#### FORM N-CSR

#### CERTIFIED SHAREHOLDER REPORT OF REGISTERED MANAGEMENT INVESTMENT COMPANIES

Investment Company Act file number 811-5235

Nuveen California Municipal Value Fund, Inc. (Exact name of registrant as specified in charter)

Nuveen Investments 333 West Wacker Drive Chicago, IL 60606 (Address of principal executive offices) (Zip code)

> Kevin J. McCarthy Nuveen Investments 333 West Wacker Drive Chicago, IL 60606 (Name and address of agent for service)

Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: February 28

Date of reporting period: February 28, 2014

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

Nuveen Investments to be acquired by TIAA-CREF

On April 14, 2014, TIAA-CREF announced that it had entered into an agreement to acquire Nuveen Investments, the parent company of your fund's investment adviser, Nuveen Fund Advisors, LLC ("NFAL") and the Nuveen affiliates that act as sub-advisers to the majority of the Nuveen Funds. TIAA-CREF is a national financial services organization with approximately \$569 billion in assets under management (as of March 31, 2014) and is a leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen anticipates that it will operate as a separate subsidiary within TIAA-CREF's asset management business, and that its current leadership and key investment teams will stay in place.

Your Fund investment will not change as a result of Nuveen's change of ownership. You will still own the same Fund shares and the underlying value of those shares will not change as a result of the transaction. NFAL and your Fund's sub-adviser(s) will continue to manage your Fund according to the same objectives and policies as before, and we do not anticipate any significant changes to your Fund's operations. Under the securities laws, the consummation of the transaction will result in the automatic termination of the investment management agreements between the Funds and NFAL and the investment sub-advisory agreements between NFAL and each Fund's sub-adviser(s). New agreements will be presented to the Funds' shareholders for approval, and, if approved, will take effect upon consummation of the transaction or such later time as shareholder approval is obtained.

The transaction, expected to be completed by year end, is subject to customary closing conditions.

Chairman's Letter to Shareholders

## Dear Shareholders,

Despite headwinds from slow growth, fiscal and political uncertainty in many countries and some fragile economies around the world, domestic and international equity markets increased significantly in 2013. The emerging markets equity sector was an exception. Other sectors, such as real estate, were flat to down a bit and commodities were notably negative in total return performance. The fixed income market also experienced losses in many sectors.

U.S. equities in particular hit numerous all-time highs during the past year, exceeding prior rising market trends. Europe and Asia struggled with political and financial stresses but Europe's improving GDP in the second half provided hope that the region can exit recession. In Japan, the economic policies advocated by Prime Minister Shinzo Abe became a positive influence on the economy as deflationary pressures declined, while the economy in China started to stabilize due to monetary easing and supply side reforms. On the domestic front, the Federal Reserve stimulus continued throughout the year but discussion of reductions in the stimulus program caused historically low rates to rise and added to concern that interest rates could rise quickly in the near future. This provided challenges for fixed income investors.

The Federal Reserve's decision to slow down its bond buying program beginning in December 2013, and the federal budget compromise over government spending into early 2015 were positive signs that the domestic economy is moving forward. We are beginning to experience an economy that can provide encouraging conditions for GDP growth, job growth and low inflation. Additionally, downward trending unemployment and a continuing rebound in the housing market adds to a positive economic scenario going forward.

However, the current year has experienced a tumultuous start. It is in these particularly volatile markets that professional investment management is most important. Investment teams who have experienced challenging markets in the past understand how their asset class can behave in rapidly changing times. Remaining committed to their investment disciplines during these times is a critical component to achieving long-term success. In fact, many strong investment track records are established during challenging periods because experienced investment teams understand that volatile markets place a premium on companies and investment ideas that can weather the short-term volatility. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to communicate with your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

William J. Schneider Chairman of the Board April 22, 2014

(NCP) Nuveen California Municipal Market Opportunity Fund, Inc. (NCO) Nuveen California Investment Quality Municipal Fund, Inc. (NQC) Nuveen California Select Quality Municipal Fund, Inc. (NVC) Nuveen California Quality Income Municipal Fund, Inc. (NUC)

These Funds feature portfolio management by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments. Portfolio manager Scott R. Romans, PhD, reviews U.S. economic and municipal market conditions at both the national and state levels, key investment strategies and the twelve-month performance of these Nuveen California Municipal Funds. Scott has managed NCA, NCP, NCO, NQC, NVC and NUC since 2003 and NCB since its inception in 2009.

What factors affected the U.S. economy and the national municipal market during the twelve-month reporting period ended February 28, 2014?

During this reporting period, the U.S. economy's progress toward recovery from recession continued, although the economy remained below peak levels. The Federal Reserve (Fed) maintained its efforts to bolster growth and promote progress toward its mandates of maximum employment and price stability by holding the benchmark fed funds rate at the record low level of zero to 0.25% that it established in December 2008. Based on its view that the underlying strength in the broader economy was enough to support ongoing improvement in the labor market, the Fed began to reduce, or taper, its monthly asset purchases in \$10 billion increments over the course of three consecutive meetings (December 2013, January 2014 and following the end of this reporting period, March 2014). As of April 2014, the Fed's monthly purchases will comprise \$25 billion in mortgage-backed securities (versus the original \$40 billion per month) and \$30 billion in longer-term Treasury securities (versus \$45 billion). Following the March 2014 meeting, the Fed also stated that it would now look at a wide range of factors, including inflation levels and job creation, in determining future actions and that it would likely maintain the current target range for the fed funds rate for a considerable time after the asset purchase program ends, especially if projected inflation continues to run below the Fed's 2% longer run goal.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio manager as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors Service, Inc. (Moody's) or Fitch, Inc. (Fitch). Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Bond insurance guarantees only the payment of principal and interest on the bond when due, and not the value of the bonds themselves, which will fluctuate with the bond market and the financial success of the issuer and the insurer.

Insurance relates specifically to the bonds in the portfolio and not to the share prices of a Fund. No representation is made as to the insurers' ability to meet their commitments.

### Portfolio Manager's Comments (continued)

In the fourth quarter of 2013, the U.S. economy, as measured by the U.S. gross domestic product (GDP), grew at an annualized rate of 2.6%, bringing the annual GDP for 2013 to 1.9% and continuing the pattern of positive economic growth for the eleventh consecutive quarter. The Consumer Price Index (CPI) rose 1.1% year-over-year as of February 2014, while the core CPI (which excludes food and energy) increased 1.6% during the same period, staying within the Fed's unofficial objective of 2.0% or lower for this inflation measure. As of February 2014, the national unemployment rate was 6.7%, down from the 7.7% reported in February 2013. The housing market continued to post gains, as the average home price in the S&P/Case-Shiller Index of 20 major metropolitan areas rose 13.2% for the twelve months ended January 2014 (most recent data available at the time this report was prepared). This brought the average U.S. home price back to mid-2004 levels, although prices continued to be down approximately 20% from their mid-2006 peak.

As this reporting period began, continued political debate over federal spending clouded the outlook for the U.S. economy, as lawmakers failed to reach a resolution on spending cuts intended to address the federal budget deficit. This triggered a program of automatic spending cuts (or sequestration) that impacted federal programs beginning March 1, 2013. Although Congress later passed legislation that established federal funding levels for the remainder of Fiscal 2013, the federal budget for Fiscal 2014 remained under debate well into the new fiscal year. On October 1, 2013, the start date for Fiscal 2014, the federal government shut down for 16 days until an interim appropriations bill was signed into law, funding the government at sequestration levels through January 15, 2014, and suspending the debt limit until February 2014. Consensus on a \$1.1 trillion federal spending bill was finally reached in January 2014, and in February 2014, members of Congress agreed to suspend the \$16.7 trillion debt ceiling until March 2015.

In June 2013, then-Fed Chairman Ben Bernanke's remarks about potentially tapering the Fed's asset purchase program touched off widespread uncertainty about the next step for the Fed's quantitative easing program and its impact on the economy and financial markets. This led to increased market volatility, which was compounded by headline credit stories involving Detroit's bankruptcy filing in July 2013, the largest municipal bankruptcy in history and the disappointing news that continued to come out of Puerto Rico, where a struggling economy and years of deficit spending and borrowing resulted in multiple downgrades on the commonwealth's bonds. In this unsettled environment, the Treasury market traded off, the municipal market followed suit and spreads widened as investor concern grew, prompting increased selling by bondholders across the fixed income markets. During the second half of this reporting period, municipal bonds generally rallied, as higher yields sparked increased demand and improved flows into municipal bond funds, while supply continued to drop. However, for the reporting period as a whole, municipal bond prices generally declined, especially at the longer end of the maturity spectrum. At the same time, fundamentals on municipal bonds remained strong, as state governments made good progress in dealing with budget issues. Due to strong growth in personal tax collections, year-over-year totals for state tax revenues have increased for 15 consecutive quarters, while on the expense side, the states made headway in cutting and controlling costs, with more than 40 states implementing some type of pension reform. The current level of municipal issuance reflects the more conservative approach to state budgeting as well as a decrease in refunding activity as municipal market yields rose. Over the twelve months ended February 28, 2014, municipal bond issuance nationwide totaled \$315.9 billion, a decrease of 17% from the issuance for the twelve-month period ended February 28, 2013.

How were the economic and market environments in California during the twelve-month reporting period ended February 28, 2014?

California's economy continued to strengthen during this reporting period, with employment growth driven by hiring in technology, international trade and tourism and supplemented by improved residential construction and real estate conditions. Unemployment rates in the state continued to be above national levels, resulting in slow income and wage growth and negatively impacting broader growth through consumption and investment. Although California ranked

fourth in the nation in terms of unemployment in February 2014 (behind Rhode Island, Illinois and Nevada), the state's jobless number had improved to 8.0%, down from 9.4% in February 2013, its lowest level since September 2008. This compared with the national unemployment rate of 6.7% in February 2014. According to the S&P/Case-Shiller Index, home prices in San Francisco, San Diego and Los Angeles rose 23.1%, 19.4% and 18.9%, respectively,

over the twelve-month reporting period ended January 2014 (most recent data available at the time this report was prepared). These increases far outpaced the average rise of 13.2% nationally for the same period. On the fiscal front, the state's \$97.1 billion Fiscal 2014 general fund budget, which required no major expenditure cuts or revenue-raising measures, provided for building a \$1.1 billion reserve, continued to pay down inter-year deferrals and introduced a new funding formula for schools. Strong revenue growth resulting from a recovering economy and the passage of Proposition 30 in November 2012 (which temporarily increased state sales and personal income taxes) have aided in California's fiscal recovery. For Fiscal 2014-2015, the proposed \$106.7 billion general fund budget calls for adding to reserves, continuing to pay down education funding deferrals and budgetary obligations, building a strong rainy day fund and introducing a five-year plan for infrastructure improvements. In January 2014, S&P affirmed its A rating on California general obligation (GO) debt and revised the state outlooks to positive from stable, while Moody's and Fitch maintained their ratings of A1 and A, respectively, with stable outlooks as of February 2014. For the twelve months ended February 28, 2014, municipal issuance in California totaled \$45.6 billion, an increase of 3.7% over the previous twelve months. California was the largest state issuer in the nation, representing approximately 14.4% of total issuance nationwide for the reporting period.

What key strategies were used to manage these California Funds during the twelve-month reporting period ended February 28, 2014?

As previously discussed, during the first part of this reporting period, debate over federal spending, uncertainty about the Fed's quantitative easing program and headline credit stories involving Detroit and Puerto Rico led to an unsettled environment and increased selling by bondholders across the fixed income markets. Although the second half of the reporting period brought stabilization and a municipal market rally driven by stronger demand and tight supply, municipal bond prices nationwide generally declined for the reporting period as a whole, while interest rates rose. At the same time, California municipal paper performed relatively well, due in part to increased demand triggered by recent changes in the state tax code as well as improving economic conditions in the state. During this time, we continued to take a bottom-up approach to discovering sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term and help us keep our Funds fully invested.

During this reporting period, we primarily focused on strategies intended to enhance the Funds' positioning and the structure of their holdings and increase income distribution. The first of these strategies involved bond purchases. Many of the bonds we added to our portfolios in the previous reporting period were purchased at significant premiums. Because premiums must be amortized, this cuts into the amount of income available for distribution from the coupon. By purchasing a bond in a rising interest rate environment, that amortization expense is basically converted into a loss, so that more of the income from the coupon can be distributed to shareholders. Most of the bonds we swapped offered similar risk characteristics and often involved the same credit, but with different maturity dates. An additional benefit of this strategy was the generation of tax loss carry-forwards that can be used to offset future capital gains.

A second strategy involved an approach known as "couponing up." Couponing up is the process of working to improve the book yields on Fund holdings, which enables us to maintain and potentially improve the dividend stream that is passed on to shareholders. For example, we sold some of the Funds' redevelopment agency holdings with 5% coupons in the 20-year maturity range at attractive prices into strong retail demand. We then used the proceeds from these sales to purchase more recent redevelopment issuance from 2010-2011 with higher coupons (e.g., 5.75%). These bonds ultimately provide a more defensive structure and may enable us to increase income distributions. During this reporting period, we also took advantage of opportunities to swap tobacco bonds. Bonds from certain tobacco issuers tend to be more liquid because they were part of a larger issuance. Because of this liquidity, these bonds are preferred by non-traditional municipal investors such as hedge funds. By swapping the more liquid tobacco bonds for ones with less liquidity, we were able to pick up bonds with better credit quality and structure and higher yields, while also harvesting tax losses.

Portfolio Manager's Comments (continued)

More broadly during this reporting period, we focused on adding lower rated credits with higher coupons, taking advantage of opportunities to purchase these bonds at attractive prices when high yield funds were selling off during the market downturn. This also provided opportunities to extend the Funds' call protection, which sets a certain period of time during which the bond cannot be redeemed by the issuer. In addition, market action during this reporting period acted to extend the Funds' durations naturally. We addressed this situation by selling some of our longer duration holdings, (e.g., zero coupon bonds), in order to reduce the Funds' durations and maintain them in line with their targeted objectives. Activity was driven primarily by the execution of these strategies and the reinvestment of proceeds from called and matured bonds. This reinvestment activity was aimed at keeping the Funds fully invested and supporting their income streams.

As of February 28, 2014, all seven of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement. As part of our duration management strategies, NCB also used forward interest rate swaps to manage duration and reduce price volatility risk to movements in U.S. interest rates relative to the Fund's benchmarks. In April 2013, these derivatives were removed from NCB. These swaps detracted mildly from performance during this reporting period.

How did the Funds perform during the twelve-month reporting period ended February 28, 2014?

The tables in each Fund's Performance Overview and Holding Summaries section of this report provide the Funds' total returns for the one-year, five-year, ten-year and since inception periods ended February 28, 2014. Each Fund's returns on common share net asset value (NAV) are compared with the performance of corresponding market indexes and Lipper classification average.

For the twelve months ended February 28, 2014, the total return on common share net asset value (NAV) for NCA performed in line with the return for the S&P Municipal Bond California Index, while the remaining six Funds underperformed this S&P California index. NCA, NCB, NCP and NUC exceeded the return on the national S&P Municipal Bond Index, while NCO, NQC and NVC lagged the national return. For this same period, all of the Funds outperformed the average return for the Lipper California Municipal Debt Funds Classification Average.

Key management factors that influenced the Funds' returns during this reporting period included duration and yield curve positioning, credit exposure and sector allocation. In addition, the use of leverage was an important factor affecting the performance of these Funds. Among the primary reasons that the returns of NCA and NCB exceeded those of most of the other Funds for this twelve-month reporting period was that these two Funds do not use regulatory leverage. Leverage is discussed in more detail later in this report.

As interest rates rose and the yield curve steepened, municipal bonds with shorter maturities generally outperformed those with longer maturities. Overall, credits with short intermediate maturities (between two and six years) posted the best returns during this reporting period, while bonds at the longest end of the municipal yield curve produced the weakest results. In general, the Funds' durations and yield curve positioning were key detractors from their performance. Consistent with our long-term strategy, all of these Funds tended to be overweighted in the longer parts of the yield curve that underperformed and underweighted in the outperforming shorter end of the curve. This was especially true in NCO, which had the longest duration among these Funds, while NUC had the shortest excess duration among the leveraged Funds.

Credit exposure was another factor in the Funds' performance during the twelve month reporting period. In general, non-rated credits and BBB-rated bonds were the top performers in the California municipal market, as the environment shifted from tradeoff to rally and investors became more willing to accept risk. Bonds rated A performed

in line with the California market average, while AAA- and AA-rated bonds slightly underperformed the market. Both the BB- and B-rated categories underperformed, dramatically so in the case of B-rated bonds due to the performance of tobacco bonds. Overall, these Funds tended to be overweighted in BBB-rated bonds and underweighted in higher quality credits relative to the market. This positive impact on credit exposure helped to offset some of the negative impact from their duration positioning.

Among the municipal market sectors, housing bonds generally were the top performers, helped by improving property value assessments and a decline in mortgage and tax delinquencies. Tied to this was the performance of land-secured deals such as tax increment financing (TIF) district credits, which benefited from the improving housing market and overall economy. Pre-refunded bonds, which are often backed by U.S. Treasury securities, also were among the best performing market segments. The outperformance of these bonds relative to the market can be attributed primarily to their shorter effective maturities. All of these Funds had holdings of pre-refunded bonds, with NVC having the heaviest allocation of these bonds and NCB the smallest. Other holdings that generally made positive contributions to the Funds' returns included toll roads and GO credits, which typically outperformed the general municipal market, while industrial development revenue (IDR), education and water and sewer bonds generally performed in line with the market.

In contrast, revenue bonds as a whole underperformed the municipal market. Among the revenue sectors that generally lagged municipal market performance by the widest margins were utilities and transportation. The health care sector (including hospitals) also produced negative results in the California market. In particular, NVC underperformed due to its significant overweight in health care bonds relative to the market. Tobacco credits backed by the 1998 master tobacco settlement agreement also were among the poorest performing market sectors, due in part to their longer effective durations. All of these Funds had allocations of tobacco bonds issued by various California agencies, with NUC having the heaviest weighting in these credits.

Shareholders also should be aware of ongoing developments in Puerto Rico that had an impact on the Funds' holdings and performance, most recently the downgrade of Puerto Rico GOs and related debt to below investment grade. Puerto Rico's continued economic weakening, escalating debt service obligations and long-standing inability to deliver a balanced budget led to multiple downgrades on its debt over the past twelve months. Following the most recent round of rating reductions in early February 2014, the three major rating agencies, Moody's, S&P and Fitch, rated Puerto Rico GO debt at Ba2/BB+/BB, respectively, with negative outlooks. Ratings on sales tax bonds issued by Puerto Rico Sales Tax Financing Corporation (COFINA) also were lowered during the past twelve months, with senior sales tax revenue bonds rated Baa1/AA-/AA- and subordinate sales tax revenue bonds rated Baa2/A+/A+ by Moody's, S&P and Fitch, respectively, as of February 2014. The COFINA bonds were able to maintain a higher credit rating than the GOs because, unlike the revenue streams supporting some Puerto Rico's GO bonds.

For the reporting period ended February 28, 2014, Puerto Rico paper underperformed the municipal market as a whole. During this reporting period, NCA, NCP, NQC, NVC and NUC had limited exposure to Puerto Rico bonds, while NCB and NCO held no Puerto Rico paper. The effect on performance from these holdings differed from Fund to Fund in line with the type and amount of its position, but on the whole, the impact was negligible. Puerto Rico bonds were originally added to our portfolios at times when in-state paper was scarce in order to keep the assets fully invested and working for the Funds. The Puerto Rico credits offered higher yields, added diversification and triple exemption (i.e., exemption from federal, state and local taxes). During this reporting period, these Funds took advantage of opportunities to trim positions in Puerto Rico paper. NCA, NQC and NVC, which began this reporting period with allocations of 2.12%, 1.09% and 1.50%, respectively, to Puerto Rico debt, all held Puerto Rico GOs that are insured. NCA also had a position in bonds issued for the Puerto Rico co-generation facility, which were sold following the end of this reporting period, reducing the Fund's Puerto Rico exposure to 0.78%. In the early part of this reporting period, NCP and NUC had added small positions in COFINA senior sales tax revenue bonds, giving them exposures of 0.39% and 0.04%, respectively, to Puerto Rico debt. A look at Puerto Rico's tax-supported debt (GO, COFINA and guaranteed debt) as a whole makes it clear that the commonwealth's debt was structured based on an assumption of a steadily growing economy. Unfortunately for Puerto Rico, its economy continues to struggle with high unemployment and population loss, among other problems. As a result, we believe that Puerto Rico bonds that lack a lien on specific revenues (e.g., COFINA sales tax bonds) or that are not backed by healthy bond insurers currently carry significant economic, fiscal and political risks.

Given the Puerto Rico situation and Detroit's bankruptcy filing in July 2013, we should note that we continue to closely watch credit conditions in the California market. In August 2013, Fitch upgraded the rating on California state GO debt to A from A-, while Moody's and S&P maintained their ratings of A1 and A, respectively. In January 2014, S&P revised its outlook for California to positive from stable. We also continue to monitor the status of local municipalities such as San Bernardino and Stockton, which filed for bankruptcy in 2012 as they became increasingly squeezed by budget problems resulting from rising pension costs. At the end of August 2013, San Bernardino was awarded bankruptcy protection by the court, joining Stockton, which received Chapter 9 protection in April 2013. Pension liabilities, primarily due to the California Public Employees' Retirement System (CalPERS), were at the heart of Stockton's bankruptcy filing. Stockton has since released a draft of a restructuring plan for reducing debt obligations, and most major insurers, acting as the proxy for Stockton bondholders, have approved the plan. San Bernardino, which has unfunded pension liabilities of approximately \$143 million as well as \$50 million in bonds it issued in 2005 to help cover pension obligations, is further behind in the bankruptcy process, as a recent recall election of local officials delayed progress. The Funds in this report have no exposure to Stockton.

#### APPROVED FUND REORGANIZATIONS

On October 13, 2013, the Nuveen Funds Board of Directors/Trustees approved a series of reorganizations for certain of the California Funds included in this report. The reorganizations are subject to customary conditions, including shareholder approval at annual shareholder meetings during 2014. Each reorganization is intended to create one, larger-state fund, which would potentially offer shareholders the following benefits:

- Lower fund expense ratios (excluding the effects of leverage), as fixed costs are spread over a larger asset base;
- Enhanced secondary market trading, as larger funds potentially make it easier for investors to buy and sell fund shares;
- Lower per share trading costs through reduced bid/ask spreads due to a larger common share float; and
- Increased fund flexibility in managing the structure and cost of leverage over time.

The approved reorganizations are as follows:

| Acquired Funds                                   | Acquiring Funds                                |
|--|--|
| Nuveen California Performance Plus Municipal     | Nuveen California Dividend Advantage Municipal |

Upon the closing of a reorganization, an Acquired Fund transfers its assets to the Acquiring Fund in exchange for common and preferred shares of the Acquiring Fund, and the assumption by the Acquiring Fund of the liabilities of the Acquired Fund. Each Acquired Fund is then liquidated, dissolved and terminated in accordance with its Declaration of Trust. Shareholders of each Acquired Fund become shareholders of the Acquiring Fund. Holders of common shares receive newly issued common shares of their Acquiring Fund, the aggregate net asset value of which equal the aggregate net asset value of the common shares of the Acquired Fund held immediately prior to the reorganization (including for this purpose fractional Acquiring Fund shares to which shareholders are entitled). Fractional shares are sold on the open market and shareholders received cash in lieu of such fractional shares. Holders of preferred shares of each Acquired Fund receive on a one-for-one basis newly issued preferred shares of their Acquiring Fund, in exchange for preferred shares of the Acquired Fund held immediately prior to the reorganization.

## Fund Leverage

### IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of the Funds relative to their comparative benchmarks was the Funds' use of leverage through their issuance of preferred shares and/or investments in inverse floating rate securities, which represent leveraged investments in underlying bonds. As mentioned previously, NCA and NCB do not use regulatory leverage. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income, particularly in the recent market environment where short-term market rates are at or near historical lows, meaning that the short-term rates the Fund has been paying on its leveraging instruments have been much lower than the interest the Fund has been earning on its portfolio of long-term bonds that it has bought with the proceeds of that leverage. However, use of leverage also can expose the Fund to additional price volatility. When a Fund uses leverage increase in value, but it will also experience a correspondingly larger decline in its net asset value if the bonds acquired through leverage decline in value, which will make the Fund's net asset value more volatile, and its total return performance more variable over time. In addition, income in levered funds will typically decrease in comparison to unlevered funds when short-term interest rates increase and increase when short-term interest rates decrease. Leverage had a negative impact on the performance of the Funds over this reporting period.

As of February 28, 2014, the Funds' percentages of effective and regulatory leverage are as shown in the accompanying table.

|                      | NCA   | NCB   | NCP    | NCO    | NQC    | NVC    | NUC    |
|----------------------|-------|-------|--------|--------|--------|--------|--------|
| Effective Leverage*  | 1.74% | 9.78% | 37.70% | 35.33% | 38.65% | 37.08% | 38.19% |
| Regulatory Leverage* | 0.00% | 0.00% | 31.75% | 28.42% | 33.94% | 30.61% | 31.24% |

\* Effective leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values, in addition to any regulatory leverage. Regulatory leverage consists of preferred shares issued or borrowings of a Fund. Both of these are part of a Fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

#### THE FUNDS' REGULATORY LEVERAGE

As of February 28, 2014, the following Funds have issued and outstanding Variable Rate Demand Preferred (VRDP) Shares as shown in the accompanying table. As mentioned previously, NCA and NCB do not use regulatory leverage.

|     | VR     | VRDP Shares |             |  |  |  |
|-----|--------|-------------|-------------|--|--|--|
|     |        |             | Shares      |  |  |  |
|     |        |             | Issued at   |  |  |  |
|     |        |             | Liquidation |  |  |  |
|     | Series |             | Value       |  |  |  |
| NCP | 1      | \$          | 91,000,000  |  |  |  |
| NCO | 1      | \$          | 49,800,000  |  |  |  |
| NQC | 2      | \$          | 105,600,000 |  |  |  |
| NVC | 1      | \$          | 158,900,000 |  |  |  |
| NUC | 1      | \$          | 158,100,000 |  |  |  |

Refer to Notes to Financial Statements, Note 1 – General Information and Significant Accounting Policies for further details on VRDP Shares.

Common Share Information

### COMMON SHARE DIVIDEND INFORMATION

The following information regarding the Funds' distributions is current as of February 28, 2014. Each Fund's distribution levels may vary over time based on each Fund's investment activity and portfolio investment value changes.

During the current reporting period, each Fund's monthly dividends to common shareholders were as shown in the accompanying table.

|                    | Per Common Share Amounts |    |        |        |        |    |        |    |        |        |        |    |        |
|--------------------|--------------------------|----|--------|--------|--------|----|--------|----|--------|--------|--------|----|--------|
| Ex-Dividend Date   | NCA                      |    | NCB    |        | NCP    |    | NCO    |    | NQC    |        | NVC    |    | NUC    |

| Market Yield***    | 4.89%                    | 6  | 5.02%  | ,<br>2 | 6.79%  | )  | 6.69%  | )  | 6.54%  | ,<br>2 | 6.69%  | )  | 6.79%  |
| Taxable-Equivalent |                          |    |        |        |        |    |        |    |        |        |        |    |        |
| Yield***           | 7.49%                    | 6  | 7.69%  | ,<br>2 | 10.40% | )  | 10.25% | 2  | 10.02% | ,<br>2 | 10.25% | 2  | 10.40% |

\*\* Distribution paid in December 2013.

\*\*\* Market Yield is based on the Fund's current annualized monthly dividend divided by the Fund's current market price as of the end of the reporting period. Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 34.7%. When comparing a Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of February 28, 2014, all of the Funds in this report had positive UNII balances for both tax and financial reporting purposes.

Common Share Information (continued)

#### COMMON SHARE REPURCHASES

During November 2013, the Nuveen Funds' Board of Directors/Trustees reauthorized the Funds' open-market share repurchase program, allowing each Fund to repurchase an aggregate of up to approximately 10% of its outstanding common shares.

As of February 28, 2014, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired their common shares as shown in the accompanying table.

|                                 | NCA       | NCB     | NCP       | NCO     | NQC       | NVC       | NUC       |
|---------------------------------|-----------|---------|-----------|---------|-----------|-----------|-----------|
| Common Shares                   |           |         |           |         |           |           |           |
| Cumulatively                    |           |         |           |         |           |           |           |
| Repurchased and                 |           |         |           |         |           |           |           |
| Retired                         |           |         | - 28,300  | 24,900  |           | - 41,400  | 40,000    |
| Common Shares<br>Authorized for |           |         |           |         |           |           |           |
| Repurchase                      | 2,530,000 | 330,000 | 1,300,000 | 815,000 | 1,365,000 | 2,330,000 | 2,220,000 |

During the current reporting period, the Funds did not repurchase any of their outstanding common shares.

#### COMMON SHARE EQUITY SHELF PROGRAMS

The following Funds are authorized to issue additional common shares through their ongoing equity shelf programs. Under these programs, each Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per common share. Under the equity shelf programs, the Funds are authorized to issue the following number of additional common shares.

|                                     | NCA       | NCP       | NQC       | NVC       | NUC       |
|-------------------------------------|-----------|-----------|-----------|-----------|-----------|
| Additional Common Shares Authorized | 2,500,000 | 1,200,000 | 1,300,000 | 2,300,000 | 2,200,000 |

During the current reporting period, the following Fund sold common shares through its equity shelf program at a weighted average premium to its NAV per common share as shown in the accompanying table.

|   | NUC    |
|---|--------|
| Common Shares Sold through Equity Shelf Program       | 38,800 |
| Weighted Average Premium to NAV per Common Share Sold | 1.11%  |

#### OTHER COMMON SHARE INFORMATION

As of February 28, 2014, and during the current reporting period, the Funds' common share prices were trading at a premium/(discount) to their common share NAVs as shown in the accompanying table.

|                           | NCA         |    | NCB    |    | NCP    |    | NCO    |    | NQC    |    | NVC    |    | NUC     |

## **Risk Considerations**

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment, Price and Market Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful. Certain aspects of the recently adopted Volcker Rule may limit the availability of tender option bonds, which are used by the Funds for leveraging and duration management purposes. The effects of this new Rule, expected to take effect in mid-2015, may make it more difficult for a Fund to maintain current or desired levels of leverage and may cause the Fund to incur additional expenses to maintain its leverage.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Inverse Floater Risk. The Funds invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

## Nuveen California Municipal Value Fund, Inc. Performance Overview and Holding Summaries as of February 28, 2014

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this page.

Average Annual Total Returns as of February 28, 2014

|   |         | Average Annual |         |
|---|---------|----------------|---------|
|   | 1-Year  | 5-Year         | 10-Year |
| NCA at Common Share NAV                               | 0.62%   | 7.48%          | 4.79%   |
| NCA at Common Share Price                             | (3.80)% | 7.85%          | 4.95%   |
| S&P Municipal Bond California Index                   | 0.77%   | 6.73%          | 4.77%   |
| S&P Municipal Bond Index                              | (0.27)% | 6.11%          | 4.45%   |
| Lipper California Municipal Debt Funds Classification | (1.09)% | 10.39%         | 5.14%   |
| Average   |         |                |         |

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Comparative index and Lipper return information is provided for the Fund's shares at NAV only. Indexes and Lipper averages are not available for direct investment.

This data relates to the securities held in the Fund's portfolio of investments as of the end of the reporting period. It should not be construed as a measure of performance for the Fund itself. Holdings are subject to change.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Comparative index and Lipper return information is provided for the Fund's shares at NAV only. Indexes and Lipper averages are not available for direct investment.

This data relates to the securities held in the Fund's portfolio of investments as of the end of the reporting period. It should not be construed as a measure of performance for the Fund itself. Holdings are subject to change.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Report of Independent Registered Public Accounting Firm

The Board of Directors/Trustees and Shareholders of Nuveen California Municipal Value Fund, Inc. Nuveen California Municipal Value Fund 2 Nuveen California Performance Plus Municipal Fund, Inc. Nuveen California Municipal Market Opportunity Fund, Inc. Nuveen California Investment Quality Municipal Fund, Inc. Nuveen California Select Quality Municipal Fund, Inc. Nuveen California Quality Income Municipal Fund, Inc.

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen California Municipal Value Fund, Inc., Nuveen California Municipal Value Fund 2, Nuveen California Performance Plus Municipal Fund, Inc., Nuveen California Municipal Market Opportunity Fund, Inc., Nuveen California Investment Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Quality Income Municipal Fund, Inc. (the "Funds") as of February 28, 2014, and the related statements of operations and cash flows (Nuveen California Investment Quality Municipal Fund, Inc., California Investment Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., Nuveen California Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Quality Income Municipal Fund, Inc., only) for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen California Municipal Value Fund, Inc., Nuveen California Municipal Value Fund 2, Nuveen California Performance Plus Municipal Fund, Inc., Nuveen California Municipal Market Opportunity Fund, Inc., Nuveen California Investment Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Quality Income Municipal Fund, Inc., Nuveen California Fund, Inc., Nuveen California Municipal Market Opportunity Fund, Inc., and their cash flows (Nuveen California Performance Plus Municipal Fund, Inc., Nuveen California Municipal Market Opportunity Fund, Inc., California Investment Quality Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Investment Quality Income Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Investment Quality Income Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Investment Quality Income Municipal Fund, Inc., Nuveen California Select Quality Municipal Fund, Inc., and Nuveen California Quality Income Municipal Fund, Inc., only) for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Chicago, Illinois April 25, 2014

(a) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(b) For the period April 28, 2009 (commencement of operations) through February 28, 2010.

(c) The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, as described in Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities, as follows:

| California Value (NCA) |      |

(d)

 $\alpha$ 

Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 – Investment Transactions) divided by the average long-term market value during the period.

\* Annualized.

See accompanying notes to financial statements.

(a) The amounts shown are based on common share equivalents.

(b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in

the calculation. Total returns are not annualized.

(c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders, where applicable; Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Auction Rate Preferred Shares ("ARPS") and/or VRDP Shares, where applicable.

(d) The expense ratios reflect, among other things, all interest expense and other costs related to VRDP Shares and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, each as described in Note 1 – General Information and Significant Accounting Policies, Variable Rate Demand Preferred Shares and Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities, respectively, as follows:

(a) The amounts shown are based on common share equivalents.

(b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in

the calculation. Total returns are not annualized.

- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders, where applicable; Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to ARPS and/or VRDP Shares, where applicable.
- (d) The expense ratios reflect, among other things, all interest expense and other costs related to VRDP Shares and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, each as described in Note 1 General Information and Significant Accounting Policies, Variable Rate Demand Preferred Shares and Note 3 Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities, respectively, as follows:

(a) The amounts shown are based on common share equivalents.

(b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders, where applicable; Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to ARPS and/or VRDP Shares, where applicable.
- (d) The expense ratios reflect, among other things, all interest expense and other costs related to VRDP Shares and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, each as described in Note 1 General Information and Significant Accounting Policies, Variable Rate Demand Preferred Shares and Note 3 Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities, respectively, as follows:

#### California Quality Income (NUC)

| Year Ended 2/28–2/29: |      |
|-----------------------|------|
| 2014                  | .53% |
| 2013                  | .53  |
| 2012                  | .66  |
| 2011                  | .44  |
| 2010                  | .06  |

- (e) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 Investment Transactions) divided by the average long-term market value during the period.
- \* Rounds to less than \$.01 per share.

**Financial Statements** 

1. General Information and Significant Accounting Policies

**General Information** 

Fund Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") or NYSE MKT symbols are as follows (each a "Fund" and collectively, the "Funds"):

- Nuveen California Municipal Value Fund, Inc. (NCA) ("California Value (NCA)")
- Nuveen California Municipal Value Fund 2 (NCB) ("California Value 2 (NCB)")
- Nuveen California Performance Plus Municipal Fund, Inc. (NCP) ("California Performance Plus (NCP)")
- Nuveen California Municipal Market Opportunity Fund, Inc. (NCO) ("California Opportunity (NCO)")
- Nuveen California Investment Quality Municipal Fund, Inc. (NQC) ("California Investment Quality (NQC)")
- Nuveen California Select Quality Municipal Fund, Inc. (NVC) ("California Select Quality (NVC)")
- Nuveen California Quality Income Municipal Fund, Inc. (NUC) ("California Quality Income (NUC)")

The Funds are registered under the Investment Company Act of 1940, as amended, as diversified closed-end registered investment companies. Common shares of California Value (NCA), California Performance Plus (NCP), California Opportunity (NCO), California Investment Quality (NQC), California Select Quality (NVC) and California Quality Income (NUC) are traded on the NYSE while common shares of California Value 2 (NCB) are traded on the NYSE MKT. California Value (NCA), California Performance Plus (NCP), California Opportunity (NCO), California Select Quality (NCC), California Value 2 (NCB) are traded on the NYSE MKT. California Value (NCA), California Performance Plus (NCP), California Opportunity (NCO), California Investment Quality (NQC), California Select Quality (NVC) and California Quality Income (NUC) were incorporated under the state laws of Minnesota on July 15, 1987, October 6, 1989, January 23, 1990, September 21, 1990, April 3, 1991 and July 25, 1991, respectively. California Value 2 (NCB) was organized as a Massachusetts business trust on January 26, 2009.

#### Investment Adviser

The Funds' investment adviser is Nuveen Fund Advisors, LLC (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"). The Adviser is responsible for each Fund's overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with Nuveen Asset Management, LLC (the "Sub-Adviser"), a subsidiary of the Adviser, under which the Sub-Adviser manages the investment portfolios of the Funds.

#### Investment Objective

Each Fund seeks to provide current income exempt from both regular federal and California state income taxes by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within the state of California or certain U.S. territories.

#### Approved Fund Reorganizations

On October 13, 2013, the Nuveen Funds Board of Directors/Trustees approved a series of reorganizations for certain of the California Funds included in this report. The reorganizations are subject to customary conditions, including shareholder approval during annual shareholder meetings during 2014. Each reorganization is intended to create one, larger-state fund, which would potentially offer shareholders the following benefits:

• Lower fund expense ratios (excluding the effects of leverage), as fixed costs are spread over a larger asset base;

• Enhanced secondary market trading, as larger funds potentially make it easier for investors to buy and sell fund shares;

- Lower per share trading costs through reduced bid/ask spreads due to a larger common share float; and
- Increased fund flexibility in managing the structure and cost of leverage over time.

The approved reorganizations are as follows:

Acquired Funds California Performance Plus (NCP)

California Opportunity (NCO) California Investment Quality (NQC) California Select Quality (NVC) California Quality Income (NUC)

Nuveen Investments

Acquiring Funds Nuveen California Dividend Advantage Municipal Fund (NAC)

### Notes to Financial Statements (continued)

Upon the closing of a reorganization, an Acquired Fund transfers its assets to the Acquiring Fund in exchange for common and preferred shares of the Acquiring Fund and the assumption by the Acquiring Fund of the liabilities of the Acquired Fund. Each Acquired Fund is then liquidated, dissolved and terminated in accordance with its Declaration of Trust. Shareholders of each Acquired Fund become shareholders of the Acquiring Fund. Holders of common shares receive newly issued common shares of their Acquiring Fund, the aggregate net asset value of which equal the aggregate net asset value of the common shares of the Acquired Fund held immediately prior to the reorganization (including for this purpose fractional Acquiring Fund shares to which shareholders are entitled). Fractional shares are sold on the open market and shareholders received cash in lieu of such fractional shares. Holders of preferred shares of each Acquired Fund held immediately prior to the reorganization for the reorganize for preferred shares of the Acquired Fund held immediately prior to the reorganization.

In connection with the reorganizations, the Acquiring Funds have accrued for certain associated costs and expenses. Such amounts are recognized as "Accrued reorganization expenses" on the Statement of Assets and Liabilities and "Reorganization expenses" on the Statement of Operations.

### Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

### **Investment Transactions**

Investment transactions are recorded on a trade date basis. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. As of February 28, 2014, there where no such outstanding purchase commitments in any of the Funds.

#### Investment Income

Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

#### **Professional Fees**

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of Fund shareholders. Should a Fund receive a refund of workout expenditures paid in a prior reporting period, such amounts will be recognized as "Legal fee refund" on the Statement of Operations.

#### Dividends and Distributions to Common Shareholders

Dividends from net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to common shareholders of net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

## Auction Rate Preferred Shares

Each Fund, except California Value (NCA) and California Value 2 (NCB), is authorized to issue Auction Rate Preferred Shares ("ARPS"). During prior fiscal periods the Funds redeemed all of their outstanding ARPS, at liquidation value.

### Variable Rate Demand Preferred Shares

The following Funds have issued and outstanding Variable Rate Demand Preferred ("VRDP") Shares, with a \$100,000 liquidation value per share. The Funds issued their VRDP Shares in privately negotiated offering, which were offered to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933.

|                             |        | Shares      | Shares<br>Outstanding<br>at \$100,000 Per<br>Share<br>Liquidation |           |

| California Select Quality   |        |             |   | August 1, |
| (NVC)                       | 1      | 1,589       | \$<br>158,900,000   | 2040      |
| California Quality Income   |        |             |   | August 1, |
| (NUC)                       | 1      | 1,581       | \$<br>158,100,000   | 2040      |
|                             |        |             |   |           |

As of February 28, 2014, the details for each Fund's series VRDP Shares outstanding are as follows:

VRDP Shares include a liquidity feature that allows VRDP shareholders to have their shares purchased by a liquidity provider with whom each Fund has contracted in the event that purchase orders for VRDP Shares in a remarketing are not sufficient in number to be matched with the sale orders in that remarketing. Each Fund is required to redeem any VRDP Shares that are still owned by the liquidity provider after six months of continuous, unsuccessful remarketing. Each Fund pays an annual remarketing fee of .10% on the aggregate principal amount of all VRDP Shares outstanding. Each Fund's VRDP Shares have successfully remarketed since issuance.

Dividends on the VRDP Shares (which are treated as interest payments for financial reporting purposes) are set weekly at a rate established by a remarketing agent; therefore, the market value of the VRDP Shares is expected to approximate its liquidation value. If remarketings for VRDP Shares are continuously unsuccessful for six months, the maximum rate is designed to escalate according to a specified schedule in order to enhance the remarketing agent's ability to successfully remarket the VRDP Shares.

Subject to certain conditions, VRDP Shares may be redeemed, in whole or in part, at any time at the option of each Fund. Each Fund may also redeem certain of the VRDP Shares if the Fund fails to maintain certain asset coverage requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends.

The average liquidation value of VRDP Shares outstanding and annualized dividend rate for each Fund during the fiscal year ended February 28, 2014, were as follows:

|   | California<br>Performance<br>Plus<br>(NCP) | California<br>Opportunity<br>(NCO) | California<br>Investment<br>Quality<br>(NQC) | California<br>Select<br>Quality<br>(NVC) | California<br>Quality<br>Income<br>(NUC) |

| Average liquidation<br>value of VRDP Shares | ¢ 01 000 000                               | ¢ 40.800.000                       | ¢ 105 (00 000                                | ¢ 159 000 000                            | ¢ 152 100 000                            |
| outstanding<br>Annualized dividend          | \$ 91,000,000                              | \$ 49,800,000                      | \$105,600,000                                | \$158,900,000                            | \$158,100,000                            |
|   | 0 160                                      | 6 0.19%                            | 0.160  | 0.16%                                    | 0.160                                    |
| rate  | 0.16%                                      | 0 0.19%                            | 6 0.16%                                      | 0.10%                                    | 0.16%                                    |

For financial reporting purposes, the liquidation value of VRDP Shares is a liability and recognized as "Variable Rate Demand Preferred ("VRDP") Shares, at liquidation value" on the Statement of Assets and Liabilities. Unpaid dividends on VRDP Shares are recognized as a component of "Interest payable" on the Statement of Assets and Liabilities, when applicable. Dividends paid on the VRDP Shares are recognized as a component of "Interest payable" on the Statement of "Interest expense and amortization of offering costs" on the Statement of Operations. Costs incurred by the Funds in connection with their offerings of VRDP Shares were recorded as a deferred charge, which are amortized over the life of the shares and are recognized as a component of "Deferred offering costs" on the Statement of Assets and Liabilities and "Interest expense and amortization of offerings costs" on the Statement of Operations. In addition to interest expense, each Fund also pays a per annum liquidity fee to the liquidity provider as well as a remarketing fee, which are recognized as "Liquidity fees" and "Remarketing fees", respectively, on the Statement of Operations.

### Common Shares Equity Shelf Programs and Offering Costs

During the prior reporting period, the following Funds each filed initial registration statements with the Securities and Exchange Commission ("SEC") authorizing the Funds to issue additional common shares through equity shelf programs ("Shelf Offerings"), which became effective with the SEC during the current fiscal period.

Under these Shelf Offerings, the Funds, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above each Fund's NAV per common share.

## Notes to Financial Statements (continued)

Authorized common shares, common shares issued and offering proceeds, net of offering costs under each Fund's Shelf Offering during the fiscal year ended February 28, 2014, were as follows:

|                        |            | California  | California | California | California |
|------------------------|------------|-------------|------------|------------|------------|
|                        | California | Performance | Investment | Select     | Quality    |
|                        | Value      | Plus        | Quality    | Quality    | Income     |
|                        | (NCA)      | (NCP)       | (NQC)      | (NVC)      | (NUC)      |
| Authorized common      |            |             |            |            |            |
| shares authorized      | 2,500,000  | 1,200,000   | 1,300,000  | 2,300,000  | 2,200,000  |
| Common shares issued   |            | ·           | ·          | ·          | 38,800     |
| Offering proceeds, net |            |             |            |            |            |
| of offering costs      |            | ·           | ·          | ·          | \$ 585,741 |

Costs incurred by the Funds in connection with their Shelf Offerings are recorded as a deferred charge and recognized as a component of "Deferred offering costs" on the Statement of Assets and Liabilities. These deferred charges are recognized over the period such additional shares are sold by reducing the proceeds from the Shelf Offering. These deferred charges are not to exceed the one-year life of the Shelf Offering period and are recognized as a component of "Proceeds from shelf offering, net of offering costs" on the Statement of Changes in Net Assets. At the end of the one-year life of the Shelf Offering beriod, any remaining deferred charges will be expensed accordingly and recognized as a component of "Other expenses" on the Statement of Operations. Any additional costs the Funds may incur in connection with their Shelf Offerings are expensed as incurred and recognized as a component of "Proceeds from shelf offering, net of offerings are expensed as incurred and recognized as a component of "Proceeds from shelf offering costs" on the Statement of Operations. Any additional costs the Funds may incur in connection with their Shelf Offerings are expensed as incurred and recognized as a component of "Proceeds from shelf offering, net of offering costs" on the Statement of Changes in Net Assets.

During the fiscal year ended February 28, 2014, Nuveen Securities, LLC, the Funds' distributor and a wholly-owned subsidiary of Nuveen, received commission of \$1,188, related to the sale of common shares from California Quality Income's (NUC) Shelf Offering.

## Indemnifications

Under the Funds' organizational documents, their officers and directors/trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

#### Netting Agreements

In the ordinary course of business, the Funds may enter into transactions subject to enforceable International Swaps and Derivative Association, Inc. ("ISDA") master agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows each Fund to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. Generally, a Fund manages its cash collateral and securities collateral on a counterparty basis. As of February 28, 2014, the Funds were not invested in any portfolio securities or derivative instruments that are subject to netting agreements.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the

reported amounts of increases and decreases in net assets applicable to common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Investment Valuation and Fair Value Measurements

## Investment Valuation

Prices of municipal bonds and swap contracts are provided by a pricing service approved by the Funds' Board of Directors/Trustees. These securities are generally classified as Level 2 for fair value measurement purposes. The pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain security, its issuer or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Directors/Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's NAV (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality,

type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Directors/Trustees or its designee.

### Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

- Level 1 Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.
- Level 2 Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

| California Value (NCA)            | Level | 1 Level 2      | Level | 3 Total        |
|-----------------------------------|-------|----------------|-------|----------------|
| Long-Term Investments*:           |       |                |       |                |

\* Refer to the Fund's Portfolio of Investments for industry classifications.

The Nuveen funds' Board of Directors/Trustees is responsible for the valuation process and has delegated the oversight of the daily valuation process to the Adviser's Valuation Committee. The Valuation Committee, pursuant to the valuation policies and procedures adopted by the Board of Directors/Trustees, is responsible for making fair value determinations, evaluating the effectiveness of the funds' pricing policies and reporting to the Board of Directors/Trustees. The Valuation Committee is aided in its efforts by the Adviser's dedicated Securities Valuation Team, which is responsible for administering the daily valuation process and applying fair value methodologies as approved by the Valuation Committee. When determining the reliability of independent pricing services for investments owned by the funds, the Valuation Committee, among other things,

Nuveen Investments

97

Notes to Financial Statements (continued)

conducts due diligence reviews of the pricing services and monitors the quality of security prices received through various testing reports conducted by the Securities Valuation Team.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making a fair value determination, based on the facts and circumstances specific to the portfolio instrument. Fair value determinations generally will be derived as follows, using public or private market information:

- (i) If available, fair value determinations shall be derived by extrapolating from recent transactions or quoted prices for identical or comparable securities.
- (ii) If such information is not available, an analytical valuation methodology may be used based on other available information including, but not limited to: analyst appraisals, research reports, corporate action information, issuer financial statements and shelf registration statements. Such analytical valuation methodologies may include, but are not limited to: multiple of earnings, discount from market value of a similar freely-traded security, discounted cash flow analysis, book value or a multiple thereof, risk premium/yield analysis, yield to maturity and/or fundamental investment analysis.

The purchase price of a portfolio instrument will be used to fair value the instrument only if no other valuation methodology is available or deemed appropriate, and it is determined that the purchase price fairly reflects the instrument's current value.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors/Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such testing and fair valuation occurrences are reported to the Board of Directors/Trustees.

3. Portfolio Securities and Investments in Derivatives

Portfolio Securities

#### **Inverse Floating Rate Securities**

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." The Fund's Statement of Assets and Liabilities shows only the inverse floaters and not the underlying bonds as an asset, and does not reflect the short-term floating rate certificates as liabilities. Also, the Fund reflects in "Investment Income" only the net amount of earnings on its inverse floater investment (net of the interest paid to the holders of the short-term floating rate certificates and the expenses of the trust), and does not show the amount of that interest paid as an interest expense on the Statement of Operations.

An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust, at their liquidation value, as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

During the fiscal year ended February 28, 2014, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters for the following Funds during the fiscal year ended February 28, 2014, were as follows:

|   | California<br>Value<br>(NCA) | California<br>Performance<br>Plus<br>(NCP) | California<br>Opportunity<br>(NCO) | California<br>Investment<br>Quality<br>(NQC) | California<br>Select<br>Quality<br>(NVC) | California<br>Quality<br>Income<br>(NUC) |
|---|------------------------------|--|------------------------------------|--|--|--|
| Average floating rate<br>obligations<br>outstanding | \$ 4,490,000 \$              | 6,124,384                                  | \$ 5,598,877                       | \$ 9,820,808                                 | \$ 16,663,932                            | \$ 25,130,000                            |
| Average annual interest rate and fees               | 0.55%                        | 0.61%                                      | 0.52%                              | 0.57%  | 0.51%                                    | 0.61%                                    |

As of February 28, 2014, the total amount of floating rate obligations issued by the each Fund's self-deposited inverse floaters and externally-deposited inverse floaters was as follows:

|   | California<br>Value<br>(NCA) | California I<br>Value 2<br>(NCB) | California<br>Performance<br>Plus<br>(NCP) | California<br>Opportunity<br>(NCO) | California<br>Investment<br>Quality<br>(NQC) | California<br>Select<br>Quality<br>(NVC) | California<br>Quality<br>Income<br>(NUC) |
|---|------------------------------|----------------------------------|--|------------------------------------|--|--|--|
