## **Notes to Consolidated Financial Statements (Unaudited)**

#### Note 1 Basis of Presentation

The accompanying consolidated balance sheet at December 31, 2011 has been derived from audited financial statements, and the unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, the instructions to Form 10-Q, and FASB Accounting Standards Codification (ASC) 270. Accordingly, the interim financial statements do not include all of the financial information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, the interim consolidated financial statements include all adjustments necessary to present fairly the financial condition and results of operations for the reported periods, and all such adjustments are of a normal and recurring nature.

These consolidated statements should be read in conjunction with the notes to the audited consolidated financial statements contained in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2011.

The consolidated financial statements include the accounts of Codorus Valley Bancorp, Inc. and its wholly owned bank subsidiary, PeoplesBank, A Codorus Valley Company (PeoplesBank), and its wholly owned nonbank subsidiary, SYC Realty Company, Inc. (collectively referred to as Codorus Valley or the Corporation). PeoplesBank has four wholly-owned subsidiaries, Codorus Valley Financial Advisors, Inc., SYC Settlement Services, Inc. and two subsidiaries whose purpose is to temporarily hold foreclosed properties pending eventual liquidation. All significant intercompany account balances and transactions have been eliminated in consolidation. The combined results of operations of the nonbank subsidiaries are not material to the consolidated financial statements.

The results of operations for the six-month period ended June 30, 2012 are not necessarily indicative of the results to be expected for the full year.

In accordance with FASB ASC 855, the Corporation evaluated the events and transactions that occurred after the balance sheet date of June 30, 2012, and through the date these consolidated financial statements were issued, for items of potential recognition or disclosure.

#### **Note 2 Significant Accounting Policies**

#### Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at their outstanding unpaid principal balances less amounts charged off, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance of loans. Generally, loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) over the contractual life of the loan. The loan portfolio is segmented into commercial and consumer loans. Commercial loans consist of the following industry classes: builder & developer, commercial real estate investor, residential real estate investor, hotel/motel, wholesale & retail, agriculture, manufacturing and all other. Consumer loans consist of the following classes: residential mortgage, home equity and all other.

For all classes of loans receivable, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either adequately guaranteed or well secured. Generally, when a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans is reported as interest income or applied against principal, according to the Corporation s judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time, generally six months, and the ultimate collectability of the total contractual principal and interest is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

#### **Table of Contents**

## Allowance for Loan Losses

The allowance for loan losses represents the Corporation s estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance. All, or part, of the principal balance of loans are charged off to the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. The Corporation performs a quarterly evaluation of the adequacy of the allowance. The allowance is based on the Corporation s past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower s ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance consists of specific, general, and unallocated components. The specific component relates to commercial loans that are classified as impaired, generally substandard and nonaccrual loans. For commercial loans that are classified as impaired, an allowance is established when the collateral value (or discounted cash flows or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class including commercial loans not considered impaired, as well as smaller balance homogeneous loans, such as residential real estate, home equity and other consumer loans. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative (environmental) risk factors. Historical loss rates are based on a two year rolling average of net charge-offs. Qualitative risk factors that supplement historical losses in the evaluation of loan pools include:

Changes in national and local economies and business conditions

Changes in the value of collateral for collateral dependent loans

Changes in the level of concentrations of credit

Changes in the volume and severity of classified and past due loans

Changes in the nature and volume of the portfolio

Changes in collection, charge-off, and recovery procedures

Changes in underwriting standards and loan terms

Changes in the quality of the loan review system

Changes in the experience/ability of lending management and key lending staff

Regulatory and legal regulations that could affect the level of credit losses

Other pertinent environmental factors

Each factor is assigned a value to reflect improving, stable or declining conditions based on the Corporation s best judgment using relevant information available at the time of the evaluation. An unallocated component is maintained to cover uncertainties that could affect the Corporation s estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the loan portfolio.

#### **Table of Contents**

As disclosed in Note 5-Loans, the Corporation engages in commercial and consumer lending. Loans are made within the Corporation s primary market area and surrounding areas, and include the purchase of whole loan or participation interests in loans from other financial institutions. Commercial related loans, which pose the greatest risk of loss to the Corporation, whether originated or purchased, are generally secured by real estate. Within the broad commercial loan segment, the builder & developer and commercial real estate investor loan classes generally present a higher level of risk than other commercial loan classifications. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effect of general economic conditions on income producing properties, unstable real estate prices and the dependency upon successful construction and sale or operation of the real estate project. Within the consumer loan segment, junior (i.e., second) liens present a slightly higher risk to the Corporation because economic and housing market conditions can adversely affect the underlying value of the collateral and the ability of some borrowers to service their debt.

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The Corporation determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Loans that are deemed impaired are evaluated for impairment loss based on the net realizable value of the collateral, as applicable. Loans that are not collateral dependent will rely on the present value of expected future cash flows discounted at the loan s effective interest rate to determine impairment loss. Large groups of smaller balance homogeneous loans such as residential mortgage loans, home equity loans and other consumer loans are collectively evaluated for impairment, unless they are considered to be a troubled debt restructuring.

An allowance for loan losses is established for an impaired commercial loan if its carrying value exceeds its estimated fair value. For commercial loans secured by real estate, estimated fair values are determined primarily through third-party appraisals of the underlying collateral. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the most recent appraisal and the condition of the property. Appraised values are generally discounted to provide for selling costs and other factors to determine an estimate of the net realizable value of the property. For commercial loans secured by non-real estate collateral, such as accounts receivable, inventory and equipment, estimated fair values are determined based on the borrower s financial statements, inventory reports, accounts receivable aging or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets. In instances when specific consumer related loans become impaired, they may be partially or fully charged off, which obviates the need for a specific allowance.

Loans whose terms are modified are classified as troubled debt restructurings if the Corporation grants borrowers experiencing financial difficulties concessions that it would not otherwise consider. Concessions granted under a troubled debt restructuring may involve a reduction in interest rate to a below market rate or an extension of a loan s stated maturity date. Loans classified as troubled debt restructurings are designated as impaired. Non-accrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for a reasonable period of time, generally six consecutive months after modification and future payments are reasonably assured.

Federal regulatory agencies, as an integral part of their examination process, periodically review the Corporation s allowance for loan losses and may require the Corporation to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to the Corporation. Based on a comprehensive analysis of the loan portfolio, the Corporation believes that the level of the allowance for loan losses at June 30, 2012 is adequate.

#### **Table of Contents**

#### Foreclosed Real Estate

Foreclosed real estate, included in other assets, is comprised of property acquired through a foreclosure proceeding or property that is acquired through acceptance of a deed-in-lieu of foreclosure. Foreclosed real estate is initially recorded at fair value minus estimated costs to sell at the date of foreclosure, establishing a new cost basis. Any difference between the carrying value and the new cost basis is charged against the allowance for loan losses. Appraisals are generally used to determine fair value. After foreclosure, management reviews valuations at least quarterly and adjusts the asset to the lower of cost or fair value minus estimated costs to sell through a valuation allowance. Costs related to the improvement of foreclosed real estate are generally capitalized until the real estate reaches a saleable condition subject to fair value limitations. Revenue and expense from operations and changes in the valuation allowance are included in expense. When a foreclosed real estate asset is ultimately sold, any gain or loss on the sale is included in the income statement as a component of noninterest expense. At June 30, 2012, foreclosed real estate, net of allowance, was \$12,685,000, compared to \$16,243,000 for December 31, 2011.

#### Per Common Share Computations

The computation of net income per common share is provided in the table below.

	Three mon	nths er e 30,	nded	Six mont June	ded	
(in thousands, except per share data)	2012		2011	2012		2011
Net income available to common shareholders	\$ 2,708	\$	1,626	\$ 4,810	\$	2,892
Weighted average shares outstanding (basic)	4,221		4,150	4,214		4,144
Effect of dilutive stock options	60		58	45		51
Weighted average shares outstanding (diluted)	4,281		4,208	4,259		4,195
Basic earnings per common share	\$ 0.64	\$	0.39	\$ 1.14	\$	0.70
Diluted earnings per common share	\$ 0.63	\$	0.39	\$ 1.13	\$	0.69
Anti-dilutive stock options and common stock warrants						
excluded from the computation of earnings per share	75		83	75		83
Comprehensive Income						

Accounting principles generally accepted in the United States of America require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the shareholders equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

#### Table of Contents

#### Cash Flow Information

For purposes of the statements of cash flows, the Corporation considers interest bearing deposits with banks, cash and due from banks, and federal funds sold to be cash and cash equivalents.

Supplemental cash flow information is provided in the table below.

	Six months ended June 30,			
(dollars in thousands)		2012		2011
Cash paid during the period for:				
Income taxes	\$	1,882	\$	1,285
Interest	\$	5,374	\$	6,295
Noncash investing and financing activities:				
Transfer of loans to foreclosed real estate	\$	156	\$	1,693
Increase in other liabilities for pre-funded client ACH disbursements	\$	0	\$	1,883
Increase in other liabilities for investment in foreclosed real estate	\$	0	\$	545
Reclassification				

Certain amounts in the 2011 consolidated financial statements have been reclassified to conform to the 2012 presentation, which did not impact net income or shareholders equity.

#### Recent Accounting Pronouncements

The FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S GAAP and IFRSs. This Update amends FASB ASC Topic 820, Fair Value Measurements, to bring U.S. GAAP for fair value measurements in line with International Accounting Standards. The Update clarifies existing guidance for items such as: the application of the highest and best use concept to non-financial assets and liabilities; the application of fair value measurement to financial instruments classified in a reporting entity s stockholder s equity; and disclosure requirements regarding quantitative information about unobservable inputs used in the fair value measurements of level 3 assets. The Update also creates an exception to Topic 820 for entities which carry financial instruments within a portfolio or group, under which the entity is now permitted to base the price used for fair valuation upon a price that would be received to sell the net asset position or transfer a net liability position in an orderly transaction. The Update also allows for the application of premiums and discounts in a fair value measurement if the financial instrument is categorized in level 2 or 3 of the fair value hierarchy. Lastly, the ASU contains new disclosure requirements regarding fair value amounts categorized as level 3 in the fair value hierarchy such as: disclosure of the valuation process used; effects of and relationships between unobservable inputs; usage of nonfinancial assets for purposes other than their highest and best use when that is the basis of the disclosed fair value; and categorization by level of items disclosed at fair value, but not measured at fair value for financial statement purposes. The Corporation adopted the provisions of ASU No. 2011-04 effective January 1, 2012. The fair value measurement provisions of ASU No. 2011-04 had no impact on the Corporation s consolidated financial statements. See Note 13 to the consolidated financial statements for enhanced disclosures required by ASU

In November 2008, the Securities and Exchange Commission (SEC) released a proposed roadmap regarding the potential use by U.S. issuers of financial statements prepared in accordance with International Financial Reporting Standards (IFRS). IFRS is a comprehensive series of accounting standards published by the International Accounting Standards Board (IASB). Under the proposed roadmap, the Corporation may be required to prepare financial statements in accordance with IFRS as early as 2015. The SEC has indicated it will make a determination in 2012 regarding the mandatory adoption of IFRS. The Corporation is currently assessing the impact that this potential change would have on its consolidated financial statements, and it will continue to monitor the development of the potential implementation of IFRS.

#### **Note 3-Securities**

A summary of securities available-for-sale at June 30, 2012 and December 31, 2011 is provided below. The securities available-for-sale portfolio is generally comprised of high quality debt instruments, principally obligations of the United States government or agencies thereof. Also included in the portfolio are investments in the obligations of states and municipalities. With the exception of an approximately \$15 million portfolio (fair value) of Texas municipal utility district bonds, which has its own criteria for investment, the remaining municipal bonds were almost all rated A or above by at least one national rating service at June 30, 2012. The majority of municipal bonds in the portfolio are general obligation bonds, which can draw upon multiple sources of revenue, including taxes, for payment. Only a few bonds are revenue bonds, which are dependent upon a single revenue stream for payment, but they are for critical services such as water and sewer. In many cases, municipal debt issues are insured or, in the case of school districts of selected states, backed by specific loss reserves. At June 30, 2012, the fair value of the municipal bond portfolio was concentrated in the states of Pennsylvania at 37 percent and Texas at 21 percent.

At June 30, 2012, the unrealized losses of \$25,000 within the less than 12 months category were attributable to nine municipal securities. Two of the securities were rated AA3 and one AA2 by Moody s rating service and two were rated AA and four were rated AA- by Standard and Poor s rating service.

#### **Table of Contents**

Securities available-for-sale are analyzed quarterly for possible other-than-temporary impairment. The analysis considers, among other factors: 1) whether the Corporation has the intent to sell its securities prior to market recovery or maturity; 2) whether it is more likely than not that the Corporation will be required to sell its securities prior to market recovery or maturity; 3) default rates/history by security type; 4) third-party securities ratings; 5) third-party guarantees; 6) subordination; 7) payment delinquencies; 8) nature of the issuer; and 9) current financial news.

The Corporation believes that unrealized losses at June 30, 2012 were primarily the result of changes in market interest rates and that it has the ability to hold these investments for a time necessary to recover the amortized cost. Through June 30, 2012, the Corporation has collected all interest and principal on its investment securities as scheduled. The Corporation believes that collection of the contractual principal and interest is probable and, therefore, all impairment is considered to be temporary.

#### **Note 4 Restricted Investment in Bank Stocks**

Restricted stock, which represents required investments in the common stock of correspondent banks, is carried at cost and, as of June 30, 2012 and December 31, 2011, consisted primarily of the common stock of the Federal Home Loan Bank of Pittsburgh (FHLBP) and, to a lesser degree, Atlantic Central Bankers Bank (ACBB). Under the FHLBP s Capital Plan, PeoplesBank is required to maintain a minimum member stock investment, both as a condition of becoming and remaining a member and as a condition of obtaining borrowings from the FHLBP. The FHLBP uses a formula to determine the minimum stock investment, which is based on the volume of loans outstanding, unused borrowing capacity and other factors.

During the first quarter of 2012, the FHLBP began paying a quarterly cash dividend on its common stock. Prior to 2012, dividend payments had been suspended by the FHLBP since December 2008. The FHLBP reported that future dividends will be dependent upon the condition of its private-label residential mortgage-backed securities portfolio, its overall financial performance, retained earnings and other factors. The FHLBP restricts the repurchase of the excess capital stock of member banks. The amount of excess capital stock that can be repurchased from any member is currently the lesser of five percent of the member s total capital stock outstanding or its excess capital stock outstanding.

Management evaluates the restricted stock for impairment in accordance with FASB ASC Topic 942. Management s determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. Using the FHLBP as an example, the determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as: (1) the significance of the decline in net assets of the FHLBP as compared to the capital stock amount for the FHLBP and the length of time this situation has persisted; (2) commitments by the FHLBP to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLBP; and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLBP. Management believes no impairment charge was necessary related to the restricted stock during the periods ended June 30, 2012 and 2011.

#### Note 5 Loans

The table below provides the composition of the loan portfolio at June 30, 2012 and December 31, 2011. The portfolio is comprised of two segments, commercial and consumer loans. The commercial loan segment is disaggregated by industry class which allows the Corporation to monitor risk and performance. Those industries representing the largest dollar investment and most risk are listed separately. The other commercial loans category is comprised of a multitude of industries, including health services, professional services, public administration, restaurant, service, transportation, finance, natural resources, recreation and religious organizations. The consumer related segment is comprised of residential mortgages, home equity and other consumer loans. The Corporation has not engaged in sub-prime residential mortgage originations.

(dollars in thousands)	June 30, 2012	De	cember 31, 2011
Builder & developer	\$ 99,228	\$	103,514

Home equity	60,492		58,390
Other	46,328		48,226
Total consumer related loans	129,246		127,940
Total loans	\$ 706,244	\$	693,515

The Corporation s internal risk rating system follows regulatory guidance as to risk classifications and definitions. Every approved loan is assigned a risk rating. Generally, risk ratings for commercial related loans and residential mortgages held for investment are determined by a formal evaluation of risk factors performed by the Corporation s underwriting staff. For consumer loans, and commercial loans up to \$750,000, the Corporation uses third-party credit scoring software models for risk rating purposes. The loan portfolio is monitored on a continuous basis by loan officers, loan review personnel and senior management. Adjustments of loan risk ratings are generally performed by the Special Asset Committee, which includes senior management. The Committee, which meets monthly, makes changes, as appropriate, to risk ratings when it becomes aware of credit events such as payment delinquency, cessation of a business or project, bankruptcy or death of the borrower, or changes in collateral value.

The Corporation uses ten risk ratings to grade loans. The first seven ratings, representing the lowest risk, are combined and given a pass rating. A pass rating is a satisfactory credit rating, which applies to a loan that is expected to perform in accordance with the loan agreement and has a low probability of loss. A loan rated—special mention—has a potential weakness which may, if not corrected, weaken the loan or inadequately protect the Corporation—s position at some future date. A loan rated—substandard—is inadequately protected by the current net worth or paying capacity of the borrower or of the collateral pledged. A—substandard—loan has a well defined weakness or weaknesses that could jeopardize liquidation of the loan, which exposes the Corporation to loss if the deficiencies are not corrected. When circumstances indicate that collection of the loan is doubtful, the loan is risk rated—nonaccrual,—the accrual of interest income is discontinued, and any unpaid interest previously credited to income is reversed. Accordingly, the table below does not include the regulatory classification of—loss—because the Corporation promptly charges off loan losses.

# Table of Contents

## Table of Contents

The table below presents a summary of impaired loans at June 30, 2012 and December 31, 2011. Generally, impaired loans are loans risk rated substandard and nonaccrual or classified as troubled debt restructurings. An allowance is established for individual commercial related loans where the Corporation has doubt as to full recovery of the outstanding principal balance. Typically, impaired consumer related loans are partially or fully charged-off obviating the need for a specific allowance. The recorded investment represents outstanding unpaid principal loan balances adjusted for charge-offs.

The performance and credit quality of the loan portfolio is also monitored by using an aging schedule which shows the length of time a loan is past due. The table below presents a summary of past due loans, nonaccrual loans and current loans by loan segment and class at June 30, 2012 and December 31, 2011.

#### **Table of Contents**

Loans classified as troubled debt restructurings (TDRs) are designated impaired and arise when the Corporation grants borrowers experiencing financial difficulties concessions that it would not otherwise consider. Concessions granted with respect to these loans involve an extension of the maturity date or a below market interest rate relative to new debt with similar risk. Generally, these loans are secured by real estate. If repayment of the loan is determined to be collateral dependent, the loan is evaluated for impairment loss based on the fair value of the collateral. For loans that are not collateral dependent, the present value of expected future cash flows, discounted at the loan s effective interest rate, is used to determine any impairment loss.

A nonaccrual TDR represents a nonaccrual loan, as previously defined, which includes an economic concession. Nonaccrual TDRs are restored to accrual status if principal and interest payments, under the modified terms, are current for at least six consecutive payments after the modification and future principal and interest payments are reasonably assured. In contrast, an accruing TDR represents a loan that, at the time of the modification, has a demonstrated history of payments and with respect to which management believes that future loan payments are reasonably assured under the modified terms.

The table below shows loans whose terms have been modified under TDRs during the three months and six months ended June 30, 2012 and 2011. There was no impairment loss recognized on any of these TDRs, and they are all performing under their modified terms. There were no defaults during the six months ended June 30, 2012 for TDRs entered into for the last 12 months.

Note 8 Long-term Debt

PeoplesBank s long-term debt obligations to the Federal Home Loan Bank of Pittsburgh (FHLBP) are primarily fixed rate instruments. Under terms of a blanket collateral agreement with the FHLBP, the obligations are secured by FHLBP stock, U.S. agency mortgage-backed securities and qualifying loan receivables, principally real estate secured loans.

In June 2012, the Corporation restructured (i.e., extended) two outstanding \$5 million FHLB advances (\$10 million total) to lock in low rates as a hedge against the possibility of rising market interest rates in the future. This transaction resulted in a \$235,000 prepayment penalty that has been deferred and embedded in the rates on the restructured advances where it will be recognized as interest expense over their respective repayment terms. The \$5 million FHLB advance originally maturing December 2013 with a fixed rate of interest of 2.39 percent was extended to June 2019 with a fixed rate of interest of 2.10 percent. The \$5 million FHLB advance originally maturing July 2014 with a fixed rate of interest of 1.38 percent was extended to June 2018 with a fixed rate of interest of 1.87 percent. The impact of the debt restructure on current period earnings is immaterial.

In June 2006, Codorus Valley formed CVB Statutory Trust No. 2, a wholly-owned special purpose subsidiary whose sole purpose was to facilitate a pooled trust preferred debt issuance of \$7,217,000. In November 2004, Codorus Valley formed CVB Statutory Trust No. 1 to facilitate a pooled trust preferred debt issuance of \$3,093,000. The Corporation owns all of the common stock of these nonbank subsidiaries, and the debentures are the sole assets of the Trusts. The accounts of both Trusts are not consolidated for financial reporting purposes in accordance with FASB ASC 810. For regulatory capital purposes, all of the Corporation s trust preferred securities qualified as Tier 1 capital for all reported periods. Trust preferred securities are subject to capital limitations under the FDIC s risk-based capital guidelines, i.e., the portion that exceeds 25 percent of capital qualifies as Tier 2 capital. The Corporation used the net proceeds from these offerings to fund its operations.

Note 9 Regulatory Matters			

Note 9 Regulatory Matters

Codorus Valley and PeoplesBank are subject to various regulatory capital requirements. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if imposed, could have a material effect on Codorus Valley s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, Codorus Valley and PeoplesBank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classifications are also subject to qualitative judgments by the regulators.

Quantitative measures established by regulators to ensure capital adequacy require Codorus Valley and PeoplesBank to maintain minimum ratios, as set forth below, to total and Tier 1 capital as a percentage of risk-weighted assets, and of Tier 1 capital to quarter-to-date average assets (leverage ratio). Management believes that Codorus Valley and PeoplesBank were well capitalized on June 30, 2012 based on regulatory capital guidelines.

## Note 10 Shareholders Equity

Preferred stock issued under the US Treasury s Small Business Lending Fund Program

On August 18, 2011, as part of the Treasury Small Business Lending Fund (SBLF) program, the Corporation entered into a Securities Purchase Agreement (SBLF Purchase Agreement) with the United States Department of the Treasury (Treasury) pursuant to which the Corporation sold to the Treasury, for an aggregate purchase price of \$25 million, 25,000 shares of senior non-cumulative, perpetual preferred stock, Series B, \$1,000 liquidation value, \$2.50 par value. Generally, the preferred stock is non-voting and qualifies as Tier 1 regulatory capital. The SBLF agreement imposes limits on the ability of the Corporation to pay dividends and repurchase shares of common stock if it fails to declare and pay quarterly dividends on the SBLF preferred stock. The dividend rate can fluctuate on a quarterly basis during the first 10 quarters during which the SBLF preferred stock is outstanding, based upon changes in the level of Qualified Small Business Lending or QSBL (as defined in the Purchase Agreement) by the Bank. Based upon the increase in the Bank s level of QSBL over the baseline level calculated under the terms of the Purchase Agreement, the dividend rate for the initial dividend period was set at 5 percent. For the second through ninth calendar quarters, the dividend rate may be adjusted between one percent (1%) and five percent (5%) per annum to reflect the amount of change in the Bank s level of QSBL. The annualized dividend rate in effect on June 30, 2012 was 1.14 percent, compared to 5 percent on December 31, 2011. For the tenth calendar quarter through four and one half years after issuance, the dividend rate will be fixed at between one percent (1%) and seven percent (7%) based upon the increase in QSBL as compared to the baseline. After four and one half years from issuance, the dividend rate will increase to 9% (including a quarterly lending incentive fee of 0.5%). Information about SBLF preferred stock is disclosed in Note 10 Shareholders Equity in the Corporation s Annual Report on Form 10-K for the year ended

#### Table of Contents

Preferred stock and common stock warrant issued under the US Treasury s Capital Purchase Program

On August 18, 2011, the Corporation entered into a repurchase letter agreement with the Treasury providing for the redemption of the CPP preferred stock. Pursuant to the SBLF Purchase Agreement, approximately \$16,507,000 of the proceeds of the sale of the SBLF preferred stock was used to redeem the 16,500 shares of the Series A CPP preferred stock plus accrued and unpaid dividends. Upon redemption, the remaining \$379,000 preferred stock discount was recorded as a reduction to third quarter 2011 net income available to common shareholders. Additionally, the additional paid-in-capital account was reduced by approximately \$39,000 pertaining to issuance costs for the CPP preferred stock. As a result of the redemption, the Corporation is no longer subject to the restrictions imposed by the CPP. On September 28, 2011, the Corporation repurchased the outstanding CPP common stock warrant for \$526,604 from the US Treasury which was recorded as a reduction to additional paid-in-capital. Information about the CPP preferred stock and common stock warrant is disclosed in Note 10 Shareholders Equity in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2010.

Change in authorized shares of common stock

On May 15, 2012, as previously reported on Form 8-K, the Corporation s shareholders approved the Board of Directors proposal to amend the Corporation s Articles of Incorporation to increase the aggregate number of shares of common stock which the Corporation may issue from 10 million to 15 million shares. The increase in the number of authorized shares provides flexibility of action in the future and enables the Corporation to act promptly in connection with stock splits, stock dividends, acquisitions, financings and such other corporate matters involving the issuance of common stock as the Board of Directors may deem advisable. There are no present plans for the use of the additional shares.

Dividend Reinvestment and Stock Purchase Plan

The Corporation maintains a Dividend Reinvestment and Stock Purchase Plan (Plan). Shareholders of common stock may participate in the Plan, which allows additional shares of common stock to be purchased with reinvested dividends at prevailing market prices. The Plan also permits participants to make additional voluntary cash payments to purchase shares of the Corporation s common stock. Since August 2008, purchases have been made from the Corporation from its authorized, but unissued, common stock. All shares reserved for the Plan were issued as of December 31, 2011. On January 26, 2012, an additional 150,000 shares were reserved for issuance under the Plan.

#### **Note 11 Contingent Liabilities**

There are no legal proceedings pending against Codorus Valley Bancorp, Inc. or any of its subsidiaries which are expected to have a material impact upon the consolidated financial position and/or operating results of the Corporation other than routine litigation incidental to the business. Management is not aware of any proceedings known or contemplated by government authorities.

## Note 12 Guarantees

Codorus Valley does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are written conditional commitments issued by PeoplesBank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Corporation generally holds collateral and/or personal guarantees supporting these commitments. The Corporation had \$16,533,000 of standby letters of credit outstanding on June 30, 2012, compared to \$11,532,000 on December 31, 2011. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding letters of credit. The amount of the liability as of June 30, 2012 and December 31, 2011, for guarantees under standby letters of credit issued, was not material. Many of the commitments are expected to expire without being drawn upon and, therefore, generally do not present significant liquidity risk to the Corporation or PeoplesBank.

#### Table of Contents

#### Note 13 Fair Value of Assets and Liabilities

The Corporation uses its best judgment in estimating the fair value of the Corporation s assets and liabilities; however, there are inherent weaknesses in any estimation technique. Therefore, the fair value estimates herein are not necessarily indicative of the amounts that could be realized in sales transactions on the dates indicated. The estimated fair value amounts have been measured as of their respective period-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values subsequent to the respective reporting dates may be different than the amounts reported at each period end.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date. GAAP establishes a fair value hierarchy that prioritizes the use of inputs used in valuation methodologies into the following three levels as follows:

Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Level 2: Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; inputs to the valuation methodology include quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs to the valuation methodology that utilize model-based techniques for which all significant assumptions are observable in the market.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement; inputs to the valuation methodology that utilize model-based techniques for which significant assumptions are not observable in the market; or inputs to the valuation methodology that require significant management judgment or estimation, some of which may by internally developed. Since management maximizes the use of observable inputs and minimizes the use of unobservable inputs when determining fair value, an asset s or liability s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Management reviews and updates the fair value hierarchy classifications on a quarterly basis.

## Assets Measured at Fair Value on a Recurring Basis

#### Securities available-for-sale

The fair values of investment securities were measured using information from a third-party pricing service. The pricing service uses quoted market prices on nationally recognized securities exchanges (Level 1), or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities relationship to other benchmark quoted prices. At least annually, the Corporation reviews a random sample of the pricing information received from the third-party pricing service by comparing it to price quotes from third-party brokers. Historically, price deviations have been immaterial.

#### **Table of Contents**

State and municipal	86,610		0		86,610		0				

#### **Impaired loans** (generally carried at fair value)

Assets Measured at Fair Value on a Nonrecurring Basis

Impaired loans are those that are accounted for under FASB ASC Topic 310, in which the Corporation has measured impairment generally based on the fair value of the loan s collateral. Fair value is generally determined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These loans are included as Level 3 fair values, based on the lowest level of input that is significant to the fair value measurements. At June 30, 2012, the fair value consists of loan balances of \$4,203,000, net of a valuation allowance of \$797,000 and charge-offs of \$2,529,000, compared to loan balances of \$4,222,000, net of a valuation allowance of \$397,000 and charge-offs of \$2,485,000, at December 31, 2011.

### Foreclosed Real Estate (carried at lower of cost or fair value)

Other real estate property acquired through foreclosure is initially recorded at fair value of the property at the transfer date less estimated selling cost. Subsequently, other real estate owned is carried at the lower of its carrying value or the fair value less estimated selling cost. Fair value is usually determined based upon an independent third-party appraisal of the property or occasionally upon a recent sales offer. At June 30, 2012, the carrying value of foreclosed real estate with a valuation allowance was \$11,748,000 (\$14,942,000 less a \$3,194,000 allowance). At December 31, 2011, the carrying value of foreclosed real estate with a valuation allowance was \$14,093,000 (\$16,488,000 less a \$2,395,000 allowance).

		Fair Value Measurements									
(dollars in thousands)	Total	8					(Level 3) gnificant Other bservable Inputs				
June 30, 2012					-		•				
Impaired loans	\$ 4,203	\$	0	\$	0	\$	4,203				
Foreclosed real estate	11,748		0		0		11,748				
December 31, 2011											
Impaired loans	\$ 4,222	\$	0	\$	0	\$	4,222				
Foreclosed real estate	14,093 - 30	-	0		0		14,093				

#### **Table of Contents**

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Corporation has utilized Level 3 inputs to determine fair value:

		Quantitative Information about Level 3 Fair Value Measurements									
	Fa	ir Value	Valuation	Unobservable							
(dollars in thousands)	Es	stimate	Techniques	Input	Range						
June 30, 2012											
Impaired loans	\$	4,203	Appraisal (1)	Appraisal adjustments (2)	20% - 30%						
Foreclosed real estate		11,748	Appraisal (1), (3)								

- (1) Fair value is generally determined through independent appraisals, which generally include various level 3 inputs that are not identifiable.
- (2) Appraisals may be adjusted downward by the Corporation s management for qualitative factors such as economic conditions, and estimated liquidation expenses. The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.
- (3) May include qualitative adjustments by the Corporation s management and estimated liquidation expenses.

#### **Disclosures about Fair Value of Financial Instruments**

The following presents the carrying amount and estimated fair value of the Corporation s financial instruments as of June 30, 2012 and December 31, 2011 and placement in the fair value hierarchy at June 30, 2012. For short-term financial assets such as cash and cash equivalents, restricted investment in bank stocks, and interest receivable, the carrying amount is a reasonable estimate of the fair value due to the relatively short time between the origination of the instrument and its expected realization. For financial liabilities such noninterest bearing demand, interest bearing demand, savings deposits, interest payable, and short-term borrowings, the carrying amount is a reasonable estimate of the fair value since these products have no stated maturity. Off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account the remaining terms of the agreements and counterparties credit standing. These amounts were not considered to be material.

#### Loans held for sale (carried at lower of cost or fair value)

The fair value of loans held for sale is determined, when possible, using quoted secondary-market prices. If no such quoted prices exist, the fair value of a loan is determined using quoted prices for a similar loan or loans, adjusted for the specific attributes of that loan. At June 30, 2012 and December 31, 2011, the fair value of loans held for sale exceeded their cost basis.

#### Loans (carried at cost)

The fair value of loans is estimated using discounted cash flow analyses using the current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans were first segregated by type such as commercial, real estate, and consumer, and were then further segmented into fixed and variable rate. Projected future cash flows are calculated based upon contractual maturity or call dates. Generally, variable rate loans that reprice frequently have no significant change in credit risk; fair value is based on carrying value.

### Time Deposits (carried at cost)

The fair values of fixed rate time deposits are estimated using a discounted cash flow analyses. The discount rates used are based on rates currently offered for deposits with similar remaining maturities. The fair values of variable rate time deposits that reprice frequently are based on carrying value. The fair values of time deposit liabilities do not take into consideration the value of the Company s long-term relationships with depositors, which may have significant value.

### Table of Contents

### Long-term debt (carried at cost)

Long-term debt includes FHLB advances (Level 2) and junior subordinated debt (Level 3). The fair value of FHLB advances are estimated using discounted cash flow analysis, based on quoted prices for new FHLB advances with similar credit risk characteristics, terms and remaining maturity. These prices are obtained from this active market and represent a market value that is deemed to represent the transfer price if the liability were assumed by a third party. The fair value of junior subordinated debt is estimated using discounted cash flow analysis, based on market rates and spread characteristics of similar debt with similar credit risk characteristics, terms and remaining maturity.

# Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Management s discussion and analysis of the significant changes in the results of operations, capital resources and liquidity presented in the accompanying consolidated financial statements for Codorus Valley Bancorp, Inc. (Codorus Valley or the Corporation), a bank holding company, and its wholly owned subsidiary, PeoplesBank, A Codorus Valley Company (PeoplesBank), are provided below. Codorus Valley s consolidated financial condition and results of operations consist almost entirely of PeoplesBank s financial condition and results of operations. Current performance does not guarantee, and may not be indicative of, similar performance in the future.

### Forward-looking statements

Management of the Corporation has made forward-looking statements in this Form 10-Q. These forward-looking statements are subject to risks and uncertainties. Forward-looking statements include information concerning possible or assumed future results of operations of the Corporation and its subsidiaries. When words such as believes, expects, anticipates or similar expressions occur in the Form 10-Q, management is making forward-looking statements.

Note that many factors, some of which are discussed elsewhere in this report and in the documents that are incorporated by reference, could affect the future financial results of the Corporation and its subsidiaries, both individually and collectively, and could cause those results to differ materially from those expressed in the forward-looking statements contained or incorporated by reference in this Form 10-Q. These factors include, but are not limited to, the following:

operating, legal and regulatory risks;

enacted financial reform legislation, e.g., Dodd-Frank Wall Street Reform and Consumer Protection Act, which may have a significant impact on the Corporation s business and results of operations;

a prolonged economic downturn;

an increase in nonperforming assets requiring loss provisions and the incurrence of carrying costs related to nonperforming assets; declines in the market value of investment securities considered to be other-than-temporary;

the effects of and changes in the rate of FDIC premiums, including special assessments;

interest rate fluctuations which could increase our cost of funds or decrease our yield on earning assets and therefore reduce our net interest income;

future legislative or administrative changes to U.S. governmental capital programs;

unavailability of capital when needed or availability at less than favorable terms;

political and competitive forces affecting banking, securities, asset management and credit services businesses;

unauthorized disclosure of sensitive or confidential client or customer information, whether through a breach of our computer systems or otherwise, may adversely affect the Corporation s operations, net income or reputation; and

the risk that management s analysis of these risks and forces could be incorrect and/or that the strategies developed to address them could be unsuccessful.

The Corporation undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date of this report.

### Critical accounting policies

We have identified critical accounting policies for the Corporation to include allowance for loan losses, valuation of foreclosed real estate and evaluation of other-than-temporary impairment losses of securities. There were no material changes made to the critical accounting policies disclosed in the 2011 Annual Report on Form 10-K in regards to application or related judgments and estimates used. A detailed disclosure pertaining to critical accounting estimates is provided in Item 7 of the Corporation s 2011 Annual Report on Form 10-K.

#### **Table of Contents**

Three months ended June 30, 2012, compared to three months ended June 30, 2011

#### FINANCIAL HIGHLIGHTS

The Corporation earned net income available to common shareholders totaling \$2,708,000 for the quarter ended June 30, 2012, compared to \$1,626,000 for the quarter ended June 30, 2011. The \$1,082,000 or 67 percent increase in earnings for the second quarter of 2012, compared to the second quarter of 2011, was primarily the result of an increase in net interest income, a decrease in the provision for loan losses, an increase in noninterest income and a decrease in preferred stock dividends, which more than offset the increase in income taxes.

The \$916,000 or 11 percent increase in net interest income for the second quarter of 2012, compared to the same quarter of 2011, resulted primarily from a larger volume of earning assets, principally commercial loans, and a decrease in funding costs. The decrease in funding costs resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates.

The \$300,000 or 55 percent decrease in the provision for loan losses for the second quarter of 2012, compared to the same quarter of 2011, reflected improved credit quality and a lesser need for provisions to maintain the adequacy of the allowance for loan losses.

The \$167,000 or 10 percent increase in total noninterest income for the second quarter of 2012, compared to the same quarter of 2011, was due primarily to an increase in income from the sale of residential mortgage loans. Market interest rates decreased to record levels during the current period leading to an increase in residential mortgage loan refinancings.

The \$175,000 or 71 percent decrease in preferred stock dividends and discount accretion for the second quarter of 2012, compared to the same quarter of 2011, was primarily the result of a decrease in the dividend rate on preferred stock. The decrease in the dividend rate was caused by the addition of loans above a predetermined baseline portfolio balance that qualified for the U.S. Treasury s Small Business Lending Program. Also, the accretion of discount is no longer applicable in 2012 as a result of the redemption of preferred stock issued under the Treasury s Capital Purchase Program in 2011.

The schedule below presents selected performance metrics for the second quarter of 2012 and 2011.

	Three months ended June 30,					
	2012		2011			
Basic earnings per share	\$ 0.64	\$	0.39			
Diluted earnings per share	\$ 0.63	\$	0.39

Return on average assets	1.07%		0.77%			
Return on average equity	11.43%		9.31%			
Net interest margin (tax equivalent)	3.88%		3.76%			
Net overhead ratio	1.95%		2.15%			
Efficiency ratio	60.88%		66.99%			
Average equity to average assets	9.38%		8.32%			

A more detailed analysis of the factors and trends affecting corporate earnings follows.

#### **Table of Contents**

#### INCOME STATEMENT ANALYSIS

#### Net interest income

Net interest income for the three-month period ended June 30, 2012, was \$9,052,000, an increase of \$916,000 or 11 percent above the second quarter of 2011. The increase was primarily the result of an increase in the average volume of interest earning assets and a decrease in the average rate paid on deposits. Net interest income (tax equivalent basis) as a percentage of interest earning assets, i.e., net interest margin, was 3.88 percent for the second quarter of 2012, compared to 3.76 percent for the second quarter of 2011.

The \$429,000 or 4 percent increase in total interest income for the current quarter, compared to the second quarter of 2011 was due primarily to an increase in the average volume of interest earning assets. Interest earning assets averaged \$974 million and yielded 4.97 percent (tax equivalent basis) for the current quarter, compared to \$907 million and 5.14 percent, respectively, for the second quarter of 2011. The \$67 million or 7 percent increase in the average volume of interest earning assets, which more than offset the decrease in the average yield, was due primarily to an increase in commercial loans.

The \$487,000 or 16 percent decrease in total interest expense for the current quarter, compared to the second quarter of 2011 resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. Total interest bearing liabilities averaged \$850 million at an average rate of 1.25 percent for the current quarter, compared to \$809 million and 1.55 percent, respectively, for the second quarter of 2011. The \$41 million or 5 percent increase in the average volume of interest bearing liabilities reflected growth in core deposits, principally money market deposits. Additionally, the average volume of noninterest bearing demand deposits increased \$12 million or 17 percent for the current quarter, compared to the second quarter of 2011. The Corporation defines core deposits as all deposits except certificates of deposit.

Changes which are due to both volume and rate are allocated in proportion to their relationship to the amount of change attributed directly to volume or rate.

# Provision for loan losses

For the three-month period ended June 30, 2012, the provision for loan losses was \$250,000, compared to \$550,000 for the same period of 2011. The \$300,000 decrease in the provision for loan losses reflected improved credit quality and a lesser need for provisions to maintain the adequacy of the allowance for loan losses. Information about loan quality is provided in the Nonperforming Assets section of this report on page 49.

### Table of Contents

#### Noninterest income

The following table presents the components of total noninterest income for the second quarter of 2012, compared to the second quarter of 2011.

Table 3 - Noninterest income

		Three mo	nths ei e 30,	Change Increase (Decrease)			
(dollars in thousands)		2012		2011		\$	%
Trust and investment services fees	\$	405	\$	383	\$	22	6%
Income from mutual fund, annuity and insurance sales		243		241		2	1
Service charges on deposit accounts		633		676		(43)	(6)
Income from bank owned life insurance		174		160		14	9
Other income		170		159		11	7
Net gain on sales of loans held for sale		281		120		161	134
Total noninterest income	\$	1,906	\$	1,739	\$	167	10%

The discussion that follows addresses changes in selected categories of noninterest income.

*Service charges on deposit accounts* The \$43,000 or 6 percent decrease in service charge income was due primarily to a decrease in overdraft fees. Overdraft fee income on consumer accounts enrolled in PeoplesBank s automated overdraft payment program, which is a significant component of service charges, decreased in response to the implementation of FDIC pricing restrictions that took effect July 1, 2011.

*Net gain on sales of loans held for sale* The \$161,000 or 134 percent increase in gains from the sale of loans was due primarily to an increase in the volume of residential mortgage loan sales. Market interest rates decreased to record levels during the current period, leading to an increase in residential mortgage loan refinancings.

#### **Table of Contents**

#### Noninterest expense

The following table presents the components of total noninterest expense for the second quarter of 2012, compared to the second quarter of 2011.

Table 4 - Noninterest expense

		Three mor	Change Increase (Decrease)				
(dollars in thousands)		2012	20	11		\$	%
Personnel	\$	3,761	\$	3,433	\$	328	10%
Occupancy of premises, net		504		487		17	3
Furniture and equipment		461		422		39	9
Postage, stationery and supplies		134		129		5	4
Professional and legal		150		173		(23)	(13)

FDIC insurance		189		218		(29)	(13)
Debit card processing		178		165		13	8
Charitable donations		34		8		26	325
Telephone		135		120		15	13
External data processing		142		110		32	29
Foreclosed real estate including (gains) losses on sales		211		606		(395)	(65)
Impaired loan carrying costs		185		160		25	16
Other		671		668		3	0
Total noninterest expense	\$	6,952	\$	6,932	\$	20	0%

The discussion that follows addresses changes in selected categories of noninterest expense.

**Personnel** The \$328,000 or 10 percent increase in personnel expense was due to normal business growth, which included the impact of franchise expansion in September 2011, and the accrual of annual performance incentives.

Marketing and advertising The \$36,000 or 15 percent decrease in marketing and advertising expense reflects the timing of expenditures.

**FDIC insurance** The \$29,000 or 13 percent decrease in FDIC insurance premiums was primarily the result of a decrease in the assessment rate, which reflected PeoplesBank s improved financial performance.

*Foreclosed real estate including (gains) losses on sales* The \$395,000 or 65 percent decrease in foreclosed real estate costs reflected the recognition of rental income, which commenced in August 2011, from a real estate project. One-time preleasing and other expenses associated with this project elevated costs in 2011.

#### **Income taxes**

The provision for income tax for the second quarter of 2012 was \$977,000, compared to a provision of \$521,000 for the second quarter of 2011. The increase in income taxes was primarily the result of a 57 percent increase in income before income taxes. For both periods, the Corporation s statutory federal income tax rate was 34 percent. The Corporation s effective income tax rate was 26 percent for the second quarter of 2012, compared to approximately 22 percent for the second quarter of 2011. The effective tax rate differs from the statutory tax rate due to the impact of low-income housing credits and tax-exempt income, including income from bank owned life insurance.

#### **Table of Contents**

#### Preferred stock dividends and discount accretion

Preferred stock dividends for the second quarter of 2012 were \$71,000, compared to \$246,000 for the second quarter of 2012. The \$175,000 or 71 percent decrease was a result of a decrease in the dividend rate on preferred stock caused by the addition of loans above a predetermined baseline portfolio balance that qualified for the U.S. Treasury s Small Business Lending Program. Also, the accretion of discount is no longer applicable in 2012 as a result of last year s redemption of preferred stock issued under the Treasury s Capital Purchase Program. Information about U.S. Treasury capital programs is provided in Note 10 of this report.

Six months ended June 30, 2012, compared to six months ended June 30, 2011

#### FINANCIAL HIGHLIGHTS

The Corporation earned net income available to common shareholders (earnings) totaling \$4,810,000 or \$1.14 per share basic, \$1.13 per share diluted, for the six month period ended June 30, 2012, compared to \$2,892,000 or \$0.70 per share basic, \$0.69 per share diluted, for the same period of 2011. The \$1,918,000 or 66 percent increase in earnings was the result of an increase in net interest income, a decrease in the provision for loan losses, an increase in noninterest income and a decrease in preferred stock dividends, which more than offset increases in total noninterest expense and the provision for income taxes.

The \$1,854,000 or 12 percent increase in net interest income for the first six months of 2012, compared to the same period of 2011, resulted primarily from a larger volume of earning assets, principally commercial loans, and a decrease in funding costs. The decrease in funding costs resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates.

The \$725,000 or 59 percent decrease in the provision for loan losses for the first six months of 2012, compared to the same period of 2011, reflected improved credit quality and a lesser need for provisions to maintain the adequacy of the allowance for loan losses.

The \$243,000 or 7 percent increase in noninterest income for the first six months of 2012, compared to the same period of 2011, resulted primarily from an increase in income from the sale of residential mortgage loans. Market interest rates decreased to record levels during the current period, leading to an increase in residential mortgage loan refinancings.

The \$232,000 or 47 percent decrease in preferred stock dividends for the first six months of 2012, compared to the same period of 2011, was the result of a decrease in the dividend rate on preferred stock caused by the addition of loans above a predetermined baseline portfolio balance that qualified for the U.S. Treasury s Small Business Lending Program. Also, the accretion of discount is no longer applicable in 2012 as a result of last year s redemption of preferred stock issued under the Treasury s Capital Purchase Program.

The \$252,000 or 2 percent increase in noninterest expense for the first six months of 2012, compared to the same period of 2011, was due primarily to an increase in personnel expense, which reflected normal business growth, including the impact of franchise expansion in the prior year. The \$884,000 or 108 percent increase in the provision for income taxes for the first six months of 2012, compared to the same period of 2011, was primarily the result of a 61 percent increase in the level of income before income taxes.

On June 30, 2012, total assets were approximately \$1,045,000, representing a \$67,000,000 or 7 percent increase above June 30, 2011. Compared to one year ago, asset growth occurred primarily in the commercial loan portfolio and was funded primarily by an increase in core deposits.

#### **Table of Contents**

The schedule below presents selected performance metrics for year-to-date June 2012 and 2011.

	Six months ended June 30,				
	2012		2011		
Basic earnings per share	\$ 1.14	\$	0.70		
Diluted earnings per share	\$ 1.13	\$	0.69		
Cash dividend payout ratio	15.7%		24.3%		
Return on average assets	0.99%		0.70%		
Return on average equity	10.53%		8.56%		
Net interest margin (tax equivalent)	3.87%		3.71%		
Net overhead ratio	2.06%		2.17%		
Efficiency ratio	63.58%		68.53%		
Average equity to average assets	9.40%		8.22%		

A more detailed analysis of the factors and trends affecting corporate earnings follows.

#### INCOME STATEMENT ANALYSIS

#### Net interest income

Net interest income for the six-month period ended June 30, 2012, was \$17,754,000, an increase of \$1,854,000 or 12 percent above the same period of 2011. The increase was primarily the result of an increase in the average volume of interest earning assets and a decrease in the average rate paid on deposits. Net interest income (tax equivalent basis) as a percentage of interest earning assets, i.e., net interest margin, was 3.87 percent for the first six months of 2012, compared to 3.71 percent for the first six months of 2011.

The \$915,000 or 4 percent increase in total interest income for the first six months of 2012, compared to the same period of 2011, was due primarily to an increase in the average volume of interest earning assets. Interest earning assets averaged \$960 million and yielded 4.98 percent (tax equivalent basis) for the current period, compared to \$904 million and 5.11 percent, respectively, for the first half of 2011. The \$56 million or 6 percent increase in the average volume of interest earning assets, which more than offset the decrease in the average yield, was due primarily to an increase in commercial loans.

The \$939,000 or 15 percent decrease in total interest expense for the first six months of 2012, compared to the same period of 2011, resulted from a larger proportion of low cost core deposits to total deposits and lower rates generally paid on all deposit products, which reflected unusually low market interest rates. Total interest bearing liabilities averaged \$843 million at an average rate of 1.27 percent for the current period, compared to \$808 million and 1.56 percent, respectively, for the first half of 2011. The \$35 million or 4 percent increase in the average volume of interest bearing liabilities reflected growth in core deposits, principally money market deposits. Additionally, the average volume of noninterest bearing demand deposits increased by \$10 million or 15 percent for the current period, compared to the first half of 2011. The Corporation defines core deposits as all deposits except certificates of deposit.

Changes which are due to both volume and rate are allocated in proportion to their relationship to the amount of change attributed directly to volume or rate.

### Provision for loan losses

For the six-month period ended June 30, 2012, the provision for loan losses was \$500,000, compared to \$1,225,000 for the same period of 2011. The \$725,000 decrease in the provision for loan losses reflected improved credit quality and a lesser need for provisions to maintain the adequacy of the allowance for loan losses. Information about loan quality is provided in the Nonperforming Assets section of this report on page 49

#### **Table of Contents**

#### Noninterest income

The following table presents the components of total noninterest income for the first six months of 2012, compared to the first six months of 2011.

Table 7 - Noninterest income

	Six months ended June 30,			Change Increase (Decrease)		
(dollars in thousands)		2012 2011		\$	%	
Trust and investment services fees	\$	813	\$	740	\$ 73	10%
Income from mutual fund, annuity and insurance sales		431		583	(152)	(26)
Service charges on deposit accounts		1,244		1,277	(33)	(3)
Income from bank owned life insurance		330		325	5	2
Other income		332		300	32	11
Net gain on sales of loans held for sale		540		296	244	82
Net gain (loss) on sales of securities		49		(25)	74	296
Total noninterest income	\$	3,739	\$	3,496	\$ 243	7%

The discussion that follows addresses changes in selected categories of noninterest income.

*Trust and investment services fees* The \$73,000 or 10 percent increase in income from trust and investment services fees was due to appreciation in market value of managed accounts, upon which some fees are based, and growth in traditional trust business.

*Income from mutual fund, annuity and insurance sales* The \$152,000 or 26 percent decrease in income from the sale of mutual funds, annuities and insurance products by Codorus Valley Financial Advisors (CVFA), a subsidiary of PeoplesBank, was a result of the resignation of four financial advisors who left CVFA in February 2011.

Service charges on deposit accounts The \$33,000 or 3 percent decrease in service charge income was due primarily to a decrease in overdraft fees. Overdraft fee income on consumer accounts enrolled in PeoplesBank s automated overdraft payment program, which is a significant component of service charges, decreased in response to the implementation of FDIC pricing restrictions that took effect July 1, 2011.

Price restrictions imposed by the federal government under the Durbin Interchange Amendment may significantly reduce debit card revenue (i.e., interchange fees) for PeoplesBank in future periods. While the legislation targeted larger banks with total assets of \$10 billion on more, market forces in the future may not make a distinction between large and small banks.

**Other income** The \$32,000 or 11 percent increase in other income was due primarily to an increase in fees from loan settlement services provided by SYC Settlement Services, Inc., a subsidiary of PeoplesBank, which resulted from an increase in the refinancing of residential mortgage loans.

*Net gain on sales of loans held for sale* The \$244,000 or 82 percent increase in gains from the sale of loans was due primarily to an increase in the volume of residential mortgage loan sales. Market interest rates decreased to record levels during the current period, leading to an increase in residential mortgage loan refinancings.

#### **Table of Contents**

*Net gain (loss) on sales of securities* During the current period, approximately \$8 million of U.S. agency mortgage-backed bonds that were prepaying principal faster than anticipated were sold at a \$49,000 gain. Sale proceeds were reinvested in agency mortgage-backed bonds with higher yields and lower coupon rates to reduce future prepayments and premium amortization. The prior period included a \$25,000 net loss from the sale of municipal bonds that no longer met the Corporation s investment criteria.

### Noninterest expense

The following table presents the components of total noninterest expense for the first six months of 2012, compared to the first six months of 2011.

Table 8 - Noninterest expense

	Six months ended June 30,			Change Increase (Decrease)			
(dollars in thousands)		2012		2011	\$	%	
Personnel	\$	7,439	\$	6,964	\$ 475	7%	
Occupancy of premises, net		1,012		984	28	3	
Furniture and equipment		924		871	53	6	
Postage, stationery and supplies		268		269	(1)	0	
Professional and legal		309		275	34	12	
Marketing and advertising		407		383	24	6	
FDIC insurance		408		562	(154)	(27)	
Debit card processing		355		319	36	11	
Charitable donations		481		235	246	105	
Telephone		267		255	12	5	
External data processing		270		229	41	18	
Foreclosed real estate including (gains) losses on sales		804		1,091	(287)	(26)	
Impaired loan carrying costs		230		426	(196)	(46)	
Other		1,048		1,107	(59)	(5)	
Total noninterest expense	\$	14,222	\$	13,970	\$ 252	2%	

The discussion that follows addresses changes in selected categories of noninterest expense.

**Personnel** The \$475,000 or 7 percent increase in personnel expense was due to normal business growth, which included the impact of franchise expansion in September 2011, and the accrual of annual performance incentives.

**Professional and legal** The \$34,000 or 12 percent increase in professional and legal expense was due primarily to an increase in consulting expense regarding corporate strategy.

*Marketing and advertising* The \$24,000 or 6 percent increase in marketing and advertising expense reflects an increased operating budget to support normal business growth and increased corporate initiatives such as branding, product advertising and internal promotions.

**FDIC** insurance The \$154,000 or 27 percent decrease in FDIC insurance premiums was partially the result of a change by the FDIC in its assessment methodology in the prior year. Effective April 1, 2011, the FDIC lowered assessment rates and applied them against average assets minus average tangible capital, instead of domestic deposits. A decrease in the assessment rate, which reflected PeoplesBank s improved financial performance also contributed to the decrease in the cost of FDIC insurance.

#### **Table of Contents**

**Debit card processing** The \$36,000 or 11 percent increase in debit card processing expense was primarily the result of increases in the number of new accounts and transaction volume.

*Charitable donations* The \$246,000 or 105 percent increase in charitable donations was due to an increase in donations that qualify for state tax credits, which lower Pennsylvania Shares Tax expense, included below under other expenses.

Foreclosed real estate including (gains) losses on sales The \$287,000 or 26 percent decrease in foreclosed real estate costs reflected the recognition of rental income, which commenced in August 2011, from a real estate project, which more than offset the increase in the provision for real estate losses. One-time preleasing and other expenses associated with this project elevated costs in 2011.

Impaired loan carrying costs The \$196,000 or 46 percent decrease in carrying costs reflects, in part, an unusually large level of legal expense recognized in 2011 for a particular impaired loan. The prolonged weakness in economic and business conditions may cause fluctuations in impaired loan carrying costs. Factors such as the number and size of the loans in the impaired loan portfolio, financial capacity of the borrower or guarantor, value and liquidity of the underlying collateral and the timing of when and how long loans are classified as impaired, among other factors, contribute to the variability of this expense from period to period. Typical carrying costs include insurance, maintenance and repairs, real estate taxes, appraisals and legal fees.

*Other* The \$59,000 or 5 percent decrease in other expense, which is comprised of many underlying expenses, was due primarily to a \$131,000 decrease in Pennsylvania Shares Tax expense. The decrease in Shares Tax expense resulted from an increase in the level of state tax credits that originated from the increase in charitable donations that qualified for these credits as described above.

#### **Income taxes**

The provision for income tax for the first six months of 2012 was \$1,702,000, compared to a provision of \$818,000 for the first six months of 2011. The \$884,000 or 108 percent increase in income taxes was primarily the result of a 61 percent increase in income before income taxes. For both periods, the Corporation s statutory federal income tax rate was 34 percent. The Corporation s effective income tax rate was 25 percent for the first six months of 2012, compared to approximately 19 percent for the first six months of 2011. The effective tax rate differs from the statutory tax rate due to the impact of low-income housing credits and tax-exempt income, including income from bank owned life insurance.

#### Preferred stock dividends and discount accretion

Preferred stock dividends for the first six months of 2012 were \$259,000, compared to \$491,000 for the same period of 2011. The \$232,000 or 47 percent decrease was a result of a decrease in the dividend rate on preferred stock caused by the addition of loans above a predetermined baseline portfolio balance that qualified for the U.S. Treasury s Small Business Lending Program. Also, the accretion of discount is no longer applicable in 2012 as a result of last year s redemption of preferred stock issued under the Treasury s Capital Purchase Program. Information about U.S. Treasury capital programs is provided in Note 10 of this report.

#### **Table of Contents**

#### BALANCE SHEET REVIEW

### Interest bearing deposits with banks

Overnight investments, comprised of interest bearing deposits with banks and federal funds sold, totaled approximately \$42 million on June 30, 2012, compared to \$20 million on December 31, 2011. The level of overnight investment at June 30, 2012, increased as funds from deposit growth temporarily outpaced the deployment of funds into loans and investment securities.

#### Securities available-for-sale

At June 30, 2012, the fair value of securities available-for-sale totaled \$235 million, which was comparable to the \$234 million value at December 31, 2011.

#### Loans

On June 30, 2012, total loans, net of deferred fees, totaled \$706 million, which was \$13 million or 2 percent higher than the year-end 2011 level due to an increase in commercial loans. The composition of the Corporation s loan portfolio at June 30, 2012, compared to December 31, 2011, is provided in Note 5 Loans.

#### **Deposits**

On June 30, 2012, deposits totaled \$878 million, which was \$24 million or 3 percent higher than the year-end 2011 level. The increase in total deposits occurred primarily within the demand, savings and money market categories while total time deposits increased slightly at 0.7 percent. The composition of the Corporation s deposit portfolio at June 30, 2012, is provided in Note 7 Deposits.

#### Long-term debt

On June 30, 2012, long-term debt totaled \$36 million, which was \$10 million or 22 percent below the year-end 2011 level. The decrease was primarily the result of a Federal Home Loan Bank of Pittsburgh advance that matured and was not refinanced. A listing of outstanding long-term debt obligations is provided in Note 8 Long-term Debt.

In June 2012, the Corporation restructured (i.e., extended) two outstanding \$5 million FHLB advances (\$10 million total) to lock in low rates as a hedge against the possibility of rising market interest rates in the future. This transaction resulted in a \$235,000 prepayment penalty that has been deferred and embedded in the rates on the restructured advances where it will be recognized as interest expense over their respective repayment terms. The \$5 million FHLB advance originally maturing December 2013 with a fixed rate of interest of 2.39 percent was extended to June 2019 with a fixed rate of interest of 2.10 percent. The \$5 million FHLB advance originally maturing July 2014 with a fixed rate of interest of 1.38 percent was extended to June 2018 with a fixed rate of interest of 1.87 percent. The impact of the debt restructure on current period earnings is immaterial.

### Shareholders equity and capital adequacy

Shareholders equity, or capital, enables Codorus Valley to maintain asset growth and absorb losses. Total shareholders equity was approximately \$98 million on June 30, 2012, an increase of approximately \$5 million or 5 percent, compared to the level at December 31, 2011. The increase was primarily the result of an increase in retained earnings from profitable operations.

#### **Table of Contents**

### Dividends on preferred stock

As previously disclosed, the Corporation participates in the U.S. Department of the Treasury s (Treasury) Small Business Lending Fund Program (SBLF). Under this program, the Corporation issued \$25 million, or 25,000 shares of non-cumulative, perpetual preferred stock, Series B, \$1,000 liquidation value, \$2.50 par value to the Treasury. The SBLF preferred stock qualifies as Tier 1 regulatory capital and requires the payment of non-cumulative cash dividends quarterly on each January 1, April 1, July 1 and October 1. The dividend rate was initially set at 5 percent, but can vary from 1 percent to 5 percent on a quarterly basis for a period of time to reflect the amount of change in qualified small business lending compared to a baseline amount. For the quarter ended June 30, 2012, accrued dividends totaled \$71,000, which equated to an annualized dividend rate of approximately 1.14 percent. Comparatively, for the quarter ended March 31, 2012, accrued dividends totaled \$188,000, which equated to an annualized dividend rate of approximately 3.01 percent.

#### Dividends on common stock

The Corporation typically pays cash dividends on a quarterly basis. The Board of Directors determines the dividend rate after considering the Corporation s capital requirements, current and projected net income, and other factors. On July 10, 2012, the Board of Directors declared a quarterly cash dividend of \$0.11 per common share payable on August 14, 2012, to shareholders of record at the close of business on July 24, 2012. This dividend represents an increase of \$0.02 or 22 percent above the \$0.09 per share cash dividend paid in May and February.

### Capital adequacy

Codorus Valley and PeoplesBank are subject to various regulatory capital requirements administered by banking regulators that involve quantitative guidelines and qualitative judgments. Quantitative measures established by regulators pertain to minimum capital ratios, as set forth in Note 9 Regulatory Matters, to the financial statements. We believe that Codorus Valley and PeoplesBank were well capitalized on June 30, 2012, based on regulatory capital guidelines.

On June 18, 2012, the federal regulatory agencies jointly issued a Notice of Proposed Rulemaking that would revise the general risk-based capital rules to incorporate certain revisions by the Basel Committee on Banking Supervision to the Basel capital framework (i.e., Basel III). Generally, the proposed rule revises the definition of regulatory capital components and related calculations, adds a new common equity tier 1 capital ratio, implements a new capital conservation buffer, increases the risk weighting for residential mortgages and past due loans, and provides a transition period for several aspects of the proposed rule. The proposed rule would become effective on January 1, 2013, with full implementation on January 1, 2019. The new rule is applicable to all financial institutions, which has caused controversy as to whether or not it should be scaled based on an institution s size and complexity. There is also concern that the rule could adversely affect the lending capacity of community banks by requiring higher capital levels. The review and comment period on the proposal is scheduled to end in September 2012. The Corporation plans to monitor the Basel III capital rule to ensure compliance, once finalized.

#### RISK MANAGEMENT

#### Credit risk management

The Credit Risk Management section included in our 2011 Form 10-K provides a general overview of the Corporation s credit risk management process and loan concentrations. Credit risk represents the possibility that a loan client, counterparty or issuer may not perform in accordance with contractual terms, posing one of the most significant risks to the Corporation.

#### **Table of Contents**

#### Nonperforming assets

The following table presents asset categories posing the greatest risk of loss and related ratios. We generally place a loan on nonaccrual status and cease accruing interest income, i.e., recognize interest income on a cash basis as long as the loan is sufficiently collateralized, when loan payment performance is unsatisfactory and the loan is past due 90 days or more. Loans past due 90 days or more and still accruing interest represent loans that are contractually past due, but are well collateralized and in the process of collection. Foreclosed real estate represents real estate acquired to satisfy debts owed to PeoplesBank. The final category, troubled debt restructurings, pertains to loans whose terms have been modified to include a concession that we would not ordinarily consider due to the debtor s financial difficulties. Concessions granted under a troubled debt restructuring typically involve a reduction of interest rate lower than the current market rate for new debt with similar risk, the deferral of payments or extension of the stated maturity date. Troubled debt restructurings are evaluated for impairment if they have been restructured during the most recent calendar year, or if they cease to perform in accordance with the modified terms. The paragraphs below explain significant changes in the aforementioned categories as of June 30, 2012, compared to December 31, 2011.

An internal asset quality control committee meets monthly to review and manage nonperforming assets. Collection activity on these accounts is closely monitored and managed by in-house counsel. We generally rely on appraisals performed by independent licensed appraisers to determine the value of collateral for impaired collateral-dependent loans. Generally, an appraisal is performed when: an account reaches 60 days past due, unless a certified appraisal was completed within the past six months; market values have changed significantly; the condition of the property has changed significantly; or the existing appraisal is outdated. In instances where the value of the collateral net of costs to sell is less than the net carrying amount for impaired commercial related loans, a specific loss allowance is established for the difference by recording a loss provision to the income statement. When it is probable that some portion or an entire loan balance will not be collected, that amount is charged off as loss against the allowance.

Table 9-Nonperforming Assets

(dollars in thousands)	June 30, 2012		December 31, 2011		
Nonaccrual loans	\$	8,459	\$	5,931	
Nonaccrual loans, troubled debt restructurings		2,421		5,770	
Total nonperforming loans		10,880		11,701	
Foreclosed real estate, net of allowance		12,685		16,243	
Total nonperforming assets	\$	23,565	\$	27,944	
Accruing troubled debt restructurings	\$	3,270	\$	3,272	
Total period-end loans, net of deferred fees	\$	706,244	\$	693,515	
Allowance for loan losses (ALL)	\$	8,690	\$	8,702	
ALL as a % of total period-end loans		1.23%		1.25%	
Annualized net charge-offs as a % of average total loans		0.15%		0.58%	
ALL as a % of nonperforming loans		79.88%		74.38%	
Nonperforming loans as a % of total period-end loans		1.54%		1.69%	
Nonperforming assets as a % of total period-end loans and net foreclosed real estate		3.28%		3.94%	
Nonperforming assets as a % of total period-end assets		2.26%		2.76%	
Nonperforming assets as a % of total period-end shareholders equity		24.02%		29.97%	
- 49 -					

#### **Table of Contents**

The level of nonperforming assets was relatively high in comparison to the Corporation s historic levels for both periods primarily as a result of prolonged weakened economic conditions and the corresponding effects it has had on our commercial borrowers.

#### Nonaccrual loans

On June 30, 2012, the nonperforming loan portfolio balance totaled \$10,880,000 and was comprised primarily of collateralized commercial loans. Comparatively, nonperforming loans totaled \$11,701,000 at year-end 2011. During the quarter ended June 30, 2012, a nonaccrual troubled debt restructured loan totaling \$3,557,000 paid off in full. During the quarter ended March 31, 2012, a commercial loan totaling \$3,424,000 was reclassified to nonaccrual status described below as loan no. 1. On June 30, 2012, the nonaccrual loan portfolio was comprised of nineteen unrelated loan relationships with outstanding principal balances ranging in size from \$14,000 to \$3,424,000. Four unrelated commercial relationships, which represent 71 percent of the total nonaccrual loan portfolio balance, are described below.

We evaluate the adequacy of the allowance for loan losses at least quarterly and have established a loss allowance for selected loan relationships where the net realizable value of the collateral is insufficient to repay the loan. In this regard, allowances, if applicable, are noted below within the description of the loan. Collection efforts, including modification of contractual terms for individual accounts based on prevailing market conditions and liquidation of collateral assets, are being employed to maximize recovery. Further provisions for loan losses may be required for nonaccrual loans as additional information becomes available or conditions change or as required by bank regulators. A loan is returned to interest accruing status when we determine that circumstances have improved to the extent that all of the principal and interest amounts contractually due are current for at least six consecutive payments and future payments are reasonably assured.

Loan no. 1 At June 30, 2012, the outstanding principal balance of the loan relationship was \$3,424,000, for a municipal development project. Repayment is expected from an approved and in good-standing Pennsylvania state grant, which disburses funds periodically as project progress requirements are met.

Loan no. 2 At June 30, 2012, the outstanding principal balance of the loan relationship was \$2,138,000, collateralized by commercial rental properties whose rent is assigned to PeoplesBank. Based on a recent appraisal of the primary real estate collateralizing the relationship, we believe that the loans are adequately collateralized. The borrower is presently operating under a troubled debt restructuring agreement.

Loan no. 3 At June 30, 2012, the outstanding principal balance of the loan relationship was \$1,281,000, which represents three commercial loans guaranteed from 70% to 80%, depending upon the specific loan, by the U.S. Department of Agriculture. A \$120,000 allowance for loan losses was established for this relationship. Several parcels of improved real estate provide collateral for the loans. The Bank is working through the process to liquidate the real estate.

Loan no. 4 PeoplesBank owns a 62.5 percent participation interest in this loan relationship. The carrying value of the Bank s principal at June 30, 2012, was \$859,000, which reflects a payment totaling \$1,634,000 from the sale of collateral during January 2012. The Bank is pursuing its legal options against parties to the original loan agreement. As previously disclosed, PeoplesBank charged-off \$2,275,000 as a loss in September 2011 due to deterioration in the value of the collateral.

### Foreclosed real estate

On June 30, 2012, foreclosed real estate, net of allowance, totaled \$12,685,000, compared to \$16,243,000 at December 31, 2011. The \$3,558,000 or 22 percent decrease was due primarily to the sale of real estate and secondarily to an increase in the allowance for real estate losses for selected properties. On June 30, 2012, the portfolio was comprised of six unrelated accounts ranging in size from \$157,000 to \$7,338,000, which we are actively attempting to liquidate, with the exception of property no. 3 below. If a valuation allowance for probable loss was established for a particular property it is so noted in the property description below. Further valuation allowances may be required on any foreclosed property as additional information becomes available or conditions change. Foreclosed real estate is included in the other assets category on the Corporation s balance sheet. Five unrelated foreclosed real estate properties, which represent the majority of the foreclosed real estate portfolio balance, are described below.

#### **Table of Contents**

Property no. 1 The carrying amount of this office building property at June 30, 2012 was \$7,338,000, which is net of a \$899,000 allowance for probable loss based on an independent appraisal less estimated selling costs and other adjustments. A reputable tenant took occupancy in 2011 and leased the majority of the building. Approximately \$1,075,000 of rental income was recorded for the first six months of 2012 while ongoing operating and other miscellaneous expenses totaled approximately \$566,000. Impairment losses totaling \$496,000 were also recognized for the current six month period. On July 19, 2012, the property was sold for cash and the Corporation realized a \$159,000 loss on the sale, which was above the valuation allowance.

Property no. 2 The carrying amount of this property at June 30, 2012 was \$2,115,000, which is net of a \$600,000 allowance for probable loss. During the second quarter of 2012 a \$308,000 impairment loss and corresponding increase in the allowance were recognized pending the results of an independent appraisal of the property ordered in July. This account is collateralized by 135 approved residential building lots. Of this total, 28 lots are improved and under contract with a local builder for takedown by June 30, 2012. As of June 30, 2012, no lots have been sold. Management is evaluating its disposition options.

Property no. 3 The carrying amount of this property at June 30, 2012 was \$1,704,000, which is net of a \$1,594,000 allowance for probable loss based on an independent appraisal less estimated selling costs. This account is collateralized by 266 acres of unimproved land that is zoned for residential development. Based on information obtained in the current period, plans to obtain a formal development plan were suspended with the intent to temporarily retain the property and investigate other development, disposition or income generating options at some future date. As a result, an impairment loss of approximately \$320,000 and a corresponding increase to the allowance was recognized for this property in the first quarter of 2012.

Property no. 4 The carrying amount of this property at June 30, 2012 was \$780,000, which represents the value of the borrower s personal residence presently listed for sale. In February 2012, the sale of unimproved land was completed and the Corporation received net proceeds totaling \$837,000.

Property no. 5 PeoplesBank has a 64 percent interest in 42 improved lots within a 20.6 acre established residential subdivision, which represents the original collateral. The carrying value of PeoplesBank s interest at June 30, 2012 was \$591,000, which is net of a \$100,000 allowance for probable loss. During June 2010, a purchase agreement was executed which permitted the buyer to develop and sell the lots over a two-year period. Since inception through June 30, 2012, 23 lots have been sold.

### Allowance for loan losses

Although the Corporation maintains sound credit policies, certain loans deteriorate and must be charged off as losses. The allowance for loan losses is maintained to absorb losses inherent in the portfolio. The allowance is increased by provisions charged to expense and is reduced by loan charge-offs, net of recoveries. The allowance is based upon management s continuous evaluation of the loan portfolio coupled with a formal review of adequacy on a quarterly basis, which is subject to review and approval by the Board.

The allowance for loan losses consists primarily of three components: specific allowances for individually impaired commercial loans; allowances calculated for pools of loans; and an unallocated component, which reflects the margin of imprecision inherent in the assumptions that underlie the evaluation of the adequacy of the allowance. The Corporation uses an internal risk rating system to evaluate individual loans. Loans are segmented into industry groups or pools with similar characteristics, and an allowance for loan losses is allocated to each segment based on quantitative factors such as recent loss history (two-year rolling average of net charge-offs) and qualitative factors, such as the results of internal and external credit reviews, changes in the size and composition of the loan portfolio, adequacy of collateral, general economic conditions and the local business outlook. Determining the level of the allowance for probable loan losses at any given period is difficult, particularly during deteriorating or uncertain economic periods. We must make estimates using assumptions and information which are often subjective and fluid. There is also the potential for adjustment to the allowance as a result of regulatory examinations.

#### **Table of Contents**

The following table presents an analysis of the activity in the allowance for loan losses for the six months ended June 30, 2012 and 2011. The allowance was \$8,690,000 or 1.23 percent of total loans on June 30, 2012, compared to \$8,351,000 or 1.23 percent, on June 30, 2011. During the most recent six-month period, net charge-offs totaled \$512,000, which was comparable to the \$500,000 for the first six months of 2011. The annualized net charge-off ratio was low at 0.15 percent for both periods. However, the risks and uncertainties associated with prolonged weakness in economic and business conditions, a relatively high level of unemployment and erosion of real estate values, which adversely affect our borrowers ability to service their loans, can cause significant fluctuations in the level of charge-offs and provision expense from one period to another. Based on a comprehensive analysis of the loan portfolio, we believe that the allowance for loan losses was adequate at June 30, 2012.

Table 10 -Analysis of Allowance for Loan Losses

(dollars in thousands)	2012		2011
Balance-January 1,	\$ 8,702	\$	7,626
Provision charged to operating expense	500		1,225
Loans charged off:			
Commercial, financial and agricultural	331		218

Annualized net charge-offs as a % of average total loans	0.15%	o o	0.15%
Allowance for loan losses as a % of nonperforming loans	79.88%	ó	42.32%

#### Liquidity risk management

Maintaining adequate liquidity provides the Corporation with the ability to meet financial obligations to depositors, loan customers, employees, and shareholders on a timely and cost effective basis in the normal course of business. Additionally, it provides funds for growth and business opportunities as they arise. Liquidity is generated from transactions relating to both the Corporation s assets and liabilities. The primary sources of asset liquidity are scheduled investment security maturities and cash inflows, funds received from customer loan payments, and asset sales. The primary sources of liability liquidity are deposit growth, short-term borrowings and long-term debt. The Consolidated Statements of Cash Flows, included in this report, present the changes in cash from operating, investing and financing activities. At June 30, 2012, we believe that liquidity was adequate based upon the \$42 million level of interest bearing deposits with banks, the potential liquidation of unpledged available-for-sale securities with a fair value totaling approximately \$90 million and available credit from the Federal Home Loan Bank of Pittsburgh totaling approximately \$169 million. The Corporation s loan-to-deposit ratio was 80 percent at June 30, 2012, compared to 81 percent for year-end 2011.

### Table of Contents

### Off-balance sheet arrangements

The Corporation s financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist primarily of commitments to grant new loans, unfunded commitments under existing loan facilities, and letters of credit issued under the same standards as on-balance sheet instruments. Unused commitments on June 30, 2012, totaled \$221 million and consisted of \$150 million in unfunded commitments under existing loan facilities, \$54 million to grant new loans and \$17 million in letters of credit. Normally these commitments have fixed expiration dates or termination clauses and are for specific purposes. Accordingly, many of the commitments are expected to expire without being drawn upon and therefore, generally do not present significant liquidity risk to the Corporation or PeoplesBank.

# Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not applicable to smaller reporting companies.

#### **Item 4. Controls and Procedures**

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation s management, including the Corporation s Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation s Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2012, the Corporation s disclosure controls and procedures are effective. The Corporation s disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that information required to be disclosed in the Corporation s reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms. A control system, no matter how well conceived and operated, must reflect the fact that there are resource constraints, that the benefits of controls must be considered relative to their costs, and inherent limitations that may not prevent fraud, particularly by collusion of two or more people or by management override of a control.

There has been no change in the Corporation s internal control over financial reporting that occurred during the quarter ended June 30, 2012, that has materially affected or is reasonably likely to materially affect, the Corporation s internal control over financial reporting.

### Part II OTHER INFORMATION

### Item 1. Legal proceedings

There are no legal proceedings pending against Codorus Valley Bancorp, Inc. or any of its subsidiaries which are expected to have a material impact upon the consolidated financial position and/or operating results of the Corporation other than routine litigation incidental to the business. Management is not aware of any proceedings known or contemplated by government authorities.
