BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 31 MARCH 2006

BHP Billiton today released its production report for the quarter ended 31 March 2006. Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share.

- Record year to date production of nickel, copper, natural gas and aluminium was achieved, up 122%, 25%, 6% and 1% respectively.
- Record year to date production was achieved at Hillside (South Africa), Escondida (Chile) and Cerrejon Coal (Colombia).
- Quarterly production records were achieved at Cerrejon Coal, and for oil at Angostura (Trinidad & Tobago) and gas at Zamzama (Pakistan).
- Petroleum, iron ore and nickel operations based in Western Australia were disrupted by cyclone activity and continuing wet weather. Ingwe (South Africa) was also impacted by higher than average rainfall.

| | MAR | MAR | MAR YTD | MAR Q06 | MAR Q06 |
|--|--------|--------|---------|---------|---------|
| 2006 | 2006 | vs | vs | vs | |
| PETROLEUM | YTD | QTR | MAR YTD | MAR Q05 | DEC Q05 |
| Crude Oil & Condensate ('000 bbl) | 34,320 | 10,886 | -7% | -12% | -3% |
| Natural Gas (bcf) | 261.85 | 77.85 | 6% | -5% | -10% |
| Total Petroleum Products (million boe) | 85.32 | 26.01 | -1% | -9% | -7% |

Total Petroleum Products

- Total production for the year to date March 2006 of 85.3 million barrels of oil equivalent was in line with the nine months to March 2005.

March 2006 quarterly production was lower than the comparative periods primarily as a result of lost production from the Typhoon/Boris facility (USA) due to hurricane damage sustained in the September 2005 quarter, natural field decline and lower gas demand at Bass Strait (Australia), well and weather related downtime in North West Shelf and Griffin (both Australia) and the sale of our interest in Laminaria (Australia) in January 2005. This was partly offset by increased production from Angostura (Trinidad & Tobago) and Mad Dog (USA), all commissioned in January 2005, and ROD (Algeria), commissioned in October 2004.

Crude Oil and Condensate - March 2006 year to date and quarterly production was lower than the March 2005 comparative periods. Lost production from the Typhoon/Boris facility, well and weather related downtime at North West Shelf and Griffin, natural field decline at Bass Strait, and the sale of Laminaria all had a negative impact on production. This was partially offset by ramp up of production at ROD, Mad Dog and Angostura.

Natural Gas

- Record production for the nine months to March 2006 was primarily due to the commissioning of Minerva in January 2005.

March 2006 quarterly production was lower than the March 2005 quarter reflecting lower demand for Bass Strait and Minerva gas and lost production from the Typhoon/Boris facility.

Production for the March 2006 quarter was lower than the December 2005 quarter as a result of weather related downtime at North West Shelf and equipment downtime at Liverpool Bay (UK), in addition to lower demand for Bass Strait and Minerva gas.

-1%

Alumina

- Production on a year to date basis was in line with the comparative period. March 2006 quarterly production increased compared to the December 2005 quarter primarily as a result of Worsley recovering from gas supply curtailments in the previous quarter.

Aluminium

- Production for the nine months and quarter ended March 2006 was in line with all comparative periods.

Copper

- Production for the nine months ended March 2006 was a record 956,400 tonnes, 25% higher than the March 2005 comparative period, reflecting year to date record performance at Escondida (Chile) and inclusion of a full nine months of production from Olympic Dam (Australia).

March 2006 quarterly production was marginally lower than the December 2005 quarter as a result of lower head grade and throughput at Olympic Dam and Escondida, partially offset by Cerro Colorado (Chile) operating at full capacity for the quarter having fully recovered from the earthquake in June 2005.

Silver

- Production was lower on a year to date basis primarily as a result of lower head grade of ore mined at Cannington (Australia) in the nine months to March 2006. March 2006 quarterly production was lower than the previous period as a result of lower head grade and increased planned maintenance activity at Cannington during the period.

Lead

- Year to date production to March 2006 decreased against all comparative periods as a result of lower head grade and increased planned maintenance activity at Cannington during the March 2006 quarter.

Zinc

- Production increased against the March 2005 year to date and December 2005 comparative periods due to higher grade at Cannington. This was partially offset by a lower proportion of zinc contained ore processed at Antamina over recent quarters resulting in a decline against the March 2005 quarter.

Uranium Oxide Concentrate

- Production in the March 2006 quarter was lower than the December 2005 quarter as a result of lower grade and throughput at Olympic Dam.

Iron Ore

- March 2006 year to date production was in line with the comparative period.

Production decreased in the March 2006 quarter versus the March 2005 and December 2005 quarters following disruptions at Western Australian Iron Ore operations (Australia) due to cyclone activity, higher than usual rainfall in the Pilbara and maintenance work at Area C.

Metallurgical Coal

- March 2006 year to date and quarterly production was lower than the March 2005 comparatives. This primarily reflects reduced production at Queensland Coal (Australia) due to the depletion of reserves at Riverside and longer than scheduled dragline outages at South Walker Creek and Saraji. This was partially offset by increased production at Goonyella and the continued ramp up of Dendrobium and Broadmeadow (all Australia), commissioned in April 2005 and August 2005 respectively.

Production for the March 2006 quarter was lower than the December 2005 quarter as a result of reduced production at Queensland Coal due to unplanned downtime at Broadmeadow, an extended longwall change at the Crinum mine and scheduled downtime at Norwich Park.

Shiploader 1 at Hay Point Coal Terminal became fully operational on 13 April following a fifteen week shutdown for repairs.

Manganese ore

- Production for the March 2006 year to date and quarter was lower than all comparative periods as a result of lower market demand.

Manganese alloys

- March 2006 year to date and quarterly production decreased compared to the March 2005 comparative periods primarily reflecting lower market demand.

March 2006 quarterly production was higher than the December 2005 quarter as full operational stability was restored following scheduled maintenance at Metalloys (South Africa) in the September 2005 quarter.

Diamonds

- Carat production decreased in the nine months to March 2006 reflecting the processing of lower grade ore at Ekati (Canada).

March 2006 quarterly production was lower than the December 2005 quarter due to the impact of planned changes to the mix of ore sources being processed.

Fertiliser

- March 2006 quarterly production was lower than the December 2005 quarter as a result of unplanned maintenance.

Nickel

- Record production for the year to date March 2006 primarily reflects inclusion of a full nine months of production from Nickel West (Australia).

Production for the March 2006 quarter was lower than the December 2005 quarter due to disruption of the Nickel West operations primarily as a result of cyclone activity and continued wet weather. This was partly offset by increased production at Yabulu (Australia) due to fewer expansion related activities.
