$[n]

Autocallable Fixed Interest Barrier Notes Linked to the Least Performing among the Common Stock of Apple Inc., Amazon.com, Inc., and Netflix, Inc. Due December 23, 2021

The Toronto-Dominion Bank ("TD" or "we") is offering the Autocallable Fixed Interest Barrier Notes (the "Notes") linked to the least performing among the common stock of Apple Inc., Amazon.com, Inc., and Netflix, Inc. (each, a "Reference Asset" and together, the "Reference Assets").

The Notes will pay you an Interest Payment on each Interest Payment Date at a per annum rate of between 10.25% and 11.25% (to be determined on the Pricing Date), regardless of the performance of the Reference Assets, unless the Notes are subject to an automatic call. The Notes will be automatically called if, on any Call Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value. If the Notes are automatically called, on the first following Interest Payment Date (the "Call Payment Date"), we will pay a cash payment per Note equal to the Principal Amount, plus the Interest Payment otherwise due. No further amounts will be owed under the Notes. If the Notes are not automatically called, the amount we pay at maturity, in addition to the Interest Payment otherwise due, if anything, will depend on the Closing Value of each Reference Asset on its Final

Valuation Date (each, its "Final Value") relative to its Barrier Value, which is equal to 60.00% of its Initial Value. The payment at maturity will be calculated as follows:

· If the Final Value of each Reference Asset is greater than or equal to its Barrier Value:

the Principal Amount of $1,000

· If the Final Value of any Reference Asset is less than its Barrier Value:

the sum of (1) $1,000 plus (2) the product of (i) $1,000 times (ii) the Least Performing Percentage Change

In this scenario, investors will suffer a loss on their initial investment that is proportionate to the Reference Asset with the lowest percentage change from its Initial Value to its Final Value (the "Least Performing Reference Asset") over the term of the Notes. Specifically, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount. Any payments on the Notes are subject to our credit risk.

The Notes do not guarantee the return of the Principal Amount. Investors are exposed to the market risk of each Reference Asset and any decline in the value of one Reference Asset will not be offset or mitigated by a lesser decline or potential increase in the value of any other Reference Asset. If the Final Value of any Reference Asset is less than its Barrier Value, investors may lose up to their entire investment in the Notes. Any payments on the Notes are subject to our credit risk.

The Notes are unsecured and are not savings accounts or insured deposits of a bank. The Notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States. The Notes will not be listed or displayed on any securities exchange or electronic communications network.

The Notes have complex features and investing in the Notes involves a number of risks. See "Additional Risk Factors" beginning on page P-7 of this preliminary pricing supplement (this "pricing supplement"), "Additional Risk Factors Specific to the Notes" beginning on page PS-5 of the product prospectus supplement MLN-ES-ETF-1 dated July 8, 2016 (the "product prospectus supplement") and "Risk Factors" on page 1 of the prospectus dated June 30, 2016 (the "prospectus").

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of these Notes or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Notes in book-entry only form through the facilities of The Depository Trust Company on or about December 27, 2018 against payment in immediately available funds.

The estimated value of your Notes at the time the terms of your Notes are set on the Pricing Date is expected to be between $910.00 and $940.00 per Note, as discussed further under "Additional Risk Factors — Estimated Value" beginning on page P-9 and "Additional Information Regarding the Estimated Value of the Notes" on page P-25 of this pricing supplement. The estimated value is expected to be less than the public offering price of the Notes.

	Public Offering Price[1]	Underwriting Discount[2]	Proceeds to TD
Per Note	$1,000.00	$32.50	$967.50
Total	$	$	$

The public offering price, underwriting discount and proceeds to TD listed above relate to the Notes we issue initially. We may decide to sell additional Notes after the date of the final pricing supplement, at public offering prices and with underwriting discounts and proceeds to TD that differ from the amounts set forth above. The return (whether positive or negative) on your investment in the Notes will depend in part on the public offering price you pay for such Notes.

---

[1] Certain dealers who purchase the Notes for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The public offering price for investors purchasing the Notes in these accounts may be as low as $967.50 (96.75%) per $1,000.00 Principal Amount of the Notes.

[2] TD Securities (USA) LLC ("TDS") will receive a commission of $32.50 (3.25%) per $1,000.00 principal amount of the Notes and may use all or a portion of that commission to allow selling concessions to other dealers in connection with the distribution of the Notes, or will offer the Notes directly to investors. TDS may resell the Notes to other securities dealers at the Principal Amount less a concession not in excess of $32.50 per Note. The other dealers may forgo, in their sole discretion, some or all of their selling concessions. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Notes, and TD will pay TDS a fee in connection with its role in the offer and sale of the Notes. See "Supplemental Plan of Distribution (Conflicts of Interest)" on page P-24 of this pricing supplement.

Autocallable Fixed Interest Barrier Notes Linked to the Least Performing among the Common Stock of Apple Inc., Amazon.com, Inc., and Netflix, Inc. Due December 23, 2021

Summary

The information in this "Summary" section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer:	TD
Issue:	Senior Debt Securities, Series E
Type of Note:	Autocallable Fixed Interest Barrier Notes
Term:	Approximately 3 years, subject to an automatic call
Reference Assets:	The common stock of Apple Inc. (Bloomberg ticker: AAPL, "AAPL") Amazon.com, Inc. (Bloomberg ticker: AMZN, "AMZN"), and the common stock Netflix, Inc. (Bloomberg ticker: NFLX, "NFLX")
CUSIP / ISIN:	89114QFZ6 / US89114QFZ63
Agent:	TDS
Currency:	U.S. Dollars
Minimum Investment:	$1,000 and minimum denominations of $1,000 in excess thereof
Principal Amount:	$1,000 per Note
Pricing Date:	December 21, 2018
Issue Date:	December 27, 2018, which is two Business Days following the Pricing Date.
Final Valuation Date:	December 21, 2021, subject to postponement in the same manner as a Call Observation Date, as described below under "Call Observation Dates" and as described under "General Terms of the Notes—Market Disruption Events" in the product prospectus supplement. If such day is not a Trading Day, the Final Valuation Date shall be the first following Trading Day.
Maturity Date:	December 23, 2021, subject to postponement as described below under "Call Observation Dates" and as described under "General Terms of the Notes—Market Disruption Events" in the product prospectus supplement or, if such day is not a Business Day, the next following Business Day.
Call Feature:	If the Closing Value of each Reference Asset on any Call Observation Date is greater than or equal to its Call Threshold Value, we will automatically call the Notes and, on the related Call Payment Date, will pay you a cash payment equal to the Principal Amount, plus the Interest Payment otherwise due. No further amounts will be owed to you under the Notes.

Call Threshold Value:	With respect to AAPL, $[n] (100.00% of its initial value, to be determined on the Pricing Date). With respect to AMZN, $[n] (100.00% of its initial value, to be determined on the Pricing Date). With respect to NFLX, $[n] (100.00% of its initial value, to be determined on the Pricing Date). Each Call Threshold Value is subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.
Call Observation Dates:	Quarterly, on the 21st calendar day of each March, June, September and December, commencing on March 21, 2019 and ending on September 21, 2021, or, if such day is not a Trading Day, the next following Trading Day. If a Market Disruption Event occurs or is continuing with respect to a Reference Asset on any Call Observation Date, the Call Observation Date for the affected Reference Asset will be postponed until the next Trading Day on which no Market Disruption Event occurs or is continuing for that Reference Asset. In no event, however, will any Call Observation Date for any Reference Asset be postponed by more than ten Trading Days. If the determination of the Closing Value of a Reference Asset for any Call Observation Date is postponed to the last possible day, but a Market Disruption Event occurs or is continuing on that day, that day will nevertheless be the date on which the Closing Value of such Reference Asset will be determined. In such an event, the Calculation Agent will estimate the Closing Value that would have prevailed in the absence of the Market Disruption Event. For the avoidance of doubt, if on any Call Observation Date, no Market Disruption Event is occurring with respect to a particular Reference Asset, the Call Observation Date for such Reference Asset will be made on the originally scheduled Observation Date irrespective of the occurrence of a Market Disruption event with respect to another Reference Asset.
Call Payment Date:	If the Notes are subject to an automatic call, the Call Payment Date will be the Interest Payment Date immediately following the relevant Call Observation Date, subject to postponement as described above under “Call Observation Dates” if the related Call Observation Date is postponed or, if such day is not a Business Day, the next following Business Day.
Interest Payment:	An Interest Payment will be paid to you on the corresponding Interest Payment Date regardless of the performance of each Reference Asset (unless the Notes are subject to an automatic call), in an amount equal to: Principal Amount x Interest Rate x 1/12
Interest Rate:	Expected to be between 10.25% and 11.25% per annum (to be determined on the Pricing Date).
Interest Payment Dates:	The 23rd calendar day of each month, commencing on January 23rd, 2019 and ending on the Maturity Date, or, if such day is not a Business Day, the next following Business Day. Each Interest Payment Date is subject to postponement as described above under “— Call Observation Dates” if the related Call Observation Date is postponed.
Payment at Maturity:	If the Notes are not automatically called, on the Maturity Date, in addition to the Interest Payment otherwise due, we will pay a cash payment, if anything, per Note equal to: If the Final Value of each Reference Asset is greater than or equal to its Barrier Value: Principal Amount of $1,000. If the Final Value of any Reference Asset is less than its Barrier Value: $1,000 + $1,000 x Least Performing Percentage Change. All amounts used in or resulting from any calculation relating to the Notes, including the Payment at Maturity, will be rounded upward or downward as appropriate, to the nearest cent.

Percentage Change:	For each Reference Asset, the Percentage Change is the quotient, expressed as a percentage, of the following formula: $\frac{\text{Final Value} - \text{Initial Value}}{\text{Initial Value}}$

Initial Value:	With respect to AAPL, $[n] (to be determined on the Pricing Date). With respect to AMZN, $[n] (to be determined on the Pricing Date). With respect to NFLX, $[n] (to be determined on the Pricing Date). In each case equal to its Closing Value on the Pricing Date, as determined by the Calculation Agent and subject to adjustment, as described under "General Terms of the Notes— Anti-Dilution Adjustments" in the product prospectus supplement.
Closing Value:	For each Reference Asset, the Closing Value will be the closing sale price or last reported sale price (or, in the case of NASDAQ, the official closing price) for that Reference Asset on a per-share or other unit basis, on any Trading Day for that Reference Asset or, if such Reference Asset is not quoted on any national securities exchange on that day, on any other market system or quotation system that is the primary market for the trading of such Reference Asset.
Final Value:	For each Reference Asset, the Closing Value of such Reference Asset on its Final Valuation Date.
Barrier Value:	With respect to AAPL, $[n] (60.00% of its initial value, to be determined on the Pricing Date). With respect to AMZN, $[n] (60.00% of its initial value, to be determined on the Pricing Date). With respect to NFLX, $[n] (60.00% of its initial value, to be determined on the Pricing Date). Each Barrier Value is subject to adjustment as described under "General Terms of the Notes— Anti-Dilution Adjustments" in the product prospectus supplement.
Least Performing Reference Asset:	The Reference Asset with the lowest Percentage Change as compared to the Percentage Change of any other Reference Asset.
Least Performing Percentage Change:	The Percentage Change of the Least Performing Reference Asset.
Monitoring Period:	Final Valuation Date Monitoring
Business Day:	Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City or Toronto.
U.S. Tax Treatment:	By purchasing the Notes, you agree, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to treat each Note, for U.S. federal income tax purposes, as consisting of two components for U.S. federal income tax purposes: (1) a non-contingent debt instrument (the "Debt Component"); and (2) a put option contract in respect of the Reference Assets (the "Put Option Component"), allocated as specified herein under "Supplemental Discussion of U.S. Federal Income Tax Consequences". Based on certain factual representations received from us, our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, is of the opinion that it would be reasonable to treat the Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Notes could differ materially and adversely from the treatment described above, as described further herein under "Supplemental Discussion of U.S. Federal Income Tax Consequences" and in the product prospectus supplement under "Supplemental Discussion of U.S. Federal Income Tax Consequences"

	beginning on page PS-21.
Canadian Tax Treatment:	Please see the discussion in the product prospectus supplement under "Supplemental Discussion of Canadian Tax Consequences," which applies to the Notes.
Record Date:	The Business Day preceding the relevant Interest Payment Date.

Calculation Agent:	TD
Listing:	The Notes will not be listed or displayed on any securities exchange or electronic communications network.
Clearance and Settlement:	DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg as described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus).
Canadian Bail-in:	The Notes are not bail-inable notes under the Canada Deposit Insurance Corporation Act.

The Pricing Date, the Issue Date, and all other dates listed above are subject to change. These dates will be set forth in the final pricing supplement that will be made available in connection with sales of the Notes.

Additional Terms of Your Notes

You should read this preliminary pricing supplement (this "pricing supplement") together with the prospectus, as supplemented by the product prospectus supplement MLN-ES-ETF-1 (the "product prospectus supplement"), relating to our Senior Debt Securities, Series E, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Notes vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in "Additional Risk Factors" beginning on page P-7 of this pricing supplement, "Additional Risk Factors Specific to the Notes" beginning on page PS-5 of the product prospectus supplement and "Risk Factors" on page 1 of the prospectus, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. You may access these documents on the SEC website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

§ Prospectus dated June 30, 2016: https://www.sec.gov/Archives/edgar/data/947263/000119312516638441/d162493d424b3.htm

§ Product Prospectus Supplement MLN-ES-ETF-1 dated July 8, 2016: https://www.sec.gov/Archives/edgar/data/947263/000089109216016045/e70441_424b2.htm

Our Central Index Key, or CIK, on the SEC website is 0000947263. Alternatively, The Toronto-Dominion Bank, any Agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234. As used in this pricing supplement, the "Bank," "we," "us," or "our" refers to The Toronto-Dominion Bank and its subsidiaries.

We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes, in which case we may reject your offer to purchase.

Additional Risk Factors

The Notes involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Notes. For additional information as to these and other risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and the prospectus.

You should carefully consider whether the Notes are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Notes and the suitability of the Notes in light of their particular circumstances.

Your Investment in the Notes May Result in a Loss.

The Notes do not guarantee the return of the Principal Amount and investors may lose up to their entire investment in the Notes. Specifically, if the Notes are not automatically called and the Final Value of any Reference Asset is less than its Barrier Value, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount.

The Potential Positive Return on the Notes Is Limited to the Interest Payments Paid on the Notes, Regardless of Any Appreciation in the Price of Any Reference Asset.

The potential positive return on the Notes is limited to the Interest Payments paid, meaning any positive return on the Notes will be composed solely by the sum of the Interest Payments paid over the term of the Notes. Therefore, if the appreciation of any Reference Asset exceeds the sum of the Interest Payments actually paid on the Notes, the return on the Notes will be less than the return would be if you made a direct investment in such Reference Asset or a security directly linked to the positive performance of such Reference Asset.

Your Return May Be Lower than the Return on a Conventional Debt Security of Comparable Maturity.

The return that you will receive on your Notes, which could be negative, may be less than the return you could earn on other investments. Even if the Notes are not subject to an automatic call and your return on the Notes is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD with the same maturity date or if you invested directly in any of the Reference Assets. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

The Notes May Be Automatically Called Prior to the Maturity Date And Are Subject to Reinvestment Risk.

If your Notes are automatically called, no further payments will be owed to you under the Notes after the applicable Call Payment Date. Therefore, because the Notes could be called as early as the first potential Call Payment Date, the holding period could be limited. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Notes at a comparable return for a similar level of risk in the event the Notes are automatically called prior to the Maturity Date. Furthermore, to the extent you are able to reinvest such proceeds in an investment with a comparable return for a similar level of risk, you may incur transaction costs such as dealer discounts and hedging costs built into the price of the new notes.

Investors Are Exposed to the Market Risk of Each Reference Asset.

Your return on the Notes is not linked to a basket consisting of the Reference Assets. Rather, it will be contingent upon the performance of each Reference Asset. Unlike an instrument with a return linked to a basket of indices, common stocks or other underlying securities, in which risk is mitigated and diversified among all of the components of the basket, you will be exposed equally to the risks related to each Reference Asset on the Final Valuation Date. Poor performance by any Reference Asset will negatively affect your return and will not be offset or mitigated by a positive performance by any other Reference Asset. For instance, you will receive a negative return equal to the Least Performing Percentage Change if the Final Value of any Reference Asset is less than its Barrier Value on its Final Valuation Date, even if the Percentage Change of another Reference Asset is positive or has not declined as much. Accordingly, your investment is subject to the market risk of each Reference Asset.

Because the Notes are Linked to the Least Performing Reference Asset, You Are Exposed to a Greater Risk of Losing a Significant Portion or All of Your Initial Investment at Maturity than if the Notes Were Linked to a Single Reference Asset.

The risk that (i) the Final Value of any Reference Asset is less than its Barrier Value and (ii) that you will lose a significant portion or all of your initial investment in the Notes is greater if you invest in the Notes than the risk of investing in substantially similar securities that are linked to the performance of only one Reference Asset. With more Reference Assets, it is more likely that the Final Value of any Reference Asset will be less than its Barrier Value on the Final Valuation Date than if the Notes were linked to a single Reference Asset.

In addition, the lower the correlation is between the performance of a pair of Reference Assets, the more likely it is that one of the Reference Assets will decline in value to a Closing Value or Final Value, as applicable, that is less than its Barrier Value on the Final Valuation Date. Although the correlation of the Reference Assets' performance may change over the term of the Notes, the economic terms of the Notes, including the Barrier Value and Interest Rate are determined, in part, based on the correlation of the Reference Assets' performance calculated using our internal models at the time when the terms of the Notes are finalized. All things being equal, a higher Interest Rate and lower Barrier Values are generally associated with lower correlation of the Reference Assets. Therefore, if the performance of a pair of Reference Assets is not correlated to each other or is negatively correlated, the risk that the Closing Value of any Reference Asset is less than its Barrier Value on the Final Valuation Date is even greater despite a lower Barrier Value. Therefore, it is more likely that the Final Value of a Reference Asset will be less than its Barrier Value and that you will lose a significant portion or all of your initial investment at maturity.

Investors Are Subject to TD's Credit Risk, and TD's Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Notes.

Although the return on the Notes will be based on the performance of the Least Performing Reference Asset, the payment of any amount due on the Notes is subject to TD's credit risk. The Notes are TD's senior unsecured debt obligations. Investors are dependent on TD's ability to pay all amounts due on the Notes and, therefore, investors are subject to the credit risk of TD and to changes in the market's view of TD's creditworthiness. Any decrease in TD's credit ratings or increase in the credit spreads charged by the market for taking TD's credit risk is likely to adversely affect the market value of the Notes. If TD becomes unable to meet its financial obligations as they become due, investors may not receive any amounts due under the terms of the Notes.

The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Notes will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, any underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Notes. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction.

There May Not Be an Active Trading Market for the Notes — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Notes. The Notes will not be listed or displayed on any securities exchange or electronic communications network. The Agent may make a market for the Notes; however, it is not required to do so and may stop any market-making activities at any time. Even if a secondary market for the Notes develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Notes in any secondary market could be substantial.

If you sell your Notes before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the value of the then-current least performing Reference Asset, and as a result, you may suffer substantial losses.

The Interest Rate Will Reflect In Part the Volatility of each Reference Asset and May Not Be Sufficient to Compensate You for the Risk of Loss at Maturity.

Generally, the higher the Reference Assets' volatility, the more likely it is that the Closing Value of each Reference Asset could be less than its Barrier Value on the Final Valuation Date. Volatility means the magnitude and frequency of changes in the values of the Reference Assets. This greater risk will generally be reflected in a higher Interest Rate for the Notes than the interest rate payable on our conventional debt securities with a comparable term. However, while the Interest Rate is set on the Pricing Date, the Reference Assets' volatility can change significantly over the term of the Notes, and may increase. The value of any Reference Asset could fall sharply during the term of the Notes, including on the Final Valuation Date, resulting in an increased risk of being exposed to the Least Performing Reference Asset on the Final Valuation Date, which could result in the loss of a significant portion or all of your

Principal Amount.

There Are Single Stock Risks Associated with each Reference Asset.

The value of each Reference Asset can rise or fall sharply due to factors specific to such Reference Asset and their issuers (the “Reference Asset Issuer”, and together, the “Reference Asset Issuers”), such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock and commodity market volatility and levels, interest rates and economic and political conditions. You, as an investor in the Notes, should make your own investigation into the Reference Assets and Reference Asset Issuers for your Notes. For additional information, see "Information Regarding the Reference Assets" in this pricing supplement and the each Reference Asset Issuer's SEC filings. **We urge you to review financial and other information filed periodically by the Reference Asset Issuers with the SEC.**

Trading and Business Activities by TD or its Affiliates May Adversely Affect the Market Value of the Notes.

We, the Agent and our affiliates may hedge our obligations under the Notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the price of a Reference Asset, and we may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Notes declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in a Reference Asset.

These trading activities may present a conflict between the holders’ interest in the Notes and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers’ accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Notes.

We, the Agent and our affiliates may, at present or in the future, engage in business with one or more Reference Asset Issuers, including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between our, the Agent's and our affiliates' obligations, and your interests as a holder of the Notes. Moreover, we, the Agent or our affiliates may have published, and in the future expect to publish, research reports with respect to a Reference Asset. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities by us or one or more of our affiliates or the Agents or their affiliates may affect the value of a Reference Asset and, therefore, the market value of the Notes and any payments on the Notes.

Estimated Value

The Estimated Value of Your Notes Is Expected To Be Lower Than the Public Offering Price of Your Notes.

The estimated value of your Notes on the Pricing Date is expected to be lower, and may be significantly lower, than the public offering price of your Notes. The difference between the public offering price of your Notes and the estimated value of the Notes reflects costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

The Estimated Value of Your Notes Is Based on Our Internal Funding Rate.

The estimated value of your Notes on the Pricing Date is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Notes generally represents a discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would pay for its conventional fixed-rate debt securities. This discount is based on, among other things, our view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for our conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional fixed-rate debt securities, or the borrowing rate we would pay for our conventional fixed-rate debt securities were to be used, we would expect the economic terms of the Notes to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Notes is expected to increase the estimated value of the Notes at any time.

The Estimated Value of the Notes Is Based on Our Internal Pricing Models, Which May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.

The estimated value of your Notes on the Pricing Date is based on our internal pricing models when the terms of the Notes are set, which take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Notes may not be consistent with those of other financial institutions that may be purchasers or sellers of Notes in the secondary market. As a result, the secondary market price of your Notes may be materially lower than the estimated value of the Notes determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of Your Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely be Lower Than the Public Offering Price of Your Notes and May Be Lower Than the Estimated Value of Your Notes.

The estimated value of the Notes will not be a prediction of the prices at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time, if any, will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than the estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes, secondary market prices of your Notes will likely be lower than the public offering price of your Notes. As a result, the price at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be lower than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which the Agent May Initially Buy the Notes in the Secondary Market May Not Be Indicative of Future Prices of Your Notes.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agent may initially buy or sell the Notes in the secondary market (if the Agent makes a market in the Notes, which it is not obligated to do) may exceed the estimated value of the Notes on the Pricing Date, as well as the secondary market value of the Notes, for a temporary period after the Issue Date of the Notes, as discussed further under “Additional Information Regarding the Estimated Value of the Notes.” The price at which the Agent may initially buy or sell the Notes in the secondary market may not be indicative of future prices of your Notes.

If the Values of any Reference Asset Changes, the Market Value of Your Notes May Not Change in the Same Manner.

Your Notes may trade quite differently from the performance of any of the Reference Assets. Changes in the value of any Reference Asset may not result in a comparable change in the market value of your Notes. Even if the Closing Value of each Reference Asset remains equal to or greater than its Barrier Value or increases greater than its Initial Value during the life of the Notes, the market value of your Notes may not increase by the same amount and could decline.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the Payment at Maturity on the Notes. We will serve as the Calculation Agent but may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to unwind any related hedges. Since this discretion by the Calculation Agent may affect payments on the Notes, the Calculation Agent may have a conflict of interest if it needs to make any such decision. For example, the Calculation Agent may have to determine whether a Market Disruption Event affecting a Reference Asset has occurred, and make certain adjustments to the Reference Asset if certain events occur. This determination may, in turn, depend on the Calculation Agent’s judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Notes, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent’s role, see “General Terms of the Notes—Role of Calculation Agent” in the product prospectus supplement.

You Will Have No Rights to Receive Any Shares of a Reference Asset and You Will Not Be Entitled to Dividends or Other Distributions by a Reference Asset.

The Notes are our debt securities. They are not equity instruments, shares of stock, or securities of any other issuer. Investing in the Notes will not make you a holder of shares of any Reference Asset. You will not have any voting rights, any rights to receive dividends or other distributions, any rights against any Reference Asset Issuer. As a result, the return on your Notes may not reflect the return you would realize if you actually owned shares of any Reference Asset and received the dividends paid or other distributions made in connection with them. Your Notes will be paid in cash and you have no right to receive delivery of shares of any Reference Asset.

Each Call Observation Date, the Final Valuation Date and the Interest Payment Dates are subject to Market Disruption Events and Postponements.

Each Call Observation Date, the Final Valuation Date and each Interest Payment Date (including the Maturity Date), is subject to postponement as described in the product prospectus supplement due to the occurrence of one of more market disruption events. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement. A market disruption event for a particular Reference Asset will not constitute a market disruption event for any other Reference Asset.

We Do Not Control any Reference Asset Issuer and Are Not Responsible for Any of their Disclosures.

Neither we nor any of our affiliates have the ability to control the actions of any Reference Asset Issuer and have not conducted any independent review or due diligence of any information related to any Reference Asset or Reference Asset Issuer. We are not responsible for any Reference Asset Issuer’s public disclosure of information on itself or the applicable Reference Asset, whether contained in Securities Exchange Commission filings or otherwise. You should make your own investigation into each of the Reference Asset Issuers.

You Will Have Limited Anti-Dilution Protection.

The Calculation Agent will adjust the Initial Price and Barrier Price for stock splits, reverse stock splits, stock dividends, extraordinary dividends and other events that affect the Reference Assets, but only in the situations we describe in “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement and “Anti-Dilution Adjustments” herein. The Calculation Agent will not be required to make an adjustment for every event that may affect the Reference Assets. Those events or other actions by any Reference Asset Issuer or a third party may nevertheless adversely affect the price of a Reference Asset, and adversely affect the value of your Notes.

Significant Aspects of the Tax Treatment of the Notes Are Uncertain.

The U.S. tax treatment of the Notes is uncertain. Please read carefully the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” in the product prospectus supplement and the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” below. You should consult your tax advisor about your tax situation.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Notes, please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences.” If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Notes in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Notes and receiving the payments that might be due under the Notes.

Anti-Dilution Adjustments

The section “General Terms of the Notes—Anti-Dilution Adjustments—Transferable Rights and Warrants” in the product prospectus

supplement is replaced in its entirety with the following:

Transferable Rights and Warrants

If a Reference Asset Issuer issues transferable rights or warrants to all holders of such Reference Asset to subscribe for or purchase such Reference Asset at an exercise price per share that is less than its Closing Value on the Trading Day before the ex-dividend date for such issuance, then the Calculation Agent may adjust the Initial Value and/or Final Value, as applicable, of that Reference Asset, or any other terms of the Notes as the Calculation Agent determines appropriate with reference to any adjustment(s) to options contracts on the affected Reference Asset in respect of such issuance of transferable rights or warrants made by the Options Clearing Corporation, or any other equity derivatives clearing organization or exchange to account for the economic effect of such issuance.

Hypothetical Returns

The examples set out below are included for illustration purposes only and are hypothetical examples only; amounts below may have been rounded for ease of analysis. The Closing Values and Percentage Changes of the Reference Assets used to illustrate the Payment at Maturity (rounded to two decimal places) or upon an automatic call are not estimates or forecasts of the Initial Value, the Final Value or the value of any Reference Asset on any Trading Day prior to the Maturity Date. All examples assume hypothetical Initial Values of $180.00, $1,700.00 and $280.00, Call Threshold Values of $180.00, $1,700.00 and $280.00 (each 100.00% of the applicable hypothetical Initial Value) and Barrier Values of $108.00, $1,020.00 and $168.00 respectively (each 60.00% of the applicable hypothetical Initial Value), an Interest Payment of $8.54 per Note (reflecting an Interest Rate of 10.25% per annum, which is the bottom of the range specified on the cover hereof), that a holder purchased Notes with a Principal Amount of $1,000 and that no Market Disruption Event occurs on any Call Observation Date or on the Final Valuation Date. The actual Initial Values, Call Threshold Values and Barrier Values will be set forth on the cover page of the final pricing supplement.

Example 1 — The Closing Value of Each Reference Asset is Greater than or Equal to its Call Threshold Value on the First Call Observation Date and The Notes Are Automatically Called.

Call Observation Date	**Closing Values**	**Payment (per Note)**
First	Reference Asset A: $180.00 (**greater than or equal to** its Call Threshold Value) Reference Asset B: $1,700.00 (**greater than or equal to** its Call Threshold Value) Reference Asset C: $280.00 (**greater than or equal to** its Call Threshold Value)	$1,000 (Principal Amount) + $8.54 (Interest Payment) $1,008.54 (Total Payment upon Automatic Call) + $17.08 (Interest Payments Previously Paid) $1,025.62 (Total Return)

If on the first Call Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value, the Notes will be automatically called and, on the related Call Payment Date, we will pay you a cash payment equal to $1,008.54 per Note, reflecting the Principal Amount plus the applicable Interest Payment. When added to the Interest Payments of $17.08 received in respect of the prior Interest Payment Dates, you will have received $1,025.62, a return of 2.562% per Note. No further amounts will be owed under the Notes.

Example 2 — The Closing Value of Each Reference Asset is Greater than or Equal to its Call Threshold Value on the Fourth Call Observation Date and The Notes Are Automatically Called.

Call Observation Date	**Closing Value**	**Payment (per Note)**
First through Third	Reference Asset A: Various (all **less than** its Call Threshold Value) Reference Asset B: Various (all **less than** its Call Threshold Value)	$76.86 (Aggregate Interest Payments through Third Call Observation Date)

	Reference Asset C: Various (all **less than** its Call Threshold Value)	
Fourth	Reference Asset A: $200.00 (**greater than** its Call Threshold Value) Reference Asset B: $1,800.00 (**greater than** its Call Threshold Value) Reference Asset C: $300.00 (**greater than** its Call Threshold Value)	$1,000 (Principal Amount) + $8.54 (Interest Payment) $1,008.54 (Total Payment upon Automatic Call) + $93.94 (Interest Payments Previously Paid) $1,102.48 (Total Return)

If on the fourth Call Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value, the Notes will be automatically called and, on the related Call Payment Date, we will pay you a cash payment equal to $1,008.54 per Note, reflecting the Principal Amount plus the applicable Interest Payment. When added to the Interest Payments of $93.94 paid in respect of the prior Interest Payment Dates, the Bank will have paid you a total of $1,102.48 per Note, a return of 10.248% per Note. No further amounts will be owed under the Notes.

Example 3 — The Closing Value of Each Reference Asset is Less than its Initial Value on each Call Observation Date and the Final Value of each Reference Asset is greater than or equal to its Barrier Value.

Call Observation Date	**Closing Value**	**Payment (per Note)**
First through Eleventh	Reference Asset A: Various (all **<u>less than</u>** its Call Threshold Value) Reference Asset B: Various (all **<u>less than</u>** its Call Threshold Value) Reference Asset C: Various (all **<u>less than</u>** its Call Threshold Value)	$281.82 (Aggregate Interest Payments through Eleventh Call Observation Date)
Final Valuation Date	Reference Asset A: $170.00 (**<u>greater than</u>** its Barrier Value; **<u>less than</u>** its Initial Value) Reference Asset B: $1,500.00 (**<u>greater than</u>** its Barrier Value; **<u>less than</u>** its Initial Value) Reference Asset C: $270.00 (**<u>greater than</u>** its Barrier Value; **<u>less than</u>** its Initial Value)	$1,000 (Principal Amount) <u>+ $8.54</u> (Interest Payment) $1,008.54 (Total Payment on Maturity Date) <u>+ $298.90</u> (Interest Payments Previously Paid) $1,307.44 (Total Return)

If the Closing Value of each Reference Asset on each of the first through eleventh Call Observation Dates is less than its Call Threshold Value on each Call Observation Date, we will pay the Interest Payment on the applicable Interest Payment Date and the Notes will not be subject to an automatic call. Then, because the Final Value of each Reference Asset is greater than its Barrier Value, on the Maturity Date we will pay you a cash payment equal to $1,008.54 per Note, reflecting the Principal Amount plus the applicable Interest Payment. When added to the Interest Payments of $298.90 paid in respect of the prior Interest Payment Dates, the Bank will have paid you a total of $1,307.44 per Note, a return of 30.744% per Note.

Example 4 — The Closing Value of Each Reference Asset is Less than its Initial Value on each Call Observation Date and the Final Value of one Reference Asset is less than its Barrier Value.

Call Observation Date	**Closing Value**	**Payment (per Note)**
First through Eleventh	Reference Asset A: Various (all **<u>less than</u>** its Call Threshold Value) Reference Asset B: Various (all **<u>less than</u>** its Call Threshold Value) Reference Asset C: Various (all **<u>less than</u>** its Call Threshold Value)	$281.82 (Aggregate Interest Payments through Eleventh Call Observation Date)

Final Valuation Date	Reference Asset A: $54 (**less than** its Barrier Value, and Initial Value) Reference Asset B: $2,900.00 (**greater than** its Barrier Value and Initial Value) Reference Asset C: $250 (**less than** its Barrier Value, and Initial Value)	= $1,000 + ($1,000 x Percentage Change) = $1,000 + ($1,000 x –70.00%) + $8.54 (Interest Payment) $308.54 (Total Payment on Maturity Date) + $298.90 (Interest Payments Previously Paid) $607.44 (Total Return)

If the Closing Value of each Reference Asset on each of the first through eleventh Call Observation Dates is less than its Call Threshold Value on each Call Observation Date, we will pay the Interest Payment on the applicable Interest Payment Date and the Notes will not be subject to an automatic call. Because the Final Value of the Least Performing Reference Asset is less than its Barrier Value, on the Maturity Date we will pay you a cash payment equal to the Principal Amount plus the product of the Principal Amount and Least Performing Percentage Change in addition to the Interest Payment otherwise due, for a total of $308.54 per Note. When added to the Interest Payments of $298.90 paid in respect of the prior Interest Payment Dates, the Bank will have paid you a total of $607.44 per Note, a loss of 39.256% per Note.

Information Regarding the Reference Assets

Each Reference Asset is registered under the Exchange Act. Companies with securities registered under the Exchange Act are required to file periodically certain financial and other information specified by the SEC. Information provided to or filed with the SEC can be inspected and copied at the public reference facilities maintained by the SEC or through the SEC's website at www.sec.gov. In addition, information regarding each Reference Asset may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents.

The graphs below set forth the information relating to the historical performance of each Reference Asset. The graphs below show the daily historical Closing Values of each Reference Asset for the periods specified. We obtained the information regarding the historical performance of each Reference Asset in the graphs below from Bloomberg Professional® Service ("Bloomberg").

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of each Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of any Reference Asset. We cannot give you assurance that the performance of the Reference Assets will result in any positive return on your initial investment.

Apple Inc.

According to publicly available information, Apple Inc. ("Apple") designs, manufactures and markets mobile communication and media devices, personal computers, and portable digital music players, and sells a variety of related software, services, accessories, networking solutions, and third-party digital content and applications. Apple's products and services include iPhone®, iPad®, Mac® , iPod®, Apple TV®, consumer and professional software applications, iOS and watchOSTM operating systems, iCloud®, Apple Pay® and a variety of accessory, service and support offerings. Apple also sells its products through its retail stores, online stores, and direct sales force, as well as through third-party cellular network carriers, wholesalers, retailers, and value-added resellers. In addition, Apple sells third-party iPhone, iPad, Mac and iPod compatible products, including application software and other accessories through its online and retail stores. Apple's reportable operating segments consist of the Americas, Europe, Greater China, Japan and Rest of Asia Pacific. Information filed by Apple with the SEC can be located by reference to its SEC file number 001-36743, or its CIK Code: 0000320193. Apple's website is apple.com. Apple's common stock is listed on the NASDAQ Global Select Market under the ticker symbol "AAPL."

Historical Information

Below is a table setting forth the quarterly high, low, and period-end Closing Prices of the Reference Asset for each quarter in the period from January 1, 2008 through December 4, 2018. On December 4, 2018, the Closing Price of the Reference Asset was $176.69. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the market price of the Reference Asset on any Call Observation Date or on the Final Valuation Date.

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Price of the Reference Asset. We cannot give you assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

Quarter Ending	Quarter High	Quarter Low	Quarter Close	Quarter Ending	Quarter High	Quarter Low	Quarter Close
March 31, 2008	$28.60	$16.49	$20.50	September 30, 2013	$72.53	$58.46	$68.11
June 30, 2008	$27.14	$21.02	$23.92	December 31, 2013	$81.44	$68.71	$80.16

September 30, 2011	$59.06	$49.03	$54.45	March 31, 2017	$144.12	$116.02	$143.66
December 30, 2011	$60.32	$51.93	$57.86	June 30, 2017	$156.10	$140.68	$144.02
March 30, 2012	$88.23	$58.75	$85.64	September 29, 2017	$164.05	$142.73	$154.12
June 29, 2012	$90.89	$75.73	$83.43	December 29, 2017	$176.42	$153.48	$169.23
September 28, 2012	$100.30	$82.13	$95.32	March 29, 2018	$181.72	$155.15	$167.78
December 31, 2012	$95.96	$72.71	$76.15	June 29, 2018	$193.98	$162.32	$185.11
March 28, 2013	$78.43	$60.01	$63.23	September 28, 2018	$228.36	$183.92	$225.74
June 28, 2013	$66.26	$55.79	$56.58	December 4, 2018*	$232.07	$172.29	$176.69

*This pricing supplement includes information for the fourth quarter of 2018 for the period from October 1, 2018 through December 4, 2018. Accordingly, the "Quarterly High," "Quarterly Low" and "Quarterly Close" data indicated are for this shortened period only and do not reflect complete data for the fourth calendar quarter of 2018.

The graph below illustrates the performance of the Reference Asset from December 4, 2008 to December 4, 2018.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Amazon.com, Inc.

According to publicly available information, Amazon.com, Inc. ("Amazon") serves consumers, sellers, developers, enterprises, and content creators, and generates most of its revenue from offering products and services to consumers through its retail websites. Amazon also manufactures and sells electronic devices, including Kindle e-readers and Echo. Amazon offers programs that enable sellers to sell their products on its websites and their own branded websites and to fulfill orders through Amazon. Amazon offers its customers direct access to their websites and through their mobile websites and apps. Amazon serves authors and independent publishers with Kindle Direct Publishing, an online platform that lets independent authors and publishers make their books available in the Kindle Store. Amazon offers programs that allow authors, musicians, filmmakers, app developers, and others to publish and sell content. Amazon serves developers through the AWS segment, which offers global computing, storage, database, and other service offerings. Amazon's operations are organized into three principal segments: North America, consisting of amounts earned from retail sales of consumer products (including from sellers) and subscriptions through North America-focused websites; International, consisting of amounts earned from retail sales of consumer products (including from sellers) and subscriptions through internationally-focused websites; and AWS, consisting of amounts earned from global sales of compute, storage, database, and other service offerings for start-ups, enterprises, government agencies, and academic institutions. Information filed by Amazon with the SEC can be located by reference to its SEC file number: 000-22513, or its CIK Code: 0001018724. Amazon's website is amazon.com. Amazon's common stock is listed on the NASDAQ Global Select Market under the ticker symbol "AMZN."

Historical Information

Below is a table setting forth the quarterly high, low, and period-end Closing Prices of the Reference Asset for each quarter in the period from January 1, 2008 through December 4, 2018. On December 4, 2018, the Closing Price of the Reference Asset was $1,668.40. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the market price of the Reference Asset on any Call Observation Date or on the Final Valuation Date.

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Price of the Reference Asset. We cannot give you assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

Quarter Ending	Quarter High	Quarter Low	Quarter Close	Quarter Ending	Quarter High	Quarter Low	Quarter Close
March 31, 2008	$97.43	$61.20	$71.30	September 30, 2013	$318.12	$280.93	$312.64
June 30, 2008	$84.51	$71.99	$73.33	December 31, 2013	$404.39	$298.23	$398.79

*This pricing supplement includes information for the fourth quarter of 2018 for the period from October 1, 2018 through December 4, 2018. Accordingly, the “Quarterly High,” “Quarterly Low” and “Quarterly Close” data indicated are for this shortened period only and do not reflect complete data for the fourth calendar quarter of 2018.

The graph below illustrates the performance of the Reference Asset from December 4, 2008 to December 4, 2018.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Netflix, Inc.

According to publicly available information, Netflix, Inc. ("Netflix") is an Internet television network. Through subscriptions, Netflix's members can watch TV shows and movies directly on their TVs, computers and mobile devices. Netflix operates in three segments: Domestic streaming, International streaming and Domestic DVD. The Domestic and International streaming segments derive revenues from monthly membership fees for services consisting solely of streaming content. The Domestic DVD segment derives revenues from monthly membership fees for services consisting solely of DVD-by-mail in the U.S. Information filed by Netflix with the SEC can be located by reference to its SEC file number: 001-35727, or its CIK Code: 0001065280. Netflix's website is netflix.com. Netflix's common stock is listed on the NASDAQ Global Select Market under the ticker symbol "NFLX."

Historical Information

Below is a table setting forth the quarterly high, low, and period-end Closing Prices of the Reference Asset for each quarter in the period from January 1, 2008 through December 4, 2018. On December 4, 2018, the Closing Price of the Reference Asset was $275.33. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the market price of the Reference Asset on any Call Observation Date or on the Final Valuation Date.

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Price of the Reference Asset. We cannot give you assurance that the performance of the Reference Asset will result in any positive return on your initial investment.
