- (1) This Form 4 is being amended to report the number of options granted, calculated pursuant to a formula approved by the Compensation Committee. The number was unknown at the time of the original filing on 3/2/2016.  
The number is calculated as a function of base pay, a long-term incentive (LTI) percentage and the fair value of the option. The Binomial
- (2) Lattice option valuation model is used to estimate the fair value of the option. This model requires the input of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for determining the number of options granted is: number of options = (base pay x LTI%) / option fair value.
- (3) Exercisable in four equal annual installments commencing 2/28/2017.
