Item 2.02 Results of Operations and Financial Condition.

On November 10, 2006, Crimson Exploration Inc. issued a press release announcing financial results for the quarter ended September 30, 2006 and recent operational activity. The Company also announced that management will hold a conference call to discuss the information in the press release on Tuesday, November 14, 2006 at 9:30 a.m. CST. The press release is included in this report as Exhibit 99.1.

The information contained in Exhibit 99.1 is incorporated herein by reference. The information in this Current Report is being furnished and shall not be deemed filed for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that Section. The information in this Current Report shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended.

Item 9.01 Financial Statements and Exhibits.

Exhibit 99.1

Crimson Exploration Inc. Announces Third Quarter 2006 Financial and Operational Results

Houston, TX (BUSINESS WIRE) November 10, 2006 - Crimson Exploration Inc. (OTCBB: CXPO - News) today announced financial and operational results for the third quarter of 2006.

Summary Financial Results

Revenues for the third quarter of 2006 were \$5.6 million compared to revenue of \$4.7 million in the prior year quarter, an approximate 20% increase due to higher average realized prices and slightly higher production volumes, both of which are quantified below.

Production for the third quarter of 2006 was 694,793 mcf of natural gas equivalents, or 7,552 mcf per day, compared with production of 667,094 mcf, or 7,251 per mcf day, in the 2005 quarter. Exclusive of the impact of Hurricane Rita related shut-ins of our Cameron Parish LA fields for the last nine days of September 2005, production was substantially flat quarter over quarter. New production from two wells drilled earlier in the year in Colorado, and increased production from recompletions in our Grand Lake field in Cameron Parish, have more than offset normal field decline, resulting in us increasing our average daily production to a current range of between 8,000 to 9,000 mcf per day.

Average prices received in the field during the third quarter of 2006 were \$67.83 per barrel of oil and \$6.67 per mcf of natural gas, or \$8.49 per mcf of natural gas equivalent, compared to \$59.47 per barrel of oil, \$8.81 per mcf and \$9.27 per mcf for the 2005 quarter. Adjusting for the effects of realized losses on our commodity price hedges, our average realized prices in the 2006 quarter were \$61.01, \$6.72 and \$8.07 for oil, natural gas and natural gas equivalents, respectively. For 2005, average realized prices for the quarter were \$38.58, \$7.46 and \$7.03 per barrel, mcf and mcf, respectively. Realized prices in 2005 were more negatively impacted by older, less advantageous hedge contracts that expired in the fourth quarter of 2005.

Total Operating Expenses for the 2006 quarter were approximately \$5.7 million compared to \$3.4 million in the 2005 quarter. Of the \$2.3 million increase in total operating expenses, lease operating expenses contributed approximately \$750,000 due to higher workover costs on production-enhancing activity and higher prices for supplies and services prevalent in the industry. General and administrative costs increased by approximately \$1.2 million, approximately \$1.0 million of which is related to non-cash compensation expense related to the adoption of SFAS 123R for employee stock options. Exploration expense was approximately \$200,000 in the 2006 quarter, compared to no expense in 2005, as we paid delay rentals on our Culberson County leases.

Other Income and Expense was a net positive \$4.3 million for the 2006 quarter compared to a net charge of approximately \$3.4 million in 2005, with the main difference being a \$4.3 million non-cash unrealized gain in the 2006 quarter related to recognizing the mark-to-market value of our derivative instruments at quarter end, compared to a \$3.3 million unrealized loss in the 2005 quarter for the derivative instruments in place at that time.

Cash flow from operations for the third quarter of 2006, exclusive of changes in working capital, was \$2.1 million, a 9% decrease from the \$2.3 million reported for the 2005 quarter. We reported net income for the third quarter of 2006 of \$2.6 million compared to a net loss of \$1.3 million for the third quarter of 2005, an increase related primarily to the net after-tax effects of the change in the mark-to-market value of our hedges.

Non GAAP Financial Measures

Crimson also presents net cash flow from operations, exclusive of working capital items, which consists of net cash provided by operating activities plus the period change in accounts receivable, other current assets, accounts payable and accrued expenses. Management uses this measure to assess the company's ability to generate cash to fund exploration and development activities. Management interprets trends in this measure in a similar manner as trends in cash flow and liquidity. Net cash flows from operations, exclusive of working capital items should not be considered as an alternative to net cash provided by operational activities as defined by GAAP. The following is a reconciliation of net cash provided by operational activities to net cash flow from operations, exclusive of working capital items:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Net cash provided by (used in) operating activities	\$ 3,065,767	\$ 2,480,269	\$ 8,697,397	\$ 1,949,882
Changes in working capital				
Accounts receivable	784,731	714,448	111,881	1,725,094
Prepaid Expenses	(57,250)	104,883	70,904	197,095
Accounts payable and accrued expenses	(1,690,168)	(1,021,218)	(2,062,512)	957,979
Net cash flow from operations, exclusive of working capital items	\$ 2,103,080	\$ 2,278,382	\$ 6,817,670	\$ 4,830,050

Operational Review by Area

Madisonville Area

Shortly after the end of the third quarter of 2006, we finalized the drilling of the Johnston #2 well in the Rodessa formation in this field. As previously reported, we moved off of that well and began drilling the Fuhlberg #2 well less than a mile to the southeast of the Johnston well, again targeting the Rodessa. We are currently drilling at approximately 9,500 feet on the Fuhlberg and are drilling the disposal well as of the date of this release. We expect to be at targeted depth of 12,500 feet on the Fuhlberg within the next 30 days. Expansion of the processing plant through which our gas is expected to be flowed continues on schedule and is expected to be operational sometime in the first quarter of 2007. We anticipate that our wells will be ready to commence production about the same time that the plant expansion is complete.

D-J Basin, CO

Production from the two wells we drilled earlier in the year has stabilized at approximately 300 mcf per day, net to our interest. We have retained a Denver based consulting firm that continues to analyze our entire holdings in the D-J Basin to identify additional potential drilling opportunities. We own approximately 18,000 gross (14,000 net) undeveloped acres in the D-J basin. Further drilling in this area during 2006 and 2007 will be based on the results of this study and contingent upon rig availability.

Cameron Parish LA

During the third quarter of 2006, we finalized recompletions on the #30 and #17 wells that have added approximately 1,700 mcf to our net daily production from the Grand Lake Field (WI 100%). These increases allowed us to offset normal production decline and restore production levels to pre-hurricane rates.

At our Lacassine Field (WI 100%), production rates had been limited by salt water disposal capacity resulting from the shut-in from the hurricanes last fall. During the quarter we converted the Lacassine Co. B-11 well to an additional salt water disposal well and performed remedial work on one of the shut-in wells in order to restore it to production.

South Texas

During the third quarter we also recompleted the Weinheimer #1 well in our Alwan field that added approximately 325 mcf per day, net, to our production.

Mississippi Coal Bed Methane

During the third quarter we resolved surface rights disputes on our option acreage and finalized plans to drill 3 stratigraphic core wells to evaluate the feasibility of developing and producing coal bed methane from Wilcox coals between 900 feet and 3200 feet in southeast Mississippi, where we have 125,000 acres under option. Existing well control in the area shows the existence of coal beds but have limited quantitative and qualitative data to determine their producibility. The actual drilling of those wells should still be completed by yearend. The Company anticipates spending approximately \$400,000 on this feasibility study. Crimson will pay 85% of the cost of the core wells to earn an 85% WI in the project.

Teleconference Call

Crimson management will hold a conference call to discuss the information described in this press release at 9:30 a.m. CST on Tuesday, November 14, 2006. Those interested in participating may do so by calling the following phone number: (866) 558-6338, (International (213) 785-2437) and entering the participant code 7963024. A replay of the call will be available from November 14, 2006 through November 21, 2006 by dialing toll free (888) 203-1112, (International (719) 457-0820) and asking for replay ID code 7963024.

This press release includes forward-looking statements as defined by the Securities and Exchange Commission (SEC). Such statements include those concerning Crimson s strategic plans, expectations and objectives for future operations. All statements included in this press release that address activities, events or developments that Crimson expects, believes or anticipates will or may occur in the future are forward-looking statements. These statements are based on certain assumptions Crimson made based on its experience and perception of historical trends, current conditions, expected future developments and other factors it believes are appropriate under the circumstances. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond Crimson s control. Statements regarding future production are subject to all of the risks and uncertainties normally incident to the exploration for and development and production of oil and gas. These risks include, but are not limited to, inflation or lack of availability of goods and services, environmental risks, drilling risks and regulatory changes and the potential lack of capital resources. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. Please refer to our filings with the SEC, including our Form 10-K for the year ended December 31, 2005 for a further discussion of these risks.
