Magic Software Releases Magic xpa 4.0 Featuring a Powerful New Angular-based Web Application Framework

PRESS RELEASE

Magic Software Releases Magic xpa 4.0 Featuring a Powerful New Angular-based Web Application Framework

New framework enables rapid development and deployment of highly-responsive single page apps

Or Yehuda, Israel, August 6, 2018 Magic Software Enterprises Ltd. (NASDAQ and TASE: MGIC), a global provider of end-to-end integration and application development platforms and IT consulting services, announced today the release of Magic xpa 4.0 with its new powerful Angular-based Web application framework that provides Magic developers and Angular developers with the power to easily develop device-agnostic and feature-packed Web applications.

Using the new framework, developers can now deliver a full-stack solution based on Angular code that is automatically generated from the logic of business applications. Angular is an open-source JavaScript framework, developed and maintained by Google, that helps developers and designers build dynamic user interfaces for Web applications. Using Magic s low-code Web application development framework, applications can be deployed on any cloud, device, or browser with zero footprint.

Magic s Web application framework decouples the business logic from the presentation of the apps providing developers with the flexibility to use the Angular open-source platform with industry-standard state-of-the-art technologies, including HTML5, CSS, and JavaScript for designer-quality screens, while benefiting from the productivity, security, and scalability capabilities provided by Magic s low-code development platform.

We are excited to bring to market this unique and groundbreaking update of our flagship low-code application development platform, empowering our customers with access to the latest emerging technologies for easy and quick development of high-quality applications, a necessity in the area of digital transformation, said Yuval Lavi, Vice President of Technology & Innovation with Magic Software.

An on-demand webinar about the new framework, presented by our Web Client Task Force, is available on our site.
