UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED **SEPTEMBER 30, 2012**

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _____ TO _____ .

COMMISSION FILE NUMBER 1-13455

TETRA Technologies, Inc.

(Exact name of registrant as specified in its charter)

Edgar Filing: TETRA TECHNOLOGIES INC - Form 10-Q

Delaware
(State of incorporation)

74-2148293
(I.R.S. Employer Identification No.)

24955 Interstate 45 North
The Woodlands, Texas
(Address of principal executive offices)

77380
(zip code)

(281) 367-1983

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 5, 2012, there were 78,081,789 shares outstanding of the Company's Common Stock, \$0.01 par value per share.

Notes to Consolidated Financial Statements

(Unaudited)

NOTE A – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

We are a geographically diversified oil and gas services company, focused on completion fluids and associated products and services, after-frac flow back, production well testing and associated services, wellhead compression, and selected offshore services including well plugging and abandonment, decommissioning, and diving. We also have a limited domestic exploration and production business. We were incorporated in Delaware in 1981 and are composed of five reporting segments organized into three divisions – Fluids, Production Enhancement, and Offshore. Unless the context requires otherwise, when we refer to “we,” “us,” and “our,” we are describing TETRA Technologies, Inc. and its consolidated subsidiaries on a consolidated basis.

The consolidated financial statements include the accounts of our wholly owned subsidiaries. Investments in unconsolidated joint ventures in which we participate are accounted for using the equity method. Our interests in oil and gas properties are proportionately consolidated. All significant intercompany accounts and transactions have been eliminated in consolidation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with Rule 10-01 of Regulation S-X for interim financial statements required to be filed with the Securities and Exchange Commission (SEC) and do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. However, the information furnished reflects all normal recurring adjustments, which are, in the opinion of management, necessary to provide a fair statement of the results for the interim periods. The accompanying unaudited consolidated financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2011.

Certain previously reported financial information has been reclassified to conform to the current year period’s presentation. The impact of such reclassifications was not significant to the prior year period’s overall presentation.

Cash Equivalents

We consider all highly liquid cash investments, with a maturity of three months or less when purchased, to be cash equivalents.

Restricted Cash

Restricted cash is classified as a current asset when it is expected to be repaid or settled in the next twelve month period. Restricted cash reported on our balance sheet as of September 30, 2012, consists primarily of escrowed cash associated with our July 2011 purchase of a heavy lift derrick barge. The escrowed cash will be released to the sellers in accordance with the terms of the escrow agreement.

Inventories

Inventories are stated at the lower of cost or market value and consist primarily of finished goods. Cost is determined using the weighted average method. Significant components of inventories as of September 30, 2012, and December 31, 2011, are as follows:

	September 30, 2012			December 31, 2011		
	(In Thousands)					
Finished goods	\$	71,703		\$	71,247	
Raw materials		5,051			5,653	
Parts and supplies		24,195			22,216	
Work in progress		1,100			869	
Total inventories	\$	102,049		\$	99,985	

Finished goods inventories include, in addition to newly manufactured clear brine fluids, recycled brines that are repurchased from certain of our customers. Recycled brines are recorded at cost, using the weighted average method.

Net Income per Share

The following is a reconciliation of the weighted average number of common shares outstanding with the number of shares used in the computations of net income per common and common equivalent share:

	Three Months Ended				Nine Months Ended			
	September 30,				September 30,			
	2012		2011		2012		2011	
	(In Thousands)							
Number of weighted average common shares outstanding	77,329		76,717		77,226		76,517	
Assumed exercise of stock awards	1,609		1,623		1,514		1,588	
Average diluted shares outstanding	78,938		78,340		78,740		78,105	

In applying the treasury stock method to determine the dilutive effect of the stock options outstanding during the first nine months of 2012, we used the average market price of our common stock of \$7.96. For the three months ended September 30, 2012 and 2011, the average diluted shares outstanding excludes the impact of 2,144,779 and 2,054,303 outstanding stock options, respectively, that have exercise prices in excess of the average market price, as the inclusion of these shares would have been antidilutive. For the nine months ended September 30, 2012 and 2011, the average diluted shares outstanding excludes the impact of 2,576,375 and 1,874,492 outstanding stock options, respectively, that have exercise prices in excess of the average market price, as the inclusion of these shares would have been antidilutive.

Environmental Liabilities

Environmental expenditures that result in additions to property and equipment are capitalized, while other environmental expenditures are expensed. Environmental remediation liabilities are recorded on an undiscounted basis when environmental assessments or cleanups are probable and the costs can be reasonably estimated. Estimates of future environmental remediation expenditures often consist of a range of possible expenditure amounts, a portion of which may be in excess of amounts of liabilities recorded. In such an instance, we disclose the full range of amounts reasonably possible of being incurred. Any changes or developments in environmental remediation efforts are accounted for and disclosed each quarter as they occur. Any recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable.

Complexities involving environmental remediation efforts can cause estimates of the associated liability to be imprecise. Factors that cause uncertainties regarding the estimation of future expenditures include, but are not limited to, the effectiveness of the anticipated work plans in achieving targeted results and changes in the desired remediation methods and outcomes as prescribed by regulatory agencies. Uncertainties associated with environmental remediation contingencies are pervasive and often result in wide ranges of reasonably possible outcomes. Estimates developed in the early stages of remediation can vary significantly. Normally, a finite estimate of cost does not become fixed and determinable at a specific point in time. Rather, the costs associated with environmental remediation become estimable as the work is performed and the range of ultimate cost becomes more defined. It is possible that cash flows and results of operations could be materially affected by the impact of the ultimate resolution of these contingencies.

Fair Value Measurements

Fair value is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date” within an entity’s principal market, if any. The principal market is the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity, regardless of whether it is the market in which the entity will ultimately transact for a particular asset or liability or if a different market is potentially more advantageous. Accordingly, this exit price concept may result in a fair value that may differ from the transaction price or market price of the asset or liability.

Under generally accepted accounting principles, the fair value hierarchy prioritizes inputs to valuation techniques used to measure fair value. Fair value measurements should maximize the use of observable inputs and minimize the use of unobservable inputs, where possible. Observable inputs are developed based on market

data obtained from sources independent of the reporting entity. Unobservable inputs may be needed to measure fair value in situations where there is little or no market activity for the asset or liability at the measurement date and are developed based on the best information available in the circumstances, which could include the reporting entity's own judgments about the assumptions market participants would utilize in pricing the asset or liability.

We utilize fair value measurements to account for certain items and account balances within our consolidated financial statements. Fair value measurements are utilized in the allocation of purchase consideration for acquisition transactions to the assets and liabilities acquired, including intangible assets and goodwill. In addition, we utilize fair value measurements in the initial recording of our decommissioning and other asset retirement obligations. Fair value measurements may also be utilized on a nonrecurring basis, such as for the impairment of long-lived assets, including goodwill. The fair value of our financial instruments, which may include cash, temporary investments, accounts receivable, short-term borrowings, and long-term debt pursuant to our bank credit agreement, approximate their carrying amounts. The fair values of our long-term Senior Notes at September 30, 2012, and December 31, 2011, were approximately \$334.1 million and \$332.4 million, respectively, compared to a carrying amount of \$305.0 million, as current rates on those dates were more favorable than the stated interest rates on the Senior Notes. We calculate the fair value of our Senior Notes internally, using current market conditions and average cost of debt (a level 2 fair value measurement).

New Accounting Pronouncements

In June 2011, the FASB published ASU 2011-05, "Comprehensive Income (Topic 220), Presentation of Comprehensive Income" (ASU 2011-05), with the stated objective of improving the comparability, consistency, and transparency of financial reporting and increasing the prominence of items reported in other comprehensive income. As part of ASU 2011-05, the FASB eliminated the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The ASU amendments require that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The ASU amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and the amendments are applied retrospectively. In December 2011, with the issuance of ASU 2011-12, "Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05," the FASB announced that it has deferred certain aspects of ASU 2011-05. The portion of this ASU that has been adopted has not had a significant impact on the accounting or disclosures in our financial statements.

In May 2011, the FASB published ASU 2011-04, "Fair Value Measurement (Topic 820) – Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs," whereby the FASB and the International Accounting Standards Board (IASB) aligned their definitions of fair value such that their fair value measurement and disclosure requirements are the same (except for minor differences in wording and style). The Boards concluded that the amendments in this ASU will improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and IFRS. The amendments in this ASU are effective during interim and annual periods beginning after December 15, 2011, and are applied prospectively. The adoption of the accounting and disclosure requirements of this ASU has not had a significant impact on our financial statements.

NOTE B – ACQUISITIONS AND DISPOSITIONS

Acquisition of Optima

On March 9, 2012, we acquired 100% of the outstanding common stock of Optima Solutions Holdings Limited (Optima), a provider of rig cooling services and associated products that suppress heat generated by high- rate flaring of hydrocarbons during well test operations. The acquisition of Optima, which is based in Aberdeen, Scotland, enables our Production Testing segment to provide its customers with a broader range of production testing and associated services and expands the segment's presence in many significant global markets. Including the impact of additional working capital received and other adjustments to the purchase price, we paid 41.2 million pounds sterling (approximately \$65.0 million equivalent) in cash as the purchase price for the Optima stock at closing and may pay up to an additional 4 million pounds sterling in contingent purchase price consideration, depending on a defined measure of earnings for Optima over each of the two years subsequent to the closing.

We allocated the purchase price to the fair value of the assets and liabilities acquired, which consisted of approximately \$3.0 million of net working capital; \$16.8 million of property, plant, and equipment; \$20.4 million of certain intangible assets; \$6.1 million of deferred tax liabilities and \$3.5 million of other liabilities associated with the contingent purchase price consideration obligation; and \$34.5 million of nondeductible goodwill. This allocation of the purchase price to Optima's net assets and liabilities is preliminary and subject to the potential identification of additional assets and contingencies or revisions to the fair value calculations. These fair value calculations and allocations are expected to be finalized later during 2012, and could result in adjustments to the calculated depreciation and amortization of the tangible and intangible assets, respectively, that were acquired. The fair value of the obligation to pay the contingent purchase price consideration was calculated based on the anticipated earnings for Optima over each of the next two twelve month periods subsequent to the closing and could increase (up to 4 million pounds sterling) or decrease (to zero) depending on Optima's actual and expected earnings going forward. Increases or decreases in the value of the anticipated contingent purchase price consideration obligation due to changes in the amounts paid or expected to be paid will be charged or credited to earnings in the period in which such changes occur. The \$34.5 million of goodwill preliminarily recorded to our Production Testing segment as a result of the Optima acquisition is supported by the expected strategic benefits discussed above to be generated from the acquisition. For the nine month period ended September 30, 2012, our revenues, depreciation and amortization, and pretax earnings included \$15.1 million, \$3.1 million, and \$3.6 million, respectively, associated with the acquired operations of Optima after the closing in March 2012. In addition to the above impact on our results of operations, transaction costs associated with the acquisition of Optima of approximately \$1.3 million were also charged to general and administrative expense during the nine month period.

Acquisition of ERS

On April 23, 2012, we acquired the assets and operations of Eastern Reservoir Services (ERS), a division of Patterson-UTI Energy, Inc. for a cash purchase price of \$42.5 million. ERS is a provider of production testing and after-frac flow back services to oil and gas operators in the Appalachian and U.S. Rocky Mountain regions, and the acquisition represents a strategic geographic expansion of our existing Production Testing segment operations, allowing it to serve customers in additional basins in the U.S.

We allocated the purchase price to the fair value of the assets acquired, which consisted of approximately \$18.5 million of property, plant, and equipment, approximately \$3.4 million of certain intangible assets, and approximately \$20.6 million of nondeductible goodwill. This allocation of the purchase price to the ERS assets is preliminary and subject to the potential identification of additional assets and contingencies or revisions to the fair value calculations. These fair value calculations and allocations are expected to be finalized later during 2012 and could result in adjustments to the calculated depreciation and amortization of the tangible and intangible assets, respectively. The \$20.6 million of goodwill preliminarily recorded to our Production Testing segment as a result of the ERS acquisition is supported by the strategic benefits discussed above to be generated from the acquisition. For the nine month period ended September 30, 2012, our revenues, depreciation and amortization, and pretax earnings included \$16.0 million, \$1.8 million, and \$4.7 million, respectively, associated with the acquired operations of ERS after the closing in April 2012. In addition to the above impact on our results of operations, transaction costs associated with the ERS acquisition of approximately \$0.5 million were also charged to general and administrative expense during the nine month period.

Acquisition of Greywolf

On July 31, 2012, we acquired the assets and operations of Greywolf Production Systems Inc. and GPS Ltd. (together, Greywolf) for a cash purchase price of approximately \$55.5 million. Greywolf is a provider of production testing and after-frac flow back services to oil and gas operators in western Canada and the U.S. Williston Basin (including the Bakken formation) and the Niobrara Shale formation of the U.S. Rocky Mountain region. This acquisition represents an additional strategic geographic expansion of our existing Production Testing segment operations.

We allocated the purchase price to the fair value of the assets acquired, which consisted of approximately \$17.7 million of property, plant, and equipment, approximately \$3.5 million of certain intangible assets, and approximately \$34.3 million of nondeductible goodwill. This allocation of the purchase price to the Greywolf assets is preliminary and subject to the potential identification of additional assets and contingencies or revisions to the fair value calculations. These fair value calculations and allocations are expected to be finalized during the first quarter of 2013 and could result in adjustments to the calculated depreciation and amortization of the tangible and intangible assets, respectively. The \$34.3 million of goodwill preliminarily recorded to our Production Testing segment as a result of the Greywolf acquisition is supported by the strategic benefits discussed above to be

generated from the acquisition. For the nine month period ended September 30, 2012, our revenues, depreciation and amortization, and pretax earnings included \$5.9 million, \$0.4 million, and \$1.2 million, respectively, associated with the acquired operations of Greywolf after the closing in July 2012. In addition to the above impact on our results of operations, transaction costs associated with the Greywolf acquisition of approximately \$0.7 million were also charged to general and administrative expense during the nine month period.

Pro Forma Financial Information

The pro forma information presented below has been prepared to give effect to the acquisitions of Optima, ERS, and Greywolf as if they had occurred at the beginning of the periods presented and include the impact from the allocation of the purchase price on depreciation and amortization. The aggregate pro forma impact of the sale of equipment and oil and gas producing properties described below is not material and is not included in the following pro forma information. The pro forma information is presented for illustrative purposes only and is based on estimates and assumptions we deemed appropriate. The following pro forma information is not necessarily indicative of the historical results that would have been achieved if the acquisition transactions had occurred in the past, and our operating results may have been different from those reflected in the pro forma information below. Therefore, the pro forma information should not be relied upon as an indication of the operating results that we would have achieved if the transactions had occurred at the beginning of the periods presented or the future results that we will achieve after the acquisitions.

Sale of Equipment

In January 2012, our Offshore Services segment sold certain equipment for cash of approximately \$7.8 million. As a result of the sale, we recognized a gain on disposal of approximately \$4.1 million, which is included in gain on sale of assets.

Sale of Maritech Producing Properties

In March 2012, Maritech sold its interest in certain onshore oil and gas producing properties for cash consideration of approximately \$4.4 million. Following this transaction, Maritech's remaining oil and gas reserves and production are negligible, and its operations consist primarily of the remaining well abandonment and decommissioning of its offshore oil and gas platforms and facilities.

NOTE C – LONG-TERM DEBT AND OTHER BORROWINGS

Long-term debt consists of the following:

		September 30, 2012			December 31, 2011		
		(In Thousands)					
	Scheduled Maturity						
Bank revolving line of credit facility	June 26, 2015	\$	57,160		\$		–
Compressco Partners' bank credit facility	June 24, 2015		5,800				–
5.90% Senior Notes, Series 2006-A	April 30, 2016		90,000			90,000	
6.30% Senior Notes, Series 2008-A	April 30, 2013		35,000			35,000	
6.56% Senior Notes, Series 2008-B	April 30, 2015		90,000			90,000	
5.09% Senior Notes, Series 2010-A	December 15, 2017		65,000			65,000	
5.67% Senior Notes, Series 2010-B	December 15, 2020		25,000			25,000	
European bank credit facility			–			–	
Other			665			35	
Total debt			368,625			305,035	
Less current portion			(35,665)			(35)	
Total long-term debt		\$	332,960		\$	305,000	

Subsequent to September 30, 2012, and as of November 9, 2012, we borrowed an additional \$13.7 million pursuant to our revolving credit facility.

NOTE D – DECOMMISSIONING AND OTHER ASSET RETIREMENT OBLIGATIONS

The large majority of our asset retirement obligations consists of the future well abandonment and decommissioning costs for offshore oil and gas properties and platforms owned by our Maritech subsidiary, including the decommissioning and debris removal costs associated with one remaining offshore platform previously destroyed by hurricanes. The amount of decommissioning liabilities recorded by Maritech is reduced by amounts allocable to joint interest owners and any contractual amounts to be paid by the previous owners of the oil and gas properties when the liabilities are satisfied.

The changes in the asset retirement obligations during the three and nine month periods ended September 30, 2012 and 2011, are as follows:

Edgar Filing: TETRA TECHNOLOGIES INC - Form 10-Q

	Three Months Ended September 30,					
	2012			2011		
	(In Thousands)					
Beginning balance for the period, as reported	\$	113,138		\$	144,525	
Activity in the period:						
Accretion of liability		285			631	
Revisions in estimated cash flows		9,187			14,311	
Settlement of retirement obligations		(23,104)			(25,872)	
Ending balance as of September 30	\$	99,506		\$	133,595	
	Nine Months Ended September 30,					
	2012			2011		
	(In Thousands)					
Beginning balance for the period, as reported	\$	139,835		\$	272,815	
Activity in the period:						
Accretion of liability		1,306			3,789	
Revisions in estimated cash flows		19,293			40,120	
Settlement of retirement obligations		(60,928)			(183,129)	
Ending balance as of September 30	\$	99,506		\$	133,595	

Revisions in estimated cash flows during the third quarter of 2012 resulted primarily from additional work anticipated to be required on Maritech's offshore oil and gas properties. Settlements of retirement obligations during the three and nine month periods ended September 30, 2011, include approximately \$3.3 and \$122.0 million, respectively, of obligations associated with oil and gas properties sold by Maritech during these periods.

NOTE E – HEDGE CONTRACTS

We are exposed to financial and market risks that affect our businesses. We have currency exchange rate risk exposure related to transactions denominated in a foreign currency as well as to investments in certain of our international operations. As a result of our variable rate bank credit facilities, we face market risk exposure related to changes in applicable interest rates. We have concentrations of credit risk as a result of trade receivables owed to us by companies in the energy industry. Our financial risk management activities may at times involve, among other measures, the use of derivative financial instruments, such as swap and collar agreements, to hedge the impact of market price risk exposures. Prior to the sale of substantially all of our remaining Maritech oil and gas properties in May 2011, we utilized cash flow commodity hedge transactions to reduce our exposure related to the volatility of oil and gas prices. These cash flow commodity hedge contracts were liquidated in the second quarter of 2011. For these and other hedge contracts, we formally document the relationships between hedging instruments and hedged items, as well as our risk management objectives, our strategies for undertaking various hedge transactions, and our methods for assessing and testing correlation and hedge ineffectiveness. All hedging instruments are linked to the hedged asset, liability, firm commitment, or forecasted transaction. We also assess, both at the inception of the hedge and on an ongoing basis, whether the derivatives that are used in these hedging transactions are highly effective in offsetting changes in cash flows of the hedged items.

Derivative Hedge Contracts

In April 2011, following the execution of the purchase and sale agreement pursuant to which Maritech agreed to sell approximately 79% of its proved reserves, we liquidated our remaining oil hedge contracts and paid \$14.2 million to the counterparty. Therefore, from April 2011 forward, we have had no remaining cash flow hedging swap contracts outstanding associated with our Maritech subsidiary's oil or gas production.

Prior to their liquidation during 2011, we believe that our swap agreements were "highly effective cash flow hedges," in managing the volatility of future cash flows associated with Maritech's oil production. The effective portion of the change in the derivative's fair value (i.e., that portion of the change in the derivative's fair value that offsets the corresponding change in the cash flows of the hedged transaction) was initially reported as a component of accumulated other comprehensive income, which was classified within equity. This component of accumulated other comprehensive income associated with cash flow hedge derivative contracts, including any derivative contracts which have been liquidated, was subsequently reclassified into product sales revenues, utilizing the specific identification method, when the hedged exposure affected earnings (i.e., when hedged oil and gas production volumes were reflected in revenues). Any "ineffective" portion of the change in the derivative's fair value was recognized in earnings

immediately.

Pretax gains and losses associated with oil and gas derivative swap contracts for the nine month periods ended September 30, 2011, are summarized below:

	Nine Months Ended September 30, 2011			
Derivative Swap Contracts	Oil	Natural Gas	Total	
	(In Thousands)			
Amount of pretax gain reclassified from accumulated other comprehensive income into product sales revenue (effective portion)	\$ 1,177	\$ -	\$ 1,177	
Amount of pretax gain (loss) from change in derivative fair value recognized in other comprehensive income	(7,854)	-	(7,854)	
Amount of pretax gain (loss) recognized in other income (expense) (ineffective portion)	(13,947)	-	(13,947)	

Other Hedge Contracts

In July 2012, we borrowed 10.0 million euros (approximately \$12.9 million equivalent as of September 30, 2012) and designated the borrowing as a hedge of our net investment in our European operations. Changes in the foreign currency exchange rate have resulted in a cumulative change to the cumulative translation adjustment account of \$0.5 million, net of taxes, at September 30, 2012, with no ineffectiveness recorded.

NOTE F – EQUITY

Changes in equity for the three and nine month periods ended September 30, 2012 and 2011, are as follows:

NOTE G – COMMITMENTS AND CONTINGENCIES***Litigation***

We are named defendants in several lawsuits and respondents in certain governmental proceedings arising in the ordinary course of business. While the outcome of lawsuits or other proceedings against us cannot be predicted with certainty, management does not reasonably expect these matters to have a material adverse impact on our financial position, results of operations, or liquidity.

Environmental

One of our subsidiaries, TETRA Micronutrients, Inc. (TMI), previously owned and operated a production facility located in Fairbury, Nebraska. TMI is subject to an Administrative Order on Consent issued to American Microtrace, Inc. (n/k/a/ TETRA Micronutrients, Inc.) in the proceeding styled *In the Matter of American Microtrace Corporation*, EPA I.D. No. NED00610550, Respondent, Docket No. VII-98-H-0016, dated September 25, 1998 (the Consent Order), with regard to the Fairbury facility. TMI is liable for future remediation costs and ongoing environmental monitoring at the Fairbury facility under the Consent Order; however, the current owner of the Fairbury facility is responsible for costs associated with the closure of that facility.

NOTE H – INDUSTRY SEGMENTS

We manage our operations through five operating segments: Fluids, Production Testing, Compressco, Offshore Services, and Maritech.

Our Fluids Division manufactures and markets clear brine fluids, additives, and associated products and services to the oil and gas industry for use in well drilling, completion, and workover operations in the United States and in certain countries in Latin America, Europe, Asia, the Middle East, and Africa. The Division also markets liquid and dry calcium chloride products manufactured at its production facilities or purchased from third-party suppliers to a variety of markets outside the energy industry.

Our Production Enhancement Division consists of two operating segments: Production Testing and Compressco. The Production Testing segment provides after-frac flow back, production well testing, rig cooling, and other associated services in many of the major oil and gas basins in the United States, Mexico, Canada, as well as in certain basins in certain regions in South America, Africa, Europe, the Middle East, and Australia.

The Compressco segment provides compression-based production enhancement services, including both conventional wellhead compression services and unconventional compression services, and in certain markets, well monitoring and sand separation services. Compressco provides these services throughout many of the onshore producing regions of the United States, as well as certain basins in Mexico, Canada, and certain countries in South America, Europe, Asia, and other international locations. Beginning June 20, 2011, following the initial public offering of Compressco Partners, L.P. (Compressco Partners), we allocate and charge certain corporate and divisional direct and indirect administrative costs to Compressco Partners.

Our Offshore Division consists of two operating segments: Offshore Services and Maritech. The Offshore Services segment provides (1) downhole and subsea oil and gas services such as well plugging and abandonment and wireline services, (2) decommissioning and certain construction services utilizing heavy lift barges and various cutting technologies with regard to offshore oil and gas production platforms and pipelines, and (3) conventional and saturated air diving services.

The Maritech segment is an oil and gas production operation. During 2011 and the first quarter of 2012, Maritech sold substantially all of its oil and gas producing property interests. Maritech's operations consist primarily of the ongoing abandonment and decommissioning associated with its remaining offshore wells, facilities, and production platforms. Maritech intends to acquire a significant portion of these services from the Offshore Division's Offshore Services segment.

We generally evaluate the performance of and allocate resources to our segments based on profit or loss from their operations before income taxes and nonrecurring charges, return on investment, and other criteria. Transfers between segments and geographic areas are priced at the estimated fair value of the products or services as negotiated between the operating units. "Corporate overhead" includes corporate general and administrative expenses, corporate depreciation and amortization, interest income and expense, and other income and expense.

Summarized financial information concerning the business segments from continuing operations is as follows:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Business Overview

Our consolidated revenues and gross profit for the quarter ended September 30, 2012, reflect the growth of our Production Testing, Compressco, and Fluids segments compared to the prior year period. In particular, the results of our Production Testing segment for the current year period include the impact of its acquisitions of Optima Solutions Holdings Limited (Optima), and the assets and operations of Eastern Reservoir Services (ERS), and Greywolf Production Systems, Inc. and GPS Ltd. (together Greywolf), all of which were acquired during the first three quarters of 2012. These acquisitions contributed aggregate revenues and earnings before taxes, excluding transaction costs, during the quarter of \$21.5 million and \$4.8 million, respectively. Our Compressco segment, primarily through the Compressco Partners, L.P. subsidiary (Compressco Partners), reflected growth in revenues and profitability during the current year quarter compared to the prior year period, primarily as a result of increased Latin America activity. Our Fluids segment also reported increased revenues and profitability compared to the prior year period, primarily due to increased clear brine fluids (CBF) product sales due to increased activity in the Gulf of Mexico, as permitting and well completion activity has increased. Partially offsetting the growth in these segments, our Offshore Services segment reported decreased profitability during the current year quarter due to a number of factors, including weather disruptions, customer project delays, and pricing pressures. Following the sales of its oil and gas producing properties, our Maritech segment now generates minimal revenues. Increased gross profit was partially offset by increased general and administrative expense, primarily due to the above mentioned acquisitions.

The consideration for the Optima, ERS, and Greywolf acquisitions during 2012 consisted of aggregate cash of approximately \$163.0 million. The majority of the aggregate consideration for these acquisitions was funded from available cash, although, during the third quarter of 2012, we borrowed approximately \$57.2 million under our revolving credit facility to fund a portion of the purchase price for Greywolf acquisition, and for general corporate

purposes. Each of these acquisitions represents a strategic expansion of our Production Testing segment. In addition, subsequent to September 30, 2012, and through November 9, 2012, we borrowed approximately \$13.7 million for working capital purposes.

Our future operating cash flows, as well as revenues and profitability levels, are largely dependent on the level of oil and gas industry activity in the markets we serve, and they are significantly affected by oil and natural gas commodity prices. Given that these commodity prices have decreased from late 2011 levels, our capital expenditure and acquisition plans are being reviewed carefully in light of the activity levels of our businesses. Following the above mentioned borrowings, as of November 9, 2012, we have approximately \$198.6 million available under our revolving credit facility if needed to fund additional working capital requirements, capital expenditure plans, or additional acquisitions. We will continue to review additional suitable acquisition candidates as a part of our continuing growth strategy. Future acquisitions could be funded by existing cash balances, funds borrowed under our bank revolving credit facility, the issuance of additional debt or equity, or other sources of capital.

Critical Accounting Policies

There have been no material changes or developments in the evaluation of the accounting estimates and the underlying assumptions or methodologies pertaining to our Critical Accounting Policies and Estimates disclosed in our Form 10-K for the year ended December 31, 2011. In preparing our consolidated financial statements, we make assumptions, estimates, and judgments that affect the amounts reported. We periodically evaluate these

estimates and judgments, including those related to potential impairments of long-lived assets (including goodwill), the collectability of accounts receivable, and the cost of future abandonment and decommissioning obligations. Our estimates are based on historical experience and on future expectations that we believe are reasonable. The fair values of large portions of our total assets and liabilities are measured using significant unobservable inputs. The combination of these factors forms the basis for judgments made about the carrying values of assets and liabilities that are not readily apparent from other sources. These judgments and estimates may change as new events occur, as new information is acquired, and as changes in our operating environments are encountered. Actual results are likely to differ from our current estimates, and those differences may be material.

As of September 30, 2012, and during a portion of the third quarter of 2012, our market capitalization was below the recorded net book value of our equity, including goodwill. The accounting principles regarding goodwill acknowledge that the observed market prices of individual trades of a company's stock (and thus its computed market capitalization) may not be representative of the fair value of the company as a whole. Substantial value may arise from the ability to take advantage of synergies and other benefits that flow from control over an entity. Consequently, measuring the fair value of a collection of assets and liabilities that operate together in a controlled entity is different from measuring the fair value of a single share of that entity's common stock. Therefore, a control premium was estimated based on observed mergers and acquisitions in our industry. We have estimated the fair value of each of our reporting units and compared the aggregate fair value of our reporting units to our market capitalization after applying an estimated control premium. Such aggregate fair value exceeded our net book value, however, because the estimated fair value of our Offshore Services reporting unit currently exceeds its carrying value by approximately 13.7%, there is a reasonable possibility that all or a portion of Offshore Service's goodwill of approximately \$3.9 million may be impaired in a future period, and the impact of such impairment may be material. Specific uncertainties affecting the estimated fair value of our Offshore Services reporting unit include the prices received for the segment's services, the rate of future growth of the segment's business, demand and utilization for the segment's heavy lift barges and other service vessels, levels of competition, and the segment's ability to expand its services to other markets.

Results of Operations

Three months ended September 30, 2012 compared with three months ended September 30, 2011.

Consolidated revenues and gross profit for the quarter ended September 30, 2012, increased compared to the prior year period due to increased revenues and profitability for the Production Testing, Compressco, and Fluids segments. The increase in our Production Testing segment was primarily due to the acquisitions of Optima, ERS, and Greywolf during the first nine months of 2012, which generated approximately \$21.5 million of revenues and

approximately \$6.4 million of gross profit. Our Compressco segment reported increased revenues and gross profit compared to the prior year period primarily due to increased activity in Latin America. Fluids revenues and gross profit also increased primarily due to an increase in clear brine fluids (CBF) product sales due to increased well completion activity in the domestic offshore business. While our Offshore Services segment reported decreased revenues and gross profit overall, it reported increased third party revenues due to the increased decommissioning revenues generated from the heavy lift derrick barge acquired in 2011, although decreased diving and abandonment services pricing and activity levels, weather disruptions, and customer project delays largely offset this increase. Our Maritech segment reported a decreased loss due to decreased excess decommissioning costs as compared to the prior year period.

Consolidated general and administrative expenses increased by \$6.7 million during the third quarter of 2012 compared to the prior year period and included a \$2.1 million increase of corporate general and administrative expenses. In addition, there was a \$2.2 million increase in general and administrative expense by our Production Testing segment as a result of its growth from acquisitions and including approximately \$0.9 million of acquisition transaction costs during the period. The increase in corporate general and administrative expense is primarily due to increased compensation costs, including approximately \$0.7 million of increased equity compensation from the impact of severance costs during the period. The Fluids segment general and administrative expense increased \$1.1 million primarily as a result of increased professional fees and personnel-related costs. By type of cost, consolidated general and administrative expenses increased due to approximately \$5.8 million of increased personnel-related costs, approximately \$0.8 million of increased professional costs, \$0.1 million of increased insurance and taxes expense, and approximately \$0.5 million of increased office and other general expenses, partially offset by \$0.6 million of decreased bad debt expense.

Consolidated interest expense increased by \$0.2 million during the third quarter of 2012 compared to the prior year period. This increase is due to the increased borrowings during the 2012 third quarter, and such increase in interest expense compared to the prior year period is expected to continue going forward.

Consolidated other income was \$0.8 million during the third quarter of 2012 compared to an expense of \$0.7 million in the corresponding 2011 period. This is primarily due to increased earnings from an unconsolidated joint venture.

Our provision for income taxes during the third quarter of 2012 increased due to increased earnings during the current year period.

Divisional Comparisons

Fluids Division

Edgar Filing: TETRA TECHNOLOGIES INC - Form 10-Q

	Three Months Ended						Period to Period Change					
	September 30,											
	2012		2011		2012 vs 2011		% Change					
(In Thousands, Except Percentages)												
Revenues	\$	75,221		\$	65,415		\$	9,806			15.0%	
Gross profit		15,622			11,313			4,309			38.1%	
Gross profit as a percentage of revenue		20.8%			17.3%

Income before taxes and discontinued operations as a percentage of revenue		11.2%			7.8%							

The increase in Fluids Division revenues during the third quarter of 2012 compared to the prior year period was primarily due to an \$11.9 million increase in domestic revenues. This increase was due to an increase in clear brine fluids (CBF) product sales from increased Gulf of Mexico activity, as well completion activities have increased compared to the prior year period. In addition, international product sales revenues increased primarily due to increased activity in the Eastern Hemisphere. Partially offsetting these increases was approximately \$3.4 million of decreased revenue from manufactured products, primarily domestically. This was due to increased competition for domestic calcium chloride products. Services revenues were flat compared to the prior year quarter.

Fluids Division gross profit increased compared to the prior year period, primarily as a result of the increased Gulf of Mexico product sales discussed above. This increase was partially offset by decreased gross profit from the Division's European manufactured products operation, which was impacted by the partial shut down of the calcium chloride plant, causing reduced production efficiencies and increased costs in the third quarter.

Fluids Division income before taxes increased compared to the prior year period due to the increase in gross profit discussed above and despite increased administrative costs. Fluids Division administrative costs increased primarily due to increased professional fees and personnel-related costs.

Production Enhancement Division

Production Testing Segment

	Three Months Ended				Period to Period Change

Income before taxes and discontinued operations as a percentage of revenue	19.8%	25.9%						

Production Testing revenues increased during the third quarter of 2012 compared to the prior year period. This increase was mainly a result of the acquisitions of Optima, ERS, and Greywolf during 2012, which generated on a combined basis approximately \$21.5 million of revenues during the period. These acquisitions represent a strategic expansion of the services offered or the geographic markets served by the Production Testing segment and are expected to result in increased revenues going forward compared to the prior year period. Excluding the impact of these acquisitions, revenues decreased by \$2.5 million as compared to the prior year period, primarily due to the impact of lower natural gas prices domestically compared to the prior year period, which reduced demand in certain of the markets we serve. Increased revenues in South America and the Eastern Hemisphere were offset by decreased revenues in Mexico, where demand for certain of the segment's production testing services has decreased and been offset, on a consolidated basis, by increased demand for well monitoring services by our Compressco segment.

Production Testing segment gross profit increased during the third quarter of 2012 due to approximately \$6.4 million of gross profit from the acquisitions discussed above. This increase from acquisitions was partially offset by decreased gross profit due to the decreased activity levels in certain domestic markets, increased labor costs, and the decreased production testing activity in Mexico compared to the prior year period.

Production Testing income before taxes increased due to the increased gross profit discussed above as well as due to increased other income that resulted from increased earnings from an unconsolidated joint venture and increased foreign currency gains. These increases were partially offset by increased administrative expenses due primarily to increased personnel-related costs associated with the Optima and Greywolf acquisitions as well as from acquisition transaction costs during the period.

Compressco Segment

	Three Months Ended						Period to Period Change		
	September 30,								
	2012		2011		2012 vs 2011		% Change		
(In Thousands, Except Percentages)									
Revenues	\$	28,931		\$	25,000		\$	3,931	15.7%
Gross profit		11,806			8,788			3,018	34.3%
Gross profit as a percentage of revenue		40.8%			35.2%				
General and administrative expense		5,002			4,320			682	15.8%
General and administrative expense as a percentage of revenue		17.3%			17.3%				
Interest (income) expense, net		24			(9)			33	
Other (income) expense, net		424			602			(178)	
Income before taxes and discontinued operations	\$	6,356		\$	3,875		\$	2,481	64.0%
Income before taxes and discontinued operations as a percentage of revenue		22.0%			15.5%				

The increase in Compressco revenues compared to the prior year period was due to an increase of \$5.7 million of service revenues resulting from increased activity, particularly in Latin America. While there are uncertainties in Latin America that could affect operations, including the renewal of certain customer contracts, we expect revenues from our Latin American operations to continue to exceed the corresponding prior year period. Partially offsetting this increase was a \$1.8 million decrease from sales of compressor units and parts during the third quarter compared to the prior year. Compressco has increased its compressor fleet in Latin America to serve the increasing demand.

Compressco gross profit increased during the third quarter of 2012 compared to the prior year period primarily due to the increased Latin America activity discussed above, an increase in overall average compressor unit utilization from 77.6% to 82.0%, and continuing reductions in domestic operating expenses.

Income before taxes for Compressco increased during the third quarter of 2012 compared to the prior year period due to the increased gross profit discussed above, despite increased administrative expenses. The increase in Compressco's administrative expense is primarily due to increased equity compensation expense arising from current year equity grants by Compressco Partners and the impact of a severance agreement.

Offshore Division

Offshore Services Segment

	Three Months Ended						Period to Period Change	
	September 30,							

Edgar Filing: TETRA TECHNOLOGIES INC - Form 10-Q

	2012		2011		2012 vs 2011		% Change		
	(In Thousands, Except Percentages)								
Revenues	\$	78,802		\$	88,535		\$	(9,733)	(11.0)%
Gross profit		17,492			17,669			(177)	(1.0)%

Income before taxes and discontinued operations	\$	12,108		\$	13,466		\$	(1,358)	(10.1)%
Income before taxes and discontinued operations as a percentage of revenue		15.4%			15.2%				

Revenues from our Offshore Services segment decreased during the third quarter of 2012 compared to the prior year quarter, primarily due to a decrease in the work performed for Maritech during the current period. Increased decommissioning services revenues, including those from the TETRA Hedron heavy lift barge purchased during 2011, were more than offset by decreased diving and abandonment revenue during the current year period. In addition to the continuing challenges of pricing pressures, reduced activity levels, reduced number of leased vessels, and project delays experienced by several of the Offshore Services segment's customers, the segment also experienced weather disruptions during the current year quarter as a result of Hurricane Isaac. In addition,

approximately \$2.6 million of prior year period revenues were associated with certain abandonment assets that were sold during the first quarter of 2012. Approximately \$5.8 million of Offshore Services revenues were from work performed for Maritech during the third quarter of 2012, compared to \$16.6 million of such work in the prior year period, as Maritech continues to decommission and abandon its remaining oil and gas platform structures. These intercompany revenues are eliminated in consolidation.

Gross profit for the Offshore Services segment during the third quarter of 2012 slightly decreased as compared to the prior year period, primarily due to decreased profitability in its diving services business and despite approximately \$3.2 million of due diligence and start up costs during the prior year period associated with the purchase of the TETRA Hedron. This decrease in profitability in the segment's diving services business is due to the continuing challenges in the Gulf of Mexico market, which has resulted in decreased pricing compared to the prior year period. This decrease was partially offset by increased profitability in the segment's decommissioning operations, mostly from the impact of the TETRA Hedron, which began operations in the fourth quarter of 2011, and from decreased operating expenses by the segment's offshore abandonment business. The Offshore Services segment has accelerated its cost reduction efforts. While there are indications that Gulf of Mexico federal permitting delays are decreasing, the segment is nevertheless focused on reducing its cost structure.

Offshore Services segment income before taxes decreased primarily due to increased administrative costs and due to reduced gross profit discussed above. Offshore Services administrative costs increased primarily due to increased worker's compensation related expenses incurred during the period.

Maritech Segment

	Three Months Ended						Period to Period Change			
	September 30,						2012 vs			
	2012		2011		2011		% Change			
(In Thousands, Except Percentages)										
Revenues	\$	1,305		\$	1,945		\$	(640)		(32.9)%
Gross profit (loss)		(8,927)			(14,369)			5,442		37.9%
Gross profit (loss) as a percentage of revenue		(684.1)%			(738.8)%					
General and administrative expense		457			724			(267)		(36.9)%
General and administrative expense as a percentage of revenue		35.0%			37.2%					
Interest (income) expense, net		9			41			(32)		
Other (income) expense, net		(162)			471			(633)		
Income (loss) before taxes and discontinued operations	\$	(9,231)		\$	(15,605)		\$	6,374		(40.8)%
Income (loss) before taxes and discontinued operations as a percentage of revenue		(707.4)%			(802.3)%					

As a result of the sale of almost all of its producing properties during 2011 and 2012, Maritech revenues for the third quarter of 2012 and 2011 are negligible and are expected to continue to be negligible.

Maritech gross loss decreased during the third quarter of 2012 compared to the prior year period, despite decreased revenues, primarily due to approximately \$5.2 million of decreased excess decommissioning expense associated with Maritech's remaining decommissioning liabilities.

The decrease in Maritech's pretax loss during the third quarter of 2012 compared to the prior year period is primarily due to the decreased gross loss discussed above and due to a decrease in administrative costs. This decrease in administrative expenses is due to the reduction in the segment's headcount, which more than offset the decrease in administrative costs billed to joint owners. In addition, adjustments to the gains on oil and gas property sales resulted in increased other income during the quarter compared to the prior year period.

Corporate Overhead

	Three Months Ended				Period to Period Change				
	September 30,								
	2012		2011		2012 vs 2011		% Change		
(In Thousands, Except Percentages)									
Gross profit (loss) (primarily depreciation expense)	\$	(771)		\$	(626)		\$	(145)	(23.2)%
General and administrative expense		10,442			8,314			2,128	25.6%
Interest (income) expense, net		4,281			4,050			231	
Other (income) expense, net		237			646			(409)	
(Loss) before taxes and discontinued operations	\$	(15,731)		\$	(13,636)		\$	(2,095)	(15.4)%

Corporate Overhead includes corporate general and administrative expense, interest income and expense, and other income and expense. Such expenses and income are not allocated to our operating divisions, as they relate to our general corporate activities. However, in connection with the public offering of common units in our Compressco Partners subsidiary, on June 20, 2011, we began allocating and charging Compressco Partners for its share of our corporate administrative costs directly related to Compressco Partners' activities. Corporate Overhead increased during the third quarter of 2012 compared to the prior year period, primarily due to increased general and administrative expenses, which was largely due to approximately \$2.1 million of increased salaries and equity compensation. This increase includes the impact of severance costs, including approximately \$0.7 million of equity compensation costs, associated with our previous chief financial officer. Interest expense increased due to increased borrowings during the third quarter of 2012. Other expense decreased due to increased foreign currency gains during the current year period.

Nine months ended September 30, 2012 compared with nine months ended September 30, 2011.

Consolidated revenues for the nine months ended September 30, 2012, decreased compared to the prior year period despite the growth and increased activity for many of our businesses. In particular, the acquisitions of Optima, ERS, and Greywolf contributed \$37.0 million of increased revenues for our Production Testing segment during the 2012 period, along with \$13.3 million of increased gross profit. In addition, our Production Testing segment also reported increased revenues compared to the prior year period due to increased domestic drilling activity, particularly in the shale reservoir markets it serves. Our Fluids segment's revenue and gross profit growth was also due to increased industry activity, which resulted in increased CBF product sales, and more than offset the decreased product sales by the segment's manufactured products businesses. Compressco also reported

increased revenues, primarily due to increased activity and demand in Latin America. These increased revenues were more than offset, however, by the \$74.3 million decrease in Maritech revenues due to the sale of substantially all of its oil and gas producing properties during 2011 and early 2012. In addition, increased Offshore Services revenues from third party customers as a result of the 2011 purchase of a heavy lift barge were largely offset by decreased diving and abandonment services revenue, and the segment's gross profit decreased primarily due to decreased diving and cutting services profitability. Overall gross profit increased, however, primarily due to significant impairments and excess decommissioning costs recorded by Maritech during the prior year period, as well as the increased profitability of our Fluids, Production Testing, and Compressco segments.

Consolidated general and administrative expenses increased by \$12.3 million during the first nine months of 2012 compared to the prior year period, primarily due to a \$5.8 million increase by our Production Testing segment, a \$3.9 million increase by our Compressco segment, and a \$2.6 million increase by our Corporate segment. Production Testing segment administrative expenses increased as a result of acquisitions completed during the first nine months of 2012, including approximately \$2.5 million of associated transaction costs. Compressco administrative expenses increased as a result of administrative and public company costs associated with Compressco Partners being a separate, publicly traded limited partnership. Corporate general and administrative expenses increased primarily due to personnel-related costs. These increases were partially offset by decreased Maritech administrative costs, which more than offset Maritech's decreased billings to joint owners. By type of cost, general and administrative expenses increased due to approximately \$8.6 million of increased employee related costs, approximately \$3.4 million of increased professional fee expenses, approximately \$0.7 million of increased insurance and taxes expense, and approximately \$0.9 million of increased office expenses. These increases in consolidated general and administrative expenses were partially offset by a decrease of approximately \$1.5 million of other general expenses, including decreased provision for doubtful accounts. The increased professional fee expenses included the \$2.5 million of acquisition transaction costs and \$0.4 million of increased Compressco public company costs.

Consolidated net interest expense increased by \$0.1 million compared to the prior year. This increase is due to increased borrowings during the third quarter, and such increase compared to the prior year period is expected to continue going forward.

Consolidated other income increased during the first nine months of 2012 compared to the prior year period, primarily due to \$14.2 million of hedge ineffectiveness losses recorded during the prior year period. Consolidated other income also includes approximately \$4.2 million of increased earnings from an unconsolidated joint venture compared to the prior year period. In addition, during the 2011 period, Maritech recorded gains on sales of its oil and gas properties, including approximately \$58.2 million from a sale of approximately 79% of its oil and gas producing properties during the second quarter of 2011. Gains on sales of assets during 2012 consist primarily of the \$4.1 million gain recorded by our Offshore Services segment during the first quarter from the sale of certain abandonment assets.

Our provision for income taxes decreased during the first nine months of 2012 compared to the prior year period due to decreased net earnings for the current year period, primarily as a result of the \$58.2 million gain from Maritech's sale of oil and gas properties in 2011.

Divisional Comparisons

Fluids Division

	Nine Months Ended				Period to Period Change				
	September 30,								
	2012		2011		2012 vs 2011		% Change

Income before taxes and discontinued operations as a percentage of revenue		13.9%			10.3%				

The increase in Fluids Division revenues during the first nine months of 2012 compared to the prior year period was primarily due to a \$16.1 million net increase in product sales revenues. This increase was due to approximately \$28.4 million of increased clear brine fluids (CBFs) product sales revenues primarily due to increased domestic offshore well completion activity. This increase in CBF sales was partially offset by approximately \$12.2 million of decreased revenue from manufactured products, primarily from decreased industrial demand due to weather and due to the reduced sales of dry calcium chloride following the shutdown of our Lake Charles pellet plant during mid-2011. The net increase in product sales revenues was partially offset by a \$3.4 million decrease in services revenues due to decreased domestic frac water service activity in certain of the Division's shale reservoir markets compared to the prior year.

Fluids Division gross profit increased compared to the prior year period primarily as a result of the increased domestic CBF revenues discussed above and from increased efficiency at our El Dorado, Arkansas, calcium chloride plant. These increases were partially offset by decreased gross profit from the Division's European manufactured products operation, which was impacted by the decreased demand discussed above. In addition, the Division's European calcium chloride plant experienced reduced production levels and higher costs during the third quarter of 2012 associated with equipment repairs and the partial shut down of its calcium chloride plant.

Fluids Division income before taxes increased compared to the prior year period due to the increase in gross profit discussed above and increased other income, despite increased administrative costs. Other income increased primarily due to increased income from an unconsolidated joint venture and foreign currency exchange gains. Fluids Division administrative costs increased, primarily due to increased personnel-related costs.

Income before taxes and discontinued									

operations as a percentage of revenue		19.3%			24.2%									

Production Testing revenues increased during the first nine months of 2012 as compared to the prior year period primarily due to an increase of approximately \$37.0 million from the acquisitions of Optima, ERS, and Greywolf during 2012. These acquisitions have resulted in the Production Testing segment increasing its scope of services and expanding its operations into strategic geographic markets. In addition, the segment reflected revenues from increased domestic drilling in many of the segment’s shale reservoir markets compared to the prior year period. These increases, along with increased revenues from the segment’s Eastern Hemisphere operations, were partially offset by decreased revenues in Mexico, where demand for certain of the segment’s production testing services has decreased and been offset, on a consolidated basis, by increased demand for well monitoring services by our Compressco segment.

Production Testing segment gross profit increased during the first nine months of 2012 compared to the prior year period, primarily due to approximately \$13.3 million of increased gross profit from the acquisitions discussed above. Excluding the increased gross profit from these acquisitions, the impact from increased domestic activity was more than offset by increased operating expenses. In addition, profitability of the segment’s international operations decreased compared to the prior year period as a result of the decreased production testing activity in Mexico.

Production Testing income before taxes increased due to the increased gross profit discussed above, as well as due to increased other income, which was primarily due to increased earnings from an unconsolidated joint venture and from increased foreign currency gains. These increases were partially offset by increased

administrative expenses resulting from increased personnel-related costs associated with the acquisitions, as well as approximately \$2.5 million of acquisition transaction costs expensed during the period.

Compressco Segment

	Nine Months Ended						Period to Period Change			
	September 30,						2012 vs 2011	% Change		
	2012		2011							
(In Thousands, Except Percentages)										
Revenues	\$	76,871		\$	69,210		\$	7,661		11.1%
Gross profit		28,928			22,332			6,596		29.5%
Gross profit as a percentage of revenue		37.6%			32.3%					
General and administrative expense		13,728			9,836			3,892		39.6%
General and administrative expense as a percentage of revenue		17.9%			14.2%					
Interest (income) expense, net		2			(11)			13		
Other (income) expense, net		687			818			(131)		
Income before taxes and discontinued operations	\$	14,511		\$	11,689		\$	2,822		24.1%
Income before taxes and discontinued operations as a percentage of revenue		18.9%			16.9%					

The increase in Compressco revenues compared to the prior year period was primarily due to an increase of \$12.3 million of service revenues resulting from increased activity, particularly in Latin America. While there are uncertainties in Latin America that could affect operations, including the renewal of certain customer contracts, we expect revenues from our Latin American operations to continue to exceed the corresponding prior year period. Partially offsetting this increase was a \$4.6 million decrease from sales of compressor units and parts during the first nine months of 2012 compared to the prior year period. Compressco has expanded its fleet in Latin America to serve the increasing demand.

Compressco gross profit increased during the first nine months of 2012 compared to the prior year period, primarily due to the increased Latin America activity discussed above, an increase in overall average compressor unit utilization from 75.7% to 81.9%, and also due to continuing reductions in domestic operating expenses.

Income before taxes for Compressco increased during the first nine months of 2012 compared to the prior year period due to the increased gross profit discussed above, despite increased administrative expenses. Compressco's administrative expenses reflect increased administrative staff and professional fee expenses associated with being a separate publicly traded limited partnership. In addition, administrative expenses during the current year period reflect increased equity compensation expense arising from current year equity grants by Compressco Partners and the impact of a severance agreement. In addition, beginning in June 2011, general and administrative expense also includes the allocation of a portion of our corporate administrative expenses to Compressco Partners pursuant to our Omnibus Agreement with Compressco Partners.

Offshore Division

Offshore Services Segment

Income before taxes and discontinued operations	\$	22,839		\$	22,667		\$	172	0.8%
Income before taxes and discontinued operations as a percentage of revenue		11.2%			10.0%				

Revenues from our Offshore Services segment decreased during the first nine months of 2012 compared to the prior year period, primarily due to a decrease in the work performed for Maritech during the current year period. Increased decommissioning services revenues, including those from the heavy lift barge purchased during 2011, were partially offset by decreased diving, abandonment, and cutting services revenues during the current year period. In addition to the continuing challenges of pricing pressures, reduced activity levels, reduced number of leased vessels, and project delays experienced by several of the Offshore Services segment's customers, the segment also experienced weather disruptions during the current year period, particularly from Tropical Storm Debby and Hurricane Isaac. Diving services revenues were also negatively affected by certain vessel repairs scheduled during the first quarter of the current year period. In addition, revenues decreased due to the 2011 and early 2012 sales of certain of the segment's abandonment assets and operations, which generated approximately \$11.8 million in revenues during the prior year period. Approximately \$25.5 million of Offshore Services revenues were from work performed for Maritech during the first nine months of 2012, compared to \$50.7 million of such work in the prior year period. Maritech plans to continue to aggressively decommission and abandon its remaining oil and gas platform structures. These intercompany revenues are eliminated in consolidation.

Gross profit for the Offshore Services segment during the first nine months of 2012 decreased as compared to the prior year period, despite approximately \$5.5 million of due diligence and start up costs during the prior year period associated with the purchase of the TETRA Hedron. This decrease in gross profit was primarily due to decreased profitability of our diving and cutting services operations, which largely resulted from decreased pricing during the current year period. These decreases were partially offset by improved profitability of our abandonment operations. The Offshore Services segment has accelerated its cost reduction efforts. While there are indications that Gulf of Mexico federal permitting delays are decreasing, the segment is nevertheless focused on reducing its cost structure.

Offshore Services segment income before taxes increased slightly in the current year period, as the reduced gross profit discussed above and the increased general and administrative expenses were offset by the gain on the sale of certain abandonment assets that generated approximately \$4.1 million of other income during the first quarter of 2012.

Maritech Segment

	Nine Months Ended				Period to Period Change			
	September 30,				2012 vs 2011		% Change	
	2012	2011						
	(In Thousands, Except Percentages)							
Revenues	\$ 5,099	\$ 79,349			\$ (74,250)			(93.6)%
Gross profit (loss)	(17,684)	(33,683)			15,999			47.5%

Interest (income) expense, net	10	61			(51)			
Other (income) expense, net	420	(56,893)			57,313			

Edgar Filing: TETRA TECHNOLOGIES INC - Form 10-Q

Income (loss) before taxes and discontinued operations	\$ (19,938)		\$ 18,398		\$ (38,336)		(208.4)%
Income (loss) before taxes and discontinued operations as a percentage of revenue	(391.0)%		23.2%				

Maritech revenues decreased significantly during the first nine months of 2012 compared to the prior year period due to the sale of substantially all of its oil and gas reserves during 2011 and early 2012. In particular, the May 31, 2011, sale of oil and gas properties resulted in the sale of approximately 79% of Maritech's proven reserves. Following the sales of almost all of its producing properties, Maritech revenues are expected to continue to be negligible.

Maritech gross loss decreased during the first nine months of 2012 compared to the prior year period, primarily due to reduced operating and depletion expenses associated with the sold properties. In addition, Maritech recorded \$12.5 million of impairments and approximately \$19.2 million of higher excess decommissioning costs associated with Maritech's remaining decommissioning liabilities during the prior year period.

Maritech reported a pretax loss during the first nine months of 2012 compared to pretax income during the prior year period, primarily due to approximately \$56.6 million (\$58.5 million consolidated) of gains from sales of producing properties reported in the prior year period. This decrease in other income was partially offset by the decreased gross loss discussed above. In addition, Maritech reported decreased net administrative expenses during the current year period, primarily due to the reduction in its headcount following the sale of properties, and this decrease more than offset the decrease in administrative costs billed to joint owners.

Corporate Overhead

	Nine Months Ended				Period to Period Change			
	September 30,				2012 vs 2011		% Change	
	2012	2011						
	(In Thousands, Except Percentages)							
Gross profit (loss) (primarily depreciation expense)	\$ (2,254)	\$ (1,999)			\$ (255)			(12.8)%
General and administrative expense	29,600	26,964			2,636			9.8%
Interest (income) expense, net	12,391	12,315			76			
Other (income) expense, net	1,744	15,475			(13,731)			
(Loss) before taxes and discontinued operations	\$ (45,989)	\$ (56,753)			\$ 10,764			19.0%

Corporate Overhead includes corporate general and administrative expense, interest income and expense, and other income and expense. Such expenses and income are not allocated to our operating divisions, as they relate to our general corporate activities. However, in connection with the public offering of common units in our Compressco Partners subsidiary, on June 20, 2011, we began allocating and charging Compressco Partners for its share of our corporate administrative costs directly related to Compressco Partners' activities. Corporate Overhead decreased during the first nine months of 2012 compared to the prior year period. General and administrative expenses increased, largely due to approximately \$1.9 million of increased salaries and equity compensation, which includes the impact of severance costs associated with our previous chief financial officer. In addition, professional fee expenses increased approximately \$0.8 million and office expenses increased by approximately \$0.2 million. These increases were partially offset by approximately \$0.4 million of decreased tax expenses. The increase in administrative expenses was more than offset by decreased other expense, primarily resulting from a \$13.9 million hedge ineffectiveness loss during the 2011 period. This hedge ineffectiveness loss was mainly due to the April 2011 liquidation of hedge derivative contracts, following the planned sale of a significant portion of Maritech oil and gas producing properties, which resulted in a \$14.2 million charge to corporate other expense for hedge ineffectiveness during the second quarter of 2011.

Liquidity and Capital Resources

Our growth strategy includes the pursuit of suitable acquisitions and other opportunities to expand operations. During the nine month period ending September 30, 2012, we have spent approximately \$163.0 million of cash on acquisitions. In March 2012, we spent approximately \$65.0 million from our available cash to acquire the common stock of Optima, a provider of rig cooling services and associated products that suppress heat generated by high-rate

flaring of hydrocarbons during well test operations. In April 2012, we spent an additional \$42.5 million of our available cash to acquire the assets and operations of ERS, a domestic production testing and after-frac flow back operation. In July 2012, we spent an additional \$55.5 million from available cash and borrowings to acquire the assets and operations of Greywolf, a North American production testing and after-frac flow back operation. Each of these acquisitions has significantly and strategically expanded our Production Testing segment's operations. To fund the acquisition of Greywolf in the third quarter of 2012, we borrowed \$38.0 million along with an additional \$6.3 million and 10.0 million euros (approximately \$12.9 million equivalent at September 30, 2012) for general corporate purposes pursuant to our revolving credit facility. In addition to funding these acquisitions, during the nine months ended September 30, 2012, we spent \$80.6 million on additional capital expenditures for our existing businesses. Subsequent to September 30, 2012, and through November 9, 2012, we borrowed an additional \$13.7 million from our revolving credit facility for general corporate working capital purposes. Our future operating cash flows, as well as revenues and profitability levels, are largely dependent on the level of oil and gas industry activity in the markets we serve and are significantly affected by oil and natural gas commodity prices. Given that these commodity prices have decreased from late 2011 levels, our capital expenditure and acquisition plans are being reviewed carefully in light of the activity levels of our businesses. Although the use of approximately \$163.0 million of cash on the above acquisitions significantly changes our liquidity position compared to December 31, 2011, we continue to have significant capital resources, including \$198.6 million in availability under our revolving credit facility as of November 9, 2012.

Operating Activities

Cash flows used by operating activities totalled \$17.4 million during the first nine months of 2012 compared to \$48.4 million of cash generated by operating activities during the prior year period, a decrease of \$65.8 million. This decrease in operating cash flows during 2012 compared to the prior year period primarily reflects decreased earnings, the increased use of operating cash flows for working capital during the current year period, and the sale by Maritech of substantially all of its oil and gas properties during the first nine months of 2011. Increased cash used for working capital during the first nine months of 2012 compared to the prior year period was mainly as a result of increased accounts receivable balances and the collection of federal tax refunds during the 2011 period.

During the past three years, Maritech has performed an extensive amount of well abandonment and decommissioning work associated with its offshore oil and gas production wells, platforms, and facilities. As of September 30, 2012, and following the sale of substantially all of its oil and gas producing properties, the estimated third-party discounted value, including an estimated profit, of Maritech's decommissioning liabilities totalled \$92.2 million. Our future operating cash flow will continue to be affected by the actual timing and amount of Maritech's decommissioning expenditures. Approximately \$75.8 million of the cash outflow necessary to extinguish Maritech's remaining decommissioning liability is expected to occur over the twelve month period ending September 30, 2013. Included in Maritech's decommissioning liabilities is the remaining abandonment, decommissioning, and debris removal associated with one offshore platform that was previously destroyed by hurricanes. Due to the unique nature of the remaining work to be performed associated with this downed platform, actual costs could greatly exceed these estimates and, depending on the nature of any excess costs incurred, could result in significant charges to earnings in future periods.

In some cases, the previous owners of properties that were acquired by Maritech are contractually obligated to pay Maritech a fixed amount for the well abandonment and decommissioning work on these properties as the work is performed, which will partially offset Maritech's future expenditures. Maritech's estimated decommissioning liabilities are net of amounts allocable to joint interest owners and any contractual amounts to be paid by the previous owners of the properties. As of September 30, 2012, Maritech's total decommissioning obligation is approximately \$94.0 million, which includes Maritech's total liability of \$92.2 million plus approximately \$1.8 million of such contractual reimbursement arrangements with the previous owners. An additional \$18.8 million of such contractual reimbursement arrangements as of September 30, 2012, is classified as receivable assets related to amounts waiting to be invoiced and collected.

Demand for a large portion of our products and services is driven by oil and gas industry activity, which is affected by oil and natural gas commodity pricing. Given that North American natural gas prices have decreased during the past year, drilling activity related to natural gas wells in North America has decreased. While only a portion of our revenues are related to gas drilling activity, we are exposed to the impact that this decreased demand could have on our businesses. In particular, our Production Testing, Compressco, and Fluids segments are vulnerable to the impact of a sustained low natural gas price environment. In addition, decreases in worldwide crude oil prices during 2012 could also affect future overall industry drilling activity in certain of the regions in which we operate. If oil or gas industry activity levels decrease further in the future, our levels of operating cash flows may be negatively affected.

We are subject to operating hazards normally associated with onshore and offshore oilfield service operations, including fires, explosions, blowouts, cratering, mechanical problems, abnormally pressured formations, and accidents that cause harm to the environment. We maintain various types of insurance that are designed to be applicable in the event of an explosion or other catastrophic event involving our offshore operations. This insurance includes third-party liability, workers' compensation and employers' liability, general liability, vessel pollution liability, and operational risk coverage for our Maritech oil and gas properties, including removal of debris, operator's extra expense, control of well, and pollution and clean up coverage. Our insurance coverage is subject to deductibles that must be satisfied prior to recovery. Additionally, our insurance is subject to certain exclusions and limitations. We believe our policy of insuring against such risks, as well as the levels of insurance we maintain, is typical in the industry. In addition, we provide services and products in the offshore Gulf of Mexico generally pursuant to agreements that create insurance and indemnity obligations for both parties. Our Maritech subsidiary maintains a formalized oil spill response plan that is submitted to the BSEE. Maritech has designated third-party contractors in place to ensure that resources are available as required in the event of an environmental accident. While it is impossible to anticipate every potential accident or incident involving our offshore operations, we believe we have taken appropriate steps to mitigate the potential impact of such an event on the environment in the regions in which we operate.

Investing Activities

During the first nine months of 2012, the total amount of our net cash utilized on investing activities was \$227.9 million and included \$163.0 million for the acquisitions of Optima, ERS and Greywolf in March 2012, April 2012 and July 2012, respectively. In addition to cash spent on acquisitions, total cash capital expenditures during the first nine months of 2012 were \$80.6 million. Approximately \$21.3 million of our capital expenditures during the first nine months of 2012 was spent by our Fluids Division, the majority of which related to the purchase of new equipment to support its onshore completion services business. Our Production Enhancement Division spent approximately \$47.8 million of capital expenditures, consisting of approximately \$29.7 million by the Production Testing segment to add or replace a portion of its production testing equipment fleet, and approximately \$18.2 million by the Compressco segment for the upgrade and expansion of its wellhead compressor and equipment fleet. Our Offshore Services segment spent approximately \$10.3 million for costs on its various heavy lift and dive support vessels. Corporate capital expenditures were approximately \$0.8 million.

Generally, a significant majority of our planned capital expenditures is related to identified opportunities to grow and expand our existing businesses (other than Maritech). However, certain of these planned expenditures may be postponed or cancelled in an effort to conserve capital. Although our planned level of capital expenditures during the remainder of 2012 is subject to the impact of acquisitions and future market conditions, we currently plan to expend up to \$115 million on total capital expenditures (excluding acquisitions) during the current year. The deferral of capital projects could affect our ability to compete in the future. As reflected by our recent acquisitions of Optima, ERS, and Greywolf, our long-term growth strategy also continues to include the pursuit of suitable acquisitions or opportunities to expand operations in oil and gas service markets. To the extent we consummate an additional significant acquisition transaction or other capital project, our liquidity position and capital plans will be affected.

Financing Activities

To fund our capital and working capital requirements, we may supplement our existing cash balances and cash flow from operating activities as needed from long-term borrowings, short-term borrowings, equity issuances, and other sources of capital.

Our Bank Credit Facilities

We have a revolving credit facility with a syndicate of banks pursuant to a credit facility agreement that was most recently amended in October 2010 (the Credit Agreement). As of November 9, 2012, we had an outstanding balance on the revolving credit facility of approximately \$71.0 million, and had \$8.4 million in letters of credit and guarantees against the \$278 million revolving credit facility, leaving a net availability of \$198.6 million. In addition, the amended credit facility agreement allows us to increase the facility by \$150 million, up to a \$428 million limit, with the

agreement of the lenders and the satisfaction of certain conditions. Included in the approximately \$71.0 million outstanding borrowings under the credit facility agreement is approximately \$13.0 million equivalent denominated in euros, which has been designated as a hedge of the net investment in our European operations.

Under the Credit Agreement, which matures on October 29, 2015, the revolving credit facility is unsecured and guaranteed by certain of our material U.S. subsidiaries (excluding Compressco). Borrowings generally bear interest at the British Bankers Association LIBOR rate plus 1.5% to 2.5%, depending on one of our financial ratios. We pay a commitment fee ranging from 0.225% to 0.500% on unused portions of the facility. The Credit Agreement contains customary covenants and other restrictions, including certain financial ratio covenants based on our levels of debt and interest cost compared to a defined measure of our operating cash flows over a twelve month period. In addition, the Credit Agreement includes limitations on aggregate asset sales, individual acquisitions, and aggregate annual acquisitions and capital expenditures. Access to our revolving credit line is dependent upon our compliance with the financial ratio covenants set forth in the Credit Agreement. Significant deterioration of the financial ratios could result in a default by us under the Credit Agreement and, if not remedied, could result in termination of the agreement and acceleration of any outstanding balances. Compressco is an unrestricted subsidiary and is not a borrower or a guarantor under our bank credit facility.

The Credit Agreement includes cross-default provisions relating to any other indebtedness greater than a defined amount. If any such indebtedness is not paid or is accelerated and such event is not remedied in a timely manner, a default will occur under the Credit Agreement. Our Credit Agreement also contains a covenant that restricts us from paying dividends in the event of a default or if such payment would result in an event of default. We are in compliance with all covenants and conditions of our Credit Agreement as of September 30, 2012. Our

continuing ability to comply with these financial covenants depends largely upon our ability to generate adequate cash flow. Historically, our financial performance has been more than adequate to meet these covenants, and we expect this trend to continue.

Our European Credit Agreement

We also have a bank line of credit agreement covering the day to day working capital needs of certain of our European operations (the European Credit Agreement). The European Credit Agreement provides borrowing capacity of up to 5 million euros (approximately \$6.4 million equivalent as of September 30, 2012), with interest computed on any outstanding borrowings at a rate equal to the lender's Basis Rate plus 0.75%. The European Credit Agreement is cancellable by either party with 14 business days' notice and contains standard provisions in the event of default. As of September 30, 2012, we had no borrowings outstanding pursuant to the European Credit Agreement.

Compressco Partners' Bank Credit Facility

On June 24, 2011, Compressco Partners entered into a credit agreement (the Partnership Credit Agreement) with JPMorgan Chase Bank, N.A. Under the Partnership Credit Agreement, Compressco Partners, along with certain of its subsidiaries, are borrowers, and all of its existing and future, direct and indirect, domestic subsidiaries are guarantors. We are not a borrower or a guarantor under the Partnership Credit Agreement. The Partnership Credit Agreement includes borrowing capacity of \$20.0 million (less \$3.0 million that is required to be set aside as a reserve that cannot be borrowed) that is available for letters of credit (with a sublimit of \$5.0 million) and an uncommitted \$20.0 million expansion feature. The Partnership Credit Agreement may be used to fund Compressco Partners' working capital needs, letters of credit, and for general partnership purposes, including capital expenditures and acquisitions. The Partnership Credit Agreement could also be used to fund Compressco Partners' quarterly distributions. Borrowings under the Partnership Credit Agreement are subject to the satisfaction of customary conditions, including the absence of a default. As of September 30, 2012, \$5.8 million was outstanding under the Partnership Credit Agreement and Compressco Partner's has net availability under its revolving credit facility of \$10.9 million based upon a \$16.7 million borrowing capacity and the \$5.8 million outstanding balance. The maturity date of the Partnership Credit Agreement is June 24, 2015.

All obligations under the Partnership Credit Agreement and the guarantees of those obligations are secured, subject to certain exceptions, by a first lien security interest in substantially all of the assets (excluding real property) of Compressco Partners and its existing and future, direct and indirect domestic subsidiaries, and all of the capital stock of its existing and future, direct and indirect subsidiaries (limited, in the case of foreign subsidiaries, to 65% of the capital stock of first tier foreign subsidiaries).

Borrowings under the Partnership Credit Agreement bear interest at a rate per annum equal to, at Compressco Partners' option, either (a) British Bankers Association LIBOR (adjusted to reflect any required bank reserves) for an interest period equal to one, two, three, or six months (as we select) plus a margin of 2.25% per annum or (b) a base rate determined by reference to the highest of (1) the prime rate of interest announced from time to time by JPMorgan Chase Bank, N.A. or (2) British Bankers Association LIBOR (adjusted to reflect any required bank reserves) for a one-month interest period on such day plus 2.50% per annum. In addition to paying interest on any outstanding principal under the Partnership Credit Agreement, Compressco Partners is required to pay customary collateral monitoring fees and letter of credit fees, including without limitation, a letter of credit fee equal to the applicable margin on revolving credit LIBOR loans and fronting fees.

The Partnership Credit Agreement requires Compressco Partners to maintain a minimum interest coverage ratio (ratio of earnings before interest and taxes to interest) of 2.5 to 1.0 as of the last day of any fiscal quarter, calculated on a trailing four quarter basis, whenever availability is less than \$5 million. In addition, the Partnership Credit Agreement includes customary negative covenants, which, among other things, limit Compressco Partners' ability to incur additional debt, incur, or permit certain liens to exist, or make certain loans, investments, acquisitions, or other restricted payments. The Partnership Credit Agreement provides that Compressco Partners can make distributions to holders of its common and subordinated units, but only if there is no default or event of default under the facility. If an event of default occurs, the lenders are entitled to take various actions, including the acceleration of amounts due under the Partnership Credit Agreement and all actions permitted to be taken by secured creditors.

Senior Notes

In April 2006, we issued \$90.0 million in aggregate principal amount of Series 2006-A Senior Notes pursuant to our existing Master Note Purchase Agreement dated September 2004, as supplemented as of April 18, 2006. The Series 2006-A Senior Notes bear interest at the fixed rate of 5.90% and mature on April 30, 2016. Interest on the 2006-A Senior Notes is due semiannually on April 30 and October 30 of each year.

In April 2008, we issued \$35.0 million in aggregate principal amount of Series 2008-A Senior Notes and \$90.0 million in aggregate principal amount of Series 2008-B Senior Notes (collectively the Series 2008 Senior Notes) pursuant to a Note Purchase Agreement dated April 30, 2008. The Series 2008-A Senior Notes bear interest at the fixed rate of 6.30% and mature on April 30, 2013. The Series 2008-B Senior Notes bear interest at the fixed rate of 6.56% and mature on April 30, 2015. Interest on the Series 2008 Senior Notes is due semiannually on April 30 and October 31 of each year. We anticipate funding the repayment of the Series 2008-A Senior Notes in April 2013 with available cash balances, borrowings under our revolving credit facility, or through the issuance of additional debt instruments.

In December 2010, we issued \$65.0 million in aggregate principal amount of Series 2010-A Senior Notes and \$25.0 million in aggregate principal amount of Series 2010-B Senior Notes (collectively, the 2010 Senior Notes) pursuant to a Note Purchase Agreement dated September 30, 2010. The Series 2010-A Senior Notes bear interest at the fixed rate of 5.09% and mature on December 15, 2017. The Series 2010-B Senior Notes bear interest at the fixed rate of 5.67% and mature on December 15, 2020. Interest on the Series 2010 Senior Notes is due semiannually on June 15 and December 15 of each year.

Each of the Senior Notes was sold in the United States to accredited investors pursuant to an exemption from the Securities Act of 1933. We may prepay the Senior Notes, in whole or in part, at any time at a price equal to 100% of the principal amount outstanding, plus accrued and unpaid interest and a “make-whole” prepayment premium. The Senior Notes are unsecured and are guaranteed by substantially all of our wholly owned U.S. subsidiaries. The Note Purchase Agreement and the Master Note Purchase Agreement, as supplemented, contain customary covenants and restrictions and require us to maintain certain financial ratios, including a minimum level of net worth and a ratio between our long-term debt balance and a defined measure of operating cash flow over a twelve month period. The Note Purchase Agreement and the Master Note Purchase Agreement also contain customary default provisions as well as a cross-default provision relating to any other of our indebtedness of \$20 million or more. We are in compliance with all covenants and conditions of the Note Purchase Agreement and the Master Note Purchase Agreement as of September 30, 2012. Upon the occurrence and during the continuation of an event of default under the Note Purchase Agreement and the Master Note Purchase Agreement, as supplemented, the Senior Notes may become immediately due and payable, either automatically or by declaration of holders of more than 50% in principal amount of the Senior Notes outstanding at the time.

Other Sources and Uses

In addition to the aforementioned revolving credit facilities, we fund our short-term liquidity requirements from cash generated by operations and from short-term vendor financing. Should additional capital be required, we believe that we have the ability to raise such capital through the issuance of additional debt or equity. However, instability or volatility in the capital markets at the times we need to access capital may affect the cost of capital and the ability to raise capital for an indeterminable length of time. As discussed above, our Credit Agreement matures in 2015, and our Senior Notes mature at various dates between April 2013 and December 2020. The replacement of these capital sources at similar or more favorable terms is not certain. If it is necessary to issue equity to fund our capital needs, dilution to our common stockholders will occur.

Compressco Partners' Partnership Agreement requires that within 45 days after the end of each quarter, it distribute all of its available cash, as defined in the Partnership Agreement, to its unitholders of record on the applicable record date. For the nine months ended September 30, 2012, net of distributions paid to us, Compressco Partners distributed approximately \$3.4 million to its public unitholders.

Off Balance Sheet Arrangements

As of September 30, 2012, we had no "off balance sheet arrangements" that may have a current or future material effect on our consolidated financial condition or results of operations.

Commitments and Contingencies

Litigation

We are named defendants in several lawsuits and respondents in certain governmental proceedings arising in the ordinary course of business. While the outcome of lawsuits or other proceedings against us cannot be predicted with certainty, management does not reasonably expect these matters to have a material adverse impact on our financial position, results of operations, or liquidity.

Environmental

One of our subsidiaries, TETRA Micronutrients, Inc. (TMI), previously owned and operated a production facility located in Fairbury, Nebraska. TMI is subject to an Administrative Order on Consent issued to American Microtrace, Inc. (n/k/a/ TETRA Micronutrients, Inc.) in the proceeding styled *In the Matter of American Microtrace Corporation*, EPA I.D. No. NED00610550, Respondent, Docket No. VII-98-H-0016, dated September 25, 1998 (the Consent Order), with regard to the Fairbury facility. TMI is liable for future remediation costs and ongoing environmental monitoring at the Fairbury facility under the Consent Order; however, the current owner of the Fairbury facility is responsible for costs associated with the closure of that facility.

Cautionary Statement for Purposes of Forward-Looking Statements

Certain statements contained herein and elsewhere may be deemed to be forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995 and are subject to the “safe harbor” provisions of that act, including, without limitation, statements concerning future or expected sales, earnings, costs, expenses, acquisitions or corporate combinations, including the recent sales of oil and gas properties and the anticipated benefits to be realized from these sales, asset recoveries, expected costs associated with damage from hurricanes and the ability to recover such costs under our insurance policies, the ability to obtain alternate sources of raw materials for certain of our calcium chloride facilities, working capital, capital expenditures, financial condition, other results of operations, the expected impact of current economic and capital market conditions on the oil and gas industry and our operations, our recent acquisitions and our ability to realize the anticipated benefits from such acquisitions, other statements regarding our beliefs, plans, goals, future events and performance, and other statements that are not purely historical. Such statements involve risks and uncertainties, many of which are beyond our control. Actual results could differ materially from the expectations expressed in such forward-looking statements. Some of the risk factors that could affect our actual results and cause actual results to differ materially from any such results that might be projected, forecast, estimated, or budgeted by us in such forward-looking statements are described in our Annual Report on Form 10-K for the year ended December 31, 2011, and are set forth from time to time in our filings with the Securities and Exchange Commission.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We will be exposed to the commodity price risk associated with Maritech's oil and natural gas production that we will continue to own until it is sold. Due to the minimal amount of expected production following the sale, such commodity price risk exposure is not expected to be significant.

Interest Rate Risk

As discussed above, in the third quarter of 2012, we borrowed \$44.3 million and 10.0 million euros (approximately \$12.9 million equivalent as of September 30, 2012) pursuant to our revolving credit facility, which included funding for a portion of the consideration for the acquisition of Greywolf. Also in July 2012, Compressco Partners borrowed \$5.8 million to fund the expansion and upgrade of its compressor and equipment fleet. In addition, subsequent to September 30, 2012, and through November 9, 2012, we borrowed \$13.7 for working capital and other general corporate purposes. Each of these borrowings was made under existing revolving credit facilities, and is subject to market risk exposure related to changes in applicable interest rates. Pursuant to these revolving credit facilities, borrowings will bear interest at an agreed-upon percentage rate spread above LIBOR.

The following table sets forth as of September 30, 2012, our principal cash flows for our long-term debt obligations (which bear a variable rate of interest) and weighted average effective interest rate by their expected maturity dates. We are not a party to an interest rate swap contract or other derivative instrument designed to hedge our exposure to interest rate fluctuation risk.

	Expected Maturity Date							Total	Fair Market Value
	2012	2013	2014	2015	2016	2017	Thereafter		
(In Thousands, Except Percentages)									
As of September 30, 2012									
Long-term debt:

Fixed pay rate	-	-	-	-	-	-	-	-	-
Variable receive rate	-	-	-	-	-	-	-	-	-

Exchange Rate Risk

We are exposed to fluctuations between the U.S. dollar and the euro with regard to our euro-denominated operating activities. In July 2012, we designated the 10.0 million euro borrowing described above as a hedge for our euro-denominated operations.

The following table sets forth as of September 30, 2012, our cash flows for our long-term debt obligations, which are denominated in euros. This information is presented in U.S. dollar equivalents. The table presents principal cash flows and related weighted average interest rates by its expected maturity dates. As described above, we utilize the long-term borrowings detailed in the following table as a hedge of our investment in Foreign operations and are currently not a party to a foreign currency swap contract or other derivative instrument designed to further hedge our currency exchange rate risk exposure.

	Expected Maturity Date		Fair
--	------------------------	--	------

	2012	2013	2014	2015	2016	2017	Thereafter	Total	Market Value

Item 4. Controls and Procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2012, the end of the period covered by this quarterly report.

There were no changes in our internal control over financial reporting that occurred during the fiscal quarter ended September 30, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II
OTHER INFORMATION

Item 1. Legal Proceedings.

We are named defendants in several lawsuits and respondents in certain governmental proceedings arising in the ordinary course of business. While the outcome of lawsuits or other proceedings against us cannot be predicted with certainty, management does not reasonably expect these matters to have a material adverse impact on our financial position, results of operations, or liquidity.

Environmental Proceedings

One of our subsidiaries, TETRA Micronutrients, Inc. (TMI), previously owned and operated a production facility located in Fairbury, Nebraska. TMI is subject to an Administrative Order on Consent issued to American Microtrace, Inc. (n/k/a/ TETRA Micronutrients, Inc.) in the proceeding styled *In the Matter of American Microtrace Corporation*, EPA I.D. No. NED00610550, Respondent, Docket No. VII-98-H-0016, dated September 25, 1998 (the Consent Order), with regard to the Fairbury facility. TMI is liable for future remediation costs and ongoing environmental monitoring at the Fairbury facility under the Consent Order; however, the current owner of the Fairbury facility is responsible for costs associated with the closure of that facility.

Item 1A. Risk Factors.

There have been no material changes in the information pertaining to our Risk Factors as disclosed in our Form 10-K for the year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) None.

(b) None.

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Maximum Number (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Publicly Announced Plans or Programs ⁽¹⁾
Jul 1 – Jul 31, 2012	14	(2) \$ 9.60	–	\$ 14,327,000
Aug 1 – Aug 31, 2012	532	(2) 6.91	–	14,327,000
