Notes to Consolidated Financial Statements

Note 4. Loans

Flag engages in a full complement of lending activities, including real estate-related, commercial and financial loans and consumer installment loans. Flag generally concentrates lending efforts on real estate related loans. As of March 31, 2004, Flag's loan portfolio consisted of 86.2% real estate-related loans, 10.7% commercial and financial loans, and 3.1% consumer installment loans. While risk of loss is primarily tied to the credit quality of the various borrowers, risk of loss may also increase due to factors beyond Flag's control, such as local, regional and/or national economic downturns. General conditions in the real estate market may also impact the relative risk in the real estate portfolio. Of the target areas of lending activities, commercial and financial loans are generally considered to have a greater risk of loss than real estate loans or consumer installment loans.

Loans are stated at unpaid balances, net of unearned income and deferred loan fees. Balances within the major loans receivable categories are represented in the following table: (in thousands)

	March 31, 2004	December 31, 2003	March 31, 2003
Commercial/financial/agricultural	\$ 50,900	50,435	47,485

	<hr/>	<hr/>	<hr/>

Item 2. Management's Discussion and Analysis of Financial Condition and Operating Results

Comparing Flag's current quarter to the same quarter in 2003 highlights strong growth in net interest income and continued improvement in credit quality ratios. Net interest income grew 14.3% to \$7.1 million during the first quarter of 2004. This improvement over the first quarter of 2003 resulted from 25.9% growth in average loans outstanding as well as a reduction in Flag's cost of funds of 19.3% from 1.97% to 1.59%. Growth in loans outstanding comes as Flag continues to develop a stronger presence in Metro Atlanta and through its Atlanta based lending lines of businesses. Decrease in overall cost of funds resulted from Flag's success in growing demand deposits and placing less funding dependency on time deposits.

Credit quality trends also improved. Non-performing assets as a percentage of total assets decreased to 0.99% at March 31, 2004 compared to 1.72% at March 31, 2003. The allowance for loan losses at March 31, 2004 was 1.48% of total loans outstanding compared to 1.71% at March 31, 2003.

In the first quarter of 2004, Flag completed the sale of its Thomaston, Georgia branch which included approximately \$17 million in loans and \$36 million in deposits. Flag recorded an after tax gain on the sale of the branch of approximately \$1.47 million.

Forward-Looking Statements

The following discussion and comments contain "forward-looking statements" relating to, without limitation, future economic performance, plans and objectives of management for future operations, and projections of revenues and other financial items that are based on the beliefs of our management, as well as assumptions made by and information currently available to our management. The words "expect", "estimate", "anticipate", and "believe", as well as similar expressions, are intended to identify forward-looking statements. Our actual results may differ materially from the results discussed in the forward-looking statements, and our operating performance each quarter is subject to various risks and uncertainties. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to, (i) the strength of the U.S. economy as well as the strength of the local economies in which operations are conducted; (ii) the effects of changing interest rates which could lower margins; (iii) inflation, interest rate, market and monetary fluctuations; (iv) unanticipated regulatory proceedings or legal actions, or changes in accounting policies and practices as adopted by the Financial Accounting Standards Board; (v) issues involved in the integration of acquisitions; and (vi) the timely development of products and services that position Flag to succeed in an increasingly competitive industry. If we are unsuccessful in managing the risks relating to these factors, together with other risks incident to the operation of our business, our financial condition, results of operations and cash flows could be adversely affected. Forward-looking statements speak only as of the date on which they are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made to reflect the occurrence of unanticipated events.

Critical Accounting Policies

The accounting principles we follow and our methods of applying these principles conform with accounting principles generally accepted in the United States and with general practices within the banking industry. In connection with the application of those principles, we have made judgments, estimates and assumptions which, in the case of the determining our allowance for loan losses (ALL), have been critical to the determination of our financial position and results of operations. Management assesses the adequacy of the ALL regularly during the year, and formally prior to the end of each calendar quarter. This assessment includes procedures to estimate the allowance and test the adequacy and appropriateness of the resulting balance.

Edgar Filing: FLAG FINANCIAL CORP - Form 10-Q

This estimation process can affect our estimated loan loss expense for a given period. Generally, the allowance for loan losses increases as the outstanding balance of loans or the level of classified or impaired loans increases. Loans or portions of loans that are deemed uncollectible are charged against and reduce the allowance. The allowance is replenished by means of a provision for loan losses that is charged as an expense against income. As a result, our estimate of the allowance for loan losses affects our earnings directly.

The ALL consists of two portions (1) allocated amounts representing the potential exposures on specifically identified credits and other exposures readily predictable by historical or comparative experience; and (2) an unallocated amount representative of inherent loss which is not readily identifiable. Even though the ALL is composed of two components, the entire ALL is available to absorb any credit losses. Allocated amounts are used on loans where management has determined that there is an increased probability or severity of loss than on the loan portfolio as a whole. We base the allocation for these unique loans primarily on risk rating grades assigned to each of these loans as a result of our loan management and review processes. We then assign each risk-rating grade a loss ratio, which is determined based on the experience of management, discussions with banking regulators and our independent loan review process. We estimate losses on impaired loans based on estimated cash flows discounted at the loan's original effective interest rate or based on the underlying collateral value. To the extent that management does not believe that a certain loan's risk is appropriately represented by the risk rating grades, a specific review of the credit is performed which would result in a less subjective allocation for that particular loan.

Unallocated amounts are particularly subjective and do not lend themselves to exact mathematical calculation. The unallocated amount represents estimated inherent credit losses which may exist, but have not yet been identified, as of the balance sheet date. In estimating the unallocated amount, such matters as changes in the local or national economy, the depth or experience in the lending staff, any concentrations of credit in any particular industry group, and new banking laws or regulations. After we assess applicable factors, we evaluate the aggregate unallocated amount based on our management's experience. We then test the resulting ALL balance by comparing the balance in the ALL to historical trends and peer information. Our management then evaluates the result of the procedures performed, including the result of our testing, and concludes on the appropriateness of the balance of the ALL in its entirety.

The audit committee of our board of directors reviews the assessment prior to the filing of quarterly and annual financial information. In assessing the adequacy of the ALL, we also rely on an ongoing independent loan review process. We undertake this process both to ascertain whether there are loans in the portfolio whose credit quality has weakened over time and to assist in our overall evaluation of the risk characteristics of the entire loan portfolio. Our loan review process includes the judgment of management, the input from our independent loan reviewer, and reviews that may have been conducted by bank regulatory agencies as part of their usual examination process.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview of Financial Condition

Total assets were \$684.8 million at March 31, 2004, a decrease of \$19.0 million or 2.7% from December 31, 2003. Earning assets (consisting of loans, investment securities and short-term investments) totaled \$633.4 million or 92.5% of total assets at March 31, 2004, compared to \$647.5 million or 92.0% of total assets at December 31, 2003. During the same period, stockholders' equity increased \$1.4 million or 2.1% to \$66.6 million at March 31, 2004. During the first quarter of 2004, Flag completed the sale of its Thomaston, Georgia branch, including approximately \$17 million in loans and \$36 million in deposits.

Loans

Gross loans outstanding at March 31, 2004, totaled \$478.0 million, a decrease of \$5.7 million or 1.2% from December 31, 2003. Excluding the effects of approximately \$17 million in loans transferred in the sale of the Thomaston, Georgia branch sale, Flag's loans outstanding increased \$11.3 million or 2.3% during the first quarter. Mortgage loans held-for-sale increased slightly from \$4.2 million at December 31, 2003 to \$5.0 million at March 31, 2004. Loans outstanding, including mortgage loans held-for-sale, comprised 76.3% of earning assets at March 31, 2004, compared to 75.4% at December 31, 2003.

Investment Securities

Investment securities at March 31, 2004, totaled \$135.5 million, a decrease of \$2.0 million or 1.5% from December 31, 2003. Investment securities comprised 21.4% and 21.2% of earning assets at March 31, 2004, and December 31, 2003, respectively.

Federal Funds Sold and Interest Bearing Deposits

Short-term investments (federal funds sold and interest bearing deposits) totaled \$12.3 million at March 31, 2004, a decrease of \$7.0 million from December 31, 2003. Historically, Flag has maintained lower levels of short-term investments, choosing instead to invest more heavily in loans and investment securities. The decrease in short-term investments during the first quarter resulted primarily from the sale of the Thomaston, Georgia branch as well as reliably strong loan demand. Short-term investments amounted to 1.9% of earning assets at March 31, 2004, and 3.0% of earning assets at December 31, 2003.

Premises and Equipment

Premises and equipment at March 31, 2004, totaled \$14.5 million compared to \$16.5 million at December 31, 2003. The primary reason for the decrease in premises and equipment was the sale of approximately \$1.8 million of premises and equipment included in the Thomaston, Georgia branch.

Deposits and Other Funding

Total deposits at March 31, 2004, were \$548.5 million, a decrease of \$22.1 million from December 31, 2003. This decrease is due almost entirely to the sale of the Thomaston, Georgia branch consisting of approximately \$36 million in deposits. Excluding the effect of the branch sale, total deposits increased \$13.9 million or 2.4% during the first quarter.

Federal funds purchased and other borrowings of \$9.4 million at March 31, 2004, represented an increase of \$5.3 million from December 31, 2003. The majority of these borrowings were federal funds purchased under lines with various financial institutions and resulted from the sale of the branch. Flag expects to replace most of this funding during the second quarter with more traditional funding from demand and time deposits.

Advances from the Federal Home Loan Bank

Advances from the Federal Home Loan Bank (FHLB) amounted to \$53 million at March 31, 2004, compared to \$58 million at December 31, 2003.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Liquidity and Market Risk Sensitivity

Liquidity management involves Flag's ability to maintain adequate short-term assets to meet the cash flow expectations of depositors and other lending institutions, and to provide funds for the growth in earning assets. Liquidity is managed daily by understanding the cash flow expectations of depositors and other lending institutions and maintaining enough liquid assets to meet these expectations. As of March 31, 2004, Flag had \$344.9 million of deposits due on demand and \$179.9 million of time deposits and other borrowings due within one year. Potential liquidity needs of these liabilities are met with liquid assets (assets that can be easily converted to cash). Liquid assets at March 31, 2004, totaled \$169.9 million and included cash and due from banks, federal funds sold and interest bearing deposits with other banks, investment securities available-for-sale, other investments and mortgage loans held-for-sale. In addition to using liquid assets to meet potential liquidity needs, Flag maintains available lines of credit with other financial institutions. These include federal funds and other lines of credit totaling \$46 million and a line of credit with the Federal Home Loan Bank totaling \$104.7 million. At March 31, 2004, \$61.3 million of the available \$150.7 million in total lines was advanced to Flag.

Market rate sensitivity is the tendency for changes in the interest rate environment to be reflected in Flag's net interest income and results of operations. Flag seeks to balance maturities and rates on earning assets and the corresponding funding such that interest rate fluctuations have a minimal impact on earnings and the value of Flag's equity.

Historically, the average term to maturity or repricing (rate changes) of assets (primarily loans and investment securities) has exceeded the average repricing period of liabilities (primarily deposits and borrowings). Flag's liabilities over the past year have shifted from mostly time deposits with longer maturities to demand deposits, which reprice daily. This shift in funding results from sales and pricing disciplines that in the long run will prove profitable, but currently shows Flag with more liabilities repricing in the early months of a rate change than do earning assets. This would indicate that Flag's net interest income would be negatively impacted by rising rates. Flag believes, however, that the growing demand deposit base will not reprice upwards to the same degree and intensity as Flag's assets and that there is opportunity for improvement in net interest income should rates begin to rise.

Edgar Filing: FLAG FINANCIAL CORP - Form 10-Q

Management carefully measures and monitors market rate sensitivity and believes that its operating strategies offer protection against interest rate risk. As required by various regulatory authorities, Flag's Board of Directors established an interest rate risk policy, which sets specific limits on interest rate risk exposure. Adherence to this policy is reviewed by Flag's executive committee and presented at least annually to the Board of Directors.

Capital

At March 31, 2004, the capital ratios of Flag and Flag Bank (the Bank) were adequate compared to the minimum regulatory capital requirements. Minimum regulatory capital levels for banks and holding companies require Tier one capital (core capital accounts less intangible assets) to risk-weighted assets of at least 4%, total capital (tier one capital plus a portion of the allowance for loan losses) to risk-weighted assets of 8%, and tier one capital to average assets of at least 4%. The following table reflects Flag's capital position with respect to the regulatory minimums as of March 31, 2004:

	Actual		Required		Excess	
	Amount	%	Amount	%	Amount	%
Total Capital (to Risk Weighted Assets)	\$ 59,507	11.15%	55,520	8.00%	3,987	3.15%
Tier 1 Capital (to Risk Weighted Assets)	\$ 52,820	9.89%	27,760	4.00%	25,060	5.89%
Tier 1 Capital (to Average Assets)	\$ 52,820	7.61%	21,355	4.00%	31,465	3.61%

Management's Discussion and Analysis of Financial Condition and Results of Operations

Non-Performing Assets

Non-performing assets (nonaccrual loans, loans over 90 days past due and still accruing, real estate owned and repossessions) totaled approximately \$6.8 million at March 31, 2004, compared to \$7.4 million at December 31, 2003. These levels as a percentage of total assets represented 0.99% and 1.06% respectively.

Flag continues to work non-performing loans diligently through its loan review function that continually monitors internal loan trends as well as economic trends that are thought to have a potentially positive or negative impact on credit quality. The loan review function also monitors selected accruing loans for which general economic conditions or changes within a particular industry could cause the borrowers financial difficulties. The loan review function also identifies loans with high degrees of credit or other risks. The focus of loan review is to maintain a low level of non-performing assets and to return current non-performing assets to earning status.

Non-performing assets	March 31, 2004	December 31, 2003	March 31, 2003
Loans on nonaccrual	\$ 3,973	4,685	7,914
Loans past due 90 days and still accruing	143	309	234
Other real estate owned and repossessions	2,670	2,432	3,149
Total non-performing assets	\$ 6,786	7,426	11,297

Total non-performing assets as a percentage of

total assets	0.99%	1.06%	1.74%
--------------	-------	-------	-------

Management's Discussion and Analysis of Financial Condition and Results of Operations

Provision and Allowance for Possible Loan and Lease Losses

Flag maintains an allowance for loan losses appropriate for the quality of the loan portfolio and sufficient to meet anticipated future loan losses. Flag also utilizes a comprehensive loan review and risk identification process and the analysis of Flag's financial trends to determine the adequacy of the allowance. Many factors are considered when evaluating the allowance. The analysis is based on historical loss trends; trends in criticized and classified loans in the portfolio; trends in past due and non-accrual loans; trends in portfolio volume, composition, maturity, and concentrations; changes in local and regional economic market conditions; the accuracy of the loan review and risk identification system, and the experience, ability, and depth of lending personnel and management.

In determining the appropriate level of the allowance for Flag, management relies primarily on analysis of the major components of the loan portfolio such as commercial loans, commercial real estate loans, consumer loans, construction loans, residential real estate loans, and all other loans and unfunded commitments. Flag has established a minimum loss factor for certain problem loan grade categories and for general categories of all other loans. All significant problem loans are reviewed individually to establish either the minimum loss factor (formula) or a specific reserve higher than the formula. All significant non-problem loans are reserved at the greater of the minimum loss rate for the category of loans or the weighted average historical loss rate over a defined loss horizon. Other homogenous loan pools such as the consumer loans, construction loans, and residential mortgage loans are reserved at the greater of the minimum loss rate or the weighted average historical loss rate as computed in the historical analysis.

Management evaluates the allowance on a quarterly basis. Through this evaluation, the appropriate provision for loan losses is determined by considering the current allowance level, actual loan losses and loan recoveries.

The following table presents an analysis of the allowance for loan losses for the three-month periods ended March 31, 2004 and 2003: (in thousands)

	Three Months Ended March 31,	
	2004	2003
	<u> </u>	<u> </u>
Balance of allowance for loan losses at beginning of period	\$ 6,685	6,888
Provision charged to operating expense	720	256
Charge offs:		
Real estate - mortgage	6	-
Real estate - other	364	791
Consumer	81	57
	<u> </u>	<u> </u>

Edgar Filing: FLAG FINANCIAL CORP - Form 10-Q

Net charge-offs		353	742
		<u> </u>	<u> </u>
Balance of allowance for loan losses at end of period	\$	7,052	6,402
		<u> </u>	<u> </u>

**Management Discussion and Analysis of
Financial Condition and Results of Operations**

Results of Operations for the Three Month Periods Ended March 31, 2004 and 2003

Net income Net income for the quarter ended March 31, 2004, was \$2.1 million or \$0.23 per diluted share, compared to \$1.5 million or \$0.17 per diluted share for the quarter ended March 31, 2003. Flag's return on average assets was 1.19% and .95% for the first quarters of 2004 and 2003, respectively, while return on average equity was 12.68% and 9.94% on average equity of \$66.1 million and \$61.3 million for the same quarters.

Interest income - Interest income for the quarter ended March 31, 2004 was \$9.7 million, an increase of \$593,000 compared to levels for the same quarter in 2003. Interest income and fees on loans in the current quarter increased \$899,000, or 12.5%, to \$8.1 million compared to the same quarter in 2003. Yields on loans during the first quarter of 2004 were 6.7%, a decrease from the first quarter of 2003 level of 7.4%. This decrease in yield was more than offset by a 25.9% increase in average loans outstanding to \$485.5 million in the first quarter of 2004.

Interest on investment securities declined from \$1.7 million in the first quarter of 2003 to \$1.5 million in the first quarter of 2004. This decline was in part due to the lower rate environment as well as Flag's investment strategy. Flag adopted an investment strategy that focuses mainly on shorter maturities due to an expectation of continued strong loan demand and an unwillingness to invest for longer periods in the current environment. Yields on investment opportunities that meet this strategy are lower than levels where Flag has historically been able to invest excess funds.

Interest on federal funds sold and interest bearing deposits in other banks decreased \$98,000 to \$100,000 when comparing the first quarters of 2003 and 2004, respectively. Interest on federal funds sold and interest bearing deposits in other banks decreased during the first quarter of 2004 as Flag maintained lower levels of short-term deposits than in the past.

Yields on earning assets decreased to 5.96% during the quarter ended March 31, 2004 compared to 6.23% for the first quarter of 2003.

Interest expense Interest expense for the first quarter of 2004 was \$2.5 million, a decrease of \$302,000 over the same quarter in 2003. Average funding during the first quarter of 2004 increased 11.1% to \$637.5 million when compared to the first quarter of 2003. This increase in average funding was more than offset by a decrease in Flag's total cost of funds decreased from 1.97% to 1.59% over the same periods. This decrease in cost of funds is attributable to Flag's continued focus on growing demand deposits (interest-bearing and non-interest bearing) as opposed to time deposits. Average demand deposits during the first quarter of 2004 were \$330.0 million, representing an increase of 42.1% over the first quarter of 2003.

Net interest income Net interest income for the quarter ended March 31, 2004 was \$7.1 million, an increase of 14.3% from the quarter ended March 31, 2003. Flag's net interest margin (net interest income divided by average earning assets) increased from 4.36% to 4.40% on average earning assets of \$578.7 million and \$652.3 million for the quarters ended March 31, 2003, and March 31, 2004, respectively.

Non-interest income Non-interest income for the quarter ended March 31, 2004, totaled \$4.7 million, an increase of 91.3% compared to the quarter ended March 31, 2003. The primary component of this increase was a \$3.0 million gain on the sale of Flag's Thomaston, Georgia branch. Flag's decision to sell this branch was due to its continued focus on developing its banking presence where Flag maintains high market share and in developing its metro Atlanta presence. Income from mortgage banking activities decreased \$331,000 to \$530,000 during the first quarter of 2004 compared to the first quarter of 2003. Management anticipated slower mortgage activity in 2004 and took steps to reduce operating expenses and headcount that accompanied the record levels of mortgage refinancing that took place during 2003.

Edgar Filing: FLAG FINANCIAL CORP - Form 10-Q

Non-interest expense - Non-interest expense for the first quarter of 2004 totaled \$8.0 million compared to \$6.3 million in the same quarter of 2003. Included in the \$8.0 million of operating expenses were expenses totaling \$635,000 directly related to the sale of Flag's Thomaston, Georgia branch. In addition, Flag accrued \$376,000 of benefit plan expense that related to director and officer plans related to a recent accounting interpretation by various regulatory agencies.

Excluding the effect of charges described above, Flag's salaries and employee benefits increased to \$4.4 million, an increase of 15.8% from the same period in 2003. This increase relates primarily to Flag's hiring successes around its Atlanta expansion efforts.

Income taxes - Income tax expense for the quarter ended March 31, 2004, totaled \$1.0 million compared to \$639,000 for the same quarter of 2003. Flag's effective tax rate rose to 32.8% in the first quarter of 2004 compared to 29.8% in the same quarter in 2003.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Item 3. Quantitative and Qualitative Disclosures about Market Risk

As of March 31, 2004, there were no substantial changes in the composition of Flag's market-sensitive assets and liabilities or their related market values from that reported as of December 31, 2003. The foregoing disclosures related to the market risk of Flag should be read in conjunction with Flag's audited consolidated financial statements, related notes and management's discussion and analysis of financial condition and results of operations for the year ended December 31, 2003, included in Flag's 2003 Annual Report on Form 10-K.

Item 4. Controls and Procedures

As of the end of the period covered by this report, Flag carried out an evaluation, under the supervision and with the participation of Flag's management, including Flag's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of Flag's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, Flag's Chief Executive Officer and Chief Financial Officer concluded that Flag's disclosure controls and procedures are effective in timely alerting them to material information relating to Flag (including its consolidated subsidiary) that is required to be included in Flag's periodic filings with the Securities and Exchange Commission. There have been no significant changes in Flag's internal controls or, to Flag's knowledge, in other factors that could significantly affect those internal controls subsequent to the date Flag carried out its evaluation, and there have been no corrective actions with respect to significant deficiencies or material weaknesses.

Part 2. Other Information Flag Financial Corporation and Subsidiary

PART II. Other Information

Item 1. Legal Proceedings - None

Item 2. Changes in Securities, Uses of Proceeds and Issuer Purchases of Equity Securities

The following table sets forth information regarding the Company's purchases of its common stock on a monthly basis during the first quarter of 2004.

Total Number of Shares (or Units)	Maximum Number (or Appropriate Dollar Value)
--------------------------------------	--

Edgar Filing: FLAG FINANCIAL CORP - Form 10-Q

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Purchased as Part Of Publicly Announced Plans or Programs ⁽¹⁾	Of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
January 1 through January 31, 2004	\$ -	-	-	-
February 1 through February 29, 2004	-	-	-	-
March 1 through March 31, 2004	-	-	-	852,814
Total	\$ -	-	-	852,814

(1) On March 19, 2004, Flag Financial Corporation announced a stock repurchase plan. The Company's board of directors authorized the repurchase of up to 10% of the company's outstanding shares of common stock. No expiration date was specified, and no shares were repurchased under or outside of the plan during the first quarter of 2004.

Item 3. Defaults upon Senior Securities - None

Item 4. Submission of Matters to a Vote of Security Holders - None

Item 5. Other Information

Pursuant to Rule 14a-14(c)(1) promulgated under the Securities Exchange Act of 1934, as amended, shareholders desiring to present a proposal for consideration at the Company's 2005 Annual Meeting of Shareholders must notify the Company in writing to the Secretary of the Company, at 3475 Piedmont Road, N.E., Suite 550, Atlanta, Georgia, 30305, of the contents of such proposal no later than November 10, 2004, to be included in the 2005 Proxy Materials. A shareholder must notify the Company before January 24, 2005 of a proposal for the 2005 Annual Meeting that the shareholder intends to present other than by inclusion in the Company's proxy material. If the Company does not receive such notice prior to January 24, 2005, proxies solicited by the management of the Company will confer discretionary authority upon the management of the Company to vote upon any such matter.
