PROSPECTUS

GRAND TOYS INTERNATIONAL, INC.

5,135,798 Shares of Common Stock

—

The selling stockholders, listed on pages 11-12, may offer from time to time up to 5,135,798 shares of our common stock under this prospectus. No underwriter is being used in connection with this offering of common stock. The selling stockholders may offer and sell their shares to or through broker-dealers, who may receive compensation in the form of discounts, concessions or commissions from the selling stockholders, the purchasers of the shares of our common stock, or both. We will not receive any of the proceeds from the sale of shares of our common stock, although we may receive up to \$1,349,902.81 if all of the options and warrants owned by the selling stockholders are exercised.

The price of the common stock being offered under this prospectus will most likely be the market price of our common stock. Our common stock is traded on the Nasdaq SmallCap Market under the symbol "GRIN". On July 11, 2003, the closing price of one share of our common stock was \$ 3.26.

## RISK FACTORS

Investing in our common stock is very risky. You should carefully consider the following factors and other information in this prospectus before deciding to invest in our shares. If you are not in a financial position to bear a complete loss of your investment, you should not purchase any of the shares.

*Portions of this prospectus and information incorporated into this prospectus contain certain "forward-looking" statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in the forward-looking statements. Although we believe that the assumptions underlying the forward-looking statements contained in this prospectus are reasonable, any of the assumptions could prove inaccurate and cause such forward-looking statements to be inaccurate.*

**• Doubts about our ability to continue as a going concern could have a material adverse effect on our stock price and the liquidity of our shares**

In our audited financial statements for the year ended December 31, 2002, we recognized that we had certain issues which raised substantial doubt about our ability to continue as a going concern. The reasons cited were our recurring losses and the insufficiency of our line of credit to fund our operations. This was noted in KPMG's audit report on those financial statements. Since mid 2002, we have implemented a plan to stem our losses and return to profitability and have secured an increase in our line of credit. Based on 2003 forecasts, the current line of credit appears sufficient to meet our working capital needs. For the first quarter ended March 31, 2003, the Company did not include a going concern note as a result of the Company reporting earnings for the quarter coupled with the belief that the current credit facility would be sufficient to meet corporate needs. As a consequence we do not know if KPMG will again make reference to this issue in their audit opinion on our financial statements for the year ended December 31, 2003. If doubts about our ability to continue as a going concern persist, it may have an adverse impact on investors' willingness to invest in our stock which would negatively impact the price and liquidity of our shares.

**• We have a recent history of losses and we do not know when or if we will return to profitability**

We incurred net losses of \$826,848 for the year ended December 31, 2002, \$1,371,492 for the year ended December 31, 2001, and \$10,156,713 for the year ended December 31, 2000. We have not reported an annual profit since the year ended December 31, 1997. We have recently begun to implement a plan to return to profitability. Over the course of 2002 and 2001 we have focused on products with higher profit margins and have reduced expenses. This has resulted in improved performance and, even though we reported net earnings of \$453,082 for the quarter ended March 31, 2003, we still do not expect to achieve profitability for the year ending December 31, 2003. Moreover, we cannot be sure that our efforts will result in our return to profitability on an annual basis in the future.

**• If we do not secure additional financing, we will not be able to execute our new plan to return to profitability**

During 2001, we secured a new line of credit to finance our inventory and accounts receivable and we also realized net proceeds from the sale of our common stock and warrants. During 2002, our total line of credit was increased. These sources of financing, however, are not sufficient to fully implement our business plan. To the extent that we will be required to fund operating losses, our financial position will deteriorate. There can be no assurance that we will be able to find significant additional financing at all or on terms favorable to us. If equity securities are issued in connection with a financing, dilution to our stockholders will likely result, and if additional funds are raised through the incurrence of debt, we may be subject to restrictions on our operations and finances. Furthermore, if we do incur additional debt, we may be limiting our ability to repurchase capital stock, engage in mergers, consolidations, acquisitions and asset sales, or alter our lines of business or accounting methods, even though these actions would otherwise benefit our business.

**• An inability to obtain additional financing could adversely impact our ability to expand into the U.S. market**

We believe that in order to achieve our long-term expansion objectives and to enhance our competitive position in the U.S. market, we will need additional financial resources over the next several years. The precise amount and timing of our future financing needs cannot be determined at this time and will depend upon a number of factors, including the demand for our products and the management of our working capital. We may not be able to obtain additional financing on acceptable terms, or at all. If we are unable to obtain sufficient capital, we could be required to curtail our expansion plans.

**• Our shares may not continue to be listed on the Nasdaq Small Cap Stock Market which could adversely affect the price and liquidity of our stock and our ability to obtain financing in the future**

During 2001, we were advised by Nasdaq that it intended to delist our shares from trading on the Nasdaq SmallCap Stock Market because we failed to meet the standards for continued listing on the Nasdaq Small Cap. Among the reasons cited were the fact our stock price was below the minimum standard of \$1.00 per share, our net tangible assets were below the minimum standard of \$2,000,000 and the market value of our public float was also below the minimum required standard. We appealed and were successful in implementing a plan to regain compliance with the

standards for continued listing. On November 26, 2002, the Nasdaq panel advised us that the temporary exception under which our shares had continued to be listed had become permanent since we had complied with the Nasdaq requirements for continued listing. There can be no assurance that we will be able to meet the requirements for continued listing or that we could successfully appeal another delisting determination. If our shares were delisted, we might be able to have our shares listed for quotation on the OTC Bulletin Board. However, the failure to have our shares quoted on the Nasdaq SmallCap market would likely have an adverse impact on the price and liquidity of our shares and our ability to obtain financing in the future.

• **Our management exercises substantial control over our business.**

As of February 28, 2003, our directors and executive officers beneficially owned, in the aggregate, 1,942,999 shares of our common stock, representing approximately 59% of the common stock outstanding. Accordingly, if these persons act together, they exercise absolute control over matters requiring approval of our stockholders, including the election of our board of directors.

• **We may not be able to retain the key personnel we need to succeed**

Our success is dependent on the expertise, experience and continued services of our senior management employees. Most decisions concerning our business are made or significantly influenced by them. We do not maintain "key man" insurance on the life of any of these persons. In the event of the loss of any of our senior management employees, no assurances can be given that we will be able to obtain the services of an adequate replacement.

• **The issuance of shares of common stock upon the exercise of options and warrants will cause dilution to our current stockholders and the prevailing market price for our common stock may be materially and adversely affected by the addition of a substantial number of shares**

We are authorized to issue 12,500,000 shares of common stock, of which 2,762,698 shares are outstanding. In addition:

- ◆ 156,559 shares are issuable upon the exercise of currently outstanding options granted under our Amended and Restated 1993 Stock Option Plan the sale of which have been registered on either a registration statement on Form S-8 or on this prospectus;
- ◆ 157,500 shares are issuable upon the exercise of options granted outside our 1993 Stock Option Plan; and
- ◆ 3,157,144 shares are issuable upon the exercise of currently outstanding warrants.

If and when we issue these shares, the percentage of common stock owned by each stockholder would be diluted. Moreover, the prevailing market price for the common stock may be materially and adversely affected by the addition of a substantial number of shares, including the shares offered by this prospectus, into the market.

**1. A few customers account for a large portion of our net sales and a substantial reduction in or termination of orders from our large customers could adversely affect our business, financial condition and results of operations**

Our four largest customers accounted for approximately 65% of our net sales in 2002. Except for outstanding purchase orders for specific products, we do not have written contracts with or commitments from any of our customers. A substantial reduction in or termination of orders from any of our largest customers could adversely affect our business, financial condition and results of operations. In addition, pressure by large customers seeking a reduction in prices, financial incentives, a change in other terms of sale or on us to bear the risks and the cost of carrying inventory could also adversely affect our business, financial condition and results of operations.

**2. A limited number of our product lines account for a substantial portion of our net sales which may adversely affect our business, financial condition and results of operations**

We derive a substantial portion of our net sales from a limited number of product lines. Sales of our Toy Biz product line represented approximately 67% of our net sales in 2002. As of December 31, 2001, our written distribution agreement with Toy Biz expired. However, we have continued to distribute the product lines carried by Toy Biz during 2002 and 2003. We cannot assure you that we will be able to retain the right to distribute this product line or, even if we are, that any of the products in this branded product line will retain their current popularity. The loss of our distribution rights for any of these product lines or the decrease in the popularity of any one of these branded product line would adversely affect our business, financial condition and results of operations.

**3. Our attempts to acquire other companies may not prove fruitful and could have an adverse effect on our liquidity and earnings**

We may, at times, become involved in discussions about acquiring other companies. Our experience in the past has been that this process takes a significant amount of management time and effort. New acquisition discussions will likely distract our management from our day-to-day operations. Even if we do find companies that are worth acquiring, it may be extremely difficult to integrate their operations into our existing operations. In addition, there is no guaranty that our acquisitions will be financially successful. Thus, any such acquisition could have an adverse effect on our liquidity and earnings.

**4. The life cycle for toy products is usually very short and our business may be adversely affected by our inability to secure the right to distribute new products**

As a result of changing consumer preferences, many toy products are successfully marketed for only one or two years. There can be no assurances that

- ◆ any of our current products or product lines will continue to be popular for any significant period of time;
- ◆ any new products or product lines introduced by us will achieve an adequate degree of market acceptance; or
- ◆ any new product's life cycle will be sufficient to permit us to recover development, manufacturing, marketing or other costs of the product.

In the event a new product does not receive sufficient market acceptance, we may be required to sell inventory of such products at a substantial discount. Accordingly, our success is dependent in large part on our ability to secure the rights to distribute new products and to secure new character and well-known brand name licenses for existing or new product lines, which cannot be assured. Therefore, we cannot assume that any new products will be successful or meet with the same success as existing products.

**1. Consumer preferences are difficult to predict and the introduction of new products is critical to the toy industry**

Our business and operating results depend largely upon the appeal of our toy products. A decline in the popularity of our existing products and product lines or the failure of new products and product lines to achieve and sustain market acceptance could result in reduced overall revenues and margins, which could have a material adverse effect on our business, financial condition and results of operations. Our continued success will depend on our ability to redesign, restyle and extend our existing toy products and fashion accessories and to develop, introduce and gain customer acceptance of new products. However consumer preferences with respect to toy products and fashion accessories are continuously changing and are difficult to predict.

**2. Certain relationships among our management and affiliates create various potential and actual conflicts of interest and could adversely affect our business**

Although it is our policy that all transactions with and loans to our affiliates be made on similar terms to those that can be obtained from unaffiliated third parties and for such transactions to be approved by a majority of our directors who do not have an interest in the transaction, certain situations may arise in the future where an interested party would be required to vote on actions that could benefit such person and negatively impact Grand, or vice versa.

**3. Non-compliance with government regulation could seriously harm our business**

Most of our business is currently conducted in Canada. We are subject to the provisions of various laws, certain of which have been enacted by the federal government of Canada, the Province of Quebec and other Canadian provinces. The laws of Canada include the Hazardous Products Act which empowers the government to protect children from hazardous toys and other articles. Under that legislation, the government has the authority to exclude from the market those products which are found to be hazardous. We are also subject to the Consumer Packaging and Labeling Act enacted by the government of Canada, which legislation prohibits the importation of prepackaged items and the sale or importation or advertising of items which have misleading information on their labels. As a result, if any of these Canadian governmental entities should allege that any of our products are hazardous to children or the packaging is misleading, whether or not such items are dangerous or misleading, we could be precluded from selling entire lines of toys until a full investigation is completed. In such case, even if we were to prevail, a significant portion of the value of the entire line could be lost during a time-consuming investigation because, as discussed above, the life cycle for toy products is usually very short.

**4. We face substantial competition in the toy distribution industry**

Many other companies involved in the toy distribution industry in Canada and the United States have greater financial resources, larger sales forces, greater name recognition, larger facilities for product development and products that may be more competitively priced than our products. As a result, some of our competitors may be able to obtain a greater volume of and more lucrative distribution contracts than we can.

**5. We may be adversely effected by the seasonal aspect of our business**

Our business is seasonal and therefore our annual operating results will depend, in large part, on our sales during the relatively brief holiday season from September through December when the majority of our sales take place. Further, the impact of seasonality is increasing as large retailers become more efficient in their control of inventory levels through quick response management techniques. These customers are timing reorders so that they are being filled by suppliers closer to the time of purchase by consumers, which to a large extent occur during September through December, rather than maintaining large on-hand inventories throughout the year to meet consumer demand. While these techniques reduce a retailer's investment in inventory, they increase pressure on suppliers like us to fill orders promptly and shift a significant portion of inventory risk and carrying costs to the supplier. The limited inventory carried by retailers may also reduce or delay retail sales. Additionally, the logistics of supplying more and more product within shorter time periods will increase the risk that we may fail to achieve tight and compressed shipping schedules. This seasonal pattern requires significant use of working capital mainly to manufacture inventory during the year, prior to the holiday season, and requires accurate forecasting of demand for products during the holiday season. Our failure to accurately predict and respond to consumer demand could result in our underproducing popular items and overproducing less popular items.

**6. The market price of our common stock has been and will continue to be volatile**

Market prices of the securities of toy companies are often volatile and our historical stock price has reflected this volatility. The market price of our common stock may be affected by many factors, including: fluctuations in our financial results; the actions of our customers and competitors (including new product line announcements and introductions); new regulations affecting foreign manufacturing; other factors affecting the toy industry in general; and sales of our common stock into the public market. In addition, the stock market periodically has experienced significant price and volume fluctuations which may have been unrelated to the operating performance of particular companies.

**7. The issuance of blank check preferred stock may also impact the value of our shares**

We are authorized to issue 5,000,000 shares of "blank check" preferred stock, which is preferred stock that may be issued from time to time in such classes or series and with such terms, rights and preferences as the board of directors may choose. All of these shares may be issued in the discretion of our board of directors, without the approval of our stockholders, with dividend, liquidation, conversion, voting or other rights, which could negatively affect the voting power or other rights of owners of our common stock or other series of preferred stock.

**8. Our ability to issue "blank check" preferred stock could prevent or delay takeovers.**

Our preferred stock can be designated in a manner that could delay or impede a merger, tender offer or other transactions resulting in a change in control, even if such a transaction would have significant benefits to our stockholders. As a result, these provisions could limit the price that certain investors might be willing to pay in the future for shares of our common stock.

**9. We do not expect to pay dividends on our stock**

We have not paid any cash or other dividends on our common stock and do not expect to declare or pay any cash dividends in the foreseeable future. In addition, our current credit agreement with our bank restricts the payment of any dividends without the bank's prior consent.

2. **FORWARD-LOOKING STATEMENTS**

Some of the statements contained in this prospectus discuss future expectations, contain projections of results of operation or financial condition or state other forward-looking information. Forward-looking statements can be identified by the use of progressive terminology, such as may, will, expect, anticipate, estimate, continue or other similar words. These statements are subject to known and unknown risks and uncertainties that could cause our actual results to differ materially from those contemplated by the statements. Factors that might cause such a difference include those discussed in the section titled Risk Factors beginning on page 2. The information contained in this prospectus is current only as of its date, regardless of the time of delivery of this prospectus or of any sale of the shares. You should read carefully the entire prospectus, as well as the documents incorporated by reference in the prospectus, before making an investment decision. All references to the terms "Grand", "we", "our" or "us" in this prospectus means Grand Toys International, Inc. and its subsidiaries, except where it is clear that the term means only the parent corporation or a subsidiary.

3. **USE OF PROCEEDS**

We will not realize any proceeds from the sale of the shares pursuant to this prospectus but will derive proceeds of \$1,349,902.81 if all of the warrants and options are exercised. Such proceeds will be available to us for working capital and general corporate purposes. However, because the exercise price per share of some of these options is greater than our current share price, it is not likely that we will receive the full proceeds stated above unless and until the market price of our shares exceeds the exercise price. See "Selling Stockholders" and "Plan of Distribution."

4. **DILUTION**

We are authorized to issue 12,500,000 shares of common stock. Of such shares, 2,762,698 shares are issued and outstanding, 156,559 shares are reserved for issuance upon the exercise of options granted under Grand's Amended and Restated 1993 Stock Option Plan, 157,500 shares are reserved for issuance upon the exercise of options granted outside of the plan, and 3,157,144 are reserved for issuance upon the exercise of warrants.

In certain cases, the officers, directors and present stockholders of Grand have acquired their shares at a cost substantially lower than that which investors will pay for the common stock offered hereby. As a result, anyone purchasing shares in this offering could incur dilution in the net tangible book value per share.

5. **SELLING STOCKHOLDERS**

The table below sets forth the beneficial ownership of our common stock by the selling stockholders as of March 31, 2003. Beneficial ownership includes shares of outstanding common stock, and shares of common stock that a person has the right to acquire within 60 days of the date of this prospectus through the exercise of options or warrants to purchase common stock. To sell any shares issuable upon the exercise of options or warrants, a holder must first purchase the shares by exercising the option or warrant, and to date, none of the holders listed below have exercised these options or warrants.

The number of shares that may be actually sold by any selling stockholder will be determined by the selling stockholder. Because the selling stockholders may sell all, some or none of the shares of common stock which they hold, and because the offering contemplated by this prospectus is not currently being underwritten, no estimate can be

## PLAN OF DISTRIBUTION

We are registering the shares on behalf of the selling stockholders. We will receive no part of the proceeds of any sales made hereunder. See "Use of Proceeds."

The selling stockholders and any broker-dealers participating in the distribution of the shares may be deemed to be "underwriters" within the meaning of the Securities Act of 1933, and any commissions or discounts given to any such broker-dealer may be regarded as underwriting commissions or discounts under the Securities Act of 1933.

The selling stockholders may from time to time sell all or a portion of the shares on the Nasdaq SmallCap market or on any national securities exchange on which our shares may be listed or traded, in negotiated transactions or otherwise, at prices then prevailing or related to the then current market price or at negotiated prices. We cannot guarantee that the selling stockholders will sell any or all of their shares. The shares will not be sold in an underwritten public offering. The shares may be sold directly or through brokers or dealers. The methods by which the shares may be sold include:

- ◆ a block trade (which may involve crosses) in which the broker or dealer so engaged will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- ◆ purchases by a broker or dealer as principal and resale by such broker or dealer for its account pursuant to this prospectus;
- ◆ ordinary brokerage transactions and transactions in which the broker solicits purchasers; and
- ◆ privately negotiated transactions.

In effecting sales, brokers and dealers engaged by selling stockholders may arrange for other brokers or dealers to participate. Brokers or dealers may receive commissions or discounts from selling stockholders (or, if any such broker-dealer acts as agent for the purchaser of such shares, from such purchaser) in amounts to be negotiated which are not expected to exceed those customary in the types of transactions involved. Broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share, and, to the extent such broker-dealer is unable to do so acting as agent for a selling stockholder, to purchase as principal any unsold shares at

the price required to fulfill the broker-dealer commitment to such selling stockholder. Broker-dealers who acquire shares as principal may resell such shares from time to time in transactions (which may involve crosses and block transactions and sales to and through other broker-dealers, including transactions of the nature described above) in the over-the-counter market or otherwise at prices and on terms then prevailing at the time of sale, at prices then related to the then-current market price or in negotiated transactions and, in connection with such resales, may receive from the purchasers of such shares commissions as described above.

In connection with the distribution of the shares, the selling stockholders may enter into hedging transactions with broker-dealers. In connection with such transactions, broker-dealers may engage in short sales of the shares in the course of hedging the positions they assume with the selling stockholders. The selling stockholders may also sell the shares short and redeliver the shares to close out the short positions. The selling stockholders may also enter into option or other transactions with broker-dealers, which require the delivery to the broker-dealer of the shares. The selling stockholders may also loan or pledge the shares to a broker-dealer and the broker-dealer may sell the shares so loaned or upon a default the broker-dealer may effect sales of the pledged shares. In addition to the foregoing, the selling stockholders may enter into, from time to time, other types of hedging transactions.

The selling stockholders and any broker-dealers participating in the distributions of the shares may be deemed to be "underwriters" within the meaning of Section 2(11) of the Securities Act and any profit on the sale of shares by the selling stockholders and any commissions or discounts given to any such broker-dealer may be deemed to be underwriting commissions or discounts under the Securities Act.

The shares may also be sold pursuant to Rule 144 under the Securities Act beginning one year after the shares were issued, provided such date is at least 90 days after the date of this prospectus.

The selling stockholders have not advised us of any specific plans for the distribution of the shares covered by this prospectus. When and if we are notified by the selling stockholders that any material arrangement has been entered into with a broker-dealer or underwriter for the sale of a material portion of the shares covered by this prospectus, a prospectus supplement or post-effective amendment to the registration statement will be filed with the SEC. This supplement or amendment will include the following information:

- ◆ the name of the participating broker-dealer(s) or underwriters;
- ◆ the number of shares involved;
- ◆ the price or prices at which the shares were sold by the selling stockholders;
- ◆ the commissions paid or discounts or concessions allowed by the selling stockholders to the broker-dealers or underwriters; and
- ◆ other material information.

We have advised the selling shareholder that the anti-manipulation rules promulgated under the Securities Exchange Act, including Regulation M, may apply to sales of the shares offered by the selling stockholder. We have agreed to pay all costs relating to the registration of the shares. Any commissions or other fees payable to broker-dealers in connection with any sale of the shares will be paid by the selling shareholder or other party selling the shares.

## 1. **SUBSEQUENT EVENTS**

**5. Item 15. Indemnification of Directors and Officers**

The rights of Grand or its stockholders to sue any director or officer of Grand for misconduct in conducting the affairs of Grand as an officer or director is limited by Article XII of Grand's Articles of Incorporation and Nevada statutory law to cases for damages resulting from breaches of fiduciary duties involving acts or omissions involving intentional misconduct, fraud, knowing violations of the law or the unlawful payment of dividends. Ordinary negligence is not a ground for such a suit. The statute does not limit the liability of directors or officers for monetary damages under the federal securities laws. Grand also has the obligation, pursuant to Article IX of Grand's Amended and Restated Bylaws, to indemnify any and all of its directors or officers or former directors or officers or any person who may have served at its request as a director or

officer of another corporation in which Grand owns shares of capital stock or of which it is a creditor against expenses actually and necessarily incurred by any such person in connection with the defense of any action, suit or proceeding in which such person is made a party, by reason of being or having been a director or officer of Grand, or of such other corporation, except in relation to matters as to which any such person shall be adjudged in such action, suit or proceeding to be liable for negligence or misconduct in the performance of duty.

Grand

maintains a directors' and officers' liability insurance policy covering certain liabilities that may be incurred by directors and officers in connection with the performance of their duties. The entire premium for such insurance is paid by Grand. Accordingly, indemnification may occur for liabilities arising under the Securities Act. Insofar as indemnification for liabilities arising under the Securities Act may be permitted for directors, officers and controlling persons of Grand pursuant to the foregoing provisions or otherwise, Grand has been advised that, in the opinion of the Securities and Exchange Commission, such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

**7. Item 17. Undertakings.**

8. The undersigned registrant undertakes:

1. to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement;
  - i. to include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;
  - ii. to reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement; and
  - iii. to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however

, that paragraphs (a)(1)(i) and (a)(1)(ii) do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in periodic reports filed by the registrant pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, that are incorporated by reference in the registration statement;

2. that for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof; and
3. to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

9. 10. Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

Grand Toys International, Inc.

We consent to the use of our report dated March 7, 2003 with respect to the consolidated balance sheets of Grand Toys International, Inc. as of December 31, 2002 and 2001 and the related consolidated statements of operations, stockholders' equity, cash flows and comprehensive income for each of the years in the three-year period ended December 31, 2002, incorporated herein by reference and to the reference to our firm under the heading "Experts" in the prospectus.
