Companhia de Telecomunicacoes de Macau S.A.R.L (CTM) to Launch Video Portal Service with RADVISION Interactive Video Platform

Tuesday December 5, 7:00 am ET

FAIR LAWN, N.J.--(BUSINESS WIRE)--RADVISION (Nasdaq: RVSN - News), a leading provider of voice and video network infrastructure and developer of tools for unified visual communications over IP, 3G, and emerging next-generation networks, today announced that Macau's leading mobile operator, Companhia de Telecomunicacoes de Macau S.A.R.L (CTM), will launch a video portal service developed by WiseSpot using RADVISION's Interactive Video Platform. The video portal service allows subscribers to access a wide range of video content and interactive services from their 3G mobile phones.

"Interactive visual communications services are an important element of CTM's 3G mobile service strategy," said Vandy Poon, Deputy CEO of CTM. "The video portal solution provided by WiseSpot and RADVISION allows us the flexibility to add additional services as the market develops."

"The video portal application demonstrates the power of RADVISION's cutting-edge communication technology," said Franky Lai, Chairman of WiseSpot (Hong Kong) Ltd. "We have worked successfully with RADVISION technology for years. The project with CTM is further proof that the Interactive Video Platform is the ideal choice for developing and deploying multiple interactive video services."

"When the Interactive Video Platform's flexible API and advanced video support are combined with professional application development and implementation, the full power of RADVISION's technology is realized. We are proud to be instrumental in creating exciting visual communications services for people on the go," said Mr. Eitan Livne, General Manager of RADVISION in Asia Pacific. "RADVISION believes that the future of 3G is in providing innovative personalized and revenue-generating visual services. We are confident that more and more exciting interactive video applications will be made available for 3G subscribers."

Based on RADVISION's video expertise and market proven scalable and interoperable products and solutions, the Interactive Video Platform hides the complexity of video from application developers, with no need for them to deal with signaling protocols, media types, or interoperability. The Interactive Video platform is the ideal solution for exciting revenue-generating visual communication services such as mobile videoconferencing, mobile video

RADVISION Signs New Distribution Agreement with Imago

Wednesday December 20, 7:00 am ET

RADVISION's Video Network Infrastructure, Desktop and 3G Products Complement Imago's Impressive Portfolio of Videoconferencing Products from Leading Vendors

FAIR LAWN, N.J.--(BUSINESS WIRE)--RADVISION(R) (NASDAQ: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation networks, announced today that it has entered into a marketing and distribution agreement with Imago Group PLC, Europe's largest distributor of videoconferencing products. The agreement, which closed in September 2006, is expected to boost sales in several key markets, most notably the UK and France.

"We are excited about our alliance with RADVISION," said James Vickerage, Head of Marketing for Imago. "Endpoint-agnostic video network infrastructure strengthens our portfolio significantly, along with the addition of innovative 3G capabilities and a scalable desktop conferencing platform like Click to Meet(R). These will open many opportunities for qualified Imago resellers. We are witnessing strong growth in demand for video-based communications from resellers that do not specifically specialize in videoconferencing. RADVISION's interoperable platforms for scalable desktop and mobile deployment will deliver real added value to their offerings."

Under the agreement, Imago will market, distribute and support RADVISION's full line of products, including the SCOPIA v.5 platform, SCOPIA 3G Gateway and the award winning Click to Meet desktop collaboration suite, to qualified resellers. Imago Group PLC has offices throughout the UK and France.

"In addition to offering highly practical and competitive bridging solutions,

## Edgar Filing: RADVISION LTD - Form 6-K

RADVISION's videoconferencing endpoint-independent infrastructure will help us penetrate new market segments," added Nicolas Jouan, Managing Director of Imago France.

"Imago is an important player in the videoconferencing space, with broad reach in key markets," said Bob Rickwood, General Manager of RADVISION's operations in Europe, Middle East and Africa. "Adding our solutions to Imago's rich portfolio of equipment from leading manufacturers, including several of our partners, will give RADVISION a much stronger presence in the UK, France and Germany as well as in China, where Imago is also active. We look forward to working together to deliver more powerful unified communications solutions to customers in the enterprise, government and education markets."
