By: /s/Geoffrey M. Hertel

Geoffrey M. Hertel

President & Chief Executive Officer

Date: October 24, 2003

For Immediate Release**TETRA TECHNOLOGIES, INC.****ANNOUNCES THIRD QUARTER 2003 EARNINGS OF \$0.46 PER SHARE**

October 24, 2003 (The Woodlands, Texas), TETRA Technologies, Inc. ("TETRA" or the "Company") (NYSE: TTI) today announced that its third quarter 2003 earnings were \$0.46 per share, fully diluted. The \$0.46 per share corresponds to the \$0.05 per share reported in the third quarter of 2002. For comparative purposes, had TETRA not sold and discontinued certain operations on September 30, earnings per share would have equaled all-time record levels of \$0.31 per share. This per share amount, a non-GAAP measure, is comprised of net income from continuing operations and net income from discontinued operations, before the \$0.15 per share net gain on disposal of the discontinued operations. In accordance with GAAP, these per share amounts are reflected separately for reporting purposes, however, the Company believes that the \$0.31 per share amount provides a consistent measure of the underlying third quarter results of operations.

Consolidated revenues for the quarter ended September 30, 2003, were \$91,070,000 versus the \$54,944,000 reported in the third quarter of 2002. Gross profit margins were \$19,372,000 in the third quarter of 2003 versus the \$11,793,000 reported in the comparable period of 2002. Net income was \$10,745,000 (\$6,463,000 from continuing operations, \$697,000 from discontinued operations and a \$3,585,000 net gain on the disposal of discontinued operations) in the third quarter of 2003 versus the \$1,042,000 (\$989,000 from continuing operations and \$53,000 from discontinued operations) reported in the third quarter of 2002.

Consolidated results per share for the third quarter of 2003 were earnings of \$0.46 (\$0.31 excluding net gain on the disposal of discontinued operations) with 23,326,261 weighted average diluted common and common equivalent shares outstanding versus \$0.05 with 22,127,420 weighted average diluted common and common equivalent shares outstanding in the third quarter of 2002.

Divisional pretax earnings from continuing operations for the third quarter of 2003 versus the third quarter of 2002 were: Fluids – \$3,603,000 in 3Q 2003 and \$3,891,000 in 3Q 2002; Well Abandonment & Decommissioning – \$7,597,000 in 3Q 2003 and \$565,000 in 3Q 2002; and Testing & Services – \$1,666,000 in 3Q 2003 and \$825,000 in 3Q 2002.

Financial data aggregating the first nine months of 2003, comparable data for 2002 and data relating to net income, as well as discontinued operations, are available in the accompanying exhibit to this press release.

Geoffrey M. Hertel, Chief Executive Officer, stated, "To fully appreciate the strength of TETRA's business model and employee commitment, you need only look at the third quarter results. Excluding the net gain on the disposal of discontinued operations (but, including operating profits from discontinued operations) TETRA reported quarterly profits of \$0.31 per share. This equals the highest quarterly per share

profits from operations ever attained by TETRA. This was accomplished in a quarter in which two of our three divisions were not growing appreciably, primarily due to weak activity in the Gulf of Mexico (GOM). It was also a quarter that saw more weather "down days" than had been budgeted. Finally, the quarter included a \$0.05 per share property write-down, involving a very unique Maritech transaction. To overcome these issues and report the year-over-year improvement that we did, is very gratifying.

"During the quarter we shut down or sold two operations: our Damp Rid subsidiary and our TPS Norway business. Neither of these operations were core to TETRA. Damp Rid was first acquired to help base-load our dry calcium chloride plant at Lake Charles, Louisiana. That plant is an integral component of our Fluids strategy. Over the years, TETRA has developed a significant energy-based calcium chloride business, making the Damp Rid ownership less important. TETRA generated a substantial gain in the third quarter with the sale of Damp Rid for approximately \$19.4 million, in cash. We also secured a long-term contract to supply the new owner with calcium chloride.

"Our TETRA Process Services facility in Norway had been generating net losses in 2002 and early 2003. We had recently stabilized the business, but the long-term model for TPS Norway did not appear to fit into our core business strategy. We anticipate generating additional cash from the sale of assets associated with this now discontinued business.

"Early in 2003, we estimated that per share earnings for this year should be between \$0.87 to \$1.07, as adjusted for the 3-for-2 stock split in August. We continue to anticipate that earnings for 2003 (both total earnings, and earnings before the net gain on the disposal of discontinued operations) will fall within that range.

"To better position TETRA for the future, our business strategy has placed a high priority on cash generation. During the third quarter, we continued this emphasis on our cash position. At the end of the second quarter, TETRA had approximately \$22 million of long-term debt. At the end of the third quarter, we were essentially debt-free and had a cash balance of \$15 million.

"We look toward 2004 with great optimism and enthusiasm. Our business model has proved itself in a very trying year. Our testing business has begun to rebound and our fluids business should improve as GOM activity begins to accelerate. Our ability to generate cash and our unleveraged balance sheet give us significant flexibility to grow TETRA internally or through acquisitions," concluded Hertel.

TETRA is an oil and gas services company, including an integrated calcium chloride and brominated products manufacturing operation that supplies feedstocks to energy markets, as well as other markets.

This press release includes certain statements that are deemed to be forward-looking statements. These statements are based on certain assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions, expected future developments and other factors it believes are appropriate in the circumstances. Such statements are subject to a number of risks and
