Exchange Act

In accordance with General Instruction B.2 of Form 8-K, the information in this Form 8-K, including in Exhibits 99.1 and 99.2 hereto, shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall such information be deemed incorporated by reference in any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except as shall be expressly set forth by specific reference in such a filing.

Item 2.02. Results of Operations and Financial Condition.

On February 1, 2005, we issued a news release announcing our preliminary earnings for the fourth quarter and the year ended December 31, 2004 and containing other information set forth therein. A copy of the news release is furnished with this report as Exhibit 99.1 and shall be deemed a part of and incorporated by reference into this Item 2.02 for all purposes.

On February 1, 2005, we distributed for reference during our quarterly earnings call held on February 1, 2005 a summary of the significant variances in adjusted after-tax earnings by business segment between the fourth quarter of 2004 and the third quarter of 2004. A copy of this summary is furnished with this report as Exhibit 99.2 and shall be deemed a part of and incorporated by reference into this Item 2.02 for all purposes.

Item 7.01. Regulation FD Disclosure.

On February 1, 2005, we issued a news release announcing our preliminary proved natural gas and crude oil reserves estimate of 1.754 billion barrels-of-oil equivalent ("BOE") at year-end 2004, which compares with 1.759 billion BOE a year earlier. For the year 2004, we added 150 million BOE to our proved reserves through discoveries and extensions, net purchases and sales, and performance, price and other revisions. We produced 155 million BOE in 2004.

We added 199 million BOE from discoveries and extensions. We also made 39 million BOE in negative price revisions attributable to changes in crude oil prices for proved reserves held under production-sharing contracts ("PSCs"). Other price revisions accounted for a 14 million BOE increase in our North American proved reserves. Purchases and sales amounted to a net reduction of 12 million BOE. All other revisions totaled a negative 12 million BOE.

The discoveries and extensions were primarily from the sanctioning of the Bibiyana development in Bangladesh and the Phase III development by the Azerbaijan International Operating Company ("AIOC") in the Caspian Sea and additional proved reserves of our Unocal Thailand, Pure Resources and Northrock operations.

In 2004, approximately 135 million BOE were promoted from proved undeveloped to the proved developed category. Under foreign PSC arrangements in Indonesia, Myanmar, AIOC, Bangladesh, and the Democratic Republic of the Congo, net entitlement reserves to us, as contractor, increase as oil and/or gas prices decline and decrease when they rise. Benchmark crude oil prices rose from \$32.55 per barrel at year-end 2003 to \$43.46 per barrel at the end of 2004. The price increase resulted in approximately 39 million BOE negative revisions in our proved reserves under PSCs because fewer equivalent barrels are required to be reimbursed for our costs. The higher prices resulted in 14 million BOE of positive revisions in non-PSC countries because our estimates of commercially recoverable resources increased under those economic conditions.
