SUSSEX BANCORP  
Notes to Consolidated Financial Statements (Unaudited)

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Sussex Bancorp (the "Company") and its wholly-owned subsidiary Sussex Bank (the "Bank"). The Bank's wholly-owned subsidiaries are SCB Investment Company, Inc., SCBNY Company, Inc., and Tri-State Insurance Agency, Inc. ("Tri-State") a full service insurance agency located in Sussex County, New Jersey. Tri-State's operations are considered a separate segment for financial disclosure purposes.

All inter-company transactions and balances have been eliminated in consolidation. Sussex Bank is also a 49% partner in SussexMortgage.com LLC, an Indiana limited liability company and mortgage banking joint venture with PNC Mortgage, Inc. The Bank operates ten banking offices, eight located in Sussex County, New Jersey and two in Orange County, New York. The Bank has also received regulatory approval for a branch location in Pike County, Pennsylvania.

The Company is subject to the supervision and regulation of the Board of Governors of the Federal Reserve System (the "FRB"). The Bank's deposits are insured by the Deposit Insurance Fund ("DIF") of the Federal Deposit Insurance Corporation ("FDIC") up to applicable limits. The operations of the Company and the Bank are subject to the supervision and regulation of the FRB, FDIC and the New Jersey Department of Banking and Insurance (the "Department") and the operations of Tri-State are subject to supervision and regulation by the Department.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for full year financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal, recurring nature. Operating results for the three-month period ended March 31, 2010, are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. These consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto that are included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

The Financial Accounting Standards Board (FASB) issued FASB Accounting Standards Codification (ASC) effective for financial statements issued for interim and annual periods ending after September 15, 2009. The ASC is an aggregation of previously issued authoritative U.S. generally accepted accounting principles (GAAP) in one comprehensive set of guidance organized by subject area. In accordance with the ASC, references to previously issued accounting standards have been replaced by ASC references. Subsequent revisions to GAAP will be incorporated into the ASC through Accounting Standards Updates (ASU).

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of March 31, 2010 for items that should potentially be recognized or disclosed in these financial statements. The evaluation was conducted through the date these financial statements were issued.

Note 2 – Earnings per Share

Edgar Filing: SUSSEX BANCORP - Form 10-Q

Basic earnings per share are calculated by dividing net income by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares (nonvested restricted stock grants and stock options) had been issued, as well as any adjustment to income that would result from the assumed issuance of potential common shares that may be issued by the Company. Potential common shares related to stock options are determined using the treasury stock method.

	Three Months Ended March 31, 2010			Three Months Ended March 31, 2009		
	Income	Shares	Per Share	Income	Shares	Per Share
(Dollars in thousands, except per share data)	(Numerator)	(Denominator)	Amount	(Numerator)	(Denominator)	Amount

Index

## Note 4 – Segment Information

The Company's insurance agency operations are managed separately from the traditional banking and related financial services that the Company also offers. The insurance agency operation provides commercial, individual, and group benefit plans and personal coverage.

(Dollars in thousands)	Three Months Ended March 31, 2010			Three Months Ended March 31, 2009

(1) Insurance services calculated at statutory tax rate of 40%

## Note 5 - Stock-Based Compensation

The Company currently has stock-based compensation plans in place for directors, officers, employees, consultants and advisors of the Company. Under the terms of these plans the Company may grant restricted shares and stock options for the purchase of the Company's common stock. The stock-based compensation is granted under terms determined by the Compensation Committee of the Board of Directors. Stock options granted have a maximum term of ten years, generally vest over periods ranging between one and four years, and are granted with an exercise price equal to the fair market value of the common stock on the date the options are granted. Restricted stock is valued at the market value of the common stock on the date of grant and generally vests between two and five years. All dividends paid on restricted stock, whether vested or unvested, are granted to the stockholder.

Stock options outstanding at March 31, 2010 were 187,362 and there were no stock option grants, exercises or forfeitures during the first three months of 2010. The weighted average exercise price per share of the outstanding options was \$12.43 and the weighted average contractual term was 5.84 years. The option price range for the quarter was \$6.88 to \$16.45. All compensation expense for stock option plans has been expensed and there was no intrinsic value to the stock options at March 31, 2010.

During the first three months of 2010 and 2009, the Company expensed \$16 thousand and \$19 thousand, respectively, in stock-based compensation under restricted stock awards. Information regarding the Company's restricted stock activity as of March 31, 2010 is as follows:

	Number of Shares	Weighted Average Grant Date Fair Value
Restricted stock, beginning of year	13,975	\$ 8.34
Granted	57,762	3.59
Vested	(3,194 )	9.40
Restricted stock, end of quarter	68,543	\$ 4.29

At March 31, 2010, unrecognized compensation expense for non-vested restricted stock was \$270 thousand, which is expected to be recognized over an average period of 4.2 years.

Note 6 - Guarantees

The Company does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company, generally, holds collateral and/or personal guarantees supporting these commitments. The Company had \$2.1 million of undrawn standby letters of credit outstanding as of March 31, 2010. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The amount of the liability as of March 31, 2010 for guarantees under standby letters of credit issued is not material.

Note 7 - Fair Value of Financial Instruments

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sale transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective period ends, and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period end.

Index

Under FASB ASC 820, Fair Value Measurement and Disclosures, there is a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined by the FASB ASC 820 hierarchy are as follows:

Level I - Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II- Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these asset and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III - Assets and liabilities that have little to no pricing observability as of reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following table summarizes the valuation of the Company's financial assets measured on a recurring basis by the above FASB ASC 820 pricing observability levels:

(Dollars in thousands)	Fair Value Measurements	Quoted Prices in Active Markets for Identical Assets (Level I)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)
<b>March 31, 2010:</b>				
Trading securities	\$ 2,573	\$ -	\$ 2,573	\$ -
Available for sale securities	73,761	-	73,761	-
<b>December 31, 2009:</b>				
Trading securities	\$ 2,955	\$ -	\$ 2,955	\$ -
Available for sale securities	71,315	-	71,315	-

All trading securities at March 31, 2010 and December 31, 2009 were mortgage-backed securities. The Company's trading securities and available for sale securities portfolios contain investments which are all rated within the Company's investment policy guidelines and upon review of the entire portfolio all securities are marketable and have observable pricing inputs. There were holding gains on trading securities recorded on the income statement of \$11 thousand for the three months ended March 31, 2010 and \$35 thousand for the same period in 2009.

For financial assets measured at fair value on a nonrecurring basis, the fair value measurements by level are as follows:

Fair Value	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
---------------	---	--	---------------------------------------

Edgar Filing: SUSSEX BANCORP - Form 10-Q

(Dollars in thousands)	Measurements	(Level I)	(Level II)	(Level III)
<b>March 31, 2010:</b>				
Impaired loans	\$ 14,379	\$ -	\$ -	\$ 14,379
Foreclosed real estate	2,650	-	-	2,650
<b>December 31, 2009:</b>				
Impaired loans	\$ 4,452	\$ -	\$ -	\$ 4,452
Foreclosed real estate	2,385	-	-	2,385

Impaired loans are measured for impairment using the fair value of collateral-dependent loans or discounted cash flows based upon the expected proceeds. Impaired loans had carrying amounts of \$27.4 million at March 31, 2010 and \$24.8 million at December 31, 2009. During the first quarter of 2010, the Company valued collateral dependant impaired loans that were modified in troubled debt restructurings by applying the use of discounted cash flows. As a result, impaired loans measured at fair value increased \$9.9 million to \$14.4 million on March 31, 2010 from \$4.5 million at December 31, 2009. Foreclosed real estate is valued at the lower of the principal balance of the secured loan or fair value less estimated costs to sell the property.

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair value of the Company's financial instruments at March 31, 2010 and December 31, 2009:

Index

Cash and Cash Equivalents (Carried at Cost): The carrying amounts reported in the balance sheet for cash and cash equivalents approximate those assets' fair value.

Deposits (Carried at Cost): Fair value for fixed-rate time certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits. The Company generally purchases amounts below the insured limit, limiting the amount of credit risk on these time deposits.

Securities: The fair value of securities, available for sale (carried at fair value) is determined by obtaining quoted market prices on nationally recognized securities exchanges (Level I), or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted prices. For certain securities which are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence (Level 3). In the absence of such evidence, management's best estimate is used. Management's best estimate consists of both internal and external support on certain Level 3 investments. Internal cash flow models using a present value formula that includes assumptions market participants would use along with indicative exit pricing obtained from broker/dealers (where available) were used to support fair values of certain Level 3 investments.

Loans Receivable (Carried at Cost): The fair values of loans are estimated using discounted cash flow analyses, using the market rates at the balance sheet date that reflect the credit and interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values.

Impaired Loans (Generally Carried at Fair Value): Impaired loans are those that are accounted for under FASB ASC 310, Accounting by Creditors for Impairment of a Loan, in which the Company has measured impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These assets are included in Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

Federal Home Loan Bank Stock (Carried at Cost): The carrying amount of restricted investment in bank stock approximates fair value and considers the limited marketability of such securities.

Deposit Liabilities (Carried at Cost): The fair values disclosed for demand, savings and club accounts are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Borrowings (Carried at Cost): Fair values of FHLB advances are estimated using discounted cash flow analysis, based on quoted prices for new FHLB advances with similar credit risk characteristics, terms and remaining maturity. These prices obtained from this active market represent a market value that is deemed to represent the transfer price if the liability were assumed by a third party.

Junior Subordinated Debentures (Carried at Cost): Fair values of junior subordinated debt are estimated using discounted cash flow analysis, based on market rates currently offered on such debt with similar credit risk characteristics, terms and remaining maturity.

Accrued Interest Receivable and Accrued Interest Payable (Carried at Cost): The carrying amounts of accrued interest receivable and payable approximate their fair values.

Off-Balance Sheet Instruments (Disclosed at Cost): Fair values for the Company's off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

The following information is an estimate of the fair value of a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.
