and group health expenses during 2014. Occupancy expense, as well as equipment expense, remained relatively stable for the comparable three-month and six-month periods. Deposit insurance assessments decreased for the comparable three-month and six-month periods as a result of improvement evidenced in several variables utilized by the FDIC in calculating the deposit insurance assessment.

(8.3) %

A pre-tax charge of \$10.9 million was recorded during the second quarter of 2013 related to additional benefits offered under the voluntary early retirement program that was offered to certain employees that met job classification, age and years-of-service criteria. No such expenses were recorded in 2014.

Foreclosed property expense increased for the three months and six months ended June 30, 2014 compared to the same periods in 2013, as decreased other foreclosed property expenses resulting from a decrease in the number of properties owned were more than offset by writedowns of existing properties and losses on sales. During the first six months of 2014, the Company added \$9.0 million to OREO through foreclosures. Sales of OREO in the first six months of 2014 were \$19.0 million, resulting in a net loss of \$1.5 million. The components of foreclosed property expense for the three months and six months ended June 30, 2014 and 2013 and the percentage change between periods are shown in the following tables:

Three months ended June 30,

		•			%

Other foreclosed property expense	1,1'	70	2,4	14	(51.5)							
Total foreclosed property expense	\$	6,757	\$	5,599	20.7	%						

While the Company experienced some fluctuations in various components of other noninterest expense, including advertising, public relations and data processing, the primary fluctuation was the decrease in total legal expense for the three months and six months ended June 30, 2014 compared to the same periods in 2013 primarily as a result of no additional litigation reserves related to various legal matters recognized during the first six months of 2014.

#### Income Tax

The Company recorded income tax expense of \$14.1 million for the second quarter of 2014, compared to income tax expense of \$8.3 million for the second quarter of 2013. Income tax expense was \$27.0 million and \$17.5 million for the six month periods ended June 30, 2014 and 2013, respectively. Because of the volatility on the Company's earnings, the Company's tax calculations were based on actual results of operations, including tax preference items through June 30, 2014. The primary differences between the Company's recorded expense for the second quarter and first six months of 2014 and the expense that would have resulted from applying the U.S. statutory tax rate of 35% to the Company's pre-tax income were primarily the effects of tax-exempt income and other tax preference items.

#### FINANCIAL CONDITION

The percentage of earning assets to total assets measures the effectiveness of management's efforts to invest available funds into the most efficient and profitable uses. Earning assets at June 30, 2014 were \$11.8 billion, or 90.8% of total assets, compared with \$11.8 billion, or 90.7% of total assets, at December 31, 2013.

#### Loans and Leases

The Bank's loan and lease portfolio represents the largest single component of the Company's earning asset base, comprising 78.1% of average earning assets during the second quarter of 2014. The Bank's lending activities include both commercial and consumer loans and leases. Loan and lease originations are derived from a number of sources,

including direct solicitation by the Bank's loan officers, existing depositors and borrowers, builders, attorneys, walk-in customers and, in some instances, other lenders, real estate broker referrals and mortgage loan companies. The Bank has established systematic procedures for approving and monitoring loans and leases that vary depending on the size and nature of the loan or lease, and applies these procedures in a disciplined manner. The Company's loans and leases are widely diversified by borrower and industry. Loans and leases, net of unearned income, totaled \$9.3 billion and \$9.0 billion at June 30, 2014 and December 31, 2013, respectively.

The following table shows the composition of the Company's gross loans and leases by segment and class at the dates indicated:

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

The maturity distribution of the Bank's loan portfolio is one factor in management's evaluation by collateral type of the risk characteristics of the loan and lease portfolio. The following table shows the maturity distribution of the Company's loans and leases, net of unearned income, as of June 30, 2014:

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

Commercial and Industrial - Commercial and industrial loans are loans and leases to finance business operations, equipment and owner-occupied facilities primarily for small and medium-sized enterprises. These include both lines of credit for terms of one year or less and term loans which are amortized over the useful life of the assets financed. Personal guarantees are generally required for these loans. Also included in this category are loans to finance agricultural production. Commercial and industrial loans outstanding increased 11.2% from December 31, 2013 to June 30, 2014.

Real Estate – Consumer Mortgages - Consumer mortgages are first- or second-lien loans to consumers secured by a primary residence or second home. These loans are generally amortized over terms up to 15 or 20 years with maturities of three to five years. The loans are generally secured by properties located within the local market area of the community bank which originates and services the loan. These loans are underwritten in accordance with the Bank's general loan policies and procedures which require, among other things, proper documentation of each borrower's financial condition, satisfactory credit history and property value. Consumer mortgages outstanding increased 4.8% at June 30, 2014 compared to December 31, 2013. In addition to loans originated through the Bank's branches, the Bank originates and services consumer mortgages sold in the secondary market which are underwritten and closed pursuant to investor and agency guidelines. The Bank's exposure to sub-prime mortgages is minimal.

Real Estate – Home Equity - Home equity loans include revolving credit lines which are secured by a first or second lien on a borrower's residence. Each loan is underwritten individually by lenders who specialize in home equity lending and must conform to Bank lending policies and procedures for consumer loans as to borrower's financial condition, ability to repay, satisfactory credit history and the condition and value of collateral. Properties securing home equity loans are generally located in the local market area of the Bank branch or office originating and servicing the loan. The Bank has not purchased home equity loans from brokers or other lending institutions. Home equity loans outstanding remained relatively stable during the first six months of 2014, increasing by 2.6% at June 30, 2014 compared to December 31, 2013.

Real Estate – Agricultural - Agricultural loans include loans to purchase agricultural land and production lines secured by farm land. Agricultural loans outstanding increased 1.5% from December 31, 2013 to June 30, 2014.

Real Estate – Commercial and Industrial-Owner Occupied - Commercial and industrial-owner occupied loans include loans secured by business facilities to finance business operations, equipment and owner-occupied facilities primarily for small and medium-sized enterprises. These include both lines of credit for terms of one year or less and term loans

which are amortized over the useful life of the assets financed. Personal guarantees are generally required for these loans. Commercial and industrial-owner occupied loans increased 2.2% from December 31, 2013 to June 30, 2014.

Real Estate – Construction, Acquisition and Development - Construction, acquisition and development loans include both loans and credit lines for the purpose of purchasing, carrying and developing land into commercial developments or residential subdivisions. Also included are loans and lines for construction of residential, multi-family and commercial buildings. Prior to March 2010, these loans were often structured with interest reserves to fund interest costs during the construction and development period. Additionally, certain loans

are structured with interest only terms. The Bank primarily engages in construction and development lending only in local markets served by its branches. The weakened economy and housing market has negatively impacted builders and developers in particular. Sales of finished houses slowed during 2009 and activity has remained slow since then, which has resulted in lower demand for residential lots and development land. The Company curtailed the origination of new construction, acquisition and development loans significantly during 2009 and the Company continued to maintain that strategy until the past few years. Construction, acquisition and development loans increased 4.1% from December 31, 2013 to June 30, 2014.

The underwriting process for construction, acquisition and development loans with interest reserves is essentially the same as that for a loan without interest reserves and may include analysis of borrower and guarantor financial strength, market demand for the proposed project, experience and success with similar projects, property values, time horizon for project completion and the availability of permanent financing once the project is completed. The Company's loan policy generally prohibits the use of interest reserves on loans originated after March 2010. Construction, acquisition and development loans, with or without interest reserves, are inspected periodically to ensure that the project is on schedule and eligible for requested draws. Inspections may be performed by construction inspectors hired by the Company or by appropriate loan officers and are done periodically to monitor the progress of a particular project. These inspections may also include discussions with project managers and engineers. For performing construction, acquisition and development loans, interest is generally recognized as interest income as it is earned. Non-performing construction, acquisition and development loans are placed on non-accrual status and interest income is not recognized, except in those situations where principal is expected to be received in full. In such situations, interest income is recognized as payment is received.

At June 30, 2014, the Company had \$24.5 million in construction, acquisition and development loans that provided for the use of interest reserves with approximately \$203,000 and \$320,000 recognized as interest income during the second quarter and first six months of 2014, respectively. There were no construction, acquisition and development loans with interest reserves that were on non-accrual status at June 30, 2014. Interest income is not recognized on construction, acquisition and development loans with interest reserves that are in non-accrual status. Loans with interest reserves normally have a budget that includes the various cost components involved in the project. Interest is such a cost, along with hard and other soft costs. The Company's policy is to allow interest reserves only during the construction phase.

So that interest capitalization is appropriate, interest reserves are not included for any renewal period after construction is completed or otherwise ceases, requiring borrowers to make interest payments no less than quarterly. Loans for which construction is complete, or has ceased, and where interest payments are not made on a timely basis are usually considered non-performing and are placed in nonaccrual status. Procedures are in place to restrict the structuring of a loan with terms that do not require performance until the end of the loan term, as well as to restrict the advancement of funds to keep a loan from becoming non-performing with any such advancement identified as a TDR.

On a case-by-case basis, a construction, acquisition and development loan may be extended, renewed or restructured. Loans are sometimes extended for a short period of time (generally 90 days or less) beyond the contractual maturity to facilitate negotiations or allow the borrower to gain other financing or acquire more recent note-related information, such as appraisals or borrower financial statements. These short-term extensions are not ordinarily accounted for as TDRs if the loan and project are performing in accordance with the terms of the loan agreement and/or promissory note. Construction, acquisition and development loans may be renewed when the borrower has satisfied the terms and conditions of the original loan, including payment of interest, and when management believes that the borrower is able to continue to meet the terms of the renewed note during the renewal period. Many loans are structured to mature at the conclusion of the construction or development period or at least annually. If concessions are granted to a borrower as a result of its financial difficulties, the loan is classified as a TDR and analyzed for impairment.

The Bank's real estate risk management group is responsible for reviewing and approving the structure and classification of all construction, acquisition and development loan renewals and modifications above a threshold of \$500,000. The analysis performed by the real estate risk management group may include the review of updated appraisals, borrower and guarantor financial condition, construction status and proposed loan structure. If the new terms of the loan meet the criteria of a TDR as set out in FASB ASC 310, the loan is identified as such.

Each construction, acquisition and development loan is underwritten to address: (i) the desirability of the project, its market viability and projected absorption period; (ii) the creditworthiness of the borrower and the guarantor as to liquidity, cash flow and assets available to ensure performance of the loan; (iii) equity contribution to the project; (iv) the developer's experience and success with similar projects; and (v) the value of the collateral.

The construction, acquisition and development portfolio may be further categorized by risk characteristics into the following nine categories: commercial acquisition and development, residential acquisition and development, multi-family construction, one-to-four family construction, commercial construction and recreation and all other loans. Construction, acquisition and development loans were \$772.2 million at June 30, 2014 and \$741.5 million at December 31, 2013. The following table shows the Company's construction, acquisition and development portfolio by geographical location and performing status at June 30, 2014:

As of June 30, 2014, 53.4% of the loans included in the construction, acquisition and development portfolio were scheduled to mature within one year. Many of these maturities are expected to occur prior to the completion of the related projects, and management expects that these loans will likely be renewed for an additional period of time. The Company's loan policy requires that updated appraisals from qualified third party appraisers be obtained for any real estate loan over \$250,000 that is renewed. If the borrower is experiencing financial difficulties, and the renewal is made with concessions, the loan is considered to be a TDR. These TDRs are tested for impairment by assessing the estimated disposal value of the collateral from the recent appraisal or by assessing the present value of the discounted cash flows expected on these loans.

The following table presents the activity in the construction, acquisition and development nonaccrual loans for the six months ended June 30, 2014:

Balance at December 31, 2013 Additions to construction, acquisition and development nonaccruals: Formation of new nonaccrual loans (In thousands) \$ 17,567

2,283

Reductions in construction, acquisition and development nonaccruals:

(1,707)	
(843)	
(6,993)	
(1,412)	
307	
\$	9,202
	(843) (6,993) (1,412)

The five largest credits that made up the construction, acquisition and development nonaccrual loan balance at June 30, 2014 were primarily loans for land for future development located throughout the Company's geographical locations and in various stages of maturity. The five largest credits made up 43.6% of the total construction, acquisition and development nonaccrual loan balance at June 30, 2014.

Real Estate – Commercial - Commercial loans include loans to finance income-producing commercial and multi-family properties. Lending in this category is generally limited to properties located in the Bank's trade area with only limited exposure to properties located elsewhere but owned by in-market borrowers. Loans in this category include loans for neighborhood retail centers, medical and professional offices, single retail stores, warehouses and apartments leased generally to local businesses and residents. The underwriting of these loans takes into consideration the occupancy and rental rates as well as the financial health of the borrower. The Bank's exposure to national retail tenants is minimal. The Bank has not purchased commercial real estate loans from brokers or third-party originators. Commercial loans increased 3.0% from December 31, 2013 to June 30, 2014.

Credit Cards - Credit cards include consumer and business MasterCard and Visa accounts. The Bank offers credit cards primarily to its deposit and loan customers. Credit card balances decreased 1.9% from December 31, 2013 to June 30, 2014.

All Other - All other loans and leases include consumer installment loans and leases to state, county and municipal governments and non-profit agencies. Consumer installment loans and leases include term loans of up to five years secured by automobiles, boats and recreational vehicles. The Bank offers lease financing for vehicles and heavy equipment to state, county and municipal governments and medical equipment to healthcare providers across the southern states. All other loan and lease balances, net of unearned income decreased 8.2% from December 31, 2013 to June 30, 2014.

NPLs consist of non-accrual loans and leases, loans and leases 90 days or more past due, still accruing, and accruing loans and leases that have been restructured (primarily in the form of reduced interest rates and modified payment terms) because of the borrower's or guarantor's weakened financial condition or bankruptcy proceedings. The Bank's policy provides that loans and leases are generally placed in non-accrual status if, in management's opinion, payment in full of principal or interest is not expected or payment of principal or interest is more than 90 days past due, unless the loan or lease is both well-secured and in the process of collection. NPAs consist of NPLs and OREO, which consists of foreclosed properties. NPAs, which are carried either in the loan account or OREO on the Company's consolidated balance sheets, depending on foreclosure status, were as follows as of the dates presented:

	June 30, 2014	2013	December 31, 2013
Non-accrual loans and leases Loans 90 days or more past due, still accruing Restructured loans and leases, still accruing Total NPLs	(Dollars in the \$ 64,533 2,406 6,712 73,651	susands) \$ 149,542 1,440 16,953 167,935	\$ 92,173 1,226 27,007 120,406
Other real estate owned	55,253	88,438	69,338
Total NPAs	\$ 128,904	\$ 256,373	\$ 189,744
NPLs to net loans and leases	0.79%	1.94%	1.34%
NPAs to net loans and leases	1.38%	2.95%	2.12%

NPLs decreased 38.8% to \$73.7 million at June 30, 2014 compared to \$120.4 million at December 31, 2013 and decreased 56.1% compared to \$167.9 million at June 30, 2013. Included in NPLs at June 30, 2014 were \$30.1 million of loans that were impaired. These impaired loans had a specific reserve of \$1.4 million included in the allowance for credit losses of \$147.1 million at June 30, 2014, and were net of \$7.5 million in partial charge-downs previously taken on these impaired loans. NPLs at December 31, 2013 included \$54.9 million of loans that were impaired. These impaired loans had a specific reserve of \$4.1 million included in the allowance for credit losses of \$153.2 million at December 31, 2013. NPLs at June 30, 2013 included \$105.5 million of loans that were impaired. These impaired loans had a specific reserve of \$8.0 million included in the allowance for credit losses of \$161.0 million at June 30, 2013.

Non-accrual loans at June 30, 2014 reflected a decrease of \$27.6 million, or 30.0%, compared to December 31, 2013 and a decrease of \$85.0 million, or 56.8%, compared to June 30, 2013. The Bank's NPL levels over the past several years have been reflective of the continuing effects of the prevailing economic environment on the Bank's loan portfolio, as a significant portion of the prior increases in the Bank's NPLs was attributable to problems developing for established customers with real estate related loans, particularly residential construction and development loans, primarily in the Bank's more urban markets. These problems resulted primarily from the decreased liquidity of certain borrowers and third party guarantors, as well as the declines in appraised real estate values for loans which became collateral dependent during the past two years and certain other borrower specific factors. While non-accrual loans are decreasing in almost all loan categories, the primary decrease in non-accrual loans continues to be recognized in the real estate construction, acquisition and development portfolio as non-accrual loans related to this portfolio decreased \$8.4 million, or 47.6%, to \$9.2 million at June 30, 2014 compared to \$17.6 million at December 31, 2013 and decreased \$30.1 million, or 76.6%, compared to \$39.3 million at June 30, 2013.

The Bank's NPLs are primarily located in Alabama, Mississippi and Tennessee as these markets represent \$47.0 million, or 63.8% of total NPLs of \$73.7 million at June 30, 2014. These areas have experienced a higher incidence of NPLs, primarily as a result of the downturn in the economy and housing market in these regions. While NPLs in these markets still maintain the largest portion of total NPLs at June 30, 2014, these markets have noticed a decrease in total NPLs of \$48.7 million, or 50.9%, since June 30, 2013. These markets continue to be affected by high inventories of unsold homes, unsold lots and undeveloped land intended for use as housing developments. The following table presents the NPLs by geographical location at June 30, 2014:

	Out	estanding	90+ Past Accr	Due still	Non-acc Loans	cruing	Restruc Loans, accruin	still	NF	PLs	% of	s as a tanding

Tennessee*	685	5,052	99		8,375		382		8,8	356	1.3	
Texas and Louisiana	1,92	22,305	17		8,568		19		8,6	04	0.4	
Other	1,42	22,157	2,105		6,437		1,741		10,283		0.7	
Total	\$ 9	9,311,661	\$	2,406	\$	64,533	\$ 6,712		\$ 73,651		0.8	%

OREO decreased by \$33.1 million to \$55.3 million at June 30, 2014 compared to \$88.4 million at June 30, 2013 and decreased by \$14.0 million compared to \$69.3 million at December 31, 2013. OREO decreased as a result of sales of foreclosed properties exceeding new foreclosures and writedowns that were the result of continuing processes to value these properties at fair value. The Bank recorded losses from the loans that were secured by these foreclosed

\* Excludes the Greater Memphis Area.

properties in the allowance for credit losses at the time of foreclosure.

The ultimate impact of the economic downturn on the Company's financial condition and results of operations will depend on its severity and duration. Continued weakness in the economy could adversely affect the Bank's volume of NPLs. The Bank will continue to focus on improving and enhancing existing processes related to the early identification and resolution of potential credit problems. Loans identified as meeting the criteria set out in FASB ASC 310 are identified as TDRs. The concessions granted most frequently for TDRs involve reductions or delays in required payments of principal and/or interest for a specified time, the rescheduling of payments in accordance with a bankruptcy plan or the charge-off of a portion of the loan. In most cases, the conditions of the credit also warrant non-accrual status, even after the restructure occurs. TDR loans may be returned to accrual status in years after the restructure if there has been at least a nine-month sustained period of repayment performance under the restructured loan terms by the borrower and the interest rate at the time of restructure was at or above market for a comparable loan. For reporting purposes, if a restructured loan is 90 days or more past due or has been placed in non-accrual status, the restructured loan is included in the loans 90 days or more past due

category or the non-accrual loan category of NPAs. Total restructured loans were \$18.4 million and \$50.3 million at June 30, 2014 and December 31, 2013, respectively. Restructured loans of \$11.6 million and \$23.2 million were included in the non-accrual loan category at June 30, 2014 and December 31, 2013, respectively.

At June 30, 2014, the Company did not have any concentration of loans or leases in excess of 10% of total loans and leases outstanding which were not otherwise disclosed as a category of loans or leases. Loan concentrations are considered to exist when there are amounts loaned to multiple borrowers engaged in similar activities which would cause them to be similarly impacted by economic or other conditions. The Bank conducts business in a geographically concentrated area and has a significant amount of loans secured by real estate to borrowers in varying activities and businesses, but does not consider these factors alone in identifying loan concentrations. The ability of the Bank's borrowers to repay loans is somewhat dependent upon the economic conditions prevailing in the Bank's market areas.

The Company utilizes an internal loan classification system to grade loans according to certain credit quality indicators. These credit quality indicators include, but are not limited to, recent credit performance, delinquency, liquidity, cash flows, debt coverage ratios, collateral type and loan-to-value ratio. The following table provides details of the Company's loan and lease portfolio, net of unearned income, by segment, class and internally assigned grade at June 30, 2014:

	June 30, 2014

(1) Impaired loans are shown exclusive of accruing troubled debt restructurings ("TDRs")

In the normal course of business, management becomes aware of possible credit problems in which borrowers exhibit potential for the inability to comply with the contractual terms of their loans and leases, but which currently do not yet meet the criteria for disclosure as NPLs. However, based upon past experiences, some of these loans and leases with

potential weaknesses will ultimately be restructured or placed in non-accrual status. At June 30, 2014, the Bank had \$4.7 million of potential problem loans or leases or loans and leases with potential weaknesses that were not included in the non-accrual loans and leases or in the loans 90 days or more past due categories. These loans or leases are included in the above rated categories. Loans with identified weaknesses based upon analysis of the credit quality indicators are included in the loans 90 days or more past due category or in the non-accrual loan and lease category which would include impaired loans.

The following table provides details regarding the aging of the Company's loan and lease portfolio, net of unearned income, by internally assigned grade at June 30, 2014:

	Cu	rrent	30-59 Past	9 Days Due	60-89 D Past Due	•	90+ D Past D	•	То	tal
	(In	thousands)								
Pass	\$	8,923,371	\$	7,352	\$	-	\$	-	\$	8,930,723
Special Mention	20.	,853	-		-		-		20	,853
Substandard	28	8,449	18,29	92	5,951		15,997	7	32	8,689
Doubtful	1,2	268	-		-		-		1,2	268
Loss	-		-		-		-		-	
Impaired	22.	,219	176		2,394		5,339		30	,128
Total	\$	9,256,160	\$	25,820	\$	8,345	\$	21,336	\$	9,311,661

All loan grade categories decreased at June 30, 2014 compared to December 31, 2013 with the exception of the pass and special mention loan grade categories, which increased 4.7% and 274.4%, respectively, at June 30, 2014 compared to December 31, 2013. All of the \$20.9 million of Special Mention loans and leases remained current as to scheduled repayment of principal and interest. Of the \$328.7 million of Substandard loans and leases, 87.8% remained current as to scheduled repayment of principal and interest, with only 4.9% having outstanding balances that were 90 days or more past due at June 30, 2014. Of the \$30.1 million of impaired loans and leases, 73.7% remained current as to scheduled repayment of principal and/or interest, with 17.7% having outstanding balances that were 90 days or more past due at June 30, 2014.

Collateral for some of the Bank's loans and leases is subject to fair value evaluations that fluctuate with market conditions and other external factors. In addition, while the Bank has certain underwriting obligations related to such evaluations, the evaluations of some real property and other collateral are dependent upon third-party independent appraisers employed either by the Bank's customers or as independent contractors of the Bank. During the current economic cycle, some subsequent fair value appraisals have reported lower values than were originally reported. These declining collateral values could impact future losses and recoveries.

The following table provides additional details related to the make-up of the Company's loan and lease portfolio, net of unearned income, and the distribution of NPLs at June 30, 2014:

#### Securities

The Company uses the Bank's securities portfolios to make various term investments, to provide a source of liquidity and to serve as collateral to secure certain types of deposits. Available-for-sale securities were \$2.3 billion at June 30, 2014 compared to \$2.5 billion at December 31, 2013. Available-for-sale securities, which are subject to possible sale, are recorded at fair value. At June 30, 2014, the Company held no securities whose decline in fair value was considered other than temporary.

The following table shows the available-for-sale securities portfolio by credit rating as obtained from Moody's rating service as of June 30, 2014:

Amortized C	ost	Estimated Fair Value				
Amount	%	Amount	%			

Available-for-sale Securities:	(Dollars in thousands)					
Aaa	\$	1,838,420	79.8%	\$	1,844,492	79.1%
Aa1 to Aa3	174,149		7.6%	184,140		7.9%
A1 to A3	51,	434	2.2%	53,	945	2.3%
Not rated (1)	239	9,105	10.4%	249	9,615	10.7%
Total	\$	2,303,108	100.0%	\$	2,332,192	100.0%

(1) Not rated securities primarily consist of Mississippi and Arkansas municipal bonds.

Of the securities not rated by Moody's, bonds with a book value of \$68.7 million and a market value of \$72.6 million were rated A- or better by Standard and Poor's.

#### Goodwill

The Company's policy is to assess goodwill for impairment at the reporting segment level on an annual basis or sooner if an event occurs or circumstances change which indicate that the fair value of a reporting segment is below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Accounting standards require management to estimate the fair value of each reporting segment in assessing impairment at least annually. The Company's annual assessment date is during the Company's fourth quarter. No events occurred during the second quarter of 2014 that indicated the necessity of an earlier goodwill impairment assessment.

In the current environment, forecasting cash flows, credit losses and growth, in addition to valuing the Company's assets with any degree of assurance is very difficult and subject to significant changes over very short periods of time. Management will continue to update its analysis as circumstances change. As market conditions continue to be volatile and unpredictable, impairment of goodwill related to the Company's reporting segments may be necessary in future periods. Goodwill was \$291.5 million at June 30, 2014 and \$286.8 million at December 31, 2013.

#### Other Real Estate Owned

OREO totaled \$55.3 million and \$69.3 million at June 30, 2014 and December 31, 2013, respectively. OREO at June 30, 2014 had aggregate loan balances at the time of foreclosure of \$125.1 million. OREO at December 31, 2013 had aggregate loan balances at the time of foreclosure of \$159.1 million. The following table presents the OREO by segment, class and geographical location at June 30, 2014:

	June 30, 2014 Alabama and Florida				Greater Memphis		Texas and		
	Panhandle	e Arkansas*	Mississippi*	Missouri	Area	Tennessee*	Louisiana	Other	Total
	(In thousa	ands)

*Excludes the Gre	-				•				

Because of the relatively high number of the Bank's NPLs that have been determined to be collaterally dependent, management expects the resolution of a significant number of these loans to necessitate foreclosure proceedings resulting in further additions to OREO. While management expects future foreclosure activity in virtually all loan categories, the magnitude of NPLs in the consumer mortgage and commercial real estate portfolios at June 30, 2014

suggested that a majority of additions to OREO in the near-term might be from these categories.

At the time of foreclosure, the fair value of construction, acquisition and development properties is typically determined by an appraisal performed by a third party appraiser holding professional certifications. Such appraisals are then reviewed and evaluated by the Company's internal appraisal group. A disposition value appraisal using a 180-360 day marketing period is typically ordered and the OREO is recorded at the time of foreclosure at its disposition value less estimated selling costs. For residential subdivisions that are not completed, the appraisals reflect the uncompleted status of the subdivision.

To attempt to ensure that OREO is carried at the lower of cost or fair value less estimated selling costs on an ongoing basis, new appraisals are obtained on at least an annual basis and the OREO carrying values are adjusted accordingly. The type of appraisals typically used for these periodic reappraisals are "Restricted Use Appraisals," meaning the appraisal is for client use only. Other indications of fair value are also used to attempt to ensure that OREO is carried at the lower of cost or fair value. These include listing the property with a broker and acceptance of an offer to purchase from a third party. If an OREO property is listed with a broker at an amount less than the current carrying value, the carrying value is immediately adjusted to reflect the list price less estimated selling costs and if an offer to purchase is accepted at a price less that the current carrying value, the carrying value is immediately adjusted to reflect that sales price, less estimated selling costs. The majority of the properties in OREO

are actively marketed using a combination of real estate brokers, bank staff who are familiar with the particular properties and/or third parties.

Deposits and Other Interest-Bearing Liabilities

Deposits originating within the communities served by the Bank continue to be the Bank's primary source of funding its earning assets. The Company has been able to compete effectively for deposits in its primary market areas, while continuing to manage the exposure to rising interest rates. The distribution and market share of deposits by type of deposit and by type of depositor are important considerations in the Company's assessment of the stability of its fund sources and its access to additional funds. Furthermore, management shifts the mix and maturity of the deposits depending on economic conditions and loan and investment policies in an attempt, within set policies, to minimize cost and maximize net interest margin.

The following table presents the Company's noninterest bearing, interest bearing, savings and other time deposits as of the dates indicated and the percentage change between dates:

	June 30,		December 31,		04	
	2014		2013		% Change	
	(Dolla					
Noninterest bearing demand	\$	2,718	\$	2,645	2.8 %	
Interest bearing demand	4,512		4,582		(1.5)	
Savings	1,299		1,234		5.3	
Other time	2,141		2,313		(7.4)	
Total deposits	\$	10,670	\$	10,774	(1.0)%	

The 1.0% decrease in deposits at June 30, 2014 compared to December 31, 2013 was primarily a result of the increase in noninterest-bearing demand and savings deposits being more than offset by the declines in interest-bearing demand and other time deposits. The average maturity of time deposits at June 30, 2014 was 15.3 months, compared to 13.9 months at December 31, 2013.

#### Liquidity and Capital Resources

One of the Company's goals is to maintain adequate funds to meet increases in loan demand or any potential increase in the normal level of deposit withdrawals. This goal is accomplished primarily by generating cash from the Bank's

operating activities and maintaining sufficient short-term liquid assets. These sources, coupled with a stable deposit base and a historically strong reputation in the capital markets, allow the Company to fund earning assets and maintain the availability of funds. Management believes that the Bank's traditional sources of maturing loans and investment securities, sales of loans held for sale, cash from operating activities and a strong base of core deposits are adequate to meet the Company's liquidity needs for normal operations over both the short-term and the long-term.

To provide additional liquidity, the Company utilizes short-term financing through the purchase of federal funds and securities sold under agreement to repurchase. All securities sold under agreements to repurchase are accounted for as collateralized financing transactions and are recorded at the amounts at which the securities were acquired or sold plus accrued interest. Further, the Company maintains a borrowing relationship with the FHLB which provides access to short-term and long-term borrowings. The Company had \$2.0 million in short-term borrowings from the FHLB at June 30, 2014. The Company also has access to the Federal Reserve discount window and other bank lines. The Company had no short-term borrowings from the FHLB nor the Federal Reserve at December 31, 2013. The Company had federal funds purchased and securities sold under agreement to repurchase of \$394.4 million and \$421.0 million at June 30, 2014 and December 31, 2013, respectively.

On August 8, 2013, the Company entered into a Credit Agreement with U.S. Bank National Association ("U.S. Bank") as a lender and administrative agent, and First Tennessee Bank, National Association, as a lender. The Credit Agreement includes an unsecured revolving loan of up to \$25.0 million that terminates and the outstanding balance of which is payable in full on August 8, 2015, and an unsecured multi-draw term loan of up to \$60.0 million, which commitment terminated on February 28, 2014 and the outstanding balance of which is payable

in full on August 8, 2018. The proceeds from the term loan may be used to repurchase trust preferred securities, and the proceeds from the revolving loan may be used for working capital, capital expenditures and other lawful corporate purposes. Borrowings under the Credit Agreement bear interest at a Eurocurrency or base rate plus, in each case, an applicable interest rate margin.

The Company had long-term borrowings from U.S. Bank totaling \$52.3 million and \$48.2 million at June 30, 2014 and December 31, 2013, respectively. The Company also had long-term borrowings from the FHLB of \$31.5 million at June 30, 2014 and \$33.5 million December 31, 2013. The Company has pledged eligible mortgage loans to secure the FHLB borrowings and had \$3.3 billion in additional borrowing capacity under the existing FHLB borrowing agreement at June 30, 2014.

The Company had non-binding federal funds borrowing arrangements with other banks aggregating \$740.0 million at June 30, 2014. Secured borrowing arrangements utilizing the Company's securities portfolio provide substantial additional liquidity to the Company. Such arrangements typically provide for borrowings of 95% to 98% of the unencumbered fair value of the Company's federal government and government agencies securities portfolio.

The ability of the Company to obtain funding from these or other sources could be negatively affected should the Company experience a substantial deterioration in its financial condition or its debt rating, or should the availability of short-term funding become restricted as a result of disruption in the financial markets. Management does not anticipate any short- or long-term changes to its liquidity strategies and believes that the Company has ample sources to meet the liquidity challenges caused by current economic conditions. The Company utilizes, among other tools, maturity gap tables, interest rate shock scenarios and an active asset and liability management committee to analyze, manage and plan asset growth and to assist in managing the Company's net interest margin and overall level of liquidity.

#### **Off-Balance Sheet Arrangements**

In the ordinary course of business, the Company enters into various off-balance sheet commitments and other arrangements to extend credit that are not reflected in the consolidated balance sheets of the Company. The business purpose of these off-balance sheet commitments is the routine extension of credit. While most of the commitments to extend credit are made at variable rates, included in these commitments are forward commitments to fund individual fixed-rate mortgage loans. Fixed-rate lending commitments expose the Company to risks associated with increases in interest rates. As a method to manage these risks, the Company enters into forward commitments to sell individual fixed-rate mortgage loans. The Company also faces the risk of deteriorating credit quality of borrowers to whom a commitment to extend credit has been made; however, no significant credit losses are expected from these commitments and arrangements.

### Regulatory Requirements for Capital

The Company is required to comply with the risk based capital guidelines established by the Board of Governors of the Federal Reserve System. These guidelines apply a variety of weighting factors that vary according to the level of risk associated with the assets. Capital is measured in two "Tiers": Tier 1 consists of common shareholders' equity, qualifying non-cumulative perpetual preferred stock and minority interest in consolidated subsidiaries, less goodwill

and certain other intangible assets; and Tier 2 consists of general allowance for losses on loans and leases, "hybrid" debt capital instruments and all or a portion of other subordinated capital debt, depending upon remaining term to maturity. Total capital is the sum of Tier 1 and Tier 2 capital. The required minimum ratio levels to be considered "well capitalized" for the Company's Tier 1 capital, total capital, as a percentage of total risk-adjusted assets, and Tier 1 leverage capital (Tier 1 capital divided by total assets, less goodwill) are 6%, 10% and 5%, respectively. The Company exceeded the required minimum levels for these ratios at June 30, 2014 and December 31, 2013 as follows:

	June 30, 2014 Amount Ratio		December 31, Amount	2013 Ratio			
Rancorn Couth Inc	(Dollars in thousands)						
BancorpSouth, Inc. Tier 1 capital (to risk-weighted assets)	\$ 1,302,920	13.10%	\$ 1.255.244	12.99%			
Total capital (to risk-weighted assets)	1,427,887	14.35%	1,376,752	14.25%			
Tier 1 leverage capital (to average assets)	1,302,920	10.33%	1,255,244	9.93%			

The FDIC's capital based supervisory system for insured financial institutions categorizes the capital position for banks into five categories, ranging from "well capitalized" to "critically undercapitalized." For a bank to be classified as "well capitalized," the Tier 1 capital, total capital and leverage capital ratios must be at least 6%, 10% and 5%, respectively. The Bank met the criteria for the "well capitalized" category at June 30, 2014 and December 31, 2013 as follows:

	June 30, 2014		December 31, 2013				
	Amount	Ratio	Amount	Ratio			
BancorpSouth Bank	(Dollars in thousands)						
Tier 1 capital (to risk-weighted assets)	\$ 1,266,116	12.74%	\$ 1,237,716	12.83%			
Total capital (to risk-weighted assets)	1,391,077	14.00%	1,359,195	14.09%			
Tier 1 leverage capital (to average assets)	1,266,116	10.07%	1,237,716	9.81%			

Federal and state banking laws and regulations and state corporate laws restrict the amount of dividends that the Company may declare and pay. For example, under guidance issued by the Federal Reserve, as a bank holding company, the Company is required to consult with the Federal Reserve before declaring dividends and is to consider eliminating, deferring or reducing dividends if (i) the Company's net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends, (ii) the Company's prospective rate of earnings retention is not consistent with its capital needs and overall current and prospective financial condition, or (iii) the Company will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios.

#### Uses of Capital

Subject to pre-approval of the Federal Reserve and other banking regulators, the Company may pursue acquisitions of depository institutions and businesses closely related to banking that further the Company's business strategies, including FDIC-assisted transactions. Management anticipates that consideration for any transactions other than FDIC-assisted transactions would include shares of the Company's common stock, cash or a combination thereof.

In 2002, the Company issued \$128.9 million in 8.15% Junior Subordinated Debt Securities to BancorpSouth Capital Trust I (the "Trust"), a business trust. The Trust used the proceeds from the issuance of five million shares of 8.15% trust preferred securities, \$25 face value per share, to acquire the 8.15% Junior Subordinated Debt Securities. The Company redeemed the Junior Subordinated Debt Securities and the related trust preferred securities at par on August 12, 2013.

The Company assumed \$6.2 million in Junior Subordinated Debt Securities and the related \$6.0 million in trust preferred securities pursuant to the merger on December 31, 2004 with Business Holding Corporation. The Company also assumed \$6.7 million in Junior Subordinated Debt Securities and the related \$6.5 million in trust preferred securities pursuant to the merger on December 1, 2005 with American State Bank Corporation and \$18.5 million in

Junior Subordinated Debt Securities and the related \$18.0 million in trust preferred securities pursuant to the merger on March 1, 2007 with City Bancorp. The Company redeemed \$8.25 million of the Junior Subordinated Debt Securities and \$8.0 million of the related trust preferred securities assumed in the City Bancorp merger at par on January 8, 2014. The Company's remaining \$23.2 million in assumed trust preferred securities qualifies as Tier 1 capital at June 30, 2014 under Federal Reserve Board guidelines. At June 30, 2014, the \$23.2 million in assumed trust preferred securities were callable at the option of the Company upon obtaining approval of the Federal Reserve.

Certain Litigation Contingencies

The nature of the Company's business ordinarily results in a certain amount of claims, litigation, investigations and legal and administrative investigations and proceedings. Although the Company and its subsidiaries have developed policies and procedures to minimize the impact of legal noncompliance and other disputes, and endeavored to provide reasonable insurance coverage, litigation and regulatory actions present an ongoing risk.

The Company and its subsidiaries are engaged in lines of business that are heavily regulated and involve a large volume of financial transactions and potential transactions with numerous customers or applicants. From time to time, borrowers, customers, former employees and other third parties have brought actions against the Company or its subsidiaries, in some cases claiming substantial damages. Financial services companies are subject to the risk of class action litigation and, from time to time, the Company and its subsidiaries are subject to such actions brought against it. Additionally, the Bank is, and management expects it to be, engaged in a number of foreclosure proceedings and other collection actions as part of its lending and leasing collections activities, which, from time to time, have resulted in counterclaims against the Bank. Various legal proceedings have arisen and may arise in the future out of claims against entities to which the Company is a successor as a result of business combinations. The Company's insurance has deductibles, and will likely not cover all such litigation or other proceedings or the costs of defense. The Company and its subsidiaries may also be subject to enforcement actions by federal or state regulators, including the Securities and Exchange Commission, the Federal Reserve, the FDIC, the Consumer Financial Protection Bureau, the Department of Justice, state attorneys general and the Mississippi Department of Banking and Consumer Finance.

When and as the Company determines it has meritorious defenses to the claims asserted, it vigorously defends against such claims. The Company will consider settlement of claims when, in management's judgment and in consultation with counsel, it is in the best interests of the Company to do so.

The Company cannot predict with certainty the cost of defense, the cost of prosecution or the ultimate outcome of litigation and other proceedings filed by or against it, its directors, management or employees, including remedies or damage awards. On at least a quarterly basis, the Company assesses its liabilities and contingencies in connection with outstanding legal proceedings as well as certain threatened claims (which are not considered incidental to the ordinary conduct of the Company's business) utilizing the latest and most reliable information available. For matters where a loss is not probable or the amount of the loss cannot be estimated, no accrual is established. For matters where it is probable the Company will incur a loss and the amount can be reasonably estimated, the Company establishes an accrual for the loss. Once established, the accrual is adjusted periodically to reflect any relevant developments. The actual cost of any outstanding legal proceedings or threatened claims, however, may turn out to be substantially higher than the amount accrued. Further, the Company's insurance will not cover all such litigation, other proceedings or claims, or the costs of defense.

While the final outcome of any legal proceedings is inherently uncertain, based on the information available, advice of counsel and available insurance coverage, management believes that the litigation-related expense of \$11.2 million accrued as of June 30, 2014 is adequate and that any incremental liability arising from the Company's legal proceedings and threatened claims, including the matters described herein and those otherwise arising in the ordinary course of business, will not have a material adverse effect on the Company's business or consolidated financial condition. It is possible, however, that future developments could result in an unfavorable outcome for or resolution of any one or more of the lawsuits in which the Company or its subsidiaries are defendants, which may be material to the Company's results of operations for a given fiscal period.

On August 16, 2011, a shareholder filed a putative derivative action purportedly on behalf of the Company in the Circuit Court of Lee County, Mississippi, against certain current and past executive officers and members of the Board of Directors of the Company. The plaintiff in this shareholder derivative lawsuit asserts that the individual defendants violated their fiduciary duties by allegedly issuing materially false and misleading statements regarding the Company's business and financial results. The plaintiff is seeking to recover alleged damages in an unspecified amount, equitable and/or injunctive relief, and attorney's fees. A motion to dismiss filed by the defendants is pending decision by the Court. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations.

On May 18, 2010, the Bank was named as a defendant in a purported class action lawsuit filed by an Arkansas customer of the Bank in the U.S. District Court for the Northern District of Florida. The suit challenges the manner in

which overdraft fees were charged and the policies related to posting order of debit card and ATM transactions. The suit also makes a claim under Arkansas' consumer protection statute. The plaintiff is seeking to recover damages in an unspecified amount and equitable relief. The case was transferred to pending multi-district litigation in the U.S. District Court for the Southern District of Florida wherein an order was entered certifying a class in this case. The consolidated pretrial proceedings in the multi-district litigation court have concluded and the case has been remanded to the U.S. District Court for the Northern District of Florida for further proceedings. There are significant uncertainties involved in any purported class action litigation. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated

financial position or results of operations. However, there can be no assurance that an adverse outcome or settlement would not have a material adverse effect on the Company's consolidated results of operations for a given fiscal period.

On July 31, 2014, a law firm announced that it had filed a purported class-action lawsuit against the Company and its Chief Executive Officer and Chief Financial Officer in the United States District Court for the Middle District of Tennessee on behalf of certain purchasers of the Company's common stock. As of the filing date of this Form 10-Q, the Company has not been served with process as to the lawsuit. The filing alleges that the defendants made materially false and misleading statements regarding the Company's procedures, systems and process related to certain of its compliance programs. With no service of process and the July 31, 2014 filing date, the Company lacks sufficient information as to the subject suit, therefore cannot determine the probability of any unfavorable outcome, if any, to the Company at this time.

#### CRITICAL ACCOUNTING POLICIES

During the three months ended June 30, 2014, there was no significant change in the Company's critical accounting policies and no significant change in the application of critical accounting policies as presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

During the three months ended June 30, 2014, there were no significant changes to the quantitative and qualitative disclosures about market risks presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

#### ITEM 4. CONTROLS AND PROCEDURES.

The Company, with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to allow timely decisions regarding disclosure in its reports that the Company files or submits to the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended.

There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II** 

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

The nature of the Company's business ordinarily results in a certain amount of claims, litigation, investigations and legal and administrative cases and proceedings. Although the Company and its subsidiaries have developed policies and procedures to minimize the impact of legal noncompliance and other disputes, and endeavored to provide reasonable insurance coverage, litigation and regulatory actions present an ongoing risk.

The Company and its subsidiaries are engaged in lines of business that are heavily regulated and involve a large volume of financial transactions and potential transactions with numerous customers or applicants. From time to time, borrowers, customers, former employees and other third parties have brought actions against the Company or its subsidiaries, in some cases claiming substantial damages. Financial services companies are subject to the risk of class action litigation and, from time to time, the Company and its subsidiaries are subject to such actions brought against it. Additionally, the Bank is, and management expects it to be, engaged in a number of foreclosure proceedings and other collection actions as part of its lending and leasing collections activities, which, from time to time, have resulted in counterclaims against the Bank. Various legal proceedings have arisen and may arise in the

future out of claims against entities to which the Company is a successor as a result of business combinations. The Company's insurance has deductibles, and will likely not cover all such litigation or other proceedings or the costs of defense. The Company and its subsidiaries may also be subject to enforcement actions by federal or state regulators, including the Securities and Exchange Commission, the Federal Reserve, the FDIC, the CFPB, the Department of Justice, state attorneys general and the Mississippi Department of Banking and Consumer Finance.

When and as the Company determines it has meritorious defenses to the claims asserted, it vigorously defends against such claims. The Company will consider settlement of claims when, in management's judgment and in consultation with counsel, it is in the best interests of the Company to do so.

On August 16, 2011, a shareholder filed a putative derivative action purportedly on behalf of the Company in the Circuit Court of Lee County, Mississippi, against certain current and past executive officers and members of the Board of Directors of the Company. The plaintiff in this shareholder derivative lawsuit asserts that the individual defendants violated their fiduciary duties by allegedly issuing materially false and misleading statements regarding the Company's business and financial results. The plaintiff is seeking to recover alleged damages in an unspecified amount and equitable and/or injunctive relief, and attorney's fees. A motion to dismiss filed by the defendants is pending decision by the Court. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations.

On May 18, 2010, the Bank was named as a defendant in a purported class action lawsuit filed by an Arkansas customer of the Bank in the U.S. District Court for the Northern District of Florida. The suit challenges the manner in which overdraft fees were charged and the policies related to posting order of debit card and ATM transactions. The suit also makes a claim under Arkansas' consumer protection statute. The plaintiff is seeking to recover damages in an unspecified amount and equitable relief. The case was transferred to pending multi-district litigation in the U.S. District Court for the Southern District of Florida wherein an order was entered certifying a class in this case. The consolidated pretrial proceedings in the multi-district litigation court have concluded and the case has been remanded to the U.S. District Court for the Northern District of Florida for further proceedings. There are significant uncertainties involved in any purported class action litigation. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations. However, there can be no assurance that an adverse outcome or settlement would not have a material adverse effect on the Company's consolidated results of operations for a given fiscal period.

On July 31, 2014, a law firm announced that it had filed a purported class-action lawsuit against the Company and its Chief Executive Officer and Chief Financial Officer in the United States District Court for the Middle District of Tennessee on behalf of certain purchasers of the Company's common stock. As of the filing date of this Form 10-Q, the Company has not been served with process as to the lawsuit. The filing alleges that the defendants made materially false and misleading statements regarding the Company's procedures, systems and process related to certain of its compliance programs. With no service of process and the July 31, 2014 filing date, the Company lacks sufficient information as to the subject suit, therefore cannot determine the probability of any unfavorable outcome, if any, to the Company at this time.

April 1- April 30 - \$
May 1 - May 31 - June 1 - June 30 3.722 24.55

Total 3,722

(1) This represents 3,722 shares redeemed from employees during the second quarter of 2014 for tax withholding purposes upon vesting of restricted stock units.

#### ITEM 5. OTHER INFORMATION

#### **CFPB Matter**

The Consumer Financial Protection Bureau ("CFPB") has issued two inter-related Civil Investigative Demands to the Bank seeking documents and information regarding the Bank's fair lending program. The Bank is cooperating with the CFPB with respect to this ongoing matter.

#### FDIC Matter

In its 2014 examination of the Bank's compliance with the Bank Secrecy Act ("BSA"), the FDIC identified weaknesses in the Bank's BSA and anti-money laundering program. Under FDIC regulations, the FDIC will take the required administrative action to effect corrective action for the statutory and regulatory violations that exist with an insured depository's BSA program. On July 22, 2014, the FDIC requested (the "FDIC Notice") that the Bank address the subject matter of the BSA deficiencies by entering into a proposed consent order (the "Proposed Order"). The Bank is cooperating with the FDIC on this matter and is currently engaged in discussions with the FDIC regarding the terms of such Proposed Order, which, when finalized, will prescribe those actions which are necessary to address the deficiencies noted in the FDIC Notice. The Company expects that the Proposed Order will be entered into after the date that this report on Form 10-Q is filed. The Proposed Order will require the Bank, among other things, to review and revise its BSA risk assessment, BSA compliance program, and Suspicious Activity Report filing procedures and processes, and engage necessary third parties in respect of the foregoing. The Bank is implementing corrective action for each identified deficiency and expects that it will be able to satisfy the requirements of the Proposed Order in a timely fashion. The Proposed Order is not expected to require the payment of a civil money penalty.

#### CFPB and FDIC Matters

If either or both of the FDIC or CFPB determine to bring formal or additional enforcement actions, it could include demands for civil money penalties, changes to certain of the Bank's business practices, assessments, and/or compliance programs and monitoring, and with respect to the CFPB fair lending matter, customer restitution. Based on the facts currently known by the Company, the Company is unable at this time to determine the terms on which the ongoing investigations will be resolved or the timing of such resolution or to estimate reliably the amounts, or range of

possible amounts, of any fines, penalties and/or restitution.

Mergers, Merger Agreements and Amendments

On July 22, 2014, the Federal Reserve Bank of St. Louis informed the Company that it would not consider regulatory approval of the proposed mergers (the "Mergers") with Ouachita Bancshares Corp. ("Ouachita") and Central Community Corporation ("CCC") until such time as the necessary actions to remediate and resolve the aforementioned BSA matter identified by the FDIC were accomplished. As such, and as previously disclosed by the Company in its Form 8-K filed on July 24, 2014, the Company has determined that additional time will be required to obtain regulatory approval of the Mergers and has entered into amendments (the "Amendments") to its merger agreements with Ouachita and CCC (the "Merger Agreements"), agreeing to extend the Merger Agreements until June 30, 2015 and allowing each of CCC and Ouachita to terminate its Merger Agreement with the Company on or after February 28, 2015 if the Company does not have an application for regulatory approval of the Merger with CCC and Ouachita, respectively, on file with the FDIC or the Federal Reserve Bank of St. Louis before that date.

At its regularly scheduled meeting on July 23, 2014, the Board of Directors determined it to be in the best interests of the Company to withdraw the applications for regulatory approval of the Mergers, with the expectation that they subsequently be re-filed and commensurate with the Company's expectations of being able to satisfy the requirements of the Proposed Order. The Merger approval applications were withdrawn on August 1, 2014. The Mergers will remain subject to receipt of required regulatory approvals and the satisfaction of other closing conditions. The Company cannot offer any assurances as to the terms, timing and closings of the proposed Mergers with Ouachita and CCC or the Company's ability to undertake and perform those actions which are necessary to comply with the terms of the Proposed Order or remediate and fully resolve all regulatory concerns as described above.
