GUGGENHEIMINVESTMENTS.COM/GBAB

... YOUR LINK TO THE LATEST, MOST UP-TO-DATE INFORMATION ABOUT THE GUGGENHEIM BUILD AMERICA BONDS MANAGED DURATION TRUST

The shareholder report you are reading right now is just the beginning of the story. Online at guggenheiminvestments.com/gbab, you will find:

- Daily, weekly and monthly data on share prices, net asset values, distributions and more
- Monthly portfolio overviews and performance analyses
- Announcements, press releases and special notices
- Fund and adviser contact information

Guggenheim Partners Investment Management, LLC and Guggenheim Funds Investment Advisors, LLC are continually updating and expanding shareholder information services on the Trust's website in an ongoing effort to provide you with the most current information about how your Trust's assets are managed and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Trust.

(Unaudited)

November 30, 2015

DEAR SHAREHOLDER

We thank you for your investment in the Guggenheim Build America Bonds Managed Duration Trust (the "Trust"). This report covers the Trust's performance for the six-month period ended November 30, 2015.

The Trust's primary investment objective is to provide current income with a secondary objective of long-term capital appreciation. Under normal market conditions, the Trust invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in a diversified portfolio of taxable municipal securities known as Build America Bonds or BABs.

All Trust returns cited—whether based on net asset value ("NAV") or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2015, the Trust provided a total return based on market price of 5.28% and a total return based on NAV of 1.02%. As of November 30, 2015, the Trust's market price of \$21.93 per share represented a discount of 3.60% to its NAV of \$22.75 per share. The market value of the Trust's shares fluctuates from time to time and it may be higher or lower than the Trust's NAV. The NAV return includes the deduction of management fees, operating expenses, and all other Trust expenses.

From June 2015 through November 2015, the Trust paid monthly distributions of \$0.13817 per share, representing an annualized distribution rate of 7.56% based on the Trust's closing market price of \$21.93 on November 30, 2015. The Trust's distribution rate is not constant and the amount of distributions, when declared by the Trust's Board of Trustees, is subject to change based on the performance of the Trust. Please see Note 2(d) on page 41 for more information on distributions for the period.

Guggenheim Funds Investment Advisors, LLC ("GFIA" or the "Adviser") serves as the investment adviser to the Trust. Guggenheim Partners Investment Management, LLC ("GPIM" or the "Sub-Adviser") serves as the Trust's investment sub-adviser and is responsible for the management of the Trust's portfolio of investments. Each of the Adviser and the Sub-Adviser is an affiliate of Guggenheim Partners, LLC ("Guggenheim"), a global diversified financial services firm.

We encourage shareholders to consider the opportunity to reinvest their distributions from the Trust through the Dividend Reinvestment Plan ("DRIP"), which is described in detail on page 57 of this report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly distribution in common shares of the Trust purchased in the market at a price less than NAV. Conversely, when the market price of the Trust's common shares is at a premium above NAV, the DRIP reinvests participants' distributions in newly-issued common shares at the greater of NAV per share or 95% of the market price per share. The DRIP provides a cost effective means to accumulate additional shares and enjoy the benefits of compounding returns over time. Since the Trust endeavors to maintain a steady monthly distribution rate, the DRIP effectively provides an income averaging technique, which causes shareholders to accumulate a larger number of Trust shares when the share price is lower than when the price is higher.

DEAR SHAREHOLDER (Unaudited) continued

November 30, 2015

To learn more about the Trust's performance and investment strategy for the semiannual period ended November 30, 2015, we encourage you to read the Questions & Answers section of this report, which begins on page 5. We are honored that you have chosen the Guggenheim Build America Bonds Managed Duration Trust as part of your investment portfolio. For the most up-to-date information regarding your investment, please visit the Trust's website at guggenheiminvestments.com/gbab.

Sincerely,

Donald C. Cacciapaglia President and Chief Executive Officer Guggenheim Build America Bonds Managed Duration Trust December 31, 2015

QUESTIONS & ANSWERS (Unaudited)

November 30, 2015

Guggenheim Build America Bonds Managed Duration Trust (the "Trust") is managed by a team of seasoned professionals at Guggenheim Partners Investment Management, LLC ("GPIM" or the "Sub-Adviser"). This team includes B. Scott Minerd, Chairman of Investments and Global Chief Investment Officer; Anne B. Walsh, CFA, JD, Senior Managing Director and Assistant Chief Investment Officer; and James E. Pass, Senior Managing Director. In the following interview, the investment team discusses the market environment and the Trust's strategy and performance for the six-month period ended November 30, 2015.

What were the most important developments in the Trust over the past six months?

For the period, the Trust outperformed relative to major equity and fixed income indices, as interest rates jumped around in anticipation of a U.S. Federal Reserve interest rate hike—expected initially in September but actually occurring late in the fourth quarter. The Trust experienced excess performance for the period, returning 5.28% on a market price basis (1.02% on an NAV basis), compared with the 0.69% return of the Bank of America Merrill Lynch Build America Bond Index. The outperformance was due to the Trust's lower duration as rate volatility continued over the period and security selection within the Build America Bonds ("BABs") market. The Trust held interest rate swaps over the period to help protect the portfolio from interest rate volatility.

What is the Trust's investment objective and how is it pursued?

The Trust's primary investment objective is to provide current income with a secondary objective of long-term capital appreciation. The Trust seeks to achieve its investment objectives by investing primarily in a diversified portfolio of taxable municipal securities known as BABs. Under normal market conditions, the Trust invests at least 80% of its managed assets (net assets plus leverage) ("Managed Assets") in BABs. The Trust may invest up to 20% of its Managed Assets in securities other than BABs, including taxable municipal securities that do not qualify for federal subsidy payments under the American Recovery and Reinvestment Act of 2009 (the "Act"), municipal securities, the interest income from which is exempt from regular federal income tax (sometimes referred to as "tax-exempt municipal securities"), asset-backed securities ("ABS"), senior loans, and other income-producing securities.

At least 80% of the Trust's Managed Assets are invested in securities that, at the time of investment, are investment grade quality. The Trust may invest up to 20% of its Managed Assets in securities that, at the time of investment, are below investment grade quality. Securities of below investment grade quality are regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. The Trust does not invest more than 25% of its Managed Assets in municipal securities in any one state of origin or more than 15% of its Managed Assets in municipal securities that, at the time of investment, are illiquid.

November 30, 2015

BABs are taxable municipal securities that include bonds issued by state and local governments to finance capital projects such as public schools, roads, transportation infrastructure, bridges, ports, and public buildings, pursuant to the Act. In contrast to traditional municipal bonds, interest received on BABs is subject to federal income tax and may be subject to state income tax. However, issuers of Direct Payment BABs are eligible to receive a subsidy from the U.S. Treasury of up to 35% of the interest paid on the bonds, allowing such issuers to issue BABs that pay interest rates that are competitive with the rates typically paid by private bond issuers in the taxable fixed-income market.

The Sub-Adviser employs investment and trading strategies to seek to maintain the leverage-adjusted duration of the Trust's portfolio to generally less than 10 years. At November 30, 2015, the Trust's duration was approximately 8 years. (Duration is a measure of a bond's price sensitivity to changes in interest rates, expressed in years. Duration is a weighted average of the times that interest payments and the final return of principal are received. The weights are the amounts of the payments discounted by the yield to maturity of the bond.)

The Sub-Adviser may seek to manage the duration of the Trust's portfolio through the use of derivative instruments, including U.S. Treasury swaps, credit default swaps, total return swaps, and futures contracts, in an attempt to reduce the overall volatility of the Trust's portfolio to changes in market interest rates. The Sub-Adviser used derivative instruments to manage the duration of the Trust's portfolio during the period. The Sub-Adviser may seek to manage the Trust's duration in a flexible and opportunistic manner based primarily on then-current market conditions and interest rate levels. The Trust may incur costs in implementing the duration management strategy, but such strategy will seek to reduce the volatility of the Trust's portfolio.

What were the significant events affecting the economy and market environment over the past six months?

At the U.S. Federal Reserve's Federal Open Market Committee (the Fed FOMC) meeting on December 16, after the period ended, the Fed raised their target Fed Funds rate by 25 bps. This decision to tighten monetary policy was in recognition that growth in the U.S. economy is sufficient to meet expectations in the current recovery. Historically, the period when the Fed begins to tighten leads to an initial sell-off in the bond market, as investors brace themselves for the ill-effects of restrictive monetary policy on the economy. Then, as investors realize the Fed is raising rates because the economy is strong, the fear of defaults diminishes and credit spreads tighten again.

Turning to equities in the U.S., valuations are approaching highs not seen since the internet bubble, based on the historical relationship of total market cap to GDP relative to interest rates. However, valuation is a poor timing tool—just because as securities get expensive doesn't mean they won't get more expensive. Meanwhile, equity valuations in Europe look reasonable, and valuations in certain emerging markets look downright cheap.

November 30, 2015

At the end of the period, U.S. investors could draw optimism from the fundamental strength of the U.S. economy, seasonal factors that continue to kick in support for equity prices, and expectations that the holiday retail season would be a good one. Abroad, investors need to have more faith in the willingness and ability of central bankers to print money. In Europe and Japan, bad news is good news, and with any real signs of weakness, the policymakers should respond with further accommodation.

Among positives for the U.S. economy, the consumer price index rose by 0.2% in October after two months of declines, and has begun to accelerate in year-over-year terms due to positive base effects. The Empire State Manufacturing Survey posted its strongest growth since July, and September job openings of 5.52 million beat expectations. Although October retail sales growth of just 0.1% was disappointing, consumer sentiment rebounded in October and November, and the outlook for consumer spending is bright. Another positive could be El Niño, the massive weather pattern that, as it gains strength, should actually become a boon to the U.S. economy, potentially adding 1.5% to gross domestic product (GDP) in the first quarter.

With the Fed's first rate hike in seven years now decided, the tailwinds of positive economic data, accommodative global central banks, and positive seasonal forces are bolstering market resilience and reaffirming a positive environment backdrop for risk assets.

How did the Trust perform for the six months ended November 30, 2015?

All Trust returns cited—whether based on net asset value ("NAV") or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2015, the Trust provided a total return based on market price of 5.28% and a total return based on NAV of 1.02%. As of November 30, 2015, the Trust's market price of \$21.93 per share represented a discount of 3.60% to its NAV of \$22.75 per share. As of May 31, 2015, the Trust's market price of \$21.64 per share represented a discount of 7.32% to its NAV of \$23.35 per share. The market value of the Trust's shares fluctuates from time to time and it may be higher or lower than the Trust's NAV. The NAV return includes the deduction of management fees, operating expenses, and all other Trust expenses.

From June 2015 through November 2015, the Trust paid monthly distributions of \$0.13817 per share, representing an annualized distribution rate of 7.56% based on the Trust's closing market price of \$21.93 on November 30, 2015. The Trust's distribution rate is not constant and the amount of distributions, when declared by the Trust's Board of Trustees, is subject to change based on the performance of the Trust. Please see Note 2(d) on page 41 for more information on distributions for the period.

Why did the Trust accrue excise tax during the period?

As a registered investment company, the Trust is subject to a 4% excise tax that is imposed if the Trust does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain

November 30, 2015

in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the fund's fiscal year). The Trust generally intends to distribute income and capital gains in the manner necessary to minimize (but not necessarily eliminate) the imposition of such excise tax. While the Trust's income and capital gains can vary significantly from year to year, the Trust seeks to maintain more stable monthly distributions over time. The Trust may retain income or capital gains and pay excise tax when it is determined that doing so is in the best interest of shareholders. Management, in consultation with the Board of Trustees, evaluates the costs of the excise tax relative to the benefits of retaining income and capital gains, including that such undistributed amounts (net of the excise tax paid) remain available for investment by the Trust and are available to supplement future distributions, which may facilitate the payment of more stable monthly distributions year over year.

How did other markets perform in this environment?

The return of the Bank of America Merrill Lynch Build America Bond Index was 0.69% for the six months ended November 30, 2015. The Barclays U.S. Aggregate Bond Index returned -0.12% for the period, and the Barclays U.S. Corporate High Yield Index returned -5.84%. The Credit Suisse Leveraged Loan Index return was -2.54%. The Bank of America Merrill Lynch ABS Master BBB-AA Index returned 0.69%. The S&P 500 Index returned 0.21%.

Discuss Trust asset allocation for the six-month period ended November 30, 2015.

The Trust's asset allocation did not change significantly over the six-month period. Approximately 90% of the Trust's long-term investments (excluding cash) remain in BABs and Qualified School Construction Bonds (QSCBs), which are qualifying investments given the Trust's policy of investing at least 80% of its Managed Assets in BABs. The rest of the Trust's Managed Assets, approximately 10% of the Trust's long-term investments, were invested in non-BABs securities, such as asset-backed securities (ABS) and bank loans.

Discuss the Trust's performance and sectors the Trust is most heavily invested in.

Spread-tightening in the taxable municipal sector (including BABs and QSCBs) and the non-BABs portion of the portfolio contributed to performance for the period.

The Trust's BABs portfolio performance was driven by positive security selection and lower interest rate sensitivity than the benchmark amid ongoing rate volatility. The Trust slightly lowered duration over the period and slightly increased credit quality, to help manage risk. In addition, the Trust held interest rate swaps over the period to help manage the cost of leverage and to manage duration. The Trust continued to focus on A-rated taxable municipals in credit selection.

November 30, 2015

As for the Trust's non-BABs components, ABS performance matched that of the Build America Bonds Index, and outperformed bank loans for the period. Much of the non-BABs exposure is floating rate, which acts as a buffer to market volatility.

The backup in spreads late in the period presented an opportunity for the non-BABs portfolio, as GPIM focuses on identifying strong quality credits and analyzes potentially oversold bonds for attractive entry points. Upper middle-market high-yield bonds and bank loans (tranches of \$300 to \$750 million) remain attractive, as they are often overlooked and underfollowed.

What is the Trust's leverage (borrowing) strategy?

Since leverage adds to performance when the cost of leverage is less than the total return generated by investments, the use of leverage contributed to the Trust's total return during this period. The Trust utilizes leverage as part of its investment strategy, to finance the purchase of additional securities that provide increased income and potentially greater appreciation potential to common shareholders than could be achieved from a portfolio that is not leveraged. Leverage will not exceed 33.33% of the Trust's Managed Assets.

As of November 30, 2015, the Trust's leverage was approximately 23% of Managed Assets, about the same as six months ago. The Trust currently employs leverage through reverse repurchase agreements with at least three different counterparties and a credit facility with a major bank.

There is no guarantee that the Trust's leverage strategy will be successful. The Trust's use of leverage may cause the Trust's NAV and market price of common shares to be more volatile and could magnify the effect of any losses.

What is the current outlook for the taxable municipal sector that includes Build America Bonds?

Issuance of taxable municipal bonds offers issuers—such as states, local governments, and non-profit organizations—an opportunity to diversify its bondholders and allows funding of certain projects not eligible for tax-exempt bonds. Prior to the creation of the BABs Program and other federally sponsored programs, taxable municipal issuance had averaged approximately \$35 billion per year or roughly 10% of total municipal issuance. During the BAB years (2009 and 2010), over \$187 billion of taxable municipal bonds were issued. Although BABs are no longer issued, they do trade actively in the secondary market.

The ongoing effects of federal sequestration—automatic spending cuts that were negotiated as part of the fiscal cliff legislation in 2013—continue to hang over the BABs market. One ongoing impact is reductions in the federal subsidy used to pay the coupon on BABs. It was cut by more than 7% in each of the past two years and is being cut almost 7% for fiscal 2016, which began October 1, 2015. The lower subsidy effectively increases the cost of borrowing for issuers. Although the reduction in the

November 30, 2015

subsidy entitles issuers to redeem bonds early, few have actually taken that step thus far, limiting refunding volume. However, more issuers may want to take advantage of the provision the longer sequestration continues.

Index Definitions

Indices are unmanaged and reflect no expenses. It is not possible to invest directly in an index.

The Bank of America Build America Bond Index is designed to track the performance of U.S. dollar-denominated Build America Bonds publicly issued by U.S. states and territories, and their political subdivisions, in the U.S. market.

The Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.

The Barclays U.S. Corporate High Yield Index is an unmanaged index of below investment grade bonds issued by U.S. corporations.

The Credit Suisse Leveraged Loan Index is an index designed to mirror the investable universe of the U.S.-dollar-denominated leveraged loan market.

The BofA/ML ABS Master BBB-AA Index is a subset of The BofA Merrill Lynch U.S. Fixed Rate Asset Backed Securities Index including all securities rated AA1 through BBB3, inclusive.

The Standard & Poor's ("S&P 500") Index is a capitalization-weighted index of 500 stocks designed to measure the performance of the broad economy, representing all major industries and is considered a representation of U.S. stock market.

Risks and Other Considerations

The views expressed in this report reflect those of the portfolio managers only through the report period as stated on the cover. These views are subject to change at any time, based on market and other conditions, and should not be construed as a recommendation of any kind. The material may also include forward looking statements that involve risk and uncertainty, and there is no guarantee that any predictions will come to pass. There can be no assurance that the Trust will achieve its investment objectives. The value of the Trust will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value.

Please see guggenheiminvestments.com/gbab for a detailed discussion of the Trust's risks and considerations.

Performance data quoted represents past performance, which is no guarantee of future results and current performance may be lower or higher than the figures shown. NAV performance data reflects fees and expenses of the Trust. The deduction of taxes that a shareholder would pay on Trust distributions or the redemption of Trust shares is not reflected in the total returns. For the most recent month-end performance figures, please visit guggenheiminvestments.com/gbab. The investment return and principal value of an investment will fluctuate with changes in market conditions and other factors so that an investor's shares, when redeemed, may be worth more or less than their original cost.

November 30, 2015

- Security was fair valued by the Valuation Committee at November 30, 2015. The total market value of fair valued securities amounts to \$1,337,457, (cost \$1,956,311) or 0.3% of total net assets.
- 2 Perpetual maturity.
- All or a portion of these securities have been physically segregated or earmarked in connection with borrowings, reverse repurchase agreements and unfunded loan commitments. As of November 30, 2015, the total market value of the segregated or earmarked securities was \$220,784,470.
- 4 Variable rate security. Rate indicated is rate effective at November 30, 2015.
- 5 Security is in default of interest and/or principal obligations.
- 6 Security is a 144A or Section 4(a)(2) security. The total market value of 144A or Section 4(a)(2) securities is \$40,462,957 (cost \$40,947,439), or 10.2% of total net assets. These securities have been determined to be liquid under guidelines established by the Board of Trustees.
- 7 Security has no stated coupon. However, it is expected to receive residual cashflow payments on deal defined payment dates.
- 8 Taxable municipal bond issued as part of the Build America Bond program.
- 9 Security is a 144A or Section 4(a)(2) security. These securities are considered illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) securities is \$181,110 (cost \$519,519), or less than 0.1% of total net assets—see Note 12.
- 10 Rate indicated is the 7-day yield as of November 30, 2015. Public Limited Company

See Sector Classification in Supplemental Information section.

The following table summarizes inputs used to value the Trust's net assets at November 30, 2015 (See Note 4 in the Notes to Financial Statements):

GBAB I GUGGENHEIM BUILD AMERICA BONDS MANAGED DURATION TRUST SEMIANNUAL REPORT 131 $\,$

November 30, 2015

The following is a summary of the significant unobservable input used in the fair valuation of assets and liabilities categorized within the Level 3 of the fair value hierarchy:

| | Ending Balance at | Ţ | Unobservable |
|--------------------------------|-------------------|---------------------|--------------|
| Category | 11/30/2015 | Valuation Technique | Inputs |
| | | | Valuation |
| Senior Floating Rate Interests | \$1,113,226 | Enterprise Value | Multiple* |
| | | _ | Valuation |
| Senior Floating Rate Interest | 196,975 | Model Priced | Multiple* |
| | | | Liquidation |
| Corporate Bonds | 27,212 | Model Priced | Value |

^{*}Valuation multiples utilized ranged from 5.5 to 12.7.

Any remaining Level 3 securities held by the Trust and excluded from the table above were not considered material to the Trust.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current period.

As of November 30, 2015, the Trust had securities with a total value of \$66,918 transfer from Level 3 to Level 2 due to the availability of a vendor price. The Trust had securities with a total value of \$24 transfer from Level 1 to Level 3 due to lack of an active market. The Trust had securities with a total value of \$570,008 transfer from Level 2 to Level 3 due to lack of vendor price.

Summary of Fair Value of Level 3 Activity

Following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value for the year ended November 30, 2015:

LEVEL 3 – Fair Value measurement using significant unobservable inputs

| | Asset Backed | Senior Floating Rate | Corporate | Common | Preferred | | |
