CRYPTOLOGIC WELCOMES NEW UK LAW TO REGULATE ONLINE GAMING

April 8, 2005 (Toronto, ON) CryptoLogic Inc., a leading software developer to the global Internet gaming market, today welcomed the passage of the revised Gambling Act 2005 in the United Kingdom, one of the company's premier markets. The Act received Royal Assent yesterday and will enable the regulation of Internet gaming for the first time in the UK.

This new law marks a key milestone for online gaming and we welcome the decision of the UK government to shine the light on the industry to allow it to thrive in a regulated and licensed environment, said Lewis Rose, CryptoLogic's President and CEO. CryptoLogic has long advocated a regulated online gaming market for the protection of players and the integrity of the industry. We applaud the UK for taking the lead in establishing world-class standards for the safe, secure and responsible use of this form of entertainment.

Now that the Act has become law, there remains considerable work to be done to fully define the legislation. The next step is for the new Gambling Commission to be established. The rules and regulatory framework governing online gaming in the UK need to be clearly developed and finalized. The first applications are expected to be accepted in 2006, with licenses granted and the regulatory regime in full operation by 2007.
