July 24, 2012

SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

## FORM 10-Q

(Mark One)

X QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2012  
OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_  
Commission file number 1-1070

Olin Corporation  
(Exact name of registrant as specified in its charter)

Virginia	13-1872319
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

190 Carondelet Plaza, Suite 1530, Clayton, MO 63105-3443  
(Address of principal executive offices) (Zip Code)

(314) 480-1400  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company "

Edgar Filing: OLIN CORP - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  
" No x

As of June 30, 2012, 80,008,221 shares of the registrant's common stock were outstanding.

## OLIN CORPORATION AND CONSOLIDATED SUBSIDIARIES

### Notes to Condensed Financial Statements (Unaudited)

#### DESCRIPTION OF BUSINESS

Olin Corporation is a Virginia corporation, incorporated in 1892. We are a manufacturer concentrated in two business segments: Chlor Alkali Products and Winchester. Chlor Alkali Products, with nine U.S. manufacturing facilities and one Canadian manufacturing facility, produces chlorine and caustic soda, hydrochloric acid, hydrogen, bleach products and potassium hydroxide. Winchester, with its principal manufacturing facilities in East Alton, IL and Oxford, MS, produces and distributes sporting ammunition, reloading components, small caliber military ammunition and components, and industrial cartridges.

We have prepared the condensed financial statements included herein, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). The preparation of the consolidated financial statements requires estimates and assumptions that affect amounts reported and disclosed in the financial statements and related notes. In our opinion, these financial statements reflect all adjustments (consisting only of normal accruals), which are necessary to present fairly the results for interim periods. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations; however, we believe that the disclosures are appropriate. We recommend that you read these condensed financial statements in conjunction with the financial statements, accounting policies and the notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2011. Certain reclassifications were made to prior year amounts to conform to the 2012 presentation.

On February 28, 2011, we acquired PolyOne Corporation's (PolyOne) 50% interest in the SunBelt Chlor Alkali Partnership, which we refer to as SunBelt. Previously, we had a 50% ownership interest in SunBelt, which was accounted for using the equity method of accounting. Accordingly, prior to the acquisition, we included only our share of SunBelt results in earnings of non-consolidated affiliates. Since the date of acquisition, SunBelt's results are no longer included in earnings of non-consolidated affiliates but are consolidated in our accompanying financial statements.

#### ACQUISITION

On February 28, 2011, we acquired PolyOne's 50% interest in SunBelt for \$132.3 million in cash plus the assumption of a PolyOne guarantee related to the SunBelt Notes. With this acquisition, we own 100% of SunBelt. The SunBelt chlor alkali plant, which is located within our McIntosh, AL facility, has approximately 350,000 tons of membrane technology capacity. We also agreed to a three year earn out, which has no guaranteed minimum or maximum, based on the performance of SunBelt. In addition, during the second quarter of 2011, we remitted to PolyOne \$6.0 million, which represented 50% of distributable cash generated by SunBelt from January 1, 2011 through February 28, 2011.

Pursuant to a note purchase agreement dated December 22, 1997, SunBelt sold \$97.5 million of Guaranteed Senior Secured Notes due 2017, Series O, and \$97.5 million of Guaranteed Senior Secured Notes due 2017, Series G. We refer to these notes as the SunBelt Notes. The SunBelt Notes bear interest at a rate of 7.23% per annum, payable semi-annually in arrears on each June 22 and December 22. Beginning on December 22, 2002 and each year through 2017, SunBelt is required to repay \$12.2 million of the SunBelt Notes, of which \$6.1 million is attributable to the Series O Notes and of which \$6.1 million is attributable to the Series G Notes. In conjunction with the acquisition, we consolidated the SunBelt Notes with a fair value of \$87.3 million for the remaining principal balance of \$85.3 million as of February 28, 2011.

We have guaranteed the Series O Notes, and PolyOne, our former SunBelt partner, has guaranteed the Series G Notes, in both cases pursuant to customary guaranty agreements. We have agreed to indemnify PolyOne for any payments or other costs under the guarantee in favor of the purchasers of the Series G Notes, to the extent any payments or other costs arise from a default or other breach under the SunBelt Notes. If SunBelt does not make timely payments on the SunBelt Notes, whether as a result of a failure to pay on a guarantee or otherwise, the holders of the SunBelt Notes may proceed against the assets of SunBelt for repayment.

From January 1, 2011 to February 28, 2011, we recorded \$6.3 million of equity earnings of non-consolidated affiliates for our 50% ownership in SunBelt. The value of our investment in SunBelt was \$(0.8) million. We remeasured our equity interest in SunBelt to fair value upon the close of the transaction. As a result, we recognized a pretax gain of \$181.4 million, which was classified in other (expense) income in our condensed statement of income. In conjunction with this

remeasurement, a discrete deferred tax expense of \$76.0 million was recorded.

The transaction has been accounted for using the acquisition method of accounting which requires, among other things, that assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. We finalized our purchase price allocation during the second quarter of 2011. The following table summarizes the final allocation of the purchase price to SunBelt's assets and liabilities:

	February 28, 2011 (\$ in millions)	
Total current assets	\$37.6	
Property, plant and equipment	87.4	
Deferred income taxes	0.4	
Other assets	5.8	
Total assets acquired	131.2	
Total current liabilities	42.7	
Long-term debt	75.1	
Other liabilities	27.6	
Total liabilities assumed	145.4	
Less: Investment in SunBelt	(0.8	)
Net liabilities assumed	(13.4	)
Liabilities for uncertainties	48.3	
Gain on remeasurement of investment in SunBelt	(181.4	)
Goodwill	327.1	
Fair value of total consideration	\$180.6	

Included in total current assets are cash and cash equivalents of \$8.9 million. Included in total current liabilities is \$12.2 million of current installments of long-term debt.

Based on final valuations, we allocated \$5.8 million of the purchase price to intangible assets relating to customers, customer contracts and relationships, which management estimates to have a useful life of fifteen years. These identifiable intangible assets were included in other assets. Based on final valuations, \$327.1 million was assigned to goodwill. For tax purposes, \$163.7 million of the goodwill is deductible. The goodwill represents the fair value of SunBelt that is in addition to the fair values of the other net assets acquired. The primary reason for the acquisition and the principal factors that contributed to a SunBelt purchase price that resulted in the recognition of goodwill is the strategic fit with our Chlor Alkali operations and SunBelt's low cost membrane capacity.

Goodwill recorded in the acquisition is not amortized but will be reviewed for impairment annually in the fourth quarter and/or when circumstances or other events indicate that impairment may have occurred.

For segment reporting purposes, SunBelt has been included in Chlor Alkali Products. The SunBelt results of operations have been included in our consolidated results for the period subsequent to the effective date of the acquisition. The following pro forma summary presents the condensed statement of income as if the acquisition of SunBelt had occurred on January 1, 2011.

	Six Months Ended June 30, 2011 (\$ in millions, except per share data)
Sales	\$991.4
Net income	74.5

Net income per common share:

Basic	\$0.93
-------	--------

Diluted	\$0.92
---------	--------

The pro forma statement of income was prepared based on historical financial information and has been adjusted to give effect to pro forma adjustments that are (i) directly attributable to the transaction, (ii) factually supportable and (iii) expected to have a continuing impact on the combined results. The pro forma statement of income uses estimates and assumptions based on information available at the time. Management believes the estimates and assumptions to be reasonable; however, actual results may differ significantly from this pro forma financial information. The pro forma information does not reflect any cost savings that might be achieved from operating the business under a single owner and is not intended to reflect the actual results that would have occurred had the companies actually been combined during the period presented. The pro forma data reflect the application of the following adjustments:

- Elimination of the pretax gain resulting from the remeasurement of our previously held 50% equity interest in SunBelt, which is considered non-recurring (\$181.4 million for the six months ended June 30, 2011).
- Additional amortization expense related to the fair value of acquired identifiable intangible assets (\$0.1 million for the six months ended June 30, 2011).
- Reduction of depreciation expense related to the fair value adjustment to property, plant and equipment (\$1.0 million for the six months ended June 30, 2011).
- Reduction in interest expense as a result of increasing the carrying value of acquired debt obligations to its estimated fair value (\$0.1 million for the six months ended June 30, 2011).
- Additional accretion expense for the earn out liability that was recorded as a result of the acquisition (\$0.4 million for the six months ended June 30, 2011).
- Elimination of transaction costs incurred in 2011 that are directly related to the transaction, and do not have a continuing impact on our combined operating results (\$0.8 million for the six months ended June 30, 2011).

In addition, the pro forma data reflect the tax effect of all of the above adjustments. The pro forma tax provision for the six months ended June 30, 2011 reflects a reduction of \$76.0 million related to the elimination of the gain resulting from the remeasurement of our previously held 50% equity interest in SunBelt. The pro forma tax provision reflects an increase of \$2.5 million for the six months ended June 30, 2011, associated with the incremental pretax income and the fair value adjustments for acquired intangible assets, property, plant and equipment and the SunBelt Notes, which reflects the marginal tax of the adjustments in the various jurisdictions where such adjustments occurred.

## RESTRUCTURING CHARGES

On December 9, 2010, our board of directors approved a plan to eliminate our use of mercury in the manufacture of chlor alkali products. Under the plan, the 260,000 tons of mercury cell capacity at our Charleston, TN facility will be converted to 200,000 tons of membrane capacity capable of producing both potassium hydroxide and caustic soda. The project has an estimated capital cost of approximately \$160 million. The board of directors also approved plans to reconfigure our Augusta, GA facility to manufacture bleach and distribute caustic soda, while discontinuing chlor alkali manufacturing at this site. This action will reduce our chlor alkali manufacturing capacity by 100,000 tons. We based our decision to convert and reconfigure on several factors. First, during 2009 and 2010 we had experienced a steady increase in the number of customers unwilling to accept our products manufactured using mercury cell technology. Second, there was federal legislation passed in 2008 governing the treatment of mercury that significantly limits our recycling options after December 31, 2012. We concluded that exiting mercury cell technology production after 2012 represented an unacceptable future cost risk. Further, the conversion of the Charleston, TN plant to membrane technology will reduce the electricity usage per ECU produced by approximately 25%. The decision to reconfigure the Augusta, GA facility to manufacture bleach and distribute caustic soda removes the highest cost production capacity from our system. We currently expect to complete the conversion and reconfiguration by the end of 2012. For both the three months ended June 30, 2012 and 2011, we recorded pretax restructuring charges of \$0.2 million for employee severance and related benefit costs and facility exit costs. For the six months ended June 30, 2012 and 2011, we recorded pretax restructuring charges of \$0.5 million and \$0.3 million, respectively, for employee severance and related benefit costs and facility exit costs. We expect to incur additional

restructuring charges through 2013 of approximately \$8 million related to the implementation of plans to exit the use of mercury cell technology in the chlor alkali manufacturing process.

On November 3, 2010, we announced that we made the decision to relocate the Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS. This relocation, when completed, is forecast to reduce Winchester's annual operating costs by approximately \$30 million. Consistent with this decision we have initiated an estimated \$110 million five-year project, which includes approximately \$80 million of capital spending. The State of Mississippi and local governments have provided incentives which should offset approximately 40 percent of the capital spending. We currently expect to complete this relocation by the end of 2015. For the three and six months ended June 30, 2012, we recorded pretax restructuring charges of \$1.6 million and \$3.2 million, respectively, for employee severance and related benefit costs, employee relocation costs and facility exit costs. For the three and six months ended June 30, 2011, we

recorded pretax restructuring charges of \$2.2 million, which included a non-cash pension curtailment charge, employee severance and related benefit costs and employee relocation costs. These 2011 restructuring charges related primarily to the ratification of a new five and one half year Winchester, East Alton, IL union labor agreement. We expect to incur additional restructuring charges through 2016 of approximately \$13 million related to the transfer of these operations.

The following table summarizes the activity by major component of these 2010 restructuring actions and the remaining balances of accrued restructuring costs as of June 30, 2012:

	Employee severance and job related benefits (\$ in millions)	Pension and other postretirement benefits curtailment	Lease and other contract termination costs	Employee relocation costs	Facility exit costs	Total
Balance at January 1, 2011	\$6.0	\$—	\$1.0	\$—	\$—	\$7.0
Restructuring charges:						
First quarter	0.1	—	—	—	—	0.1
Second quarter	0.9	1.1	—	0.3	0.1	2.4
Amounts utilized	(0.1 )	(1.1 )	(0.2 )	(0.3 )	(0.1 )	(1.8 )
Balance at June 30, 2011	\$6.9	\$—	\$0.8	\$—	\$—	\$7.7
Balance at January 1, 2012	\$11.3	\$—	\$0.8	\$—	\$—	\$12.1
Restructuring charges:						
First quarter	0.9	—	—	0.8	0.2	1.9
Second quarter	1.0	—	—	0.7	0.1	1.8
Amounts utilized	(1.3 )	—	—	(1.5 )	(0.3 )	(3.1 )
Balance at June 30, 2012	\$11.9	\$—	\$0.8	\$—	\$—	\$12.7

The following table summarizes the cumulative restructuring charges of these 2010 restructuring actions by major component through June 30, 2012:

	Chlor Alkali Products (\$ in millions)	Winchester	Total
Write-off of equipment and facility	\$17.5	\$—	\$17.5
Employee severance and job related benefits	5.4	8.9	14.3
Facility exit costs	7.3	0.7	8.0
Pension and other postretirement benefits curtailment	—	4.1	4.1
Employee relocation costs	0.1	3.6	3.7
Lease and other contract termination costs	1.0	—	1.0
Total cumulative restructuring charges	\$31.3	\$17.3	\$48.6

As of June 30, 2012, we have incurred cash expenditures of \$7.6 million and non-cash charges of \$28.3 million related to these restructuring actions. The remaining balance of \$12.7 million is expected to be paid out in 2012 through 2016.

#### ALLOWANCE FOR DOUBTFUL ACCOUNTS RECEIVABLES

We evaluate the collectibility of accounts receivable based on a combination of factors. We estimate an allowance for doubtful accounts as a percentage of net sales based on historical bad debt experience. This estimate is periodically

adjusted when we become aware of a specific customer's inability to meet its financial obligations (e.g., bankruptcy filing) or as a result of changes in the overall aging of accounts receivable. While we have a large number of customers that operate in diverse businesses and are geographically dispersed, a general economic downturn in any of the industry segments in which we operate could result in higher than expected defaults, and, therefore, the need to revise estimates for the provision for doubtful accounts could occur.

Allowance for doubtful accounts receivable consisted of the following:

	June 30,	
	2012	2011
	(\$ in millions)	
Balance at beginning of year	\$3.2	\$4.8
Provisions charged	1.0	0.2
(Write-offs) recoveries, net	(0.1	) 0.6
Balance at end of period	\$4.1	\$5.6

Provisions charged (credited) to operations were \$0.6 million and \$(0.2) million for the three months ended June 30, 2012 and 2011, respectively.

## INVENTORIES

Inventories consisted of the following:

	June 30,	December 31,	June 30,
	2012	2011	2011
	(\$ in millions)		
Supplies	\$36.6	\$35.0	\$33.1
Raw materials	79.2	75.7	68.1
Work in process	35.7	31.9	30.9
Finished goods	120.8	111.7	116.4
	272.3	254.3	248.5
LIFO reserve	(74.7	) (77.7	) (66.5
Inventories, net	\$197.6	\$176.6	\$182.0

In conjunction with the acquisition of SunBelt, we obtained inventories with a fair value of \$4.0 million, as of February 28, 2011. Inventories are valued at the lower of cost or market, with cost being determined principally by the dollar value last-in, first-out (LIFO) method of inventory accounting. Cost for other inventories has been determined principally by the average cost method, primarily operating supplies, spare parts and maintenance parts. Elements of costs in inventories included raw materials, direct labor and manufacturing overhead. Inventories under the LIFO method are based on annual estimates of quantities and costs as of year-end; therefore, the condensed financial statements at June 30, 2012, reflect certain estimates relating to inventory quantities and costs at December 31, 2012. If the first-in, first-out (FIFO) method of inventory accounting had been used, inventories would have been approximately \$74.7 million, \$77.7 million and \$66.5 million higher than reported at June 30, 2012, December 31, 2011 and June 30, 2011, respectively.

## EARNINGS PER SHARE

Basic and diluted net income per share are computed by dividing net income by the weighted average number of common shares outstanding. Diluted net income per share reflects the dilutive effect of stock-based compensation.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
	(\$ and shares in millions, except per share data)			
Computation of Income per Share				
Net income	\$47.6	\$42.1	\$86.3	\$175.8
Basic shares	80.1	80.0	80.1	79.8
Basic net income per share	\$0.59	\$0.53	\$1.08	\$2.20

Diluted shares:

Basic shares	80.1	80.0	80.1	79.8
Stock-based compensation	0.6	1.1	0.7	0.9
Diluted shares	80.7	81.1	80.8	80.7
Diluted net income per share	\$0.59	\$0.52	\$1.07	\$2.18

The computation of dilutive shares from stock-based compensation does not include 1.8 million shares and zero shares for the three months ended June 30, 2012 and 2011, respectively, and 0.8 million shares and 0.9 million shares for the six months ended June 30, 2012, and 2011, respectively, as their effect would have been anti-dilutive.

## ENVIRONMENTAL

We are party to various government and private environmental actions associated with past manufacturing facilities and former waste disposal sites. Charges to income for investigatory and remedial efforts were material to operating results in 2011 and are expected to be material to operating results in 2012. The condensed balance sheets included reserves for future environmental expenditures to investigate and remediate known sites amounting to \$154.0 million, \$163.3 million and \$168.0 million at June 30, 2012, December 31, 2011 and June 30, 2011, respectively, of which \$123.0 million, \$132.3 million and \$140.0 million, respectively, were classified as other noncurrent liabilities.

Environmental provisions charged (credited) to income, which are included in cost of goods sold, were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(\$ in millions)			
Charges to income	\$0.3	\$7.9	\$3.2	\$9.9
Recoveries from third parties of costs incurred and expensed in prior periods	—	(9.0)	(0.1)	(9.5)
Total environmental expense (income)	\$0.3	\$(1.1)	\$3.1	\$0.4

Environmental exposures are difficult to assess for numerous reasons, including the identification of new sites, developments at sites resulting from investigatory studies, advances in technology, changes in environmental laws and regulations and their application, changes in regulatory authorities, the scarcity of reliable data pertaining to identified sites, the difficulty in assessing the involvement and financial capability of other potentially responsible parties (PRPs), our ability to obtain contributions from other parties, and the lengthy time periods over which site remediation occurs. It is possible that some of these matters (the outcomes of which are subject to various uncertainties) may be resolved unfavorably to us, which could materially adversely affect our financial position or results of operations.

## COMMITMENTS AND CONTINGENCIES

We, and our subsidiaries, are defendants in various legal actions (including proceedings based on alleged exposures to asbestos) incidental to our past and current business activities. As of June 30, 2012, December 31, 2011 and June 30, 2011, our condensed balance sheets included liabilities for these legal actions of \$19.6 million, \$16.4 million and \$17.0 million, respectively. These liabilities do not include costs associated with legal representation. Based on our analysis, and considering the inherent uncertainties associated with litigation, we do not believe that it is reasonably possible that these legal actions will materially adversely affect our financial position or results of operations in the near term.

During the ordinary course of our business, contingencies arise resulting from an existing condition, situation, or set of circumstances involving an uncertainty as to the realization of a possible gain contingency. In certain instances such as environmental projects, we are responsible for managing the cleanup and remediation of an environmental site. There exists the possibility of recovering a portion of these costs from other parties. We account for gain contingencies in accordance with the provisions of Accounting Standards Codification (ASC) 450 "Contingencies" (ASC 450) and therefore do not record gain contingencies and recognize income until it is earned and realizable.

## SHAREHOLDERS' EQUITY

On July 21, 2011, our board of directors authorized a share repurchase program of up to 5 million shares of common stock that will terminate in three years for any of the remaining shares not yet repurchased. For the six months ended June 30, 2012, 0.2 million shares were purchased and retired under this program at a cost of \$3.1 million. As of June 30, 2012, we had purchased a total of 0.4 million shares under this program and 4.6 million shares remained authorized to be purchased.

We issued less than 0.1 million and 0.5 million shares representing stock options exercised for the six months ended June 30, 2012 and 2011, respectively, with a total value of \$0.5 million and \$9.3 million, respectively.

The following table represents the activity included in accumulated other comprehensive loss:

	Foreign Currency Translation Adjustment	Unrealized Gains (Losses) on Derivative Contracts (net of taxes)	Pension and Postretirement Benefits (net of taxes)	Accumulated Other Comprehensive Loss
	(\$ in millions)			
Balance at January 1, 2011	\$0.4	\$11.6	\$(273.8)	\$(261.8)
Unrealized gains (losses):				
First quarter	1.3	0.4	—	1.7
Second quarter	1.0	(0.2)	—	0.8
Reclassification adjustments into income:				
First quarter	—	(3.5)	2.8	(0.7)
Second quarter	—	(2.9)	3.3	0.4
Balance at June 30, 2011	\$2.7	\$5.4	\$(267.7)	\$(259.6)
Balance at January 1, 2012	\$1.8	\$(5.3)	\$(290.7)	\$(294.2)
Unrealized gains (losses):				
First quarter	0.3	2.6	—	2.9
Second quarter	(0.8)	(4.1)	—	(4.9)
Reclassification adjustments into income:				
First quarter	—	1.7	3.2	4.9
Second quarter	—	1.1	4.3	5.4
Balance at June 30, 2012	\$1.3	\$(4.0)	\$(283.2)	\$(285.9)

Pension and postretirement benefits (net of taxes) activity in other comprehensive loss included the amortization of prior service costs and actuarial losses.

Unrealized gains and losses on derivative contracts (net of taxes) activity in other comprehensive loss included deferred tax (benefit) provisions of \$(1.7) million and \$(2.0) million for the three months ended June 30, 2012 and 2011, respectively, and \$0.9 million and \$(4.0) million for the six months ended June 30, 2012 and 2011, respectively. Pension and postretirement benefits (net of taxes) activity in other comprehensive loss included deferred tax provisions of \$2.6 million and \$2.2 million for the three months ended June 30, 2012 and 2011, respectively, and \$4.6 million and \$4.0 million for the six months ended June 30, 2012 and 2011, respectively.

## SEGMENT INFORMATION

We define segment results as income before interest expense, interest income, other operating (expense) income, other (expense) income and income taxes, and include the operating results of non-consolidated affiliates.

	Three Months Ended June 30,		Six Months Ended June 30,		
	2012	2011	2012	2011	
	(\$ in millions)				
Sales:					
Chlor Alkali Products	\$363.2	\$380.3	\$722.9	\$679.7	
Winchester	145.5	148.8	293.0	285.4	
Total sales	\$508.7	\$529.1	\$1,015.9	\$965.1	
Income before taxes:					
Chlor Alkali Products	\$75.0	\$72.8	\$149.4	\$118.0	
Winchester	11.9	11.8	22.7	24.3	
Corporate/other:					
Pension income	7.0	7.2	13.3	13.9	
Environmental (expense) income	(0.3	) 1.1	(3.1	) (0.4	)
Other corporate and unallocated costs	(20.8	) (19.3	) (38.7	) (37.9	)
Restructuring charges	(1.8	) (2.4	) (3.7	) (2.5	)
Other operating (expense) income	(0.1	) 0.2	0.4	1.6	
Interest expense	(5.8	) (7.4	) (12.3	) (14.6	)
Interest income	0.3	0.3	0.5	0.5	
Other (expense) income	(2.1	) (0.6	) (4.7	) 180.6	
Income before taxes	\$63.3	\$63.7	\$123.8	\$283.5	

## STOCK-BASED COMPENSATION

Stock-based compensation granted includes stock options, performance stock awards, restricted stock awards and deferred directors' compensation. Stock-based compensation expense was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(\$ in millions)			
Stock-based compensation	\$1.9	\$2.7	\$3.8	\$4.8
Mark-to-market adjustments	(0.4	) (0.1	) 0.5	0.8
Total expense	\$1.5	\$2.6	\$4.3	\$5.6

The fair value of each stock option granted, which typically vests ratably over three years, but not less than one year, was estimated on the date of grant, using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	2012	2011	
Grant date	3.65	% 4.32	%
Dividend yield	1.36	% 3.05	%
Risk-free interest rate	43	% 42	%
Expected volatility	7.0	7.0	
Expected life (years)	\$6.55	\$5.48	
Grant fair value (per option)	\$21.92	\$18.78	
Exercise price	480,250	575,000	
Shares granted			

Dividend yield for 2012 and 2011 was based on a historical average. Risk-free interest rate was based on zero coupon U.S. Treasury securities rates for the expected life of the options. Expected volatility was based on our historical stock price

movements, as we believe that historical experience is the best available indicator of the expected volatility. Expected life of the option grant was based on historical exercise and cancellation patterns, as we believe that historical experience is the best estimate of future exercise patterns.

## PENSION PLANS AND RETIREMENT BENEFITS

Most of our employees participate in defined contribution pension plans. We provide a contribution to an individual retirement contribution account maintained with the Contributing Employee Ownership Plan (CEOP) primarily equal to 5% of the employee's eligible compensation if such employee is less than age 45, and 7.5% of the employee's eligible compensation if such employee is age 45 or older. The defined contribution pension plans expense was \$4.5 million and \$3.8 million for the three months ended June 30, 2012 and 2011, respectively, and \$8.1 million and \$7.4 million for the six months ended June 30, 2012 and 2011, respectively.

A portion of our bargaining hourly employees continue to participate in our domestic defined benefit pension plans under a flat-benefit formula. Our funding policy for the defined benefit pension plans is consistent with the requirements of federal laws and regulations. Our foreign subsidiaries maintain pension and other benefit plans, which are consistent with statutory practices. Our defined benefit pension plan provides that if, within three years following a change of control of Olin, any corporate action is taken or filing made in contemplation of, among other things, a plan termination or merger or other transfer of assets or liabilities of the plan, and such termination, merger, or transfer thereafter takes place, plan benefits would automatically be increased for affected participants (and retired participants) to absorb any plan surplus (subject to applicable collective bargaining requirements).

We also provide certain postretirement health care (medical) and life insurance benefits for eligible active and retired domestic employees. The health care plans are contributory with participants' contributions adjusted annually based on medical rates of inflation and plan experience.

	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended June 30,		Three Months Ended June 30,	
	2012	2011	2012	2011
Components of Net Periodic Benefit (Income) Cost	(\$ in millions)			
Service cost	\$1.6	\$1.6	\$0.3	\$0.3
Interest cost	22.6	23.5	0.8	1.0
Expected return on plans' assets	(35.6)	(34.9)	—	—
Amortization of prior service cost	0.1	0.1	(0.1)	—
Recognized actuarial loss	5.9	3.6	1.0	0.7
Curtailment	—	1.1	—	—
Net periodic benefit (income) cost	\$(5.4)	\$(5.0)	\$2.0	\$2.0
	Pension Benefits		Other Postretirement Benefits	
	Six Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Components of Net Periodic Benefit (Income) Cost	(\$ in millions)			
Service cost	\$3.1	\$3.2	\$0.7	\$0.7
Interest cost	46.1	47.2	1.7	1.9
Expected return on plans' assets	(69.8)	(69.8)	—	—
Amortization of prior service cost	0.1	0.2	(0.1)	(0.1)
Recognized actuarial loss	10.2	7.5	1.9	1.4

Edgar Filing: OLIN CORP - Form 10-Q

Curtailment	—	1.1	—	—
Net periodic benefit (income) cost	\$(10.3	) \$(10.6	) \$4.2	\$3.9

We made cash contributions to our Canadian qualified defined benefit pension plan of \$0.4 million and \$0.5 million for the six months ended June 30, 2012 and 2011, respectively. In June 2011, we recorded a curtailment charge of \$1.1 million

15

---

related to the ratification of a new five and one half year Winchester, East Alton, IL union labor agreement. This curtailment charge was included in restructuring charges for the three and six months ended June 30, 2011.

## INCOME TAXES

The following table accounts for the difference between the actual tax provision and the amounts obtained by applying the statutory U.S. federal income tax rate of 35% to income before taxes.

Effective Tax Rate Reconciliation (Percent)	Three Months Ended June 30,				Six Months Ended June 30,			
	2012		2011		2012		2011	
Statutory federal tax rate	35.0		35.0		35.0		35.0	
Foreign rate differential	(0.1)	)	(0.1)	)	(0.1)	)	—	
Domestic manufacturing/export tax incentive	(1.6)	)	(1.8)	)	(1.3)	)	(0.6)	)
Dividends paid to CEO	(0.4)	)	(0.5)	)	(0.4)	)	(0.2)	)
State income taxes, net	0.2		2.3		0.8		0.9	
Return to provision	0.2		1.1		0.1		0.2	
Remeasurement of deferred taxes	1.3		(2.4)	)	0.9		(1.7)	)
Section 450 tax credit	(9.5)	)	—		(4.9)	)	—	
Incremental tax effect of SunBelt remeasurement	—		—		—		4.4	
Change in tax contingencies	1.7		—		1.0		—	
Change in valuation allowance	(1.4)	)	—		(0.7)	)	—	
Other, net	(0.6)	)	0.3		(0.1)	)	—	
Effective tax rate	24.8	%	33.9	%	30.3	%	38.0	%

The effective tax rates for the three months ended June 30, 2012 and 2011 included the cumulative effect of changes to our annual estimated effective tax rate from prior quarters.

The effective tax rate for the three and six months ended June 30, 2012 included a \$6.0 million benefit associated with the Agricultural Chemicals Security Tax Credit under Section 450 of the Internal Revenue Code (Section 450), (which is scheduled to sunset on December 31, 2012), that will be claimed on our 2008 to 2012 U.S. federal income tax returns and a \$0.8 million benefit associated with the reduction of valuation allowance against certain state tax credit carryforwards that we believe are more likely than not to be realized in future periods. The effective tax rate for the three and six months ended June 30, 2012 included expenses of \$1.1 million and \$1.2 million, respectively, associated primarily with increases in unrecognized tax benefits associated with prior years' tax positions. The effective tax rate for the three and six months ended June 30, 2012 also included expenses of \$0.8 million and \$1.2 million, respectively, related to the remeasurement of deferred taxes due to an increase in state effective tax rates.

The effective tax rate for the three months ended June 30, 2011 included a benefit of \$1.6 million related to the remeasurement of deferred taxes due to a change in state tax law implemented during the second quarter, which had a favorable impact on our state apportionment allocation, and a \$0.7 million expense associated with the finalization of our 2010 Canadian income tax returns. The effective tax rate for the six months ended June 30, 2011 included a benefit of \$4.9 million related to remeasurement of deferred taxes due to an increase in state tax effective rates and included a deferred tax expense of \$76.0 million related to the tax effect of our gain on the remeasurement of our previously held 50% equity interest in SunBelt.

As of June 30, 2012, we had \$40.3 million of gross unrecognized tax benefits, which would have a net \$38.5 million impact on the effective tax rate, if recognized. As of June 30, 2011, we had \$41.7 million of gross unrecognized tax benefits, of which \$39.5 million would have impacted the effective tax rate, if recognized. The amount of

unrecognized tax benefits was as follows:

16

---

	June 30,	
	2012	2011
	(\$ in millions)	
Balance at beginning of year	\$37.9	\$41.5
Increases for prior year tax positions	2.8	0.2
Decreases for prior year tax positions	(0.3	) —
Increases for current year tax positions	0.1	—
Settlement with taxing authorities	(0.2	) —
Balance at end of period	\$40.3	\$41.7

As of June 30, 2012, we believe it is reasonably possible that our total amount of unrecognized tax benefits will decrease by approximately \$0.8 million over the next twelve months. The anticipated reduction primarily relates to settlements with taxing authorities and the expiration of federal, state and foreign statutes of limitation.

We operate primarily in North America and file income tax returns in numerous jurisdictions. Our tax returns are subject to examination by various federal, state and local tax authorities. We believe we have adequately provided for all tax positions; however, amounts asserted by taxing authorities could be greater than our accrued position. For our primary tax jurisdictions, the tax years that remain subject to examination are as follows:

	Tax Years
U.S. federal income tax	2007 – 2010
U.S. state income tax	2004 – 2010
Canadian federal income tax	2007 – 2010
Canadian provincial income tax	2007 – 2010

## DERIVATIVE FINANCIAL INSTRUMENTS

We are exposed to market risk in the normal course of our business operations due to our purchases of certain commodities, our ongoing investing and financing activities and our operations that use foreign currencies. The risk of loss can be assessed from the perspective of adverse changes in fair values, cash flows and future earnings. We have established policies and procedures governing our management of market risks and the use of financial instruments to manage exposure to such risks. ASC 815 “Derivatives and Hedging” (ASC 815) requires an entity to recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. We use hedge accounting treatment for substantially all of our business transactions whose risks are covered using derivative instruments. In accordance with ASC 815, we designate commodity forward contracts as cash flow hedges of forecasted purchases of commodities and certain interest rate swaps as fair value hedges of fixed-rate borrowings. We do not enter into any derivative instruments for trading or speculative purposes.

Energy costs, including electricity used in our Chlor Alkali Products segment, and certain raw materials and energy costs, namely copper, lead, zinc, electricity and natural gas used in our Winchester segment, are subject to price volatility. Depending on market conditions, we may enter into futures contracts and put and call option contracts in order to reduce the impact of commodity price fluctuations. The majority of our commodity derivatives expire within one year. Those commodity contracts that extend beyond one year correspond with raw material purchases for long-term fixed-price sales contracts.

We enter into forward sales and purchase contracts to manage currency risk resulting from purchase and sale commitments denominated in foreign currencies (principally Canadian dollar and Australian dollar). All of the currency derivatives expire within one year and are for United States dollar equivalents. Our foreign currency forward contracts do not meet the criteria to qualify for hedge accounting. At June 30, 2012, December 31, 2011 and June 30, 2011, we had forward contracts to sell foreign currencies with a notional value of \$8.1 million, zero and zero,

respectively. We had no forward contracts to buy foreign currencies at June 30, 2012, December 31, 2011 and June 30, 2011.

In March 2010, we entered into interest rate swaps on \$125 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, pays us fixed rates. The counterparty to these agreements is Citibank, N.A. (Citibank), a major financial institution. In October 2011, we entered into \$125 million of interest rate swaps with equal and opposite terms as the \$125 million variable interest rate swaps on the 6.75% senior notes due 2016

(2016 Notes). We have agreed to pay a fixed rate to a counterparty who, in turn, pays us variable rates. The counterparty to this agreement is also Citibank. The result was a gain of \$11.0 million on the \$125 million variable interest rate swaps, which will be recognized through 2016. As of June 30, 2012, \$9.4 million of this gain was included in long-term debt. In October 2011, we de-designated our \$125 million interest rate swaps that had previously been designated as fair value hedges. The \$125 million variable interest rate swaps and the \$125 million fixed interest rate swaps do not meet the criteria for hedge accounting. All changes in the fair value of these interest rate swaps are recorded currently in earnings.

In 2001 and 2002, we entered into interest rate swaps on \$75 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, paid us fixed rates. The counterparty to these agreements was Citibank. In January 2009, we entered into a \$75 million fixed interest rate swap with equal and opposite terms as the \$75 million variable interest rate swaps on the 9.125% senior notes due 2011 (2011 Notes). We agreed to pay a fixed rate to a counterparty who, in turn, paid us variable rates. The counterparty to this agreement was Bank of America, N.A. (Bank of America), a major financial institution. The result was a gain of \$7.9 million on the \$75 million variable interest rate swaps, which was recognized through 2011. In January 2009, we de-designated our \$75 million interest rate swaps that had previously been designated as fair value hedges. The \$75 million variable interest rate swaps and the \$75 million fixed interest rate swap did not meet the criteria for hedge accounting. All changes in the fair value of these interest rate swaps were recorded currently in earnings.

#### Cash flow hedges

ASC 815 requires that all derivative instruments be recorded on the balance sheet at their fair value. For derivative instruments that are designated and qualify as a cash flow hedge, the change in fair value of the derivative is recognized as a component of other comprehensive loss until the hedged item is recognized in earnings. Gains and losses on the derivatives representing hedge ineffectiveness are recognized currently in earnings.

We had the following notional amount of outstanding commodity forward contracts that were entered into to hedge forecasted purchases:

	June 30, 2012	December 31, 2011	June 30, 2011
	(\$ in millions)		
Copper	\$68.3	\$52.1	\$45.5
Zinc	6.7	7.3	7.7
Lead	34.3	37.9	34.9
Natural gas	10.8	8.3	4.4

As of June 30, 2012, the counterparty to \$83.7 million of these commodity forward contracts was Wells Fargo Bank, N.A. (Wells Fargo), a major financial institution.

We use cash flow hedges for certain raw material and energy costs such as copper, zinc, lead, electricity and natural gas to provide a measure of stability in managing our exposure to price fluctuations associated with forecasted purchases of raw materials and energy used in the company's manufacturing process. At June 30, 2012, we had open positions in futures contracts through 2016. If all open futures contracts had been settled on June 30, 2012, we would have recognized a pretax loss of \$6.6 million.

If commodity prices were to remain at June 30, 2012 levels, approximately \$4.9 million of deferred losses would be reclassified into earnings during the next twelve months. The actual effect on earnings will be dependent on actual commodity prices when the forecasted transactions occur.

#### Fair value hedges

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. We include the gain or loss on the hedged items (fixed-rate borrowings) in the same line item, interest expense, as the offsetting loss or gain on the related interest rate swaps. As of June 30, 2012, December 31, 2011 and June 30, 2010, the total notional amounts of our interest rate swaps designated as fair value hedges were zero, \$80.8 million and \$218.0 million, respectively.

In June 2012, we terminated \$73.1 million of interest rate swaps with Wells Fargo that had been entered into on the

SunBelt Notes in May 2011. The result was a gain of \$2.2 million, which will be recognized through 2017. In March 2012, Citibank terminated \$7.7 million of interest rate swaps on our industrial development and environmental improvement tax-exempt bonds (industrial revenue bonds) due in 2017. The result was a gain of \$0.2 million, which would have been recognized through 2017. In June 2012, the industrial revenue bonds were redeemed by us, and as a result, the remaining \$0.2 million deferred gain was recognized in interest expense during the three months ended June 30, 2012.

We use interest rate swaps as a means of managing interest expense and floating interest rate exposure to optimal levels. These interest rate swaps are treated as fair value hedges. The accounting for gains and losses associated with changes in fair value of the derivative and the effect on the condensed financial statements will depend on the hedge designation and whether the hedge is effective in offsetting changes in fair value of cash flows of the asset or liability being hedged.

#### Financial statement impacts

We present our derivative assets and liabilities in our condensed balance sheets on a net basis. We net derivative assets and liabilities whenever we have a legally enforceable master netting agreement with the counterparty to our derivative contracts. We use these agreements to manage and substantially reduce our potential counterparty credit risk.

The following table summarizes the location and fair value of the derivative instruments on our condensed balance sheets. The table disaggregates our net derivative assets and liabilities into gross components on a contract-by-contract basis before giving effect to master netting arrangements:

Derivatives Designated as Hedging Instruments	Asset Derivatives			Liability Derivatives				
	Balance Sheet Location	Fair Value			Balance Sheet Location	Fair Value		
		June 30, 2012	December 31, 2011	June 30, 2011		June 30, 2012	December 31, 2011	June 30, 2011
		(\$ in millions)				(\$ in millions)		
Interest rate contracts	Other current assets	\$—	\$—	\$—	Current installments of long-term debt	\$—	\$—	\$1.3
Interest rate contracts	Other assets	—	2.2	6.6	Long-term debt	11.6	12.7	6.4
Interest rate contracts	Other assets	—	—	—	Other liabilities	—	—	0.2
Commodity contracts – gains	Other current assets	—	—	9.5	Accrued liabilities	(2.0 )	(2.5 )	—

		\$ 0.5	\$ (0.1	) \$ (2.4	) \$ (0.3

#### Credit risk and collateral

By using derivative instruments, we are exposed to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, our credit risk will equal the fair-value gain in a derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes us, thus creating a repayment risk for us. When the fair value of a derivative contract is negative, we owe the counterparty and, therefore, assume no repayment risk. We minimize the credit (or repayment) risk in derivative instruments by entering into transactions with high-quality counterparties. We monitor our positions and the credit ratings of our counterparties and we do not anticipate non-performance by the counterparties.

Based on the agreements with our various counterparties, cash collateral is required to be provided when the net fair value of the derivatives, with the counterparty, exceed a specific threshold. If the threshold is exceeded, cash is either provided by the counterparty to us if the value of the derivatives is our asset, or cash is provided by us to the counterparty if the value of the derivatives is our liability. As of June 30, 2012 and December 31, 2011, the amounts recognized in accrued liabilities for cash collateral provided by us to counterparties were \$1.1 million and \$3.9 million, respectively. As of June 30, 2011, the amount recognized in other current assets for cash collateral provided by us to counterparties was \$0.3 million. In all instances where we are party to a master netting agreement, we offset the receivable or payable recognized upon payment of cash collateral against the fair value amounts recognized for derivative instruments that have also been offset under such master netting agreements.

#### FAIR VALUE MEASUREMENTS

Fair value is defined as the price at which an asset could be exchanged in a current transaction between knowledgeable, willing parties or the amount that would be paid to transfer a liability to a new obligor, not the amount that would be paid to settle the liability with the creditor. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the instruments or market and the instruments' complexity.

Assets and liabilities recorded at fair value in the condensed balance sheets are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, defined by ASC 820 “Fair Value Measurements and Disclosures” (ASC 820) are directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities, and are as follows:

Level 1 — Inputs were unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 — Inputs (other than quoted prices included in Level 1) were either directly or indirectly observable for the asset

or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 — Inputs reflected management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration was given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

We are required to separately disclose assets and liabilities measured at fair value on a recurring basis, from those measured at fair value on a nonrecurring basis. Nonfinancial assets measured at fair value on a nonrecurring basis are intangible assets and goodwill, which are reviewed annually in the fourth quarter and/or when circumstances or other events indicate that impairment may have occurred.

Determining which hierarchical level an asset or liability falls within requires significant judgment. We evaluate our hierarchy disclosures each quarter. The following table summarizes the assets and liabilities measured at fair value in the condensed balance sheets:

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Balance at June 30, 2012	(\$ in millions)			
Assets				
Interest rate swaps	\$—	\$9.4	\$—	\$9.4
Liabilities				
Interest rate swaps	\$—	\$11.6	\$—	\$11.6
Commodity forward contracts	1.3	6.4	—	7.7
Earn out	—	—	35.3	35.3
Balance at December 31, 2011				
Assets				
Interest rate swaps	\$—	\$13.8	\$—	\$13.8
Liabilities				
Interest rate swaps	\$—	\$13.7	\$—	\$13.7
Commodity forward contracts	2.5	7.7	—	10.2
Earn out	—	—	49.0	49.0
Balance at June 30, 2011				
Assets				
Interest rate swaps	\$—	\$8.4	\$—	\$8.4
Commodity forward contracts	3.3	5.3	—	8.6
Liabilities				
Interest rate swaps	\$—	\$8.5	\$—	\$8.5
Commodity forward contracts	—	0.1	—	0.1
Earn out	—	—	43.2	43.2

For the six months ended June 30, 2012, there were no transfers into or out of Level 1 and Level 2.

The following table summarizes the activity for our earn out liability measured at fair value using Level 3 inputs:

	June 30,	2011
	2012	
	(\$ in millions)	
Balance at beginning of year	\$49.0	\$—
(Settlements) purchases	(18.5	) 42.3
Unrealized losses included in other (expense) income	4.8	0.9
Balance at end of period	\$35.3	\$43.2

### Interest Rate Swaps

The fair value of the interest rate swaps was included in other current assets, other assets, current installments of long-term debt, accrued liabilities, long-term debt and other liabilities as of June 30, 2012, December 31, 2011 and June 30, 2011. These financial instruments were valued using the “income approach” valuation technique. This method used valuation techniques to convert future amounts to a single present amount. The measurement was based on the value indicated by current market expectations about those future amounts. We use interest rate swaps as a means of managing interest expense and floating interest rate exposure to optimal levels.

### Commodity Forward Contracts

The fair value of the commodity forward contracts was classified in other current assets and accrued liabilities as of June 30, 2012, December 31, 2011 and June 30, 2011, with unrealized gains and losses included in accumulated other comprehensive loss, net of applicable taxes. These financial instruments were valued primarily based on prices and other relevant information observable in market transactions involving identical or comparable assets or liabilities including both forward and spot prices for commodities. We use commodity forward contracts for certain raw materials and energy costs such as copper, zinc, lead, electricity and natural gas to provide a measure of stability in managing our exposure to price fluctuations.

### Foreign Currency Contracts

We had no fair value of foreign currency contracts as of June 30, 2012, December 31, 2011 and June 30, 2011. The gains and losses of foreign currency contracts were included in selling and administration expense as these financial instruments do not meet the criteria to qualify for hedge accounting. These financial instruments were valued primarily based on prices and other relevant information observable in market transactions involving identical or comparable assets or liabilities including both forward and spot prices for foreign currencies. We enter into forward sales and purchase contracts to manage currency risk resulting from purchase and sale commitments denominated in foreign currencies (principally Canadian dollar and Australian dollar).

### Financial Instruments

The carrying values of cash and cash equivalents, restricted cash, accounts receivable and accounts payable approximated fair values due to the short-term maturities of these instruments. The fair value of our long-term debt was determined based on current market rates for debt of similar risk and maturities. The following table summarizes the fair value measurements of debt and the actual debt recorded on our condensed balance sheets:

	Fair Value Measurements				Amount recorded on balance sheets
	Level 1	Level 2	Level 3	Total	
	(\$ in millions)				
Balance at June 30, 2012	\$—	\$400.2	\$153.0	\$553.2	\$527.5
Balance at December 31, 2011	—	391.4	160.9	552.3	536.4
Balance at June 30, 2011	—	488.3	124.8	613.1	582.8

### Earn Out

The fair value of the earn out associated with the SunBelt acquisition was estimated using a probability-weighted discounted cash flow model. This fair value measurement is based on significant inputs not observed in the

market. Key assumptions in determining the fair value of the earn out include the discount rate and cash flow projections for the years ended December 31, 2012 and 2013.

For the six months ended June 30, 2012, we paid \$18.5 million for the earn out related to the 2011 SunBelt performance. The 2011 earn out payment included \$15.3 million that was recognized as part of the original purchase price. The \$15.3 million is included as a financing activity in the statement of cash flows.

## Nonrecurring Fair Value Measurements

In addition to assets and liabilities that are recorded at fair value on a recurring basis, we record assets and liabilities at fair value on a nonrecurring basis as required by ASC 820. There were no assets measured at fair value on a nonrecurring basis as of June 30, 2012, December 31, 2011 and June 30, 2011. At February 28, 2011, \$180.6 million of assets were measured at fair value on a nonrecurring basis. We recognized a gain of \$181.4 million for the six months ended June 30, 2011 on our previously held investment in SunBelt, which had been accounted for under the equity method of accounting prior to the acquisition. We remeasured our equity interest in SunBelt of \$(0.8) million based on our purchase of PolyOne's 50% interest in SunBelt. We used Level 1 inputs for the cash payments and Level 3 inputs for the estimated earn out.

## SUBSEQUENT EVENT

On July 17, 2012, we entered into a definitive agreement to acquire privately-held K. A. Steel Chemicals Inc. (KA Steel), on a cash free, debt free basis, for \$328 million in cash, subject to certain post-closing adjustments. The closing of the acquisition is conditioned upon regulatory approval and other customary closing conditions and is expected to occur by the end of the third quarter of 2012. We expect to finance the acquisition using a combination of cash on hand and drawing under our \$265 million senior revolving credit facility.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

### Business Background

Our manufacturing operations are concentrated in two business segments: Chlor Alkali Products and Winchester. Both are capital intensive manufacturing businesses. Chlor Alkali Products operating rates are closely tied to the general economy. Each segment has a commodity element to it, and therefore, our ability to influence pricing is quite limited on the portion of the segment's business that is strictly commodity. Our Chlor Alkali Products business is a commodity business where all supplier products are similar and price is the major supplier selection criterion. We have little or no ability to influence prices in this large, global commodity market. Cyclical price swings, driven by changes in supply/demand, can be abrupt and significant and, given the capacity in our Chlor Alkali Products business, can lead to significant changes in our overall profitability. Winchester also has a commodity element to its business, but a majority of Winchester ammunition is sold as a branded consumer product where there are opportunities to differentiate certain offerings through innovative new product development and enhanced product performance. While competitive pricing versus other branded ammunition products is important, it is not the only factor in product selection.

### Executive Summary

On July 17, 2012, we entered into a definitive agreement to acquire privately-held KA Steel, on a cash free, debt free basis, for \$328 million in cash, subject to certain post-closing adjustments. KA Steel, headquartered in Lemont, IL, is one of the largest distributors of caustic soda in North America and one of the leading bleach manufacturers in the Midwest. The closing of the acquisition is conditioned upon regulatory approval and other customary closing conditions and is expected to occur by the end of the third quarter of 2012. We expect to finance the acquisition using a combination of cash on hand and drawing under our \$265 million senior revolving credit facility.

Chlor Alkali Products' segment income was \$75.0 million and \$149.4 million for the three and six months ended June 30, 2012, respectively. Chlor Alkali Products' segment income was higher than the comparable periods in the prior year, as a result of improvements in ECU pricing and increased contributions from bleach and hydrochloric acid. Chlor Alkali Products' second quarter segment income was consistent with the first quarter of 2012 level of

\$74.4 million, as ECU netbacks and chlorine and caustic soda volumes declined slightly, offset by increased bleach volumes. Operating rates in Chlor Alkali Products for the second quarter of 2012 were 79%, which were lower than the first quarter of 2012 level of 80% and the second quarter of 2011 level of 85%.

Second quarter of 2012 ECU netbacks, including SunBelt, of approximately \$575 were 3% higher than the second quarter of 2011 ECU netbacks of \$560, including SunBelt, due to higher caustic soda prices, partially offset by lower chlorine prices and higher freight costs per ECU shipped. The second quarter 2012 ECU netback declined slightly from the first quarter 2012 level of approximately \$585, primarily due to higher freight costs. ECU netbacks in the third quarter of 2012 are forecast to be slightly lower than the second quarter of 2012 as a result of lower chlorine prices. In the second quarter of 2012, a caustic soda price increase was announced totaling \$60 per ton. While the success of the caustic soda price increase is not yet known, the majority of the benefit, if realized, would impact fourth quarter 2012 results.

Winchester segment income was \$11.9 million and \$22.7 million for the three and six months ended June 30, 2012, respectively. The decrease in segment income for the six months ended June 30, 2012 reflects the impact of higher commodity metals and other material costs, higher manufacturing costs and transition costs associated with our ongoing relocation of the centerfire operations to Oxford, MS, partially offset by higher selling prices.

Capital spending of \$145.8 million for the six months ended June 30, 2012 included \$73.6 million for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, \$28.8 million for the construction of low salt, high strength bleach facilities at our McIntosh, AL; Henderson, NV; and Niagara Falls, NY chlor alkali sites and \$12.8 million for our ongoing relocation of our Winchester centerfire ammunition manufacturing operations. We completed the first low salt, high strength bleach facility at McIntosh, AL in the first quarter of 2012.

On April 27, 2012, we entered into a new \$265 million five-year senior revolving credit facility, which replaced the \$240 million senior revolving credit facility and a \$25 million letter of credit facility. The new credit facility will expire in April 2017. Borrowing options and restrictive covenants are similar to those of our previous \$240 million senior revolving credit facility. The \$265 million senior revolving credit facility includes a \$110 million letter of credit subfacility and a \$50 million Canadian subfacility.

#### Consolidated Results of Operations

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(\$ in millions, except per share data)			
Sales	\$508.7	\$529.1	\$1,015.9	\$965.1
Cost of goods sold	391.4	413.7	784.3	772.9
Gross margin	117.3	115.4	231.6	192.2
Selling and administration	45.1	42.5	88.8	82.0
Restructuring charges	1.8	2.4	3.7	2.5
Other operating (expense) income	(0.1)	) 0.2	0.4	1.6
Operating income	70.3	70.7	139.5	109.3
Earnings of non-consolidated affiliates	0.6	0.7	0.8	7.7
Interest expense	5.8	7.4	12.3	14.6
Interest income	0.3	0.3	0.5	0.5
Other (expense) income	(2.1)	) (0.6)	(4.7)	) 180.6
Income before taxes	63.3	63.7	123.8	283.5
Income tax provision	15.7	21.6	37.5	107.7

Net income per common share:				
Basic	\$0.59	\$0.53	\$1.08	\$2.20
Diluted	\$0.59	\$0.52	\$1.07	\$2.18

#### Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

Sales for the three months ended June 30, 2012 were \$508.7 million compared to \$529.1 million in the same period last year, a decrease of \$20.4 million, or 4%. Chlor Alkali Products' sales decreased \$17.1 million, or 4%, primarily due to decreased volumes, partially offset by higher ECU prices. Our ECU netbacks, including SunBelt, increased 3% compared to the same period in the prior year. Winchester sales decreased by \$3.3 million, or 2%, from the three months ended June 30, 2011 primarily due to decreased shipments to law enforcement agencies.

Gross margin increased \$1.9 million, or 2%, compared to the three months ended June 30, 2011, primarily as a result of increased ECU netbacks and increased gross margin from bleach and hydrochloric acid, partially offset by lower chlorine and caustic soda volumes and the absence of recoveries from third parties for environmental costs incurred and expensed in prior periods. Gross margin as a percentage of sales increased to 23% in 2012 from 22% in 2011.

Selling and administration expenses for the three months ended June 30, 2012 increased \$2.6 million, or 6%, from the

three months ended June 30, 2011 primarily due to increased salary and benefit costs of \$2.3 million, a higher level of legal and legal-related settlement expenses of \$1.8 million and higher bad debt costs of \$0.8 million, partially offset by decreased relocation and recruiting charges of \$1.3 million and lower management incentive compensation expense of \$1.0 million, which includes mark-to-market adjustments on stock-based compensation. Selling and administration expenses as a percentage of sales were 9% in 2012 and 8% in 2011.

Restructuring charges for the three months ended June 30, 2012 and 2011 were associated with exiting the use of mercury cell technology in the chlor alkali manufacturing process by the end of 2012 and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS.

Interest expense decreased by \$1.6 million in 2012, primarily due to an increase of \$1.5 million in capitalized interest, primarily associated with the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, and a lower level of outstanding debt, partially offset by higher interest rates.

Other (expense) income for the three months ended June 30, 2012 and 2011 included \$2.2 million and \$0.7 million, respectively, of expense for our earn out liability from the SunBelt acquisition.

The effective tax rate for the three months ended June 30, 2012 included a \$6.0 million benefit related to the Section 450 credits, partially offset by a \$1.1 million expense associated with changes in tax contingencies. After giving consideration to these two items, the effective tax rate for the three months ended June 30, 2012 of 32.5% was lower than the 35% U.S. federal statutory rate, primarily due to the effect of favorable permanent tax deduction items which are offset by state income taxes net of utilization of certain state tax credits. The effective tax rate for the three months ended June 30, 2011 included a \$1.6 million reduction in expense associated with the remeasurement of deferred taxes due to a change in state law implemented in the second quarter of 2011 and a \$0.7 million expense associated with the finalization of our 2010 Canadian income tax returns. After giving consideration to these two items, the effective tax rate for the three months ended June 30, 2011 of 35.3% was slightly higher than the 35% U.S. federal statutory rate, primarily due to the effect of state income taxes which are offset by favorable permanent tax deduction items and the utilization of certain state tax credits.

#### Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011

Sales for the six months ended June 30, 2012 were \$1,015.9 million compared to \$965.1 million in the same period last year, an increase of \$50.8 million, or 5%. Chlor Alkali Products' sales increased \$43.2 million, or 6%, primarily due to higher ECU prices and the ownership of SunBelt for the full period. Our ECU netbacks, including SunBelt, increased 7% compared to the same period in the prior year. Winchester sales increased by \$7.6 million, or 3%, from the six months ended June 30, 2011 primarily due to higher selling prices and increased shipments to domestic commercial customers, partially offset by lower shipments to law enforcement agencies.

Gross margin increased \$39.4 million, or 20%, compared to the six months ended June 30, 2011, primarily as a result of increased ECU netbacks, the ownership of SunBelt for the full period and increased gross margin from bleach and hydrochloric acid, partially offset by the impact of decreased recoveries of \$9.4 million from third parties for environmental costs incurred and expensed in prior periods. Gross margin as a percentage of sales increased to 23% in 2012 from 20% in 2011.

Selling and administration expenses for the six months ended June 30, 2012 increased \$6.8 million, or 8%, from the six months ended June 30, 2011 primarily due to increased salary and benefit costs of \$4.0 million, a higher level of legal and legal-related settlement expenses of \$3.3 million, and the inclusion of a full period of SunBelt's selling and administration expenses of \$1.5 million. These increases were partially offset by reduced relocation costs of \$1.9 million. Selling and administration expenses as a percentage of sales were 9% in 2012 and 8% in 2011.

Restructuring charges for the six months ended June 30, 2012 and 2011 were associated with exiting the use of mercury cell technology in the chlor alkali manufacturing process by the end of 2012 and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS.

Other operating (expense) income for the six months ended June 30, 2012 decreased by \$1.2 million from the same period in 2011. Other operating (expense) income for the six months ended June 30, 2011 included \$0.8 million of gains on the disposition of property, plant and equipment associated with the Charleston, TN conversion project.

The earnings of non-consolidated affiliates were \$0.8 million for the six months ended June 30, 2012, a decrease of \$6.9 million from the six months ended June 30, 2011. On February 28, 2011, we acquired the remaining 50% interest in SunBelt. Since the date of acquisition, SunBelt's results are no longer included in earnings of non-consolidated affiliates but

are consolidated in our financial statements.

Interest expense decreased by \$2.3 million in 2012, primarily due to an increase of \$2.4 million in capitalized interest, primarily associated with the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, and a lower level of outstanding debt, partially offset by higher interest rates.

Other (expense) income for the six months ended June 30, 2012 and 2011 included \$4.8 million and \$0.9 million, respectively, of expense for our earn out liability from the SunBelt acquisition. Other (expense) income for the six months ended June 30, 2011 also included a gain of \$181.4 million as a result of remeasuring our previously held 50% equity interest in SunBelt.

The effective tax rate for the six months ended June 30, 2012 included a \$6.0 million benefit related to the Section 45O credits, partially offset by a \$1.2 million expense associated with changes in tax contingencies. After giving consideration to these two items, the effective tax rate for the six months ended June 30, 2012 of 34.2% was lower than the 35% U.S. federal statutory rate, primarily due to the effect of favorable permanent tax deduction items which are offset by state income taxes net of utilization of certain state tax credits. The effective tax rate for the six months ended June 30, 2011 included a \$4.9 million reduction in expense associated with the remeasurement of deferred taxes due to an increase in state effective tax rates, a \$0.7 million expense associated with the finalization of our 2010 Canadian tax returns and a \$76.0 million increase in expense associated with the remeasurement of our SunBelt investment. After giving consideration to these three items of \$71.8 million, and the SunBelt pretax gain of \$181.4 million, for the six months ended June 30, 2011, the effective tax rate of 35.2% was slightly higher than the 35% U.S. federal statutory rate, primarily due to the effect of state income taxes which are offset by favorable permanent tax deduction items and the utilization of certain state tax credits.

## Segment Results

We define segment results as income before interest expense, interest income, other operating (expense) income, other (expense) income and income taxes, and include the operating results of non-consolidated affiliates.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(\$ in millions)			
Sales:

Earnings of non-consolidated affiliates were included in the Chlor Alkali Products segment results consistent with management's monitoring of the operating segments. The earnings of non-consolidated affiliates were \$0.6 million and \$0.7 million for the three months ended June 30, 2012 and 2011, respectively, and \$0.8 million and \$7.7 million for the six months ended June 30, 2012 and 2011, respectively. On February 28, 2011, we acquired the remaining 50% interest in SunBelt. Since the date of acquisition, SunBelt's results are no longer included in earnings of non-consolidated affiliates but are consolidated in our financial statements.

The service cost and the amortization of prior service cost components of pension expense related to the employees of the operating segments are allocated to the operating segments based on their respective estimated census data. All other components of pension costs are included in corporate/other and include items such as the expected return on plan assets, interest cost and recognized actuarial gains and losses.

Environmental (expense) income for the three months ended June 30, 2012 and 2011 included zero and \$9.0 million, respectively, of recoveries from third parties for costs incurred and expensed in prior periods. Environmental (expense) income for the six months ended June 30, 2012 and 2011 included \$0.1 million and \$9.5 million, respectively, of recoveries from third parties for costs incurred and expensed in prior periods. Environmental expense is included in cost of goods sold in the condensed statements of income.

Restructuring charges for the three and six months ended June 30, 2012 and 2011 were associated with exiting the use of mercury cell technology in the chlor alkali manufacturing process by the end of 2012 and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS.

Interest expense was reduced by capitalized interest of \$1.7 million and \$0.2 million for the three months ended June 30, 2012 and 2011, respectively, and \$2.8 million and \$0.4 million for the six months ended June 30, 2012 and 2011, respectively.

Other (expense) income for the three months ended June 30, 2012 and 2011 included \$2.2 million and \$0.7 million, respectively, of expense for our earn out liability from the SunBelt acquisition and \$4.8 million and \$0.9 million for the six months ended June 30, 2012 and 2011, respectively. Other (expense) income for the six months ended June 30, 2011 also included a pretax gain of \$181.4 million as a result of remeasuring our previously held 50% equity interest in SunBelt. The income tax provision for the six months ended June 30, 2011 included a \$76.0 million discrete deferred tax expense as a result of the remeasurement of the SunBelt investment.

#### Chlor Alkali Products

##### Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

Chlor Alkali Products' sales for the three months ended June 30, 2012 were \$363.2 million compared to \$380.3 million for the three months ended June 30, 2011, a decrease of \$17.1 million, or 4%. The sales decrease was primarily due to lower chlorine and caustic soda volumes of 11%, partially offset by higher ECU pricing, which increased 3% from the three months ended June 30, 2011. Bleach volumes increased 9% for the three months ended June 30, 2012 compared to the same period last year, while hydrochloric acid volumes also increased 7% compared to the three months ended June 30, 2011. Our ECU netback, including SunBelt, was approximately \$575 for the three months ended June 30, 2012 compared to approximately \$560 for the three months ended June 30, 2011. Freight costs included in the ECU netback increased 7% for the three months ended June 30, 2012, compared to the same period last year. Our operating rate for the three months ended June 30, 2012 was 79%, compared to the operating rate of 85% for the three months ended June 30, 2011. The lower operating rate for 2012 resulted from lower chlorine demand.

Chlor Alkali Products generated segment income of \$75.0 million for the three months ended June 30, 2012, compared to \$72.8 million for the same period in 2011, an increase of \$2.2 million. Chlor Alkali Products segment income was higher primarily due to decreased operating costs (\$7.8 million) and higher ECU netbacks (\$5.9 million), partially offset by decreased volumes (\$11.5 million).

##### Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011

Chlor Alkali Products' sales for the six months ended June 30, 2012 were \$722.9 million compared to \$679.7 million for the six months ended June 30, 2011, an increase of \$43.2 million, or 6%. The sales increase was primarily due to higher ECU pricing, which increased 7% from the six months ended June 30, 2011, and increased SunBelt sales of \$33.1 million for the additional two months of our ownership. Bleach volumes increased 9% for the six months ended June 30, 2012 compared to the same period last year, while hydrochloric acid volumes also increased 9% compared to the six months ended June 30, 2011. Our ECU netback, including SunBelt, was approximately \$580 for the six months ended June 30, 2012 compared to approximately \$540 for the six months ended June 30, 2011. Freight costs included in the ECU netback increased 4% for the six months ended June 30, 2012, compared to the same period last year, primarily due to higher railroad freight rates. Our operating rate for the six months ended June 30, 2012 was 80%, compared to the operating rate of 83% for the six months ended June 30, 2011.

Chlor Alkali Products generated segment income of \$149.4 million for the six months ended June 30, 2012, compared to \$118.0 million for the same period in 2011, an increase of \$31.4 million. Chlor Alkali Products segment income was higher primarily due to higher ECU netbacks (\$32.2 million), higher SunBelt earnings for the additional two months of our ownership (\$8.3 million), primarily related to higher ECU netbacks and \$7.5 million of additional income on the remaining 50% interest we acquired, and decreased operating costs (\$1.7 million). These increases were partially offset by decreased volumes (\$10.8 million).

#### Winchester

##### Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

Winchester sales were \$145.5 million for the three months ended June 30, 2012 compared to \$148.8 million for the three months ended June 30, 2011, a decrease of \$3.3 million, or 2%. The decrease was primarily due to lower shipments to law enforcement agencies of \$3.8 million compared to the three months ended June 30, 2011 and decreased shipments to international customers of \$1.9 million. These decreases were partially offset by higher sales of ammunition to domestic commercial customers of \$1.8 million and increased shipments to military customers of \$0.5 million.

Winchester reported segment income of \$11.9 million for the three months ended June 30, 2012 compared to \$11.8 million for the three months ended June 30, 2011, an increase of \$0.1 million, or 1%. The increase was primarily due to higher selling prices (\$5.1 million), partially offset by the impact of increased commodity and other material costs, decreased volumes, higher operating costs and transition costs associated with our ongoing relocation of the centerfire operations to Oxford, MS (\$5.0 million).

##### Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011

Winchester sales were \$293.0 million for the six months ended June 30, 2012 compared to \$285.4 million for the six months ended June 30, 2011, an increase of \$7.6 million, or 3%. Sales of ammunition to domestic commercial customers were higher by \$12.1 million and shipments to military customers increased \$1.9 million. These increases were partially offset by a reduction in shipments to law enforcement agencies of \$7.0 million compared to the six months ended June 30, 2011. Shipments to international customers were comparable to the same period last year.

Winchester reported segment income of \$22.7 million for the six months ended June 30, 2012 compared to \$24.3 million for the six months ended June 30, 2011, a decrease of \$1.6 million, or 7%. The decrease was primarily due to the impact of increased commodity and other material costs, higher operating costs and transition costs associated with our ongoing relocation of the centerfire operations to Oxford, MS (\$9.2 million), partially offset by higher selling prices (\$7.7 million).

#### Corporate/Other

##### Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011

For the three months ended June 30, 2012, pension income included in corporate/other was \$7.0 million compared to \$7.2 million for the three months ended June 30, 2011. On a total company basis, defined benefit pension income for the three months ended June 30, 2012 was \$5.4 million compared to \$5.0 million for the three months ended June 30, 2011.

For the three months ended June 30, 2012, charges to income for environmental investigatory and remedial activities were \$0.3 million compared to credits to income of \$1.1 million for the three months ended June 30, 2011, which

included \$9.0 million of recoveries from third parties for costs incurred and expensed in prior periods. Without these recoveries, charges to income for environmental investigatory and remedial activities would have been \$0.3 million for the three months ended June 30, 2012 compared to \$7.9 million for the three months ended June 30, 2011. These charges related primarily to expected future investigatory and remedial activities associated with past manufacturing operations and former waste disposal sites.

For the three months ended June 30, 2012, other corporate and unallocated costs were \$20.8 million compared to \$19.3 million for the three months ended June 30, 2011, an increase of \$1.5 million, or 8%. The increase was primarily due to a higher level of legal and legal-related settlement expenses of \$1.7 million and higher salary and benefit costs of \$0.7 million, partially offset by decreased management incentive compensation expense of \$1.1 million, which includes mark-to-market adjustments on stock-based compensation.

Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011

For the six months ended June 30, 2012, pension income included in corporate/other was \$13.3 million compared to \$13.9 million for the six months ended June 30, 2011. On a total company basis, defined benefit pension income for the six months ended June 30, 2012 was \$10.3 million compared to \$10.6 million for the six months ended June 30, 2011.

For the six months ended June 30, 2012, charges to income for environmental investigatory and remedial activities were \$3.1 million compared to \$0.4 million for the six months ended June 30, 2011, which included \$0.1 million and \$9.5 million, respectively, of recoveries from third parties for costs incurred and expensed in prior periods. Without these recoveries, charges to income for environmental investigatory and remedial activities would have been \$3.2 million for the six months ended June 30, 2012 compared to \$9.9 million for the six months ended June 30, 2011. These charges related primarily to expected future investigatory and remedial activities associated with past manufacturing operations and former waste disposal sites.

For the six months ended June 30, 2012, other corporate and unallocated costs were \$38.7 million compared to \$37.9 million for the six months ended June 30, 2011, an increase of \$0.8 million, or 2%. The increase was primarily due to higher salary and benefit costs of \$1.5 million and a higher level of legal and legal-related settlement expenses of \$1.2 million, partially offset by decreased management incentive compensation expense of \$2.1 million, which includes mark-to-market adjustments on stock-based compensation.

#### Outlook

Net income in the third quarter of 2012 is projected to be in the \$0.40 to \$0.45 per diluted share range compared with \$0.58 per diluted share in the third quarter of 2011. Our third quarter earnings forecast does not include any impact of the recently announced KA Steel acquisition or any transaction costs related to the acquisition.

In Chlor Alkali Products, the third quarter of 2012 segment income is expected to decline compared to both the second quarter of 2012 income of \$75.0 million and the third quarter of 2011 income of \$76.7 million. The expected lower segment income compared to the third quarter of 2011 and the second quarter of 2012 anticipate approximately \$8 million of costs associated with two major plant maintenance outages and one-time startup costs associated with the Charleston, TN mercury cell technology conversion project and the Niagara Falls, NY low salt, high strength bleach facility. Chlor Alkali Products is also expected to incur seasonally higher electricity costs. The Chlor Alkali Products' operating rate in the third quarter of 2012 is forecast to be in the low 80% range.

Second quarter of 2012 ECU netbacks, including SunBelt, of approximately \$575, were 3% higher than the second quarter of 2011 ECU netbacks of \$560 including SunBelt, due to higher caustic soda prices, partially offset by lower chlorine prices and higher freight costs per ECU shipped. The second quarter of 2012 declined slightly from the first quarter 2012 levels of approximately \$585, primarily due to higher freight costs. ECU netbacks in the third quarter of 2012 are forecast to be slightly lower than the second quarter of 2012 as a result of lower chlorine prices. In the second quarter of 2012, a caustic soda price increase was announced totaling \$60 per ton. While the success of the caustic soda price increase is not yet known, the majority of the benefit, if realized, would impact fourth quarter 2012 results.

Bleach volumes in the second quarter of 2012 increased approximately 9% compared to second quarter 2011 levels. We have now experienced eighteen consecutive quarters, on a year-over-year basis, of volume growth in bleach shipments. The startup of our first low salt, high strength bleach facility in McIntosh, AL in the first quarter of 2012 increased our bleach capacity by 15%. We expect the startup of our low salt, high strength bleach facility at our Niagara Falls, NY chlor alkali site during the third quarter of 2012. We expect to complete our additional low salt, high strength bleach facility at our Henderson, NV chlor alkali site by the end of 2012. These three new facilities will increase total bleach manufacturing capacity by an additional 50% over the 2011 capacity. These low salt, high

strength bleach facilities will manufacture bleach with approximately twice the concentration, which should significantly reduce transportation costs.

Winchester third quarter 2012 segment income is expected to exhibit the normal seasonal strength and improve compared to the second quarter 2012 level of \$11.9 million and the third quarter 2011 level of \$13.1 million. Increased selling prices and lower commodity costs are forecast to positively impact the third quarter of 2012 compared to the third quarter of 2011.

We anticipate that full year 2012 charges for environmental investigatory and remedial activities will be in the \$10 million to \$15 million range. We do not believe that there will be any additional recoveries of environmental costs incurred and expensed in prior periods in 2012.

We expect defined benefit pension plan income in 2012 to be similar to the 2011 level. Based on the December 31, 2011

funding status, we will not be required to make any cash contributions to our domestic defined benefit pension plan in 2012 and we believe the earliest we may be required to make any cash contributions to that plan is 2014. We do have a small Canadian defined benefit pension plan to which we anticipate cash contributions of less than \$2 million in 2012.

During the third quarter of 2012, we are anticipating pretax restructuring charges of approximately \$2 million primarily associated with our ongoing relocation of our Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS and exiting the use of mercury cell technology in the chlor alkali manufacturing process by the end of 2012. We are expecting total pretax restructuring charges for 2012 related to these projects to be approximately \$8 million. We expect to incur additional restructuring charges through 2016 totaling approximately \$13 million related to our ongoing relocation of our Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS. We also expect to incur additional restructuring charges through 2013 totaling approximately \$8 million related to exiting the use of mercury cell technology in the chlor alkali manufacturing process.

After giving consideration to the \$4.8 million of favorable tax adjustments for the six months ended June 30, 2012, we believe the full year 2012 effective tax rate will be in the 34% to 35% range.

For the full year 2012, we expect capital spending to be in the \$240 million range, which includes spending for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, the low salt, high strength bleach facilities at our McIntosh, AL; Henderson, NV; and Niagara Falls, NY chlor alkali sites, the reconfiguration of our Augusta, GA facility to manufacture bleach and distribute caustic soda, and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations. We anticipate the startup of the converted Charleston, TN chlor alkali facility in the second half of 2012. We completed the first low salt, high strength bleach facility at McIntosh, AL in the first quarter of 2012 and expect the low salt, high strength bleach facility at Niagara Falls, NY to startup in the third quarter of 2012. We expect the remaining low salt, high strength bleach facility at Henderson, NV to be completed by the end of 2012. We expect 2012 depreciation expense to be in the \$105 million to \$110 million range.

## Environmental Matters

Environmental provisions charged (credited) to income, which are included in costs of goods sold, were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(\$ in millions)			
Charges to income	\$0.3	\$7.9	\$3.2	\$9.9
Recoveries from third parties of costs incurred and expensed in prior periods	—	(9.0)	(0.1)	(9.5)
Total environmental expense (income)	\$0.3	\$(1.1)	\$3.1	\$0.4

Our liabilities for future environmental expenditures were as follows:

	June 30,	
	2012	2011
	(\$ in millions)	
Balance at beginning of year	\$163.3	\$167.6
Charges to income	3.2	9.9
Remedial and investigatory spending	(12.5)	(10.0)
Currency translation adjustments	—	0.5

Balance at end of period	\$154.0	\$168.0
--------------------------	---------	---------

Environmental investigatory and remediation activities spending was associated with former waste disposal sites and past manufacturing operations. Spending in 2012 for investigatory and remedial efforts, the timing of which is subject to regulatory approvals and other uncertainties, is estimated to be approximately \$30 million. Cash outlays for remedial and investigatory activities associated with former waste disposal sites and past manufacturing operations were not charged to income, but instead, were charged to reserves established for such costs identified and expensed to income in prior periods. Associated costs of investigatory and remedial activities are provided for in accordance with generally accepted accounting principles governing probability and the ability to reasonably estimate future costs. Our ability to estimate future costs depends on whether our investigatory and remedial activities are in preliminary or advanced stages. With respect to unasserted claims, we accrue liabilities for costs that, in our experience, we may incur to protect our interest against those

unasserted claims. Our accrued liabilities for unasserted claims amounted to \$2.7 million at June 30, 2012. With respect to asserted claims, we accrue liabilities based on remedial investigation, feasibility study, remedial action and Operation, Maintenance and Monitoring (OM&M) expenses that, in our experience, we may incur in connection with the asserted claims. Required site OM&M expenses are estimated and accrued in their entirety for required periods not exceeding 30 years, which reasonably approximates the typical duration of long-term site OM&M. Charges to income for investigatory and remedial efforts were material to operating results in 2011 and are expected to be material to operating results in 2012 and future years.

Our condensed balance sheets included liabilities for future environmental expenditures to investigate and remediate known sites amounting to \$154.0 million at June 30, 2012, \$163.3 million at December 31, 2011 and \$168.0 million at June 30, 2011, of which \$123.0 million, \$132.3 million and \$140.0 million, respectively, were classified as other noncurrent liabilities. These amounts do not take into account any discounting of future expenditures or any consideration of insurance recoveries or advances in technology. These liabilities are reassessed periodically to determine if environmental circumstances have changed and/or remediation efforts and our estimate of related costs have changed. As a result of these reassessments, future charges to income may be made for additional liabilities.

Annual environmental-related cash outlays for site investigation and remediation, capital projects and normal plant operations are expected to range between approximately \$50 million to \$70 million over the next several years, \$20 million to \$40 million of which is for investigatory and remedial efforts, which are expected to be charged against reserves recorded on our condensed balance sheet. While we do not anticipate a material increase in the projected annual level of our environmental-related cash outlays, there is always the possibility that such an increase may occur in the future in view of the uncertainties associated with environmental exposures. Environmental exposures are difficult to assess for numerous reasons, including the identification of new sites, developments at sites resulting from investigatory studies, advances in technology, changes in environmental laws and regulations and their application, changes in regulatory authorities, the scarcity of reliable data pertaining to identified sites, the difficulty in assessing the involvement and financial capability of other PRPs, our ability to obtain contributions from other parties and the lengthy time periods over which site remediation occurs. It is possible that some of these matters (the outcomes of which are subject to various uncertainties) may be resolved unfavorably to us, which could materially adversely affect our financial position or results of operations.

#### Legal Matters and Contingencies

We, and our subsidiaries, are defendants in various legal actions (including proceedings based on alleged exposures to asbestos) incidental to our past and current business activities. As of June 30, 2012, December 31, 2011 and June 30, 2011, our condensed balance sheets included liabilities for these legal actions of \$19.6 million, \$16.4 million and \$17.0 million, respectively. These liabilities do not include costs associated with legal representation. Based on our analysis, and considering the inherent uncertainties associated with litigation, we do not believe that it is reasonably possible that these legal actions will materially adversely affect our financial position or results of operations in the near term.

During the ordinary course of our business, contingencies arise resulting from an existing condition, situation, or set of circumstances involving an uncertainty as to the realization of a possible gain contingency. In certain instances such as environmental projects, we are responsible for managing the cleanup and remediation of an environmental site. There exists the possibility of recovering a portion of these costs from other parties. We account for gain contingencies in accordance with the provisions of ASC 450, and therefore do not record gain contingencies and recognize income until it is earned and realizable.

#### Liquidity, Investment Activity and Other Financial Data

Cash Flow Data

Earn out payment – SunBelt	(15.3 )	—
Net financing activities	(59.0 )	(22.7 )

### Operating Activities

For the six months ended June 30, 2012, cash provided by operating activities increased by \$50.9 million from the six months ended June 30, 2011, primarily due to higher earnings and a smaller increase in working capital. For the six months ended June 30, 2012, working capital increased \$77.3 million compared to an increase of \$96.0 million in 2011. Receivables increased from December 31, 2011 by \$42.3 million as a result of higher sales in the second quarter of 2012 compared with fourth quarter of 2011. Inventories also increased from December 31, 2011 by \$21.0 million, primarily due to a normal seasonal increase in Winchester. Accounts payable and accrued liabilities decreased from December 31, 2011 by \$7.2 million. The 2012 cash from operations was also impacted by a \$5.4 million increase in cash tax payments.

### Investing Activities

Capital spending of \$145.8 million for the six months ended June 30, 2012 was \$82.4 million higher than the corresponding period in 2011. Capital spending for the six months ended June 30, 2012 included \$73.6 million for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, \$28.8 million for the construction of low salt, high strength bleach facilities at our McIntosh, AL; Henderson, NV; and Niagara Falls, NY chlor alkali sites and \$12.8 million for our ongoing relocation of our Winchester centerfire ammunition manufacturing operations.

For the total year 2012, we expect our capital spending to be in the \$240 million range, which includes spending for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, the low salt, high strength bleach facilities, the reconfiguration of our Augusta, GA facility to manufacture bleach and distribute caustic soda, and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations. We anticipate the startup of the converted Charleston, TN chlor alkali facility to be in the second half of 2012. We completed the first low salt, high strength bleach facility at McIntosh, AL in the first quarter of 2012 and expect the low salt, high strength bleach facility at Niagara Falls, NY to startup in the third quarter of 2012. We expect the remaining low salt, high strength bleach facility at Henderson, NV to be completed by the end of 2012. These three new facilities will increase total bleach manufacturing capacity by an additional 50% over the 2011 capacity. These low salt, high strength bleach facilities will manufacture bleach with approximately twice the concentration, which should significantly reduce transportation costs. We expect depreciation to be in the \$105 million to \$110 million range for 2012.

For the six months ended June 30, 2012 and 2011, we utilized \$26.3 million and \$4.2 million, respectively, of restricted cash that was required to be used to fund capital projects in Alabama, Mississippi and Tennessee.

For the six months ended June 30, 2012, we entered into sale/leaseback agreements for barges and chlorine railcars that we acquired in 2012. We received proceeds from the sale of \$3.5 million.

On February 28, 2011, we acquired the remaining 50% interest in SunBelt and paid cash of \$123.4 million, net of \$8.9 million of cash acquired.

#### Financing Activities

In June 2012, we redeemed industrial revenue bonds totaling \$7.7 million with a maturity date of 2017. We paid a

premium of \$0.2 million to the bond holders, which was included in interest expense. We also recognized a \$0.2 million deferred gain in interest expense related to the interest rate swap, which was terminated in March 2012, on these industrial revenue bonds.

For the six months ended June 30, 2012, we paid \$18.5 million for the earn out related to the 2011 SunBelt performance. The 2011 earn out payment included \$15.3 million that was recognized as part of the original purchase price. The \$15.3 million is included as a financing activity in the statement of cash flows.

We issued less than 0.1 million shares and 0.5 million shares representing stock options exercised for the six months ended June 30, 2012 and 2011, respectively, with a total value of \$0.5 million and \$9.3 million, respectively.

For the six months ended June 30, 2012, we purchased and retired 0.2 million shares with a total value of \$3.1 million under the share repurchase program approved by our board of directors on July 21, 2011.

The percent of total debt to total capitalization decreased to 33.5% at June 30, 2012 from 35.2% at December 31, 2011. The decrease was due to higher shareholders' equity primarily resulting from the net income for the six months ended June 30, 2012 and a lower level of long-term debt resulting from the redemption of the industrial revenue bonds.

In the first two quarters of 2012 and 2011, we paid a quarterly dividend of \$0.20 per share. Dividends paid for the six months ended June 30, 2012 and 2011 were \$32.0 million for both periods. On July 17, 2012, our board of directors declared a dividend of \$0.20 per share on our common stock, payable on September 10, 2012 to shareholders of record on August 10, 2012.

The payment of cash dividends is subject to the discretion of our board of directors and will be determined in light of then-current conditions, including our earnings, our operations, our financial condition, our capital requirements and other factors deemed relevant by our board of directors. In the future, our board of directors may change our dividend policy, including the frequency or amount of any dividend, in light of then-existing conditions.

#### Liquidity and Other Financing Arrangements

Our principal sources of liquidity are from cash and cash equivalents, restricted cash, cash flow from operations and borrowings under our senior revolving credit facility. Additionally, we believe that we have access to the debt and equity markets.

Cash flow from operations is variable as a result of both the seasonal and the cyclical nature of our operating results, which have been affected by seasonal and economic cycles in many of the industries we serve, such as vinyls, urethanes, bleach, ammunition and pulp and paper. The seasonality of the ammunition business, which is typically driven by the fall hunting season, and the seasonality of the vinyls and bleach businesses, which are stronger in periods of warmer weather, typically cause working capital to fluctuate between \$50 million to \$100 million over the course of the year. Cash flow from operations is affected by changes in ECU selling prices caused by changes in the supply/demand balance of chlorine and caustic soda, resulting in the chlor alkali business having significant leverage on our earnings and cash flow. For example, assuming all other costs remain constant and internal consumption remains approximately the same, a \$10 per ECU selling price change equates to an approximate \$18 million annual change in our revenues and pretax profit when we are operating at full capacity.

For the six months ended June 30, 2012, cash provided by operating activities increased by \$50.9 million from the six months ended June 30, 2011, primarily due to higher earnings and a smaller increase in working capital. For the six months ended June 30, 2012, working capital increased \$77.3 million compared to an increase of \$96.0 million in

2011. Receivables increased from December 31, 2011 by \$42.3 million as a result of higher sales in the second quarter of 2012 compared with fourth quarter of 2011. Inventories also increased from December 31, 2011 by \$21.0 million, primarily due to a normal seasonal increase in Winchester. Accounts payable and accrued liabilities decreased from December 31, 2011 by \$7.2 million. The 2012 cash from operations was also impacted by a \$5.4 million increase in cash tax payments.

Capital spending of \$145.8 million for the six months ended June 30, 2012 was \$82.4 million higher than the corresponding period in 2011. Capital spending for the six months ended June 30, 2012 included \$73.6 million for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, \$28.8 million for the construction of low salt, high strength bleach facilities at our McIntosh, AL; Henderson, NV; and Niagara Falls, NY chlor alkali sites and \$12.8 million for our ongoing relocation of our Winchester centerfire ammunition manufacturing operations.

For the total year 2012, we expect our capital spending to be in the \$240 million range, which includes spending for the conversion of our Charleston, TN facility from mercury cell technology to membrane technology, the low salt, high strength bleach facilities, the reconfiguration of our Augusta, GA facility to manufacture bleach and distribute caustic soda, and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations. We anticipate the startup of the converted Charleston, TN chlor alkali facility to be in the second half of 2012. We completed the first low salt, high strength bleach facility at McIntosh, AL in the first quarter of 2012 and expect the low salt, high strength bleach facility at Niagara Falls, NY to startup in the third quarter of 2012. We expect the remaining low salt, high strength bleach facility at Henderson, NV to be completed by the end of 2012. These three new facilities will increase total bleach manufacturing capacity by an additional 50% over the 2011 capacity. These low salt, high strength bleach facilities will manufacture bleach with approximately twice the concentration, which should significantly reduce transportation costs. We expect depreciation to be in the \$105 million to \$110 million range for 2012.

The overall use of cash of \$106.2 million for the six months ended June 30, 2012, primarily reflects the normal seasonal growth in working capital and capital spending for the conversion of our Charleston, TN facility, our low salt, high strength bleach facilities, and our ongoing relocation of our Winchester centerfire ammunition manufacturing operations. Based on the seasonality of our working capital, our June 30, 2012 unrestricted cash balance of \$198.6 million, the restricted cash balance of \$25.4 million and the availability of \$232.3 million of liquidity from our senior revolving credit facility, we believe we have sufficient liquidity to meet our short-term and long-term needs. Additionally, we believe that we have access to the debt and equity markets.

On July 21, 2011, our board of directors authorized a share repurchase program for up to 5 million shares of common stock that will terminate in three years for any remaining shares not yet repurchased. For the six months ended June 30, 2012, 0.2 million shares were purchased and retired under this program at a cost of \$3.1 million. As of June 30, 2012, we had purchased a total of 0.4 million shares under this program and 4.6 million shares remained authorized to be purchased. The repurchases will be effected from time to time on the open market, or in privately negotiated transactions.

Pursuant to a note purchase agreement dated December 22, 1997, SunBelt sold \$97.5 million of Guaranteed Senior Secured Notes due 2017, Series O, and \$97.5 million of Guaranteed Senior Secured Notes due 2017, Series G. The SunBelt Notes bear interest at a rate of 7.23% per annum, payable semi-annually in arrears on each June 22 and December 22. Beginning on December 22, 2002 and each year through 2017, SunBelt is required to repay \$12.2 million of the SunBelt Notes, of which \$6.1 million is attributable to the Series O Notes and of which \$6.1 million is attributable to the Series G Notes. In conjunction with the SunBelt acquisition, we consolidated the SunBelt Notes with a fair value of \$87.3 million for the remaining principal balance of \$85.3 million as of February 28, 2011. In December 2011, \$12.2 million was repaid on these SunBelt Notes.

In December 2010, we completed a financing of American Recovery and Reinvestment Act of 2009 (Recovery Zone) tax-exempt bonds totaling \$41.0 million due 2035. The bonds were issued by the Industrial Development Board of the County of Bradley and the City of Cleveland, TN (TN Authority) pursuant to a trust indenture between the TN Authority and U. S. Bank National Association, as trustee. The bonds were sold to PNC Bank, National Association (PNC Bank), as administrative agent for itself and a syndicate of participating banks, in a private placement under a Credit and Funding Agreement dated December 27, 2010, between us and PNC Bank. Proceeds of the bonds will be loaned by the TN Authority to us under a loan agreement, whereby we are obligated to make loan payments to the TN Authority sufficient to pay all debt service and expenses related to the bonds. Our obligations under the loan agreement and related note bear interest at a fluctuating rate based on LIBOR. The financial covenants in the credit agreement mirror those in our senior revolving credit facility. The bonds may be tendered to us (without premium) periodically beginning November 1, 2015. During December 2010, we drew \$41.0 million of the bonds. The proceeds from the bonds are required to be used to fund capital project spending for our Charleston, TN facility

mercury cell conversion. As of June 30, 2012, \$11.3 million of the proceeds remain with the trustee and are classified as a noncurrent asset on our condensed balance sheet as restricted cash, until such time as we request reimbursement of qualifying amounts used for the Charleston, TN facility mercury cell conversion.

In December 2010, we completed a financing of Recovery Zone tax-exempt bonds totaling \$42.0 million due 2033. The bonds were issued by the Mississippi Business Finance Corporation (MS Finance) pursuant to a trust indenture between MS Finance and U. S. Bank National Association, as trustee. The bonds were sold to PNC Bank as administrative agent for itself and a syndicate of participating banks, in a private placement under a Credit and Funding Agreement dated December 1, 2010, between us and PNC Bank. Proceeds of the bonds will be loaned by MS Finance to us under a loan agreement, whereby we are obligated to make loan payments to MS Finance sufficient to pay all debt service and expenses related to the bonds. Our obligations under the loan agreement and related note bear interest at a fluctuating rate based on LIBOR. The financial covenants in the credit agreement mirror those in our senior revolving credit facility. The bonds may be tendered to us (without premium) periodically beginning November 1, 2015. During December 2010, we drew \$42.0 million of the bonds. The

proceeds from the bonds are required to be used to fund capital project spending for our ongoing relocation of the Winchester centerfire ammunition manufacturing operations from East Alton, IL to Oxford, MS. As of June 30, 2012, \$14.1 million of the proceeds remain with the trustee and are classified as a noncurrent asset on our condensed balance sheet as restricted cash, until such time as we request reimbursement of qualifying amounts used for the Oxford, MS Winchester relocation.

In October 2010, we completed a financing of tax-exempt bonds totaling \$70 million due 2024. The bonds include \$50 million issued pursuant to the Gulf Opportunity Go Zone Act of 2005 (Go Zone) and \$20 million issued pursuant to the Recovery Zone Act. The bonds were issued by the Industrial Development Authority of Washington County, AL (AL Authority) pursuant to a trust indenture between the AL Authority and U. S. Bank National Association, as trustee. The bonds were sold to PNC Bank as administrative agent for itself and a syndicate of participating banks, in a private placement under a Credit and Funding Agreement dated October 14, 2010, between us and PNC Bank. Proceeds of the bonds will be loaned by the AL Authority to us under a loan agreement, whereby we are obligated to make loan payments to the AL Authority sufficient to pay all debt service and expenses related to the bonds. Our obligations under the loan agreement and related note bear interest at a fluctuating rate based on LIBOR. The financial covenants in the credit agreement mirror those in our senior revolving credit agreement. The bonds may be tendered to us (without premium) periodically beginning November 1, 2015. We had the option to borrow up to the entire \$70 million in a series of draw downs through December 31, 2011. We drew \$36.0 million of the bonds in 2011 and \$34.0 million in 2010. The proceeds from the bonds are required to be used to fund capital project spending at our McIntosh, AL facility. As of June 30, 2012, less than \$0.1 million of the drawn proceeds remain with the trustee and are classified as a noncurrent asset on our condensed balance sheet as restricted cash, until such time as we request reimbursement of qualifying amounts used for the capital project spending at our McIntosh, AL facility.

On April 27, 2012, we entered into a new \$265 million five-year senior revolving credit facility, which replaced the \$240 million senior revolving credit facility and a \$25 million letter of credit facility. The new senior revolving credit facility will expire in April, 2017. At June 30, 2012, we had \$232.3 million available under our \$265 million senior revolving credit facility, because we had issued \$32.7 million of letters of credit under a \$110 million subfacility. The new senior revolving credit facility also has a \$50 million Canadian subfacility. Under the senior revolving credit facility, we may select various floating rate borrowing options. The actual interest rate paid on borrowings under the senior revolving credit facility is based on a pricing grid which is dependent upon the leverage ratio as calculated under the terms of the facility for the prior fiscal quarter. The facility includes various customary restrictive covenants, including restrictions related to the ratio of debt to earnings before interest expense, taxes, depreciation and amortization (leverage ratio) and the ratio of earnings before interest expense, taxes, depreciation and amortization to interest expense (coverage ratio). Compliance with these covenants is determined quarterly based on the operating cash flows for the last four quarters. We were in compliance with all covenants and restrictions under all our outstanding credit agreements as of June 30, 2012 and 2011, and December 31, 2011, and no event of default had occurred that would permit the lenders under our outstanding credit agreements to accelerate the debt if not cured. In the future, our ability to generate sufficient operating cash flows, among other factors, will determine the amounts available to be borrowed under these facilities. As of June 30, 2012, there were no covenants or other restrictions that limited our ability to borrow.

At June 30, 2012, we had total letters of credit of \$35.7 million outstanding, of which \$32.7 million were issued under our \$265 million senior revolving credit facility. The letters of credit were used to support certain long-term debt and certain workers compensation insurance policies.

Our current debt structure is used to fund our business operations. As of June 30, 2012, we had long-term borrowings, including current installments, of \$527.5 million, of which \$155.9 million was issued at variable rates. Commitments from banks under our senior revolving credit facility are an additional source of liquidity.

In June 2012, we terminated \$73.1 million of interest rate swaps with Wells Fargo that had been entered into on the SunBelt Notes in May 2011. The result was a gain of \$2.2 million, which will be recognized through 2017. In March 2012, Citibank terminated \$7.7 million of interest rate swaps on our industrial revenue bonds due in 2017. The result was a gain of \$0.2 million, which would have been recognized through 2017. In June 2012, the industrial revenue bonds were redeemed by us, and as a result, the remaining \$0.2 million deferred gain was recognized in interest expense during the three months ended June 30, 2012.

In March 2010, we entered into interest rate swaps on \$125 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, pays us fixed rates. The counterparty to these agreements is Citibank. In October 2011, we entered into \$125 million of interest rate swaps with equal and opposite terms as the \$125 million variable interest rate swaps on the 2016 Notes. We have agreed to pay a fixed rate to a counterparty who, in turn, pays us variable rates. The counterparty to this agreement is also Citibank. The result was a gain of \$11.0 million on the \$125 million variable interest rate swaps, which will be recognized through 2016. As of June 30, 2012, \$9.4 million of this

gain was included in long-term debt. In October 2011, we de-designated our \$125 million interest rate swaps that had previously been designated as fair value hedges. The \$125 million variable interest rate swaps and the \$125 million fixed interest rate swaps do not meet the criteria for hedge accounting. All changes in the fair value of these interest rate swaps are recorded currently in earnings.

In 2001 and 2002, we entered into interest rate swaps on \$75 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, paid us fixed rates. The counterparty to these agreements was Citibank. In January 2009, we entered into a \$75 million fixed interest rate swap with equal and opposite terms as the \$75 million variable interest rate swaps on the 2011 Notes. We agreed to pay a fixed rate to a counterparty who, in turn, paid us variable rates. The counterparty to this agreement was Bank of America. The result was a gain of \$7.9 million on the \$75 million variable interest rate swaps, which was recognized through 2011. In January 2009, we de-designated our \$75 million interest rate swaps that had previously been designated as fair value hedges. The \$75 million variable interest rate swaps and the \$75 million fixed interest rate swap did not meet the criteria for hedge accounting. All changes in the fair value of these interest rate swaps were recorded currently in earnings.

#### Off-Balance Sheet Arrangements

In conjunction with the St. Gabriel, LA conversion and expansion project, which was completed in the fourth quarter of 2009, we entered into a twenty-year brine and pipeline supply agreement with PetroLogistics Olefins, LLC (PetroLogistics). PetroLogistics installed, owns and operates, at its own expense, a pipeline supplying brine to the St. Gabriel, LA facility. Beginning November 2009, we are obligated to make a fixed annual payment over the life of the contract of \$2.0 million for use of the pipeline, regardless of the amount of brine purchased. We also have a minimum usage requirement for brine of \$8.4 million over the first five-year period of the contract. After the first five-year period, the contract contains a buyout provision exercisable by us for \$12.0 million.

We guarantee debt and other obligations under agreements with our affiliated companies. In the normal course of business, we guarantee the principal and interest under a \$0.3 million line of credit of one of our wholly-owned foreign affiliates. At June 30, 2012, December 31, 2011 and June 30, 2011, our wholly-owned foreign affiliate had no borrowings outstanding under this line of credit, which would be utilized for working capital purposes.

#### New Accounting Standards

In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-08 "Testing Goodwill for Impairment" (ASU 2011-08), which amends ASC 350 "Intangibles – Goodwill and Other." This update permits entities to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the two-step impairment test for that reporting unit. We adopted the provisions of ASU 2011-08 on January 1, 2012. This update did not have a material effect on our consolidated financial statements.

During 2011, the FASB issued ASU 2011-05 "Presentation of Comprehensive Income" (ASU 2011-05) and ASU 2011-12 "Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05" (ASU 2011-12). These updates require entities to present items of net income and other comprehensive income either in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive, statements of net income and other comprehensive income. We adopted the provisions of ASU 2011-05 and ASU 2011-12 on January 1, 2012. These updates required modification of our consolidated financial statements presentation. This update did

not have a material effect on our consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04 “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and IFRSs”, (ASU 2011-04), which amends ASC 820. This update clarifies the existing guidance and amends the wording used to describe many of the requirements in US GAAP for measuring fair value and for disclosing information about fair value measurements. This update became effective for us on January 1, 2012. This update did not have a material effect on our consolidated financial statements.

In December 2010, the FASB issued ASU 2010-29 “Disclosure of Supplementary Pro Forma Information for Business Combinations” (ASU 2010-29), which amends ASC 805 “Business Combinations” (ASC 805). This update clarified that an entity is required to disclose pro forma revenue and earnings as though the business combination that occurred during the current period had occurred as of the beginning of the comparable prior annual reporting period only. In addition, this standard

expands the supplemental pro forma disclosures to include a description of the nature and amount of material nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. We adopted the provisions of ASU 2010-29 on January 1, 2011. The adoption of this update required additional disclosures for our acquisition of the remaining 50% equity interest in SunBelt. This update did not have a material effect on our consolidated financial statements.

### Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are exposed to market risk in the normal course of our business operations due to our purchases of certain commodities, our ongoing investing and financing activities and our operations that use foreign currencies. The risk of loss can be assessed from the perspective of adverse changes in fair values, cash flows and future earnings. We have established policies and procedures governing our management of market risks and the use of financial instruments to manage exposure to such risks.

Energy costs, including electricity used in our Chlor Alkali Products segment, and certain raw materials and energy costs, namely copper, lead, zinc, electricity and natural gas used in our Winchester segment, are subject to price volatility. Depending on market conditions, we may enter into futures contracts and put and call option contracts in order to reduce the impact of commodity price fluctuations. As of June 30, 2012, we maintained open positions on futures contracts totaling \$120.1 million (\$105.6 million at December 31, 2011 and \$92.5 million at June 30, 2011). Assuming a hypothetical 10% increase in commodity prices which are currently hedged, as of June 30, 2012, we would experience a \$12.0 million (\$10.6 million at December 31, 2011 and \$9.3 million at June 30, 2011) increase in our cost of inventory purchased, which would be substantially offset by a corresponding increase in the value of related hedging instruments.

We are exposed to changes in interest rates primarily as a result of our investing and financing activities. The effect of interest rates on our investing activity is not material to our consolidated financial position, results of operations, or cash flows. Our current debt structure is used to fund business operations, and commitments from banks under our senior revolving credit facility are a source of liquidity. As of June 30, 2012, December 31, 2011 and June 30, 2011, we had long-term borrowings of \$527.5 million, \$536.4 million and \$582.8 million, respectively, of which \$155.9 million at June 30, 2012, and December 31, 2011 and \$119.9 million at June 30, 2011 were issued at variable rates.

In June 2012, we terminated \$73.1 million of interest rate swaps with Wells Fargo that had been entered into on the SunBelt Notes in May 2011. The result was a gain of \$2.2 million, which will be recognized through 2017. We had entered into the interest rate swaps, whereby we agreed to pay variable rates to Wells Fargo who, in turn, paid us fixed rates.

In March 2012, Citibank terminated \$7.7 million of interest rate swaps on our industrial revenue bonds due in 2017. The result was a gain of \$0.2 million, which would have been recognized through 2017. In June 2012, the industrial revenue bonds were redeemed by us, and as a result, the remaining \$0.2 million deferred gain was recognized in interest expense during the three months ended June 30, 2012.

In March 2010, we entered into interest rate swaps on \$125 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, pays us fixed rates. The counterparty to these agreements is Citibank. In October 2011, we entered into \$125 million of interest rate swaps with equal and opposite terms as the \$125 million variable interest rate swaps on the 2016 Notes. We have agreed to pay a fixed rate to a counterparty who, in turn, pays us variable rates. The counterparty to this agreement is also Citibank. The result was a gain of \$11.0 million on the \$125 million variable interest rate swaps, which will be recognized through 2016. As of June 30, 2012, \$9.4 million of this gain was included in long-term debt. In October 2011, we de-designated our \$125 million interest rate swaps that had previously been designated as fair value hedges. The \$125 million variable

interest rate swaps and the \$125 million fixed interest rate swaps do not meet the criteria for hedge accounting. All changes in the fair value of these interest rate swaps are recorded currently in earnings.

In 2001 and 2002, we entered into interest rate swaps on \$75 million of our underlying fixed-rate debt obligations, whereby we agreed to pay variable rates to a counterparty who, in turn, paid us fixed rates. The counterparty to these agreements was Citibank. In January 2009, we entered into a \$75 million fixed interest rate swap with equal and opposite terms as the \$75 million variable interest rate swaps on the 2011 Notes. We agreed to pay a fixed rate to a counterparty who, in turn, paid us variable rates. The counterparty to this agreement was Bank of America. The result was a gain of \$7.9 million on the \$75 million variable interest rate swaps, which was recognized through 2011.

The following table reflects the swap activity related to certain debt obligations:

Underlying Debt Instrument	Swap Amount (\$ in millions)	Date of Swap	June 30, 2012 Olin Pays Floating Rate:	
6.75%, due 2016	\$65.0	March 2010	3.5-4.5%	(a)
6.75%, due 2016	\$60.0	March 2010	3.5-4.5%	(a)
			Olin Receives Floating Rate:	
6.75%, due 2016	\$65.0	October 2011	3.5-4.5%	(a)
6.75%, due 2016	\$60.0	October 2011	3.5-4.5%	(a)

(a) Actual rate is set in arrears. We project the rate will be within the range shown.

Our interest rate swaps reduced interest expense by \$1.9 million and \$4.1 million for the six months ended June 30, 2012 and 2011, respectively.

If the actual change in interest rates or commodities pricing is substantially different than expected, the net impact of interest rate risk or commodity risk on our cash flow may be materially different than that disclosed above.

We do not enter into any derivative financial instruments for speculative purposes.

#### Item 4. Controls and Procedures.

Our chief executive officer and our chief financial officer evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2012. Based on that evaluation, our chief executive officer and chief financial officer have concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information Olin is required to disclose in the reports that it files or submits with the SEC under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms, and to ensure that information we are required to disclose in such reports is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

There have been no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

### Cautionary Statement Regarding Forward-Looking Statements

This quarterly report on Form 10-Q includes forward-looking statements. These statements relate to analyses and other information that are based on management's beliefs, certain assumptions made by management, forecasts of future results, and current expectations, estimates and projections about the markets and economy in which we and our various segments operate. The statements contained in this quarterly report on Form 10-Q that are not statements of historical fact may include forward-looking statements that involve a number of risks and uncertainties.

We have used the words "anticipate," "intend," "may," "expect," "believe," "should," "plan," "estimate," "project," "forecast," variations of such words and similar expressions in this quarterly report to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict and many of which are beyond our control.

Therefore, actual outcomes and results may differ materially from those matters expressed or implied in such forward looking-statements. We undertake no obligation to update publicly any forward-looking statements, whether as a result of future events, new information or otherwise.

The risks, uncertainties and assumptions involved in our forward-looking statements many of which are discussed in more detail in our filings with the SEC, including our Annual Report on Form 10-K for the year ended December 31, 2011, include, but are not limited to the following:

- sensitivity to economic, business and market conditions in the United States and overseas, including economic instability or a downturn in the sectors served by us, such as ammunition, housing, vinyls and pulp and paper, and the migration by United States customers to low-cost foreign locations;

- the cyclical nature of our operating results, particularly declines in average selling prices in the chlor alkali industry and the supply/demand balance for our products, including the impact of excess industry capacity or an imbalance in demand for our chlor alkali products;

- economic and industry downturns that result in diminished product demand and excess manufacturing capacity in any of our segments and that, in many cases, result in lower selling prices and profits;

- costs and other expenditures in excess of those projected for environmental investigation and remediation or other legal proceedings;

- unexpected litigation outcomes;

- new regulations or public policy changes regarding the transportation of hazardous chemicals and the security of chemical manufacturing facilities;

- changes in legislation or government regulations or policies;

- adverse conditions in the credit and capital markets, limiting or preventing our ability to borrow or raise capital;

- the occurrence of unexpected manufacturing interruptions and outages, including those occurring as a result of labor disruptions and production hazards;

- the failure or an interruption of our information technology systems;

• higher-than-expected raw material and energy, transportation and/or logistics costs;

• weak industry conditions could affect our ability to comply with the financial maintenance covenants in our senior revolving credit facility and certain tax-exempt bonds;

• the effects of any declines in global equity markets on asset values and any declines in interest rates used to value the liabilities in our pension plan; and

• an increase in our indebtedness or higher-than-expected interest rates, affecting our ability to generate sufficient cash flow for debt service.

You should consider all of our forward-looking statements in light of these factors. In addition, other risks and uncertainties not presently known to us or that we consider immaterial could affect the accuracy of our forward-looking statements.
