Internet Gold's CEO, Eli Holtzman, commented, "We are very pleased to report another successful quarter during which we sustained good financial results while increasing our Broadband customer base. Our operating income, as well as our gross profit rate reached a new record high. Cash flow from operations in the second quarter totaled NIS 15.6 million (US\$3.5 million), a 36.8% increase compared with the previous quarter. Despite our competitive market we continued to increase our Broadband customer base by 10% during the second quarter and by 31% during the first half of 2004."

"Gold Mind Ltd., our wholly owned subsidiary specializing in development and sales of value added services and rich Internet content, successfully achieved a 140% increase in sales in the second quarter compared with the same quarter in 2003. "Internet Gold International, Internet Gold's subsidiary specializing in international Internet and communication services that holds a 15.2% interest in

Compulink, a Greek ISP, recorded an additional impairment charge of NIS 0.9 million (US\$0.2 million) this quarter due to Compulink's deteriorating financial situation. With this latest impairment charge Internet Gold International has written off its entire investment in Compulink and its operations can no longer adversely influence our results."

"MSN Israel, Internet Gold's partnership with Microsoft, continued its positive operating trend, reporting an increase of 94.8% in net income compared with the previous quarter and a 19% increase in operating income compared with the previous quarter. Its gross profit rate in the second quarter of 2004 continued to rise to a record high of 57.9% up from 43% in the previous quarter. We believe that the increase in the Israeli e-advertising and search engine markets will continue to grow."

"Another complimentary activity in our strategy is Gold Trade Ltd. in which we currently hold 48.3%. Gold Trade results are reported in our financials on an equity basis. Gold Trade provides a variety of online shopping and transactional opportunities directly to consumers through its well known P-1000 brand and also reach its existing client list with outgoing telemarketing. Gold Trade's new management is currently evaluating its activities and its revenues structure and is considering focusing on its online activity."

Mr. Holtzman concluded: "I am proud to note that the above strong financial results were achieved along with the completion of our preparations to provide international telephony services. A few days ago, we successfully launched our international telephony service which we believe will start contributing to the company's financial results in the fourth quarter of this year. We are currently executing an aggressive penetration advertising campaign which will increase our marketing expense in the third quarter and anticipate that we will achieve a substantial market share in the international telephony market in Israel."

Gross profit for the second quarter increased to NIS 31.6 million (US\$7.0 million) from NIS 28.4 million (US\$6.3 million) in the previous quarter and NIS 20.5 million (US\$4.6 million) in the comparable quarter of 2003.
