UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 2, 2017

OR
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-34166

SunPower Corporation

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

77 Rio Robles, San Jose, California

(Address of Principal Executive Offices and Zip Code)

94-3008969

(I.R.S. Employer Identification No.)

95134

(Zip Code)

(408) 240-5500

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

Edgar Filing: SUNPOWER CORP - Form 10-Q

(Do not check if a smaller reporting
company)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The total number of outstanding shares of the registrant's common stock as of July 28, 2017 was 139,491,294.

Table of Contents

Notes to the Consolidated Financial Statements

Note 1. THE COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company

SunPower Corporation (together with its subsidiaries, the "Company" or "SunPower") is a leading global energy company that delivers complete solar solutions to residential, commercial, and power plant customers worldwide through an array of hardware, software, and financing options and through utility-scale solar power system construction and development capabilities, operations and maintenance ("O&M") services, and "Smart Energy" solutions. SunPower's Smart Energy initiative is designed to add layers of intelligent control to homes, buildings and grids-all personalized through easy-to-use customer interfaces. Of all the solar cells commercially available to the mass market, the Company believes its solar cells have the highest conversion efficiency, a measurement of the amount of sunlight converted by the solar cell into electricity. SunPower Corporation is a majority-owned subsidiary of Total Solar International ("Total"), formerly Total Energies Nouvelles Activités USA, a subsidiary of Total S.A. ("Total S.A.") (see Note 2).

The Company's President and Chief Executive Officer, as the chief operating decision maker ("CODM"), has organized the Company, manages resource allocations and measures performance of the Company's activities among three end-customer segments: (i) Residential Segment, (ii) Commercial Segment and (iii) Power Plant Segment. The Residential and Commercial Segments combined are referred to as Distributed Generation.

The Company's Residential Segment refers to sales of solar energy solutions to residential end customers through a variety of means, including cash sales and long-term leases directly to end customers, sales to resellers, including the Company's third-party global dealer network, and sales of the Company's O&M services. The Company's Commercial Segment refers to sales of solar energy solutions to commercial and public entity end customers through a variety of means, including direct sales of turn-key engineering, procurement and construction ("EPC") services, sales to the Company's third-party global dealer network, sales of energy under power purchase agreements ("PPAs"), and sales of the Company's O&M services. The Power Plant Segment refers to the Company's large-scale solar products and systems business, which includes power plant project development and project sales, EPC services for power plant construction, power plant O&M services and component sales for power plants developed by third parties, sometimes on a multi-year, firm commitment basis.

Liquidity

The Company continues to face challenging industry conditions and a competitive environment. While the Company continues to focus on improving overall operating performance and liquidity, including managing cash flow and working capital, notably with cash savings resulting from restructuring actions and cost reduction initiatives put in place in the third and fourth quarters of 2016, the Company's net losses continued through the second quarter of 2017 and are expected to continue through 2017. The Company has the ability to enhance its available cash by borrowing up to \$95.0 million under its revolving credit facility with Credit Agricole pursuant to the Letter Agreement executed by the Company and Total S.A. on May 8, 2017 (see Note 2). However, the Company's \$300.0 million 0.75% senior convertible debentures due 2018 (the "0.75% debentures due 2018"), \$200.0 million of which are held by Total, mature on June 1, 2018. These events and conditions indicate the Company may not have the liquid funds necessary to repay the existing 0.75% debentures due 2018 at maturity and satisfy its estimated liquidity needs within the 12 months from the date of issuance of these interim financial statements. The Company has a history of successfully refinancing and extending the maturity date of its debts; however, there is no assurance that the 0.75% debentures due 2018 will be refinanced or their maturity extended to sufficiently meet the Company's obligations as they become due or on terms acceptable to the Company. Given its current share price compared to the conversion price of \$24.95 per share for the

0.75% debentures due 2018, the Company anticipates that bondholders will choose to select repayment in cash. Independent from the refinancing or repayment of the 0.75% debentures due 2018, the Company has decided to divest certain assets, such as its equity interest in 8point3 Group, and join the sale process initiated by First Solar, Inc. The Company anticipates that it could repay the 0.75% debentures due 2018 with proceeds from these divestitures. Regarding the 8point3 Group sale process, while the Company believes both parties are committed to proceeding, this transaction is in the early stages, and no final decision on any particular alternative has yet been reached. While the Company believes it is probable that it can effectively implement plans to sell its investment in 8point3 Group, which mitigates the conditions and events giving rise to uncertainty regarding repayment of the 0.75% debentures due 2018, there are a number of factors that may defer or otherwise limit the Company's ability to sell this investment including, among others, (i) final approval of a transaction, once a partner, structure, and price are finalized, by the Company's Board of Directors, (ii) legal and regulatory approvals, and (iii) approval by various classes of equity owners and/or the Board of Directors of 8point3 Energy Partners (or a subcommittee thereof), as required based on the final transaction structure. The

Table of Contents

Company believes it has sufficiently evaluated these conditions in concluding that the sale of the Company's equity interests in 8point3 Group is considered probable of occurring prior to the maturity of the 0.75% debentures due 2018. The Company cannot predict, with certainty, the outcome of its actions to generate liquidity, including the outcome of the 8point3 Group divestiture, or whether such actions would generate the necessary liquidity as currently anticipated to fulfill its obligations within the 12 months from the date of issuance of these interim financial statements.

Basis of Presentation and Preparation

Principles of Consolidation

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("United States" or "U.S.") and include the accounts of the Company, all of its subsidiaries and special purpose entities, as appropriate under consolidation accounting guidelines. Intercompany transactions and balances have been eliminated in consolidation. The assets of the special purpose entities that the Company establishes in connection with certain project financing arrangements for customers are not designed to be available to service the general liabilities and obligations of the Company.

Reclassifications

Certain prior period balances have been reclassified to conform to the current period presentation in the Company's consolidated financial statements and the accompanying notes. Such reclassifications had no effect on previously reported results of operations or accumulated deficit.

Fiscal Years

The Company has a 52-to-53-week fiscal year that ends on the Sunday closest to December 31. Accordingly, every fifth or sixth year will be a 53-week fiscal year. Both fiscal 2017 and 2016 are 52-week fiscal years. The second quarter of fiscal 2017 ended on July 2, 2017, while the second quarter of fiscal 2016 ended on July 3, 2016. The second quarters of fiscal 2017 and 2016 were both 13-week quarters.

Management Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Significant estimates in these consolidated financial statements include percentage-of-completion for construction projects; allowances for doubtful accounts receivable and sales returns; inventory and project asset write-downs; stock-based compensation; estimates for valuation assumptions including discount rates, future cash flows and economic useful lives of property, plant and equipment, valuations for business combinations, other intangible assets, investments, and other long-term assets; fair value and residual value of solar power systems; fair value of financial instruments; valuation of contingencies and certain accrued liabilities such as accrued warranty; and income taxes and tax valuation allowances and indemnities. Actual results could materially differ from those estimates.

Recently Adopted Accounting Pronouncements

In November 2016, the Financial Accounting Standards Board ("FASB") issued an update to the standards to require companies to include amounts generally described as restricted cash and restricted cash equivalents in cash and cash equivalents when reconciling beginning-of-period and end-of-period total amounts shown on the statement of cash

flows. The new standard is effective for the Company no later than the first quarter of fiscal 2018. The Company elected early adoption of the updated accounting standard in the first quarter of fiscal 2017. The Company had restricted cash and cash equivalents held by various banks to secure our letter of credit facilities and deposits designated for the construction of various residential, commercial and power plant solar energy projects. The adoption of this accounting standard did not result in a significant impact to the Company's consolidated financial statements and related disclosures.

In October 2016, the FASB issued an update to the standards to amend how a reporting entity considers indirect interests held by related parties under common control when evaluating whether it is the primary beneficiary of a VIE. The Company adopted the updated accounting standard in the first quarter of fiscal 2017. Adoption of the new accounting standard did not have a material impact to the Company's consolidated financial statements.

Table of Contents

In October 2016, the FASB issued an update to the standards to require entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The new guidance is effective for the Company no later than the first quarter of fiscal 2018. The Company elected early adoption of the accounting standard in the first quarter of fiscal 2017, resulting in a cumulative-effect adjustment of a \$61.0 million increase in accumulated deficit as of January 1, 2017, with corresponding adjustments to Prepaid expenses and other current assets, and Other long-term assets of \$4.9 million and \$56.1 million, respectively.

In August 2016, the FASB issued an update to the standards to clarify the classification of certain cash receipts and cash payments in the statement of cash flows, including debt prepayment or extinguishment costs, settlement of contingent consideration arising from a business combination, insurance settlement proceeds, and distributions from certain equity method investees. The new guidance is effective for the Company no later than the first quarter of fiscal 2018. The Company elected early adoption of the updated accounting standard on a retrospective basis in the first quarter of fiscal 2017. The adoption of this updated accounting standard did not result in a significant impact to the Company's consolidated financial statements.

In March 2016, the FASB issued an update to the standards to simplify certain aspects of the accounting for share-based payment transactions to employees. The new standard requires excess tax benefits and tax deficiencies to be recorded in the statements of income as a component of the provision for income taxes when stock awards vest or are settled. In addition, it eliminates the requirement to reclassify cash flows related to excess tax benefits from operating activities to financing activities on the consolidated statements of cash flows. The standard also provides an accounting policy election to account for forfeitures as they occur, allows companies to withhold more of an employee's vesting shares for tax withholding purposes without triggering liability accounting, and clarifies that all cash payments made to tax authorities on an employee's behalf for withheld shares should be presented as a financing activity on the cash flows statement.

The Company adopted the new guidance in the first quarter of fiscal 2017. Upon adoption on a prospective basis, excess tax benefits or deficiencies from share-based award activity are reflected in the consolidated statements of income as a component of the provision for income taxes, whereas they were previously recognized in equity. The Company also elected to continue to estimate expected forfeitures to determine stock-based compensation expense and to present excess tax benefits as an operating activity in the statement of cash flows retrospectively. Adoption of the new accounting standard resulted in a decrease of net cumulative-effect adjustment of \$15.7 million, primarily related to the recognition of the previously unrecognized excess tax benefits which decreased the accumulated deficit with a corresponding adjustment to long-term tax liabilities as of January 1, 2017. The Company adopted the guidance on a modified retrospective basis.

In March 2016, the FASB issued an update to the standards to eliminate the retroactive adoption of the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. The new guidance is effective for the Company no later than the first quarter of fiscal 2017 and requires a prospective approach to adoption. The Company adopted the guidance in the first quarter of 2017, which impacted its investment in Dongfang Huansheng Photovoltaic (Jiangsu) Co., Ltd., given it qualified for equity method treatment during the quarter (see Note 9).

Recent Accounting Pronouncements Not Yet Adopted

In May 2017, the FASB issued an update to the standards to clarify which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. The new guidance is effective for the Company no later than the first quarter of 2018. Early adoption is permitted. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

In February 2017, the FASB issued new guidance to clarify the scope and application of the sale or transfer of nonfinancial assets to noncustomers, including partial sales and also defines what constitutes an “in substance nonfinancial asset” which can include financial assets. The new guidance eliminates several accounting differences between transactions involving assets and transactions involving businesses. Further, the guidance aligns the accounting for derecognition of a nonfinancial asset with that of a business. The new guidance is effective for the Company no later than the first quarter of 2018. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

In January 2017, the FASB issued an update to the standards to clarify the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The new guidance is effective for the Company no later than the first quarter of fiscal 2018 and requires a prospective approach to adoption. Early adoption is permitted. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

Table of Contents

In June 2016, the FASB issued an update to the standards to amend the methodology for measuring credit losses on financial instruments and the timing of when such losses are recorded. The new guidance is effective for the Company no later than the first quarter of fiscal 2020. Early adoption is permitted beginning in the first quarter of fiscal 2019. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

In February 2016, the FASB issued an update to the standards to require lessees to recognize a lease liability and a right-of-use asset for all leases (lease terms of more than 12 months) at the commencement date. The new guidance is effective for the Company no later than the first quarter of fiscal 2019 and requires a modified retrospective approach to adoption. Early adoption is permitted. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

In January 2016, the FASB issued an update to the standards to require equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee). The new guidance is effective for the Company no later than the first quarter of fiscal 2018 and upon adoption, an entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet at the beginning of the first reporting period in which the guidance is effective. Early adoption is permitted for the accounting guidance on financial liabilities under the fair value option. The Company is evaluating the potential impact of this standard on its consolidated financial statements and disclosures.

In May 2014, the FASB issued a new revenue recognition standard ("ASC 606") based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The FASB has issued several updates to the standard which i) clarify the application of the principal versus agent guidance; ii) clarify the guidance relating to performance obligations and licensing; and iii) clarify the assessment of the collectability criterion, presentation of sales taxes, measurement date for non-cash consideration and completed contracts at transaction; and iv) clarify narrow aspects of ASC 606 or corrects unintended application of the guidance. The new revenue recognition standard, amended by the updates, becomes effective for the Company in the first quarter of fiscal 2018 and is to be applied retrospectively using one of two prescribed methods. Early adoption is permitted. The Company will adopt ASC 606 on January 1, 2018 retrospectively, applying the amendments to each prior reporting period presented. The Company's ability to adopt retrospectively is dependent upon the completion of the analysis of information necessary to restate prior period financial statements and disclosures. The Company is in the process of reviewing historical contracts to quantify the impact of adoption on its consolidated financial statements. The Company is also in the process of assessing the appropriate changes to its business processes and upgrading its systems and controls to support recognition and disclosure under ASC 606.

The Company expects the adoption of ASC 606 to primarily affect its Power Plants and Commercial segments. Sales of solar power systems that include the sale or lease of related real estate, which occur under both segments, are currently accounted for under the guidance for real estate sales ("ASC 360-20"). ASC 360-20 requires the Company to evaluate whether such arrangements have any forms of continuing involvement that may affect the revenue or profit recognition of the transactions, including arrangements with prohibited forms of continuing involvement requiring us to reduce the potential profit on a project sale by our maximum exposure to loss. The Company anticipates that ASC 606, which supersedes the real estate sales guidance under ASC 360-20, will result in the earlier recognition of revenue and profit. In addition, the Company's investment in the 8point3 Group currently has a negative carrying value of \$78.8 million primarily as a result of profit deferred under ASC 360-20. Under ASC 606, the Company expects that a material amount of this deferred profit will have been recognized prior to January 1, 2018, and as a result the Company's carrying value in the 8point3 Group will materially increase upon adoption. The Company expects that

revenue recognition for our other sales arrangements, including the sales of components, sales and construction of solar systems, and operations and maintenance services, will remain materially consistent.

The Company continues to assess the potential impacts of the new standard, including the areas described above, and anticipates that this standard will have a material impact on its consolidated financial statements. However, the Company does not know or cannot reasonably estimate quantitative information, beyond that discussed above, related to the impact of the new standard on the financial statements at this time.

Note 2. TRANSACTIONS WITH TOTAL AND TOTAL S.A.

In June 2011, Total completed a cash tender offer to acquire 60% of the Company's then outstanding shares of common stock at a price of \$23.25 per share, for a total cost of approximately \$1.4 billion. In December 2011, the Company entered into a Private Placement Agreement with Total, under which Total purchased, and the Company issued and sold, 18.6 million

Table of Contents

shares of the Company's common stock for a purchase price of \$8.80 per share, thereby increasing Total's ownership to approximately 66% of the Company's outstanding common stock as of that date. As of July 2, 2017, through the increase of the Company's total outstanding common stock due to the exercise of warrants and issuance of restricted and performance stock units, Total's ownership of the Company's outstanding common stock has decreased to approximately 56%.

Supply Agreement

In November 2016, the Company and Total entered into a four-year, up to 200-MW supply agreement to support the solarization of Total facilities. The agreement covers the supply of 150 MW of E-series panels with an option to purchase up to another 50 MW of P-Series panels. In March 2017, the Company received a prepayment totaling \$88.5 million. The prepayment is secured by certain of the Company's assets located in the United States and in Mexico.

The Company recognizes revenue for the solar panels consistent with its revenue recognition policy for solar power components: when persuasive evidence of an arrangement exists, delivery of the product has occurred, title and risk of loss has passed to Total, the sales price is fixed or determinable, collectability of the resulting receivable is reasonably assured, and the risks and rewards of ownership have passed. In the second quarter of fiscal 2017, the Company started to supply Total with panels under the supply agreement and as of July 2, 2017, the Company had \$11.6 million of "Customer advances, current portion" and \$74.1 million of "Customer advances, net of current portion" on its Consolidated Balance Sheets related to the aforementioned supply agreement.

Amended and Restated Credit Support Agreement

In June 2016, the Company and Total S.A. entered into an Amended and Restated Credit Support Agreement (the "Credit Support Agreement") which amended and restated the Credit Support Agreement dated April 28, 2011 by and between the Company and Total S.A., as amended. Under the Credit Support Agreement, Total S.A. agreed to enter into one or more guarantee agreements (each a "Guaranty") with banks providing letter of credit facilities to the Company. At any time until December 31, 2018, Total S.A. will, at the Company's request, guarantee the payment to the applicable issuing bank of the Company's obligation to reimburse a draw on a letter of credit and pay interest thereon in accordance with the letter of credit facility between such bank and the Company. Such letters of credit must be issued no later than December 31, 2018 and expire no later than March 31, 2020. Total is required to issue and enter into a Guaranty requested by the Company, subject to certain terms and conditions. In addition, Total will not be required to enter into the Guaranty if, after giving effect to the Company's request for a Guaranty, the sum of (a) the aggregate amount available to be drawn under all guaranteed letter of credit facilities, (b) the amount of letters of credit available to be issued under any guaranteed facility, and (c) the aggregate amount of draws (including accrued but unpaid interest) on any letters of credit issued under any guaranteed facility that have not yet been reimbursed by the Company, would exceed \$500 million in the aggregate. Such maximum amounts of credit support available to the Company can be reduced upon the occurrence of specified events.

In consideration for the commitments of Total S.A. pursuant to the Credit Support Agreement, the Company is required to pay Total S.A. a guaranty fee for each letter of credit that is the subject of a Guaranty under the Credit Support Agreement and was outstanding for all or part of the preceding calendar quarter. The Credit Support Agreement will terminate following December 31, 2018, after the later of the satisfaction of all obligations thereunder and the termination or expiration of each Guaranty provided thereunder.

In addition to the Credit Support Agreement, the Company and Total S.A. entered into a letter agreement (the "Letter Agreement") in May 2017 to facilitate the issuance by Total S.A. of one or more guaranties of the Company's payment obligations (the "Guaranties") of up to \$100.0 million ("Support Amount") under the Amended and Restated

Revolving Credit Agreement with Credit Agricole Corporate and Investment Bank, as "Administrative Agent," and the other lenders party thereto; see Note 10 for additional information on the Amended and Restated Revolving Credit Agreement with Credit Agricole. In consideration for the commitments of Total S.A. pursuant to the Letter Agreement, the Company is required to pay a guarantor commitment fee of 0.50% per annum for the unutilized Support Amount and a guaranty fee of 2.35% per annum of the Guaranty outstanding. The maturity date of the Letter Agreement is August 26, 2019.

Affiliation Agreement

The Company and Total have entered into an Affiliation Agreement that governs the relationship between Total and the Company (the "Affiliation Agreement"). Until the expiration of a standstill period specified in the Affiliation Agreement (the "Standstill Period"), and subject to certain exceptions, Total, Total S.A., any of their respective affiliates and certain other related parties (collectively the "Total Group") may not effect, seek, or enter into discussions with any third-party regarding any transaction that would result in the Total Group beneficially owning shares of the Company in excess of certain thresholds, or

Table of Contents

request the Company or the Company's independent directors, officers or employees, to amend or waive any of the standstill restrictions applicable to the Total Group.

The Affiliation Agreement imposes certain limitations on the Total Group's ability to seek to effect a tender offer or merger to acquire 100% of the outstanding voting power of the Company and imposes certain limitations on the Total Group's ability to transfer 40% or more of the outstanding shares or voting power of the Company to a single person or group that is not a direct or indirect subsidiary of Total S.A. During the Standstill Period, no member of the Total Group may, among other things, solicit proxies or become a participant in an election contest relating to the election of directors to the Company's Board of Directors.

The Affiliation Agreement provides Total with the right to maintain its percentage ownership in connection with any new securities issued by the Company, and Total may also purchase shares on the open market or in private transactions with disinterested stockholders, subject in each case to certain restrictions.

The Affiliation Agreement also imposes certain restrictions with respect to the Company's and its Board of Directors' ability to take certain actions, including specifying certain actions that require approval by the directors other than the directors appointed by Total and other actions that require stockholder approval by Total.

Research & Collaboration Agreement

Total and the Company have entered into a Research & Collaboration Agreement (the "R&D Agreement") that establishes a framework under which the parties engage in long-term research and development collaboration ("R&D Collaboration"). The R&D Collaboration encompasses a number of different projects, with a focus on advancing the Company's technology position in the crystalline silicon domain, as well as ensuring the Company's industrial competitiveness. The R&D Agreement enables a joint committee to identify, plan and manage the R&D Collaboration.

Upfront Warrant

In February 2012, the Company issued a warrant (the "Upfront Warrant") to Total S.A. to purchase 9,531,677 shares of the Company's common stock with an exercise price of \$7.8685, subject to adjustment for customary anti-dilution and other events. The Upfront Warrant, which is governed by the Private Placement Agreement and a Compensation and Funding Agreement entered into in February 2012, is exercisable at any time for seven years after its issuance, provided that, so long as at least \$25.0 million in aggregate of the Company's convertible debt remains outstanding, such exercise will not cause any "person," including Total S.A., to, directly or indirectly, including through one or more wholly-owned subsidiaries, become the "beneficial owner" (as such terms are defined in Rule 13d-3 and Rule 13d-5 under the Securities Exchange Act of 1934, as amended), of more than 74.99% of the voting power of the Company's common stock at such time, a circumstance which would trigger the repurchase or conversion of the Company's existing convertible debt.

0.75% Debentures Due 2018

In May 2013, the Company issued \$300.0 million in principal amount of its 0.75% senior convertible debentures due 2018 (the "0.75% debentures due 2018"). \$200.0 million in aggregate principal amount of the 0.75% debentures due 2018 were acquired by Total. The 0.75% debentures due 2018 are convertible into shares of the Company's common stock at any time based on an initial conversion price equal to \$24.95 per share, which provides Total the right to acquire up to 8,017,420 shares of the Company's common stock. The applicable conversion rate may adjust in certain circumstances, including a fundamental change, as described in the indenture governing the 0.75% debentures due

2018.

0.875% Debentures Due 2021

In June 2014, the Company issued \$400.0 million in principal amount of its 0.875% senior convertible debentures due 2021 (the "0.875% debentures due 2021"). An aggregate principal amount of \$250.0 million of the 0.875% debentures due 2021 were acquired by Total. The 0.875% debentures due 2021 are convertible into shares of the Company's common stock at any time based on an initial conversion price equal to \$48.76 per share, which provides Total the right to acquire up to 5,126,775 shares of the Company's common stock. The applicable conversion rate may adjust in certain circumstances, including a fundamental change, as described in the indenture governing the 0.875% debentures due 2021.

4.00% Debentures Due 2023

13

Table of Contents

In December 2015, the Company issued \$425.0 million in principal amount of its 4.00% senior convertible debentures due 2023 (the "4.00% debentures due 2023"). An aggregate principal amount of \$100.0 million of the 4.00% debentures due 2023 were acquired by Total. The 4.00% debentures due 2023 are convertible into shares of the Company's common stock at any time based on an initial conversion price equal to \$30.53 per share, which provides Total the right to acquire up to 3,275,680 shares of the Company's common stock. The applicable conversion rate may adjust in certain circumstances, including a fundamental change, as described in the indenture governing the 4.00% debentures due 2023.

Joint Projects with Total and its Affiliates:

The Company enters into various EPC and O&M agreements relating to solar projects, including EPC and O&M services agreements relating to projects owned or partially owned by Total and its affiliates. As of July 2, 2017, the Company had \$2.6 million of "Billings in excess of costs and estimated earnings", \$0.3 million of "Costs and estimated earnings in excess of billings" and \$1.8 million of "Accounts receivable, net" on its Consolidated Balance Sheets related to projects in which Total and its affiliates have a direct or indirect material interest.

During the first quarter of fiscal 2017, in connection with a co-development project between SunPower and Total, Total paid \$0.5 million to the Company in exchange for the Company's ownership interest in the co-development project.

Related-Party Transactions with Total and its Affiliates:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Revenue:				
EPC, O&M, and components revenue under joint projects	\$3,051	\$20,613	\$7,183	\$61,529
Research and development expense:

Note 5. LEASING

Residential Lease Program

The Company offers a solar lease program, which provides U.S. residential customers with SunPower® systems under 20-year lease agreements that include system maintenance and warranty coverage. Leases are classified as either operating or sales-type leases in accordance with the relevant accounting guidelines.

Operating Leases

The following table summarizes "Solar power systems leased and to be leased, net" under operating leases on the Company's Consolidated Balance Sheets as of July 2, 2017 and January 1, 2017:

(In thousands)	As of	
	July 2, 2017	January 1, 2017
Solar power systems leased and to be leased, net ^{1,2} :		
Solar power systems leased	\$741,270	\$666,700
Solar power systems to be leased	21,531	25,367
	762,801	692,067
Less: accumulated depreciation	(85,286)	(70,800)
	\$677,515	\$621,267

¹ Solar power systems leased and to be leased, net are physically located exclusively in the United States.

Edgar Filing: SUNPOWER CORP - Form 10-Q

As of July 2, 2017 and January 1, 2017, the Company had pledged solar assets with an aggregate book value of ² \$25.6 million and \$13.1 million, respectively, to third-party investors as security for the Company's contractual obligations.

The following table presents the Company's minimum future rental receipts on operating leases placed in service as of July 2, 2017:

18

Table of Contents

(In thousands)	Fiscal 2017 (remaining six months)	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	Total
Minimum future rentals on operating leases placed in service ¹	\$ 14,330	28,323	28,378	28,437	28,497	394,047	\$ 522,012

Minimum future rentals on operating leases placed in service does not include contingent rentals that may be received from customers under agreements that include performance-based incentives nor does it include rent receivables on operating leases sold to the 8point3 Group.

Sales-Type Leases

As of July 2, 2017 and January 1, 2017, the Company's net investment in sales-type leases presented in "Accounts receivable, net" and "Long-term financing receivables, net" on the Company's Consolidated Balance Sheets was as follows:

(In thousands)	As of July 2, 2017	January 1, 2017
Financing receivables ¹ :		
Minimum lease payments receivable ²	\$ 626,395	\$ 560,582
Unguaranteed residual value	78,367	70,636
Unearned income	(112,889)	(104,624)
Net financing receivables	\$ 591,873	\$ 526,594
Current	\$ 22,025	\$ 19,261
Long-term	\$ 569,848	\$ 507,333

¹ As of July 2, 2017 and January 1, 2017, the Company had pledged financing receivables of \$32.5 million and \$18.6 million, respectively, to third-party investors as security for the Company's contractual obligations.

² Net of allowance for doubtful accounts amounting to \$5.1 million and \$4.5 million, as of July 2, 2017 and January 1, 2017, respectively.

As of July 2, 2017, future maturities of net financing receivables for sales-type leases are as follows:

(In thousands)	Fiscal 2017 (remaining six months)	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	Total
Scheduled maturities of minimum lease payments receivable ¹	\$ 16,915	32,006	32,278	32,558	32,844	479,794	\$ 626,395

¹ Minimum future rentals on sales-type leases placed in service does not include contingent rentals that may be received from customers under agreements that include performance-based incentives.

Sale-Leaseback Arrangements

The Company enters into sale-leaseback arrangements under which solar power systems are sold to third parties and subsequently leased back by the Company over minimum lease terms of up to 25 years. Separately, the Company enters into PPAs with end customers, who host the leased solar power systems and buy the electricity directly from

the Company under PPAs with terms of up to 25 years. At the end of the lease term, the Company has the option to purchase the systems at fair value or may be required to remove the systems and return them to the third parties.

The Company has classified its sale-leaseback arrangements of solar power systems not involving integral equipment as operating leases. The deferred profit on the sale of these systems is recognized over the term of the lease. As of July 2, 2017, future minimum lease obligations associated with these systems were \$75.1 million, which will be recognized over the minimum lease terms. Future minimum payments to be received from customers under PPAs associated with the solar power systems under sale-leaseback arrangements classified as operating leases will be recognized over the lease terms of up to 20 years and are contingent upon the amounts of energy produced by the solar power systems.

Table of Contents

The Company enters into certain sale-leaseback arrangements under which the systems subject to the sale-leaseback arrangements have been determined to be integral equipment as defined under the accounting guidance for such transactions. The Company has continuing involvement with the solar power systems throughout the lease due to purchase option rights in the arrangements. As a result of such continuing involvement, the Company accounts for each of these transactions as a financing. Under the financing method, the proceeds received from the sale of the solar power systems are recorded by the Company as financing liabilities. The financing liabilities are subsequently reduced by the Company's payments to lease back the solar power systems, less interest expense calculated based on the Company's incremental borrowing rate adjusted to the rate required to prevent negative amortization. The solar power systems under the sale-leaseback arrangements remain on the Company's balance sheet and are classified within "Property, plant and equipment, net" (see Note 4). As of July 2, 2017, future minimum lease obligations for the sale-leaseback arrangements accounted for under the financing method were \$221.2 million, which will be recognized over the lease terms of up to 25 years. During the three and six months ended July 2, 2017, the Company had net financing proceeds of \$3.9 million and \$42.1 million, respectively, in connection with these sale-leaseback arrangements. During both the three and six months ended July 3, 2016, the Company had net financing proceeds of \$15.7 million, in connection with these sale-leaseback arrangements. As of July 2, 2017 and January 1, 2017, the carrying amount of the sale-leaseback financing liabilities, presented in "Other long-term liabilities" on the Company's Consolidated Balance Sheets, was \$263.9 million and \$204.9 million, respectively (see Note 4).

Note 6. FAIR VALUE MEASUREMENTS

Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement (observable inputs are the preferred basis of valuation):

- Level 1 — Quoted prices in active markets for identical assets or liabilities.
- Level 2 — Measurements are inputs that are observable for assets or liabilities, either directly or indirectly, other than quoted prices included within Level 1.
- Level 3 — Prices or valuations that require management inputs that are both significant to the fair value measurement and unobservable.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The Company measures certain assets and liabilities at fair value on a recurring basis. There were no transfers between fair value measurement levels during any presented period. The Company did not have any assets or liabilities measured at fair value on a recurring basis requiring Level 3 inputs as of July 2, 2017 or January 1, 2017.

Table of Contents

The following table summarizes the Company's assets and liabilities measured and recorded at fair value on a recurring basis as of July 2, 2017 and January 1, 2017:

(In thousands)	July 2, 2017			January 1, 2017		
	Total	Level 1	Level 2	Total	Level 1	Level 2
Assets						
Restricted cash and cash equivalents ¹ :						
Money market funds	\$3,005	\$3,005	\$—	\$3,002	\$3,002	\$—
Prepaid expenses and other current assets:						
Derivative financial instruments (Note 11)	2,737	—	2,737	4,802	—	4,802
Other long-term assets:						
Derivative financial instruments (Note 11)	9,432	—	9,432	11,429	—	11,429
Total assets	\$15,174	\$3,005	\$12,169	\$19,233	\$3,002	\$16,231
Liabilities						
Accrued liabilities:						
Derivative financial instruments (Note 11)	\$1,902	\$—	\$1,902	\$2,023	\$—	\$2,023
Other long-term liabilities:						
Derivative financial instruments (Note 11)	1,129	—	1,129	448	—	448
Total liabilities	\$3,031	\$—	\$3,031	\$2,471	\$—	\$2,471

The Company's restricted cash and cash equivalents consist of money market fund instruments and commercial paper that are classified as available-for-sale and are highly liquid investments with original maturities of 90 days or less. The Company's money market fund instruments are categorized within Level 1 of the fair value hierarchy because they are valued using quoted market prices for identical instruments in active markets.

Other financial instruments, including the Company's accounts receivable, accounts payable and accrued liabilities, are carried at cost, which generally approximates fair value due to the short-term nature of these instruments.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

The Company measures certain investments and non-financial assets (including property, plant and equipment, and other intangible assets) at fair value on a non-recurring basis in periods after initial measurement in circumstances when the fair value of such asset is impaired below its recorded cost. As of July 2, 2017 and July 3, 2016, there were no such items recorded at fair value.

Held-to-Maturity Debt Securities

The Company's debt securities, classified as held-to-maturity, are Philippine government bonds that the Company maintains as collateral for business transactions within the Philippines. These bonds have various maturity dates and are classified as "Restricted long-term marketable securities" on the Company's Consolidated Balance Sheets. As of July 2, 2017 and January 1, 2017 these bonds had a carrying value of \$4.9 million and \$5.0 million, respectively. The Company records such held-to-maturity investments at amortized cost based on its ability and intent to hold the securities until maturity. The Company monitors for changes in circumstances and events that would affect its ability and intent to hold such securities until the recorded amortized costs are recovered. No other-than-temporary impairment loss was incurred during any presented period. The held-to-maturity debt securities were categorized in Level 2 of the fair value hierarchy.

Equity and Cost Method Investments

The Company holds equity investments in non-consolidated entities that are accounted for under both the equity and cost method. The Company monitors these investments, which are included in "Other long-term assets" in its Consolidated Balance Sheets, for impairment and records reductions in the carrying values when necessary. Circumstances that indicate an other-

Table of Contents

than-temporary decline include Level 2 and Level 3 measurements such as the valuation ascribed to the issuing company in subsequent financing rounds, decreases in quoted market prices, and declines in the results of operations of the issuer.

As of July 2, 2017 and January 1, 2017, the Company had \$(15.8) million and \$(6.9) million, respectively, in investments accounted for under the equity method (see Note 9). As of July 2, 2017 and January 1, 2017, the Company had \$33.1 million and \$39.4 million respectively, in investments accounted for under the cost method.

Note 7. RESTRUCTURING

December 2016 Restructuring Plan

On December 2, 2016, the Company adopted a restructuring plan to reduce costs and focus on improving cash flow. As part of the plan, the Board of Directors approved the closure of the Company's Philippine-based Fab 2 manufacturing facility. In connection with the plan, which is expected to be completed by the end of fiscal 2017, the Company expects approximately 2,500 employees to be affected, primarily in the Philippines. The Company expects to incur restructuring charges in connection with the plan totaling approximately \$225 million to \$275 million, consisting primarily of asset impairments, severance benefits, lease and related termination costs, and other associated costs. The Company expects approximately 30% of such total restructuring charges to be cash. The actual timing and costs of the plan may differ from the Company's current expectations and estimates.

August 2016 Restructuring Plan

On August 9, 2016, the Company adopted a restructuring plan in response to expected near-term challenges primarily relating to the Company's Power Plant Segment. In connection with the realignment, which is expected to be completed by the end of fiscal 2017, the Company expects approximately 1,200 employees to be affected, primarily in the Philippines. The Company expects to incur restructuring charges totaling approximately \$35 million to \$45 million, consisting primarily of severance benefits, asset impairments, lease and related termination costs, and other associated costs. The Company expects more than 50% of total charges to be cash. The actual timing and costs of the plan may differ from the Company's current expectations and estimates due to a number of factors, including uncertainties related to required consultations with employee representatives as well as other local labor law requirements and mandatory processes in the relevant jurisdictions.

Legacy Restructuring Plans

During prior fiscal years, the Company implemented approved restructuring plans, related to all segments, to align with changes in the global solar market which included the consolidation of the Company's Philippine manufacturing operations as well as actions to accelerate operating cost reduction and improve overall operating efficiency. These restructuring activities were substantially complete as of July 2, 2017, and the remaining costs to be incurred are not expected to be material.

The following table summarizes the restructuring charges recognized in the Company's Consolidated Statements of Operations:

Table of Contents

(In thousands)	Six Months Ended		
	July 2, 2017	July 3, 2016	Cumulative To Date
December 2016 Plan:			
Non-cash impairment charges (benefits)	\$(741)	\$—	\$ 148,050
Severance and benefits	2,707	—	18,608
Lease and related termination costs	557	—	557

Other costs ¹	685	143	(611)	217
Total restructuring liability	\$1,823	\$ 213	\$ (971)	\$1,065

¹ Other costs primarily represent associated legal services and costs of relocating employees.

Note 8. COMMITMENTS AND CONTINGENCIES

Facility and Equipment Lease Commitments

The Company leases certain facilities under non-cancellable operating leases from unaffiliated third parties. As of July 2, 2017, future minimum lease payments for facilities under operating leases were \$47.8 million, to be paid over the remaining contractual terms of up to 9 years. The Company also leases certain buildings, machinery and equipment under non-cancellable capital leases. As of July 2, 2017, future minimum lease payments for assets under capital leases were \$4.3 million, to be paid over the remaining contractual terms of up to 7 years.

Purchase Commitments

The Company purchases raw materials for inventory and manufacturing equipment from a variety of vendors. During the normal course of business, in order to manage manufacturing lead times and help assure adequate supply, the Company enters into agreements with contract manufacturers and suppliers that either allow them to procure goods and services based on specifications defined by the Company, or that establish parameters defining the Company's requirements. In certain instances, these agreements allow the Company the option to cancel, reschedule or adjust the Company's requirements based on its business needs before firm orders are placed. Consequently, not all of the Company's disclosed purchase commitments arising from these agreements are firm, non-cancellable, and unconditional commitments.

The Company also has agreements with several suppliers, including some of its non-consolidated investees, for the procurement of polysilicon, ingots, wafers, and Solar Renewable Energy Credits, among others, which specify future quantities and pricing of products to be supplied by the vendors for periods up to 4 years and provide for certain consequences, such as forfeiture of advanced deposits and liquidated damages relating to previous purchases, in the event that the Company terminates the arrangements.

Future purchase obligations under non-cancellable purchase orders and long-term supply agreements as of July 2, 2017 are as follows:

(In thousands)	Fiscal 2017 (remaining six months)	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	Total ¹²
Future purchase obligations	\$ 579,475	200,647	175,694	161,846	1,000	2,000	\$1,120,662

¹ Total future purchase obligations were composed of \$206.7 million related to non-cancellable purchase orders and \$914.0 million related to long-term supply agreements.

² During fiscal 2016, the Company did not fulfill all of the purchase commitments it was otherwise obligated to take by December 31, 2016, as specified in related contracts with a supplier. As of July 2, 2017, the Company has

recorded an offsetting asset, recorded within "Prepaid expenses and other current assets," and liability, recorded within "Accrued liabilities," totaling \$32.0 million. This amount represents the unfulfilled amount as of that date as the Company expects to satisfy the obligation via purchases of inventory in fiscal 2017, within the applicable contractual cure period.

The Company expects that all obligations related to non-cancellable purchase orders for manufacturing equipment will be recovered through future cash flows of the solar cell manufacturing lines and solar panel assembly lines when such long-lived assets are placed in service. Factors considered important that could result in an impairment review include significant under-performance relative to expected historical or projected future operating results, significant changes in the manner of use of acquired assets, and significant negative industry or economic trends. Obligations related to non-cancellable purchase orders

Table of Contents

for inventories match current and forecasted sales orders that will consume these ordered materials and actual consumption of these ordered materials are compared to expected demand regularly. The Company anticipates total obligations related to long-term supply agreements for inventories, which in the case of polysilicon are at purchase prices significantly above current market prices for similar materials, will be recovered because quantities are less than management's expected demand for its solar power products over the next several years. The terms of the long-term supply agreements are reviewed by management and the Company assesses the need for any accruals for estimated losses on adverse purchase commitments, such as lower of cost or net realizable value adjustments that will not be recovered by future sales prices, forfeiture of advanced deposits and liquidated damages, as necessary.

Advances to Suppliers

As noted above, the Company has entered into agreements with various vendors, some of which are structured as "take or pay" contracts, that specify future quantities and pricing of products to be supplied. Certain agreements also provide for penalties or forfeiture of advanced deposits in the event the Company terminates the arrangements. Under certain agreements, the Company was required to make prepayments to the vendors over the terms of the arrangements. As of July 2, 2017 and January 1, 2017, advances to suppliers totaled \$252.0 million and \$284.8 million, respectively, of which \$106.8 million and \$111.5 million, respectively, is classified as short-term in the Company's Consolidated Balance Sheets. Two suppliers accounted for 95% and 5% of total advances to suppliers, respectively, as of July 2, 2017, and 90% and 10%, respectively, as of January 1, 2017.

Advances from Customers

The estimated utilization of advances from customers as of July 2, 2017 is as follows:

(In thousands)	Fiscal 2017 (remaining six months)	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	Total
Estimated utilization of advances from customers	\$ 10,388	37,531	37,288	30,385	—	—	\$ 115,592

The Company has entered into other agreements with customers who have made advance payments for solar power products and systems. These advances will be applied as shipments of product occur or upon completion of certain project milestones. In November 2016, the Company and Total entered into a four-year, up to 200-MW supply agreement to support the solarization of Total facilities (see Note 2); in March 2017, the Company received a prepayment totaling \$88.5 million. As of July 2, 2017, the Company had \$85.7 million advance payments received from Total, of which \$11.6 million was classified as short-term in the Company's Consolidated Balance Sheets, based on projected shipment dates.

Product Warranties

The following table summarizes accrued warranty activity for the three and six months ended July 2, 2017 and July 3, 2016, respectively:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Balance at the beginning of the period	\$ 168,113	\$ 166,440	\$ 161,209	\$ 164,127
Accruals for warranties issued during the period	5,776	3,235	15,436	9,114
Settlements and adjustments during the period	(1,423)	(4,891)	(4,179)	(8,457)
Balance at the end of the period	\$ 172,466	\$ 164,784	\$ 172,466	\$ 164,784

Contingent Obligations

Project agreements entered into with the Company's Commercial and Power Plant customers often require the Company to undertake obligations including: (i) system output performance warranties; (ii) system maintenance; (iii) penalty payments or customer termination rights if the system the Company is constructing is not commissioned within specified timeframes or other milestones are not achieved; and (iv) system put-rights whereby the Company could be required to buy back a customer's system at fair value on specified future dates if certain minimum performance thresholds are not met for specified periods.

25

Table of Contents

Historically, the Company's systems have performed significantly above the performance warranty thresholds, and there have been no cases in which the Company has had to buy back a system.

Future Financing Commitments

The Company is required to provide certain funding under agreements with unconsolidated investees, subject to certain conditions (see Note 9). As of July 2, 2017, the Company has future financing obligations related to these agreements as follows:

(In thousands)	Amount
Year	
2017 (remaining six months)	\$18,190
2018	13,066
	\$31,256

Liabilities Associated with Uncertain Tax Positions

Total liabilities associated with uncertain tax positions were \$32.5 million and \$47.2 million as of July 2, 2017 and January 1, 2017, respectively. These amounts are included in "Other long-term liabilities" in the Company's Consolidated Balance Sheets in their respective periods as they are not expected to be paid within the next 12 months. Due to the complexity and uncertainty associated with its tax positions, the Company cannot make a reasonably reliable estimate of the period in which cash settlement, if any, would be made for its liabilities associated with uncertain tax positions in other long-term liabilities.

Indemnifications

The Company is a party to a variety of agreements under which it may be obligated to indemnify the counterparty with respect to certain matters. Typically, these obligations arise in connection with contracts and license agreements or the sale of assets, under which the Company customarily agrees to hold the other party harmless against losses arising from a breach of warranties, representations and covenants related to such matters as title to assets sold, negligent acts, damage to property, validity of certain intellectual property rights, non-infringement of third-party rights, and certain tax related matters including indemnification to customers under §48(c) solar commercial investment tax credit ("ITC") and U.S. Treasury Department ("Treasury Department") grant payments under Section 1603 of the American Recovery and Reinvestment Act (each a "Cash Grant"). In each of these circumstances, payment by the Company is typically subject to the other party making a claim to the Company that is contemplated by and valid under the indemnification provisions of the particular contract, which provisions are typically contract-specific, as well as bringing the claim under the procedures specified in the particular contract. These procedures usually allow the Company to challenge the other party's claims or, in case of breach of intellectual property representations or covenants, to control the defense or settlement of any third-party claims brought against the other party. Further, the Company's obligations under these agreements may be limited in terms of activity (typically to replace or correct the products or terminate the agreement with a refund to the other party), duration and/or amounts. In some instances, the Company may have recourse against third parties and/or insurance covering certain payments made by the Company.

In certain circumstances, the Company has provided indemnification to customers and investors under which the Company is contractually obligated to compensate these parties for losses they may suffer as a result of reductions in benefits received under ITC and Treasury Cash Grant programs. The Company applies for ITC and Cash Grant incentives based on guidance provided by the Internal Revenue Service ("IRS") and the Treasury Department, which include assumptions regarding the fair value of the qualified solar power systems, among others. Certain of the

Company's development agreements, sale-leaseback arrangements, and financing arrangements with tax equity investors, incorporate assumptions regarding the future level of incentives to be received, which in some instances may be claimed directly by the Company's customers and investors. Generally, such obligations would arise as a result of reductions to the value of the underlying solar power systems as assessed by the IRS. At each balance sheet date, the Company assesses and recognizes, when applicable, the potential exposure from these obligations based on all the information available at that time, including any audits undertaken by the IRS. The maximum potential future payments that the Company could have to make under this obligation would depend on the difference between the eligible basis claimed on the tax filing for the solar energy systems sold or transferred to indemnified parties and the values that the IRS may redetermine as the eligible basis for the systems for purposes of claiming ITCs or U.S. Treasury grants. The Company uses the eligible basis for tax filing purposes determined with the assistance of independent third-party appraisals to determine the ITCs that are passed-through to and claimed by the indemnified parties. Since the Company cannot determine future revisions to Treasury Department guidelines governing system values, how the IRS will evaluate system values used in

Table of Contents

claiming ITCs, or U.S. Treasury grants, or how its customers and investors have utilized or will utilize these benefits in their own filings, the Company is unable to reliably estimate the maximum potential future payments that it could have to make under the Company's contractual investor obligation as of each reporting date.

Defined Benefit Pension Plans

The Company maintains defined benefit pension plans for the majority of its non-U.S. employees. Benefits under these plans are generally based on an employee's years of service and compensation. Funding requirements are determined on an individual country and plan basis and are subject to local country practices and market circumstances. The funded status of the pension plans, which represents the difference between the benefit obligation and fair value of plan assets, is calculated on a plan-by-plan basis. The benefit obligation and related funded status are determined using assumptions as of the end of each fiscal year. The Company recognizes the overfunded or underfunded status of its pension plans as an asset or liability on its Consolidated Balance Sheets. As of July 2, 2017 and January 1, 2017, the underfunded status of the Company's pension plans, presented in "Other long-term liabilities" on the Company's Consolidated Balance Sheets, was \$3.9 million and \$3.4 million, respectively. The impact of transition assets and obligations and actuarial gains and losses are recorded in "Accumulated other comprehensive loss", and are generally amortized as a component of net periodic cost over the average remaining service period of participating employees. Total other comprehensive gain related to the Company's benefit plans was zero for the three and six months ended July 2, 2017.

Legal Matters

Tax Benefit Indemnification Litigation

On March 19, 2014, a lawsuit was filed by NRG Solar LLC, now known as NRG Renew LLC ("NRG"), against SunPower Corporation, Systems, a wholly-owned subsidiary of the Company ("SunPower Systems"), in the Superior Court of Contra Costa County, California. The complaint asserts that, according to the indemnification provisions in the contract pertaining to SunPower Systems' sale of a large California solar project to NRG, SunPower Systems owes NRG \$75.0 million in connection with certain benefits associated with the project that were approved by the Treasury Department for an amount that was less than expected. Additionally, SunPower Systems filed a cross-complaint against NRG seeking damages in excess of \$7.5 million for breach of contract and related claims arising from NRG's failure to fulfill its obligations under the contract, including its obligation to take "reasonable, available steps" to engage the Treasury Department. In April 2017, SunPower Systems and NRG entered into a binding term sheet to resolve the matter by settlement and the Company consequently recorded a litigation accrual of \$43.9 million in its April 2, 2017 financial statements related to this matter.

On June 27, 2017 (the "Effective Date"), SunPower Systems entered into a final settlement agreement (the "Settlement Agreement") with NRG to settle all claims, counterclaims, disputes and damages that have been asserted in connection with the events underlying the California litigation. Pursuant to the terms of the Settlement Agreement, SunPower Systems was required to pay NRG \$10.0 million in cash (the "Initial Payment") within ten days of the Effective Date and will be required to pay \$15.0 million in cash (the "Second Payment") on or before December 15, 2018. In addition, NRG is entitled to receive, at NRG's direction and at no cost to NRG, modules over the period between the Effective Date and December 31, 2019 (the "Settlement Period"). On June 29, 2017, the Company made the Initial Payment. On July 6, 2017, the court dismissed the case with prejudice.

Class Action and Derivative Suits

On August 16, 2016 and August 26, 2016, two securities class action lawsuits were filed against the Company and certain of its officers and directors (the "Defendants") in the United States District Court for the Northern District of California on behalf of a class consisting of those who acquired the Company's securities from February 17, 2016 through August 9, 2016 (the "Class Period"). The substantially identical complaints allege violations of Sections 10(b) and 20(a) of the Exchange Act,

15 U.S.C. §§78j(b) and 78t(a) and SEC Rule 10b-5, 17 C.F.R. §240.10b-5. The complaints were filed following the issuance of the Company's August 9, 2016 earnings release and revised guidance and generally allege that throughout the Class Period, Defendants made materially false and/or misleading statements and failed to disclose material adverse facts about the Company's business, operations, and prospects. On December 9, 2016, the court consolidated the cases and appointed a lead plaintiff. On March 31, 2017, the court granted the lead plaintiff's motion to withdraw as lead plaintiff. Two investor groups comprised of individual investors filed new motions to be appointed lead plaintiff, which are set for hearing on August 31, 2017. No operative complaint has been filed.

Four shareholder derivative actions have been filed in federal court, purporting to be brought on the Company's behalf against certain of the Company's current and former officers and directors based on the same events alleged in the securities

Table of Contents

class action lawsuits described above. The Company is named as a nominal defendant. The plaintiffs assert claims for alleged breaches of fiduciary duties, unjust enrichment, and waste of corporate assets for the period from February 2016 through the present and generally allege that the defendants made or caused the Company to make materially false and/or misleading statements and failed to disclose material adverse facts about the Company's business, operations, and prospects. The plaintiffs also claim that the alleged conduct is a breach of the Company's Code of Business Conduct and Ethics, and that defendants, including members of the Company's Audit Committee, breached their fiduciary duties by failing to ensure the adequacy of the Company's internal controls, and by causing or allowing the Company to disseminate false and misleading statements in the Company's SEC filings and other disclosures. The securities class action lawsuits and the federal derivative actions have all been related by the Court and assigned to one judge. The derivative cases are stayed pending the outcome of an anticipated motion to dismiss the not yet filed class action complaint.

Shareholder derivative actions purporting to be brought on the Company's behalf were brought in the Superior Court of California for the County of Santa Clara against certain of the Company's current and former officers and directors based on the same events alleged in the securities class action and federal derivative lawsuits described above, and alleging breaches of fiduciary duties. The state court cases are stayed pending the outcome of an anticipated motion to dismiss the not yet filed class action complaint.

The Company is currently unable to determine if the resolution of these matters will have a material adverse effect on the Company's financial position, liquidity, or results of operations.

Other Litigation

The Company is also a party to various other litigation matters and claims that arise from time to time in the ordinary course of its business. While the Company believes that the ultimate outcome of such matters will not have a material adverse effect on the Company, their outcomes are not determinable and negative outcomes may adversely affect the Company's financial position, liquidity, or results of operations.

Note 9. EQUITY METHOD INVESTMENTS

As of July 2, 2017 and January 1, 2017, the Company's carrying value of its equity method investments totaled \$(15.8) million and \$(6.9) million, respectively, and is classified as "Other long-term assets" in its Consolidated Balance Sheets. These balances include the carrying value of the Company's investment in the 8point3 Group, which had a negative value of \$78.8 million and \$60.6 million as of July 2, 2017 and January 1, 2017, respectively (see below). The Company's share of its earnings (loss) from equity method investments is reflected as "Equity in earnings of unconsolidated investees" in its Consolidated Statements of Operations.

Equity Investment and Joint Venture with AUOSP

In fiscal 2010, the Company and AU Optronics Singapore Pte. Ltd. ("AUO") formed a joint venture, AUO SunPower Sdn. Bhd. ("AUOSP"). On September 29, 2016, the Company completed its acquisition of AUOSP pursuant to a stock purchase agreement, under which the Company acquired 100% of the voting equity interest in AUOSP (see Note 3 in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017), and AUOSP is now known as SunPower Solar Manufacturing Malaysia Sdn. Bhd. Prior to the acquisition, the Company and AUO each owned 50% of the equity in the former AUOSP, which is now a wholly-owned subsidiary of the Company. The former AUOSP owns a solar cell manufacturing facility in Malaysia and manufactures solar cells and, prior to the acquisition, sold them on a "cost-plus" basis to the Company and AUO. Prior to the acquisition, the Company accounted for its investment in AUOSP using the equity method as a result of the shared power arrangement. As a result of the acquisition, AUOSP

became a consolidated subsidiary of the Company and the results of operations of AUOSP have been included in the Consolidated Statement of Operations of the Company since September 29, 2016.

Equity Investment in Huaxia CPV (Inner Mongolia) Power Co., Ltd. ("CCPV")

In December 2012, the Company entered into an agreement with Tianjin Zhonghuan Semiconductor Co. Ltd., Inner Mongolia Power Group Co. Ltd. and Hohhot Jinqiao City Development Company Co., Ltd. to form CCPV, a jointly owned entity to manufacture and deploy the Company's LCPV concentrator technology in Inner Mongolia and other regions in China. CCPV is based in Hohhot, Inner Mongolia. The establishment of the entity was subject to approval of the Chinese government, which was received in the fourth quarter of fiscal 2013. In December 2013, the Company made a \$16.4 million equity investment in CCPV, for a 25% equity ownership.

Table of Contents

The Company has concluded that it is not the primary beneficiary of CCPV since, although the Company is obligated to absorb losses and has the right to receive benefits, the Company alone does not have the power to direct the activities of CCPV that most significantly impact its economic performance. The Company accounts for its investment in CCPV using the equity method since the Company is able to exercise significant influence over CCPV due to its board position.

Equity Investment in Diamond Energy Pty Ltd. ("Diamond Energy")

In October 2012, the Company made a \$3.0 million equity investment in Diamond Energy, an alternative energy project developer and clean electricity retailer headquartered in Melbourne, Australia, in exchange for a 25% equity ownership.

The Company has concluded that it is not the primary beneficiary of Diamond Energy since, although the Company is obligated to absorb losses and has the right to receive benefits, the Company alone does not have the power to direct the activities of Diamond that most significantly impact its economic performance. The Company accounts for its investment in Diamond using the equity method since the Company is able to exercise significant influence over Diamond due to its board position.

Equity Investment in 8point3 Energy Partners

In June 2015, 8point3 Energy Partners, LP ("8point3"), a joint YieldCo vehicle formed by the Company and First Solar, Inc. ("First Solar" and, together with the Company, the "Sponsors") to own, operate and acquire solar energy generation assets, consummated its initial public offering ("IPO"). 8point3's Class A shares are now listed on the NASDAQ Global Select Market under the trading symbol "CAFD".

Immediately after the IPO, the Company contributed a portfolio of solar generation assets (the "SPWR Projects") to 8point3 Operating Company, LLC ("OpCo"), 8point3's primary operating subsidiary. In exchange for the SPWR Projects, the Company received cash proceeds of \$371 million as well as equity interests in several 8point3 affiliated entities: primarily common and subordinated units representing a 40.7% stake in OpCo (since reduced to 36.5% via a secondary issuance of shares in fiscal 2016) and a 50.0% economic and management stake in 8point3 Holding Company, LLC ("Holdings"), the parent company of the general partner of 8point3 and the owner of incentive distribution rights ("IDRs") in OpCo. Holdings, OpCo, 8point3 and their respective subsidiaries are referred to herein as the "8point3 Group." Additionally, pursuant to a Right of First Offer Agreement between the Company and OpCo, the 8point3 Group has rights of first offer on interests in an additional portfolio of the Company's solar energy projects that are currently contracted or are expected to be contracted before being sold by the Company to other parties (the "ROFO Projects"). In connection with the IPO, the Company also entered into O&M, asset management and management services agreements with the 8point3 Group. The services the Company provides under these agreements are priced consistently with market rates for such services and the agreements are terminable by the 8point3 Group for convenience.

The Company has concluded that it is not the primary beneficiary of the 8point3 Group or any of its individual subsidiaries since, although the Sponsors are both obligated to absorb losses or have the right to receive benefits, the Company alone does not have the power to direct the activities of the 8point3 Group that most significantly impact its economic performance. In making this determination, the Company considered, among other factors, the equal division between the Sponsors of management rights in the 8point3 Group and the corresponding equal influence over its significant decisions, the role and influence of the independent directors on the board of directors of the general partner of 8point3 Energy Partners, and how both Sponsors contribute to the activities that most significantly impact the 8point3 Group's economic performance. The Company accounts for its investment in the 8point3 Group using the

equity method because the Company determined that, notwithstanding the division of management and ownership interests between the Sponsors, the Company exercises significant influence over the operations of the 8point3 Group.

Future quarterly distributions from OpCo were subject to certain forbearance periods and are subject to certain subordination periods. During the forbearance period, the Sponsors agreed to forego any distributions declared on their common and subordinated units. The forbearance period ended during fiscal 2016 and the OpCo units held by the Company were entitled to distributions beginning in the fourth fiscal quarter of 2016. During the three and six months ended July 2, 2017, the Company received \$7.4 million and \$14.6 million, respectively, in dividend distributions from the 8point3 Group.

During the subordination period, holders of the subordinated units are not entitled to receive any distributions until the common units have received their minimum quarterly distribution plus any arrearages in the payment of minimum distributions from prior quarters. Approximately 70% of the Company's OpCo units are subject to subordination. The subordination period will end after OpCo has earned and paid minimum quarterly distributions for three years ending on or after August 31, 2018 and there are no outstanding arrearages on common units. Notwithstanding the foregoing, the subordination period could end

Table of Contents

after OpCo has earned and paid 150% of minimum quarterly distributions, plus the related distribution on the incentive distribution rights ("IDRs"), for one year ending on or after August 31, 2016 and there are no outstanding arrearages on common units. At the end of the subordination period, all subordinated units will convert to common units on a one-for-one basis. The Company also, through its interests in Holdings, holds IDRs in OpCo, which represent rights to incremental distributions after certain distribution thresholds are met.

In June 2015, OpCo entered into a \$525.0 million senior secured credit facility, consisting of a \$300.0 million term loan facility, a \$25.0 million delayed draw term loan facility, and a \$200.0 million revolving credit facility (the "8point3 Credit Facility"). Proceeds from the term loan were used to make initial distributions to the Sponsors. The 8point3 Credit Facility is secured by a pledge of the Sponsors' equity interests in OpCo. On September 30, 2016, OpCo entered into an amendment and joinder agreement under its existing senior secured credit facility, pursuant to which OpCo obtained a new \$250.0 million incremental term loan facility, increasing the maximum borrowing capacity under the credit facility to \$775.0 million.

Under relevant guidance for leasing transactions, the Company treated the portion of the sale of the residential lease portfolio originally sold to the 8point3 Group in connection with the IPO transaction, composed of operating leases and unguaranteed sales-type lease residual values, as a borrowing and reflected the cash proceeds attributable to this portion of the residential lease portfolio as liabilities recorded within "Accrued liabilities" and "Other long-term liabilities" in the Consolidated Balance Sheets (see Note 4). As of July 2, 2017 and January 1, 2017, the operating leases and the unguaranteed sales-type lease residual values which were sold to the 8point3 Group had an aggregate carrying value of \$72.9 million and \$74.4 million, respectively, on the Company's Consolidated Balance Sheets.

During fiscal 2016, the Company sold several ROFO Projects to 8point3, including a noncontrolling interest in the 128 MW Henrietta utility-scale power plant in California (the "Henrietta Project") and controlling interests in the 60 MW Hooper utility-scale power plant in Colorado and several commercial projects. The Company accounted for these sales as partial sales of real estate and recognized revenue equal to total project costs when such projects reached their commercial operation date. No profit on these sales was recognized, as unconditional cash proceeds did not exceed total project costs, and such derecognition resulted in a net \$50.3 million reduction in the carrying value of the Company's investments in the 8point3 Group as of July 2, 2017. Some of the commercial projects have not yet reached their commercial operation date and therefore, the Company continues to record these projects on its Consolidated Balance Sheet as of July 2, 2017. The net cash proceeds from the sales of these projects to the 8point3 Group as well as related proceeds from tax equity investors were classified as operating cash inflows in the Consolidated Statement of Cash Flows. In addition to the treatment above with respect to the transactions with the 8point3 Group, the sale of the controlling interest in the Henrietta project in the third quarter of fiscal 2016 was accounted for as a partial sale of real estate pursuant to which the Company recognized revenue equal to the sales value.

As of July 2, 2017 and January 1, 2017, the Company's investment in the 8point3 Group had a negative carrying value of \$78.8 million and \$60.6 million, respectively, resulting from the continued deferral of profit recognition for projects sold to the 8point3 Group that included the sale or lease of real estate. The Company owns approximately 29 million shares in OpCo as well as exchange rights to convert these shares on a 1:1 basis to the publicly traded Class A shares of 8point3. Based on the closing stock price of Class A shares as of June 30, 2017, the final trading day prior to the end of the Company's fiscal quarter, the Company's investment in OpCo has an estimated market value of \$429.5 million.

On April 5, 2017, the Company announced that it is evaluating strategic options for 8point3, following the announcement by First Solar that it had notified the board of directors of the partnership that it is reviewing alternatives for the sale of its interest in 8point3. Since the announcement on April 5, 2017, the Company received significant initial interest in the acquisition of its interest in the 8point3 Group or in the sale of the entire partnership,

and thus has made the strategic decision not to actively seek a replacement partner for First Solar and to focus its efforts on divesting its equity interest in 8point3 Group, and join the sale process initiated by First Solar. While the Company believes both parties are committed to proceeding, this transaction is in the early stages, and no final decision on any particular alternative has yet been reached.

Equity Investments in Dongfang Huansheng Photovoltaic (Jiangsu) Co., Ltd.

In March 2016, the Company entered into an agreement with Dongfang Electric Corporation and Tianjin Zhonghuan Semiconductor Co., Ltd. to form Dongfang Huansheng Photovoltaic (Jiangsu) Co., Ltd., a jointly owned cell manufacturing facility to manufacture the Company's P-series modules in China. The joint venture is based in Yixing City in Jiangsu Province, China. In March 2016, the Company made an initial \$9.2 million investment for a 15% equity ownership interest in the joint venture, which was accounted for under the cost method. In February 2017, the Company invested an additional \$9.0 million which included an investment of \$7.7 million and reinvested dividends of \$1.3 million, bringing the Company's equity ownership to 20% of the joint venture. The Company has concluded that it is not the primary beneficiary of the joint venture since, although the Company is obligated to absorb losses and has the right to receive benefits, the Company alone does not

Table of Contents

have the power to direct the activities of the joint venture that most significantly impact its economic performance. The Company accounts for its investment in the joint venture using the equity method since the Company is able to exercise significant influence over the joint venture due to its board position.

Equity Investments in Project Entities

The Company has from time to time maintained noncontrolling interests in project entities, which may be accounted for as either cost or equity method investments depending on the magnitude of the Company's investment and whether the Company exercises significant influence over the investee. The Company's involvement in these entities primarily takes two forms: first, the Company may take a noncontrolling interest in an early-stage project and maintain that investment over the development cycle, often in situations in which the Company's products are also sold to the entity under separate agreements. Second, the Company may retain a noncontrolling interest in a development project after a controlling interest is sold to a third party. In either form, the Company may maintain its investment for all or part of the operational life of the project or may seek to subsequently dispose of its investment. As of July 2, 2017, the Company's investments in such projects have a carrying value of \$44.9 million, of which \$40.6 million is accounted for under the equity method and the remainder under the cost method. The majority of this balance relates to the Boulder Solar Project, which is a ROFO project that the Company plans to sell to the 8point3 Group. In the event the 8point3 Group waives its rights to acquire this project, the Company may sell them to third parties. As of January 1, 2017, the Company's investments in such projects have a carrying value of \$45.5 million, of which \$41.2 million is accounted for under the equity method and the remainder under the cost method.

Cost Method Investment in Tendril Networks, Inc.

In November 2014, the Company invested in Tendril Networks, Inc. ("Tendril") by purchasing \$20.0 million of its preferred stock. In the first half of fiscal 2017, the Company invested an additional \$3.0 million in Tendril by purchasing \$1.5 million of preferred stock in February 2017 and then again in April 2017. The Company's total investment in Tendril constitutes a minority stake and is accounted for under the cost method because the preferred stock is deemed not to be in-substance common stock. In connection with the initial investment, the Company acquired warrants to purchase up to approximately 14 million shares of Tendril common stock exercisable through November 23, 2024. The number of shares of Tendril common stock that may be purchased pursuant to the warrants is subject to the Company's and Tendril's achievement of certain financial and operational milestones and other

conditions.

In connection with the initial investment in Tendril, the Company also entered into commercial agreements with Tendril under a Master Services Agreement and related Statements of Work. Under these commercial agreements, Tendril will use up to \$13.0 million of the Company's initial investment to develop, jointly with the Company, certain solar software solution products.

¹ Other debt excludes payments related to capital leases, which are disclosed in Note 8.

As of July 2, 2017, the aggregate future contractual maturities of the Company's outstanding debt, at face value, were as follows:

(In thousands)	Fiscal 2017 (remaining six months)	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	Total
Aggregate future maturities of outstanding debt	\$118,245	314,759	21,889	20,915	422,311	907,257	\$1,805,376

Convertible Debt

The following table summarizes the Company's outstanding convertible debt:

(In thousands)	July 2, 2017			January 1, 2017		
	Carrying Value	Face Value	Fair Value ¹	Carrying Value	Face Value	Fair Value ¹
Convertible debt:						
4.00% debentures due 2023	\$418,094	\$425,000	\$373,775	\$417,473	\$425,000	\$301,555
0.875% debentures due 2021	397,409	400,000	320,668	397,079	400,000	266,996
0.75% debentures due 2018	299,235	300,000	289,875	298,926	300,000	270,627
	\$1,114,738	\$1,125,000	\$984,318	\$1,113,478	\$1,125,000	\$839,178

¹ The fair value of the convertible debt was determined using Level 2 inputs based on quarterly market prices as reported by an independent pricing source.

The Company's outstanding convertible debentures are senior, unsecured obligations of the Company, ranking equally with all existing and future senior unsecured indebtedness of the Company.

4.00% Debentures Due 2023

Table of Contents

In December 2015, the Company issued \$425.0 million in principal amount of its 4.00% debentures due 2023. Interest is payable semi-annually, beginning on July 15, 2016. Holders may exercise their right to convert the debentures at any time into shares of the Company's common stock at an initial conversion price approximately equal to \$30.53 per share, subject to adjustment in certain circumstances. If not earlier repurchased or converted, the 4.00% debentures due 2023 mature on January 15, 2023.

0.875% Debentures Due 2021

In June 2014, the Company issued \$400.0 million in principal amount of its 0.875% debentures due 2021. Interest is payable semi-annually, beginning on December 1, 2014. Holders may exercise their right to convert the debentures at any time into shares of the Company's common stock at an initial conversion price approximately equal to \$48.76 per share, subject to adjustment in certain circumstances. If not earlier repurchased or converted, the 0.875% debentures due 2021 mature on June 1, 2021.

0.75% Debentures Due 2018

In May 2013, the Company issued \$300.0 million in principal amount of its 0.75% debentures due 2018. Interest is payable semi-annually, beginning on December 1, 2013. Holders may exercise their right to convert the debentures at any time into shares of the Company's common stock at an initial conversion price approximately equal to \$24.95 per share, subject to adjustment in certain circumstances. If not earlier repurchased or converted, the 0.75% debentures due 2018 mature on June 1, 2018.

Other Debt and Credit Sources

Mortgage Loan Agreement with IFC

In May 2010, the Company entered into a mortgage loan agreement with IFC. Under the loan agreement, the Company borrowed \$75.0 million and was required to repay the amount borrowed starting two years after the date of borrowing, in 10 equal semi-annual installments. The Company was required to pay interest of LIBOR plus 3% per annum on outstanding borrowings; a front-end fee of 1% on the principal amount of borrowings at the time of borrowing; and a commitment fee of 0.5% per annum on funds available for borrowing and not borrowed. The Company was able to prepay all or a part of the outstanding principal, subject to a 1% prepayment premium. The Company had pledged certain assets as collateral supporting its repayment obligations (see Note 4). As of July 2, 2017 and January 1, 2017, the Company had restricted cash and cash equivalents of zero and \$9.2 million related to the IFC debt service reserve, which was the amount, as determined by IFC, equal to the aggregate principal and interest due on the next succeeding interest payment date. On January 17, 2017, the Company repaid the entire outstanding balance, and the associated interest, of the mortgage loan agreement with IFC.

Loan Agreement with California Enterprise Development Authority ("CEDA")

In 2010, the Company borrowed the proceeds of the \$30.0 million aggregate principal amount of CEDA's tax-exempt Recovery Zone Facility Revenue Bonds (SunPower Corporation - Headquarters Project) Series 2010 (the "Bonds") maturing April 1, 2031 under a loan agreement with CEDA. The Bonds mature on April 1, 2031, bear interest at a fixed rate of 8.50% through maturity, and include customary covenants and other restrictions on the Company.

Revolving Credit Facility with Credit Agricole

In July 2013, the Company entered into a revolving credit agreement with Credit Agricole Corporate and Investment Bank ("Credit Agricole"), as administrative agent, and certain financial institutions, under which the Company may borrow up to \$250.0 million. On August 26, 2014, the Company entered into an amendment to the revolving credit facility that, among other things, extends the maturity date of the facility from July 3, 2016 to August 26, 2019 (the "Maturity Date"). Amounts borrowed may be repaid and reborrowed until the Maturity Date. On February 17, 2016, the Company entered into an amendment to the credit agreement, expanding the available borrowings under the revolving credit facility to \$300.0 million and adding a \$200.0 million letter of credit subfacility, subject to the satisfaction of certain conditions. The revolving credit facility includes representations, covenants, and events of default customary for financing transactions of this type.

On June 23, 2017, the Company entered into an Amended and Restated Revolving Credit Agreement (the "Restated Credit Agreement") with Credit Agricole Corporate and Investment Bank, as administrative agent, and the other lenders party thereto, which amends and restates the Revolving Credit Agreement dated July 3, 2013, as amended, by and between the Company, the Administrative Agent and the other parties thereto, as amended to date.

Table of Contents

The Restated Credit Agreement was entered into in connection with the Letter Agreement between the Company and Total S.A. dated May 8, 2017 (the "Letter Agreement"), which was entered into to facilitate the issuance by Total S.A. of one or more guaranties of the Company's payment obligations (the "Guaranties") of up to \$100.0 million under the Restated Credit Agreement. The maturity date of the Letter Agreement is August 26, 2019.

The maturity date of the facility under the Restated Credit Agreement remains August 26, 2019 (the "Maturity Date"), and amounts borrowed under the facility may be repaid and reborrowed until the Maturity Date. Available borrowings under the Restated Credit Agreement remain \$300.0 million; provided that the aggregate principal amount of all amounts borrowed under the facility cannot exceed 95.0% of the amounts guaranteed by Total under the Letter Agreement.

The Restated Credit Agreement (a) removes the ability of the Company to request the issuance of performance and financial letters of credit, (b) removes certain covenants, including covenants related to a maximum leverage ratio and a minimum consolidated liquidity, (c) removes the negative pledge on certain assets of the Company, (d) removes certain domestic subsidiaries of the Company as guarantors, and (e) effects other revisions to the terms thereof. All collateral previously pledged to secure the Company's obligations to the lenders has been released.

The Company is required to pay (a) interest on outstanding borrowings under the facility of (i) with respect to any LIBOR rate loan, an amount equal to 0.6% plus the LIBOR rate divided by a percentage equal to one minus the stated maximum rate of all reserves required to be maintained against "Eurocurrency liabilities" as specified in Regulation D; and (ii) with respect to any alternate base rate loan, an amount equal to 0.25% plus the greater of (1) the prime rate, (2) the Federal Funds rate plus 0.50%, and (3) the one-month LIBOR rate plus 1%; and (b) a commitment fee of 0.06% per annum on funds available for borrowing and not borrowed. The Restated Credit Agreement includes representations, covenants, and events of default customary for financing transactions of this type.

As of July 2, 2017, the Company had no outstanding borrowings under the restated revolving credit facility. As of January 1, 2017, the Company had \$4.7 million of outstanding borrowings under the revolving credit facility, all of which were related to letters of credit that were fully cash collateralized at the time.

August 2016 Letter of Credit Facility Agreement

In August 2016, the Company entered into a letter of credit facility with Banco Santander, S.A. which provides for the issuance, upon request by the Company, of letters of credit to support obligations of the Company in an aggregate amount not to exceed \$85 million. As of July 2, 2017 and January 1, 2017, there were no letters of credit issued and outstanding under the facility with Banco Santander, S.A.

2016 Letter of Credit Facility Agreements

In June 2016, the Company entered into a Continuing Agreement for Standby Letters of Credit and Demand Guarantees with Deutsche Bank AG New York Branch and Deutsche Bank Trust Company Americas (the "2016 Non-Guaranteed LC Facility") which provides for the issuance, upon request by the Company, of letters of credit to support the Company's obligations in an aggregate amount not to exceed \$50.0 million. The 2016 Non-Guaranteed LC Facility will terminate on June 29, 2018. As of July 2, 2017 and January 1, 2017, letters of credit issued and outstanding under the 2016 Non-Guaranteed LC Facility totaled \$34.6 million and \$45.8 million, respectively.

In June 2016, the Company entered into bilateral letter of credit facility agreements (the "2016 Guaranteed LC Facilities") with Bank of Tokyo-Mitsubishi UFJ ("BTMU"), Credit Agricole, and HSBC USA Bank, National

Association ("HSBC"). Each letter of credit facility agreement provides for the issuance, upon the Company's request, of letters of credit by the issuing bank thereunder in order to support certain of the Company's obligations until December 31, 2018. Payment of obligations under the 2016 Guaranteed Letter of Credit Facilities is guaranteed by Total S.A. pursuant to the Credit Support Agreement. Aggregate letter of credit amounts may be increased upon the agreement of the respective parties but, otherwise, may not exceed \$75.0 million with BTMU, \$75.0 million with Credit Agricole and \$175.0 million with HSBC. Each letter of credit issued under one of the letter of credit facilities generally must have an expiration date, subject to certain exceptions, no later than the earlier of (a) two years from completion of the applicable project and (b) March 31, 2020.

In June 2016, in connection with the 2016 Guaranteed LC Facilities, the Company entered into a transfer agreement to transfer to the 2016 Guaranteed LC Facilities all existing outstanding letters of credit issued under the Company's letter of credit facility agreement with Deutsche Bank AG New York Branch and Deutsche Bank Trust Company Americas, as administrative agent, and certain financial institutions, entered into in August 2011 and amended from time to time. In

Table of Contents

connection with the transfer of the existing outstanding letters of credit, the aggregate commitment amount under the August 2011 letter of credit facility was permanently reduced to zero on June 29, 2016. As of July 2, 2017 and January 1, 2017, letters of credit issued and outstanding under the 2016 Guaranteed LC Facilities totaled \$197.0 million and \$244.8 million, respectively.

September 2011 Letter of Credit Facility with Deutsche Bank and Deutsche Bank Trust Company Americas (together, "Deutsche Bank Trust")

In September 2011, the Company entered into a letter of credit facility with Deutsche Bank Trust which provides for the issuance, upon request by the Company, of letters of credit to support obligations of the Company in an aggregate amount not to exceed \$200.0 million. Each letter of credit issued under the facility is fully cash-collateralized and the Company has entered into a security agreement with Deutsche Bank Trust, granting them a security interest in a cash collateral account established for this purpose.

As of July 2, 2017 and January 1, 2017, letters of credit issued and outstanding under the Deutsche Bank Trust facility totaled \$1.4 million and \$3.1 million, respectively, which were fully collateralized with restricted cash on the Consolidated Balance Sheets.

Revolving Credit Facility with Mizuho and Goldman Sachs

On May 4, 2016, the Company entered into a revolving credit facility (the "Construction Revolver") with Mizuho Bank Ltd., as administrative agent, and Goldman Sachs Bank USA, under which the Company may borrow up to \$200 million. The Construction Revolver also includes a \$100 million accordion feature. Amounts borrowed under the facility may be repaid and reborrowed in support of the Company's commercial and small-scale utility projects in the United States until the May 4, 2021 maturity date. The facility includes representations, covenants, and events of default customary for financing transactions of this type.

Borrowings under the Construction Revolver bear interest at the applicable LIBOR rate plus 1.50% for the first two years, with the final year at LIBOR plus 1.75%. All outstanding indebtedness under the facility may be voluntarily prepaid in whole or in part without premium or penalty (with certain limitations to partial repayments), other than customary breakage costs. The facility is secured by the assets of, and equity in, the various project companies to which the borrowings relate, but is otherwise non-recourse to the Company and its other affiliates.

As of July 2, 2017 and January 1, 2017, the aggregate carrying value of the Construction Revolver totaled \$1.7 million and \$10.5 million, respectively.

Non-recourse Financing and Other Debt

In order to facilitate the construction, sale or ongoing operation of certain solar projects, including the Company's residential leasing program, the Company regularly obtains project-level financing. These financings are secured either by the assets of the specific project being financed or by the Company's equity in the relevant project entity and the lenders do not have recourse to the general assets of the Company for repayment of such debt obligations, and hence the financings are referred to as non-recourse. Non-recourse financing is typically in the form of loans from third-party financial institutions, but also takes other forms, including "partnership flip" structures, sale-leaseback arrangements, or other forms commonly used in the solar or similar industries. The Company may seek non-recourse financing covering solely the construction period of the solar project or may also seek financing covering part or all of the operating life of the solar project. The Company classifies non-recourse financings in the Consolidated Balance Sheets in accordance with their terms; however, in certain circumstances, the Company may repay or refinance these

financings prior to stated maturity dates in connection with the sale of the related project or similar such circumstances. In addition, in certain instances, the customer may assume the loans at the time that the project entity is sold to the customer. In these instances, subsequent debt assumption is reflected as a financing outflow and operating inflow in the Consolidated Statements of Cash Flows to reflect the substance of the assumption as a facilitation of customer financing from a third party.

The following presents a summary of the Company's non-recourse financing arrangements, including arrangements that are not classified as debt:

35

Table of Contents

(In thousands)	Aggregate Carrying Value ¹		Balance Sheet Classification
	July 2, 2017	January 1, 2017	
Residential Lease Program			
Bridge loans	\$12,337	\$ 6,718	Short-term debt and Long-term debt
Long-term loans	306,164	283,852	Short-term debt and Long-term debt
Financing arrangements with third parties	29,340	29,370	Other long-term liabilities
Tax equity partnership flip facilities	235,057	183,109	Redeemable non-controlling interests in subsidiaries and Non-controlling interests in subsidiaries
Power Plant and Commercial Projects			
Boulder I credit facility	28,775	28,775	Short-term debt and Long-term debt
El Pelicano credit facility	174,787	90,474	Short-term debt and Long-term debt
Gala credit facility	79,565	—	Short-term debt
Construction Revolver	1,679	10,469	Long-term debt
Arizona loan	7,554	7,649	Short-term debt and Long-term debt

¹ Based on the nature of the debt arrangements included in the table above, and the Company's intention to fully repay or transfer the obligations at their face values plus any applicable interest, the Company believes their carrying value materially approximates fair value, thus non-recurring fair value measurements have not been performed.

For the Company's residential lease program, non-recourse financing is typically accomplished by aggregating an agreed-upon volume of solar power systems and leases with residential customers into a specific project entity. The Company has entered into the following non-recourse financings with respect to its residential lease program:

In fiscal 2016, the Company entered into bridge loans to finance solar power systems and leases under its residential lease program. The loans are repaid over terms ranging from two to seven years. Some loans may be prepaid without penalties at the Company's option at any time, while other loans may be prepaid, subject to a prepayment fee, after one year. During the three and six months ended July 2, 2017, the Company had net proceeds of \$3.5 million and \$5.6 million, respectively, in connection with these loans. During the three and six months ended July 3, 2016, the Company had net proceeds of \$17.1 million and \$34.1 million, respectively, in connection with these loans. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of these loans, presented in "Short-term debt" and "Long-term debt" on the Company's Consolidated Balance Sheets, was \$12.3 million and \$6.7 million, respectively.

The Company enters into long-term loans to finance solar power systems and leases under its residential lease program. The loans are repaid over their terms of between 17 and 18 years, and may be prepaid without penalty at the Company's option beginning seven years after the original issuance of the loan. During the three and six months ended July 2, 2017, the Company had net proceeds of \$4.8 million and \$22.0 million, respectively, in connection with these loans. During the three and six months ended July 3, 2016, the Company had net proceeds (repayments) of \$(1.1) million and \$2.1 million, respectively, in connection with these loans. As of July 2, 2017, and January 1, 2017, the aggregate carrying amount of these loans, presented in "Short-term debt" and "Long-term debt" on the Company's Consolidated Balance Sheets, was \$306.2 million and \$283.9 million, respectively.

The Company has entered into multiple arrangements under which solar power systems are financed by third-party investors or customers, including by a legal sale of the underlying asset that is accounted for as a borrowing under relevant accounting guidelines as the requirements to recognize the transfer of the asset were not met. Under the terms

of these arrangements, the third parties make an upfront payment to the Company, which the Company recognizes as a liability that will be reduced over the term of the arrangement as lease receivables and government incentives are received by the third party. As the liability is reduced, the Company makes a corresponding reduction in receivables. We use this approach to account for both operating and sales-type leases with our residential lease customers in our consolidated financial statements. During the three and six months ended July 3, 2016, the Company had net proceeds of \$7.8 million and \$14.9 million, respectively, in connection with these facilities. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of these facilities, presented in "Other long-term liabilities" on the Company's Consolidated Balance Sheets, was \$29.3 million and \$29.4 million, respectively (see Note 4).

Table of Contents

The Company also enters into facilities with third-party tax equity investors under which the investors invest in a structure known as a partnership flip. The Company holds controlling interests in these less-than-wholly-owned entities and therefore fully consolidates these entities. The Company accounts for the portion of net assets in the consolidated entities attributable to the investors as noncontrolling interests in its consolidated financial statements. Noncontrolling interests in subsidiaries that are redeemable at the option of the noncontrolling interest holder are classified accordingly as redeemable, between liabilities and equity on the Company's Consolidated Balance Sheets. During the three and six months ended July 2, 2017, the Company had net contributions of \$42.9 million and \$88.2 million, respectively, under these facilities and attributed losses of \$19.0 million and \$36.3 million, respectively, to the non-controlling interests corresponding principally to certain assets, including tax credits, which were allocated to the non-controlling interests during the periods. During the three and six months ended July 3, 2016, the Company had net contributions of \$31.5 million and \$50.3 million, respectively, under these facilities and attributed losses of \$20.2 million and \$36.8 million, respectively, to the non-controlling interests corresponding principally to certain assets, including tax credits, that were allocated to the non-controlling interests during the periods. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of these facilities, presented in "Redeemable non-controlling interests in subsidiaries" and "Non-controlling interests in subsidiaries" on the Company's Consolidated Balance Sheets, was \$235.1 million and \$183.1 million, respectively.

For the Company's power plant and commercial solar projects, non-recourse financing is typically accomplished using an individual solar power system or a series of solar power systems with a common end customer, in each case owned by a specific project entity. The Company has entered into the following non-recourse financings with respect to its power plant and commercial projects:

In fiscal 2017, the Company entered into a short-term credit facility to finance the 70 MW utility-scale Gala power plant project in Oregon. During the three and six months ended July 2, 2017, the Company had net proceeds of \$54.0 million and \$77.5 million, respectively, in connection with the facility. As of July 2, 2017, the aggregate carrying amount of this facility, presented in "Short-term debt" on the Company's Consolidated Balance Sheets, was \$79.6 million.

In fiscal 2016, the Company entered into the Construction Revolver credit facility to support the construction of the Company's commercial and small-scale utility projects in the United States. During the three and six months ended July 2, 2017, the Company had net proceeds (repayments) of \$(3.0) million and \$9.1 million, respectively, in connection with the facility. As of July 2, 2017, and January 1, 2017, the aggregate carrying amount of the Construction Revolver, presented in "Long-term debt" on the Company's Consolidated Balance Sheets, was \$1.7 million and \$10.5 million, respectively.

In fiscal 2016, the Company entered into a long-term credit facility to finance the 125 MW utility-scale Boulder power plant project in Nevada. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of this facility, presented in "Short-term debt" and "Long-term debt" on the Company's Consolidated Balance Sheets, was \$28.8 million.

In fiscal 2016, the Company entered into a long-term credit facility to finance the 111 MW utility-scale El Pelicano power plant project in Chile. During the three and six months ended July 2, 2017, the Company had net proceeds of \$46.9 million and \$84.3 million, respectively, in connection with the facility. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of this facility, presented in "Short-term debt" and "Long-term debt" on the Company's Consolidated Balance Sheets, was \$174.8 million and \$90.5 million, respectively.

In fiscal 2013, the Company entered into a long-term loan agreement to finance a 5.4 MW utility and power plant operating in Arizona. As of both July 2, 2017 and January 1, 2017, the aggregate carrying amount under this loan,

presented in "Short-term debt" and "Long-term debt" on the Company's Consolidated Balance Sheets, was \$7.6 million.

Other debt is further composed of non-recourse project loans in EMEA, which are scheduled to mature through 2028.

See Note 5 for discussion of the Company's sale-leaseback arrangements accounted for under the financing method.

Note 11. DERIVATIVE FINANCIAL INSTRUMENTS

The following tables present information about the Company's hedge instruments measured at fair value on a recurring basis as of July 2, 2017 and January 1, 2017, all of which utilize Level 2 inputs under the fair value hierarchy:

Table of Contents

(In thousands)	Balance Sheet Classification	July 2, 2017	January 1, 2017
Assets:			
Derivatives designated as hedging instruments:			
Foreign currency forward exchange contracts	Prepaid expenses and other current assets	\$398	\$ 1,711
		\$398	\$ 1,711
Derivatives not designated as hedging instruments:			
Foreign currency option contracts	Prepaid expenses and other current assets	\$970	\$ 1,076
Foreign currency forward exchange contracts	Prepaid expenses and other current assets	1,369	2,015
Interest rate contracts	Other long-term assets	9,432	11,429
		\$11,771	\$ 14,520
Liabilities:			
Derivatives designated as hedging instruments:

Table of Contents

The following table summarizes the pre-tax amount of unrealized gain or loss recognized in "Accumulated other comprehensive income" ("OCI") in "Stockholders' equity" in the Consolidated Balance Sheets:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Derivatives designated as cash flow hedges:				
Gain (loss) in OCI at the beginning of the period	\$(59)	\$(803)	\$1,203	\$5,942
Unrealized gain (loss) recognized in OCI (effective portion)	511	(326)	(425)	(11)
Less: Loss (gain) reclassified from OCI to revenue (effective portion)	(527)	190	(853)	(6,870)
Net loss on derivatives	\$(16)	\$(136)	\$(1,278)	\$(6,881)
Loss in OCI at the end of the period	\$(75)	\$(939)	\$(75)	\$(939)

The following table summarizes the amount of gain or loss recognized in "Other, net" in the Consolidated Statements of Operations in the three and six months ended July 2, 2017 and July 3, 2016:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Derivatives designated as cash flow hedges:				
Gain (loss) recognized in "Other, net" on derivatives (ineffective portion and amount excluded from effectiveness testing)	\$71	\$(1,211)	\$103	\$(1,671)
Derivatives not designated as hedging instruments:				
Gain (loss) recognized in "Other, net"	\$328	\$(5,394)	\$(1,068)	\$(11,709)

Foreign Currency Exchange Risk

Designated Derivatives Hedging Cash Flow Exposure

The Company's cash flow exposure primarily relates to anticipated third-party foreign currency revenues and expenses and interest rate fluctuations. To protect financial performance, the Company enters into foreign currency forward and option contracts designated as cash flow hedges to hedge certain forecasted revenue transactions denominated in currencies other than their functional currencies.

As of July 2, 2017, the Company had designated outstanding cash flow hedge forward contracts with an aggregate notional value of \$21.9 million. As of January 1, 2017, the Company had designated outstanding cash flow hedge option contracts with an aggregate notional value of \$17.3 million. The Company designates either gross external or intercompany revenue up to its net economic exposure. These derivatives have a maturity of 12 months or less and consist of foreign currency option and forward contracts. The effective portion of these cash flow hedges is reclassified into revenue when third-party revenue is recognized in the Consolidated Statements of Operations.

Non-Designated Derivatives Hedging Transaction Exposure

Derivatives not designated as hedging instruments consist of forward and option contracts used to hedge re-measurement of foreign currency denominated monetary assets and liabilities primarily for intercompany transactions, receivables from customers, and payables to third parties. Changes in exchange rates between the Company's subsidiaries' functional currencies and the currencies in which these assets and liabilities are denominated can create fluctuations in the Company's reported consolidated financial position, results of operations and cash flows.

As of July 2, 2017, to hedge balance sheet exposure, the Company held option contracts and forward contracts with an aggregate notional value of \$1.6 million and \$26.8 million, respectively. The maturity dates of these contracts range from July 2017 to September 2017. As of January 1, 2017, to hedge balance sheet exposure, the Company held option contracts and forward contracts with an aggregate notional value of \$11.0 million and \$42.9 million, respectively. The maturity dates of these contracts ranged from January 2017 to June 2017.

Interest Rate Risk

Table of Contents

The Company also enters into interest rate swap agreements to reduce the impact of changes in interest rates on its project specific non-recourse floating rate debt. As of both July 2, 2017 and January 1, 2017, the Company had interest rate swap agreements designated as cash flow hedges with an aggregate notional value of \$7.6 million, and interest rate swap agreements not designated as cash flow hedges with an aggregate notional value of \$191.9 million and \$170.3 million, respectively. These swap agreements allow the Company to effectively convert floating-rate payments into fixed rate payments periodically over the life of the agreements. These derivatives have a maturity of more than 12 months. The effective portion of these swap agreements designated as cash flow hedges is reclassified into interest expense when the hedged transactions are recognized in the Consolidated Statements of Operations. The Company analyzes its designated interest rate swaps quarterly to determine if the hedge transaction remains effective or ineffective. The Company may discontinue hedge accounting for interest rate swaps prospectively if certain criteria are no longer met, the interest rate swap is terminated or exercised, or if the Company elects to remove the cash flow hedge designation. If hedge accounting is discontinued, and the forecasted hedged transaction is considered possible to occur, the previously recognized gain or loss on the interest rate swaps will remain in accumulated other comprehensive loss and will be reclassified into earnings during the same period the forecasted hedged transaction affects earnings or is otherwise deemed improbable to occur. All changes in the fair value of non-designated interest rate swap agreements are recognized immediately in current period earnings.

Credit Risk

The Company's option and forward contracts do not contain any credit-risk-related contingent features. The Company is exposed to credit losses in the event of nonperformance by the counterparties to these option and forward contracts. The Company enters into derivative contracts with high-quality financial institutions and limits the amount of credit exposure to any single counterparty. In addition, the Company continuously evaluates the credit standing of its counterparties.

Note 12. INCOME TAXES

In the three and six months ended July 2, 2017, the Company's income tax provision of \$2.4 million and \$4.4 million, respectively, on a loss before income taxes and equity in earnings of unconsolidated investees of \$115.9 million and \$266.6 million, respectively, was primarily due to projected tax expense in profitable jurisdictions, whereas its income tax provision of \$6.6 million and \$9.8 million in the three and six months ended July 3, 2016 on a loss before income taxes and equity in earnings of unconsolidated investees of \$93.9 million and \$191.4 million, respectively, also included the recognition of U.S. prepaid income tax due to intercompany transactions in addition to projected tax expense in profitable jurisdictions.

For the reporting period ended July 2, 2017, in accordance with FASB guidance for interim reporting of income tax, the Company has computed its provision for income taxes based on a projected annual effective tax rate while excluding loss jurisdictions which cannot be benefited.

The Company adopted the guidance under ASU 2016-09 "Improvements to Employee Share-Based Payment Accounting" in the first quarter of fiscal 2017 and as a result, excess tax benefits from share-based award activity for the three and six months ended July 2, 2017 are reflected as a reduction of the provision for income taxes whereas they were previously recognized in equity. The Company did not recognize any tax benefit during the three and six months ended July 2, 2017 because the Company has forecasted a current year loss in the United States. The Company also early adopted the guidance under ASU 2016-16 "Intra-Entity Transfers of Assets Other than Inventory" in the first quarter of fiscal 2017 and as a result, tax effects of intercompany transactions are recognized when the transfers occur whereas they were previously deferred and amortized.

Table of Contents

Note 13. NET INCOME (LOSS) PER SHARE

The Company calculates net income (loss) per share by dividing earnings allocated to common stockholders by the weighted average number of common shares outstanding for the period.

Diluted weighted average shares is computed using basic weighted average shares plus any potentially dilutive securities outstanding during the period using the treasury-stock-type method and the if-converted method, except when their effect is anti-dilutive. Potentially dilutive securities include stock options, restricted stock units, the Upfront Warrants held by Total, and the outstanding senior convertible debentures.

The following table presents the calculation of basic and diluted net loss per share:

(In thousands, except per share amounts)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Basic net loss per share:				
Numerator				
Net loss attributable to stockholders	\$(93,760)	\$(69,992)	\$(228,239)	\$(155,401)
Denominator				
Basic weighted-average common shares	139,448	138,084	139,175	137,644
Basic net loss per share	\$(0.67)	\$(0.51)	\$(1.64)	\$(1.13)
Diluted net loss per share:				
Numerator				
Net loss available to common stockholders	\$(93,760)	\$(69,992)	\$(228,239)	\$(155,401)
Denominator				
Dilutive weighted-average common shares	139,448	138,084	139,175	137,644
Diluted net loss per share	\$(0.67)	\$(0.51)	\$(1.64)	\$(1.13)

The following is a summary of outstanding anti-dilutive potential common stock that was excluded from loss per diluted share in the following periods:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017 ¹	July 3, 2016 ¹	July 2, 2017 ¹	July 3, 2016 ¹
Stock options	106	147	106	147
Restricted stock units	3,585	5,502	3,585	5,502
Upfront Warrants (held by Total)	—	5,338	—	5,853
4.00% debentures due 2023	13,922	13,922	13,922	13,922
0.75% debentures due 2018	12,026	12,026	12,026	12,026
0.875% debentures due 2021	8,203	8,203	8,203	8,203

As a result of the net loss per share for the three and six months ended July 2, 2017 and July 3, 2016, the inclusion of all potentially dilutive stock options, restricted stock units, and common shares under noted warrants and convertible debt would be anti-dilutive. Therefore, those stock options, restricted stock units and shares were excluded from the computation of the weighted-average shares for diluted net loss per share for such periods.

Note 14. STOCK-BASED COMPENSATION

The following table summarizes the consolidated stock-based compensation expense by line item in the Consolidated Statements of Operations:

41

Table of Contents

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Cost of Residential revenue	\$314	\$1,652	\$524	\$2,479
Cost of Commercial revenue	293	745	542	1,397
Cost of Power Plant revenue	445	3,066	1,170	5,712
Research and development	1,036	2,966	2,564	5,998
Sales, general and administrative	6,518	8,046	11,181	17,409
Total stock-based compensation expense	\$8,606	\$16,475	\$15,981	\$32,995

The following table summarizes the consolidated stock-based compensation expense by type of award:

(In thousands)	Three Months Ended		Six Months Ended	
	July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
Restricted stock units	\$9,675	\$15,734	\$16,911	\$33,167
Change in stock-based compensation capitalized in inventory	(1,069)	741	(930)	(172)
Total stock-based compensation expense	\$8,606	\$16,475	\$15,981	\$32,995

Note 15. SEGMENT AND GEOGRAPHICAL INFORMATION

The Company's President and Chief Executive Officer, as the CODM, has organized the Company, manages resource allocations and measures performance of the Company's activities among three end-customer segments: (i) Residential Segment, (ii) Commercial Segment and (iii) Power Plant Segment (see Note 1). The Residential and Commercial Segments combined are referred to as Distributed Generation.

The CODM assesses the performance of the three end-customer segments using information about their revenue, gross margin, and adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") after certain adjustments, described below in further detail. Additionally, for purposes of calculating Adjusted EBITDA, the calculation includes equity in earnings of unconsolidated investees and net loss attributable to noncontrolling interests and redeemable noncontrolling interests and excludes cash interest expense, net of interest income, and depreciation. The CODM does not review asset information by segment.

Adjustments Made for Segment Purposes

8point3 Energy Partners

The Company includes adjustments related to the sales of projects contributed to 8point3 based on the difference between the fair market value of the consideration received and the net carrying value of the projects contributed, of which, a portion is deferred in proportion to the Company's retained equity interest in 8point3. Under U.S. GAAP ("GAAP"), these sales are recognized under either real estate, lease, or consolidation accounting guidance depending upon the nature of the individual asset contributed, with outcomes ranging from no, partial, or full profit recognition.

Utility and power plant projects

The Company includes adjustments related to the revenue recognition of certain utility and power plant projects based on percentage-of-completion accounting and, when relevant, the allocation of segment revenue and margin to the Company's project development efforts at the time of initial project sale. Under GAAP, such projects are accounted for under real estate accounting guidance, under which no separate allocation to the Company's project development efforts occurs and the amount of revenue and margin that is recognized may be limited in circumstances where the Company has certain forms of continuing involvement in the project. Over the life of each project, cumulative revenue and gross margin will eventually be equivalent under both the GAAP and segment treatments; however, revenue and gross margin will generally be recognized earlier under the Company's segment treatment. Within each project, the relationship between the adjustments to revenue and gross margins is generally consistent. However, as the Company may have multiple utility and power plant projects in differing stages of progress at any given time, the relationship in the aggregate will occasionally appear otherwise.

Sale of operating lease assets

The Company includes adjustments related to the revenue recognition on the sale of certain solar assets subject to an operating lease (or of solar assets that are leased by or intended to be leased by the third-party purchaser to another party) based on the net proceeds received from the purchaser. Under GAAP, these sales are accounted for as borrowing transactions in accordance with lease accounting guidance. Under such guidance, revenue and profit recognition is based on rental payments made by the end lessee, and the net proceeds from the purchaser are recorded as a non-recourse borrowing liability, with imputed interest expense recorded on the liability. This treatment continues until the Company has transferred the substantial risks of ownership, as defined by lease accounting guidance, to the purchaser, at which point the sale is recognized.

Sale-leaseback transactions

The Company includes adjustments related to the revenue recognition on certain sale-leaseback transactions based on the net proceeds received from the buyer-lessor. Under GAAP, these transactions are accounted for under the financing method in accordance with real estate accounting guidance. Under such guidance, no revenue or profit is recognized at the inception of the transaction, and the net proceeds from the buyer-lessor are recorded as a financing liability. Imputed interest is recorded on the liability equal to the Company's incremental borrowing rate adjusted solely to prevent negative amortization.

Stock-based compensation

The Company incurs stock-based compensation expense related primarily to the Company's equity incentive awards. The Company excludes this expense from its segment results.

Amortization of intangible assets

The Company incurs amortization expense on intangible assets as a result of acquisitions, which includes patents, project assets, purchased technology, in-process research and development and trade names. The Company excludes this expense from its segment results.

Non-cash interest expense

The Company incurs non-cash interest expense related to the amortization of items such as original issuance discounts on certain of its convertible debt. The Company excludes this expense from its segment results.

Restructuring expense

The Company incurs restructuring expense related to reorganization plans aimed towards realigning resources consistent with the Company's global strategy and improving its overall operating efficiency and cost structure. The Company excludes this expense from its segment results.

Arbitration ruling

On January 28, 2015, an arbitral tribunal of the International Court of Arbitration of the International Chamber of Commerce declared a binding partial award in the matter of an arbitration between First Philippine Electric Corporation (“FPEC”) and First Philippine Solar Corporation (“FPSC”) against SunPower Philippines Manufacturing, Ltd. (“SPML”), the Company’s wholly-owned subsidiary. The tribunal found SPML in breach of its obligations under its supply agreement with FPSC, and in breach of its joint venture agreement with FPEC. The second partial and final awards dated July 14, 2015 and September 30, 2015, respectively, reduced the estimated amounts to be paid to FPEC, and on July 22, 2016, SPML entered into a settlement with FPEC and FPSC and paid a total of \$50.5 million in settlement of all claims between the parties. As a result, the Company recorded its best estimate of probable loss related to this case at the time of the initial ruling and updated the estimate as circumstances warranted. The Company excludes these amounts from its segment results.

IPO-related costs

The Company incurred legal, accounting, advisory, valuation, and other costs related to the IPO of 8point3, as well as modifications to or terminations of certain existing financing structures in preparation for the sale to 8point3. The Company excludes these costs from its segment results.

Cost of above-market polysilicon

As described in Note 8, the Company has entered in previous years into multiple long-term, fixed-price supply agreements to purchase polysilicon for periods of up to 10 years. The prices in these supply agreements, which incorporate a cash portion and a non-cash portion attributable to the amortization of prepayments made under the agreements, significantly exceed market prices. Additionally, in order to reduce inventory and improve working capital, the Company has periodically elected to sell polysilicon inventory in the marketplace at prices below the Company’s purchase price, thereby incurring a loss. Starting in the first quarter of fiscal 2017, the Company has excluded the impact of its above-market cost of polysilicon, including the effect of above-market polysilicon on product costs, losses incurred on sales of polysilicon to third parties, and inventory reserves and project asset impairments recorded as a result of above-market polysilicon, from its segment results.

Other

The Company combines amounts previously disclosed under separate captions into “Other” when amounts do not have a significant impact on the presented fiscal periods.

Segment and Geographical Information

The following tables present information by end-customer segment including revenue, gross margin, and adjusted EBITDA, each as reviewed by the CODM, as well as information about significant customers and revenue by geography, based on the destination of the shipments.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward-Looking Statements

You should read the following discussion of our financial condition and results of operations in conjunction with the consolidated financial statements and the notes thereto included elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended January 1, 2017 filed with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act").

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not represent historical facts and the assumptions underlying such statements. We use words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "predict," "project," "potential," "will," "would," "should," and similar expressions to identify forward-looking statements. Forward-looking statements in this Quarterly Report on Form 10-Q include, but are not limited to, our plans and expectations regarding future financial results, expected operating results, business strategies, projected costs and cost reduction, development of new products and improvements to our existing products, our manufacturing capacity and manufacturing costs, the adequacy of our agreements with our suppliers, our ability to monetize utility projects, competitive positions, management's plans and objectives for future operations, the sufficiency of our cash and our liquidity, our ability to obtain financing, our ability to comply with debt covenants or cure any defaults, our ability to repay our obligations as they come due (and in particular our 0.75% debentures due 2018), our ability to continue as a going concern, trends in average selling prices, the success of our joint ventures and acquisitions, expected capital expenditures, warranty matters, outcomes of litigation, our exposure to foreign exchange, interest and credit risk, general business and economic conditions in our markets, industry trends, the impact of changes in government incentives, expected restructuring charges, and the likelihood of any impairment of project assets, long-lived assets, and investments. These forward-looking statements are based on information available to us as of the date of this Quarterly Report on Form 10-Q and current expectations, forecasts and assumptions and involve a number of risks and uncertainties that could cause actual results to differ materially from those anticipated by these forward-looking statements. Such risks and uncertainties include a variety of factors, some of which are beyond our control. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, those discussed in the section titled "Risk Factors" included in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended January 1, 2017, and our other filings with the Securities and Exchange Commission ("SEC"). These forward-looking statements should not be relied upon as representing our views as of any subsequent date, and we are under no obligation to, and expressly disclaim any responsibility to, update or alter our forward-looking statements, whether as a result of new information, future events or otherwise.

Our fiscal year ends on the Sunday closest to the end of the applicable calendar year. All references to fiscal periods apply to our fiscal quarter or year, which end on the Sunday closest to the calendar month end.

Overview

SunPower is a leading global energy company that delivers complete solar solutions to residential, commercial, and power plant customers worldwide through an array of hardware, software, and financing options and through utility-scale solar power system construction and development capabilities, O&M services, and "Smart Energy" solutions. Our Smart Energy initiative is designed to add layers of intelligent control to homes, buildings and grids—all personalized through easy-to-use customer interfaces. Of all the solar cells commercially available to the mass market, we believe our solar cells have the highest conversion efficiency, a measurement of the amount of sunlight converted

by the solar cell into electricity. For more information about our business, please refer to the section titled "Part I. Item 1. Business" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017.

Segments Overview

We operate in three end-customer segments: (i) Residential Segment, (ii) Commercial Segment and (iii) Power Plant Segment. Our President and Chief Executive Officer, as the chief operating decision maker, reviews our business and manages resource allocations and measures performance of our activities among these three end-customer segments. The Residential and Commercial Segments combined are referred to as Distributed Generation. For more information about our business segments, see the section titled "Part I. Item 1. Business" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017. For more segment information, see "Item 1. Financial Statements and Supplementary Data—Note 15. Segment Information" in the Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Table of Contents

Unit of Power

When referring to our solar power systems, our facilities' manufacturing capacity, and total sales, the unit of electricity in watts for kilowatts ("KW"), megawatts ("MW"), and gigawatts ("GW") is direct current ("DC"), unless otherwise noted as alternating current ("AC").

Levelized Cost of Energy ("LCOE")

LCOE is an evaluation of the life-cycle energy cost and life-cycle energy production of an energy producing system. It allows alternative technologies to be compared across different scales of operation, investment or operating time periods. It captures capital costs and ongoing system-related costs, along with the amount of electricity produced, and converts them into a common metric. Key drivers for LCOE reduction for photovoltaic products include panel efficiency, capacity factors, reliable system performance, and the life of the system.

Customer Cost of Energy ("CCOE™")

Our customers are focused on reducing their overall cost of energy by intelligently integrating solar and other distributed generation, energy efficiency, energy management, and energy storage systems with their existing utility-provided energy. The CCOE™ measurement is an evaluation of a customer's overall cost of energy, taking into account the cost impact of each individual generation source (including the utility), energy storage systems, and energy management systems. The CCOE measurement includes capital costs and ongoing operating costs, along with the amount of electricity produced, stored, saved, or re-sold, and converts all of these variables into a common metric. The CCOE metric allows a customer to compare different portfolios of generation sources, energy storage, and energy management, and to tailor towards optimization.

Seasonal Trends

Our business is subject to industry-specific seasonal fluctuations including changes in weather patterns and economic incentives, among others. Sales have historically reflected these seasonal trends with the largest percentage of total revenues realized during the last two quarters of a fiscal year. The construction of solar power systems or installation of solar power components and related revenue may decline during cold and/or rainy winter months. In the United States, many customers make purchasing decisions towards the end of the year in order to take advantage of tax credits or for other budgetary reasons. In addition, revenues may fluctuate due to the timing of project sales, construction schedules, and revenue recognition of certain projects, such as those involving the sale of real estate, which may significantly impact the quarterly profile of our results of operations. We may also retain certain development projects on our balance sheet for longer periods of time than in preceding periods in order to optimize the economic value we receive at the time of sale in light of market conditions, which can fluctuate after we have committed to projects. Delays in disposing of projects, or changes in amounts realized on disposition, may lead to significant fluctuations to the period-over-period profile of our results of operations and our cash available for working capital needs.

Fiscal Years

We have a 52-to-53-week fiscal year that ends on the Sunday closest to December 31. Accordingly, every fifth or sixth year will be a 53-week fiscal year. Both fiscal 2017 and 2016 are 52-week fiscal years. The second quarter of fiscal 2017 ended on July 2, 2017, while the second quarter of fiscal 2016 ended on July 3, 2016. The second quarters of fiscal 2017 and 2016 were both 13-week quarters.

Outlook

Demand

In fiscal 2016 we faced market challenges, primarily in our Power Plant Segment, which impacted our margins and prompted us to implement changes to our business in order to realign our downstream investments, optimize our supply chain, and reduce operating expenses. Our actions included the consolidation of our manufacturing operations in order to accelerate operating cost reductions and improve overall operating efficiency. Factors that impacted our margins included write-downs totaling \$46.2 million on certain solar power development projects during 2016 because of adjustments to pricing assumptions, as well as charges totaling \$58.2 million that were recorded in fiscal 2016 in connection with the contracted sale of raw material inventory to third parties as we sought to improve our working capital. In fiscal 2017, we are continuing to focus on projects that we expect will be profitable; however, market conditions can deteriorate after we have committed to projects. For example, shifts in the timing of demand and changes in the internal rate of return ("IRR") that our customers expect can

Table of Contents

significantly affect project sale prices. A pronounced increase in expected customer and investor IRR rates in light of market conditions may continue to drive lower overall project sale prices in fiscal 2017. For more information see "Part I. Item 1A. Risk Factors—Risks Related to Our Sales Channels—Our operating results are subject to significant fluctuations and are inherently unpredictable" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017.

In the face of these near-term challenges, we remain focused on each of our three business segments as well as on continued investment in next-generation technology. We plan to continue to expand the footprint of our Equinox™ and Helix™ complete solutions in our Residential and Commercial businesses. We plan to continue to focus our Power Plant business development resources on a limited number of core markets, primarily in the Americas, where we believe we have a sustainable competitive advantage. Outside of these core markets, we will continue to focus our Power Plant business on the sale of our new Oasis® complete solution, incorporating Performance Series (P-Series) panel technology, to developers and EPC companies in global markets. We have used and expect to continue to use additional financing structures and sources of demand in order to maximize economic returns. For additional information on transactions with 8point3 Energy Partners and associated revenue recognition, see "Item 1. Financial Statements and Supplementary Data—Note 9. Equity Method Investments—Equity Investment in 8point3 Energy Partners" in the Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

In late fiscal 2015, the U.S. government enacted a budget bill that extended the solar commercial investment tax credit (the "Commercial ITC") under Section 48(c) of the Internal Revenue Code of 1986 (the "IRC") and the individual solar investment tax credit under Section 25D of the IRC (together with the Commercial ITC, the "ITC") for five years, at rates gradually decreasing from 30% through 2019 to 22% in 2021. After 2021, the Commercial ITC is retained at 10%. We also saw other recent developments that contributed to a favorable policy environment, including (i) a significant focus on reducing world-wide carbon emissions through such events as the COP21 sustainable innovation forum held in Paris and the announcement of the Clean Power Plan in the United States, and (ii) domestic policy measures such as the extension of bonus depreciation and the approval of California Net Metering. We believe these factors will strengthen long-term demand for our products in all three business segments in U.S. and global markets and provide us an opportunity to expand our suite of energy solutions. However, in the near term, the extension of the ITC has had adverse impacts on our business, as it has reduced the pressure for commercial or residential customers to make purchases before the end of 2016, which was the time when the ITC had previously been set to expire, and instead has pushed demand from these customers into future periods that may now extend through 2021. In addition, the new administration and Congress have expressed interest in comprehensive reform of the U.S. tax code, which could result in the reduction or elimination of various industry-specific tax incentives in return for an overall reduction in corporate tax rates. For more information about the ITC and other policy mechanisms, please refer to the section titled "Item 1. Business—Regulations—Public Policy Considerations" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017. For more information about how we avail ourselves of the benefits of public policies and the risks related to public policies, please see the risk factors set forth under the caption "Part I. Item 1A. Risk Factors—Risks Related to Our Sales Channels" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017, including "—The reduction, modification or elimination of government incentives could cause our revenue to decline and harm our financial results" and "—Existing regulations and policies and changes to these regulations and policies may present technical, regulatory, and economic barriers to the purchase and use of solar power products, which may significantly reduce demand for our products and services."

Supply

We are focused on delivering complete solutions to customers in all three of our business segments. As part of our complete solution approach, we launched our SunPower® Helix™ product for our Commercial Segment during fiscal 2015 and our SunPower® Equinox™ product for our Residential Segment during fiscal 2016. The Equinox and Helix

systems are pre-engineered modular solutions for residential and commercial applications, respectively, that combine our high-efficiency solar module technology with integrated plug-and-play power stations, cable management systems, and mounting hardware that enable our customers to quickly and easily complete system installations and manage their energy production. Our Equinox systems utilize our latest X-Series cell and ACPV technology for residential applications, where we are also expanding our initiatives on storage and Smart Energy solutions. During fiscal 2016 we also launched our new generation technology for our existing Oasis modular solar power blocks for power plant applications. With the addition of these modular solutions in our residential and commercial applications, we are able to provide complete solutions across all end-customer segments. Additionally, we continue to focus on producing our new lower cost, high efficiency Performance Series product line, which will enhance our ability to rapidly expand our global footprint with minimal capital cost.

We continue to see significant and increasing opportunities in technologies and capabilities adjacent to our core product offerings that can significantly reduce our customers' CCOE, including the integration of energy storage and energy management functionality into our systems, and have made investments to realize those opportunities, including our investment

Table of Contents

in a data-driven Energy Services Management Platform from Tendril Networks, Inc., and our strategic partnership with EnerNOC to deploy their Software as a Service energy intelligence software solution to our commercial and power plant customers, enabling our customers to make intelligent energy choices by addressing how they buy energy, how they use energy and when they use it. We have added advanced module-level control electronics to our portfolio of technology designed to enable longer series strings and significant balance of system components cost reductions in large arrays. We are developing next generation microinverter technology and currently offer solar panels that use microinverters designed to eliminate the need to mount or assemble additional components on the roof or the side of a building and enable optimization and monitoring at the solar panel level to ensure maximum energy production by the solar system. We also continue to work on making combined solar and distributed energy storage solutions broadly commercially available to certain customers in the United States through our agreement to offer Sunverge SIS energy solutions comprising batteries, power electronics, and multiple energy inputs controlled by software in the cloud.

We continue to improve our unique, differentiated solar cell and panel technology. We emphasize improvement of our solar cell efficiency and LCOE and CCOE performance through enhancement of our existing products, development of new products and reduction of manufacturing cost and complexity in conjunction with our overall cost-control strategies. We are now producing our solar cells with over 25% efficiency in the lab, have reached production panel efficiencies over 24%, and have started up our high-volume Performance Series production lines in Mexico.

We plan to reduce our overall solar cell manufacturing output to match profitable demand levels, with increasing bias toward our highest efficiency X-Series product platform, which utilizes our latest solar cell technology, and our Performance Series product, which utilizes conventional cell technology that we purchase from third parties in low-cost supply chain ecosystems such as China. We recently closed our Fab 2 cell manufacturing facility and our panel assembly facility in the Philippines and are focusing on our latest generation, lower cost panel assembly facilities in Mexico. As part of this realignment, we expect to reduce our back-contact panel assembly capacity while ramping production of our new Performance Series technology.

We are focused on reducing the cost of our solar panels and systems and are working with our suppliers and partners along all steps of the value chain to reduce costs by improving manufacturing technologies and expanding economies of scale. We also continually focus on reducing manufacturing cost and complexity in conjunction with our overall cost-control strategies. We believe that the global demand for solar systems is highly elastic and that our aggressive, but achievable, cost reduction roadmap will reduce installed costs for our customers across all business segments and drive increased demand for our solar solutions.

We also work with our suppliers and partners to ensure the reliability of our supply chain. We have contracted with some of our suppliers for multi-year supply agreements, under which we have annual minimum purchase obligations. For more information about our purchase commitments and obligations, see "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Contractual Obligations" and "Item 1. Financial Statements and Supplementary Data—Note 8. Commitments and Contingencies" in the Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

We currently believe our supplier relationships and various short- and long-term contracts will afford us the volume of material and services required to meet our planned output; however, we face the risk that the pricing of our long-term contracts may exceed market value. We purchase our polysilicon under fixed-price long-term supply agreements; purchases in fiscal 2016 under these agreements significantly exceeded market value, which may result in inventory write-downs based on expected net realizable value, and the volume contracted to be purchased in fiscal 2017 exceeds our planned utilization, which may result in higher inventory balances until we are able to fully utilize the polysilicon inventory in future periods. We have also elected to sell polysilicon inventory in excess of short-term needs to third

parties at a loss, and may enter into further similar transactions in future periods. For more information about these risks, please see "—Our long-term, firm commitment supply agreements could result in excess or insufficient inventory, place us at a competitive disadvantage on pricing, or lead to disputes, each of which could impair our ability to meet our cost reduction roadmap" and "—We will continue to be dependent on a limited number of third-party suppliers for certain raw materials and components for our products, which could prevent us from delivering our products to our customers within required timeframes and could in turn result in sales and installation delays, cancellations, penalty payments and loss of market share" under "Part 1. Item 1A. Risk Factors—Risks Related to Our Supply Chain" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017.

Projects Under Contract

The table below presents significant construction and development projects under contract as of July 2, 2017:

48

Table of Contents

Project	Location	Size (MW)	Third-Party Owner / Purchaser(s)	Power Purchase Agreement(s)	Expected Substantial Completion of Project ¹
Iberdrola Gala Solar Project	Oregon, USA	71	Avangrid Renewables, LLC	Customer C	2017

¹Expected completion of revenue recognition assumes completion of construction in the stated fiscal year.

As of July 2, 2017, an aggregate of approximately \$121.3 million of remaining revenue is expected to be recognized on projects reflected in the table above through the expected completion dates noted. Projects will be removed from the table above in the period in which substantially all of the revenue for such project has been recognized.

Projects with Executed Power Purchase Agreements - Not Sold / Not Under Contract

The table below presents significant construction and development projects with executed PPAs, but not sold or under contract as of July 2, 2017:

Project	Location	Size (MW)	Power Purchase Agreement(s)	Expected Substantial Completion of Project ¹
Ticul Solar Projects	Mexico	399	Comision Federal Electricidad	2018
Border Solar Project	Mexico	192	Comision Federal Electricidad	2018
Guajiro Solar Project	Mexico	117	Comision Federal Electricidad	2018
El Pelicano Solar Project	Chile	111	Empresa de Transporte de Pasajeros Metro S.A.	2017

¹ Expected completion of revenue recognition assumes completion of construction and sale of the project in the stated fiscal year.

Our project pipeline extends beyond the projects represented in the tables above. Significant projects with development and milestone activities in progress will be excluded from the table above until an associated PPA has been executed.

Results of Operations

Revenue

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Distributed Generation						
Residential	\$157,125	\$177,715	(12)%	\$293,156	\$329,522	(11)%
Commercial	100,105	97,846	2%	208,368	150,087	39%
Power Plant	80,216	144,891	(45)%	234,998	325,718	(28)%
Total revenue	\$337,446	\$420,452	(20)%	\$736,522	\$805,327	(9)%

Total Revenue: Our total revenue decreased by 20% and 9% during the three and six months ended July 2, 2017, as compared to three and six months ended July 3, 2016, respectively, primarily due to a decline in the revenue recognized in our Power Plant Segment as we shift away from global power plant development and number of large-scale solar power projects in our project pipeline has decreased. Also contributing to the decrease in overall revenue is the decline in sales of solar power components and systems to our residential customers in North America in our Residential Segment, partially offset by stronger sales of solar power systems and components to customers in

our Commercial Segment, particularly in North America.

Concentrations: The Power Plant Segment as a percentage of total revenue recognized was approximately 24% and 32% during the three and six months ended July 2, 2017, as compared to 34% and 40% during the three and six months ended July 3, 2016, respectively. The revenue for the Power Plant Segment as a percentage of total revenue recognized has decreased

49

Table of Contents

as we have shifted our focus away from global power plant development and the number of large-scale solar power projects in our project pipeline has decreased, and because we simultaneously experienced an overall increase in sales of solar power systems and components in our Commercial Segment during the three and six months ended July 2, 2017.

As Power Plant revenue declined and total Commercial revenue increased, but remained less than total revenue from our Residential Segment, the Residential Segment as a percentage of total revenue recognized was approximately 47% and 40% during the three and six months ended July 2, 2017, respectively, as compared to 42% and 41% during the three and six months ended July 3, 2016, respectively.

The table below represents our significant customers that accounted for greater than 10 percent of total revenue in each of the three and six months ended July 2, 2017 and July 3, 2016.

Revenue	Business Segment	Three Months Ended		Six Months Ended	
		July 2, 2017	July 3, 2016	July 2, 2017	July 3, 2016
8point3 Energy Partners	Power Plant	*	*	*	14 %
AEP Renewables, LLC	Power Plant	*	n/a	14%	n/a
Customer C	Power Plant	*	19 %	*	10 %

*denotes less than 10% during the period

Residential Revenue: Residential revenue decreased 12% and 11% during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily due to a decline in the sales of solar power components and systems to our residential customers in North America as well as a decrease in the proportion of capital leases placed in service relative to total leases placed in service under our residential leasing program within the United States.

Commercial Revenue: Commercial revenue increased 2% and 39% during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily because of stronger sales of commercial systems in North America.

Power Plant Revenue: Power Plant revenue decreased 45% and 28% during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily due to the substantial completion of certain large-scale solar power projects and the associated revenue recognition late in fiscal 2016 and an overall decrease in the number of large-scale solar power projects in our pipeline on which we recognized revenue in the first half of fiscal 2017 as we shift away from global power plant development.

Cost of Revenue

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Distributed Generation						
Residential	\$130,987	\$138,959	(6)%	\$251,744	\$257,119	(2)%
Commercial	97,530	89,523	9%	208,159	134,749	54%
Power Plant	93,694	150,676	(38)%	292,316	320,628	(9)%
Total cost of revenue	\$322,211	\$379,158	(15)%	\$752,219	\$712,496	6%

Edgar Filing: SUNPOWER CORP - Form 10-Q

Total cost of revenue as a percentage of revenue	95	% 90	%	102	% 88	%
Total gross margin percentage	5	% 10	%	(2)% 12	%

Total Cost of Revenue: Our total cost of revenue decreased 15% during the three months ended July 2, 2017 as compared to the three months ended July 3, 2016 primarily as a result of the decrease in the recognition of revenue and corresponding costs of solar power systems sold to Power Plant and Residential customers, partially offset by increases to cost

50

Table of Contents

of revenue from charges totaling \$4.5 million recorded in connection with the contracted sale of raw material inventory to third parties as well as \$9.2 million in inventory write-downs and additional write-downs totaling \$2.0 million on certain solar power development projects in the second quarter of fiscal 2017, both of which were the result of our above-market cost of polysilicon and lower expected selling prices of our projects. We also experienced an increase to cost of revenue due to \$4.1 million of inventory write-downs as a result of higher manufacturing costs as well as pre-operating costs associated with the ramp of our Performance Series product.

Our total cost of revenue increased 6% during the six months ended July 2, 2017 as compared to the six months ended July 3, 2016 primarily as a result of the charge recorded in the first quarter of fiscal 2017 in connection with a legal accrual related to NRG, as described in "Item 1. Financial Statements and Supplementary Data—Note 8. Commitments and Contingencies—Legal Matters," in addition to \$28.1 million in inventory write-downs and additional write-downs totaling \$5.8 million on certain solar power development projects in the first half of fiscal 2017, both of which were the result of our above-market cost of polysilicon and lower expected selling prices of our projects, in addition to charges totaling \$6.3 million recorded in connection with the contracted sale of raw material inventory to third parties. We also experienced an increase to cost of revenue due to \$4.1 million of inventory write-downs as a result of higher manufacturing costs as well as pre-operating costs associated with the ramp of our Performance Series product.

Gross Margin

	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Distributed Generation						
Residential	17%	22%	(5)%	14%	22%	(8)%
Commercial	3%	9%	(6)%	—%	10%	(10)%
Power Plant	(17)%	(4)%	(13)%	(24)%	2%	(26)%

Residential Gross Margin: Gross margin for our Residential Segment decreased 5 and 8 percentage points during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily as a result of declining average selling prices in North America and Japan.

Commercial Gross Margin: Gross margin for our Commercial Segment decreased 6 and 10 percentage points during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, because of declining margins on sales of solar power projects primarily because of pricing pressures on sales of solar power systems due to factors such as an increase in the internal rate of return expected by our customers in light of market conditions as well as \$4.0 million in inventory write-downs during the first half of fiscal 2017 as a result of our above-market cost of polysilicon and the lower expected selling prices of our projects.

Power Plant Gross Margin: Gross margin for our Power Plant Segment decreased 13 and 26 percentage points during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily because we experienced pressure on project pricing due to increased global competition and other factors, including an increase in the internal rate of return expected by our customers in light of market conditions, which led to \$24.1 million in inventory write-downs and additional write-downs totaling \$5.8 million on certain solar power development projects in the first half of fiscal 2017 as a result of our above-market cost of polysilicon and lower expected selling prices of our projects, in addition to \$4.1 million of inventory write-downs as a result of higher manufacturing costs as well as pre-operating costs associated with the ramp of our Performance Series product. The decrease in gross margin was also a result of the charge to cost of revenue impacting our Power Plant Segment which we recorded in the first quarter of fiscal 2017 in connection with a legal accrual related to NRG, as described in "Item 1. Financial Statements and Supplementary Data—Note 8. Commitments and Contingencies—Legal Matters."

Edgar Filing: SUNPOWER CORP - Form 10-Q

Research and Development ("R&D")

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
R&D	\$19,754	\$31,411	(37)%	\$40,269	\$64,117	(37)%
As a percentage of revenue	6	% 7	%	5	% 8	%

51

Table of Contents

R&D expense decreased \$11.7 million and \$23.8 million, during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily due to a decrease in labor costs as a result of reductions in headcount and salary expenses driven by our August 2016 and December 2016 restructuring plans, as well as decreases in other expenses such as materials, consulting and outside services as we have completed certain development activities.

Sales, General and Administrative ("SG&A")

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
SG&A	\$68,703	\$84,683	(19)%	\$136,106	\$182,474	(25)%
As a percentage of revenue	20	% 20	%	18	% 23	%

SG&A expense decreased \$16.0 million and \$46.4 million, during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily due to decreased marketing activity in North America and through digital media, a reduction in legal costs due to the settlement of certain legal proceedings, a reduction in both cash and non-cash compensation expenses, and a decrease in other non-cash charges.

Restructuring Charges

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Restructuring charges	\$4,969	\$117	4,147%	\$14,759	\$213	6,829%
As a percentage of revenue	1	% —	%	2	% —	%

Restructuring charges increased \$4.9 million and \$14.5 million during the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily because we incurred severance, legal, advisory, and other expenses related to our December 2016 restructuring plan. See "Item 1. Financial Statements and Supplementary Data—Note 7. Restructuring" for further information regarding our restructuring plans.

Other Income (Expense), Net

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Interest income	\$387	\$806	(52)%	\$1,325	\$1,503	(12)%
Interest expense	(22,370)	(13,950)	60%	(43,139)	(26,831)	61%
Other, net	(15,744)	(5,822)	170%	(17,934)	(12,054)	49%
Other expense, net	\$(37,727)	\$(18,966)	99%	\$(59,748)	\$(37,382)	60%
As a percentage of revenue	(11)%	(5)%		(8)%	(5)%	

Other expense, net increased \$18.8 million and \$22.4 million, in the three and six months ended July 2, 2017 as compared to the three and six months ended July 3, 2016, respectively, primarily driven by an \$8.6 million write-down of one of our equity method investments, as well as unfavorable changes in the fair value of foreign currency derivatives, an increase in cash interest expense, primarily related to our residential lease business, an increase in non-cash interest expense, and an increase in other net expenses.

Income Taxes

Table of Contents

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Provision for income taxes	\$(2,353)	\$(6,648)	(65)%	\$(4,384)	\$(9,829)	(55)%
As a percentage of revenue	(1)%	(2)%		(1)%	(1)%	

In the three and six months ended July 2, 2017, our income tax provision of \$2.4 million and \$4.4 million on a loss before income taxes and equity in earnings of unconsolidated investees of \$115.9 million and \$266.6 million, respectively, was primarily due to projected tax expense in profitable jurisdictions, whereas our income tax provision of \$6.6 million and \$9.8 million in the three and six months ended July 3, 2016 on a loss before income taxes and equity in earnings of unconsolidated investees of \$93.9 million and \$191.4 million, respectively, also included the recognition of U.S. prepaid income tax due to intercompany transactions in addition to projected tax expense in profitable jurisdictions. For the reporting period ended July 2, 2017, in accordance with FASB guidance for interim reporting of income tax, we have computed our provision for income taxes based on a projected annual effective tax rate while excluding loss jurisdictions which cannot be benefited.

We adopted the guidance under ASU 2016-09 "Improvements to Employee Share-Based Payment Accounting" in the first quarter of fiscal 2017 and as a result, excess tax benefits from share-based award activity for the three and six months ended July 2, 2017 are reflected as a reduction of the provision for income taxes whereas previously they were recognized in equity. We also early adopted the guidance under ASU 2016-16 "Intra-Entity Transfers of Assets Other than Inventory" in the first quarter of fiscal 2017 and as a result, tax effects of intercompany transactions are recognized when the transfers occur whereas they were previously deferred and amortized. For additional information related to the adoption of the updated accounting guidance, see "Item 1. Financial Statements and Supplementary Data—Note 1. The Company and Summary of Significant Accounting Policies" in the Notes to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

A material amount of our total revenue is generated from customers located outside of the United States, and a substantial portion of our assets and employees are located outside of the United States. U.S. income taxes and foreign withholding taxes have not been provided on the undistributed earnings of our non-U.S. subsidiaries as such earnings are intended to be indefinitely reinvested in operations outside the United States to the extent that such earnings have not been currently or previously subjected to taxation of the United States.

We record a valuation allowance to reduce our deferred tax assets in the U.S., France, and Spain to the amount that is more likely than not to be realized. In assessing the need for a valuation allowance, we consider historical levels of income, expectations and risks associated with the estimates of future taxable income and ongoing prudent and feasible tax planning strategies. In the event we determine that we would be able to realize additional deferred tax assets in the future in excess of the net recorded amount, or if we subsequently determine that realization of an amount previously recorded is unlikely, we would record an adjustment to the deferred tax asset valuation allowance, which would change income tax in the period of adjustment. As of July 2, 2017, we believe there is insufficient evidence to realize additional deferred tax assets other than U.S. net operating losses that can be carried back for a refund on prior year tax returns.

Equity in Earnings (loss) of Unconsolidated Investees

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Equity in earnings of unconsolidated investees	\$5,449	\$8,350	(35)%	\$6,501	\$7,586	(14)%
As a percentage of revenue	2	% 2	%	1	% 1	%

In the three and six months ended July 2, 2017 and July 3, 2016, our equity in earnings of unconsolidated investees decreased by net earnings of \$2.9 million and \$1.1 million, respectively, primarily due to the absence of our share of equity in earnings of unconsolidated investees during fiscal 2017 that was included in fiscal 2016 from our then equity method investment in AUOSP, which we acquired and subsequently consolidated late in the third quarter of fiscal 2016 (see "Item 1. Financial Statements and Supplementary Data—Note 9. Equity Method Investments"). The decrease in net earnings was also due to a decrease in our share of the equity in earnings generated by the activities the 8point3 Group during the second quarter

Table of Contents

of fiscal 2017 but was partially offset by a decrease in our share of the equity in loss of unconsolidated investees from our investment in CCPV during the first half of fiscal 2017.

Net Loss

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Net loss	\$(112,822)	\$(92,181)	22%	\$(264,462)	\$(193,598)	37%

Net loss increased by \$20.6 million in the three months ended July 2, 2017 as compared to the three months ended July 3, 2016. The increase in net loss was primarily driven by: (i) a decrease in gross margin of \$26.1 million primarily because we experienced pressure on project pricing due to increased global competition and other factors, including an increase in the internal rate of return expected by our customers in light of market conditions, which led to \$9.2 million in inventory write-downs and additional write-downs totaling \$2.0 million on certain solar power development projects during the second quarter of fiscal 2017, both of which were the result of our above-market cost of polysilicon and lower expected selling prices of our projects, in addition to charges totaling \$4.5 million recorded in connection with the contracted sale of raw material inventory to third parties and \$4.1 million of inventory write-downs as a result of higher manufacturing costs as well as pre-operating costs associated with the ramp of our Performance Series product; the decrease in gross margin was also a result of declines in the margins of our Residential and Commercial Segments due to lower average selling prices in some markets; (ii) a \$18.8 million increase in other expense, net primarily driven by an \$8.6 million write-down of one of our equity method investments, as well as unfavorable changes in the fair value of foreign currency derivatives, an increase in cash interest expense, primarily related to our residential lease business, an increase in non-cash interest expense, and an increase in other net expenses; (iii) a \$4.9 million increase in restructuring expense primarily because we incurred severance, legal, advisory, and other expenses related to our December 2016 restructuring plan; and (iv) a \$2.9 million decrease in our equity in earnings of unconsolidated investees primarily due to the absence of our share of equity in earnings of unconsolidated investees during fiscal 2017 that was included in fiscal 2016 from our then equity method investment in AUOSP, which we acquired and subsequently consolidated late in the third quarter of fiscal 2016. The increase in net loss was partially offset by: (i) a \$16.0 million decrease in SG&A expense due to decreased marketing activity in North America and through digital media, a reduction in legal costs due to the settlement of certain legal proceedings, a reduction in both cash and non-cash compensation expenses, and a decrease in other non-cash charges; (ii) a \$11.7 million decrease in R&D expense due to a decrease in labor costs as a result of reductions in headcount and salary expenses driven by our August 2016 and December 2016 restructuring plans, as well as decreases in other expenses such as materials, consulting and outside services as we have completed certain development activities; and (iii) a \$4.3 million decrease in provision for income taxes primarily due to a decrease in projected tax expense in profitable jurisdictions and the absence of recognition of U.S. prepaid income tax due to intercompany transactions.

Net loss increased by \$70.9 million in the six months ended July 2, 2017 as compared to the six months ended July 3, 2016. The increase in net loss was primarily driven by: (i) a decrease in gross margin of \$108.5 million primarily due to the charge to cost of revenue which we recorded in the first quarter of fiscal 2017 in connection with a legal accrual related to NRG and also because we experienced pressure on project pricing due to increased global competition and other factors, including an increase in the internal rate of return expected by our customers in light of market conditions, which led to \$28.1 million in inventory write-downs and additional write-downs totaling \$5.8 million on certain solar power development projects during the first half of fiscal 2017, both of which were the result of our above-market cost of polysilicon and lower expected selling prices of our projects, in addition to charges totaling \$6.3 million recorded in connection with the contracted sale of raw material inventory to third parties and \$4.1 million of inventory write-downs as a result of higher manufacturing costs as well as pre-operating costs associated with the ramp of our Performance Series product; the decrease in gross margin was also a result of declines in the margins of

our Residential and Commercial Segments due to lower average selling prices in some markets; (ii) a \$22.4 million increase in other expense, net primarily driven by an \$8.6 million write-down of one of our equity method investments, as well as unfavorable changes in the fair value of foreign currency derivatives, an increase in cash interest expense, primarily related to our residential lease business, an increase in non-cash interest expense, and an increase in other net expenses; (iii) a \$14.5 million increase in restructuring expense primarily because we incurred severance, legal, advisory, and other expenses related to our December 2016 restructuring plan; and (iv) a \$1.1 million decrease in our equity in earnings of unconsolidated investees primarily due to the absence of our share of equity in earnings of unconsolidated investees during fiscal 2017 that was included in fiscal 2016 from our then equity method investment in AUOSP, which we acquired and subsequently consolidated late in the third quarter of fiscal 2016, but was partially offset by a decrease in our share of the equity in loss of unconsolidated investees from our investment in CCPV during the first half of fiscal 2017. The increase in net loss was partially offset by: (i) a \$46.4 million decrease in SG&A expense due to decreased marketing activity in North America and through digital media, a reduction in legal costs due to the settlement of certain legal proceedings, a reduction in both cash and non-cash compensation expenses, and a decrease in other non-cash charges; (ii) a \$23.8 million decrease in R&D

Table of Contents

expense due to a decrease in labor costs as a result of reductions in headcount and salary expenses driven by our August 2016 and December 2016 restructuring plans, as well as decreases in other expenses such as materials, consulting and outside services as we have completed certain development activities; and (iii) a \$5.4 million decrease in provision for income taxes primarily due to a decrease in projected tax expense in profitable jurisdictions and the absence of recognition of U.S. prepaid income tax due to intercompany transactions.

Information about other significant variances in our results of operations is described above.

Net Loss Attributable to Noncontrolling Interests and Redeemable Noncontrolling Interests

(In thousands)	Three Months Ended			Six Months Ended		
	July 2, 2017	July 3, 2016	% Change	July 2, 2017	July 3, 2016	% Change
Net loss attributable to noncontrolling interests and redeemable noncontrolling interests	\$ 19,062	\$ 22,189	(14)%	\$ 36,223	\$ 38,197	(5)%

We have entered into facilities with third-party tax equity investors under which the investors invest in a structure known as a partnership flip. We determined that we hold controlling interests in these less-than-wholly-owned entities and therefore we have fully consolidated these entities. We apply the hypothetical liquidation at book value method in allocating recorded net income (loss) to each investor based on the change in the reporting period, of the amount of net assets of the entity to which each investor would be entitled to under the governing contractual arrangements in a liquidation scenario.

In the three months ended July 2, 2017 and July 3, 2016, we attributed \$19.1 million and \$22.2 million, respectively, of net losses primarily to the third-party investors as a result of allocating certain assets, including tax credits and accelerated tax depreciation benefits, to the investors. The \$3.1 million decrease in net loss attributable to noncontrolling interests and redeemable noncontrolling interests is primarily attributable to a decrease in the total number of leases placed in service under new and existing facilities with third-party investors.

In the six months ended July 2, 2017 and July 3, 2016, we attributed \$36.2 million and \$38.2 million, respectively, of net losses primarily to the third-party investors as a result of allocating certain assets, including tax credits and accelerated tax depreciation benefits, to the investors. The \$2.0 million decrease in net loss attributable to noncontrolling interests and redeemable noncontrolling interests is primarily attributable to a decrease in the total number of leases placed in service under new and existing facilities with third-party investors.

Liquidity and Capital Resources

Cash Flows

A summary of the sources and uses of cash, cash equivalents, restricted cash and restricted cash equivalents is as follows:

(In thousands)	Six Months Ended	
	July 2, 2017	July 3, 2016
Net cash used in operating activities	\$(288,692)	\$(669,992)
Net cash used in investing activities	\$(104,345)	\$(161,910)
Net cash provided by financing activities	\$278,674	\$469,904

Operating Activities

Net cash used in operating activities in the six months ended July 2, 2017 was \$288.7 million and was primarily the result of: (i) a net loss of \$264.5 million; (ii) a \$207.9 million decrease in accounts payable and other accrued liabilities, primarily attributable to payments for the procurement of polysilicon; (iii) a \$76.4 million increase in inventories to support the construction of our solar energy projects; (iv) a \$65.4 million decrease in billings in excess of costs and estimated earnings driven by construction activities; (v) a \$62.5 million increase in long-term financing receivables related to our net investment in sales-type leases; (vi) a \$59.8 million increase in project assets, primarily related to the construction of our Commercial and Power Plant solar energy projects; and (vii) an \$6.5 million increase in equity in earnings of unconsolidated investees. This was partially offset by: (i) other net non-cash charges of \$115.2 million related to depreciation, stock-based compensation and other non-cash charges; (ii) a \$139.1 million decrease in prepaid expenses and other assets, primarily related to the receipt of prepaid inventory; (iii) a \$105.2 million increase in customer advances, primarily from Total; (iv) a \$32.8 million decrease in advance payments made to suppliers; (v) a \$24.4 million decrease in accounts receivable, primarily driven by collections; (vi) a \$14.6 million dividend from 8point3 Energy Partners LP; (vii) a \$13.2 million decrease in costs and estimated earnings in excess of billings driven by milestone billings; (viii) an \$8.6 million in impairment of equity method investment; and (ix) a \$1.3 million increase in deferred income taxes.

Net cash used in operating activities in the six months ended July 3, 2016 was \$670.0 million and was primarily the result of: (i) a net loss of \$193.6 million; (ii) a \$433.4 million increase in project assets primarily related to the construction of our Commercial and Power Plant solar energy projects in North America; (iii) a \$115.0 million increase in inventories driven by construction of our solar energy projects; (iv) a \$95.1 million increase in long-term financing receivables related to our net investment in sales-type leases; (v) a \$23.3 million increase in accounts receivable, primarily driven by billings; (vi) a \$23.0 million decrease in billings in excess of costs and estimated earnings driven by the recognition revenue and corresponding costs of certain utility-scale projects; (vii) a \$7.6 million increase in equity in earnings of unconsolidated investees; and (viii) a \$5.9 million decrease in customer advances. This was partially offset by: (i) other net non-cash charges of \$118.4 million related to depreciation, non-cash interest charges and stock-based compensation; (ii) a \$48.7 million decrease in prepaid expenses and other assets, primarily related to recognition of revenue and corresponding costs of certain utility-scale projects; (iii) a \$40.6 million decrease in advance payments made to suppliers; (iv) a \$12.1 million increase in accounts payable and other accrued liabilities, primarily attributable to contributions from noncontrolling interests attributable to pre-COD projects; (v) a \$6.3 million decrease in costs and estimated earnings in excess of billings driven by milestone billings; and (vi) a \$0.8 million net change in deferred income taxes.

Investing Activities

Net cash used in investing activities in the six months ended July 2, 2017 was \$104.3 million, which included (i) \$94.2 million in capital expenditures primarily related to the expansion of our solar cell manufacturing capacity and costs associated with solar power systems, leased and to be leased; and (ii) \$11.6 million paid for investments in consolidated and unconsolidated investees. This was partially offset by a \$1.4 million dividend from equity method investees.

Net cash used in investing activities in the six months ended July 3, 2016 was \$161.9 million, which included (i) \$141.8 million in capital expenditures primarily related to the expansion of our solar cell manufacturing capacity and costs associated with solar power systems, leased and to be leased; (ii) \$10.3 million paid for investments in consolidated and unconsolidated investees; and (iii) \$9.8 million in payments to 8point3 Energy Partners.

Table of Contents

Financing Activities

Net cash provided by financing activities in the six months ended July 2, 2017 was \$278.7 million, which included: (i) \$194.6 million in net proceeds from the issuance of non-recourse power plant and commercial financing, net of issuance costs; (ii) \$88.2 million of net contributions from noncontrolling interests and redeemable noncontrolling interests related to residential lease projects; and (iii) \$27.6 million in net proceeds from the issuance of non-recourse residential financing, net of issuance costs. This was partially offset by: (i) \$27.5 million in net repayments of bank loans and other debt; and (ii) \$4.2 million in purchases of treasury stock for tax withholding obligations on vested restricted stock.

Net cash provided by financing activities in the six months ended July 3, 2016 was \$469.9 million, which included: (i) \$396.1 million in net proceeds from the issuance of non-recourse power plant and commercial financing, net of issuance costs; (ii) \$51.1 million in net proceeds from the issuance of non-recourse residential financing, net of issuance costs; and (iii) \$50.3 million of net contributions from noncontrolling interests and redeemable noncontrolling interests related to the residential lease projects. This was partially offset by: (i) \$19.7 million in purchases of treasury stock for tax withholding obligations on vested restricted stock; and (ii) \$7.9 million in repayments of bank loans and other debt.

Debt and Credit Sources

Convertible Debentures

As of July 2, 2017, an aggregate principal amount of \$425.0 million of the 4.00% debentures due 2023 remained issued and outstanding. The 4.00% debentures due 2023 were issued on December 15, 2015. Interest on the 4.00% debentures due 2023 is payable on January 15 and July 15 of each year, beginning on July 15, 2016. Holders are able to exercise their right to convert the debentures at any time into shares of our common stock at an initial conversion price approximately equal to \$30.53 per share, subject to adjustment in certain circumstances. If not earlier repurchased or converted, the 4.00% debentures due 2023 mature on January 15, 2023. Holders may require us to repurchase all or a portion of their 4.00% debentures due 2023, upon a fundamental change, as described in the related indenture, at a cash repurchase price equal to 100% of the principal amount plus accrued and unpaid interest. If we undergo a non-stock change of control fundamental change, as described in the related indenture, the 4.00% debentures due 2023 will be subject to redemption at our option, in whole but not in part, for a period of 30 calendar days following a repurchase date relating to the non-stock change of control fundamental change, at a cash redemption price equal to 100% of the principal amount plus accrued and unpaid interest. Otherwise, the 4.00% debentures due 2023 are not redeemable at our option prior to the maturity date. In the event of certain events of default, Wells Fargo Bank, National Association ("Wells Fargo"), the trustee, or the holders of a specified amount of then-outstanding 4.00% debentures due 2023 will have the right to declare all amounts then outstanding due and payable.

As of July 2, 2017, an aggregate principal amount of \$400.0 million of the 0.875% debentures due 2021 remained issued and outstanding. The 0.875% debentures due 2021 were issued on June 11, 2014. Interest on the 0.875% debentures due 2021 is payable on June 1 and December 1 of each year. Holders are able to exercise their right to convert the debentures at any time into shares of our common stock at an initial conversion price approximately equal to \$48.76 per share, subject to adjustment in certain circumstances. If not earlier repurchased or converted, the 0.875% debentures due 2021 mature on June 1, 2021. Holders may require us to repurchase all or a portion of their 0.875% debentures due 2021, upon a fundamental change, as described in the related indenture, at a cash repurchase price equal to 100% of the principal amount plus accrued and unpaid interest. If we undergo a non-stock change of control fundamental change, as described in the related indenture, the 0.875% debentures due 2021 will be subject to redemption at our option, in whole but not in part, for a period of 30 calendar days following a repurchase date

relating to the non-stock change of control fundamental change, at a cash redemption price equal to 100% of the principal amount plus accrued and unpaid interest. Otherwise, the 0.875% debentures due 2021 are not redeemable at our option prior to the maturity date. In the event of certain events of default, Wells Fargo, the trustee, or the holders of a specified amount of then-outstanding 0.875% debentures due 2021 will have the right to declare all amounts then outstanding due and payable.

As of July 2, 2017, an aggregate principal amount of \$300.0 million of the 0.75% debentures due 2018 remained issued and outstanding. The 0.75% debentures due 2018 were issued on May 29, 2013. Interest on the 0.75% debentures due 2018 is payable on June 1 and December 1 of each year. Holders are able to exercise their right to convert the debentures at any time into shares of our common stock at an initial conversion price equal to \$24.95 per share. The applicable conversion rate may be subject to adjustment in certain circumstances. If not earlier converted, the 0.75% debentures due 2018 mature on June 1, 2018. Holders may require us to repurchase all or a portion of their 0.75% debentures due 2018, upon a fundamental change, as described in the related indenture, at a cash repurchase price equal to 100% of the principal amount plus accrued and unpaid interest. If we undergo a non-stock change of control fundamental change, as described in the related indenture, the 0.75% debentures due 2018 will be subject to redemption at our option, in whole but not in part, for a period of 30 calendar days

Table of Contents

following a repurchase date relating to the non-stock change of control fundamental change, at a cash redemption price equal to 100% of the principal amount plus accrued and unpaid interest. Otherwise, the 0.75% debentures due 2018 are not redeemable at our option prior to the maturity date. In the event of certain events of default, Wells Fargo, the trustee, or the holders of a specified amount of then-outstanding 0.75% debentures due 2018 will have the right to declare all amounts then outstanding due and payable. Please see "Part I. Item 1A. Risk Factors—Risks Related to our Debt and Equity Securities—Conversion of our outstanding 0.75% debentures, 0.875% debentures, 4.00% debentures, and future substantial issuances or dispositions of our common stock or other securities, could dilute ownership and earnings per share or cause the market price of our stock to decrease" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017.

Mortgage Loan Agreement with IFC

On May 6, 2010, we entered into a mortgage loan agreement with IFC. Under the loan agreement, we borrowed \$75.0 million and are required to repay the amount borrowed starting two years after the date of borrowing, in 10 equal semi-annual installments over the following 5 years. We are required to pay interest of LIBOR plus 3% per annum on outstanding borrowings; a front-end fee of 1% on the principal amount of borrowings at the time of borrowing; and a commitment fee of 0.5% per annum on funds available for borrowing and not borrowed. We may prepay all or a part of the outstanding principal, subject to a 1% prepayment premium. We have pledged certain assets as collateral supporting repayment obligations.

On January 17, 2017, the Company repaid the entire outstanding balance, and the associated interest, of the mortgage loan agreement with IFC. As of July 2, 2017, we had no outstanding amounts under the mortgage loan agreement and no restricted cash and cash equivalents related to the IFC debt service reserve.

Loan Agreement with California Enterprise Development Authority ("CEDA")

On December 29, 2010, we borrowed from CEDA the proceeds of the \$30.0 million aggregate principal amount of CEDA's tax-exempt Recovery Zone Facility Revenue Bonds (SunPower Corporation - Headquarters Project) Series 2010 (the "Bonds") maturing April 1, 2031 under a loan agreement with CEDA. Certain of our obligations under the loan agreement were contained in a promissory note dated December 29, 2010 issued by us to CEDA, which assigned the promissory note, along with all right, title and interest in the loan agreement, to Wells Fargo, as trustee, with respect to the Bonds for the benefit of the holders of the Bonds. The Bonds bear interest at a fixed-rate of 8.50% per annum.

As of July 2, 2017, the \$30.0 million aggregate principal amount of the Bonds was classified as "Long-term debt" in our Consolidated Balance Sheets.

Revolving Credit Facility with Credit Agricole

On July 3, 2013, we entered into a revolving credit agreement with Credit Agricole Corporate and Investment Bank ("Credit Agricole"), as administrative agent, and certain financial institutions, under which we may borrow up to \$250.0 million. On August 26, 2014, we entered into an amendment to the revolving credit facility that, among other things, extends the maturity date of the facility from July 3, 2016 to August 26, 2019 (the "Maturity Date"). Amounts borrowed may be repaid and reborrowed until the Maturity Date. On February 17, 2016, the Company entered into an amendment to the credit agreement, expanding the available borrowings under the revolving credit facility to \$300.0 million and adding a \$200.0 million letter of credit subfacility, subject to the satisfaction of certain conditions. The revolving credit facility includes representations, covenants, and events of default customary for financing transactions of this type.

On June 23, 2017, we entered into an Amended and Restated Revolving Credit Agreement with Credit Agricole Corporate and Investment Bank, as administrative agent, and the other lenders party thereto (the "Restated Credit Agreement"), which amends and restates the Revolving Credit Agreement dated July 3, 2013, as amended, by and between us, the Administrative Agent and the other parties thereto, as amended to date.

The Restated Credit Agreement was entered into in connection with the letter agreement between the us and Total S.A. dated May 8, 2017 (the "Letter Agreement"), which, as previously disclosed, was entered into to facilitate the issuance by Total S.A. of one or more guaranties of our payment obligations (the "Guaranties") of up to \$100.0 million under the Restated Credit Agreement. The maturity date of the Letter Agreement is August 26, 2019. In consideration for the commitments of Total S.A. pursuant to the Letter Agreement, we are required to pay a guarantor commitment fee of 0.50% per annum for the unutilized Support Amount and a guaranty fee of 2.35% per annum of the Guaranty outstanding.

The maturity date of the facility under the Restated Credit Agreement remains August 26, 2019 (the "Maturity Date"), and amounts borrowed under the facility may be repaid and reborrowed until the Maturity Date. Available borrowings under

Table of Contents

the Restated Credit Agreement remain \$300.0 million; provided that the aggregate principal amount of all amounts borrowed under the facility cannot exceed 95.0% of the amounts guaranteed by Total S.A. under the Letter Agreement.

The Restated Credit Agreement (a) removes our ability to request the issuance of performance and financial letters of credit, (b) removes certain covenants, including covenants related to a maximum leverage ratio and a minimum consolidated liquidity, (c) removes the negative pledge on certain of our assets, (d) removes certain of our domestic subsidiaries as guarantors, and (e) effects other revisions to the terms thereof. All collateral previously pledged to secure our obligations to the lenders has been released.

We are required to pay (a) interest on outstanding borrowings under the facility of (i) with respect to any LIBOR rate loan, an amount equal to 0.6% plus the LIBOR rate divided by a percentage equal to one minus the stated maximum rate of all reserves required to be maintained against "Eurocurrency liabilities" as specified in Regulation D; and (ii) with respect to any alternate base rate loan, an amount equal to 0.25% plus the greater of (1) the prime rate, (2) the Federal Funds rate plus 0.50%, and (3) the one-month LIBOR rate plus 1%; and (b) a commitment fee of 0.06% per annum on funds available for borrowing and not borrowed. The Restated Credit Agreement includes representations, covenants, and events of default customary for financing transactions of this type.

As of July 2, 2017, we had no outstanding borrowings under the restated revolving credit facility.

August 2016 Letter of Credit Facility Agreement

In August 2016, we entered into a letter of credit facility with Banco Santander, S.A. which provides for the issuance, upon request by us, of letters of credit to support our obligations in an aggregate amount not to exceed \$85 million. As of July 2, 2017, there were no letters of credit issued and outstanding under the facility with Banco Santander, S.A.

2016 Letter of Credit Facility Agreements

In June 2016, we entered into a Continuing Agreement for Standby Letters of Credit and Demand Guarantees with Deutsche Bank AG New York Branch and Deutsche Bank Trust Company Americas (the "2016 Non-Guaranteed LC Facility") which provides for the issuance, upon request by us, of letters of credit to support our obligations in an aggregate amount not to exceed \$50.0 million. The 2016 Non-Guaranteed LC Facility will terminate on June 29, 2018. As of July 2, 2017, letters of credit issued and outstanding under the 2016 Non-Guaranteed LC Facility totaled \$34.6 million.

In June 2016, we entered into bilateral letter of credit facility agreements (the "2016 Guaranteed LC Facilities") with each of The Bank of Tokyo-Mitsubishi UFJ ("BTMU"), Credit Agricole, and HSBC USA Bank, National Association ("HSBC"). Each letter of credit facility agreement provides for the issuance, upon our request, of letters of credit by the issuing bank thereunder in order to support certain of our obligations until December 31, 2018. Payment of obligations under each of the letter of credit facilities are guaranteed by Total S.A. pursuant to the Credit Support Agreement. Aggregate letter of credit amounts may be increased upon the agreement of the respective parties but, otherwise, may not exceed \$75.0 million with BTMU, \$75.0 million with Credit Agricole and \$175.0 million with HSBC, for a total capacity of \$325.0 million. Each letter of credit issued under one of the letter of credit facilities generally must have an expiration date, subject to certain exceptions, no later than the earlier of (a) two years from completion of the applicable project and (b) March 31, 2020.

In June 2016, in connection with the 2016 Guaranteed LC Facilities, we entered into a transfer agreement to transfer to the 2016 Guaranteed LC Facilities all existing outstanding letters of credit issued under our letter of credit facility

agreement with Deutsche Bank AG New York Branch and Deutsche Bank Trust Company Americas, as administrative agent, and certain financial institutions, entered into in August 2011 and amended from time to time. In connection with the transfer of the existing outstanding letters of credit, the aggregate commitment amount under the August 2011 letter of credit facility was permanently reduced to zero on June 29, 2016. As of July 2, 2017, letters of credit issued and outstanding under the 2016 Guaranteed LC Facilities totaled \$197.0 million.

September 2011 Letter of Credit Facility with Deutsche Bank and Deutsche Bank Trust Company Americas (together, "Deutsche Bank Trust")

On September 27, 2011, we entered into a letter of credit facility with Deutsche Bank Trust which provides for the issuance, upon request by us, of letters of credit to support our obligations in an aggregate amount not to exceed \$200.0 million. Each letter of credit issued under the facility is fully cash-collateralized and we have entered into a security agreement with Deutsche Bank Trust, granting them a security interest in a cash collateral account established for this purpose.

Table of Contents

As of July 2, 2017 letters of credit issued under the Deutsche Bank Trust facility totaled \$1.4 million, which was fully collateralized with restricted cash as classified on the Consolidated Balance Sheets.

Revolving Credit Facility with Mizuho and Goldman Sachs

On May 4, 2016, we entered into a revolving credit facility (the "Construction Revolver") with Mizuho Bank Ltd., as administrative agent, and Goldman Sachs Bank USA, under which we may borrow up to \$200 million. The Construction Revolver also includes a \$100 million accordion feature. Amounts borrowed under the Construction Revolver may be repaid and reborrowed in support of our commercial and small scale utility projects in the United States until the May 4, 2021 maturity date. The Construction Revolver includes representations, covenants, and events of default customary for financing transactions of this type.

Borrowings under the Construction Revolver bear interest at the applicable LIBOR rate plus 1.50% for the first two years (with the final year at LIBOR plus 1.75%). All outstanding indebtedness under the facility may be voluntarily prepaid in whole or in part without premium or penalty (with certain limitations to partial repayments), other than customary breakage costs. The Construction Revolver is secured by the assets of, and equity in, the various project companies to which the borrowings relate, but is otherwise non-recourse to us and our other affiliates.

As of July 2, 2017, outstanding borrowings under the Construction Revolver totaled \$1.7 million.

Non-recourse Financing and Other Debt

In order to facilitate the construction, sale or ongoing operation of certain solar projects, including our residential leasing program, we regularly obtain project-level financing. These financings are secured either by the assets of the specific project being financed or by our equity in the relevant project entity and the lenders do not have recourse to the general assets of the Company for repayment of such debt obligations, and hence the financings are referred to as non-recourse. Non-recourse financing is typically in the form of loans from third-party financial institutions, but also takes other forms, including "flip partnership" structures, sale-leaseback arrangements, or other forms commonly used in the solar or similar industries. We may seek non-recourse financing covering solely the construction period of the solar project or may also seek financing covering part or all of the operating life of the solar project. We classify non-recourse financings in our Consolidated Balance Sheets in accordance with their terms; however, in certain circumstances, we may repay or refinance these financings prior to stated maturity dates in connection with the sale of the related project or similar such circumstances. In addition, in certain instances, the customer may assume the loans at the time that the project entity is sold to the customer. In these instances, subsequent debt assumption is reflected as a financing outflow and operating inflow in the Consolidated Statements of Cash Flows to reflect the substance of the assumption as a facilitation of customer financing from a third party.

For our residential lease program, non-recourse financing is typically accomplished by aggregating an agreed-upon volume of solar power systems and leases with residential customers into a specific project entity. The Company has entered into the following non-recourse financings with respect to its residential lease program:

In fiscal 2016, we entered into bridge loans to finance solar power systems and leases under our residential lease program. The loans are repaid over terms ranging from two to seven years. Some loans may be prepaid without penalties at our option at any time, while other loans may be prepaid, subject to a prepayment fee, after one year. During the three and six months ended July 2, 2017, we had net proceeds of \$3.5 million and \$5.6 million, respectively, in connection with these loans. As of July 2, 2017, the aggregate carrying amount of these loans, presented in "Short-term debt" and "Long-term debt" on our Consolidated Balance Sheets, was \$12.3 million.

We enter into long-term loans to finance solar power systems and leases under our residential lease program. The loans are repaid over their terms of between 17 and 18 years, and may be prepaid without penalty at our option beginning seven years after the original issuance of the loan. During the three and six months ended July 2, 2017, we had net proceeds of \$4.8 million and \$22.0 million, respectively, in connection with these loans. During the three and six months ended July 3, 2016, we had net proceeds (repayments) of \$(1.1) million and \$2.1 million, respectively, in connection with these loans. As of July 2, 2017, and January 1, 2017, the aggregate carrying amount of these loans, presented in "Short-term debt" and "Long-term debt" on our Consolidated Balance Sheets, was \$306.2 million and \$283.9 million, respectively.

We have entered into multiple arrangements under which solar power systems are financed by third-party investors or customers, including by a legal sale of the underlying asset that is accounted for as a borrowing under relevant accounting guidelines as the requirements to recognize the transfer of the asset were not met. Under the terms of these arrangements, the third parties make an upfront payment to us, which we recognize as a liability that will be reduced over the term of the

Table of Contents

arrangement as lease receivables and government incentives are received by the third party. As the liability is reduced, we make a corresponding reduction in receivables. We use this approach to account for both operating and sales-type leases with our residential lease customers in our consolidated financial statements. During the three and six months ended July 3, 2016, we had net proceeds of \$7.8 million and \$14.9 million, respectively, in connection with these facilities. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of these facilities, presented in "Other long-term liabilities" on our Consolidated Balance Sheets, was \$29.3 million and \$29.4 million, respectively (see Note 4).

We also enter into facilities with third-party tax equity investors under which the investors invest in a structure known as a partnership flip. We hold controlling interests in these less-than-wholly-owned entities and therefore fully consolidate these entities. We account for the portion of net assets in the consolidated entities attributable to the investors as noncontrolling interests in our consolidated financial statements. Noncontrolling interests in subsidiaries that are redeemable at the option of the noncontrolling interest holder are classified accordingly as redeemable, between liabilities and equity on the Company's Consolidated Balance Sheets. During the three and six months ended July 2, 2017, we had net contributions of \$42.9 million and \$88.2 million, respectively, under these facilities and attributed losses of \$19.0 million and \$36.3 million, respectively, to the non-controlling interests corresponding principally to certain assets, including tax credits, which were allocated to the non-controlling interests during the periods. During the three and six months ended July 3, 2016, we had net contributions of \$31.5 million and \$50.3 million, respectively, under these facilities and attributed losses of \$20.2 million and \$36.8 million, respectively, to the non-controlling interests corresponding principally to certain assets, including tax credits, which were allocated to the non-controlling interests during the periods. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of these facilities, presented in "Redeemable non-controlling interests in subsidiaries" and "Non-controlling interests in subsidiaries" on our Consolidated Balance Sheets, was \$235.1 million and \$183.1 million, respectively.

For our power plant and commercial solar projects, non-recourse financing is typically accomplished using an individual solar power system or a series of solar power systems with a common end customer, in each case owned by a specific project entity. We have entered into the following non-recourse financings with respect to our power plant and commercial projects:

In fiscal 2017, we entered into a short-term credit facility to finance the 70 MW utility-scale Gala power plant project in Oregon. During the three and six months ended July 2, 2017, we had net proceeds of \$54.0 million and \$77.5 million, respectively, in connection with the facility. As of July 2, 2017 the aggregate carrying amount of this facility, presented in "Short-term debt" on the Company's Consolidated Balance Sheets, was \$79.6 million.

In fiscal 2016, we entered into the Construction Revolver credit facility to support the construction of our commercial and small scale utility projects in the United States. During the three and six months ended July 2, 2017, we had net proceeds (repayments) of \$(3.0) million and \$9.1 million, respectively, in connection with the facility. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of the Construction Revolver, presented in "Long-term debt" on our Consolidated Balance Sheets, was \$1.7 million and \$10.5 million respectively.

In fiscal 2016, we entered into a long-term credit facility to finance the 125 MW utility-scale Boulder power plant project in Nevada. As of both July 2, 2017 and January 1, 2017, the aggregate carrying amount of this facility, presented in "Short-term debt" and "Long-term debt" on our Consolidated Balance Sheets, was \$28.8 million.

In fiscal 2016, we entered into a long-term credit facility to finance the 111 MW utility-scale El Pelicano power plant project in Chile. During the three and six months ended July 2, 2017, we had net proceeds of \$46.9 million and \$84.3 million, respectively, in connection with the facility. As of July 2, 2017 and January 1, 2017, the aggregate carrying amount of this facility, presented in "Short-term debt" and "Long-term debt" on our Consolidated Balance Sheets, was

\$174.8 million and \$90.5 million, respectively.

In fiscal 2013, we entered into a long-term loan agreement to finance a 5.4 MW utility and power plant operating in Arizona. As of both July 2, 2017 and January 1, 2017, the aggregate carrying amount under this loan, presented in "Short-term debt" and "Long-term debt" on our Consolidated Balance Sheets, was \$7.6 million.

Other debt is further composed of non-recourse project loans in EMEA, which are scheduled to mature through 2028.

See "Item 1. Financial Statements—Notes to Consolidated Financial Statements—Note 5. Leasing" for a discussion of the Company's sale-leaseback arrangements accounted for under the financing method.

Liquidity

61

Table of Contents

As of July 2, 2017, we had unrestricted cash and cash equivalents of \$327.3 million as compared to \$425.3 million as of January 1, 2017. Our cash balances are held in numerous locations throughout the world and as of July 2, 2017, we had approximately \$197.2 million held outside of the United States. This offshore cash is used to fund operations of our business in the Europe and Asia Pacific regions as well as non-U.S. manufacturing operations, which require local payment for product materials and other expenses. The amounts held outside of the United States represent the earnings of our foreign subsidiaries which, if repatriated to the United States under current law, would be subject to United States federal and state tax less applicable foreign tax credits. Repatriation of earnings that have not been subjected to U.S. or foreign withholding tax and that have been indefinitely reinvested outside the U.S. could result in additional United States federal income tax or foreign withholding tax payments in future years.

We expect total capital expenditures related to purchases of property, plant and equipment in the range of \$110 million to \$130 million in fiscal 2017 in order to increase our manufacturing capacity for our highest efficiency X-Series product platform and our new Performance Series technology, improve our current and next generation solar cell manufacturing technology, and other projects. In addition, we expect to invest a significant amount of capital to develop solar power systems and plants for sale to customers. The development of solar power plants can require long periods of time and substantial initial investments. Our efforts in this area may consist of all stages of development, including land acquisition, permitting, financing, construction, operation and the eventual sale of the projects. We often choose to bear the costs of such efforts prior to the final sale to a customer, which involves significant upfront investments of resources (including, for example, large transmission deposits or other payments, which may be non-refundable), land acquisition, permitting, legal and other costs, and in some cases the actual costs of constructing a project, in advance of the signing of PPAs and EPC contracts and the receipt of any revenue, much of which is not recognized for several additional months or years following contract signing. Any delays in disposition of one or more projects could have a negative impact on our liquidity.

Certain of our customers also require performance bonds issued by a bonding agency or letters of credit issued by financial institutions, which are returned to us upon satisfaction of contractual requirements. If there is a contractual dispute with the customer, the customer may withhold the security or make a draw under such security, which could have an adverse impact on our liquidity. Obtaining letters of credit may require adequate collateral. All letters of credit issued under our 2016 Guaranteed LC Facilities are guaranteed by Total S.A. pursuant to the Credit Support Agreement. Our September 2011 letter of credit facility with Deutsche Bank Trust is fully collateralized by restricted cash, which reduces the amount of cash available for operations. As of July 2, 2017, letters of credit issued under the Deutsche Bank Trust facility amounted to \$1.4 million which were fully collateralized with restricted cash on the Consolidated Balance Sheets.

In fiscal 2011, we launched our residential lease program with dealers in the United States, in partnership with a third-party financial institution, which allows customers to obtain SunPower systems under lease agreements up to 20 years, subject to financing availability. We have entered into facilities with financial institutions that will provide financing to support additional residential solar lease projects. Under the terms of certain programs, we receive upfront payments for periods under which the third-party financial institution has agreed to assume collection risk for certain residential leases. Changes in the amount or timing of upfront payments received from the financial institutions may have an impact on our cash position within the next twelve months. The normal collection of monthly rent payments for leases placed in service is not expected to have a material impact on our cash position within the next twelve months. We have entered into multiple facilities with third-party investors under which both parties will invest in entities that hold SunPower solar power systems and leases with residential customers. We determined that we hold a controlling interest in these less-than-wholly-owned entities and have fully consolidated these entities as a result (see "Item 8. Financial Statements—Notes to Consolidated Financial Statements—Note 5. Leasing"). During the six months ended July 2, 2017, we received \$96.6 million in contributions from investors under the related facility agreements. Additionally, during fiscal 2014, 2015 and 2016, we entered into several long-term non-recourse loans to finance solar

power systems and leases under our residential lease program. In fiscal 2017, we drew down \$30.6 million of proceeds, net of issuance costs, under the loan agreements. The loans have 17- and 18-year terms and as of July 2, 2017, the short-term and long-term balances of the loans were \$8.1 million and \$310.4 million, respectively. We are actively arranging additional third-party financing for our residential lease program; however, the credit markets are unpredictable, and if they become challenging, we may be unable to arrange additional financing partners for our residential lease program in future periods, which could have a negative impact on our sales. In the unlikely event that we enter into a material number of additional leases without promptly obtaining corresponding third-party financing, our cash and working capital could be negatively affected. Additionally, we have approximately \$37.4 million of cash and cash equivalents within our consolidated residential leasing subsidiaries that is used by those subsidiaries for their working capital needs. This cash is typically not available to us to use for general corporate purposes unless certain financial obligations are first settled. In the event that we choose to transfer cash out of these subsidiaries for general corporate purposes in the future, we would first be required to distribute a portion of the cash to lender debt reserves and investors who hold noncontrolling interests in the relevant subsidiaries.

Table of Contents

Solar power plant projects often require significant up-front investments. These include payments for preliminary engineering, permitting, legal, and other expenses before we can determine whether a project is feasible. We often make arrangements with third-party financiers to acquire and build solar power systems or to fund project construction using non-recourse project debt. As of July 2, 2017, outstanding amounts related to our project financing totaled \$292.4 million.

We continue to face challenging industry conditions and a competitive environment. While we continue to focus on improving overall operating performance and liquidity, including managing cash flow and working capital, notably with cash savings resulting from restructuring actions and cost reduction initiatives put in place in the third and fourth quarters of 2016, our net losses continued through the second quarter of 2017 and are expected to continue through 2017. We have the ability to enhance our available cash by borrowing up to \$95.0 million under our revolving credit facility with Credit Agricole pursuant to the Letter Agreement executed by us and Total S.A. on May 8, 2017 (see Note 2). However, our \$300.0 million 0.75% senior convertible debentures due 2018 (the "0.75% debentures due 2018"), \$200.0 million of which are held by Total, mature on June 1, 2018. These events and conditions indicate we may not have the liquid funds necessary to repay the existing 0.75% debentures due 2018 at maturity and satisfy our estimated liquidity needs within the 12 months from the date of issuance of these interim financial statements. We have a history of successfully refinancing and extending the maturity date of our debts; however, there is no assurance that the 0.75% debentures due 2018 will be refinanced or their maturity extended to sufficiently meet our obligations as they become due or on terms acceptable to us. Given our current share price compared to the conversion price of \$24.95 per share for the 0.75% debentures due 2018, we anticipate that bondholders will choose to select repayment in cash. Independent from the refinancing or repayment of the 0.75% debentures due 2018, we have decided to divest certain assets, such as our equity interest in 8point3 Group (see Note 9), and join the sale process initiated by First Solar, Inc. We anticipate that we could repay the 0.75% debentures due 2018 with proceeds from these divestitures. Regarding the 8point3 Group sale process, while we believe both parties are committed to proceeding, this transaction is in the early stages, and no final decision on any particular alternative has yet been reached.

While we believe it is probable that we can effectively implement plans to sell our investment in 8point3 Group, which mitigates the conditions and events giving rise to uncertainty regarding repayment of the 0.75% debentures due 2018, there are a number of factors that may defer or otherwise limit our ability to sell this investment, including, among others, (i) final approval of a transaction, once a partner, structure, and price are finalized, by our Board of Directors, (ii) legal and regulatory approvals, and (iii) approval by various classes of equity owners and/or the Board of Directors of 8point3 Energy Partners (or a subcommittee thereof), as required due to the final transaction structure. We believe we have sufficiently evaluated these conditions in concluding that the sale of our equity interests in 8point3 Group is considered probable of occurring prior to the maturity of the 0.75% debentures due 2018. We cannot predict, with certainty, the outcome of our actions to generate liquidity, including the outcome of the 8point3 Group divestiture, or whether such actions would generate the necessary liquidity as currently anticipated to fulfill our obligations within the 12 months from the date of issuance of these interim financial statements. See also "Risks Related to Our Sales Channels—A limited number of customers and large projects are expected to continue to comprise a significant portion of our revenues and any decrease in revenues from those customers or projects, payment of liquidated damages, or an increase in related expenses, could have a material adverse effect on our business, results of operations and financial condition," and "Risks Related to Our Liquidity—We may be unable to generate sufficient cash flows or obtain access to external financing necessary to fund our operations and make adequate capital investments as planned due to the general economic environment and the continued market pressure driving down the average selling prices of our solar power products," among other factors in Part I. "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017, and "Part II, Item 1A. Risk Factors" of this Form 10-Q, "We may fail to realize the expected benefits of our YieldCo strategy, including our current plan to divest our interest in 8point3 Energy Partners, which could materially adversely affect our business, financial condition, and results of operations."

On June 23, 2017, we entered into an Amended and Restated Revolving Credit Agreement with Credit Agricole Corporate and Investment Bank, as administrative agent, and the other lenders party thereto, which amends and restates the Revolving Credit Agreement dated July 3, 2013 by and between us, the Administrative Agent and the other parties thereto, as amended to date. The Restated Credit Agreement was entered into in connection with the Letter Agreement between us and Total S.A. dated May 8, 2017, which was entered into to facilitate the issuance by Total S.A of one or more guaranties of the Company's payment obligations of up to \$100.0 million under the Restated Credit Agreement. The maturity date of the facility under the Restated Credit Agreement remains August 26, 2019, and amounts borrowed under the facility may be repaid and reborrowed until the Maturity Date. Available borrowings under the Restated Credit Agreement remain \$300.0 million; provided that the aggregate principal amount of all amounts borrowed under the facility cannot exceed 95.0% of the amounts guaranteed by Total under the Letter Agreement, effectively allowing us to borrow up to a maximum of \$95 million under the Restated Credit Agreement. As of July 2, 2017, \$300.0 million remained undrawn under our revolving credit facility with Credit Agricole.

Table of Contents

Additionally, on May 4, 2016, we entered into the Construction Revolver credit facility, under which we may borrow up to \$200 million, with a \$100 million accordion feature, in support of our commercial and small scale utility projects in the United States until its May 4, 2021 maturity date, subject to certain conditions. As of July 2, 2017, we had \$198.3 million available to us under the Construction Revolver credit facility. There are no assurances, however, that we will have sufficient available cash to repay our indebtedness or that we will be able to refinance such indebtedness on similar terms to the expiring indebtedness. If our capital resources are insufficient to satisfy our liquidity requirements, we may seek to sell additional equity securities or debt securities or obtain other debt financing. The current economic environment, however, could limit our ability to raise capital by issuing new equity or debt securities on acceptable terms, and lenders may be unwilling to lend funds on acceptable terms in the amounts that would be required to supplement cash flows to support operations. The sale of additional equity securities or convertible debt securities would result in additional dilution to our stockholders (and the potential for further dilution upon the exercise of warrants or the conversion of convertible debt) and may not be available on favorable terms or at all, particularly in light of the current conditions in the financial and credit markets. Additional debt would result in increased expenses and would likely impose new restrictive covenants which may be similar or different than those restrictions contained in the covenants under our current loan agreements and debentures. In addition, financing arrangements, including project financing for our solar power plants and letters of credit facilities, may not be available to us, or may not be available in amounts or on terms acceptable to us.

Contractual Obligations

The following table summarizes our contractual obligations as of July 2, 2017:

(In thousands)	Total	Payments Due by Fiscal Period			
		2017 (remaining six months)	2018-2019	2020-2021	Beyond 2021
Convertible debt, including interest ¹	\$ 1,234,995	\$ 11,375	\$ 341,944	\$ 438,968	\$ 442,708
CEDA loan, including interest ²	65,063	1,275	5,100	5,100	53,588
Other debt, including interest ³	902,317	129,831	85,426	90,977	596,083
Future financing commitments ⁴	31,256	18,190	13,066	—	—
Operating lease commitments ⁵	122,915	8,057	29,501	24,427	60,930
Sale-leaseback financing ⁶	221,231	8,890	29,955	28,040	154,346
Capital lease commitments ⁷	4,318	556	1,633	1,288	841
Non-cancellable purchase orders ⁸	206,698	206,698	—	—	—
Purchase commitments under agreements ⁹	913,964	372,777	376,341	162,846	2,000
Deferred purchase consideration in connection with acquisition	61,100	—	31,100	30,000	—
Total	\$3,763,857	\$757,649	\$914,066	\$781,646	\$1,310,496

Convertible debt, including interest, relates to the aggregate of \$1,125.0 million in outstanding principal amount of our senior convertible debentures on July 2, 2017. For the purpose of the table above, we assume that all holders of the outstanding debentures will hold the debentures through the date of maturity, and upon conversion, the values of the senior convertible debentures will be equal to the aggregate principal amount with no premiums.

² CEDA loan, including interest, relates to the proceeds of the \$30.0 million aggregate principal amount of the Bonds. The Bonds mature on April 1, 2031 and bear interest at a fixed rate of 8.50% through maturity.

³ Other debt, including interest, primarily relates to non-recourse finance projects and solar power systems and leases under our residential lease program as described in "Item 1. Financial Statements—Notes to Consolidated Financial

Statements—Note 8. Commitments and Contingencies."

- ⁴ In connection with purchase and joint venture agreements with non-public companies, we will be required to provide additional financing to such parties of up to \$31.3 million, subject to certain conditions.
- ⁵ Operating lease commitments primarily relate to certain solar power systems leased from unaffiliated third parties over minimum lease terms of up to 20 years and various facility lease agreements.
- ⁶ Sale-leaseback financing relates to future minimum lease obligations for solar power systems under sale-leaseback arrangements which were determined to include integral equipment and accounted for under the financing method.

Table of Contents

⁷ Capital lease commitments primarily relate to certain buildings, manufacturing and equipment under capital leases in Europe for terms of up to 12 years.

⁸ Non-cancellable purchase orders relate to purchases of raw materials for inventory and manufacturing equipment from a variety of vendors.

Purchase commitments under agreements primarily relate to arrangements entered into with several suppliers, including some of our non-consolidated investees, for polysilicon, ingots, wafers, and Solar Renewable Energy Credits, among others. These agreements specify future quantities and pricing of products to be supplied by the vendors for periods up to 4 years and there are certain consequences, such as forfeiture of advanced deposits and liquidated damages relating to previous purchases, in the event that we terminate the arrangements. During fiscal ⁹ 2016, we did not fulfill all of the purchase commitments we were otherwise obligated to take by December 31, 2016, as specified in related contracts with a supplier. As of July 2, 2017, the Company has recorded an offsetting asset, recorded within "Prepaid expenses and other current assets," and liability, recorded within "Accrued liabilities," totaling \$32.0 million. This amount represents the unfulfilled amount as of that date as the Company expects to satisfy the obligation via purchases of inventory in fiscal 2017, within the applicable contractual cure period.

Liabilities Associated with Uncertain Tax Positions

Due to the complexity and uncertainty associated with our tax positions, we cannot make a reasonably reliable estimate of the period in which cash settlement will be made for our liabilities associated with uncertain tax positions in other long-term liabilities. Therefore, they have been excluded from the table above. As of July 2, 2017, total liabilities associated with uncertain tax positions were \$32.5 million and are included in "Other long-term liabilities" in our Consolidated Balance Sheets as they are not expected to be paid within the next twelve months.

Off-Balance Sheet Arrangements

As of July 2, 2017, we did not have any significant off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Table of Contents

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

Our exposure to movements in foreign currency exchange rates is primarily related to sales to European customers that are denominated in Euros. Revenue generated from European customers represented 7% and 6% of our total revenue in the three and six months ended July 2, 2017, respectively, and 5% of our total revenue in both the three and six months ended July 3, 2016. A 10% change in the Euro exchange rate would have impacted our revenue by approximately \$2.5 million and \$4.2 million in the three and six months ended July 2, 2017, respectively, and \$2.0 million and \$3.8 million in the three and six months ended July 3, 2016, respectively.

In the past, we have experienced an adverse impact on our revenue, gross margin and profitability as a result of foreign currency fluctuations. When foreign currencies appreciate against the U.S. dollar, inventories and expenses denominated in foreign currencies become more expensive. An increase in the value of the U.S. dollar relative to foreign currencies could make our solar power products more expensive for international customers, thus potentially leading to a reduction in demand, our sales and profitability. Furthermore, many of our competitors are foreign companies that could benefit from such a currency fluctuation, making it more difficult for us to compete with those companies.

We currently conduct hedging activities which involve the use of option and forward currency contracts that are designed to address our exposure to changes in the foreign exchange rate between the U.S. dollar and other currencies. As of July 2, 2017, we had outstanding hedge option currency contracts and forward currency contracts with aggregate notional values of \$1.6 million and \$48.7 million, respectively. As of January 1, 2017, we had outstanding hedge option currency contracts and forward currency contracts with aggregate notional values of \$28.3 million and \$42.9 million, respectively. Because we hedge some of our expected future foreign exchange exposure, if associated revenues do not materialize we could experience a reclassification of ineffective gains or losses into earnings. Such a reclassification could adversely impact our revenue, margins and results of operations. We cannot predict the impact of future exchange rate fluctuations on our business and operating results.

Credit Risk

We have certain financial and derivative instruments that subject us to credit risk. These consist primarily of cash and cash equivalents, restricted cash and cash equivalents, investments, accounts receivable, notes receivable, advances to suppliers, foreign currency option contracts, foreign currency forward contracts, bond hedge and warrant transactions. We are exposed to credit losses in the event of nonperformance by the counterparties to our financial and derivative instruments. Our investment policy requires cash and cash equivalents, restricted cash and cash equivalents, and investments to be placed with high-quality financial institutions and limits the amount of credit risk from any one issuer. We additionally perform ongoing credit evaluations of our customers' financial condition whenever deemed necessary and generally do not require collateral.

We enter into agreements with vendors that specify future quantities and pricing of polysilicon to be supplied for periods up to 10 years. Under certain agreements, we are required to make prepayments to the vendors over the terms of the arrangements. As of July 2, 2017 and January 1, 2017, advances to suppliers totaled \$252.0 million and \$284.8 million, respectively. Two suppliers accounted for 95% and 5% of total advances to suppliers as of July 2, 2017, and 90% and 10% as of January 1, 2017.

We enter into foreign currency derivative contracts and convertible debenture hedge transactions with high-quality financial institutions and limit the amount of credit exposure to any single counterparty. The foreign currency

derivative contracts are limited to a time period of 12 months or less. We regularly evaluate the credit standing of our counterparty financial institutions.

Interest Rate Risk

We are exposed to interest rate risk because many of our customers depend on debt financing to purchase our solar power systems. An increase in interest rates could make it difficult for our customers to obtain the financing necessary to purchase our solar power systems on favorable terms, or at all, and thus lower demand for our solar power products, reduce revenue and adversely impact our operating results. An increase in interest rates could lower a customer's return on investment in a system or make alternative investments more attractive relative to solar power systems, which, in each case, could cause our customers to seek alternative investments that promise higher returns or demand higher returns from our solar power systems, reduce gross margin and adversely impact our operating results. This risk is significant to our business because our sales model is highly sensitive to interest rate fluctuations and the availability of credit, and would be adversely affected by increases in interest rates or liquidity constraints.

Table of Contents

Our interest expense would increase to the extent interest rates rise in connection with our variable interest rate borrowings. As of July 2, 2017, the outstanding principal balance of our variable interest borrowings was \$328.7 million. We do not believe that an immediate 10% increase in interest rates would have a material effect on our financial statements. In addition, lower interest rates would have an adverse impact on our interest income. Our investment portfolio primarily consists of \$3.0 million in money market funds as of July 2, 2017 which exposes us to interest rate risk. Due to the relatively short-term nature of our investment portfolio, we do not believe that an immediate 10% decrease in interest rates would have a material effect on the fair market value of our money market funds. Since we believe we have the ability to liquidate substantially all of this portfolio, we do not expect our operating results or cash flows to be materially affected to any significant degree by a sudden change in market interest rates on our investment portfolio.

Equity Price Risk Involving Minority Investments in Joint Ventures and Other Non-Public Companies

Our investments held in joint ventures and other non-public companies expose us to equity price risk. As of July 2, 2017 and January 1, 2017, investments of \$(15.8) million and \$(6.9) million, respectively, are accounted for using the equity method, and \$33.1 million and \$39.4 million, respectively, are accounted for using the cost method. The carrying value of our equity method investments as of July 2, 2017 and January 1, 2017 included the negative balance of \$78.8 million and \$60.6 million, respectively, of our investment in the 8point3 Group (See "Item 1. Financial Statements—Notes to Consolidated Financial Statements—Note 9. Equity Method Investments"). These strategic investments in third parties are subject to risk of changes in market value, which if determined to be other-than-temporary, could result in realized impairment losses. We generally do not attempt to reduce or eliminate our market exposure in equity and cost method investments. We monitor these investments for impairment and record reductions in the carrying values when necessary. Circumstances that indicate an other-than-temporary decline include the valuation ascribed to the issuing company in subsequent financing rounds, decreases in quoted market prices and declines in operations of the issuer. There can be no assurance that our equity and cost method investments will not face risks of loss in the future.

Interest Rate Risk and Market Price Risk Involving Convertible Debt

The fair market value of our outstanding convertible debentures is subject to interest rate risk, market price risk and other factors due to the convertible feature of the debentures. The fair market value of the debentures will generally increase as interest rates fall and decrease as interest rates rise. In addition, the fair market value of the debentures will generally increase as the market price of our common stock increases and decrease as the market price of our common stock falls. The interest and market value changes affect the fair market value of the debentures, but do not impact our financial position, cash flows or results of operations due to the fixed nature of the debt obligations, except to the extent increases in the value of our common stock may provide the holders of our 4.00% debentures due 2023, 0.875% debentures due 2021, or 0.75% debentures due 2018 the right to convert such debentures into cash in certain instances. The aggregate estimated fair value of our outstanding convertible debentures was \$984.3 million as of July 2, 2017. The aggregate estimated fair value of our outstanding convertible debentures was \$839.2 million as of January 1, 2017. Estimated fair values are based on quoted market prices as reported by an independent pricing source. A 10% increase in quoted market prices would increase the estimated fair value of our then-outstanding debentures to \$1,082.7 million and \$923.1 million as of July 2, 2017 and January 1, 2017, respectively, and a 10% decrease in the quoted market prices would decrease the estimated fair value of our then-outstanding debentures to \$885.9 million and \$755.3 million as of July 2, 2017 and January 1, 2017, respectively.

ITEM 4: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain "disclosure controls and procedures," as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act, that are designed to provide reasonable assurance that information required to be disclosed in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognizes that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management is required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure control and procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of July 2, 2017 at a reasonable assurance level.

Changes in Internal Control over Financial Reporting

We regularly review our system of internal control over financial reporting and make changes to our processes and systems to improve controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, consolidating activities, and migrating processes.

There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The disclosure under "Note 8. Commitments and Contingencies—Legal Matters" in "Notes to Consolidated Financial Statements" contained in this Quarterly Report on Form 10-Q is incorporated herein by reference.

Table of Contents

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors we previously disclosed in our Annual Report on Form 10-K for the fiscal year ended January 1, 2017, except for the risk factors described and included below.

We may fail to realize the expected benefits of our YieldCo strategy, including our current plan to divest our interest in 8point3 Energy Partners, which could materially adversely affect our business, financial condition, and results of operations.

In June 2015, 8point3 Energy Partners, a joint YieldCo vehicle formed by us and First Solar, Inc. to own, operate and acquire solar energy generation assets, launched an initial public offering of Class A shares representing its limited partner interests. The IPO was consummated on June 24, 2015, whereupon the Class A shares were listed on The NASDAQ Global Select Market under the trading symbol “CAFD.”

Immediately after the IPO, we contributed a portfolio of solar generation assets to 8point3 Energy Partners in exchange for cash proceeds as well as equity interests in several 8point3 Energy Partners affiliated entities (collectively, the “8point3 Group”). Additionally, we entered into a Right of First Offer Agreement with 8point3 Energy Partners in connection with the IPO under which we granted 8point3 Energy Partners a right of first offer to purchase certain of our solar energy projects that are in various stages of development in our project pipeline. We have sold four of these projects to 8point3 Energy Partners to date, including two projects which are currently in the process of being sold in phases.

We may be unable to fully realize our expected strategic and financial benefits from the 8point3 Group on a timely basis or at all. The operations of the 8point3 Group are not consolidated with ours. Instead, we account for our investments in the 8point3 Group using the equity method, whereby the book value of our investments is recorded as a non-current asset and our portion of their earnings is recorded in the Consolidated Statements of Operations under the caption “Equity in earnings (loss) of unconsolidated investees.”

There is no assurance that we will realize a return on our equity investments in the 8point3 Group. The ability of the 8point3 Group to make cash distributions will depend primarily upon its cash flow, which is not solely a function of 8point3 Energy Partners’ profitability. There is no assurance that we will receive any further cash distributions. Accordingly, we may never recover the value of the assets we contribute to the YieldCo vehicle, and we may realize less of a return on such contribution than if we had retained or operated these assets. In addition, 8point3 Energy Partners may be unable to obtain funding through the sale of equity securities or otherwise. If adequate funds and other resources are not available on acceptable terms, 8point3 Group may be unable to purchase assets that we wish to sell, or otherwise function as anticipated and planned. In such event, our YieldCo strategy may not succeed, and our business, financial condition and results of operations would be materially adversely affected.

In addition, First Solar has notified the board of directors of 8point3 Energy Partners that it is reviewing alternatives for the sale of its interest in the 8point3 Group. While our strategic review process is ongoing, there has been significant initial interest in the acquisition of our general partnership stake or in the sale of the entire partnership. As a result, we are currently not actively seeking a replacement partner for First Solar, and are focusing on the sale of our equity interest in the 8point3 Group. We are exploring this divestiture jointly with First Solar in a number of transaction scenarios, but no final decisions or commitments have been made, and the details and timing of any such divestiture transaction are subject to change as the sale process continues.

We believe that the viability of our YieldCo strategy, unless and until the sale of our equity interest in the 8point3 Group is completed, will depend, among other things, upon our ability to continue to develop revenue-generating solar

assets, to build and manage relationships with sponsors, and to productively manage our relationship with First Solar (including within the context of the sale process) and the 8point3 Group, which are subject to the project-level, joint venture relationship, business, and industry risks described herein. There can be no assurance that we will be able to successfully close a divestiture transaction. If we are unable to successfully close a divestiture transaction within a reasonable time frame, our business, financial condition, and results of operations could be materially adversely affected. In addition, if we are unable to close a divestiture transaction, there is no assurance that we will be able to realize the strategic and financial benefits that we expect to derive from our YieldCo strategy and our investment in the 8point3 Group in particular, our business, financial condition and results of operations could be materially adversely affected.

A petition filed with the International Trade Commission (“ITC”) under Section 201 of the Trade Act of 1974 seeks remedies that could significantly and adversely affect our business, revenues, margins, results of operations, and cash flows.

Table of Contents

Suniva, Inc. has filed a Section 201 petition with the ITC, which Solar World Americas Inc. has joined, regarding foreign-manufactured PV cells and modules. The petitioners seek various remedies including tariffs and restrictions on such cells and modules, which may affect certain of our products and components manufactured outside the United States. Significant uncertainty exists regarding the outcome of this action, and an adverse determination by the ITC and imposition of certain remedies could materially and adversely affect our business and results of operations. Although we are actively engaged in industry efforts to oppose the imposition of remedies that may harm the solar industry in the U.S., and are exploring potential exemptions and other mitigating actions in the event there is an adverse determination, there is no guarantee that these efforts will be successful.

In the near term, the uncertainty surrounding the potential outcome of this case may cause market volatility, price fluctuations, supply shortages, and project delays, any of which could harm our business. In addition, an adverse determination by the ITC and the imposition of certain remedies including tariffs could result in a wide range of impacts to the U.S. solar industry and the global manufacturing market, as well as our business in particular. Such tariffs or similar taxes or duties, or other remedies that may be imposed, could materially increase the price of our solar products and result in significant additional costs to us, our resellers and our resellers' customers, which could cause a significant reduction in demand for our solar power products and greatly reduce our competitive advantage. Any of these outcomes would materially and adversely affect our business, revenues, margins, results of operations, and cash flows.

ITEM 2: UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

The following table sets forth all purchases made by or on behalf of us or any "affiliated purchaser," as defined in Rule 10b-18(a)(3) under the Exchange Act, of shares of our common stock during each of the indicated periods.

Period	Total Number of Shares Purchased ¹	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Publicly Announced Plans or Programs
April 3, 2017 through April 30, 2017	9,524	\$ 6.44	—	—
May 1, 2017 through May 28, 2017	4,946	\$ 7.12	—	—
May 29, 2017 through July 2, 2017	7,199	\$ 7.90	—	—
	21,669	\$ 7.08	—	—

¹ The shares purchased represent shares surrendered to satisfy tax withholding obligations in connection with the vesting of restricted stock issued to employees.
