TOP SHIPS INC.
(Exact name of Registrant as specified in its charter)

(Translation of Registrant's name into English)

Republic of the Marshall Islands
(Jurisdiction of incorporation or organization)

1 Vas. Sofias and Meg. Alexandrou Str, 15124 Maroussi, Greece
(Address of principal executive offices)

Edgar Filing: TOP SHIPS INC. - Form 20-F

Alexandros Tsirikos, (Tel) +30 210 8128180, atsirikos@topships.org, (Fax) +30 210 6141273,
1 Vas. Sofias and Meg. Alexandrou Str, 15124 Maroussi, Greece
(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Common Stock par value \$0.01 per share	NASDAQ Global Select Market

Securities registered or to be registered pursuant to Section 12(g) of the Act.

NONE
(Title of class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

NONE
(Title of class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

As of December 31, 2010, 34,200,673 shares of Common Stock, par value \$0.01 per share, were outstanding

Indicate by check mark if the registrant is well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No X

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No X

Note – Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes X No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Matters discussed in this report may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995 provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts.

TOP SHIPS INC. desires to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and is including this cautionary statement in connection with this safe harbor legislation. This report and any other written or oral statements made by us or on our behalf may include forward-looking statements, which reflect our current views with respect to future events and financial performance. When used in this report, the words "anticipate," "believe," "expect," "intend," "estimate," "forecast," "project," "plan," "potential," "may," "should," and similar expressions identify forward-looking statements.

The forward-looking statements in this report are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these assumptions and matters discussed elsewhere herein and in the documents incorporated by reference herein, important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies and currencies, general market conditions, including fluctuations in charterhire rates and vessel values, changes in demand in the shipping market, including the effect of changes in OPEC's petroleum production levels and worldwide oil consumption and storage, changes in regulatory requirements affecting vessel operating including requirements for double hull tankers, changes in TOP SHIPS INC.'s operating expenses, including bunker prices, dry-docking and insurance costs, changes in governmental rules and regulations or actions taken by regulatory authorities, changes in the price of our capital investments, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents, political events or acts by terrorists, and other important factors described from time to time in the reports filed by us with the Securities and Exchange Commission, or the SEC.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not Applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not Applicable.

ITEM 3. KEY INFORMATION

Unless the context otherwise requires, as used in this report, the terms "Company," "we," "us," and "our" refer to TOP SHIPS INC. and all of its subsidiaries, and "TOP SHIPS INC." refers only to TOP SHIPS INC. and not to its subsidiaries. We use the term deadweight ton or dwt, in describing the size of vessels. Dwt, expressed in metric tons each of which is equivalent to 1,000 kilograms, refers to the maximum weight of cargo and supplies that a vessel can carry.

A. Selected Financial Data

The following table sets forth the selected historical consolidated financial data and other operating data of TOP SHIPS INC. for the years ended December 31, 2006, 2007, 2008, 2009 and 2010. The following information should be read in conjunction with Item 5 "Operating and Financial Review and Prospects" and the consolidated financial statements and related notes included herein. The following selected historical consolidated financial data of TOP SHIPS INC. are derived from our consolidated financial statements and notes thereto which have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP, and have been audited for the years ended December 31, 2006, 2007, 2008, 2009 and 2010 by Deloitte, Hadjipavlou, Sofianos & Cambanis S.A., or Deloitte, independent registered public accounting firms.

Vessel operating expenses(7)	\$6,780	\$8,307	\$9,762	\$4,740	\$2,688
General and administrative expenses(8)	\$2,105	\$2,834	\$4,397	\$4,676	\$3,795

- (1) Average number of vessels is the number of vessels that constituted our fleet (including leased vessels) for the relevant period, as measured by the sum of the number of days each vessel was a part of our fleet during the period divided by the number of calendar days in that period.
- (2) Calendar days are the total days the vessels were in our possession for the relevant period. Calendar days are an indicator of the size of our fleet over the relevant period and affect both the amount of revenues and expenses that we record during that period.
- (3) Available days are the number of calendar days less the aggregate number of days that our vessels are off-hire due to scheduled repairs or scheduled guarantee inspections in the case of newbuildings, vessel upgrades or special or intermediate surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues. We determined to use available days as a performance metric, for the first time, in the second quarter and first half of 2009. We have adjusted the calculation method of utilization to include available days in order to be comparable with shipping companies that calculate utilization using operating days divided by available days.
- (4) Operating days are the number of available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period that our vessels actually generate revenue.
- (5) Fleet utilization is calculated by dividing the number of operating days during a period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other than scheduled repairs or scheduled guarantee inspections in the case of newbuildings, vessel upgrades, special or intermediate surveys and vessel positioning. We used a new calculation method for fleet utilization, for the first time, in the second quarter and first half of 2009. In all prior filings and reports, utilization was calculated by dividing operating days by calendar days. We have adjusted the calculation method in order to be comparable with most shipping companies, which calculate utilization using operating days divided by available days.
- (6) Time charter equivalent rate, or TCE rate, is a measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE rate is consistent with industry standards and is determined by dividing time charter equivalent revenues or TCE revenues by operating days for the relevant time period. TCE revenues are revenues minus voyage expenses. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions. TCE revenues and TCE rate, which are non-GAAP measures, provide additional meaningful information in conjunction with shipping revenues, the most directly comparable GAAP measure, because it assists the Company's management in making decisions regarding the deployment and use of its vessels and in evaluating their financial performance. The reconciliation of TCE revenues to shipping revenues is depicted in the following tables.
- (7) Daily vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs are calculated by dividing vessel operating expenses by fleet calendar days for the relevant time period.
- (8) Daily general and administrative expenses are calculated by dividing general and administrative expenses by fleet calendar days for the relevant time period.

Edgar Filing: TOP SHIPS INC. - Form 20-F

The following table reflects reconciliation of TCE revenues to revenues as reflected in the consolidated statements of operations and calculation of the TCE rate (all amounts are expressed in thousands of U.S. Dollars, except for Average Daily Time Charter Equivalent amounts and Total Operating Days):

U.S. Dollars in thousands, except operating days figures and average daily results On a consolidated basis	2006	2007	2008	2009	2010

D. Risk Factors

The following risks relate principally to the industries in which we operate and our business in general. Any of the risk factors could materially and adversely affect our business, financial condition or operating results and the trading price of our common stock.

Risks Related to Our Industries

The international tanker and drybulk shipping industries have experienced drastic downturns after experiencing historically high charter rates and vessel values in early 2008, and a continued downturn in these markets may have an adverse effect on our earnings, impair the carrying value of our vessels and affect compliance with our loan covenants.

The Baltic Drybulk Index, or BDI, is a U.S. Dollar daily average of charter rates that takes into account input from brokers around the world regarding fixtures for various routes, dry cargoes and various drybulk vessel sizes and is issued by the London-based Baltic Exchange (an organization providing maritime market information for the trading and settlement of physical and derivative contracts). The BDI declined from a high of 11,793 in May 2008 to a low of 663 in December 2008, which represents a decline of 94%, but has since modestly risen to 1,430 as of April 6, 2011. The decline in charter rates was due to various factors, including the lack of trade financing for purchases of commodities carried by sea, which resulted in a significant decline in cargo shipments, and the excess supply of iron ore in China, which resulted in falling iron ore prices and increased stockpiles in Chinese ports. The decline in charter rates in the drybulk market affected the earnings on our charters and the value of our drybulk vessels. As a result, this decline negatively affected our cash flows, liquidity and compliance with the covenants contained in our loan agreements. During 2009 and 2010, the abovementioned factors affecting the BDI partially subsided, allowing for the recovery of rates and a recovery in drybulk vessel values.

The Baltic Dirty Tanker Index, a U.S. Dollar daily average of charter rates issued by the Baltic Exchange that takes into account input from brokers around the world regarding crude oil fixtures for various routes and tanker vessel sizes, declined from a high of 2,347 in July 2008 to a low of 453 in mid-April 2009, which represents a decline of 80%, but has since modestly risen to 891 as of April 6, 2011. The Baltic Clean Tanker Index fell from 1,509 points as of June 19, 2008, to 345 points as of April 4, 2009, but has modestly risen to 825 points as of April 6, 2011. The dramatic decline in charter rates was due to various factors, including the significant fall in demand for crude oil and petroleum products, the consequent rising inventories of crude oil and petroleum products in the United States and in other industrialized nations and the corresponding reduction in oil refining, the dramatic fall in the price of oil in 2008, and the restrictions on crude oil production that the Organization of Petroleum Exporting Countries (OPEC) and other non-OPEC oil producing countries have imposed in an effort to stabilize the price of oil. During 2009 and 2010, the abovementioned factors affecting the Baltic Dirty and Clean Tanker Indices partially subsided, allowing for the modest recovery of rates and a stabilization of tanker vessel values.

A decline in charter rates could have a material adverse effect on our business, financial condition and results of operations. If the charter rates in the tanker and drybulk market decline from their current levels, our future earnings may be adversely affected and we may have to record impairment adjustments to the carrying values of our fleet, and we may not be able to comply with the financial covenants in our loan agreements.

The international tanker and drybulk industries are both cyclical and volatile and this may lead to reductions and volatility in our charter rates when we re-charter our vessels, vessel values and our results of operations.

The international tanker and drybulk industries in which we operate are cyclical with attendant volatility in charter hire rates, vessel values and industry profitability. For both tankers and drybulk vessels, the degree of charter rate volatility among different types of vessels has varied widely. If we enter into a charter when charter rates are low, our revenues and earnings will be adversely affected. In addition, a decline in charter hire rates likely will cause the value of our vessels to decline.

We currently employ our tankers mainly on long term bareboat charters and our drybulk carriers mainly on short to medium term time charters. However, one of our tankers has been employed in the spot market since the expiration of its time charter in November 2010, and we have chartered-in another tanker that we employ in a pool which also carries spot market exposure. As a result, our exposure to charter rate volatility in the tanker segment is limited but not minimal. We expect that our exposure to charter rate volatility in the drybulk segment will be significant in 2012, when most of our current charters will have expired. This may affect our result of operations.

Changes in spot rates and time charters can not only affect the revenues we receive from operations but can also affect the value of our vessels, even if they are employed under long term time charters. Our ability to re-charter our vessels on the expiration or termination of their current time and bareboat charters and the charter rates payable under any renewal or replacement charters will depend upon, among other things, economic conditions in the tanker and drybulk market.

The factors affecting the supply and demand for our vessels are outside our control and are unpredictable. The nature, timing, direction and degree of changes in tanker and drybulk industry conditions are also unpredictable. Factors that influence demand for tanker and drybulk vessel capacity include:

- supply and demand for (i) refined petroleum products and crude oil for tankers and (ii) drybulk commodities for drybulk vessels;

- changes in (i) crude oil production and refining capacity and (ii) drybulk commodity production and resulting shifts in trade flows for crude oil and petroleum products and trade flows of drybulk commodities;

- the location of regional and global crude oil refining facilities and drybulk commodities markets that affect the distance commodities are to be moved by sea;

- global and regional economic and political conditions, including developments in international trade and fluctuations in industrial and agricultural production;

- environmental and other legal and regulatory developments;

- currency exchange rates;

- weather and acts of God and natural disasters, including hurricanes and typhoons;

- competition from alternative sources of energy and for other shipping companies and other modes of transportation;
- and

international sanctions, embargoes, import and export restrictions, nationalizations, piracy and wars.

The factors that influence the supply of oceangoing vessel capacity include:

- the number of newbuilding deliveries;
- current and expected purchase orders for vessels;
- the scrapping rate of older vessels;
- vessel freight rates;
- the price of steel and vessel equipment;
- technological advances in the design and capacity of vessels
- potential conversion of vessels to alternative use;
- changes in environmental and other regulations that may limit the useful lives of vessels;
- port or canal congestion;
- the number of vessels that are out of service at a given time; and
- changes in global crude oil and drybulk commodity production.

Disruptions in world financial markets and the resulting governmental action in the United States and other parts of the world could have a material adverse impact on our ability to obtain financing, our results of operations, financial condition and cash flows and could cause the market price of our common shares to decline.

Although the world economy is currently recovering from the second-worst downturn in the last 100 years, the future of this recovery still remains fragile. The effects of the downturn are still lingering as credit remains tight, demand for goods and services has not yet fully recovered and unemployment is high. The credit markets in the United States and worldwide have experienced significant contraction, de-leveraging and reduced liquidity, and the United States federal government, state governments and foreign governments have implemented a broad variety of governmental action and/or new regulation of the financial markets. Securities and futures markets and the credit markets are subject to comprehensive statutes, regulations and other requirements. The Commission, other regulators, self-regulatory organizations and exchanges are authorized to take extraordinary actions in the event of market emergencies, and may effect further changes in law or interpretations of existing laws.

A number of financial institutions have experienced financial difficulties and, in some cases, have entered bankruptcy proceedings or are in regulatory enforcement actions. The uncertainty surrounding the recovery of the credit markets in the United States and the rest of the world has resulted in reduced access to credit worldwide that is especially evident in our industry. Over the last few years, certain banking institutions have been forced to record heavy losses from troubled shipping loans. These difficulties may adversely affect the financial institutions that provide our credit facilities and may impair their ability to continue to perform under their financing obligations to us, which could have

an impact on our ability to fund current and future obligations.

We face risks attendant to changes in economic environments, changes in interest rates, and instability in certain securities markets, among other factors. Major market disruptions and adverse changes in market conditions and the regulatory climate in the United States and worldwide may adversely affect our business. The current market conditions may last longer than we anticipate. These recent and developing economic and governmental factors may have a material adverse effect on our results of operations, financial condition or cash flows and could cause the price of our common shares to further decline.

We are subject to complex laws and regulations, including environmental regulations that can adversely affect the cost, manner or feasibility of doing business.

Our operations are subject to numerous laws and regulations in the form of international conventions and treaties, national, state and local laws and national and international regulations in force in the jurisdictions in which our vessels operate or are registered, which can significantly affect the ownership and operation of our vessels. These regulations include, but are not limited to the U.S. Oil Pollution Act of 1990, or OPA, the U.S. Clean Air Act, U.S. Clean Water Act and the U.S. Marine Transportation Security Act of 2002, European Union Directives relating to air emissions, and regulations of the International Maritime Organization, or the IMO, including the International Convention for the Prevention of Pollution from Ships of 1975, the International Convention for the Prevention of Marine Pollution of 1973, the IMO International Convention for the Safety of Life at Sea of 1974 and the International Convention on Load Lines of 1966. Compliance with such laws, regulations and standards, where applicable, may require installation of costly equipment or operational changes and may affect the resale value or useful lives of our vessels. We may also incur additional costs in order to comply with other existing and future regulatory obligations, including, but not limited to, costs relating to air emissions, the management of ballast waters, maintenance and inspection, development and implementation of emergency procedures and insurance coverage or other financial assurance of our ability to address pollution incidents. These costs could have a material adverse effect on our business, results of operations, cash flows and financial condition. A failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations. Environmental laws often impose strict liability for remediation of spills and releases of oil and hazardous substances, which could subject us to liability without regard to whether we were negligent or at fault. Under OPA, for example, owners, operators and bareboat charterers are jointly and severally strictly liable for the discharge of oil within the 200-mile exclusive economic zone around the United States. Furthermore, the 2010 explosion of the Deepwater Horizon and the subsequent release of oil into the Gulf of Mexico, or other events, may result in further regulation of the shipping industry, and modifications to statutory liability schemes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. An oil spill could result in significant liability, including fines, penalties and criminal liability and remediation costs for natural resource damages under other federal, state and local laws, as well as third-party damages. We are required to satisfy insurance and financial responsibility requirements for potential oil (including marine fuel) spills and other pollution incidents. Although we have arranged insurance to cover certain environmental risks, there can be no assurance that such insurance will be sufficient to cover all such risks or that any claims will not have a material adverse effect on our business, results of operations, cash flows and financial condition and our ability to pay dividends, if any, in the future.

We are subject to international safety regulations and requirements imposed by classification societies and the failure to comply with these regulations may subject us to increased liability, may adversely affect our insurance coverage and may result in a denial of access to, or detention in, certain ports.

The operation of our vessels is affected by the requirements set forth in the IMO's International Management Code for the Safe Operation of Ships and Pollution Prevention, or ISM Code. The ISM Code requires shipowners, ship managers and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. The failure of a shipowner or bareboat charterer to comply with the ISM Code may subject it to increased liability, may invalidate existing insurance or decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports. As of the date of this annual report, each of our vessels is ISM code-certified.

In addition, the hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the Safety of Life at Sea Convention. If a vessel does not maintain its class and/or fails any annual survey, intermediate survey or special survey, the vessel will be unable to trade between ports and will be unemployable, which will negatively impact our revenues and results from operations.

Climate change and greenhouse gas restrictions may adversely impact our operations and markets.

Due to concern over the risk of climate change, a number of countries and the IMO have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures may include, among others, adoption of cap and trade regimes, carbon taxes, increased efficiency standards, and incentives or mandates for renewable energy. In addition, although the emissions of greenhouse gases from international shipping currently are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change, which required adopting countries to implement national programs to reduce emissions of certain gases, a new treaty may be adopted in the future that includes restrictions on shipping emissions. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities may also be adversely affected.

Adverse effects upon the oil and gas industry relating to climate change, including growing public concern about the environmental impact of climate change, may also adversely affect demand for our services. For example, increased regulation of greenhouse gases or other concerns relating to climate change may reduce the demand for oil and gas in the future or create greater incentives for use of alternative energy sources. Any long-term material adverse effect on the oil and gas industry could have a significant financial and operational adverse impact on our business that we cannot predict with certainty at this time.

Our vessels may suffer damage due to the inherent operational risks of the seaborne transportation industry and we may experience unexpected dry-docking costs, which may adversely affect our business and financial condition.

Our vessels and their cargoes will be at risk of being damaged or lost because of events such as marine disasters, bad weather, business interruptions caused by mechanical failures, grounding, fire, explosions and collisions, human error, war, terrorism, piracy and other circumstances or events. These hazards may result in death or injury to persons, loss of revenues or property, environmental damage, higher insurance rates, damage to our customer relationships, delay or rerouting. If our vessels suffer damage, they may need to be repaired at a dry-docking facility. The costs of dry-dock repairs are unpredictable and may be substantial. We may have to pay dry-docking costs that our insurance does not cover in full. The loss of earnings while these vessels are being repaired and repositioned, as well as the actual cost of these repairs, would decrease our earnings. In addition, space at dry-docking facilities is sometimes limited and not all dry-docking facilities are conveniently located. We may be unable to find space at a suitable dry-docking facility or our vessels may be forced to travel to a dry-docking facility that is not conveniently located to our vessels' positions. The loss of earnings while these vessels are forced to wait for space or to steam to more distant dry-docking facilities would decrease our earnings.

Because the market value of our vessels may fluctuate significantly, we may incur losses when we sell vessels or we may be required to write down their carrying value, which will adversely affect our earnings.

The fair market value of our vessels may increase and decrease depending on the following factors:

general economic and market conditions affecting the international tanker and drybulk shipping industries;

prevailing level of charter rates;

competition from other shipping companies;

types, sizes and ages of vessels;

other modes of transportation;

cost of newbuildings;

price of steel;

governmental or other regulations; and

technological advances.

If we sell vessels at a time when vessel prices have fallen the sale may be at less than the vessel's carrying amount in our financial statements in which case we will realize a loss. Vessel prices can fluctuate significantly, and in the case where the market value falls below the carrying amount we evaluate the asset for a potential impairment and may be required to write down the carrying amount of the vessel on our financial statements and incur a loss and a reduction in earnings, if the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount. See "Item 5 – Operating and Financial Review and Prospects – Critical Accounting Policies – Impairment of vessels".

An over-supply of drybulk carrier and/or tanker capacity may lead to reductions in charter hire rates and profitability.

The market supply of drybulk carriers has been increasing, and the number of drybulk carriers on order is near historic highs. These newbuildings were delivered in significant numbers starting at the beginning of 2007 and continuing through 2010. As of December 31, 2010, newbuilding orders had been placed for an aggregate of approximately 54% of the existing global drybulk fleet, with deliveries expected during the next four years.

The market supply of tankers is affected by a number of factors such as demand for energy resources, oil and petroleum products, as well as strong overall economic growth in part of the world economy, including Asia. As of December 31, 2010, newbuilding orders have been placed for an aggregate of approximately 28% of the existing global tanker fleet with the bulk of deliveries expected during 2011 to 2014.

An over-supply of drybulk carrier and/or tanker capacity may result in a reduction of charter hire rates. If such a reduction occurs, we may only be able to re-charter our vessels at reduced or unprofitable rates or we may not be able to charter these vessels at all upon the expiration or termination of our vessels' current charters. The occurrence of these events could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

We are partially dependent on spot charters and any decrease in spot charter rates in the future may adversely affect our earnings.

As of the date of this report, one of our tanker vessels is operating in the spot market and another is operating in a pool, under a time charter agreement that also carries spot market exposure. We may in the future operate additional vessels in the spot market. Although spot chartering is common in the tanker industry, the spot charter market may fluctuate significantly based upon tanker and oil supply and demand. The successful operation of our vessels in the competitive spot charter market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. The spot market is very volatile, and, in the past, there have been periods when spot rates have declined below the operating cost of vessels. If future spot charter rates decline, then we may be unable to operate our vessels trading in the spot market profitably, meet our obligations, including payments on indebtedness, or to pay dividends in the future. Furthermore, as charter rates for spot charters are fixed for a single voyage which may last up to several weeks, during periods in which spot charter rates are rising, we will generally experience delays in realizing the benefits from such increases.

Operating results from our tankers are subject to seasonal fluctuations, which may adversely affect our operating results.

Eight of the vessels in our combined fleet are tankers. Two of our tankers currently have spot market exposure in markets that have historically exhibited seasonal variations in demand and, therefore, charter rates. This seasonality may result in quarter-to-quarter volatility in our operating results. The tanker sector is typically stronger in the fall and winter months in anticipation of increased consumption of oil and petroleum products in the northern hemisphere during the winter months. As a result, our revenues from our tankers may be weaker during the fiscal quarters ended June 30 and September 30, and, conversely, revenues may be stronger in fiscal quarters ended December 31 and March 31. This seasonality could materially affect our results of operations.

Our earnings may be adversely affected if we do not successfully employ our vessels.

Given current market conditions, we seek to deploy our vessels on time and bareboat charters in a manner that will help us achieve a steady flow of earnings. As of the date of this annual report four of our drybulk vessels were contractually committed to time charters, and six of our tanker vessels and one of our drybulk vessels were contractually committed to bareboat charters. Although these period charters provide relatively steady streams of revenue as well as a portion of the revenues generated by the charterer's deployment of the vessels in the spot market or otherwise, our vessels committed to period charters may not be available for spot voyages during an upturn in the tanker or drybulk industry cycle, as the case may be, when spot voyages might be more profitable. If we cannot continue to employ our vessels on profitable time charters or trade them in the spot market profitably, our results of operations and operating cash flow may suffer if rates achieved are not sufficient to cover respective vessel operating and financial expenses.

If our vessels call on ports located in countries that are subject to restrictions imposed by the U.S. or other governments, that could adversely affect our reputation and the market for our common stock.

From time to time on charterers' instructions, our vessels may call on ports located in countries subject to sanctions and embargoes imposed by the United States government and countries identified by the U.S. government as state sponsors of terrorism. The U.S. sanctions and embargo laws and regulations vary in their application, as they do not all apply to the same covered persons or proscribe the same activities, and such sanctions and embargo laws and regulations may be amended or strengthened over time. In 2010, the U.S. enacted the Comprehensive Iran Sanctions Accountability and Divestment Act ("CISADA"), which expanded the scope of the former Iran Sanctions Act. Among other things, CISADA expands the application of the prohibitions to non-U.S. companies, such as our company, and introduces limits on the ability of companies and persons to do business or trade with Iran when such activities relate to the investment, supply or export of refined petroleum or petroleum products. Although we believe that we are in compliance with all applicable sanctions and embargo laws and regulations, and intend to maintain such compliance, there can be no assurance that we will be in compliance in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations. Any such violation could result in fines or other penalties and could result in some investors deciding, or being required, to divest their interest, or not to invest, in our company. Additionally, some investors may decide to divest their interest, or not to invest, in our company simply because we do business with companies that do business in sanctioned countries, even if we have not violated any laws. Moreover, our charterers may violate applicable sanctions and embargo laws and regulations as a result of actions that do not involve us or our vessels, and those violations could in turn negatively affect our reputation. Investor perception of the value of our common stock may also be adversely affected by the consequences of war, the effects of terrorism, civil unrest and governmental actions in these and surrounding countries.

World events could adversely affect our results of operations and financial condition.

Terrorist attacks such as the attacks on the United States on September 11, 2001, the bombings in Spain on March 11, 2004 and in London on July 7, 2005 and the continuing response of the world community to these attacks, as well as the threat of future terrorist attacks in the United States or elsewhere, continue to cause uncertainty in the world financial markets and may affect our business, operating results and financial condition. The continuing conflict in Afghanistan may lead to additional acts of terrorism and armed conflict around the world, which may contribute to further economic instability in the global financial markets. These uncertainties could also adversely affect our ability to obtain any additional financing or, if we are able to obtain additional financing, to do so on terms unfavorable to us. In the past, political conflicts have also resulted in attacks on vessels, mining of waterways and other efforts to disrupt international shipping, particularly in the Arabian Gulf region. Acts of terrorism and piracy have also affected vessels

trading in regions such as the South China Sea. Any of these occurrences could have a material adverse impact on our business, financial condition and results of operations.

Terrorist attacks on vessels, such as the October 2002 attack on the M.V. Limburg, a very large crude carrier not related to us, may in the future also negatively affect our operations and financial condition and directly impact our vessels or our customers. Future terrorist attacks could result in increased volatility and turmoil of the financial markets in the United States and globally. Any of these occurrences, or the perception that our vessels are potential terrorist targets, could have a material adverse impact on our revenues and costs.

Acts of piracy on oceangoing vessels have recently increased in frequency, which could adversely affect our business.

Acts of piracy have historically affected oceangoing vessels trading in regions of the world such as the South China Sea and the Gulf of Aden off the coast of Somalia. Throughout 2008, 2009 and 2010, the frequency of piracy incidents against commercial shipping vessels increased significantly, particularly in the Gulf of Aden. Since the beginning of 2009, numerous tanker and drybulk vessels have fallen victim to piracy attacks off the coast of Somalia, including incidents deep into the Indian ocean. For example, on January 15, 2010, the M/V Samho Jewelry, a tanker vessel not affiliated with us, was seized by pirates while transporting chemicals 800 miles off the Somali coast.

If these piracy attacks result in regions in which our vessels are deployed being characterized by insurers as "war risk" zones, as the Gulf of Aden has been since May 2008, or Joint War Committee "war and strikes" listed areas, premiums payable for such insurance coverage could increase significantly and such insurance coverage may be more difficult to obtain. Crew costs, including those due to employing onboard security guards, could increase in such circumstances.

In addition, while we believe a time charterer remains liable for charter payments when a vessel is seized by pirates, the charterer may dispute this and withhold charter hire until the vessel is released. A charterer may also claim that a vessel seized by pirates was not "on-hire" for a certain number of days and it is therefore entitled to cancel the charter party, a claim that we would dispute. In addition, we as owners are liable for such costs under any voyage charter. Although we are insured against piracy risks under our war risk insurance policy, we may experience financial losses as a result of vessel damage from pirates, increased insurance deductibles or a rise in the cost of private security service remunerations, all of which could have a material adverse impact on our business, financial condition, results of operations and cash flows.

Changes in the economic and political environment in China and policies adopted by the government to regulate its economy may have a material adverse effect on our business, financial condition and results of operations.

The Chinese economy differs from the economies of most countries belonging to the Organization for Economic Cooperation and Development, or OECD, in respects such as structure, government involvement, level of development, growth rate, capital reinvestment, allocation of resources, rate of inflation and balance of payments position. Prior to 1978, the Chinese economy was a planned economy. Since 1978, increasing emphasis has been placed on the utilization of market forces in the development of the Chinese economy. Annual and five-year plans, or State Plans, are adopted by the Chinese government in connection with the development of the economy. Although state-owned enterprises still account for a substantial portion of the Chinese industrial output, in general, the Chinese government is reducing the level of direct control that it exercises over the economy through State Plans and other measures. There is an increasing level of freedom and autonomy in areas such as allocation of resources, production, pricing and management and a gradual shift in emphasis to a "market economy" and enterprise reform. Limited price reforms were undertaken, with the result that prices for certain commodities are principally determined by market forces. Many of the reforms are unprecedented or experimental and may be subject to revision, change or abolition based upon the outcome of such experiments. If the Chinese government does not continue to pursue a policy of economic reform the level of imports to and exports from China could be adversely affected which could adversely

affect our business, operating results and financial condition.

An economic slowdown in the Asia Pacific region could have a material adverse effect on our business, financial condition and results of operations.

We anticipate a significant number of the port calls made mainly by our drybulk vessels will continue to involve the loading or discharging of drybulk commodities in ports in the Asia Pacific region. As a result, negative changes in economic conditions in any Asia Pacific country, particularly in China, may have a material adverse effect on our business, financial position and results of operations, as well as our future prospects.

Increased inspection procedures and tighter import and export controls could increase costs and disrupt our business.

International shipping is subject to various security and customs inspection and related procedures in countries of origin and destination. Inspection procedures can result in the seizure of, delay in the loading, offloading or delivery of, the contents of our vessels or the levying of customs duties, fines or other penalties against us. It is possible that changes to inspection procedures could impose additional financial and legal obligations on us. Furthermore, changes to inspection procedures could also impose additional costs and obligations on our customers and may, in certain cases, render the shipment of certain types of cargo uneconomical or impractical. Any such changes or developments may have a material adverse effect on our business, financial condition, and results of operations.

Rising fuel prices may adversely affect our business.

Fuel is a significant, if not the largest, operating expense for many of our shipping operations when our vessels are not under period charter. The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by OPEC and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns. Further, fuel may become much more expensive in the future, which may reduce the profitability and competitiveness of our business versus other forms of transportation, such as truck or rail. Currently, ten of our twelve vessels are under period employment whereby the fuel cost is borne by the charterer, except for periods when the vessel is off-hire.

Risks Related to Our Company

We are in breach of certain loan covenants contained in our loan agreements. If we are not successful in obtaining waivers and amendments with respect to covenants breached, our lenders may declare an event of default and accelerate our outstanding indebtedness under the relevant agreement, which would impair our ability to continue to conduct our business, which raises substantial doubt about our ability to continue as a going concern.

Our loan agreements require that we comply with certain financial and other covenants. As a result of the drop in our drybulk and tanker asset values we were not in compliance with covenants relating to vessel values such as asset cover ratio, adjusted net worth and net asset value covenants as of December 31, 2010. In addition, we were in breach of EBITDA and overall cash position (minimum liquidity covenants) covenants with certain banks not previously waived. A violation of these covenants constitutes an event of default under our credit facilities, which would, unless waived by our lenders, provide our lenders with the right to require us to post additional collateral, enhance our equity and liquidity, increase our interest payments, pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels in our fleet, reclassify our indebtedness as current liabilities and accelerate our indebtedness and foreclose their liens on our vessels, which impairs our ability to continue to conduct our business. As a result of these breaches, our total indebtedness of \$343.7 million, which after excluding unamortized financing fees of \$4.0 million amounts to \$339.7 million, and financial instruments of \$12.9 million are presented within current

liabilities in the accompanying December 31, 2010 consolidated balance sheet. The amounts of long term debt and financial instruments that have been reclassified and presented together with current liabilities amount to \$304.5 million and \$8.8 million, respectively.

As of the date of this annual report, we have received a waiver from Emporiki bank up to June 30, 2011. In addition, on August 17, 2010, we signed a term sheet with DVB, loan documentation of which is currently in progress, and reset covenants in such a way so that as of December 31, 2010 we were not in breach of covenants with DVB. As of December 31, 2010, we were in breach of covenants with all other banks. We are currently in discussions with our banks in relation to these covenant breaches.

Breach of our loan covenants, without applicable waiver, entitles our lenders to accelerate our debt. If our indebtedness is accelerated, it would be very difficult in the current financing environment for us to refinance our debt or obtain additional financing and we could lose our vessels if our lenders foreclose their liens.

Our ability to continue as a going concern is dependent on management's ability to successfully generate revenue to meet our obligations as they become due and have the continued support of our lenders. Our independent registered public accounting firm has issued its opinion, similar to its opinion included in our 2008 and 2009 annual report, with an explanatory paragraph emphasizing that we have prepared our financial statements under the going concern assumption despite our covenant breaches and working capital deficit. Our financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of our inability to continue as a going concern. However, there is a material uncertainty related to events or conditions which raises significant doubt on our ability to continue as a going concern and, therefore, we may be unable to realize our assets and discharge our liabilities in the normal course of business.

Servicing current and future debt will limit funds available for other purposes and impair our ability to react to changes in our business.

To finance our fleet expansion program, we incurred secured indebtedness. We must dedicate a portion of our cash flow from operations to pay the principal and interest on our indebtedness. These payments limit funds otherwise available for working capital, capital expenditures and other purposes. As of December 31, 2010, we had total indebtedness of \$343.7 million, which after excluding unamortized financing fees of \$4.0 million amounts to \$339.7 million, and a ratio of indebtedness to total capital of approximately 57%. Our substantial level of indebtedness increases the possibility that we may be unable to generate cash sufficient to pay, when due, the principal of, interest on or other amounts due in respect of, our indebtedness. Our substantial debt could also have other significant consequences. For example, it could:

- increase our vulnerability to general economic downturns and adverse competitive and industry conditions;

- require us to dedicate a substantial portion, if not all, of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate purposes;

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

place us at a competitive disadvantage compared to competitors that have less debt or better access to capital;

limit our ability to raise additional financing on satisfactory terms or at all; and

adversely impact our ability to comply with the financial and other restrictive covenants in the indenture governing the notes and the credit agreements governing the debts of our subsidiaries, which could result in an event of default under such agreements.

Furthermore, our interest expense could increase if interest rates increase because most of our debt and all the debt under the credit facilities of our subsidiaries is variable rate debt. If we do not have sufficient earnings, we may be required to refinance all or part of our existing debt, sell assets, borrow more money or sell more securities, none of which we can guarantee we will be able to do.

Our loan agreements contain restrictive covenants that may limit our liquidity and corporate activities, and our lenders may impose additional operating and financial restrictions on us in connection with waivers or amendments to our loan agreements.

Our loan agreements impose operating and financial restrictions on us and our lenders may impose additional restrictions on us in connection with waivers or amendments to our loan agreements. These restrictions may limit our ability to:

incur additional indebtedness;

create liens on our assets;

sell capital stock of our subsidiaries;

engage in mergers or acquisitions;

pay dividends;

make capital expenditures or other investments;

charter our vessels;

change the management of our vessels or terminate or materially amend the management agreement relating to each vessel; and

sell our vessels.

Therefore, we may need to seek permission from our lenders in order to engage in some corporate actions. This may prevent us from taking actions that are in our best interest.

If we fail to manage our planned growth properly, we may not be able to successfully expand our market share.

We intend to continue to grow our fleet in the future. Our growth will depend on:

our ability to generate excess cash flow so that we can invest without jeopardizing our ability to cover current and foreseeable working capital needs (including debt service);

our ability to raise equity and obtain required financing;

locating and acquiring suitable vessels;

identifying and consummating acquisitions or joint ventures;

integrating any acquired business successfully with our existing operations;

enhancing our customer base; and

managing expansion.

Growing any business by acquisition presents numerous risks such as undisclosed liabilities and obligations, difficulty in obtaining additional qualified personnel, managing relationships with customers and suppliers and integrating newly acquired operations into existing infrastructures. We may not be successful in executing our growth plans and we may incur significant additional expenses and losses in connection therewith.

The derivative contracts we have entered into to hedge our exposure to fluctuations in interest rates could result in higher-than-market interest rates and charges against our income.

As of December 31, 2010, we have twelve interest rate swaps for purposes of managing our exposure to fluctuations in interest rates applicable to indebtedness under our credit facilities. During the year ended December 31, 2010, the change in fair value of our interest rate swaps was an unrealized gain of \$0.9 million. Our hedging strategies, however, may not always be effective and we may incur substantial losses if interest rates move materially differently from our expectations.

Our ability to obtain additional debt financing may be dependent on the performance of our then-existing charters and the creditworthiness of our charterers.

The actual or perceived credit quality of our charterers, and any defaults by them, may materially affect our ability to obtain the additional capital resources that we will require to purchase additional vessels or may significantly increase our costs of obtaining such capital. Our inability to obtain additional financing at all or at a higher than anticipated cost may materially affect our results of operation and our ability to implement our business strategy.

In the highly competitive international tanker and drybulk shipping markets, we may not be able to compete for charters with new entrants or established companies with greater resources.

We employ our vessels in a highly competitive market that is capital intensive and highly fragmented. The operation of tanker and drybulk vessels and the transportation of cargoes shipped in these vessels, as well as the shipping industry in general, is extremely competitive. Competition arises primarily from other vessel owners, including major oil companies as well as independent tanker and drybulk shipping companies, some of whom have substantially greater resources than we do. Competition for the transportation of oil and refined petroleum products and drybulk cargoes can be intense and depends on price, location, size, age, condition and the acceptability of the vessel and its operators to the charterers. Due in part to the highly fragmented market, competitors with greater resources could enter and operate larger fleets through consolidations or acquisitions that may be able to offer better prices and fleets than us.

A limited number of financial institutions hold our cash including financial institutions located in Greece.

A limited number of financial institutions, including institutions located in Greece, will hold all of our cash. Our bank accounts have been deposited from time to time with banks in Germany, United Kingdom and Greece amongst others. Of these financial institutions located in Greece, some are subsidiaries of international banks and others are Greek financial institutions. These balances are not covered by insurance in the event of default by these financial institutions. The occurrence of such a default could have a material adverse effect on our business, financial condition, results of operations and cash flows, and we may lose part or all of our cash that we deposit with such banks.

We depend upon a few significant customers for a large part of our revenues. The loss of one or more of these customers could adversely affect our financial performance.

We have historically derived a significant part of our revenue from a small number of charterers. In 2009, approximately 54% of our revenue was derived from three charterers. These three charterers, ST Shipping and Transport Pte Ltd, Hanjin Shipping Co Ltd, or Hanjin, and Cosco Quingdao, or Cosco, provided 22%, 18% and 14% of our revenues in 2009, respectively. In 2010, approximately 53% of our revenue was derived from three charterers. These three charterers, Hanjin Shipping Co Ltd, Daelim H&L Co. Ltd and Cosco Quingdao, respectively provided 19%, 18% and 16% of our revenues in 2010. If one or more of these customers is unable to perform under one or more charters with us and we are not able to find a replacement charter, or if a customer exercises certain rights to terminate the charter, we could suffer a loss of revenues that could materially adversely affect our business, financial condition and results of operations.

We could lose a customer or the benefits of a charter if, among other things:

the customer fails to make charter payments because of its financial inability, disagreements with us or otherwise;

the customer terminates the charter because we fail to deliver the vessel within a fixed period of time, the vessel is lost or damaged beyond repair, there are serious deficiencies in the vessel or prolonged periods of off-hire, or if we are otherwise in default under the charter; or

the customer terminates the charter because the vessel has been subject to seizure for more than a specified number of days.

If we lose a key customer, we may be unable to obtain charters on comparable terms or may become subject to the volatile spot market, which is highly competitive and subject to significant price fluctuations. The charters on which we deploy six of our vessels as of the date of this report, provide for charter rates that are significantly above current market rates, particularly spot market rates that most directly reflect the current levels of the drybulk and product tanker charter markets. If it were necessary to secure substitute employment for any of these vessels due to the loss of a customer under current market conditions, such employment would be at a significantly lower charter rate, resulting in a significant reduction in revenues. The loss of any of our customers, or charters, or a decline in payments under our charters, could have a material adverse effect on our business, results of operations and financial condition.

We may be unable to attract and retain key management personnel and other employees in the international tanker and drybulk shipping industries, which may negatively impact the effectiveness of our management and our results of operations.

Our success depends to a significant extent upon the abilities and efforts of our management team. All of our executive officers are employees of Central Mare Inc., or Central Mare which we refer to as our Fleet Manager, a related party controlled by the family of the Company's Chief Executive Officer, or CEO, and we have entered into agreements with our Fleet Manager for the provision of our President, CEO, and Director, Evangelos Pistiolis, our Chief Financial Officer and Director, Alexandros Tsirikos, our Executive Vice President, Chairman and Director, Vangelis Ikonomou and our Chief Technical Officer Demetris Souroullas. The loss of any of these individuals could adversely affect our business prospects and financial condition. Difficulty in hiring and retaining personnel could adversely affect our results of operations. We do not maintain "key man" life insurance on any of our officers.

If labor interruptions are not resolved in a timely manner, they could have a material adverse effect on our business, results of operations, cash flows, financial condition and available cash.

Our Fleet Manager employs 26 people, all of whom are shore-based. In addition, our Fleet Manager is responsible for recruiting, mainly through a crewing agent, the senior officers and all other crew members for our vessels. If not resolved in a timely and cost-effective manner, industrial action or other labor unrest could prevent or hinder our operations from being carried out as we expect and could have a material adverse effect on our business, results of operations, cash flows, financial condition and available cash.

If we expand our business, we will need to improve our operations and financial systems and staff; if we cannot improve these systems or recruit suitable employees, our performance may be adversely affected.

Our current operating and financial systems may not be adequate if we implement a plan to expand the size of our fleet, and our attempts to improve those systems may be ineffective. If we are unable to operate our financial and operations systems effectively or to recruit suitable employees as we expand our fleet, our performance may be adversely affected.

A drop in spot charter rates may provide an incentive for some charterers to default on their charters, which could affect our cash flow and financial condition.

During August 2009, we announced that the bareboat charterer of the M/V Papillon (ex VOC Gallant) had notified us of its intention to pay a reduced charterhire rate of \$18,000 per day for the month of August rather than \$24,000 per day on a bareboat basis as is set forth in the charterparty. The dispute was resolved and the charterer has paid the full amount of charterhire as required under the charter agreements.

On January 11, 2010, we announced that we had received from the bareboat charterer of the M/T Ionian Wave and the M/T Tyrrhenian Wave a reduced charter hire rate of \$10,000 per day rather than the \$14,300 per day on a bareboat basis that is set forth in the charter agreement. Furthermore on January 26, 2011, we announced that we had received from the same charterer another decrease in the charter hire rate that currently stands at \$9,092 per day. We have been examining this unilateral reduction and intend to take all necessary steps to recover the amounts owed since the said charterer is considered to be in breach of the charter. We may not be able to recover these amounts, which would result in lower-than-expected cash flows.

When we enter into a time or bareboat charter, charter rates under that charter are fixed for the term of the charter. If the spot charter rates in the tanker or drybulk shipping industry, as applicable, become significantly lower than the time charter equivalent rates that some of our charterers are obligated to pay us under our existing charters, the charterers may have incentive to default under that charter or attempt to renegotiate the charter. If our charterers fail to pay their obligations, we would have to attempt to re-charter our vessels at lower charter rates, and as a result we could sustain significant losses which could have a material adverse effect on our cash flow and financial condition, which would affect our ability to meet our loan repayment obligations in which case our lenders could choose to accelerate our indebtedness and foreclose their liens, and we could be required to sell vessels in our fleet and our ability to continue to conduct our business would be impaired.

An increase in operating costs would decrease earnings and available cash.

Our vessel operating costs include the costs of crew, fuel (for spot chartered vessels), provisions, deck and engine stores, insurance and maintenance and repairs, which depend on a variety of factors, many of which are beyond our control. Some of these costs, primarily relating to insurance and enhanced security measures, have been increasing. If our vessels suffer damage, they may need to be repaired at a drydocking facility. The costs of drydocking repairs are unpredictable and can be substantial. Increases in any of these expenses would decrease earnings and available cash.

The aging of our fleet may result in increased operating costs in the future, which could adversely affect our earnings.

In general, the cost of maintaining a vessel in good operating condition increases with the age of the vessel. Our current operating fleet has an average age of approximately seven years, including our chartered-in vessel M/T Delos which is 20 years old. As our fleet ages, we will incur increased costs. Older vessels are typically less fuel efficient and more costly to maintain than more recently constructed vessels due to improvements in engine technology. Cargo insurance rates also increase with the age of a vessel, making older vessels less desirable to charterers. Governmental regulations, including environmental regulations, safety or other equipment standards related to the age of vessels may require expenditures for alterations, or the addition of new equipment, to our vessels and may restrict the type of activities in which our vessels may engage. As our vessels age, market conditions might not justify those expenditures or enable us to operate our vessels profitably during the remainder of their useful lives.

Unless we set aside reserves or are able to borrow funds for vessel replacement, our revenue will decline at the end of a vessel's useful life, which would adversely affect our business, results of operations and financial condition.

Unless we maintain reserves or are able to borrow or raise funds for vessel replacement, we will be unable to replace the vessels in our fleet upon the expiration of their remaining useful lives, which we estimate to be 25 years from the date of initial delivery from the shipyard. Our cash flows and income are dependent on the revenues earned by the chartering of our vessels to customers. If we are unable to replace the vessels in our fleet upon the expiration of their useful lives, our business, results of operations and financial condition will be materially and adversely affected.

Purchasing and operating previously owned, or secondhand, vessels may result in increased operating costs and vessels off-hire, which could adversely affect our earnings.

We may grow through the acquisition of previously owned vessels. While we rigorously inspect previously owned, or secondhand vessels prior to purchase, this does not normally provide us with the same knowledge about their condition and cost of any required (or anticipated) repairs that we would have had if these vessels had been built for and operated exclusively by us. Accordingly, we may not discover defects or other problems with such vessels prior to purchase. Any such hidden defects or problems, when detected, may be expensive to repair, and if not detected, may result in accidents or other incidents for which we may become liable to third parties. Also, when purchasing previously owned vessels, we do not receive the benefit of warranties from the builders if the vessels we buy are older than one year. In general, the costs to maintain a vessel in good operating condition increase with the age and type of the vessel. In the case of chartered-in vessels we run the same risks.

We may not have adequate insurance to compensate us if we lose our vessels.

We procure insurance for our fleet against those types of risks commonly insured against by vessel owners and operators. These insurances include hull and machinery insurance, protection and indemnity insurance, which includes environmental damage and pollution insurance coverage and war risk insurance. Reasonable insurance rates can best be obtained when the size and the age/trading profile of the fleet is attractive. As a result, rates become less competitive as a fleet downsizes .

In the future, we may not be able to obtain adequate insurance coverage at reasonable rates for our fleet. The insurers may not pay particular claims. Our insurance policies contain deductibles for which we will be responsible as well as, limitations and exclusions which may nevertheless increase our costs or lower our revenue.

We may be subject to calls because we obtain some of our insurance through protection and indemnity associations.

We may be subject to increased premium payments, or calls, in amounts based on our claim records and the claim records of our fleet managers as well as the claim records of other members of the protection and indemnity associations through which we receive insurance coverage for tort liability, including pollution-related liability. In addition, our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expense to us, which could have a material adverse effect on our business, results of operations and financial condition.

Maritime claimants could arrest our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against that vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lienholder may enforce its lien by "arresting" or "attaching" a vessel through foreclosure proceedings. The arrest or attachment of one or more of our vessels could result in a significant loss of earnings for the related off-hired period. In addition, in jurisdictions where the "sister ship" theory of liability applies, a claimant may arrest the vessel which is subject to the claimant's maritime lien and any "associated" vessel, which is any vessel owned or controlled by the same owner. In countries with "sister ship" liability laws, claims might be asserted against us or any of our vessels for liabilities of other vessels that we own.

Governments could requisition our vessels during a period of war or emergency, resulting in loss of earnings.

A government of a vessel's registry could requisition for title or seize our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. A government could also requisition our vessels for hire. Requisition for hire occurs when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Generally, requisitions occur during a period of war or emergency. Government requisition of one or more of our vessels could negatively impact our revenues should we not receive adequate compensation.

Certain existing stockholders, who hold approximately 32.64% of our common stock, may have the power to exert control over us, which may limit your ability to influence our actions.

As of March 1, 2011, Sovereign Holdings Inc., or Sovereign Holdings, a company that is wholly owned by our President, CEO and Director, Evangelos J. Pistiolis, and Kingdom Holdings Inc., or Kingdom Holdings, a company owned primarily by adult relatives of Mr. Pistiolis, own, directly or indirectly, approximately 14.31% of the outstanding shares of our common stock. In addition, Sphinx Investment Corp., Maryport Navigation Corp. and Mr. George Economou through Sphinx Investment Corp. and Maryport Navigation Corp. beneficially own 12.09% of the outstanding shares of our common stock. QVT Financial LP, QVT Financial GP LLC and QVT Associates GP LLC own 6.24% of the outstanding shares of our common stock. Sphinx Investment Corp., Maryport Navigation Corp., QVT Financial LP, QVT Financial GP LLC and QVT Associates GP LLC are entities owned and controlled by unaffiliated third parties. Together, these existing shareholders own 32.64% of our common stock. While to our knowledge these shareholders have no agreement, arrangement or understanding relating to the voting of their shares of common stock, due to the number of shares of our common stock they own, they have the power to exert considerable influence over our actions. The interests of these stockholders may be different from your interests.

We may have to pay tax on U.S. source income, which would reduce our earnings.

Under the U.S. Internal Revenue Code of 1986, or the Code, 50% of the gross shipping income of a vessel owning or chartering corporation, such as ourselves and our subsidiaries, that is attributable to transportation that begins or ends, but that does not begin and end, in the U.S. is characterized as U.S. source shipping income and such income is subject to a 4% U.S. federal income tax without allowance for deduction, unless that corporation qualifies for exemption from tax under Section 883 of the Code. We expect that we and each of our subsidiaries will qualify for this statutory tax exemption and we have taken this position for U.S. federal income tax return reporting purposes. However, there are factual circumstances beyond our control that could cause us to lose the benefit of this tax exemption and thereby become subject to U.S. federal income tax on our U.S. source income. Therefore, we can give no assurances on our tax-exempt status or that of any of our subsidiaries. If we or our subsidiaries are not entitled to this exemption under Section 883 of the Code for any taxable year, we or our subsidiaries would be subject for those years to a 4% U.S. federal income tax on our U.S. source shipping income. The imposition of this tax could have a negative effect on our business.

We are likely to be treated as a "passive foreign investment company," which could have adverse U.S. federal income tax consequences to U.S. shareholders.

A foreign corporation will be treated as a "passive foreign investment company," or PFIC, for U.S. federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of certain types of "passive income" or (2) at least 50% of the average value of the corporation's assets produce or are held for the production of those types of "passive income." For purposes of these tests, "passive income" includes dividends, interest, gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received

from unrelated parties in connection with the active conduct of a trade or business. Income derived from the performance of services does not constitute "passive income" for this purpose. U.S. shareholders of a PFIC are subject to a disadvantageous U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

In general, income derived from the bareboat charter of a vessel should be treated as "passive income" for purposes of determining whether a foreign corporation is a PFIC, and such vessel should be treated as an asset which produces or is held for the production of "passive income." On the other hand, income derived from the time charter of a vessel should not be treated as "passive income" for such purpose, but rather will be treated as services income; likewise, a time chartered vessel should generally not be treated as an asset which produces or is held for the production of "passive income."

For our 2010 taxable year, we believe that at least 50% of the average value of our assets consisted of vessels which are bareboat chartered. Therefore, we expect to be treated as a PFIC for our 2010 taxable year. We intend to take necessary steps in order to avoid being classified as a PFIC for 2011 and future taxable years, such as expanding our fleet through the purchase of non-passive income producing assets. However, there can be no assurance that such remedial measures will be effective to avoid PFIC status for 2011 or any future taxable year.

Our U.S. shareholders may face adverse U.S. federal income tax consequences and certain information reporting obligations as a result of us being treated as a PFIC. Under the PFIC rules, unless those shareholders make an election available under the Code (which election could itself have adverse consequences for such shareholders, as discussed below under "Taxation— U.S. Federal Income Taxation – U.S. Federal Income Taxation of U.S. Holders"), such shareholders would be liable to pay U.S. federal income tax at the then prevailing income tax rates on ordinary income plus interest upon excess distributions and upon any gain from the disposition of their common shares, as if the excess distribution or gain had been recognized ratably over the shareholder's holding period of the common shares. See "Taxation – U.S. Federal Income Taxation – U.S. Federal Income Taxation of U.S. Holders" for a more comprehensive discussion of the U.S. federal income tax consequences to U.S. shareholders as a result of our status as a PFIC. In addition, as a result of being treated as a PFIC for the 2010 taxable year, any dividends paid by us during 2010 and 2011 will not be eligible to be treated as "qualified dividend income," which would otherwise be eligible for preferential tax rates in the hands of non-corporate U.S. shareholders.

Because we generate all of our revenues in U.S. Dollars but incur a portion of our expenses in other currencies, exchange rate fluctuations could hurt our results of operations.

We generate all of our revenues in U.S. Dollars but incur certain expenses in currencies other than U.S. Dollars, mainly Euros. During 2010, approximately 18% of our expenses were in Euros and approximately 2% were in currencies other than the U.S. Dollar or Euro. This difference could lead to fluctuations in net income due to changes in the value of the U.S. Dollar relative to the other currencies, in particular, the Euro. Should the Euro appreciate relative to the U.S. Dollar in future periods, our expenses will increase in U.S. Dollar terms, thereby decreasing our net income. We have not hedged these risks and therefore our operating results could suffer as a result.

Risks Relating to Our Common Shares

Our share price may continue to be highly volatile, which could lead to a loss of all or part of a shareholder's investment.

The market price of our common shares has fluctuated widely since our common shares began trading in July of 2004 on the Nasdaq National Market, now the Nasdaq Global Select Market. Over the last few years, the stock market has experienced price and volume fluctuations. This volatility has sometimes been unrelated to the operating performance of particular companies. During 2010, the closing price of our common shares experienced a high of \$1.28 on April 14, 2010 and a low of \$0.64 on September 29, 2010. On August 12, 2010 we received notification from the Nasdaq Global Select Market that we were not in compliance with its minimum bid price requirements. We subsequently regained compliance. On March 28, 2011 we received a notification from Nasdaq stating that our common stock was again in violation of its minimum bid price requirements. The applicable grace period to regain compliance is 180 calendar days expiring September 26, 2011. Such notification may require us to carry out the authorized reverse stock split or take other measures to increase our stock price, but we cannot guarantee that any measure will allow us to regain compliance with Nasdaq's listing requirements. In addition, because the market price of our common shares has dropped below \$5.00 per share, brokers generally prohibit shareholders from using such shares as collateral for borrowing in margin accounts. This inability to continue to use our common shares as collateral may lead to sales of such shares creating downward pressure on and increased volatility in the market price of our common shares. Furthermore, if the volatility in the market continues or worsens, it could have a further adverse affect on the market price of our common shares, regardless of our operating performance.

The market price of our common shares is due to a variety of factors, including:

- fluctuations in interest rates;
- fluctuations in the availability or the price of oil;
- fluctuations in foreign currency exchange rates;
- announcements by us or our competitors;
- changes in our relationships with customers or suppliers;
- actual or anticipated fluctuations in our quarterly and annual results and those of other public companies in our industry;
- changes in United States or foreign tax laws;
- actual or anticipated fluctuations in our operating results from period to period;
- shortfalls in our operating results from levels forecast by securities analysts;
- market conditions in the shipping industry and the general state of the securities markets;
- mergers and strategic alliances in the shipping industry;
- changes in government regulation;
- a general or industry-specific decline in the demand for, and price of, shares of our common stock resulting from capital market conditions independent of our operating performance;
- the loss of any of our key management personnel; and

- our failure to successfully implement our business plan.

There may not be a continuing public market for you to resell our common shares.

Our common shares and warrants began trading in July of 2004 on the Nasdaq National Market, and our common shares currently trade on the Nasdaq Global Select Market; however, an active and liquid public market for our common shares may not continue and you may not be able to sell your common shares in the future at the price that you paid for them or at all. If the price of our common shares remains below \$1.00 for a period of 30 consecutive business days and we are unable to comply with the minimum bid price requirements of the Nasdaq Global Select Market, including any applicable cure period, we may be involuntarily delisted from the Nasdaq Global Select Market. As noted above, on August 12, 2010 we received notification from the Nasdaq Global Select Market that our common stock price was in violation of its minimum bid price requirements. In response, we obtained shareholder authorization at our annual general meeting held on September 30, 2010 to conduct a reverse stock split at a ratio of not less than one-for-two and not more than one-for-ten, if necessary to regain compliance. On January 10, 2011 an increase in the price per share of our common stock resulted in our complying with the Nasdaq Global Select Market listing requirements. We therefore did not carry out the authorized reverse stock split. On March 28, 2011 we received a notification from Nasdaq stating that our common stock was again in violation of its minimum bid price requirements. The applicable grace period to regain compliance is 180 calendar days expiring September 26, 2011. Such notification may require us to carry out the authorized reverse stock split or take other measures to increase our stock price, but we cannot guarantee that any measure will allow us to regain compliance with Nasdaq's listing requirements.

Shareholders may experience significant dilution as a result of future equity offerings or issuance if shares are sold at prices significantly below the price at which shareholders invested.

Our existing shareholders may experience significant dilution if we issue shares in the future at prices significantly below the price at which previous shareholders invested.

Future issuances or sales, or the potential for future issuances or sales, of our common shares, or the conversion of convertible debt into our common shares, may cause the trading price of our securities to decline and could impair our ability to raise capital through subsequent equity offerings.

We have issued a significant number of our common shares and convertible debt that may be converted into common shares and we anticipate that we will continue to do so in the future. The additional shares issued and to be issued in the future upon the conversion of debt could cause the market price of our common shares to decline, and could have an adverse effect on our earnings per share if and when we become profitable. In addition, future sales of our common shares or other securities in the public markets, or the perception that these sales may occur, could cause the market price of our common shares to decline, and could materially impair our ability to raise capital through the sale of additional securities.

Lack of volume in our stock may affect investors' ability to sell their shares.

Our common shares have been experiencing low daily trading volumes in the market. As a result, an investor may be unable to sell all of such investor's shares in the desired time period, or may only be able to sell such shares at a significant discount to the previous closing price.

We are incorporated in the Republic of the Marshall Islands, which does not have a well-developed body of corporate law and as a result, shareholders may have fewer rights and protections under Marshall Islands law than under a typical jurisdiction in the United States.

Our corporate affairs are governed by our Amended and Restated Articles of Incorporation and By-laws and by the Marshall Islands Business Corporations Act, or BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the law of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain United States jurisdictions. Shareholder rights may differ as well. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, our public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a United States jurisdiction.

It may not be possible for investors to serve process on or enforce U.S. judgments against us.

We and all of our subsidiaries are incorporated in jurisdictions outside the U.S. and substantially all of our assets and those of our subsidiaries are located outside the U.S. In addition, most of our directors and officers are non-residents of the U.S., and all or a substantial portion of the assets of these non-residents are located outside the U.S. As a result, it may be difficult or impossible for U.S. investors to serve process within the U.S. upon us, our subsidiaries or our directors and officers or to enforce a judgment against us for civil liabilities in U.S. courts. In addition, you should not assume that courts in the countries in which we or our subsidiaries are incorporated or where our assets or the assets of our subsidiaries are located (1) would enforce judgments of U.S. courts obtained in actions against us or our subsidiaries based upon the civil liability provisions of applicable U.S. federal and state securities laws or (2) would enforce, in original actions, liabilities against us or our subsidiaries based on those laws.

We may be subject to litigation that, if not resolved in our favor and not sufficiently insured against, could have a material adverse effect on us.

We may be, from time to time, involved in various litigation matters. These matters may include, among other things, contract disputes, personal injury claims, environmental claims or proceedings, asbestos and other toxic tort claims, employment matters, governmental claims for taxes or duties, and other litigation that arises in the ordinary course of our business. Although we intend to defend these matters vigorously, we cannot predict with certainty the outcome or effect of any claim or other litigation matter, and the ultimate outcome of any litigation or the potential costs to resolve them may have a material adverse effect on us. Insurance may not be applicable or sufficient in all cases and/or insurers may not remain solvent which may have a material adverse effect on our financial condition.

Anti-takeover provisions in our organizational documents could have the effect of discouraging, delaying or preventing a merger, amalgamation or acquisition, which could reduce the market price of our common shares.

Several provisions of our Amended and Restated Articles of Incorporation and our Amended and Restated Bylaws could make it difficult for our shareholders to change the composition of our Board of Directors in any one year, preventing them from changing the composition of management. In addition, the same provisions may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable.

These provisions include:

• authorizing our Board of Directors to issue "blank check" preferred stock without shareholder approval;

• providing for a classified Board of Directors with staggered, three-year terms;

• prohibiting cumulative voting in the election of directors;

• authorizing the removal of directors only for cause and only upon the affirmative vote of the holders of at least 80% of the outstanding shares of our capital stock entitled to vote for the directors;

• prohibiting shareholder action by written consent unless the written consent is signed by all shareholders entitled to vote on the action;

• limiting the persons who may call special meetings of shareholders; and

• establishing advance notice requirements for nominations for election to our Board of Directors or for proposing matters that can be acted on by shareholders at shareholder meetings.

In addition, we have entered into a Stockholders Rights Agreement that will make it more difficult for a third party to acquire us without the support of our Board of Directors and principal shareholders. These anti-takeover provisions could substantially impede the ability of public shareholders to benefit from a change in control and, as a result, may reduce the market price of our common stock and your ability to realize any potential change of control premium.

Risks related to our relationship with our Fleet Manager and its affiliates

We are dependent on our Fleet Manager to perform the day-to-day management of our fleet.

Our executive management team consists of our President and CEO Evangelos Pistiolis, our Chief Financial Officer, Alexandros Tsirikos, our Executive Vice President, Vangelis Ikonomou and our Chief Technical Officer, Demetris Souroullas. We subcontract the day-to-day vessel management of our fleet, including crewing, maintenance and repair to our Fleet Manager. Our Fleet Manager is a related party controlled by the family of the Company's CEO, we are dependent on our Fleet Manager for the technical and commercial operation of our fleet and the loss of our Fleet Manager's services or failure to perform obligations to us could materially and adversely affect the results of our operations. If our Fleet Manager suffers material damage to its reputation or relationships it may harm our ability to:

continue to operate our vessels and service our customers;

renew existing charters upon their expiration;

obtain new charters;

obtain financing on commercially acceptable terms;

obtain insurance on commercially acceptable terms;
maintain satisfactory relationships with our customers and suppliers; and
successfully execute our growth strategy.

Our Fleet Manager is a privately held company and there may be limited or no publicly available information about it.

Our Fleet Manager is a privately held company. The ability of our Fleet Manager to continue providing services for our benefit will depend in part on its own financial strength. Circumstances beyond our control could impair our Fleet Manager's financial strength, and there may be limited publicly available information about its financial strength. As a result, an investor in our common shares might have little advance warning of problems affecting our Fleet Manager, even though these problems could have a material adverse effect on us.

Our Fleet Manager may have conflicts of interest between us and its other clients.

We have subcontracted the day-to-day technical and commercial management of our fleet, including crewing, maintenance, supply provisioning and repair to our Fleet Manager. Our contracts with our Fleet Manager have an initial term of five years. Our Fleet Manager will provide similar services for vessels owned by other shipping companies, and it may provide similar services to companies with which our Fleet Manager is affiliated. These responsibilities and relationships could create conflicts of interest between our Fleet Manager's performance of its obligations to us, on the one hand, and our Fleet Manager's performance of its obligations to its other clients, on the other hand. These conflicts may arise in connection with the crewing, supply provisioning and operations of the vessels in our fleet versus vessels owned by other clients of our Fleet Manager. In particular, our Fleet Manager may give preferential treatment to vessels owned by other clients whose arrangements provide for greater economic benefit to our Fleet Manager. These conflicts of interest may have an adverse effect on our results of operations.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

Our predecessor, Ocean Holdings Inc., was formed as a corporation in January 2000 under the laws of the Republic of the Marshall Islands and renamed TOP TANKERS INC. in May 2004. In December 2007, TOP TANKERS INC. was renamed TOP SHIPS INC. Our common stock is currently listed on the NASDAQ Global Select Market under the symbol "TOPS". The current address of our principal executive office is 1 Vas. Sofias and Meg. Alexandrou Str, 15124 Maroussi, Greece. The telephone number of our registered office is +30 210 812 8000.

On July 23, 2004, we completed our initial public offering. The net proceeds of our initial public offering, approximately \$124.6 million, were primarily used to finance the acquisition of 10 vessels, comprised of eight Ice-class double-hull Handymax tankers and two double-hull Suezmax tankers. The total cost of the acquisition was approximately \$251.3 million.

On November 5, 2004, we completed a follow-on offering of our common stock. The net proceeds of our follow-on offering, approximately \$139.5 million, were used primarily to finance the acquisition of five double-hull Suezmax tankers. The total cost of the acquisition was approximately \$249.3 million.

During 2005, we acquired five double-hull Handymax and four double-hull Suezmax tankers at a total cost of \$453.4 million and sold one double-hull Handymax and our last single-hull Handysize tanker. We sold and leased-back five double-hull Handymax tankers for a period of seven years.

From April 2006, until July 2006, we issued through a "controlled equity offering" 1,302,454 shares of common stock, par value \$0.01. The net proceeds totaled \$26.9 million.

During 2006, we sold and leased-back on a fixed charter basis four double-hull Handymax, four double-hull Suezmax and five double-hull Suezmax tankers for periods of five years, five years and seven years, respectively. Additionally, we sold three double-hull Handymax tankers, and we entered into an agreement with SPP Shipbuilding Co., Ltd. of the Republic of Korea, or SPP, for the construction of six product/chemical tankers.

In May 2007, we re-acquired four Suezmax tankers that we sold in 2006 in an earlier sale and leaseback transaction and terminated the respective bareboat charters. The re-acquisition price was \$208.0 million and was partially financed by the early redemption of the seller's credit of \$20.6 million associated with the 2006 sales and leaseback transactions, along with secured debt financing and cash from operations.

From June 2007 until July 2007, we issued through a "controlled equity offering" 1,435,874 shares of common stock, par value \$0.01. The net proceeds totaled \$29.4 million.

During July and August 2007, we agreed to acquire one Supramax, one Handymax and four Panamax drybulk vessels at a total cost of \$370.1 million. The Handymax and two of the four Panamax drybulk vessels were delivered to us during the fourth quarter of 2007. The Supramax and the remaining two Panamax drybulk vessels were delivered to us during the first two quarters of 2008.

In December 2007, we completed a follow-on offering of our common stock. The net proceeds of this follow-on offering, approximately \$68.9 million, were used primarily to repay outstanding secured debt and to partially finance the acquisition of the six drybulk vessels mentioned above, one of which we have since sold.

During 2007 we sold one Suezmax tanker, we agreed to sell one Suezmax tanker that we later delivered in January 2008 to its new owners, and we terminated the bareboat charters on three Handymax tankers that we sold in 2006 in sale and leaseback transactions, due to the sale of the vessels by their owners to third parties.

During 2008, we took delivery of one Supramax drybulk vessel and two Panamax drybulk vessels, which we had agreed to acquire in 2007 as mentioned above. Additionally, during 2008, we sold seven owned Suezmax tankers and one Panamax drybulk vessel and we arranged the sale of six chartered-in vessels, under bareboat charters, and terminated the respective charters.

On March 20, 2008, we effected a three-for-one reverse stock split of our common stock. There was no change in the number of authorized common shares. As a result of the reverse stock split, the number of outstanding shares as of March 20, 2008 decreased to 20,705,380, while the par value of our common shares remained unchanged at \$0.01 per share.

In April 2008, we privately placed with various investors 7.3 million unregistered shares of common stock, par value \$0.01, for aggregate proceeds of approximately \$51.0 million. The 7.3 million shares were sold for \$7.00 per share, which represents a discount of 15.5 percent based on the closing share price of \$8.28 on April 23, 2008. In July 2008, we filed a registration statement on Form F-3, with respect to these 7.3 million shares.

During the fourth quarter of 2008, the Board of Directors authorized a share repurchase program up to \$20 million for a share price of not more than \$2.50 per share for the duration of one year. We began the share repurchases during the fourth quarter of 2008 and the transactions were made in the open market on NASDAQ under Rule 10b-18 of the Exchange Act. As at December 31, 2008, we repurchased and cancelled an amount of 396,949 shares from the open market. We continued our repurchase program until February 3, 2009. During the first two months of 2009, we repurchased an amount of 358,601 shares from the open market. All the outstanding shares that have been repurchased under this program were held initially as treasury stock and were subsequently cancelled. Consequently, the outstanding amount of 358,601 shares was cancelled effective as of February 25, 2009.

In February 2009, we took delivery of M/T Miss Marilena and M/T Lichtenstein from SPP. M/T Miss Marilena and M/T Lichtenstein are two out of six 50,000 dwt product / chemical tankers delivered in 2009. M/T Miss Marilena and M/T Lichtenstein entered into bareboat time-charter employment for a period of 10 years at a daily rate of \$14,400 and \$14,550, respectively.

In March 2009, we took delivery of M/T Ionian Wave and M/T Tyrrhenian Wave from SPP. M/T Ionian Wave and M/T Tyrrhenian Wave are the third and fourth out of the six 50,000 dwt product / chemical tankers discussed above. M/T Ionian Wave and M/T Tyrrhenian Wave entered into bareboat time-charter employment for a period of seven years at a daily rate of \$14,300, with three successive one-year options at a higher daily rate.

In April 2009, we agreed with the owners of the M/T Relentless to terminate the bareboat charter initially entered into as part of the sale and leaseback deal in 2005. Under this agreement, we redelivered the vessel to its owners and paid a termination fee of \$2.5 million during the third quarter of 2009. The bareboat charter would have expired in 2012.

On May 22, 2009, we took delivery of M/T Britto from SPP. M/T Britto is the fifth out of the six 50,000 dwt newbuilding product / chemical tankers delivered in 2009. M/T Britto entered into bareboat time-charter employment for a period of ten years at a daily rate of \$14,550.

On June 24, 2009, we terminated the bareboat charters, initially entered into as part of the sale and leaseback deal in 2006, and redelivered the vessels M/T Faithful, the M/T Doubtless, the M/T Spotless and the M/T Vanguard to their owners after paying \$11.8 million in termination fees and expenses. In addition to the termination fees and expenses, we forfeited our right to receive the seller's credit of \$10.0 million from the initial sale of the vessels, which would have been received upon the expiration of the bareboat charters, and we paid for the dry-dock of the M/T Spotless which was completed during July 2009. The bareboat charters were set to expire in 2011. We remained the managers of M/T Faithful until April 30, 2010, which was shortly after the expiration of its time charter, and we were reimbursed by the owners for all expenses incurred.

On July 3, 2009, we redelivered the M/T Relentless to its owners and paid the termination fee of \$2.5 million as part of a termination agreement signed in April 2009 to terminate the bareboat charter initially entered into as part of the sale and leaseback deal in 2005. In addition to the termination fee, we had undertaken to perform certain works on the vessel prior to its redelivery which involved additional costs. From the date of the agreement until the date of redelivery, the bareboat hire had been set at \$7,000 per day. This was the last leased vessel in our fleet.

On July 1, 2009, we entered into a Standby Equity Distribution Agreement, or the SEDA, with YA Global Master SPV LTD., or YA Global, pursuant to which we may offer and sell up to \$200 million worth of our common shares to YA Global. The SEDA has a duration of three years. We made initial sales under the SEDA on August 13, 2009 and continued through October 1, 2009. As of that date, 2,230,000 shares had been sold with net proceeds amounting to approximately \$2.9 million. During the period from October 21, 2009 to the date of this report, no further shares have been sold to YA Global under the SEDA.

On August 3, 2009, we took delivery of the M/T Hongbo, the last of the six 50,000 dwt newbuilding product / chemical tankers built in the SSP shipyard in the Republic of Korea. On August 3, 2009 M/T Hongbo entered into bareboat time-charter employment for a period of ten years at a daily rate of \$14,550.

In response to a Nasdaq notification received in August 2010 that our common stock was in violation of its minimum bid price requirements, we obtained shareholder authorization at our annual general meeting held on September 30, 2010 to conduct a reverse stock split at a ratio of not less than one-for-two and not more than one-for-ten, if necessary to regain compliance, which authorization shall expire at the date of our 2011 annual general meeting of shareholders. During January 2011, we regained compliance with the Nasdaq requirement due to an increase in our common stock price. On March 28, 2011 we received a notification from Nasdaq stating that our common stock was again in violation of its minimum bid price requirements. The applicable grace period to regain compliance is 180 calendar days expiring September 26, 2011.

On October 1, 2010 we entered into a bareboat agreement to charter in the M/T Delos for five years at an average daily rate of \$5,219.

On November 5, 2010, we sold M/T Dauntless for \$20.1 million.

As of December 31, 2010, our fleet consisted of twelve owned vessels and one chartered-in vessel under a bareboat charter. This fleet includes eight Handymax tankers, one Supramax drybulk vessel, one Handymax drybulk vessel, and three Panamax drybulk vessels, with total carrying capacity of 0.7 million dwt. As of December 31, 2009, our fleet consisted of thirteen owned vessels, with total carrying capacity of 0.7 million dwt.

B. Business Overview

Business Strategy

We are a provider of international seaborne transportation services, carrying petroleum products and crude oil for the oil industry and drybulk commodities for the steel, electric utility, construction and agriculture-food industries. As of the date of this annual report, our fleet consists of twelve owned vessels and one bareboat chartered-in vessel (eight tankers and five drybulk vessels).

Four of our drybulk vessels are currently employed on time charters and six of our tankers and one of our drybulk vessels are employed on bareboat charters. We actively manage the deployment of our fleet between time charters and bareboat charters, which last from several months to several years and voyage charters in the spot market which last from several days to several weeks. Of our fleet, 63% by dwt are sister ships, which enhances the revenue generating potential of our fleet by providing us with operational and scheduling flexibility. Sister ships also increase our operating efficiencies because technical knowledge can be applied to all vessels in a series and create cost efficiencies and economies of scale when ordering spare parts, supplying and crewing these vessels.

During 2006, we ordered six newbuilding product/chemical tankers in the SPP shipyard in the Republic of Korea in order to modernize our tanker fleet. All of these tankers were delivered to us during 2009.

In 2007 we diversified our fleet portfolio by acquiring drybulk vessels, beginning with the acquisition of six drybulk vessels, one of which we subsequently sold.

We intend to continue to review the market in order to identify potential acquisition targets on accretive terms.

We believe we have established a reputation in the international ocean transport industry for operating and maintaining our fleet with high standards of performance, reliability and safety. We have assembled a management team comprised of executives who have extensive experience operating large and diversified fleets of tankers and drybulk vessels, and who have strong ties to a number of national, regional and international oil companies, charterers and traders.

Our Fleet

The following table presents our fleet list and employment as of the date of this annual report:

	Dwt	Year Built	Charter Type	Expiry	Daily Base Rate	
Eight Tanker Vessels						
Ioannis P	46,346	2003	Spot			
Miss Marilena	50,000	2009	Bareboat Charter	Q1-2/2019	\$ 14,400	
Lichtenstein	50,000	2009	Bareboat Charter	Q1-2/2019	\$ 14,550	
Ionian Wave	50,000	2009	Bareboat Charter	Q1-2/2016	\$ 14,300	A
Thyrrhenian Wave	50,000	2009	Bareboat Charter	Q1-2/2016	\$ 14,300	A
Britto	50,000	2009	Bareboat Charter	Q1-2/2019	\$ 14,550	
Hongbo	50,000	2009	Bareboat Charter	Q1-2/2019	\$ 14,550	
DelosB	47,067	1991	Spot			

Total Tanker dwt

393,413

33

	Dwt	Year Built	Charter Type	Expiry	Daily Base Rate
Five Drybulk Vessels					
Cyclades	75,681	2000	Time Charter	Q1-2/2014 - Q4/2011 -	\$20,000
Amalfi	45,526	2000	Time Charter	Q1/2012	\$14,000
Papillon (ex Voc Gallant))	51,200	2002	Bareboat Charter	Q1-3/2012	\$24,000
Pepito	75,928	2001	Time Charter	Q1-2/2013	\$41,000
Astrale	75,933	2000	Time Charter	Q3-4/2011	\$18,000
Total Drybulk dwt	324,268				
TOTAL DWT	717,681				

A. On January 11, 2010, we announced that we received from the bareboat charterer of the M/T Ionian Wave and the M/T Tyrrhenian Wave, a reduced charter hire rate of \$10,000 per day rather than the \$14,300 per day on a bareboat basis that is set forth in the charter agreement. Furthermore on January 26, 2011, we announced that we had received from the same charterer a further reduced charter hire rate of \$9,092 per day. We are currently examining this unilateral reduction and intend to take all necessary steps to recover the amounts owed since the said charterer is considered to be in breach of the charter.

B. On October 1, 2010, we entered into a bareboat agreement to charter in M/T Delos for five years at an average daily rate of \$5,219.

Management of the Fleet

Except as set forth below, since July 1, 2010, our Fleet Manager, Central Mare, a related party controlled by the family of our CEO, has been performing all of our operational, technical and commercial functions relating to the chartering and operation of our vessels, pursuant to management agreements concluded between Central Mare and Top Ships, as well as between Central Mare and our vessel-owning subsidiaries.

On October 1, 2010, we entered into a management agreement with TMS Tankers, a related party, for the technical management and crewing of M/T Delos. Commercial management of the vessel was contracted to Central Mare as of that date. The management agreement with TMS Tankers is expected to be terminated during the second quarter of 2011 and all management functions performed by TMS Tankers will be transferred to another manager.

Through June 30, 2010, TOP Tanker Management Inc., or TOP Tanker Management, our wholly-owned subsidiary, was responsible for the management of our fleet.

Central Mare – Letter Agreement and Management Agreements

Pursuant to a letter agreement concluded between Central Mare and Top Ships as well as management agreements concluded between Central Mare and our vessel-owning subsidiaries, we pay a management fee of Euro 650 or \$868 per day per vessel that is employed under a time or voyage charter and a management fee of Euro 250 or \$334 per day per vessel that is employed under a bareboat charter. Throughout this annual report, the conversion from Euros to U.S.

Dollars is based on the U.S. Dollar/Euro exchange rate of 1.3352 as of December 31, 2010, unless otherwise specified. In addition, the management agreements provide for payment to Central Mare of: (i) a fee of Euro 100 or \$134 per day per vessel for services in connection with compliance with Section 404 of the Sarbanes-Oxley Act of 2002; (ii) Euro 500 or \$668 per day for superintendent visits; (iii) a chartering commission of 0.75% on all existing (as of July 1, 2010) freight, hire and demurrage revenues; (iv) a chartering commission of 1.25% on all new (concluded after July 1, 2010) freight, hire and demurrage revenues; (v) a commission of 1.00% of all gross sale proceeds or the purchase price paid for vessels; (vi) a quarterly fee of Euro 250,000 or \$333,800 for the services rendered in relation to the company's maintenance of proper books and records; (vii) a quarterly fee of Euro 80,000 or \$106,816 for services in relation to the financial reporting requirements of the company under Commission and NASDAQ rules and regulations; (viii) a commission of 0.2% on derivative agreements and loan financing or refinancing; (ix) a newbuilding supervision fee of Euro 400,000 or \$534,080 per newbuilding vessel and (x) an annual fee of Euro 10,000 or \$13,352 per vessel, for the provision of information-system related services.

Central Mare also provides commercial operations and freight collection services in exchange for a fee of Euro 90 or \$120 per day per vessel. Central Mare provides insurance services and obtains insurance policies for the vessels for a fee of 5.00% of the total insurance premiums. Furthermore, if required, Central Mare will also handle and settle all claims arising out of its duties under the management agreements (other than insurance and salvage claims) in exchange for a fee of Euro 150 or \$200 per person per eight hour day. Finally legal fees for claims and general corporate services incurred by Central Mare on behalf of the Company will be reimbursed to Central Mare at cost.

These agreements have an initial term of five years after which they will continue to be in effect until terminated by either party subject to a twelve month advance notice of termination.

Pursuant to the terms of the management agreements, all fees payable to Central Mare are adjusted upwards 3% per annum on each anniversary of the date the agreement. Transactions with the Manager in Euros are settled on the basis of the EUR/USD on the invoice date.

We pay TMS Tankers a daily management fee of \$1,500 for the technical management and crewing of M/T Delos. In addition, we pay Central Mare a daily management fee of \$1,000 for the commercial management of M/T Delos. The management agreement with TMS Tankers is expected to be terminated during the second quarter of 2011 and all management functions performed by TMS Tankers will be transferred to another manager.

Crewing and Employees

As of the date of this annual report our employees include our executive officers and four other employees, namely internal auditor, corporate development officer and two administrative employees whose services are provided by an agreement through Central Mare Inc., or Central Mare, which we refer to as our Fleet Manager, a related party controlled by the family of the Company's CEO. In addition, Central Mare is responsible for recruiting, mainly through a crewing agent, the senior officers and all other crew members for our vessels. We believe the streamlining of crewing arrangements will ensure that all our vessels will be crewed with experienced seamen that have the qualifications and licenses required by international regulations and shipping conventions.

The Industry - Tankers

The international tanker industry represents, we believe, the most efficient and safest method of transporting large volumes of crude oil and refined petroleum products such as gasoline, diesel, fuel oil, gas oil and jet fuel, as well as edible oils and chemicals.

Freight rates in the tanker shipping industry are determined by the supply of product tankers and the demand for crude oil and refined petroleum products transportation. Factors that affect the supply of product tankers and the demand for transportation of crude oil and refined petroleum products include:

Demand

- general economic conditions, including increases and decreases in industrial production and transportation, in which China has played a significant role since it joined the World Trade Organization.
 - oil prices;
 - environmental issues or concerns;
 - climate;
 - competition from alternative energy sources; and
 - regulatory environment.

Supply

- the number of combined carriers, or vessels capable of carrying oil or drybulk cargoes, carrying oil cargoes;
 - the number of newbuildings on order and being delivered;
- the number of tankers in lay-up, which refers to vessels that are in storage, dry-docked, awaiting repairs or otherwise not available or out of commission; and
 - the number of tankers scrapped for obsolescence or subject to casualties;
 - prevailing and expected future charterhire rates;
 - costs of bunkers, fuel oil, and other operating costs;
 - the efficiency and age of the world tanker fleet;
 - current shipyard capacity; and
- government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations.

Developments in the International Tanker Market

The Baltic Dirty Tanker Index, after a steep decline that started in mid-2008 and volatility throughout 2009 and 2010, has modestly risen. The Baltic Dirty Tanker Index declined from a high of 2,347 in July 2008 to a low of 453 in mid-April 2009, which represents a decline of 80%, but has since modestly risen to 891 as of April 6, 2011. The Baltic Clean Tanker Index fell from 1,509 as of June 19, 2008, to 345 as of April 4, 2009, but has modestly risen to 825 as of April 6, 2011. The dramatic decline in charter rates was due to various factors, including the significant fall in demand for crude oil and petroleum products, the consequent rising inventories of crude oil and petroleum products in the United States and in other industrialized nations and the corresponding reduction in oil refining, the dramatic fall

in the price of oil in 2008, and the restrictions on crude oil production that the Organization of Petroleum Exporting Countries (OPEC) and other non-OPEC oil producing countries have imposed in an effort to stabilize the price of oil. During 2010, the above factors affecting the Baltic Dirty and Clean Tanker Indices have subsided, allowing for the recovery of charter rates. However throughout 2010 fears of vessel oversupply and market disruptions have increased the volatility of charter rates and the respective Baltic Tanker indices.

The price of crude oil reached historical highs in the summer of 2008 but declined sharply thereafter as a result of the deterioration in the world economy, the collapse of financial markets, declining oil demand and bearish market sentiment. During 2009 and 2010, oil prices started rising again amidst a growing demand for oil leading to a price of approximately \$108 per barrel as of April 6, 2011.

The Industry – Drybulk Vessels

Drybulk cargo is cargo that is shipped in quantities and can be easily stowed in a single hold with little risk of cargo damage. The demand for drybulk vessel capacity is determined by the underlying demand for commodities transported in drybulk vessels, which in turn is influenced by trends in the global economy. Between 2000 and 2010, demand for seaborne drybulk commodities increased from 3.6 billion tons to 5.2 billion tons, representing a CAGR (compound average growth rate) of 3.45 %. One of the main reasons for that increase in drybulk trade was the growth in imports by China of iron ore, coal and steel products since 2000. Chinese imports of iron ore alone increased from 92.2 million tons in 2001 to approximately 619 million tons in 2010.

The supply of drybulk vessels is dependent on the delivery of new vessels and the removal of vessels from the global fleet, either through scrapping or loss. The orderbook of new drybulk vessels scheduled to be delivered until 2014 represents approximately 54% of the world drybulk fleet. The level of scrapping activity is generally a function of scrapping prices in relation to current and prospective charter market conditions, as well as operating, repair and survey costs. Drybulk vessels at or over 25 years old are considered to be scrapping candidate vessels.

Developments in the International Drybulk Shipping Industry

The Baltic Drybulk Index declined from a high of 11,793 in May 2008 to a low of 663 in December 2008, which represents a decline of 94%, but has since modestly risen to 1,430 as of April 6, 2011. The decline in charter rates was due to various factors, including the lack of trade financing for purchases of commodities carried by sea, which has resulted in a significant decline in cargo shipments, and the excess supply of iron ore in China, which has resulted in falling iron ore prices and increased stockpiles in Chinese ports. The decline in charter rates in the drybulk market also affected the value of our drybulk vessels, which followed the trends of drybulk charter rates, and earnings on our charters, and similarly, affected our cash flows, liquidity and compliance with the covenants contained in our loan agreements. During 2009 and 2010, the abovementioned factors affecting the BDI have partially subsided, allowing for the recovery of rates and a recovery in drybulk vessel values. However the Baltic Dry Index started to decline rapidly again in the last quarter of 2010 and has continued to do so in the first quarter of 2011, due to oversupply issues in the drybulk market.

Environmental and Other Regulations

Government regulations and laws significantly affect the ownership and operation of our vessels. We are subject to international conventions, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered and compliance with such laws, regulations and other requirements may entail significant expense.

Our vessels are subject to both scheduled and unscheduled inspections by a variety of government, quasi-governmental and private organizations including the local port authorities, national authorities, harbor masters or equivalent, classification societies, flag state administrations (countries of registry) and charterers. Our failure to maintain permits, licenses, certificates or other approvals required by some of these entities could require us to incur substantial costs or temporarily suspend operation of one or more of our vessels.

We believe that the heightened levels of environmental and quality concerns among insurance underwriters, regulators and charterers have led to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the industry. Increasing environmental concerns have created a demand for vessels that conform to stricter environmental standards.

We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations and that our vessels have all material permits, licenses, certificates or other authorizations necessary for the conduct of our operations; however, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these requirements, or the impact of these requirements on the resale value or useful lives of our vessels. In addition, additional legislation or regulation applicable to the operation of our vessels that may be implemented in the future for example, as a result of the 2010 Deepwater Horizon oil spill in the Gulf of Mexico, could negatively affect our profitability.

International Maritime Organization

The International Maritime Organization, or the IMO, the United Nations agency for maritime safety and the prevention of pollution by ships, has adopted several international conventions that regulate the international shipping industry, including the International Convention on Civil Liability for Oil Pollution Damage, the International Convention on Civil Liability for Bunker Oil Pollution Damage, and the International Convention for the Prevention of Pollution from Ships, or the MARPOL Convention. The MARPOL Convention establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and the handling of harmful substances in packaged form.

In September 1997, the IMO adopted Annex VI to MARPOL to address air pollution from ships. Annex VI came into force on May 19, 2005. It sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits deliberate emissions of ozone depleting substances, such as chlorofluorocarbons. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions. Annex VI has been ratified by some, but not all IMO member states. In October 2008, the Marine Environment Protection Committee, or MEPC, of the IMO approved amendments to Annex VI regarding particulate matter, nitrogen oxide and sulfur oxide emissions standards. These amendments entered into force in July 2010. They seek to reduce air pollution from vessels by establishing a series of progressive standards to further limit the sulfur content in fuel oil, which would be phased in by 2020, and by establishing new tiers of nitrogen oxide emission standards for new marine diesel engines, depending on their date of installation. Additionally, more stringent emission standards could apply in coastal areas designated as Emission Control Areas, or ECAs. Please see "United States—the U.S. Clean Air Act" below for information on the ECA designated in North America and the Hawaiian Islands. We have obtained International Air Pollution Prevention certificates evidencing compliance with Annex VI requirements for all of our vessels.

Although the United States is not a party, many countries have ratified the International Convention on Civil Liability for Oil Pollution Damage of 1969, as amended in 2000, or the CLC. Under this convention and depending on whether the country in which the damage results is a party to the 1992 Protocol to the CLC, a vessel's registered owner is strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil, subject under certain circumstances to certain defenses and limitations. Vessels trading to states that are parties to these conventions must provide evidence of insurance covering the liability of the owner. In jurisdictions where the CLC has not been adopted, various legislative schemes or common law govern, and liability is imposed either on the basis of fault or in a manner similar to the CLC.

The IMO also has adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage, or the Bunker Convention, which imposes strict liability on ship owners for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker fuel and requires registered owners of ships over 1,000 gross tons to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime.

The operation of our vessels is also affected by the requirements contained in the International Safety Management Code for the Safe Operation of Ships and for Pollution Prevention, or ISM Code, promulgated by the IMO under the International Convention for the Safety of Life at Sea, or SOLAS. The ISM Code requires the party with operational control of a vessel to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for operating its vessels safely and describing procedures for responding to emergencies. We intend to rely upon the safety management system that our appointed ship managers have developed.

Noncompliance with the ISM Code or with other IMO regulations may subject a shipowner or bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports including United States and European Union ports.

United States

The U.S. Oil Pollution Act of 1990 and the Comprehensive Environmental Response, Compensation and Liability Act

The U.S. Oil Pollution Act of 1990, or OPA, is an extensive regulatory and liability regime for environmental protection and cleanup of oil spills. OPA affects all owners and operators whose vessels trade with the United States or its territories or possessions, or whose vessels operate in the waters of the United States, which include the U.S. territorial sea and the 200 nautical mile exclusive economic zone around the United States. The Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, imposes liability for cleanup and natural resource damage from the release of hazardous substances (other than oil) whether on land or at sea. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners, operators and bareboat charterers are responsible parties who are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from oil spills from their vessels. OPA limits the liability of responsible parties with respect to tankers over 3,000 gross tons to the greater of \$2,000 per gross ton or \$17,088,000 per double hull tanker, and \$1,000 per gross ton or \$854,400 for any non-tank vessel respectively, and permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries. Some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters, however, in some cases, states which have enacted this type of legislation have not yet issued

implementing regulations defining tanker owners' responsibilities under these laws. CERCLA, which applies to owners and operators of vessels, contains a similar liability regime and provides for cleanup, removal and natural resource damages. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5.0 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$0.5 million for any other vessel.

These limits of liability do not apply, however, where the incident is caused by violation of applicable U.S. federal safety, construction or operating regulations, or by the responsible party's gross negligence or willful misconduct. These limits also do not apply if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with the substance removal activities. OPA and CERCLA each preserve the right to recover damages under existing law, including maritime tort law. We believe that we are in substantial compliance with OPA, CERCLA and all applicable state regulations in the ports where our vessels call.

OPA also requires owners and operators of vessels to establish and maintain with the U.S. Coast Guard evidence of financial responsibility sufficient to meet the limit of their potential strict liability under the act. Under the regulations, evidence of financial responsibility may be demonstrated by insurance, surety bond, self-insurance or guaranty. Under OPA regulations, an owner or operator of more than one tanker is required to demonstrate evidence of financial responsibility for the entire fleet in an amount equal only to the financial responsibility requirement of the tanker having the greatest maximum strict liability under OPA and CERCLA. We have provided such evidence and received certificates of financial responsibility from the U.S. Coast Guard for each of our vessels required to have one.

OPA specifically permits individual U.S. coastal states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, and some states have enacted legislation providing for unlimited liability for oil spills.

The U.S. Clean Water Act

The U.S. Clean Water Act of 1972, or CWA, prohibits the discharge of oil, hazardous substances, and ballast water in U.S. navigable waters unless authorized by a duly-issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA. Furthermore, most U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. These laws may be more stringent than U.S. federal law.

The United States Environmental Protection Agency, or EPA, has enacted rules requiring a permit regulating ballast water discharges and other discharges incidental to the normal operation of certain vessels within United States waters under the Vessel General Permit for Discharges Incidental to the Normal Operation of Vessels, or VGP. To be covered by the VGP, owners of certain vessels must submit a Notice of Intent, or NOI, at least 30 days before the vessel operates in United States waters. Compliance with the VGP could require the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other disposal arrangements, and/or otherwise restrict our vessels from entering United States waters. In addition, certain states have enacted more stringent discharge standards as conditions to their required certification of the VGP. We have submitted NOIs for our vessels where required and do not believe that the costs associated with obtaining and complying with the VGP will have a material impact on our operations.

The U.S. Clean Air Act

The U.S. Clean Air Act of 1970, as amended by the Clean Air Act Amendments of 1977 and 1990, or the CAA, requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. Our vessels are subject to vapor control and recovery requirements for certain cargoes when loading, unloading, ballasting, cleaning and conducting other operations in regulated port areas and emission standards for so-called "Category 3" marine diesel engines operating in U.S. waters. The marine diesel engine emission standards are currently limited to new engines beginning with the 2004 model year. On December 22, 2009, the EPA announced final emission standards for Category 3 marine diesel engines equivalent to those adopted in the amendments to Annex VI to MARPOL. The emission standards apply in two stages: near-term standards for newly-built engines will apply from 2011, and long-term standards requiring an 80% reduction in nitrogen dioxides (NOx) will apply from 2016. Compliance with these standards may cause us to incur costs to install control equipment on our vessels.

The CAA also requires states to draft State Implementation Plans, or SIPs, designed to attain national health-based air quality standards in primarily major metropolitan and/or industrial areas. Several SIPs regulate emissions resulting from vessel loading and unloading operations by requiring the installation of vapor control equipment. As indicated above, our vessels operating in covered port areas are already equipped with vapor recovery systems that satisfy these existing requirements. Vessels sailing within 24 miles of the California coastline whose itineraries call for them to enter any California ports, terminal facilities, or internal or estuarine waters must use marine gas oil at or below 1.5% sulfur and marine diesel oil at or below 0.5% sulfur and, effective January 1, 2012, marine fuels with a sulfur content at or below 0.1% (1,000 ppm) sulfur.

The MEPC has designated the area extending 200 miles from the territorial sea baseline adjacent to the Atlantic/Gulf and Pacific coasts and the eight main Hawaiian Islands as an ECA under the Annex VI amendments. The new ECA will enter into force in August 2012, whereupon fuel used by all vessels operating in the ECA cannot exceed 1.0% sulfur, dropping to 0.1% sulfur in 2015. From 2016, NOx after-treatment requirements will also apply. If other ECAs are approved by the IMO or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the EPA or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations.

European Union

The European Union has adopted legislation that would: (1) ban manifestly sub-standard vessels (defined as those over 15 years old that have been detained by port authorities at least twice in a six month period) from European waters and create an obligation of port states to inspect vessels posing a high risk to maritime safety or the marine environment; and (2) provide the European Union with greater authority and control over classification societies, including the ability to seek to suspend or revoke the authority of negligent societies. In addition, European Union regulations enacted in 2003 now prohibit all single hull tankers from entering into its ports or offshore terminals.

In October 2009, the European Union amended a previously adopted Directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims.

The European Union has also adopted a Directive to limit the sulphur content of marine fuels in order to reduce sulphur dioxide emissions from ships.

The sinking of the oil tanker Prestige in 2002 has led to the adoption of other environmental regulations by certain European Union Member States. It is difficult to predict what legislation or additional regulations, if any, may be promulgated by the European Union in the future.

Other Environmental Initiatives

U.S. Coast Guard regulations adopted and proposed for adoption under the U.S. National Invasive Species Act, or NISA, impose mandatory ballast water management practices for all vessels equipped with ballast water tanks entering U.S. waters, which could require the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures, and/or otherwise restrict our vessels from entering U.S. waters.

At the international level, the IMO adopted an International Convention for the Control and Management of Ships' Ballast Water and Sediments in February 2004 (, or the "BWM Convention"). The Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits. The BWM Convention will not enter into force until 12 months after it has been adopted by 30 states, the combined merchant fleets of which represent not less than 35% of the gross tonnage of the world's merchant shipping. The Convention has not yet entered into force because a sufficient number of states have failed to adopt it. However, the IMO's Marine Environment Protection Committee passed a resolution in March 2010 encouraging the ratification of the Convention and calling upon those countries that have already ratified to encourage the installation of ballast water management systems. If mid-ocean ballast exchange is made mandatory throughout the United States or at the international level, or if ballast water treatment requirements or options become mandatory, the cost of compliance can be significant for ocean carriers.

Greenhouse Gas Regulation

The IMO is evaluating mandatory measures to reduce greenhouse gas emissions from international shipping, which may include market-based instruments or a carbon tax. The European Union has indicated that it intends to propose an expansion of the existing European Union emissions trading scheme to include emissions of greenhouse gases from marine vessel. In the United States, the EPA has issued a proposed finding that greenhouse gases threaten the public health and safety. In addition, climate change initiatives are being considered in the U.S. Congress. Any passage of climate control legislation or other regulatory initiatives by the IMO, EU, the U.S. or other countries where we operate, or any treaty adopted at the international level to succeed the Kyoto Protocol, that restrict emissions of greenhouse gases could require us to make significant financial expenditures that we cannot predict with certainty at this time.

Vessel Security Regulations

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the U.S. Maritime Transportation Security Act of 2002, or the MTSA, came into effect. To implement certain portions of the MTSA, in July 2003, the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States. Similarly, in December 2002, amendments to SOLAS created a new chapter of the convention dealing specifically with maritime security. The new chapter became effective in July 2004 and imposes various

detailed security obligations on vessels and port authorities, most of which are contained in the International Ship and Port Facilities Security Code, or the ISPS Code. The ISPS Code is designed to protect ports and international shipping against terrorism. After July 1, 2004, to trade internationally, a vessel must attain an International Ship Security Certificate from a recognized security organization approved by the vessel's flag state. Among the various requirements are:

- on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including information on a ship's identity, position, course, speed and navigational status;
- on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore;
 - the development of vessel security plans;
 - ship identification number to be permanently marked on a vessel's hull;
- a continuous synopsis record kept onboard showing a vessel's history including, the name of the ship and of the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship's identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address; and
 - compliance with flag state security certification requirements.

The U.S. Coast Guard regulations, intended to align with international maritime security standards, exempt from MTSA vessel security measures non-U.S. vessels that have on board, as of July 1, 2004, a valid International Ship Security Certificate attesting to the vessel's compliance with SOLAS security requirements and the ISPS Code. We have implemented the various security measures addressed by the MTSA, SOLAS and the ISPS Code, and our fleet is in compliance with applicable security requirements.

Inspection by Classification Societies

Every seagoing vessel must be "classed" by a classification society. The classification society certifies that the vessel is "in class," signifying that the vessel has been built and maintained in accordance with the rules of the classification society and complies with applicable rules and regulations of the vessel's country of registry and the international conventions of which that country is a member. In addition, where surveys are required by international conventions and corresponding laws and ordinances of a flag state, the classification society will undertake them on application or by official order, acting on behalf of the authorities concerned.

The classification society also undertakes or requests other surveys and checks that are required by regulations and requirements of the flag state. These surveys are subject to agreements made in each individual case and/or to the regulations of the country concerned.

For maintenance of the class, regular and extraordinary surveys of hull, machinery, including the electrical plant, and any special equipment classed are required to be performed as follows:

Annual Surveys: For seagoing ships, annual surveys are conducted for the hull and the machinery, including the electrical / automation plant, and where applicable for special equipment classed, at intervals of 12 months from the date of commencement of the class period indicated in the certificate.

Intermediate Surveys: Extended annual surveys are referred to as intermediate surveys and typically are conducted two and one-half years after commissioning and each class renewal. Intermediate surveys may be carried out on the occasion of the second or third annual survey.

Class Renewal Surveys: Class renewal surveys, also known as special surveys, are carried out for the ship's hull, machinery, including the electrical / automation plant, and for any special equipment classed, at the intervals indicated by the character of classification for the hull. At the special survey, the vessel is thoroughly examined, including audio-gauging to determine the thickness of the steel structures. Should the thickness be found to be less than class requirements, the classification society would prescribe steel renewals. The classification society may grant a one-year grace period for completion of the special survey. Substantial amounts of money may have to be spent for steel renewals to pass a special survey if the vessel experiences excessive wear and tear. In lieu of the special survey every four or five years, depending on whether a grace period was granted, a shipowner has the option of arranging with the classification society for the vessel's hull or machinery to be on a continuous survey cycle, in which every part of the vessel would be surveyed within a five-year cycle.

At an owner's application, the surveys required for class renewal may be split according to an agreed schedule to extend over the entire period of class. This process is referred to as continuous class renewal.

All areas subject to survey as defined by the classification society are required to be surveyed at least once per class period, unless shorter intervals between surveys are prescribed elsewhere. The period between two subsequent surveys of each area must not exceed five years.

Most vessels are also dry-docked every 30 to 36 months (all after their 15th year of age) for inspection of the underwater parts and for repairs related to inspections. If any defects are found, the classification surveyor will issue a "recommendation" which must be rectified by the ship owner within prescribed time limits.

Most insurance underwriters make it a condition for insurance coverage that a vessel be certified as "in class" by a classification society which is a member of the International Association of Classification Societies. All our vessels are certified as being "in class" by the American Bureau of Shipping, Lloyd's Register of Shipping, Det Norske Veritas or Bureau Veritas. All new and secondhand vessels that we purchase must be certified prior to their delivery under our standard contracts and memorandum of agreement. If the vessel is not certified on the date of closing, we have no obligation to take delivery of the vessel.

Risk of Loss and Liability Insurance Generally

The operation of any cargo vessel includes risks such as mechanical failure, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon owners, operators and demise charterers of any vessel trading in the United States exclusive economic zone for certain oil pollution accidents in the United States, has made liability insurance more expensive for ship owners and operators trading in the United States market. While we carry loss of hire insurance to cover 100% of our fleet, we may not be able to maintain this level of coverage. Furthermore, while we believe that our present insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

Hull and Machinery Insurance

We have obtained marine hull and machinery, marine interests and war risk insurance, which includes the risk of actual or constructive total loss, general average, particular average, salvage, salvage charges, sue and labor, damage received in collision or contact with fixed or floating objects for all of the vessels in our fleet. In 2009, the vessels in our fleet were each covered up to at least fair market value, with deductibles of \$100,000 per vessel per incident, for the non-bareboat vessels in our fleet. In 2010, deductibles changed to include an additional machinery deductible of \$100,000 per vessel per incident for the non-bareboat vessels in our fleet. In 2011, the Hull and Machinery deductibles were adjusted to \$100,000. For the vessels that are under bareboat charters, the charterer is responsible for arranging and paying the hull and machinery insurance. We have also arranged increased value coverage for one of our bareboat chartered vessels, M/V Papillon, in order to conform with relevant loan covenants. Under this increased value coverage, in the event of total loss of a vessel, we will recover for amounts not recoverable under the hull and machinery policy by reason of any under-insurance by the charterers, in relation to values dictated by loan covenants.

Loss of Hire Insurance

During 2009, we obtained Loss of Hire Insurance to cover the loss of hire of each non-bareboat vessel and two of the bareboat chartered vessels, M/T Ionian Wave and M/T Hongbo, as required by the relevant loan agreements, for 90 days in excess of 30 days in case of an incident that is coverable by our Hull and Machinery policy. In 2010, we obtained Loss of Hire Insurance to cover the loss of hire for M/V Cyclades, M/V Pepito, M/T Ioannis P, M/T Ionian Wave and M/T Hongbo for 90 days in excess of 30 days in case of an incident that is coverable by our Hull and Machinery policy. We did not opt to cover any vessel for loss of hire for 2011 and the mortgagee bank for the bareboat chartered-out vessels M/T Ionian Wave and M/T Hongbo agreed to waive their mortgage covenant to have Loss of Hire Insurance renewed for these vessels.

Protection and Indemnity Insurance

Protection and indemnity insurance is provided by mutual protection and indemnity associations, or P&I Associations, which covers our third party liabilities in connection with our shipping activities. This includes third party liability and other related expenses of injury or death of crew, passengers and other third parties, loss or damage to cargo, collision liabilities, damage to other third party property, pollution arising from oil or other substances and wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations, or "P&I Clubs." Cover is subject to the current statutory limits of liability and the applicable deductibles per category of claim. Our current protection and indemnity insurance coverage for pollution stands at \$1.0 billion for any one event.

The 13 P&I Associations that comprise the International Group insure approximately 90% of the world's commercial tonnage and have entered into a pooling agreement to reinsure each association's liabilities. Each P&I Association has capped its exposure to this pooling agreement at approximately \$5.5 billion. As a member of a P&I Association, which is a member of the International Group, we are subject to calls payable to the associations based on its claim records as well as the claim records of all other members of the individual associations, and members of the pool of P&I Associations comprising the International Group.

Competition

We operate in markets that are highly competitive and based primarily on supply and demand. We compete for charters on the basis of price, vessel location, size, age and condition of the vessel, as well as on our reputation as an operator. We arrange our time charters, bareboat charters and voyage charters in the spot market through the use of brokers, who negotiate the terms of the charters based on market conditions. We compete primarily with owners of tankers in the Handymax class sizes and also with owners of drybulk vessels in the Handymax, Supramax and Panamax class sizes. Ownership of tankers is highly fragmented and is divided among major oil companies and independent vessel owners. The drybulk market is less fragmented with more small operators.

Seasonality

We operate our vessels in markets that have historically exhibited seasonal variations in demand and, therefore, charter rates. This seasonality may affect operating results.

C. Organizational Structure

We are a Marshall Islands corporation with principal executive offices located at 1 Vas. Sofias and Meg. Alexandrou Str, 15124 Maroussi, Greece. We own our vessels through wholly-owned subsidiaries that are incorporated in the Marshall Islands or other jurisdictions generally acceptable to lenders in the shipping industry. The following are the wholly-owned subsidiaries of TOP SHIPS INC. as of December 31, 2010.

	Shipowning Companies with vessels in operations at December 31, 2010	Date of Incorporation	Country of Incorporation	Vessel
1	Ilisos Shipping Company Limited ("Ilisos")	April 2005	Marshall Islands	Ioannis P (acquired November 2005)
2	Amalfi Shipping Company Limited ("Amalfi")	July 2007	Marshall Islands	Amalfi (acquired December 2007)
3	Jeke Shipping Company Limited ("Jeke")	July 2007	Liberia	Voc Gallant (acquired February 2008)
4	Japan I Shipping Company Limited ("Japan I")	August 2007	Liberia	Pepito (acquired March 2008)
5	Japan II Shipping Company Limited ("Japan II")	August 2007	Liberia	Astrale (acquired May 2008)
6	Japan III Shipping Company Limited ("Japan III")	August 2007	Liberia	Cyclades (acquired December 2007)
7	Warhol Shipping Company Limited ("Warhol")	July 2008	Liberia	Miss Marilena (delivered February 2009)
8	Lichtenstein Shipping Company Limited ("Lichtenstein")	July 2008	Liberia	Lichtenstein (delivered February 2009)

Edgar Filing: TOP SHIPS INC. - Form 20-F

9	Banksy Shipping Company Limited ("Banksy")	July 2008	Liberia	Ionian Wave (delivered March 2009)
10	Indiana R Shipping Company Limited ("Indiana R")	July 2008	Liberia	Tyrrhenian Wave (delivered March 2009)
11	Britto Shipping Company Limited ("Britto")	July 2008	Liberia	Britto (delivered May 2009)
12	Hongbo Shipping Company Limited ("Hongbo")	July 2008	Liberia	Hongbo (delivered August 2009)
13	Mytikas Shipping Company Limited ("Mytikas")	February 2004	Marshall Islands	Delos (lease started October, 1, 2010)

Other Companies				
14	Top Tankers (U.K.) Limited	January 2005	England and Wales	Representative office in London
15	Top Bulker Management Inc.	April 2005	Marshall Islands	Inactive Management Company
16	TOP Tanker Management Inc. ((the "Manager"))	May 2004	Marshall Islands	Management Company
Shipowning Companies with vessels sold				
		Date of Incorporation	Country of Incorporation	Vessel
17	Olympos Shipping Company Limited	December 1999	British Cayman Islands	Med Prologue (sold to "Olympos Shipping Company Limited")
18	Vermio Shipping Company Limited ("Faithful")	December 2001	Marshall Islands	Faithful (sold to "Gramos Shipping Company Inc" July 2003)
19	Kalidromo Shipping Company Limited ("Kalidromo")	May 2003	Marshall Islands	Tireless (sold September 2004)
20	Olympos Shipping Company Limited ("Olympos")	May 2003	Marshall Islands	Med Prologue (sold December 2004)
21	Rupel Shipping Company Inc. ("Rupel")	January 2003	Marshall Islands	Fearless (sold July 2005)
22	Helidona Shipping Company Limited ("Helidona")	May 2003	Marshall Islands	Yapi (sold September 2005)
23	Mytikas Shipping Company Limited ("Mytikas")	February 2004	Marshall Islands	Limitless (sold September 2008)
24	Litochoro Shipping Company Limited ("Litochoro")	March 2004	Marshall Islands	Endless (sold September 2008)
25	Vardousia Shipping Company Limited ("Vardousia")	July 2004	Cyprus	Invincible (sold by its new owners July 2007)
26	Psiloritis Shipping Company Limited ("Psiloritis")	July 2004	Liberia	Victorious (sold by its new owners August 2007)
27	Menalo Shipping Company Limited ("Menalo")	July 2004	Cyprus	Restless (sold by its new owners September 2007)

Edgar Filing: TOP SHIPS INC. - Form 20-F

28	Pintos Shipping Company Limited ("Pintos")	July 2004	Cyprus	Sovereign (sold by its new owners August 2008)
29	Pylio Shipping Company Limited ("Pylio")	July 2004	Liberia	Flawless (sold by its new owners September 2008)
30	Taygetus Shipping Company Limited ("Taygetus")	July 2004	Liberia	Timeless (sold by its new owners September 2008)
31	Imitos Shipping Company Limited ("Imitos")	November 2004	Marshall Islands	Noiseless (sold January 2008)
32	Parnis Shipping Company Limited ("Parnis")	November 2004	Marshall Islands	Stainless (sold January 2008)
33	Parnasos Shipping Company Limited ("Parnasos")	November 2004	Liberia	Faultless (sold by its new owners March 2008)
34	Vitsi Shipping Company Limited ("Vitsi")	November 2004	Liberia	Stopless (sold by its new owners September 2008)
35	Kisavos Shipping Company Limited ("Kisavos")	November 2004	Marshall Islands	Priceless (sold by its new owners September 2008)
36	Agion Oros Shipping Company Limited ("Agion Oros")	February 2005	Marshall Islands	Topless (sold December 2006)
37	Giona Shipping Company Limited ("Giona")	March 2005	Marshall Islands	Tainless (sold November 2006)
38	Agrafa Shipping Company Limited ("Agrafa")	March 2005	Marshall Islands	Soundless (sold November 2006)
39	Ardas Shipping Company Limited ("Ardas")	April 2005	Marshall Islands	Errorless (sold April 2007)
40	Nedas Shipping Company Limited ("Nedas")	April 2005	Marshall Islands	Stormless (sold June 2008)
41	Kifisos Shipping Company Limited ("Kifisos")	April 2005	Marshall Islands	Edgeless (sold July 2008)
42	Sperhios Shipping Company Limited ("Sperhios")	April 2005	Marshall Islands	Ellen P (sold September 2008)
43	Noir Shipping S.A. ("Noir")	June 2007	Marshall Islands	Bertram (sold April 2008)
44	Gramos Shipping Company Inc. ("Gramos")	January 2003	Marshall Islands	Faithful (sold and leased back March 2006)
45	Falakro Shipping Company Limited ("Falakro")	July 2004	Liberia	Doubtless (sold and leased back March 2008)

Edgar Filing: TOP SHIPS INC. - Form 20-F

				2006)
46	Pagoon Shipping Company Limited ("Pagoon")	July 2004	Cyprus	Vanguard (sold and leased back March 2006)
47	Idi Shipping Company Limited ("Idi")	July 2004	Liberia	Spotless (sold and leased back March 2006)
48	Parnon Shipping Company Limited ("Parnon")	July 2004	Cyprus	Relentless (sold and leased back September 2005)
49	Lefka Shipping Company Limited ("Lefka")	March 2005	Marshall Islands	Dauntless (sold November 2010)

D. Properties, Plants and Equipment

For a list of our fleet see "Business Overview – Our Fleet" above.

In January 2006, we entered into an agreement with an unrelated party to lease office space in Athens, Greece. The office is located at 1, Vasilisis Sofias & Megalou Alexandrou Street, 151 24 Maroussi, Athens, Greece. The agreement is for a duration of 12 years beginning May 2006 with a lessee's option for an extension of 10 years. In September 2010, the agreement was amended and the new monthly rent was renegotiated. It was also agreed to revert occupancy in certain areas of the leased office space by the end of April 2011. All other terms of the lease remained unchanged. The current monthly rental is \$0.06 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2010) adjusted annually for inflation increase plus 1.0%.

In addition, our subsidiary TOP TANKERS (U.K.) LIMITED, a representative office in London, entered into a new lease agreement with an unrelated third party for office space in London, which is valid from September 2010 and shall continue until either party shall give to the other one calendar month written notice. The annual lease is \$0.02 million (based on the U.S. Dollar/GBP exchange rate as of December 31, 2010) payable quarterly in advance.

In November 2009, TOP SHIPS INC. entered into a lease agreement for office space in London. The initial agreement was signed on November 15, 2009 and expired on November 14, 2010. The agreement was extended through November 14, 2011 with all terms remaining unchanged. The current monthly rent is \$0.04 million (based on the U.S. Dollar/GBP exchange rate as of December 31, 2010).

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following management's discussion and analysis is intended to discuss our financial condition, changes in financial condition and results of operations, and should be read in conjunction with our historical consolidated financial statements and their notes included in this report.

This discussion contains forward-looking statements that reflect our current views with respect to future events and financial performance. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, such as those set forth in the section entitled "Risk Factors" and elsewhere in this report.

A. Operating results

Overview

We are an international provider of seaborne transportation services, carrying petroleum products and crude oil for the oil industry and drybulk commodities for the steel, electric utility, construction and agriculture-food industries.

On October 1, 2010, we entered into a bareboat agreement to charter in the M/T Delos for five years at an average daily rate of \$5,219.

On November 5, 2010, we sold M/T Dauntless for an amount of \$20.1 million.

In response to a Nasdaq notification received in August 2010 that our common stock was in violation of its minimum bid price requirements, we obtained shareholder authorization at our annual general meeting held on September 30, 2010 to conduct a reverse stock split at a ratio of not less than one-for-two and not more than one-for-ten, which authorization shall expire at the date of our 2011 annual general meeting of shareholders. During January 2011, we regained compliance with the Nasdaq requirement due to an increase in our common stock price. On March 28, 2011 we received a notification from Nasdaq stating that our common stock was again in violation of its minimum bid price requirements. The applicable grace period to regain compliance is 180 calendar days expiring September 26, 2011.

As of December 31, 2010, our fleet consisted of twelve owned vessels and one chartered-in vessel under a bareboat charter. This fleet includes eight Handymax tankers, one Supramax drybulk vessel, one Handymax drybulk vessel, and three Panamax drybulk vessels, with a total carrying capacity of 0.7 million dwt. As of December 31, 2009, our fleet consisted of thirteen owned vessels, comprised of the same vessel size classes and total carrying capacity as on December 31, 2010.

Segments

Since the acquisition of drybulk vessels in the fourth quarter of 2007, we have been analyzing and reporting our segment income for two segments: the tanker segment and the drybulk segment. Segment income consists of operating income per segment after deducting interest and finance costs for each segment.

Tanker segment: For the year ended December 31, 2009, revenues for this segment were \$47.4 million and operating loss was \$56.2 million. For the year ended December 31, 2010, revenues for this segment were \$39.4 million and operating income was \$10.3 million.

Drybulk segment: For the year ended December 31, 2009, revenues for this segment were \$56.7 million and operating income was \$18.2 million. For the year ended December 31, 2010, revenues for this segment were \$51.5 million and operating income was \$12.1 million.

Factors affecting our results of operations – all segments

We believe that the important measures for analyzing trends in the results of our operations for both tankers and drybulk vessels consist of the following:

- **Calendar days.** We define calendar days as the total number of days the vessels were in our possession for the relevant period. Calendar days are an indicator of the size of our fleet during the relevant period and affect both the amount of revenues and expenses that we record during that period.
- **Available days.** We define available days as the number of calendar days less the aggregate number of days that our vessels are off-hire due to scheduled repairs, or scheduled guarantee inspections in the case of newbuildings, vessel upgrades or special or intermediate surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues. We determined to use available days as a performance metric for the first time, in the second quarter and first half of 2009. We have adjusted the calculation method of utilization to include available days in order to be comparable with shipping companies that calculate utilization using operating days divided by available days.

- **Operating days.** We define operating days as the number of available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period that our vessels actually generate revenues.
- **Fleet utilization.** We calculate fleet utilization by dividing the number of operating days during a period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other than scheduled repairs or scheduled guarantee inspections in the case of newbuildings, vessel upgrades, special or intermediate surveys and vessel positioning. We used a new calculation method for fleet utilization for the first time, in the second quarter and first half of 2009. In all prior filings and reports, utilization was calculated by dividing operating days by calendar days. We have adjusted the calculation method in order to be comparable with most shipping companies, which calculate utilization using operating days divided by available days.
- **Spot Charter Rates.** Spot charter rates are volatile and fluctuate on a seasonal and year-to-year basis. Fluctuations derive from imbalances in the availability of cargoes for shipment and the number of vessels available at any given time to transport these cargoes.
- **Bareboat Charter Rates.** Under a bareboat charter party, all operating costs, voyage costs and cargo-related costs are covered by the charterer, who takes both the operational and the shipping market risk.
- **TCE Revenues / TCE Rates.** We define TCE revenues as revenues minus voyage expenses. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by a charterer under a time charter, as well as commissions. We believe that presenting revenues net of voyage expenses neutralizes the variability created by unique costs associated with particular voyages or the deployment of vessels on the spot market and facilitates comparisons between periods on a consistent basis. We calculate daily TCE rates by dividing TCE revenues by operating days for the relevant time period. TCE revenues include demurrage revenue, which represents fees charged to charterers associated with our spot market voyages when the charterer exceeds the agreed upon time required to load or discharge a cargo. We calculate daily direct vessel operating expenses and daily general and administrative expenses for the relevant period by dividing the total expenses by the aggregate number of calendar days that we owned each vessel for the period.

In accordance with GAAP measures, we report revenues in our income statements and include voyage expenses among our expenses. However, in the shipping industry the economic decisions are based on vessels' deployment upon anticipated TCE rates, and industry analysts typically measure shipping freight rates in terms of TCE rates. This is because under time-charter and bareboat contracts the customer usually pays the voyage expenses, while under voyage charters the ship-owner usually pays the voyage expenses, which typically are added to the hire rate at an approximate cost. Consistent with industry practice, management uses TCE as it provides a means of comparison between different types of vessel employment and, therefore, assists decision making process.

Voyage Revenues

Tanker segment

Our voyage revenues are driven primarily by the number of vessels in our fleet, the number of operating days during which our vessels generate revenues and the amount of daily charterhire that our vessels earn under charters, which, in turn, are affected by a number of factors, including our decisions relating to vessel acquisitions and disposals, the amount of time that we spend positioning our vessels, the amount of time that our vessels spend in dry-dock undergoing repairs, maintenance and upgrade work, the duration of the charter, the age, condition and specifications of our vessels, levels of supply and demand in the global transportation market for oil products or bulk cargo and other factors affecting spot market charter rates such as vessel supply and demand imbalances.

Vessels operating on period charters, time charters or bareboat charters provide more predictable cash flows, but can yield lower profit margins than vessels operating in the short-term, or spot, charter market during periods characterized by favorable market conditions. Vessels operating in the spot charter market, either directly or through a pool arrangement, generate revenues that are less predictable, but may enable us to capture increased profit margins during periods of improvements in charter rates, although we are exposed to the risk of declining charter rates, which may have a materially adverse impact on our financial performance. If we employ vessels on period charters, future spot market rates may be higher or lower than the rates at which we have employed our vessels on period time charters.

Under a time charter, the charterer typically pays us a fixed daily charter hire rate and bears all voyage expenses, including the cost of bunkers (fuel oil) and port and canal charges. We remain responsible for paying the chartered vessel's operating expenses, including the cost of crewing, insuring, repairing and maintaining the vessel, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses, and we also pay commissions to Central Mare, one or more unaffiliated ship brokers and to in-house brokers associated with the charterer for the arrangement of the relevant charter.

Under a bareboat charter, the vessel is chartered for a stipulated period of time which gives the charterer possession and control of the vessel, including the right to appoint the master and the crew. Under bareboat charters all voyage and operating costs are paid by the charterer. During 2009, we took delivery of six newbuilding product tankers all of which are on bareboat charters for a period between 7 and 10 years.

We have entered into a time charter contract and a pool agreement with the Dorado Tankers Pool Inc., or Dorado Pool, under which our vessel earns charterhire in accordance with a pool point formula as defined in the pool agreement. The pool agreement provides that charterhire will be paid 30 days in arrears. The amount of charterhire depends on the earnings that the pool has managed to achieve by chartering its vessels in the spot market. Preliminary charterhire will be based on the pool's then-current earnings and is not a guaranteed minimum rate. The preliminary charterhire may be adjusted either up or down as necessary by the pool committee depending on prevailing market conditions. The vessel's earnings will be adjusted quarterly according to its actual operating days in the pool.

As of the date of this report, two of our vessels are trading in the spot market. We may in the future operate additional vessels in the spot market until the vessels have been chartered under appropriate medium to long-term charters.

In 2008 and 2009, approximately 17% and 22%, respectively, of our total revenues from the tanker segment were derived from one charterer, ST Shipping and Transport Pte Ltd. In 2010, approximately 18% of our total revenues from the tanker segment were derived from one charterer, Daelim H&L Co. Ltd, or Daelim.

Drybulk segment

The factors affecting voyage revenues discussed above also apply to the drybulk segment, with the only differences being those that exist between oil and drybulk commodity market trends.

As of the date of this annual report, four of our drybulk vessels were operating under time charters and one was operating under a bareboat charter.

Up to December 31, 2009, revenues related to drybulk vessels included amortization of the fair value of below-market acquired time charter liability. However, relevant revenues are considered unallocated for the purposes of analyzing and reporting our results of operations in two segments: tanker segment and drybulk segment. Where we have assumed an existing charter obligation or entered into a time charter with the existing charterer in connection with the purchase of a vessel at charter rates that are less than market charter rates, we record a liability, based on the difference between the assumed charter rate and the market charter rate for an equivalent vessel. Specifically, when vessels are acquired under such conditions, upon delivery of the vessel we allocate the total cost of the acquisition between the vessel and the fair value of the below-market time charter based on the relative fair values of the vessel and the liability acquired. The fair value of the attached period charter is computed as the present value of the difference between the contractual amount to be received over the term of the period charter and management's estimates of the market period charter rate at the time of acquisition. The fair value of below market period charter is amortized over the remaining period of the period charter as an increase to revenues.

In November and December 2007 and February 2008, we acquired the drybulk vessels M/V Bertram, M/V Amalfi and M/V Papillon (ex Voc Gallant), respectively, with attached time charter contracts. As a result, the purchase price of the vessels was allocated between vessel cost and the fair value of the time charter contracts, totaling in aggregate \$43.3 million. Following the sale of the M/V Bertram, on April 16, 2008, the then unamortized fair value of its below market time charter of \$16.1 million was written-off to the loss from the sale of the vessel. For the years ended December 31, 2008 and 2009, the amortization of the fair value of the time charter contracts totaled \$21.8 million and \$3.9 million, respectively. The fair value of the time charter contracts was fully amortized up to the second quarter of 2009.

In 2009, approximately 32% of our total revenues from the drybulk segment were derived from two charterers. These two charterers, Hanjin and Cosco, provided 18% and 14%, respectively, of our total revenues in 2009. In 2010, approximately 35% of our total revenues from the drybulk segment were derived from two charterers. These two charterers, Hanjin and Cosco, provided 19% and 16%, respectively, of our total revenues in 2010.

Voyage Expenses

Tanker segment

Voyage expenses primarily consist of port charges, including canal dues, bunkers (fuel costs) and commissions. All these expenses, except commissions, are paid by the charterer under a time charter or bareboat charter contract. The amount of voyage expenses are primarily driven by the routes that the vessels travel, the amount of ports called on, the canals crossed and the price of bunker fuels paid. This category was less significant in 2009 when compared to 2008 since all our tanker vessels were either on time charters or bareboat charters in 2009, as compared to 2008 when up to 11 of our vessels operated in the spot market. In the last quarter of 2010, voyage expenses increased slightly due to the fact that one of our tankers entered the spot market and another operated under a pool arrangement.

Drybulk segment

Our drybulk vessels are operating under time charter or bareboat charter contracts and hence voyage expenses primarily consist of commissions on the time charters.

Charter Hire Expenses

Tanker segment

Through July 3, 2009 charter hire expenses consisted of lease payments for vessels sold and leased-back during 2005 and 2006 for periods between five to seven years, which leases were terminated during 2009. In October 2010, we entered into a bareboat charter-in agreement for M/T Delos that entails lease payments up to September 2015. For further information please see "Item 4-Information on the Company-History and Development of the Company".

Drybulk segment

There were no charter hire expenses applicable to the drybulk segment.

Vessel Operating Expenses

Tanker and Drybulk segment

Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses for vessels that we own or lease under our operating leases. Our vessel operating expenses, which generally represent fixed costs, have historically increased as a result of the increase in the size of our fleet. We analyze vessel operating expenses on a U.S. Dollar / per day basis. Additionally, vessel operating expenses can fluctuate due to factors beyond our control, such as unplanned repairs and maintenance attributable to damages or regulatory compliance and factors which may affect the shipping industry in general, such as developments relating to insurance premiums, or developments relating to the availability of crew.

Dry-docking Costs

Tanker and Drybulk segment

Dry-docking costs relate to regularly scheduled intermediate survey or special survey dry-docking necessary to preserve the quality of our vessels as well as to comply with international shipping standards and environmental laws and regulations. Dry-docking costs can vary according to the age of the vessel, the location where the dry-dock takes place, shipyard availability, local availability of manpower and material, the billing currency of the yard, the number of days the vessel is off-hire and the diversion necessary in order to get from the last port of employment to the yard and back to a position for the next employment. Please see "Item 18 – Financial Statements – Note 2 – Significant Accounting Policies." In the case of tankers, dry-docking costs may also be affected by new rules and regulations. For further information please see "Item 4 – Information on the Company – B. Business Overview – Environmental Regulations".

Management Fees – Third Parties

Tanker and Drybulk segment

These costs relate to management fees to non-related parties.

Management Fees – Related Parties

Tanker and Drybulk segment

Except as noted below, since July 1, 2010, Central Mare, a related party controlled by the family of our CEO, has been performing all of our operational, technical and commercial functions relating to the chartering and operation of our vessels, pursuant to a letter agreement concluded between Central Mare and Top Ships as well as management agreements concluded between Central Mare and our vessel-owning subsidiaries. We have contracted the technical management and crewing of M/T Delos to TMS Tankers but these responsibilities will be transferred to Central Mare during the second quarter of 2011. For further information please see "Item 4 – Information on the Company – B. Business Overview – Management of the fleet".

General and Administrative Expenses

Tanker and Drybulk segment

Our general and administrative expenses include executive compensation paid to Central Mare, a related party controlled by the family of our CEO, for the provision of our executive officers, office rent, legal and auditing costs, regulatory compliance costs, other miscellaneous office expenses, non-cash stock compensation, and corporate overhead. Central Mare provides the services of the individuals who serve in the position of CEO, Chief Financial Officer, Executive Vice President and Chief Technical Officer. For further information please see "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties".

General and administrative expenses are Euro denominated except for some legal fees and are therefore affected by the conversion rate of the U.S. Dollar versus the Euro. General and administrative expenses are allocated to different segments based on calendar days of vessels operated.

Interest and Finance Costs

Tanker and Drybulk segment

We have historically incurred interest expense and financing costs in connection with vessel-specific debt. Interest expense is directly related with the repayment schedule of our loans, the prevailing LIBOR and the relevant margin.

Since the fourth quarter of 2008, however, lenders have required provisions that entitle the lenders, in their discretion, to replace published LIBOR as the base for the interest calculation with their cost-of-funds rate which in all cases is higher than LIBOR. Additionally, as part of our discussions with banks with regard to loan covenant breaches, we have agreed to increase the relevant interest margin on certain of our loans. For further information please see " – B. Liquidity and Capital Resources".

Inflation

Inflation has not had a material effect on our expenses. In the event that significant global inflationary pressures appear, these pressures would increase our operating, voyage, administrative and financing costs.

In evaluating our financial condition, we focus on the above measures to assess our historical operating performance and we use future estimates of the same measures to assess our future financial performance. In assessing the future performance of our fleet, the greatest uncertainty relates to future charter rates at the expiration of a vessel's present period employment, whether under a time charter or a bareboat charter. Decisions about future purchases and sales of vessels are based on the availability of excess internal funds, the availability of financing and the financial and operational evaluation of such actions and depend on the overall state of the drybulk and tanker markets, the availability of relevant purchase candidates, and our general assessment of the prospects for the segments that we operate in.

Lack of Historical Operating Data for Vessels Before Their Acquisition

Although vessels are generally acquired free of charter, we have acquired (and may in the future acquire) some vessels with time charters. Where a vessel has been under a voyage charter, the vessel is usually delivered to the buyer free of charter. It is rare in the shipping industry for the last charterer of the vessel in the hands of the seller to continue as the first charterer of the vessel in the hands of the buyer. In most cases, when a vessel is under time charter and the buyer wishes to assume that charter, the vessel cannot be acquired without the charterer's consent and the buyer entering into a separate direct agreement (a "novation agreement") with the charterer to assume the charter. The purchase of a vessel itself does not transfer the charter because it is a separate agreement between the vessel owner and the charterer.

Where we identify any intangible assets or liabilities associated with the acquisition of a vessel, we allocate the purchase price to identified tangible and intangible assets or liabilities based on their relative fair values. Fair value is determined by reference to market data and the discounted amount of expected future cash flows. Where we have assumed an existing charter obligation or entered into a time charter with the existing charterer in connection with the purchase of a vessel at charter rates that are less than market charter rates, we record a liability, based on the difference between the assumed charter rate and the market charter rate for an equivalent vessel. Conversely, where we assume an existing charter obligation or enter into a time charter with the existing charterer in connection with the purchase of a vessel at charter rates that are above market charter rates, we record an asset, based on the difference between the market charter rate for an equivalent vessel and the contracted charter rate. This determination is made at the time the vessel is delivered to us, and such assets and liabilities are amortized as a reduction or increase to revenue over the remaining period of the charter.

In November and December 2007 and February 2008, we acquired the drybulk vessels M/V Bertram, M/V Amalfi and M/V Papillon (ex Voc Gallant), respectively, with attached time charter contracts. As a result, the purchase price of the vessels was allocated between vessel cost and the fair value of the time charter contracts, totaling in aggregate \$43.3 million. The fair value of the time charter contracts was fully amortized up to the second quarter of 2009.

During 2010, we did not acquire any vessels with existing period charter arrangements.

When we purchase a vessel and assume or renegotiate a related time charter, we must take the following steps before the vessel will be ready to commence operations:

obtain the charterer's consent to us as the new owner;

obtain the charterer's consent to a new technical manager;

in some cases, obtain the charterer's consent to a new flag for the vessel;

arrange for a new crew for the vessel, and where the vessel is on charter, in some cases, the crew must be approved by the charterer;

replace all hired equipment on board, such as gas cylinders and communication equipment;

negotiate and enter into new insurance contracts for the vessel through our own insurance brokers; and

register the vessel under a flag state and perform the related inspections in order to obtain new trading certificates from the flag state.

The following discussion is intended to help you understand how acquisitions of vessels affect our business and results of operations. Our business is comprised of the following main elements:

employment and operation of our tanker and drybulk vessels; and

management of the financial, general and administrative elements involved in the conduct of our business and ownership of our tanker and drybulk vessels.

The employment and operation of our vessels require the following main components:

vessel maintenance and repair;

crew selection and training;

vessel spares and stores supply;

contingency response planning;

onboard safety procedures auditing;

accounting;

vessel insurance arrangement;

vessel chartering;

vessel security training and security response plans (ISPS);

obtain ISM certification and audit for each vessel within the six months of taking over a vessel;

vessel hire management;

vessel surveying; and

vessel performance monitoring.

The management of financial, general and administrative elements involved in the conduct of our business and ownership of our vessels requires the following main components:

management of our financial resources, including banking relationships, i.e., administration of bank loans and bank accounts;

management of our accounting system and records and financial reporting;

administration of the legal and regulatory requirements affecting our business and assets; and

management of the relationships with our service providers and customers.

The principal factors that affect our profitability, cash flows and shareholders' return on investment include:

Charter rates and periods of charter hire for our tanker and drybulk vessels;

Utilization of our tanker and drybulk vessels (earnings efficiency);

levels of our tanker and drybulk vessels' operating expenses and dry-docking costs;

depreciation and amortization expenses;

financing costs; and

fluctuations in foreign exchange rates.

Edgar Filing: TOP SHIPS INC. - Form 20-F

Results of operations for the fiscal years ended December 31, 2008, 2009 and 2010

The following table depicts changes in the results of operations for 2010 compared to 2009 and 2009 compared to 2008.

Year On Year Comparison Of Operating Results

Revenues

Revenues by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	163,995	47,353	39,394	(116,642)	-71.1%	(7,959)	-16.8%
Drybulk Fleet	71,590	56,715	51,481	(14,875)	-20.8%	(5,234)	-9.2%
Unallocated	21,795	3,911	-	(17,884)	-82.1%	(3,911)	-100.0%
Consolidated Revenues	257,380	107,979	90,875	(149,401)	-58.0%	(17,104)	-15.8%

Tanker segment

2010 vs. 2009

During 2010, tanker revenues decreased by \$8 million, or 16.8%, compared to 2009. This decrease is mainly a result of our lease unwinding strategy, which was concluded in 2009 with the termination of five leases resulting in a decrease in 2010 revenue by \$12.1 million. In addition, 2010 revenue was lower by \$3.0 million as a result of the decrease in the bareboat charter rate of the M/T's Ionian Wave and Tyrrhenian Wave. These decreases in revenue were partially offset by the full employment of our newbuilding vessels, which generated \$8.2 million more revenue in 2010 than in 2009.

2009 vs. 2008

During 2009, tanker revenues decreased by \$116.6 million, or 71.1%, compared to 2008. This decrease was mainly due to the decrease in the average number of tanker vessels that we operated, from 13.9 in 2008 to 8.7 in 2009, as a result of our lease unwinding strategy, which resulted in the termination of six leases, the sale of seven owned vessels during 2008 and the termination of five leases during 2009. The decrease in the revenues relating to the vessels sold and leases terminated in 2008 amounted to \$117.7 million. The decrease in the revenues relating to the leases terminated in 2009 amounted to \$21.0 million. These decreases in revenue were partially offset by an increase in revenues in 2009, which amounted to \$22.4 million related to the newbuilding vessels delivered during 2009.

Drybulk segment

2010 vs. 2009

During 2010, drybulk vessel revenues decreased by \$5.2 million, or 9.2%, compared to 2009 mainly as a result of the expiration of the charter for the vessel M/V Astrale, which had been earning \$72,000 per day, and which was subsequently rechartered at a much lower rate. M/V Astrale's revenues decreased by \$4.3 million, from \$10.2 million in 2009, to \$5.9 million in 2010. An additional decrease in drybulk vessel revenues of \$1.6 million is related to the vessel M/V Cyclades, which underwent a special survey in 2010 that led to increased off-hire days.

2009 vs. 2008

During 2009, drybulk vessel revenues decreased by \$14.9 million, or 20.8%, compared to 2008. This was mainly due to the lower charter rates achieved for the vessels M/V Amalfi and M/V Astrale in 2009 and the fact that the vessel M/V Bertram was sold in 2008, and therefore did not contribute to 2009 results.

Unallocated revenues

This amount refers to the amortization of the fair value of the time charter contracts of the drybulk vessels M/V Bertram, M/V Amalfi and M/V Papillon (ex Voc Gallant). This amount is included in the total revenues but is excluded from segment revenue to be consistent with the way management evaluates segment performance and allocates resources. The amount was fully amortized by the end of 2009.

Tanker Fleet	34,215	1,118	1,277	(33,097)	-96.7%	159	14.2%
Drybulk Fleet	4,441	2,254	1,191	(2,187)	-49.2%	(1,063)	-47.2%
Consolidated Voyage Expenses	38,656	3,372	2,468	(35,284)	-91.3%	(904)	-26.8%

Voyage expenses primarily consist of port charges, including bunkers (fuel costs), canal dues and commissions.

Tanker segment

2010 vs. 2009

During 2010, voyage expenses increased by \$0.2 million, or 14.2%, compared to 2009 mainly due to the fact that in the fourth quarter of 2010, the M/T Ioannis P operated in the spot market, which resulted in an increase in voyage expenses of \$0.5 million. In addition, commissions on new building vessels amounted to \$0.3 million. These increases were partially offset, mainly by the decrease in voyage expenses as a result of the termination of the last five leases, which amounted to \$0.3 million and the decrease in voyage expenses of the M/T Dauntless in an amount of \$0.3 million, related to the higher commissions of its previous charter and dry-dock related expenses.

2009 vs. 2008

During 2009, voyage expenses decreased by \$33.1 million, or 96.7%, compared to 2008 mainly due to the decrease of the average number of our tanker vessels by 37.4% and the fact that during the year none of our vessels operated in the spot market. The decrease was a result of our lease unwinding strategy which resulted in the termination of six leases and the sale of seven owned vessels during 2008 and the termination of five leases during 2009. Voyage expenses incurred during 2009 relate entirely to charter commissions.

Drybulk segment

2010 vs. 2009

During 2010, voyage expenses decreased by \$1.1 million, or 47.2%, compared to 2009 mainly due to address commissions.

2009 vs. 2008

During 2009, voyage expenses decreased by \$2.2 million, or 49.2%, compared to 2008 mainly due to a decrease in commissions on the time charters in the amount of \$1.7 million, which mainly resulted from the decrease in revenues under time charters for their respective vessels.

63

2. Charter hire expenses

Charter Hire Expense by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	53,684	10,827	480	(42,857)	-79.8%	(10,347)	-95.6%
Drybulk Fleet	-	-	-	-	-	-	-
Consolidated Charter Hire Expense	53,684	10,827	480	(42,857)	-79.8%	(10,347)	-95.6%

Tanker segment

2010 vs. 2009

During 2010, charter hire expense decreased by \$10.3 million, or 95.6%, compared to 2009. This is due to the termination of the last five remaining leases during 2009 that led to expenses amounting to \$10.8 million in 2009 and an offsetting increase of \$0.5 million due to the bareboat charter-in of the M/T Delos in the fourth quarter of 2010.

2009 vs. 2008

During 2009, charter hire expense decreased by \$42.9 million, or 79.8%, compared to 2008. A decrease of \$30.5 million was due to the termination of the six leases during 2008 and a decrease of \$12.4 million was due to the termination of the remaining five leases during the first half of 2009.

Drybulk segment

There were no charter hire expenses applicable to the drybulk segment.

3. Lease Termination Expense

Lease Termination Expense by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet		15,391	-	15,391	-	(15,391)	-100.0%
Drybulk Fleet				-	-	-	-
Consolidated Lease Termination Expense	-	15,391	-	15,391	-	(15,391)	-

Tanker segment

2010 vs. 2009

In 2010 we did not have any lease termination expenses.

2009 vs. 2008

On June 24, 2009, we terminated the bareboat charters, initially entered into as part of the sale and leaseback deal in 2006, and redelivered the vessels M/T Faithful, the M/T Doubtless, the M/T Spotless and the M/T Vanguard to their owners after paying \$11.8 million in termination fees and expenses. In addition to the termination fee and expenses, we also paid bareboat hire up to July 15, 2009 in the amount of \$1.1 million. Furthermore, on July 3, 2009 we redelivered the M/T Relentless to its owners and paid a termination fee of \$2.5 million as part of a termination agreement entered into on April 3, 2009 to terminate the bareboat charter initially entered into as part of the sale and leaseback deal in 2005.

Drybulk segment

There were no lease termination expenses applicable to the drybulk segment.

4. Amortization of deferred gain on sale and leaseback of vessels and write-off of seller's credit

	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
Amortization of Deferred Gain on Sale and Leaseback of Vessels and Write-off of Seller's Credit by Segment	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	(18,707)	(7,799)	-	10,908	-58.3%	7,799	-100.0%
Drybulk Fleet	-	-	-	-	-	-	-
Consolidated Amortization of Deferred Gain on Sale and Leaseback of Vessels and Write-off of Seller's Credit	(18,707)	(7,799)	-	10,908	-58.3%	7,799	-100.0%

Tanker segment

2010 vs. 2009

Deferred gain on sale and leaseback of vessels was fully amortized in 2009.

2009 vs. 2008

During 2009, amortization of deferred gain decreased by \$10.9 million, or 58.3%, compared to 2008. During 2009, amortization of deferred gain on sale and leaseback of vessels included \$14.1 million in accelerated recognition of unamortized gain offset by the write off of \$7.9 million of seller's credit, due to the termination of the remaining five leases. The 2009 amount also includes the annual deferred gain amortization of \$1.6 million. During 2008, amortization of deferred gain on sale and leaseback of vessels included \$4.4 million of annual amortization and \$27.2 million of accelerated amortization representing unamortized gain resulting from the unwinding of six leases in 2008, offset by the \$14.3 million of vessel sale related expenses.

Drybulk segment

Amortization of deferred gain on sale and leaseback of vessels and write-off of seller's credit is not applicable to the drybulk segment.

5. Vessel Operating Expenses

Vessel Operating Expenses by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	56,272	15,032	6,090	(41,240)	-73.3%	(8,942)	-59.5%
Drybulk Fleet	10,842	8,707	6,763	(2,135)	-19.7%	(1,944)	-22.3%
Consolidated Vessel Operating Expenses	67,114	23,739	12,853	(43,375)	-64.6%	(10,886)	-45.9%

Vessel operating expenses include:

-	crew wages and related costs,
-	insurance,
-	repairs and maintenance,
-	spares and consumable stores,
-	tonnage taxes and value added tax, or VAT.

Tanker segment

2010 vs. 2009

During 2010, vessel operating expenses decreased by \$8.9 million, or 59.5%, compared to 2009 due to our lease unwinding strategy which was concluded in 2009 with the termination of five leases, which resulted in a decrease in 2010 operating expenses of \$8.7 million.

On a daily basis, average vessel operating expenses decreased in 2010 by \$2,662 per day, or 56.4%, from 2009. This decrease can be partly attributed to the termination of five leases, during 2009, which lead to an overall decrease in operating expenses during 2010. In addition, the six newbuilding vessels added to our fleet during 2009 were chartered under bareboat charters and therefore had no effect on our operating expenses despite the fact that they increased the number of our vessel operating days in both 2009 and 2010, but more so during 2010. Crew costs decreased by \$1,233 per day, or 54.1%, repairs and maintenance decreased by \$652 per day, or 73%, and spares and consumable stores decreased by \$490 per day, or 48.6%, compared to 2009. Finally, during 2010 the daily insurance cost decreased by \$284 per day, or 49% compared to 2009.

2009 vs. 2008

During 2009, average vessel operating expenses decreased by \$41.2 million, or 73.3%, compared to 2008 mainly as a result of a 37.4% reduction in the average number of tanker vessels that we operated, from 13.9 tanker vessels in 2008 to 8.7 tanker vessels in 2009.

On a daily basis, vessel operating expenses decreased in 2009 by \$6,322 per day, or 57.2%, from 2008. The decrease was partly a result of lower crew wages and related costs during 2009 representing \$2,091 per day, or 47.9%, compared to 2008. Crew wages decreased due to a change in the mix of our crew during the second half of 2009. More specifically, all of our Greek crew was replaced with other nationalities during the second half of 2009. During 2009, repairs and maintenance decreased by \$2,414 per day, or 73.0%, from 2008, mainly as a result of a decrease in unplanned repairs due to damages of \$1,116 per day and decreased costs related to other repairs and maintenance of \$728 per day, mainly resulting from the decrease in the average age and capacity of vessels. Also, during 2009, spares and consumable stores decreased by \$1,225 per day, or 54.8% compared to 2008 as a result of decreased repairs and maintenance. Finally, during 2009 the daily insurance cost decreased by \$638 per day, or 52.4%, compared to 2008 as a result of a decrease in the average number of vessels that we operated in 2009 relative to 2008, which offset the increased insurance premiums imposed.

Drybulk segment

2010 vs. 2009

During 2010, vessel operating expenses decreased by \$1.9 million, or 22.3%, compared to 2009.

On a daily basis, vessel operating expenses decreased in 2010 by \$1,065 per day, or 22.3%, from 2009. The decrease was partly a result of lower crew wages and related costs which decreased in 2010 by \$358 per day, or 15.6%, from 2009 due to a renegotiation of our contacts with our manning agent. During 2010, repairs and maintenance decreased by \$533 per day, or 65.9%, from 2009, mainly as a result of extraordinary repairs and maintenance for M/V Pepito in 2009 that we claimed from insurance in 2010, thus decreasing the related expense. Also, during 2010, spares and consumable stores decreased by \$217 per day, or 20.4% compared to 2009, mainly due to the spares used for the extraordinary repairs and maintenance for M/V Pepito in 2009 and due to the special surveys of two Panamax and one Handymax drybulk vessels in 2010 that reduced the need for tactical maintenance of the three vessels during the year. Finally, during 2010 the daily insurance cost increased by \$20 per day, or 3%, from 2009.

2009 vs. 2008

During 2009, vessel operating expenses decreased by \$2.1 million, or 19.7%, compared to 2008.

On a daily basis, vessel operating expenses decreased in 2009 by \$1,320 per day, or 21.7%, from 2008. The decrease was partly a result of lower crew wages and related costs which decreased in 2009 by \$186 per day, or 7.5%, from 2008. During 2009, repairs and maintenance decreased by \$841 per day, or 50.9%, from 2008, mainly as a result of the sale of M/V Bertram during the second half of 2008. Also, during 2009, spares and consumable stores decreased by \$406 per day, or 27.6% compared to 2008, mainly due to the sale of M/V Bertram and the fact that 2008 was the first year of operation of the drybulk vessels, which was characterized by an increased need for spares and consumable stores. Finally, during 2009 the daily insurance cost increased by \$77 per day, or 13.6%, from 2008 as a result of increased insurance premiums imposed.

6. Dry-docking costs

Dry-docking Costs by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	9,450	4,543	10	(4,907)	-51.9%	(4,533)	-99.8%
Drybulk Fleet	586	59	4,093	(527)	-89.9%	4,034	6837.3%

Consolidated Dry-docking Costs	10,036	4,602	4,103	(5,434)	-54.1%	(499)	-10.8%
-----------------------------------	--------	-------	-------	---------	--------	-------	--------

Tanker segment

During 2010, no tanker vessels underwent any dry-docking.

During 2009, dry-docking costs decreased 51.9% to \$4.5 million. Dry-docking costs in 2009 mainly related to the special surveys of two Handymax tankers that were completed in 2009.

During 2008, dry-docking costs amounted to \$9.4 million. Dry-docking costs in 2008 mainly related to the special surveys of two Suezmax tankers and two Handymax tankers and the intermediate survey of one Suezmax tanker that was completed in 2008.

Drybulk segment

During 2010, dry-docking costs amounted to \$4.1 million that related to the completion of the special surveys of two Panamax and one Handymax drybulk vessels.

During 2009, no drybulk vessels underwent any dry-docking.

During 2008, we completed the intermediate survey of one Panamax drybulk vessel.

	7. Vessel Depreciation			change			
	Year Ended December 31,			YE09 v YE08		YE10 v YE09	
	2008	2009	2010				
Vessel Depreciation by Segment	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	13,867	12,580	13,371	(1,287)	-9.3%	791	6.3%
Drybulk Fleet	18,797	19,005	19,005	208	1.1%	-	0.0%
Consolidated Vessel Depreciation	32,664	31,585	32,376	(1,079)	-3.3%	791	2.5%

Tanker segment

2010 vs. 2009

During 2010, vessel depreciation increased by \$0.8 million, or 6.3%, compared to 2009. This is due to the full employment of all our newbuilding vessels in 2010 that increased our depreciation expenses by \$3.3 million, and an offsetting decrease of \$2.3 million related to the recognition of an impairment charge for M/T's Dauntless and Ioannis P in 2009 that decreased the depreciable value of the vessels by a total of \$36.6 million and another minor offsetting decrease of \$0.2 million related to the sale of M/T Dauntless in the fourth quarter of 2010.

2009 vs. 2008

During 2009, vessel depreciation decreased by \$1.3 million, or 9.3%, compared to 2008. This is due to a decrease of \$9.5 million related to the seven owned Suezmax tankers that were sold during 2008, and an offsetting increase of \$8.2 million related to the newbuilding vessels delivered during 2009.

Drybulk segment

2010 vs. 2009

Due to the fact that our drybulk fleet remained the same between the two years, there was no increase or decrease in the depreciation expense.

2009 vs. 2008

During 2009, vessel depreciation increased by \$0.2 million or 1.1% compared to 2008. This is due to the increase of \$1.7 million related to M/V Papillon (ex. Voc Gallant), M/V Astrale and M/V Pepito that were operating for the full year in 2009, which is offset by the decrease of \$1.5 million, related to the sale of the M/V Bertram during 2008.

8. Management fees-third parties

Management fees-third parties by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	1,080	338	119	(742)	-68.7%	(219)	-64.8%
Drybulk Fleet	79	81	40	2	2.5%	(41)	-50.6%
Consolidated Management fees-third parties	1,159	419	159	(740)	-63.8%	(260)	-62.1%

Tanker segment

2010 vs. 2009

During 2010, sub-managers fees decreased by \$0.2 million, or 64.8%, compared to 2009 due to the fact that from July 1, 2010 onwards our fleet was being managed by Central Mare. After July 1, 2010 we have not incurred any third party management fees. See 'Management fees for related parties' section that follows.

2009 vs. 2008

During 2009, sub-managers fees decreased by \$0.7 million, or 68.7%, compared to 2008 mainly due to the decrease in the average number of vessels of our fleet and the shift in technical management from third parties to Top Tanker Management. Specifically, as of December 31, 2009 the number of vessels under third party technical management was one compared to two as of December 31, 2008. Additionally, as of December 31, 2009 the number of vessels under third party crew management was two compared to nine as of December 31, 2008.

Drybulk segment

2010 vs. 2009

During 2010, sub-managers fees decreased by \$0.04 million or 50.6% compared to 2009 mainly due to the fact that from July 1, 2010 onwards our fleet was being managed by Central Mare and thus our third party management fees

were effectively eliminated.

2009 vs. 2008

There was no significant change in the management fees in the drybulk segment during this period.

9. Management fees for related parties

Management fees for related parties include the management fees that the company pays to Central Mare and TMS Tankers. Please see "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties". The below analysis combines tanker and drybulk vessel segments.

Segment	Year Ended December			change			
	2008	31, 2009	2010	YE09 v YE08	YE10 v YE09		
Management fees-related parties by Segment	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	-	-	1,804	-	-	1,804	-
Drybulk Fleet	-	-	1,327	-	-	1,327	-
Consolidated Management fees-related parties	-	-	3,131	-	-	3,131	-

2010 vs. 2009

Except as set forth below, since July, 1 2010, our vessels have been managed by Central Mare, a related party controlled by the family of our CEO. Pursuant to a letter agreement concluded between Central Mare and Top Ships as well as management agreements concluded between Central Mare and our vessel-owning subsidiaries, Central Mare has been providing technical and commercial management for our vessels and has also been acting as our charter, sales and purchase broker. On October 1, 2010, we entered into a management agreement with TMS Tankers, a related party, for the technical management and crewing of M/T Delos. Commercial management of the vessel was contracted to Central Mare as of that date. The management agreement with TMS Tankers is expected to be terminated during the second quarter of 2011 and all management functions performed by TMS Tankers will be transferred to another manager. In 2010 all fees payable to Central Mare under these management agreements amounted to \$2.9 million and to TMS Tankers to \$0.1 million. Please see "Item 7 – Related Party Transactions - Central Mare Letter Agreement Management Agreements and Other Agreements" for further details.

2009 vs. 2008

Not applicable.

10. General and Administrative Expenses

General and administrative expenses include executive compensation paid to Central Mare, a related party controlled by the family of our CEO, for the provision of our executive officers, office rent, legal and auditing costs, regulatory compliance costs, other miscellaneous office expenses, non-cash stock compensation, and corporate overhead. Central Mare provides the services of the individuals who serve in the position of CEO, Chief Financial Officer, Executive Vice President and Chief Technical Officer. For further information, please see "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties".

The below analysis, combines tanker and drybulk vessel segments.

General and Administrative Expenses by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	22,474	14,914	11,055	(7,560)	-33.6%	(3,859)	-25.9%
Drybulk Fleet	7,856	8,437	6,921	581	7.4%	(1,516)	-18.0%
Unallocated	(101)	65	166	166-164.4%		101	155.4%
Consolidated General and Administrative Expenses	30,229	23,416	18,142	(6,813)	-22.5%	(5,274)	-22.5%

2010 vs. 2009

During 2010, our general and administrative expenses decreased by \$5.3 million, or 22.5%, compared to 2009. This decrease is mainly due to a reduction in manager and employee related expenses by \$2.3 million as a result of the contracting of operational, technical and commercial functions to Central Mare from July 1, 2010 that led to a more cost effective operating structure and reduced overhead expenses. Also, during 2010, stock based compensation expense decreased by \$1.4 million, mainly due to the difference in grant date fair value of awards granted to the senior management and directors. Additionally, bonuses decreased by \$0.8 million, legal & consulting fees decreased by \$0.6 million, audit expenses decreased by \$0.4 million, travelling expenses decreased by \$0.2 million and Nasdaq related fees & expenses decreased by \$0.1 million.

2009 vs. 2008

During 2009, our general and administrative expenses decreased by \$6.8 million, or 22.5%, compared to 2008. This decrease was attributed primarily to a decrease in salaries and related costs of \$3.6 million during 2009 due to a decrease in the average number of employees from 92 in 2008 to 59 in 2009. Also, during 2009, stock based compensation expense decreased by \$1.6 million from \$5.1 million in 2008 to \$3.5 million in 2009, mainly related to the difference in grant date fair value of awards granted to the senior management and directors, offset by the accelerated vesting due to board member resignations in 2009 (See "Item 6 – Directors, Senior Management and Employees – Compensation"). Finally, during 2009, our audit expenses decreased by \$1.5 million from 2008.

11. Gain on sale of vessels

Gain on Sale of Vessels by Segment	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
	(\$ in thousands)			\$	%	\$	%
Tanker Fleet	(21,347)	-	(5,101)	21,347-100.0%		(5,101)	-
Drybulk Fleet	2,169	-	-	(2,169)-100.0%		-	-
Consolidated Gain on Sale of Vessels	(19,178)	-	(5,101)	19,178-100.0%		(5,101)	-

Tanker segment

During 2010 we recognized a gain of \$5.1 million from the sale of M/T Dauntless.

During 2009, we did not sell any tanker vessels.

During 2008 we recognized a total gain of \$19.4 million from the sale of M/T Edgeless, M/T Ellen P, M/T Limitless and M/T Endless, a gain of \$1.8 million from the sale of M/T Stormless, and a gain of \$0.6 million from the sale of M/T Noiseless.

Drybulk segment

During 2010, we did not sell any drybulk vessels.

During 2009, we did not sell any drybulk vessels.

During 2008 we recognized a loss of \$2.2 million from the sale of M/V Bertram in April 2008.

	12. Interest and Finance Costs							
	Year Ended December 31,			change				
	2008	2009	2010	YE09 v YE08		YE10 v YE09		
Interest and Finance Costs by Segment	(\$ in thousands)			\$	%	\$	%	
Tanker Fleet	(11,888)	(7,692)	(10,448)	4,196	-35.3%	(2,756)	35.8%	
Drybulk Fleet	(13,876)	(5,519)	(4,175)	8,357	-60.2%	1,344	-24.4%	
Unallocated		(758)	(153)	(758)	-	605	-79.8%	
Consolidated Interest and Finance Costs	(25,764)	(13,969)	(14,776)	11,795	-45.8%	(807)	5.8%	

Tanker segment

2010 vs. 2009

During 2010, interest and finance costs increased by \$2.8 million, or 35.8% compared to 2009. The increase is mainly due to an increase of \$1.2 million in loan interest expenses relating to the financing of the newbuilding vessels that were delivered in the first half of 2009 and an amount of \$1.5 million which constitutes the amortization of the debt discount relating to convertible loans. The debt discount represents the portion of debt that is convertible into equity where the conversion price per share is less than the market value of the common stock at the commitment date. For further information, please see "Item 18 – Financial Statements – Note 12 – Debt – Other Loans".

2009 vs. 2008

During 2009, interest and finance costs decreased by \$4.2 million, or 35.3% compared to 2008. The decrease is mainly due to the loan prepayment of \$97.7 million associated with the sale of tanker vessels M/T Edgeless, M/T Ellen P and M/T Stormless in 2008, which resulted in a decrease of \$3.8 million in loan interest expenses and the loan prepayment of \$100.1 million associated with the sale of tanker vessels M/T Noiseless, M/T Limitless, M/T Endless and M/T Stainless in 2008, which resulted in a decrease of \$3.1 million in loan interest expenses. These decreases

were partially offset by an increase of \$4.5 million in loan interest expenses relating to the financing of newbuilding vessels.

Also, during 2009, there was a decrease in amortization of finance fees in a net amount of \$1.2 million. This decrease relates to a decrease in finance fees associated with vessels sold during 2008 and a decrease related to the loan associated with vessels M/T Dauntless and M/T Ioannis P. During 2008, relevant amortization for this loan was accelerated due to restructuring. Finally, these decreases were offset by an increase during 2009 related to finance fees of newbuilding vessels.

Drybulk segment

2010 vs. 2009

During 2010, interest and finance costs decreased by \$1.3 million, or 24.4% compared to 2009. The decrease is mainly due to the reduction in the outstanding balance of the loans for all our drybulk vessels and a decrease in the LIBOR rates, which resulted to a decrease in interest expenses of \$0.9 million. Furthermore, in 2010, the amortization of finance fees decreased by \$0.3 million in 2010, mainly due to the restructuring of vessel's M/V Astrale loan in 2009, which led to accelerated amortization of the vessel's fees in the same year.

2009 vs. 2008

During 2009, interest and finance costs decreased by \$8.4 million, or 60.2% compared to 2008. The decrease is mainly due to (i) decrease in LIBOR rates, associated with the loans of M/T Astrale, M/T Pepito, M/T Cyclades, M/T Papillon (ex Voc Gallant) and M/T Amalfi, which reduced interest and finance costs by \$4.6 million, (ii) lower average interest rate as of December 31, 2009 of 3.30% compared to 4.54% as of December 31, 2008, and (iii) a decrease in interest and finance costs of \$0.7 million relating to the vessel Bertram which was sold during 2008. In addition, an amount of \$1.2 million was charged as interest in 2008 related to the drybulk vessel M/V Astrale's capital lease entered into in February 2008 for two months before the vessel was acquired. Finally, there was a decrease in amortization of finance fees of vessel M/V Amalfi of an amount of \$2.0 million. This decrease is mainly related to a decrease in finance fees which were higher in 2008 due to write-off, as a result of amendments of loan terms.

Unallocated

During 2010, interest and finance costs decreased by \$0.6 million or 79.8% compared to 2009. This decrease is mainly due to the foreign currency gain from a bridge loan denominated in Euros, which amounted to \$0.2 million and the decrease in amortization of financing fees for the same bridge loan, which amounted to \$0.4 million.

Other Income or Expenses Not Allocated to Segments

Our management does not review the gain / (loss) on financial instruments and interest income by segment.

	13.		Segment Income				
	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08	YE10 v YE09

73

Tanker segment

2010 vs. 2009

During 2010, segment loss decreased by \$63.8 million, or 99.8%, compared to 2009.

2009 vs. 2008

During 2009, segment income decreased by \$65 million, or 5,812.3%, compared to 2008.

Drybulk segment

2010 vs. 2009

During 2010, segment income decreased by \$4.7 million, or 37.%, compared to 2009.

2009 vs. 2008

During 2009, segment income decreased by \$0.3 million, or 2.2% compared to 2008.

Unallocated

2010 vs. 2009

During 2010, segment income decreased by \$3.4 million, or 110.3%, compared to 2009.

2009 vs. 2008

During 2009, segment income decreased by \$18.8 million or 85.9% compared to 2008.

14. Gain / (loss) on financial instruments

	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08		YE10 v YE09	
Gain / (loss) on Financial Instruments	(\$ in thousands)			\$	%	\$	%
Fair value change on financial instruments	(10,650)	2,635	865	13,285	-124.7%	(1,770)	-67.2%
Swap Interest	(1,374)	(4,716)	(5,922)	(3,342)	243.2%	(1,206)	25.6%
Total Gain / (loss) on Financial Instruments	(12,024)	(2,081)	(5,057)	9,943	-82.7%	(2,976)	143.0%

2010 vs. 2009

During 2010, fair value change in financial instruments decreased by \$1.8 million, or 67.2% compared to 2009 due to the deterioration of expectations for future LIBOR rates that prevailed in the first nine months of the year, which had an adverse effect on the valuation of our swaps. This was partially offset by the decrease of the time to maturity of our swap contracts and an improvement in the expectations of future LIBOR rates that occurred in the fourth quarter of 2010, which had a positive effect on our swap valuations. Please see "Item 11 – Quantitative and Qualitative Disclosures About Market Risk" for further information.

During 2010, swap interest increased by \$1.2 million, or 25.6% compared to 2009, mainly due to the decrease in LIBOR rates.

2009 vs. 2008

During 2009, fair value change in financial instruments decreased by \$13.3 million, or 124.7% compared to 2008. During 2009, the fair value of our swaps increased by \$19.0 million due to more favorable valuations of our swap contracts as a result of an expectation of higher LIBOR rates in the future, as evidenced by forward rates. This positive change was partially offset by the decrease relating to the gain of \$5.6 million as a result of the termination of a derivative product in the fourth quarter of 2008. Please see "Item 11 – Quantitative and Qualitative Disclosures About Market Risk" for further information.

During 2009, swap interest increased by \$3.3 million, or 243.2%, compared to 2008, mainly due to decreased LIBOR rates.

	15. Interest Income						
	Year Ended December 31,			change			
	2008	2009	2010	YE09 v YE08	YE10 v YE09		
Interest Income	1,831	235	136	(1,596)	-87.2%	(99)	-42.1%
Consolidated Interest Income	1,831	235	136	(1,596)	-87.2%	(99)	-42.1%

2010 vs. 2009

During 2010, interest income decreased by 42.1% to \$0.1 million from \$0.2 million during 2009. This decrease is mainly due to the decrease in the amounts kept under time deposits and relevant interest rates.

2009 vs. 2008

During 2009, interest income decreased by 87.2% to \$0.2 million from \$1.8 million during 2008. This decrease is mainly due to the decrease in the amounts kept under time deposits and relevant interest rates.

B. Liquidity and Capital Resources

Since our formation, our principal source of funds has been equity provided by our shareholders through equity offerings or at the market sales, operating cash flow and long-term borrowing. Our principal use of funds has been capital expenditures to establish and grow our fleet, maintain the quality of our vessels, comply with international shipping standards and environmental laws and regulations, fund working capital requirements and make principal repayments on outstanding loan facilities.

In December 2007 and April 2008, we raised a total of \$120.0 million of equity capital to fund our diversification into the drybulk sector and our newbuilding program. Additionally, in 2008 we sold seven Suezmax tankers and one Panamax drybulk vessel for an aggregate sale price of \$380.5 million.

Also in 2008, we refinanced our six newbuilding product tankers, which we bareboat chartered to three major charterers at fixed rates for periods of seven to ten years. With respect to these vessels, these bareboat charters reduce our long-term market risk and eliminate our operational risk for that period.

Our business is capital intensive and its future success will depend on our ability to maintain a high-quality fleet through the acquisition of newer vessels and the selective sale of older vessels. Our practice has been to acquire tankers and drybulk vessels using a combination of funds received from equity investors and bank debt secured by mortgages on our vessels. Future acquisitions are subject to management's expectation of future market conditions, our ability to acquire vessels on favorable terms and our liquidity and capital resources.

As of December 31, 2010, we had total indebtedness under senior secured and unsecured credit facilities with our lenders of \$343.7 million, which after excluding unamortized financing fees of \$4.0 million and unamortized debt discount of \$2.3 million, amounts to \$337.4 million, maturing from 2011 through 2019.

As of December 31, 2010, our cash balances amounted to \$17.6 million, all of which is classified as restricted cash. Of this amount, \$15.1 million is inaccessible to the Company as a result of being pledged, blocked or held as cash collateral. The remaining \$2.5 million is restricted solely as a result of our overall cash position not meeting the targets set by the loan covenants and we are permitted to use these funds for working capital purposes.

Breach of Loan Covenants

As of December 31, 2010, we were in breach of loan covenants relating to earnings before interest, taxes, depreciation and amortization (EBITDA), overall cash position (minimum liquidity covenants), adjusted net worth and asset cover with certain banks. As a result of these covenant breaches and due to cross default provisions contained in all our bank facilities, we were in breach of all loan facilities and have classified all our debt and financial instruments as current, as discussed in Note 12 to our consolidated financial statements included in this annual report. See also below under "Working Capital Requirements and Sources of Capital".

A violation of covenants constitutes an event of default under our credit facilities, which would, unless waived by our lenders, provide our lenders with the right to require us to post additional collateral, enhance our equity and liquidity, increase our interest payments, pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels in our fleet and accelerate our indebtedness, which would impair our ability to continue to conduct our business. We expect that the lenders will not demand payment of the loans before their maturity, provided that we pay loan installments and accumulated or accrued interest as they fall due.

For details of credit facilities as of December 31, 2010 and discussion regarding waivers see "Item 5 – F. – Tabular Disclosure of Contractual Obligations – (1) Debt Facilities".

Working Capital Requirements and Sources of Capital

As of December 31, 2010, we had a working capital deficit (current assets less current liabilities) of \$363.2 million assuming acceleration of our debt and financial instruments by our lenders. This working capital deficit consisted of the following (figures in millions):

Total current assets	\$3.4
Current portion of debt	\$32.8
Current portion of debt (previously categorized as long term)	\$304.6
Other current liabilities	\$16.3
Current portion of financial instruments	\$4.1
Current portion of financial instruments (previously categorized as long term)	\$8.8
Total current liabilities (assuming acceleration of our debt and financial instruments by our lenders)	\$366.6
Working capital deficit	\$363.2
Add other capital requirements for the coming 12 months:	
Operating lease payments	\$3.0
Payments under management agreements	\$6.5
Less:	
Restricted cash	\$(17.6)
Cash shortfall (Working capital deficit plus other capital requirements assuming acceleration of our debt and financial instruments by our lenders less restricted cash to be used against debt repayment)	\$355.1

We do not believe that our lenders will demand payment of the loans before their respective maturity dates as a result of our covenant breaches. Under this assumption, our material capital requirements in the coming 12 months are expected to be as follows (figures in millions):

Scheduled debt repayments (as of December 31, 2010)	\$35.2
Interest payments (debt and swaps)	\$14.5
Lease payments	\$3.0
Payments under management agreements	\$6.5

Total material capital requirements:	\$59.2
--------------------------------------	--------

Our operating cash flow for 2011 is expected to decrease compared to 2010 mainly due to the redelivery of the M/V Cyclades during the second quarter of 2011. The M/V Cyclades was earning a daily rate of \$54,250 until April 4, 2011, when it was delivered to its present charterers, and since then has been earning a daily rate of \$20,000. Based on our cash flow projections for 2011, cash provided by operating activities is expected to amount to \$29.0 million and is not sufficient to cover scheduled debt repayments as of December 31, 2010.

Our cash flow could improve if actual charter rates during the year prove to be higher than the expected rates that we have used in our projections, thereby improving the revenues of the vessels that have spot market exposure, but this is a parameter outside of management's control. Cash flow could also improve by deferring part of our debt repayments into future years or by releasing funds held under pledges. If we are unable to partly defer our loan repayments and / or release funds held under pledges, we will examine the option of raising capital through equity and debt offerings or asset sales as a last resort. Given the high quality of assets and charters that we have in our portfolio, the sale of a tanker vessel provides us with a realistic last resort alternative to provide us with necessary liquidity.

As of the date of this report, discussions with certain lenders are already in progress and in certain cases our cash flow has already improved. See Section "(1) Debt facilities" below under "Tabular Disclosure of Contractual Obligations" for a discussion of our progress with each lender.

Cash Flow Information

Unrestricted cash and cash equivalents were \$0.0 as of December 31, 2010 and December 31, 2009. All of our cash is restricted due to minimum liquidity covenant requirements.

NET CASH PROVIDED BY OPERATING ACTIVITIES-increased by \$29 million or 441.39% for 2010 to \$35.6 million compared to \$6.6 million for 2009. This increase is primarily due to the absence in 2010 of lease termination expenses that amounted to \$15.4 million in 2009. Furthermore the difference is also attributable to a more efficient operation of our fleet, since the reduction of revenue by \$17.1 million, or 15.8%, in 2010 as compared to 2009 was accompanied by a higher decrease in related expenses, mainly charter hire expenses that decreased by \$10.3 million, or 95.6%, vessel operating expenses that decreased by \$10.9 million, or 45.9% and voyage expenses that decreased by \$0.9 million, or 26.8%. Finally the outsourcing of all of the commercial and technical management of the Company's vessels to Central Mare led to an overall saving in the general and administrative expenses that when aggregated with the management fees to related parties decreased by \$2.4 million, or 10.1%.

In 2009, net cash provided by operating activities decreased by 44.49% to \$6.6 million compared to \$11.8 million in 2008. This decrease was attributed to the overall decrease in operating income by \$95.9 million, or 155.4%, which resulted in a \$34.2 million operating loss in 2009, compared to an operating income of \$61.7 million in 2008. The operating loss in 2009 includes net expenses of \$12.2 million, relating to the termination of leases and the impairment charge of \$36.6 million. The remainder of the decrease is mainly a result of the decrease in revenues relating to the decrease in the average number of tanker vessels that we operated, from 13.9 in 2008 to 8.7 in 2009, the lower rates achieved for vessels M/V Amalfi and M/V Astrale in 2009 and the fact that vessel M/V Bertram was sold in 2008, and, therefore, did not contribute to 2009 results, partly offset by a related decrease in expenses.

NET CASH PROVIDED BY (USED IN) INVESTING ACTIVITIES— net cash provided by investing activities during 2010 was \$25.7 million, consisting primarily of \$19.4 million collected from the sale of M/T Dauntless, \$4.6 million from a decrease in restricted cash and \$1.3 million that we collected from the settlement of insurance claims in our favor.

Net cash used in investing activities for 2009 was \$104.4 million, primarily due to \$136.7 million relating to advances for our six newbuilding product tankers (representing payment of the third installment for one vessel, the fourth installment for four vessels and the delivery installment for six vessels in an aggregate amount of \$133.3 million and capitalized interest and expenses of \$3.4 million). Net cash provided by investing activities was \$30.3 million primarily relating to a decrease in restricted cash of \$20 million due to the termination of sale and leaseback transactions and a decrease of \$4.8 million relating to the change in the minimum liquidity of our revolving credit facility with Royal Bank of Scotland, or RBS. For 2008, we had net cash provided by investing activities of \$58.6 million, primarily due to net proceeds from the sale of vessels totaling \$338.1 million. Specifically, during 2008 we sold seven Suezmax tankers and one Panamax drybulk vessel. Also, during 2008, we invested \$118.1 million upon delivery of two of our drybulk vessels (representing payment of the remaining purchase price of \$115.6 million and capitalized expenses of \$2.5 million) and \$114.3 million as advances for vessels under construction for our six newbuilding product tankers (representing payment of the second installment for all vessels, the third installment for five vessels and the fourth installment for two vessels in an aggregate amount of \$109.2 million and capitalized interest and expenses of \$5.1 million).

NET CASH (USED IN) PROVIDED BY FINANCING ACTIVITIES-

Net cash used in financing activities for 2010 was \$61.5 million, consisting primarily of \$40.7 million of scheduled debt repayments, \$24.0 million of debt prepayments relating to the sale of M/T Dauntless (for \$19.5 million) as well as the restructuring of the DVB bridge loan facility and an offsetting cash inflow of \$4 million from new bridge loans (Laurasia Trading and Santa Lucia Holdings).

Net cash provided by financing activities in 2009 was \$51.6 million, consisting of \$111.7 million of new bank loans relating to installments of our six newbuildings and the issuance of 2,230,000 shares of common stock under the SEDA with YA Global, with total net proceeds, after commissions, in the amount of \$2.6 million. These inflows were offset by total loan repayments of \$54.3 million. In 2008, the net cash used in financing activities was \$50.2 million, consisting of total loan repayments of \$368.6 million relating to sold vessels offset by the draw down of \$271.2 million of new bank loans relating to the purchase of drybulk vessels and installments of newbuildings and the private placement of 7.3 million unregistered shares of common stock for aggregate proceeds of approximately \$51.0 million.

C. Research and Development, Patents and Licenses, etc.

Not applicable.

D. Trend Information

For industry trends refer to industry disclosure under "Item 4 – Business Overview". For company-specific trends refer to "Item 5. Operating and Financial Review and Prospects – Operating Results."

E. Off Balance Sheet Arrangements

None.

F. Tabular Disclosure of Contractual Obligations

The following table sets forth our contractual obligations and their maturity dates as of December 31, 2010, in millions of \$:

Contractual Obligations:	Total	Less than 1 year	Payments due by period		
			1-3 years	3-5 years	More than 5 years
(1) (i) Long term debt A	\$343.7	\$343.7			
(ii) Interest B	\$14.5	\$14.5			
(2) Operating leases C	\$4.8	\$0.6	\$1.3	\$1.3	\$1.6
(3) Lease Payments under M/T Delos D	\$8.5	\$2.4	\$3.9	\$2.2	\$0.0
(4) Vessel Management Fees to Central Mare Inc E	\$22.9	\$4.7	\$10.2	\$8.0	\$0.0
(5) Other Management Fees to Central Mare Inc F	\$8.4	\$1.8	\$3.7	\$2.9	\$0.0
Total	\$402.8	\$367.7	\$19.1	\$14.4	\$1.6

A. Relates to the outstanding balance as of December 31, 2010, consisting of 1(a) (\$26.9 million), 1(b) (i) (\$42.4 million), 1(b) (ii) (\$94.3 million), 1(c) (i) (\$26.5 million), 1(c) (ii) (\$57.5 million), 1(d) (i) (\$23.0 million), 1(d) (ii) (\$34.8 million), 1(e) (\$34.3 million), 1(f) (\$0.0 million) 1(g) (\$2.0 million) and 1(h) (\$2.0 million), discussed below.

B. Interest payments are calculated using the Company's average going interest rate of 4.23% as of December 31, 2010, which takes into account additional interest expense from interest rate swaps, applied on the amortized debt as presented in the table above.

C. Relates to the minimum rentals payable for the office space.

D. Relates to remaining lease payments for M/T Delos.

E. Relates to our obligation for fees per vessel per day or per annum for thirteen of our vessels under our management contracts with Central Mare. These fees cover the provision of technical and commercial management, insurance services, information-system related services and services in connection with compliance to the Section 404 of the Sarbanes-Oxley Act of 2002. We have assumed no changes in the number of vessels, an annual increase of 3% as provided by the relative agreements and no changes in the U.S. Dollar to Euro exchange rate (assumed at 1.33 USD/Euro). Each agreement has an initial term of five years after which it will continue to be in effect until terminated by either party subject to twelve months advance notice. For further information, please see "Item 4 – Information on the Company – B. Business

Overview – Central Mare – Letter Agreement and Management Agreements".

F. Relates to our obligation for fees of Euro 1.3 million (approximately \$1.8 million based on the U.S. Dollar/Euro exchange rate as of December 31, 2010) per year under our Letter Agreement with Central Mare for the cost of providing accounting and reporting services to our company. This fee is adjusted upwards 3% per annum. The agreement has an initial term of five years after which it will continue to be in effect until terminated by either party subject to twelve months advance notice. For further information, please see "Item 4 – Information on the Company – B. Business Overview – Central Mare – Letter Agreement and Management Agreements".

(1) Debt Facilities:

(a) RBS Revolving Credit Facility:

As of December 31, 2010, the outstanding amount under the RBS revolving credit facility was \$26.9 million payable in 11 consecutive quarterly installments as follows: (i) two installments of \$0.58 million, starting in February, 2011; (ii) nine installments of \$0.94 million; and (iii) a balloon payment of \$17.28 million payable together with the last installment in August 2013.

Additional terms and conditions of the RBS credit facility are as follows:

During 2007, the interest rate on the RBS credit facility was 85 basis points over LIBOR. From March 26, 2008, the interest rate was adjusted to 125 basis points over LIBOR. On July 30, 2009, the Company amended the loan with RBS and adjusted the margin to 2.5%. The RBS credit facility is collateralized by a first preferred mortgage on the M/T Ioannis P as of December 31, 2010.

The RBS credit facility contains, among other things, various financial covenants, including (i) security value maintenance whereby the market value of the mortgaged vessel and the market value of any additional security is required to be greater than or equal to 130% of the outstanding loan and the fair value of outstanding swaps, (ii) adjusted net worth required to be greater than or equal to \$250.0 million and greater than 35% of total assets, (iii) EBITDA required to be greater than 120% of fixed charges (excluding one off lease termination fees paid in June and July 2009 for the termination of the remaining 5 leased vessels), (iv) minimum liquid funds of \$15.0 million overall and the higher of \$5.0 million or \$0.4 million per vessel unencumbered (i.e. not blocked specifically as security for obligations) and (v) a minimum balance of \$0.1 million to be maintained in the operating account.

Furthermore, the facility includes a cash sweep mechanism whereby 75% of any surplus cash on each repayment date, earned by M/T Ioannis P will be applied in the inverse order of maturity to the amount outstanding under the loan agreement. Surplus cash is defined as net earnings less: (i) aggregate operating expenses and general and administrative expenses capped at \$10,500 per day, (ii) scheduled capital repayments and (iii) loan interest and swap interest payments.

The RBS credit facility also contains general covenants that require us to maintain adequate insurance coverage and obtain the bank's consent before we incur new indebtedness that is secured by the vessels mortgaged thereunder. In addition, the RBS credit facility prohibits us, without the lender's consent, from appointing a CEO other than Mr. Evangelos Pistiolis and requires that the vessel mortgaged thereunder be managed by a company acceptable to the lender. We are permitted to pay dividends under the RBS credit facility so long as we are not in default of a loan covenant. Finally, the RBS credit facility contains a cross-default provision with other facilities.

Covenant Breaches and Waivers

As of December 31, 2010, we were not in compliance with the security value maintenance covenant, the EBITDA covenant and the minimum liquid funds covenant.

During April 2011, we entered into a preliminary agreement with RBS according to which, and subject to execution of definitive documents, we will amend the current repayment schedule so that our 2011 capital repayments are reduced by \$2.0 million and our 2012 capital repayments are reduced by \$2.8 million. Reduced amounts from existing capital repayment schedule will be transferred to the final balloon payment of the facility in August 2013.

Upon execution of final documentation we will also amend the minimum security and financial covenants to lower levels than the ones currently in place. Had these levels been in effect as of December 31, 2010, we would not have been in breach of security value maintenance, the EBITDA and the minimum liquid funds covenants.

In addition, we will offer a pledge in Top Ships shares to RBS at a minimum value of \$5 million. This pledge will only serve as security and will be cancelled once the facility has been repaid.

We are currently in discussions with the bank regarding these breaches and we are currently finalizing a restructuring of the repayment schedule of our facility. This restructuring, when concluded, is expected to reduce quarterly installments to \$0.25 million and the shortfall from the current repayment schedule to be transferred to the balloon payment in August 2013.

As of December 31, 2010, we had two interest rate swaps with RBS. For a full description of our interest rate swap agreements, see "Item 11-Quantitative and Qualitative Disclosures about Market Risk".

(b) HSH Credit Facilities:

(i) Loan of an initial amount of \$95.0 million: On November 8, 2007, we entered into a \$95.0 million secured term loan facility with HSH Nordbank AG, or HSH, to partially finance the acquisition of the M/V Bertram, M/V Amalfi and M/V Papillon (ex Voc Gallant). As of December 31, 2010, \$42.4 million remained outstanding under the facility.

M/V Bertram: On November 9, 2007, we drew down \$28.1 million on our \$95.0 million secured term loan with HSH to purchase the M/V Bertram. In December 2007, we used \$1.5 million from the net proceeds of our December 5, 2007 equity offering to pay down outstanding debt under the loan. Following the sale of the vessel in April 2008, the \$26.5 million then outstanding under the loan was fully repaid.

M/V Amalfi: On December 27, 2007, we drew down \$28.7 million on our \$95.0 million secured term loan with HSH to purchase the M/V Amalfi. In December 2007, we used \$1.6 million from the net proceeds of our December 5, 2007 equity offering to pay down our outstanding debt under the loan. As of December 31, 2010, our outstanding debt under the loan totaled \$20.5 million, payable in 16 consecutive quarterly installments of approximately \$0.54 million, starting in March 2011, and a balloon payment of \$11.9 million payable together with the last installment in December 2014.

M/V Papillon (ex Voc Gallant): On February 1, 2008, we drew down \$33.2 million on our \$95.0 million secured term loan with HSH to purchase the M/V Papillon. As of December 31, 2010, our outstanding debt under the loan totaled \$21.9 million, payable in 17 consecutive quarterly installments of approximately \$0.50 million, starting in February 2011 and a balloon payment of \$13.4 million payable together with the last installment in February 2015.

The credit facility bears interest at LIBOR plus a margin. Until March 27, 2008 the margin was 100 basis points over LIBOR. From March 28, 2008 until March 24, 2009 the margin was adjusted to 135 basis points over LIBOR as a result of the waiver received for our breach of the EBITDA covenant during 2008. According to the amendment of the loan agreement dated May, 11, 2009, from March 24, 2009 until March 31, 2010, the margin was set at 250 basis points over LIBOR. As of the date of this annual report, due to covenant breaches, the margin has not been reset to the initial loan agreement levels and it continues to be 250 basis points over LIBOR.

The facility contains, among other things, various financial covenants, including (i) at any time after March 31, 2010, an asset maintenance restriction whereby the fair market value of the mortgaged vessels and of any additional security is required to be greater than or equal to a required percentage of the outstanding loan and the fair value of outstanding swaps. As per the initial loan agreement the minimum required percentage had been set at 130% for the first four years up to November 2011 and 135% from then on until maturity, (ii) market value adjusted net worth required to be greater than or equal to \$125.0 million up to March 31, 2010 and \$250.0 million, thereafter and greater than or equal to 15% of total assets up to March 31, 2010, and 35% of total assets, thereafter, (iii) beginning on March 31, 2010 and at all times thereafter, EBITDA required to be greater than 120% of fixed charges, and (iv) minimum liquid funds of \$25.0 million until March 31, 2010 inclusive of all pledged deposits and cash held with all banks and afterwards minimum liquid funds of \$25.0 million or \$0.5 million per group vessel that are free of any security interest.

Furthermore, the facility provides for a cash pledge that originally amounted to \$6.5 million and was intended to be applied against future installments as follows; 50% pro rata against the eight installments starting from February 2010, and 50% pro rata against all remaining installments of the facility including the balloon payment. As of the date of this annual report, this cash pledge amounts to \$2.9 million.

(ii) Loan of an initial amount of \$121.3 million: On October 1, 2008, we entered into a \$121.3 million secured term loan facility with HSH to partially finance the construction costs of the newbuilding product tankers M/T Miss Marilena, M/T Tyrrhenian Wave and M/T Britto. As of December 31, 2010, we had a secured term loan outstanding of \$94.3 million.

M/T Miss Marilena : From October 2008 to February 2009, we drew down a total of \$40.1 million on our \$121.3 million secured term loan facility with HSH to purchase the M/T Marilena. As of December 31, 2010, the outstanding debt under the loan totaled \$35.9 million, payable in 33 consecutive quarterly installments, as follows: (i) one installment of \$0.60 million, starting in February 2011; (ii) 12 installments of \$0.70 million, (iii) 20 installments of \$0.75 million; and (iv) a balloon payment of \$11.9 million payable together with the last installment in February 2019.

M/T Tyrrhenian Wave : From October 2008 until March 2009, we drew down a total of \$29.3 million on our \$121.3 million secured term loan facility with HSH to purchase the M/T Tyrrhenian Wave. As of December 31, 2010, our outstanding debt under the loan totaled \$26.3 million, payable in 33 consecutive quarterly installments, as follows: (i) one installment of \$0.43 million, starting in March, 2011; (ii) 12 installments of \$0.51 million, (iii) 20 installments of 0.54 million; and (iv) a balloon payment of \$8.9 million payable together with the last installment in March 2019.

M/T Britto : From October 2008 until May 2009, we drew down a total of \$35.2 million on our \$121.3 million secured term loan facility with HSH to purchase the M/T Britto. As of December 31, 2010, our outstanding debt under the loan totaled \$32.1 million, payable in 34 consecutive quarterly installments, as follows: (i) two installments of \$0.52 million, starting in February 2011; (ii) 12 installments of \$0.61 million; (iii) 20 installments of \$0.65 million; and (iv) a balloon payment of \$10.7 million payable together with the last installment in May 2019.

The credit facility bears interest at LIBOR plus a margin. According to the original loan agreement the margin was set at 175 basis points over LIBOR until August 30, 2010 and was to be set at an amount agreed upon by us and HSH thereafter. Pursuant to an amendment to the loan agreement dated May, 11, 2009, the margin was adjusted to 200 basis points over LIBOR where it has remained through the date of this annual report. As of the date of this report we are still in discussions in relation to this matter.

The credit facility contains a provision whereby the bank may chose to use an alternative base interest rate in case it believes that the LIBOR is not representative of its funding cost. HSH has accordingly been using the cost of funds determined by KLIEM (Carl Kliem GmgH), a broker, instead of LIBOR. The facility also contains various financial covenants, including (i) an asset maintenance restriction whereby the fair market value of the mortgaged vessels and of any additional security is required to be greater than or equal to 120% prior to October 1, 2012 and 125% thereafter of our outstanding loan plus the cost of terminating any interest rate swaps into which we may enter; (ii) an adjusted net worth restriction whereby we are required to maintain an adjusted net worth that is greater than or equal to \$125.0 million until March 31, 2010, \$250.0 million thereafter and is at least equal to 15% of our total assets until March 31 2010, and 35% of our total assets thereafter; (iii) an EBITDA restriction that on or after March 31 2010 requires our EBITDA to be greater than 120% of our fixed charges; and (iv) a minimum liquid funds restriction whereby we are required to maintain cash in hand or short-term investments that equal, at a minimum, the greater of \$25.0 million and \$0.5 million per vessel directly or indirectly owned by or bareboat chartered or leased back to us.

The HSH credit facilities require that the mortgaged vessels be managed by a company that is acceptable to HSH. In addition, both facilities prohibit the borrowers, which are our subsidiaries, from (i) declaring or paying any dividends or making any distributions to us in excess of 70% of their net annual income and (ii) paying dividends or making other distribution of their stock (other than distributions under our stock incentive plan) to us when the ratio of our EBITDA to fixed charges is less than 120% or the fair market value of the mortgaged vessels is less than 140% of the outstanding loan and the cost of terminating any interest rate swap agreement into which such borrowing subsidiaries of ours may enter. The facilities also do not permit any distribution of capital or assets and permit investments relating to any share buy-back or similar actions only up to an amount of \$5.0 million. In the case of the sale of vessels financed by HSH, 100% of the sale proceeds following the debt repayment are to be applied towards full covenant compliance; in the case of the sale of vessels not financed by HSH, following the debt repayment, HSH is to be allocated an amount of the remaining sale proceeds equal to the proportion of total HSH outstanding loans over our total indebtedness; and in the case of a successful equity offering, HSH is to be allocated an amount (on the basis of 50% of the offering proceeds) equal to the proportion of total HSH outstanding loans over our consolidated indebtedness. Our cash deposits, in addition to the pledged amounts, are required to be at least equal to \$3.75 million (i.e. \$0.75 million per vessel). Finally, the facilities contain a cross-default provision and are cross collateralized.

Covenant Breaches and Waivers

As of December 31, 2010, we were not in compliance with the asset maintenance, EBITDA, adjusted net worth or minimum liquid funds covenants. Both of our HSH facilities provide that a default rate of 2% on top of the initially agreed upon margin may apply for as long as there is an event of default such as a covenant breach. On April 1, 2011, the Company received a notice from HSH informing it of its intention to charge the default rate of 2% on top of margin, in respect of covenant breaches, from that date onwards. As of the date of this report the Company is in discussion with HSH to resolve the covenant breaches and avoid being charged the default rate.

As of December 31, 2010, we had seven interest rate swaps with HSH. For a full description of our interest rate swap agreements, see "Item 11-Quantitative and Qualitative Disclosures about Market Risk".

(c) DVB Credit Facilities:

(i) M/V Astrale: In April 2008, we drew down the entire \$48.0 million available pursuant to our loan agreement dated April 24, 2008 with DVB Bank America N.V., or DVB, to partially finance the acquisition cost of the drybulk vessel M/V Astrale. On December 1, 2010, we amended the loan agreement, which among other changes, cross-collateralized it with the product tankers' facility. Certain conditions precedent of this amended loan agreement relating to the assignment of security and the signing of certain undertakings between us, DVB and charterers are still pending as of the date of this report. As of December 31, 2010, our outstanding debt under the loan totaled \$26.5 million, payable in 20 consecutive quarterly installments of \$0.7 million, starting in January 2011, and a balloon payment of \$12.5 million, payable together with the last installment in October 2015.

The facility bears interest at LIBOR plus a margin. The margin has been agreed at 175 basis points per annum for the period commencing on the date of the drawdown and ending on, but not including, the first anniversary of the date on which DVB disbursed the funds to us pursuant to this agreement, and 150 basis points per annum thereafter. The credit facility contains a provision whereby the bank may choose to use an alternative base interest rate if it believes that the LIBOR is not representative of its funding cost. DVB has accordingly been using the cost of funds determined by KLIEM (Carl Kliem GmgH), a broker, instead of LIBOR.

The facility contains various financial covenants, including (i) a ship minimum value restriction whereby the fair market value of the mortgaged vessels under the drybulk and the product tanker financing and of any additional security is required to be greater than or equal to 105% until March 31, 2011, 110% until March 31, 2012 and 120% thereafter of the outstanding loan (excluding Top Up Loan) and the fair value of the outstanding swaps; (ii) a net asset value restriction whereby our net asset value is required to be greater than \$225.0 million, calculated on an annual basis, which was amended to \$0 up to December 31, 2010; (iii) book equity required to be greater than \$180.0 million; (iv) minimum cash balances of \$2.5 million unencumbered up to December 31, 2010 and thereafter \$25.0 million or \$0.5 million per vessel (\$0.25 million per vessel as cash in hand may be included); and (v) interest cover ratio of no less than 1.5 times (defined as EBITDAR divided by interest expense plus Lease Obligations), which was amended to 1.0 times up to December 31, 2010.

Furthermore, the facility includes a cash sweep mechanism for the period commencing after April 2010 until the maturity of the loan agreement, whereby 60% of any excess cash earned by the M/V Astrale will be applied in the inverse order of maturity to the amount outstanding under the loan agreement. Excess cash is defined as net earnings less: (i) aggregate operating expenses and general and administrative expenses capped at \$10,000 per day as adjusted for an annual increase of 3%, (ii) scheduled installment repayments and (iii) interest costs. The cash sweep mechanism will cease to apply in the event the ratio of the vessel's charter free fair market value over the outstanding loan is equal or greater than 140% for a period of more than 3 consecutive months.

(ii) Loan of an initial amount of \$80.0 million: On October 6, 2008, we entered into a loan agreement with DVB for \$80.0 million to partially finance the construction cost of the newbuilding product tankers M/T Ionian Wave and M/T Hongbo, both of which were delivered in 2009. We amended that agreement on July 31, 2009 and again on December 1, 2010. As amended, the loan agreement reassigned the distribution of the outstanding loan facility between the two vessels that were financed, cross-collateralized this facility with the Astrale facility and amended the Top Up Loan. Certain conditions precedent of this amended loan agreement relating to the assignment of security and the signing of certain undertakings between bank, owners and charterers are still pending as of the date of this report. As of December 31, 2010, we had a secured term loan outstanding of \$57.5 million.

M/T Ionian Wave: From October 2008 until March 2009, we drew down a total of \$33.8 million on our \$80.0 million DVB loan agreement to purchase the M/T Ionian. As of December 31, 2010, our outstanding debt on this sum totaled \$23.2 million, payable in 34 equal consecutive quarterly installments of \$0.4 million, starting in March 2011, and a balloon payment of \$9.6 million payable together with the last installment in June 2019.

M/T Hongbo: From October 2008 until July 2009, we drew down a total of \$27.0 million on our \$80 million DVB loan agreement to purchase the M/T Hongbo. As of December 31, 2010, our outstanding debt on this sum totaled \$29.0 million, payable in 34 equal consecutive quarterly installments of \$0.5 million, starting in March 2011, and a balloon payment of \$11.0 million payable together with the last installment in June 2019.

Amended Top Up Loan: We initially drew down \$12.5 million on the Top Up Loan on July 31, 2009, in order to finance the delivery installment of the M/T Hongbo. That amount was due to be repaid on July 30, 2010. On December 1, 2010, we amended our \$80.0 million loan agreement with DVB and agreed to repay part of the Top Up Loan and reschedule part of it so that it becomes an amortizing loan, or the Amended Top Up Loan. The Amended Top Up Loan of \$5.3 million is repayable in 18 quarterly consecutive installments as follows: 4 installments of \$0.1 million and 14 installments of \$0.35 starting from March 2011.

The portion of the credit facility relating to the Amended Top Up Loan and the M/T Ionian Wave, bear interest at LIBOR plus a margin of 225 basis points per annum. The portion of the credit facility relating to the M/T Hongbo bears interest at LIBOR plus a margin of 155 basis points per annum. The credit facility contains a provision whereby the bank may chose to use an alternative base interest rate in case it believes that the LIBOR is not representative of its funding cost. DVB has accordingly been using the cost of funds determined by KLIEM (Carl Kliem GmgH), a broker, instead of LIBOR.

The facility contains, among other things, various financial covenants including (i) a minimum required security cover restriction whereby the fair market value of the mortgaged vessels and of any additional security is required to be greater than or equal to 115% for the first five years, up to August 2014 and 125% thereafter of the outstanding loan (excluding the amount relating to the Amended Top Up Loan) and the fair value of the outstanding swaps; (ii) a net asset value restriction whereby our net asset value is required to be greater than \$225.0 million, calculated on an annual basis, which was amended to \$0 up to December 31, 2010; (iii) book equity required to be greater than \$180.0 million; (iv) minimum cash balances of \$2.5 million unencumbered up to December 31, 2010 and thereafter \$25.0 million or \$0.5 million per vessel (\$0.25 million per vessel as cash in hand may be included); and (v) interest cover ratio of no less than 1.5 times (defined as EBITDAR divided by interest expense plus Lease Obligations), which was amended to 1.0 times up to December 31, 2010.

In addition, both of our DVB credit facilities prohibit the borrowers, which are our subsidiaries, from declaring or paying any dividends or returning any capital to their equity holder without DVB's consent, and require that the mortgaged vessels be managed by a company acceptable to DVB. Finally, we are not allowed to appoint any CEO other than Mr. Evangelos Pistiolis without the prior written consent of DVB.

Also, from January 1, 2012 onwards, 45% of excess cash flow from product tankers, i.e. after debt and interest payment, to be applied as a prepayment to the M/V Astrale facility as long as the ship minimum value of the M/V Astrale alone is below 125%.

Once the conditions precedent to the effectiveness of the amended loan agreement have been met, the share pledge of 12,512,400 common shares of Top Ships that had been issued to Hongbo Shipping Company Limited, our wholly owned subsidiary, will be cancelled.

Covenants

As of December 31, 2010, we were in breach with the cross default provision of both DVB facilities as a result of covenant breaches in other credit facilities.

As of December 31, 2010, we had one interest rate swap with DVB. We have also agreed to enter into an interest rate swap agreement with DVB for a minimum period of 3 years within a period of six months after the delivery advance drawdown date of M/T Hongbo (up to January 2010). As of the date of this annual report we have not yet entered into such an agreement. For a full description of our interest rate swap agreements, see "Item 11-Quantitative and Qualitative Disclosures about Market Risk".

(d) ALPHA BANK Credit Facilities:

(i) M/V Cyclades: On December 17, 2007, we entered into a \$48.0 million loan agreement with Alpha Bank A.E., or Alpha, and drew down the entire amount available thereunder on the same date to partially finance the acquisition cost of the drybulk vessel M/V Cyclades. As of December 31, 2010, the outstanding debt on this loan totaled \$23.0 million, payable in 20 consecutive quarterly installments of \$0.75 million starting in March 2011 and a balloon payment of \$8.0 million payable together with the last installment in December 2015.

The credit facility bears interest at LIBOR plus a margin of 130 basis points per annum. Under the terms of the original agreement, the margin was set at 130 basis points. The supplemental agreement to the loan dated April 3, 2009, set the margin at 250 basis points over LIBOR. The third supplemental agreement to the loan dated November 25, 2009 set the margin at 300 basis points over LIBOR from September 17, 2009 until March 31, 2010 and 225 basis points over LIBOR thereafter. As of the date of this annual report, due to covenant breaches, the margin continues being 300 basis points over LIBOR.

The facility contains, among other things, various financial covenants including: i) asset maintenance restriction whereby the fair market value of the mortgaged vessel and of any additional security is required to be greater than or equal to 130% of the outstanding loan; ii) a market value adjusted net worth requirement whereby our adjusted net worth is required to be greater than or equal to \$250.0 million; iii) a book equity requirement whereby our total assets less our consolidated debt is required to be greater than \$100.0 million; and iv) a minimum cash balances requirement of \$25.0 million.

(ii) M/T Lichtenstein: On August 18, 2008, we entered into a \$39.0 million loan agreement with Alpha and drew down the entire amount available thereunder from August 2008 through February 2009 to partially finance the construction cost of newbuilding M/T Lichtenstein. As of December 31, 2010, the outstanding amount was \$34.8 million, payable in 33 equal consecutive quarterly installments of \$0.6 million, starting in February 2011 and a balloon payment of \$15.0 million payable together with the last installment in February 2019.

The credit facility bears interest at LIBOR plus a margin of 165 basis points per annum. Under the first supplemental agreement of the loan dated April 3, 2009, the margin was set at 225 basis points over LIBOR and under the third supplemental agreement of the loan dated November 25, 2009, on October 26, 2009, the margin was set at 300 basis points over LIBOR until March 31, 2010 and 225 basis points over LIBOR thereafter. As of the date of this annual

report, due to covenant breaches, the margin continues being 300 basis points over LIBOR.

The facility contains, among other things, various financial covenants including: including (i) an asset maintenance requirement whereby the fair market value of the mortgaged vessel and of any additional security is required to be greater than or equal to 130% of the outstanding loan; (ii) a market value adjusted net worth requirement whereby our adjusted net worth is required to be greater than or equal to \$250.0 million; (iii) a book equity requirement whereby our total assets less our consolidated debt is required to be greater than \$100.0 million; and (iv) minimum cash balances of \$25.0 million.

In addition, our Alpha credit facilities provide for a cash pledge of \$4.0 million to be maintained with Alpha Bank, which will be applied towards the drybulk financing in case of renegotiation or cancellation of the existing time charter agreement of M/V Cyclades. On December 31, 2009, \$2.0 million of the pledged cash would have been released subject to the above and no other event of default. The remaining \$2.0 million would have been released on March 30, 2010 given that: a) no renegotiation or cancellation of the existing time charter agreement has been effected until then, and b) no event of default has occurred in the respective loan facility. On February 28, 2011, we agreed with the bank to release \$1 million and to apply \$3 million as a prepayment of M/T Lichtenstein.

Finally, the two facilities are cross collateralized. The credit facilities contain a cross-default provision.

Covenant Breaches and Waivers

As of December 31, 2010, we were not in compliance with the asset maintenance requirement of the product tanker facility nor the adjusted net worth and the minimum cash balance covenants. On April 5, 2011, we received waivers for the above mentioned covenant breaches for the period up to February 28, 2012, while the margin remained at 300 basis points.

(e) EMPORIKI Credit Facility: On March 5, 2008, we entered into a \$50.0 million loan agreement with Emporiki Bank of Greece S.A., or Emporiki, to partially finance the acquisition cost of the drybulk vessel M/T Pepito. As of December 31, 2010, the outstanding amount was \$34.3 million, payable in 9 consecutive semi-annual installments of \$2.38 million starting in March 2011 and a balloon payment of \$12.9 million payable together with the last installment in March 2015.

The credit facility bears interest at LIBOR plus a margin of 110 basis points per annum. Under the first supplemental agreement of the loan dated signed in August 5, 2009, from March 31, 2009 until March 31, 2010, the margin was set at 250 basis points over LIBOR. Under the second supplemental agreement of the loan signed in July 2010, the margin of 250 basis will remain in place until June 30, 2011. Thereafter, the margin will be reduced to 175 basis points per annum until maturity of the loan, subject to no covenant breaches.

The facility contains, among other things, various financial covenants including: (i) the aggregate market value of the mortgaged vessel and of any additional security is required to be equal to at least 125% of the outstanding principal amount under the loan and the swap; (ii) the leverage ratio (defined as our total liabilities divided by our total assets adjusted to fair market value of vessels) will not exceed 75%; (iii) the interest cover ratio (as defined in the this credit facility agreement) will stand at the minimum level of 2.5:1; (iv) minimum corporate liquidity not to be less than next 6 months of senior debt principal payments; and (v) minimum average monthly balances of the earnings account of \$1 million.

In addition, the credit facility prohibits us, without the lender's consent, from appointing a CEO other than Mr. Evangelos Pistiolis and requires that the mortgaged vessel be managed by a company acceptable to Emporiki. In addition, it prohibits the borrower, which is our subsidiary, without the lender's consent, from declaring or paying any

dividends or making any distributions to its shareholders. The credit facility contains a cross-default provision.

Covenant Breaches and Waivers

As of December 31, 2010, we were not in compliance with the asset maintenance, the minimum leverage ratio and the minimum corporate liquidity covenants, for all of which we have received waivers until June 30, 2011.

As of December 31, 2010, we had one interest rate swap with Emporiki Bank. For a full description of our interest rate swap agreements, see "Item 11-Quantitative and Qualitative Disclosures about Market Risk".

(f) CAPE MANUEL Credit Facility: On July 27, 2009, we entered into an unsecured bridge loan financing facility with an unrelated party. The purpose of this loan was to provide working capital financing for an amount of Euro 2.0 million, or \$2.9 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009) that was drawn down in two tranches: one on July 29, 2009 for an amount of Euro 1.0 million or \$1.4 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009) and one on September 24, 2009 for an amount of Euro 1.0 million or \$1.4 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009).

On April 15, 2010, we repaid the first advance along with all accrued interest and finance costs by then and on October 29, 2010 we repaid the second advance along with all accrued interest and finance costs by then. As of December 31, 2010, there was no outstanding balance in connection with this loan.

(g) LAURASIA TRADING LTD Credit Facility: On August 6, 2010, we entered into an unsecured bridge loan financing facility with an unrelated party for \$2.0 million. The purpose of this loan was to refinance part of the DVB Top Up Loan which was due to be repaid on July 30, 2010. As of December 31, 2010, the outstanding amount was \$2.0 million. The loan bears an interest of 6.0% per annum.

We have undertaken to repay the loan by August 17, 2011 in cash or shares or in combination as demanded by the lender. Interest and fees in connection with the facility will be paid in cash by the same date. In case repayment or part repayment is made in shares, the number of shares will be calculated as the dollar amount of the liability as of the repayment date divided by \$0.40, meaning that a full repayment by means of shares will result in a transfer of 5 million shares to Laurasia Trading Ltd. However the number of shares cannot exceed 15% of our total number of outstanding shares due to anti-takeover provisions in our Stockholders Rights Agreement, unless the board specifically agrees to allow a shareholder to exceed such limit.

Since our stock price was above the debt conversion price of \$0.40 on August 6, 2010, the conversion feature contains a beneficial share settlement option and in accordance with the Financial Accounting Standards Board's, or FASB's, Codifications topic 470-20 "Debt with Conversion and Other Options" we have calculated the beneficial conversion feature to be \$2 million at the time of issuance, by multiplying the number of shares into which the debt is convertible by the difference between the conversion price and the market price of our stock at the time of issuance. We recorded this amount as debt discount, to be amortized over the duration of the loan, with a corresponding credit to additional paid in capital. The total interest expense related to the facility in our Consolidated Statement of Operations for the year ended December 31, 2010 was \$0.83 million of which \$0.79 million is non-cash amortization of the debt discount and \$0.04 million is the contractual interest at an interest rate of 6% per year. As of December 31, 2010, the unamortized debt discount was \$1.21 million.

On February 15, 2011, we entered into an amendment of the initial facility which provides for a new repayment date, specifically, February 15, 2012, with no other change to the terms of the debt or the conversion feature.

On that same date we also entered into a new unsecured bridge loan facility for \$2 million. We have undertaken to repay the loan by February 15, 2012 in cash or shares or in combination as demanded by the lender. Interest and fees in connection with the facility will be payable in cash at the same date. In case repayment or part repayment is made in shares, the number of shares will be calculated as the dollar amount of the liability as of the repayment date divided by \$0.40. The total shareholding of Laurasia, resulting from both facilities, cannot exceed 15% of our total number of outstanding shares due to anti-takeover provisions in our Stockholders Rights Agreement unless the board specifically agrees to allow a shareholder to exceed such limit. The loan bears an interest of 8.0% per annum.

(h) SANTA LUCIA HOLDINGS LTD Credit Facility: On August 16, 2010, we entered into an unsecured bridge loan financing facility with an unrelated party for \$2.0 million. The purpose of this loan was to refinance part of the DVB Top Up Loan which was due to be repaid on July 30, 2010. As of December 31, 2010, the outstanding amount was \$2.0 million. The loan bears an interest of 6.0% per annum.

We have undertaken to repay the loan by August 18, 2011 in cash or shares or in combination as demanded by the lender. Interest and fees in connection with the facility will be paid in cash by the same date. In case repayment or part repayment is made in shares, the number of shares will be calculated as the dollar amount of the liability as of the repayment date divided by \$0.40, meaning that a full repayment by means of shares will result in a transfer of 5 million shares to Santa Lucia Holdings Ltd.

Since our stock price was above the debt conversion price of \$0.40 on August 16, 2010, the conversion feature contains a beneficial share settlement option and in accordance with FASB's Codifications topic 470-20 "Debt with Conversion and Other Options" we have calculated the beneficial conversion feature to be \$1.8 million at the time of issuance, by multiplying the number of shares into which the debt is convertible by the difference between the conversion price and the market price of our stock at the time of issuance. We recorded this amount as debt discount, to be amortized over the duration of the loan, with a corresponding credit to additional paid in capital. The total interest expense related to the facility in our Consolidated Statement of Operations for the year ended December 31, 2010 was \$0.72 million of which \$0.68 million is non-cash amortization of the debt discount and \$0.04 million is the contractual interest at an interest rate of 6% per year. As of December 31, 2010 the unamortized debt discount was \$1.12 million.

We are currently in discussion with Santa Lucia Holdings in order to extend the repayment date of the loan.

(2) Operating Leases:

On October 1, 2010, we entered into a bareboat charter agreement to lease in vessel M/T Delos until September 30, 2015 at an average daily rate of \$5,219. The bareboat charter agreement was accounted for as an operating lease. Charterers have certain options by the end of the normal charter period (five years) to purchase the vessel.

In January 2006, we entered into an agreement with an unrelated party to lease office space in Athens, Greece, with an unrelated party. The office is located at 1, Vassilisis Sofias & Megalou Alexandrou Street, 151 24 Maroussi, Athens, Greece. The agreement is for duration of 12 years beginning May 2006 with a lessee's option for an extension of 10 years. From September 1, 2010, the monthly rental was renegotiated to \$0.06 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2010) from \$0.02 million (based on the U.S. Dollar/Euro exchange rate as of December 31, 2010), with all other terms remaining unchanged. In September 2010, the agreement was amended and the new monthly rent was renegotiated. It was also agreed to revert occupancy in certain areas of the leased office space by the end of April 2011. All other terms of the lease remained unchanged. As a result of this agreement we have made a revision in the useful life of certain assets that would have been amortized over the life of the lease. The

revision in useful life of these assets resulted in an accelerated depreciation of \$0.56 million included in general and administrative expenses.

In addition, our subsidiary TOP TANKERS (U.K.) LIMITED, a representative office in London, entered into a lease agreement with an unrelated third party for office space in London, which is valid from September 2010 and shall continue until either party shall give to the other one calendar month written notice. The annual lease is \$0.02 million (based on the U.S. Dollar/GBP exchange rate as of December 31, 2010) payable quarterly in advance. From September 1, 2010, the annual rental was renegotiated to \$0.02 million (based on the U.S. Dollar/GBP exchange rate as of December 31, 2010) from \$0.03 million, the previous rate which TOP TANKERS (U.K.) LIMITED had paid pursuant to its prior lease entered into in June 2007.

In November 2009, TOP SHIPS INC. entered into an agreement to lease space in London, from an unrelated party. The agreement is valid up to and including November 14, 2011. The current monthly rent is \$0.04 million (based on the U.S. Dollar/GBP exchange rate as of December 31, 2010).

Other Contractual Obligations:

Since July 1, 2010, Central Mare, a related party controlled by the family of our CEO, has been performing all of our operational, technical and commercial functions relating to the chartering and operation of our vessels, pursuant to a letter agreement concluded between Central Mare and Top Ships and management agreements concluded between Central Mare and our vessel-owning subsidiaries.

On October 1, 2010, we entered into a management agreement with TMS Tankers, a related party, for the technical management and crewing of M/T Delos. Commercial Management of the vessel was contracted to Central Mare, as of that date. The management agreement with TMS Tankers is expected to be terminated during the second quarter of 2011 and all management functions performed by TMS Tankers will be transferred to another manager.

On September 1, 2010, we entered into separate agreements with Central Mare, a related party controlled by the family of the Company's CEO, pursuant to which Central Mare furnishes our executive officers to us. These agreements were entered into in exchange for terminating prior employment agreements.

On March 1, 2011, we entered into an agreement with Central Mare, a related party controlled by the family of the Company's CEO, pursuant to which Central Mare furnishes certain employees to us including Corporate Development Officer and Internal Auditor as well as certain administrative employees.

Other major capital expenditures include funding our maintenance program of regularly scheduled intermediate survey or special survey dry-docking necessary to preserve the quality of our vessels as well as to comply with international shipping standards and environmental laws and regulations. Although we have some flexibility regarding the timing of this maintenance, the costs are relatively predictable. Management anticipates that the vessels that are younger than 15 years are required to undergo in-water intermediate surveys 2.5 years after a special survey dry-docking and that such vessels are to be dry-docked every five years. Vessels 15 years or older are required to undergo dry-dock intermediate survey every 2.5 years and not use in-water surveys for this purpose.

Our Fleet – Illustrative Comparison of Possible Excess of Carrying Value Over Estimated Charter-Free Market Value of Certain Vessels

In " – Critical Accounting Policies – Impairment of vessels," we discuss our policy for impairing the carrying values of our vessels. During the past few years, the market values of vessels have experienced particular volatility, with substantial declines in many vessel classes. As a result, the charter-free market value, or basic market value, of certain of our vessels may have declined below those vessels' carrying value, even though we would not impair those vessels' carrying value under our accounting impairment policy, due to our belief that future undiscounted cash flows expected to be earned by such vessels over their operating lives would exceed such vessels' carrying amounts.

The table set forth below indicates (i) the carrying value of each of our vessels as of December 31, 2010, (ii) which of our vessels we believe has a basic charter-free market value below its carrying value, and (iii) the aggregate difference between carrying value and basic charter-free market value represented by such vessels. This aggregate difference represents the approximate amount by which we believe we would have to reduce our net income if we sold all of such vessels in the current environment, on industry standard terms, in cash transactions, and to a willing buyer where we are not under any compulsion to sell, and where the buyer is not under any compulsion to buy. For purposes of this calculation, we have assumed that the vessels would be sold at a price that reflects our estimate of their current basic charter-free market values. However, we are not holding our vessels for sale. Our estimates of basic charter-free market value assume that our vessels are all in good and seaworthy condition without need for repair and if inspected would be certified in class without notations of any kind. Our estimates are based on information available from various industry sources, including:

- reports by industry analysts and data providers that focus on our industry and related dynamics affecting vessel values;
 - news and industry reports of similar vessel sales;
- news and industry reports of sales of vessels that are not similar to our vessels where we have made certain adjustments in an attempt to derive information that can be used as part of our estimates;
- approximate market values for our vessels or similar vessels that we have received from shipbrokers, whether solicited or unsolicited, or that shipbrokers have generally disseminated;
 - offers that we may have received from potential purchasers of our vessels; and
- vessel sale prices and values of which we are aware through both formal and informal communications with shipowners, shipbrokers, industry analysts and various other shipping industry participants and observers.

As we obtain information from various industry and other sources, our estimates of basic charter-free market value are inherently uncertain. In addition, vessel values are highly volatile; as such, our estimates may not be indicative of the current or future basic charter-free market value of our vessels or prices that we could achieve if we were to sell them.

	Dwt	Year Built	Carrying Value
Tanker Vessels			
Miss Marilena	50,000	2009	\$45.6 million*
Lichtenstein	50,000	2009	\$45.5 million*
Ionian Wave	50,000	2009	\$46.0 million*
Tyrrhenian Wave	50,000	2009	\$46.0 million*
Britto	50,000	2009	\$46.5 million*
Hongbo	50,000	2009	\$46.9 million*
Ioannis P	46,346	2003	\$21.8 million
Total Tanker dwt	346,346		
Drybulk Vessels			
Papillon	51,200	2002	\$57.9 million**
Pepito	75,928	2001	\$64.7 million**
Astrale	75,933	2000	\$64.2 million**
Cyclades	75,681	2000	\$62.0 million**
Amalfi	45,526	2000	\$48.6 million**
Total Drybulk dwt	324,268		
TOTAL DWT	670,614		

*Indicates tanker vessels for which we believe, as of December 31, 2010, the basic charter-free market value is lower than the vessel's carrying value. We believe that the aggregate carrying value of these vessels exceeds their aggregate basic charter-free market value by approximately \$66.5 million.

**Indicates drybulk carriers for which we believe, as of December 31, 2010, the basic charter-free market value is lower than the vessel's carrying value. We believe that the aggregate carrying value of these vessels exceeds their aggregate basic charter-free market value by approximately \$159.7 million.

We note that six of our tanker vessels and two of our drybulk vessels are currently employed under long-term, above-market time charters, see Business Overview – Our Fleet. We believe that if the vessels were sold with those charters attached, we would receive a premium for those vessels over their basic market value.

We refer you to the risk factor entitled "The international tanker and drybulk shipping industries have experienced drastic downturns after experiencing historically high charter rates and vessel values in early 2008, and a continued downturn in these markets may have an adverse effect on our earnings, impair the carrying value of our vessels and affect compliance with our loan covenants" and the discussion herein under the heading "Risks Related to Our Industries".

Critical Accounting Policies:

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are those that reflect significant judgments or uncertainties, and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies that involve a higher degree of judgment and the methods of their application. For a description of all of our significant accounting policies, see Note 2 to our consolidated financial statements included herein.

Vessel depreciation. We record the value of our vessels at their cost (which includes the contract price, pre-delivery costs incurred during the construction of newbuildings, capitalized interest and any material expenses incurred upon acquisition such as initial repairs, improvements and delivery expenses to prepare the vessel for its initial voyage) less accumulated depreciation. We depreciate our vessels on a straight-line basis over their estimated useful lives, estimated to be 25 years from the date of initial delivery from the shipyard. Depreciation is based on cost of the vessel less its residual value which is estimated to be \$160 per light-weight ton. A decrease in the useful life of the vessel or in the residual value would have the effect of increasing the annual depreciation charge.

A decrease in the useful life of the vessel may occur as a result of poor vessel maintenance performed, harsh ocean going and weather conditions that the vessel is subject to, or poor quality of the shipbuilding yard. When regulations place limitations over the ability of a vessel to trade on a worldwide basis, the vessel's useful life is adjusted at the date such regulations become effective. Weak freight markets may result in owners scrapping more vessels and scrapping them earlier due to unattractive returns. An increase in the useful life of the vessel may result from superior vessel maintenance performed, favorable oceangoing and weather conditions the vessel is subjected to, superior quality of the shipbuilding yard, or high freight rates which result in owners scrapping the vessels later due to attractive cash flows..

Impairment of vessels: We evaluate the carrying amounts and periods over which long-lived assets are depreciated on a quarterly basis to determine if events have occurred which would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, we review certain indicators of potential impairment, such as undiscounted projected operating cash flows, vessel sales and purchases, business plans and overall market conditions. We determine undiscounted projected net operating cash flows for each vessel and compare it to the vessel's carrying value. If the carrying value of the related vessel exceeds its undiscounted future net cash flows, the carrying value is reduced to its fair value. We estimate fair market value primarily through the use of third party valuations performed on an individual vessel basis.

The carrying values of our vessels may not represent their fair market value at any point in time since the market prices of second-hand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. During the past few years, the market values of vessels have experienced particular volatility, with substantial declines in many vessel classes. As a result, the charter-free market value, or basic market value, of certain of our vessels may have declined below those vessels' carrying value, even though we would not impair those vessels' carrying value under our accounting impairment policy, due to our belief that future undiscounted cash flows expected to be earned by such vessels over their operating lives would exceed such vessels' carrying amounts.

Although we believe that the assumptions used to evaluate potential impairment are reasonable and appropriate, such assumptions are highly subjective. There can be no assurance as to how long charter rates and vessel values will remain at their currently low levels or whether they will improve by any significant degree. Charter rates may remain at depressed levels for some time which could adversely affect our revenue and profitability, and future assessments of vessel impairment.

We performed the undiscounted cash flow test as of December 31, 2008 on our entire fleet and determined that the carrying amounts of our vessels held for use were recoverable despite the significant drop in values of drybulk vessels.

During 2009, the drybulk market stabilized and the charter market improved resulting in a partial recovery of asset values. In contrast, the product tanker sector, to which we are primarily exposed, experienced a significant drop in charter rates and, as a result, a quarter on quarter drop in asset values. Therefore, during 2009, we began exploring the re-chartering of our two oldest tanker vessels, M/T Dauntless and M/T Ioannis P, due to their upcoming charter expirations. Based on discussions with charterers we had indications that such vessels would need to be re-chartered at significantly lower rates upon expiration of their existing charters. As a result, during 2009, we performed the undiscounted cash flow test as of December 31, 2009 on our entire fleet and determined that the carrying amounts of these two vessels were not recoverable by their undiscounted cash flows. This indicated impairment and we consequently recorded an impairment charge of \$36.6 million for the year ended December 31, 2009.

In order to perform the undiscounted cash flow test, we make assumptions about future charter rates, commissions, vessel operating expenses, dry-dock costs, fleet utilization, scrap rates used to calculate estimated proceeds at the end of vessels' useful lives and the estimated remaining useful lives of the vessels. These assumptions are based on historical trends as well as future expectations. The projected net operating cash flows are determined by considering the charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days (based on a combination of three year time charter rates for the next three years and the most recent eight year average of the one-year time charter rates for each vessels' category) over the remaining useful life of each vessel, which we estimate to be 25 years from the date of initial delivery from the shipyard. Expected outflows for scheduled vessels' maintenance and vessel operating expenses are based on historical data, and adjusted annually assuming an average annual inflation derived from the most recent twenty year average consumer price index. Effective fleet utilization, average commissions, dry-dock costs and scrap values are also based on historical data.

During 2009 we recorded an impairment charge of \$36.6 million for the year ended December 31, 2009. The fair value of the impaired vessels was determined based on a market approach, which consisted of quotations from well respected brokers regarding vessels with similar characteristics as compared to our vessels. This market approach is deemed more objective than the income approach mainly due to the multitude of transactions of comparable assets in the active and liquid shipping market at the time the impairment test was performed.

During 2010, fears of vessel oversupply and market disruptions led to high charter rate volatility in both tanker and drybulk segments and to a further decrease in vessel values. These are conditions that the Company considered to be indicators of potential impairment. The Company performed the undiscounted cash flow test as of December 31, 2010 and determined that the carrying amounts of its vessels held for use were recoverable.

Derivatives:

We designate our derivatives based upon the criteria established by the FASB in its accounting guidance for derivatives and hedging activities. The accounting guidance for derivatives requires that an entity recognizes all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. The accounting for the changes in the fair value of the derivative depends on the intended use of the derivative and the resulting designation. For a derivative that does not qualify as a cash flow hedge, the change in fair value is recognized at the end of each accounting period on the income statement. For a derivative that qualifies as a cash flow hedge, the change in fair value is recognized at the end of each reporting period in accumulated other comprehensive income / (loss) (effective portion) until the hedged item is recognized in income. The ineffective portion of a derivative's change in fair value is immediately recognized in the income statement.

If there is an increase in the 3-month LIBOR or if the 10 year U.S. Dollar swap rate exceeds 3.85%, there will be a positive effect on the fair value of our interest rate swap agreements. In contrast, a decrease in the 3-month LIBOR or an increase of over 0.05% in the difference between the 10 year U.S. Dollar swap rate and the 2 year U.S. Dollar swap rate will have a negative effect on the fair value of our interest rate swap agreements.

We have not applied hedge accounting to our interest rate swaps. Additionally, we have not adjusted the fair value of our derivative liabilities for non-performance risk as we expect to be able to perform under the contractual terms of our derivative agreements, such as making cash payments at periodic net settlement dates or upon termination. Please refer to "Item 5 – Liquidity and Capital Resources – Working capital requirements and sources of capital" for further information.

Provision for doubtful accounts. Revenue is based on contracted voyage and time charter parties and, although our business is with customers who we believe to be of the highest standard, there is always the possibility of a dispute, mainly over terms, calculation and payment of demurrages. In such circumstances, we assess the recoverability of amounts outstanding and we estimate a provision if there is a possibility of non-recoverability, combined with the application of a historical recoverability ratio, for purposes of determining the appropriate provision for doubtful accounts. Although we believe our provisions are based on fair judgment at the time of their creation, it is possible that an amount under dispute is not recovered and that the estimated provision for doubtful recoverability will prove inadequate.

Convertible Debt. In accordance with FASB's Codifications topic 470-20 "Debt with Conversion and Other Options" the Company evaluates debt securities (or Debt) for beneficial conversion features. A beneficial conversion feature is present when the conversion price per share is less than the market value of the common stock at the commitment date. The intrinsic value of the feature is then measured as the difference between the conversion price and the market value, or the Spread, multiplied by the number of shares into which the Debt is convertible and is recorded as debt discount with an offsetting amount increasing additional paid-in-capital. The debt discount is accreted to interest expense over the term of the Debt with any unamortized discount recognized as interest expense upon conversion of the Debt. If a debt security contains terms that change upon the occurrence of a future event the incremental intrinsic value is measured as the additional number of issuable shares multiplied by the commitment date market value and is recognized as additional debt discount with an offsetting amount increasing additional paid-in-capital upon the future

event occurrence. The total intrinsic value of the feature is limited to the proceeds allocated to the Debt instrument.

New accounting pronouncements: There are no significant effects from new accounting pronouncements. See "Item 18 – Financial Statements – Note 2 – Significant Accounting Policies –Recent Accounting Pronouncements".

G. Safe Harbor

Forward looking information discussed in Item 5 includes assumptions, expectations, projections, intentions and beliefs about future events. These statements are intended as "forward-looking statements". We caution that assumptions, expectations, projections, intentions and beliefs about future events may and often do vary from actual results and the differences can be material. Please see "Cautionary Statement Regarding Forward-Looking Statements" in this annual report.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

Set forth below are the names, ages and positions of our directors, executive officers and key employees as at December 31, 2010. Members of our Board of Directors are elected annually on a staggered basis, and each director elected holds office for a three-year term. Officers are elected from time to time by vote of our Board of Directors and hold office until a successor is elected.

Name	Age	Position
Evangelos J. Pistiolis	38	Director, President, CEO
Vangelis G. Ikonou	46	Director, Executive Vice President and Chairman of the Board
Alexandros Tsirikos	37	Director, Chief Financial Officer
Michael G. Docherty	51	Director
Roy Gibbs	61	Director, Chairman of the Audit Committee
Marios Hamboullas	70	Director
Yiannakis C. Economou	62	Director
Demetris P. Souroullas	48	Chief Technical Officer
Eirini Alexandropoulou	39	Secretary

Biographical information with respect to each of our directors and executives is set forth below.

Evangelos J. Pistiolis founded our Company in 2000, is our President and CEO and has served on our Board of Directors since July 2004. Mr. Pistiolis graduated from Southampton Institute of Higher Education in 1999 where he studied shipping operations and from Technical University of Munich in 1994 with a bachelor's degree in mechanical engineering. His career in shipping started in 1992 when he was involved with the day to day operations of a small

fleet of drybulk vessels. From 1994 through 1995 he worked at Howe Robinson & Co. Ltd., a London shipbroker specializing in container vessels. While studying at the Southampton Institute of Higher Education, Mr. Pistiolis oversaw the daily operations of Compass United Maritime Container Vessels, a ship management company located in Greece.

Vangelis G. Ikonomou is our Executive Vice President and Chairman and has served on our Board of Directors since July 2004. Prior to joining the Company, Mr. Ikonomou was the Commercial Director of Primal Tankers Inc. From 2000 to 2002, Mr. Ikonomou worked with George Moundreas & Company S.A. where he was responsible for the purchase and sale of second-hand vessels and initiated and developed a shipping industry research department. Mr. Ikonomou worked, from 1993 to 2000, for Eastern Mediterranean Maritime Ltd., a ship management company in Greece, in the commercial as well as the safety and quality departments. Mr. Ikonomou holds a Masters degree in Shipping Trade and Finance from the City University Business School in London, a Bachelors degree in Business Administration from the University of Athens in Greece and a Navigation Officer Degree from the Higher State Merchant Marine Academy in Greece.

Alexandros Tsirikos has served as our Chief Financial Officer since April 1, 2009. Mr. Tsirikos, is a UK qualified Chartered Accountant (ACA) and has been employed with TOP SHIPS INC. since July 2007 as the Company's Corporate Development Officer. Prior to joining TOP SHIPS INC., Mr Tsirikos was a manager with PricewaterhouseCoopers, or PwC, where he worked as a member of the PwC Advisory team and the PwC Assurance team thereby drawing experience both from consulting as well as auditing. As a member of the Advisory team, he lead and participated in numerous projects in the public and the private sectors, involving strategic planning and business modeling, investment analysis and appraisal, feasibility studies, costing and project management. As a member of the Assurance team, Mr. Tsirikos was part of the International Financial Reporting Standards, or IFRS, technical team of PwC Greece and lead numerous IFRS conversion projects for listed companies. He holds a Master's of Science in Shipping Trade and Finance from City University of London and a Bachelor's Degree with honors in Business Administration from Boston University in the United States. He speaks English, French and Greek.

Michael G. Docherty has served on our Board of Directors since July 2004. Mr. Docherty is a founding partner of Independent Average Adjusters Ltd., an insurance claims adjusting firm located in Athens, Greece, which he co-founded in 1997. Mr. Docherty has 25 years of international experience handling maritime insurance claims.

Roy Gibbs has served on our Board of Directors since July 2004 and he has also been the Chairman of the Audit Committee. Mr. Gibbs has been the chief executive officer of Standard Chartered Grindlays Bank, Greece, formerly ANZ Grindlays, since 1992. From 1988 to 1992, Mr. Gibbs was the chief manager of domestic banking at ANZ Grindlays, London. Prior to that he was assistant director for property, construction and shipping at ANZ London. Mr. Gibbs joined National and Grindlays Bank in 1965.

Marios Hamboullas has served on our Board since September 2009. Mr Hamboullas is the founder and Chairman of Astarti Development Public Company Ltd., a public company founded in 1979 and listed on the Cyprus Exchange (Symbol: AST) engaged in the hotel industry. Since 1968, Mr. Hamboullas has been a managing director of Kyriacos Hamboullas and Son Ltd., a family owned company with extensive interests in agriculture, trading and manufacturing. Mr. Hamboullas is also the Business Development Director of D.H. Cyprotels Plc, a Cypriot private company engaged in the hotel and tourism industry. Mr. Hamboullas also serves as a director of the following private companies: Hamboullas Financial Services Ltd. and Marham Investments Ltd. Mr. Hamboullas earned his M.A. degree in Law and Economics from Cambridge University U.K. and a post-graduate degree in European Politics and Economics from Strasbourg University in France. Mr. Hamboullas is a citizen of Cyprus and is fluent in Greek, English and French.

Yiannakis C. Economou has served on our Board since September 2009. Mr. Economou is a Managing Director of Hull Blyth Araouzos Limited, a company based in Cyprus which provides a wide variety of services in passenger and cargo transport by sea, land and air, including agency services for shipping, aviation, travel and tourism, customs clearance and freight forwarding. Since 1985, Mr. Economou has served as a Managing Director and Secretary of the company. Prior to joining Hull Blyth, Mr. Economou trained in shipping with Ellerman City Liners in Liverpool and London, England. Mr. Economou earned his Bachelor of Laws degree at the University of Athens. Since 1981, Mr. Economou has served on the Board of Directors of Associated Agencies Ltd. and United Stevedoring Company Limited. Mr. Economou for the third time serves as the President of the Cyprus Shipping Association. He is also a member of the Employers Association of Cyprus, Honorable Consul for Costa Rica in Cyprus, Secretary of the Consular Corps in Cyprus and was a past President of the Rotary Club of Famagusta. Mr. Economou is a citizen of Cyprus.

Demetris P. Souroullas is Chief Technical Officer of TOP SHIPS INC. and has been with our Company since 2007. Prior to joining the Company, and from 2001 onwards Mr. Souroullas held the positions of CEO for the Fleet of Admibros Shipmanagement Co. Ltd and Technical and General Manager of LMZ Transoil Shipmanagement S.A. Prior to that Mr. Souroullas worked with the Cyprus Bureau of Shipping where he started in 1988 as a Surveyor and left in 2001 as the Head of Classification. Mr. Souroullas holds a Masters degree in Naval Architecture from the University of Newcastle upon Tyne, and a Bachelors degree in Maritime Technology from the University of Wales Institute of Science and Technology.

Eirini Alexandropoulou has been our Secretary since August 2004. Mrs. Alexandropoulou's principal occupation for the past eleven years is as a legal advisor providing legal services to ship management companies with respect to corporate and commercial as well as shipping and finance law issues in Greece. From 2001 to 2004, Mrs. Alexandropoulou served as a legal advisor to Eurocarriers SA, a ship manager. Most recently, from 2000 to 2001, Mrs. Alexandropoulou served as a legal advisor to Belize's ship registry office in Piraeus. Mrs. Alexandropoulou has been a member of the Athens Bar Association since 1997 and has a law degree from the Law Faculty of the University of Athens.

B. Compensation

During the fiscal year ended December 31, 2010, we paid to the members of our senior management and to our directors' aggregate compensation of \$5.3 million. We do not have a retirement plan for our officers or directors.

On September 1, 2010, we entered into separate agreements with Central Mare, a related party controlled by the family of the Company's CEO, pursuant to which Central Mare furnishes our four executive officers to us as described below. These agreements were entered into in exchange for terminating prior employment agreements.

Under the terms of the agreement for our CEO, we are obligated to pay annual base salary, a minimum cash bonus and stock compensation of 500,000 common shares of the Company to be issued at the end of each calendar year and which shall vest six months from the date of issuance. However, as the shares granted to our CEO do not contain any future service vesting conditions, all such shares are considered vested shares on the grant date. The initial term of the agreement expires on August 31, 2014; however the agreement shall be automatically extended for successive one-year terms unless Central Mare or the Company provides notice of non-renewal at least sixty days prior to the expiration of the then applicable term.

If our CEO's employment is terminated without cause, he is entitled to certain personal and household security costs. If he is removed from the Board of Directors or not re-elected, then his employment terminates automatically without prejudice to Central Mare's rights to pursue damages for such termination. In the event of a change of control, Mr. Pistiolis is entitled to receive a cash payment of Euro 3 million and 1,472,438 of our common shares. The Agreement also contains death and disability provisions. In addition, Mr. Pistiolis is subject to non-competition and non-solicitation undertakings.

Under the terms of the agreement for our Executive Vice President and Chairman, we are obligated to pay annual base salary and additional incentive compensation as determined by the board of directors. The initial term of the agreement expires on August 31, 2011; however the agreement shall be automatically extended for successive one-year terms unless Central Mare or the Company provides notice of non-renewal at least sixty days prior to the expiration of the then applicable term.

If our Executive Vice President and Chairman is removed from the Board of Directors or not re-elected, then his employment terminates automatically without prejudice to Central Mare's rights to pursue damages for such termination. In the event of a change of control, he is entitled to receive a cash payment of three years annual base salary. The Agreement also contains death and disability provisions. In addition, our Executive Vice President and Chairman is subject to non-competition and non-solicitation undertakings.

Under the terms of the agreement for our Chief Financial Officer, we are obligated to pay annual base salary and stock compensation of 200,000 common shares which were issued on December 21, 2009, of which 100,000 common shares vested on December 21, 2010 and 100,000 common shares shall vest on December 21, 2011. The initial term of the agreement expires on August 31, 2012, however the agreement shall be automatically extended for successive one-year terms unless Central Mare or the Company provides notice of non-renewal at least sixty days prior to the expiration of the then applicable term.

If he is removed from the Board of Directors or not re-elected, then his employment terminates automatically without prejudice to Central Mare's rights to pursue damages for such termination. In the event of a change of control, Mr. Tsirikos is entitled to receive a cash payment equal to three years' annual base salary and 550,000 of our common shares. The Agreement also contains death and disability provisions. In addition, Mr. Tsirikos is subject to non-competition and non-solicitation undertakings.

Under the terms of our agreement for our Chief Technical Officer, we are obligated to pay annual base salary and stock compensation of 249,990 common shares which were issued on October 29, 2010 and which vest ratably over a period of 15 months beginning in October 2010. The initial term of the agreement expires on August 31, 2011, however the agreement shall be automatically extended for successive one-year terms unless Central Mare or the Company provides notice of non-renewal at least sixty days prior to the expiration of the then applicable term. In the event of a change of control the Chief Technical Officer is entitled to receive a cash payment equal to three years' annual base salary. In addition, our Chief Technical Officer is subject to non-competition and non-solicitation undertakings.

Equity Incentive Plan

In April 2005 the Board adopted the TOP SHIPS INC. 2005 Stock Incentive Plan which was amended and restated in December 2009, or the Plan, under which our officers, key employees and directors may be granted options to acquire common stock. A total of 1,000,000 shares of common stock were initially reserved for issuance under the Plan, which is administered by the Board. The number of shares of common stock reserved for issuance under the Plan is

currently 12,000,000. The Plan also provides for the issuance of stock appreciation rights, dividend equivalent rights, restricted stock, unrestricted stock, restricted stock units, and performance shares at the discretion of our Board of Directors. The Plan expires 10 years from the date of its adoption. Please see "Item 18 – Financial Statements – Note 15 – Stock Incentive Plan" describing grants provided since the Plan's adoption. Below is a description of the grants provided pursuant to our equity incentive plan in our last financial year.

In 2010, we granted an aggregate of 1,308,809 restricted and unrestricted shares of our common stock to our senior management, representing an aggregate compensation cost for such restricted and unrestricted share awards of \$2 million.

Of this aggregate amount, 58,824 unrestricted shares were granted to an officer. The shares vested immediately.

Also of this aggregate amount, 500,000 shares were granted to our CEO and issued to Sovereign Holdings Inc., a company wholly-owned by our CEO, and vested six months from the date of grant. However, as the shares granted to our CEO do not contain any future service vesting conditions, all such shares are considered vested shares on the grant date.

The remainder is comprised of 749,985 restricted shares granted to other members of senior management. The shares vest in fifteen equal monthly installments.

C. Board Practices

Committees of the Board of Directors

We have established an audit committee composed of three members, which pursuant to a written audit committee charter is responsible for reviewing our accounting controls and recommending to the Board of Directors, or the Board, the engagement of our outside auditors. Each member is an independent director under the corporate governance rules of the NASDAQ Global Select Market. The members of the audit committee are Messrs. Gibbs, Hamboullas and Economou. In June 2007, we established a compensation committee and a nominating and governance committee. Both committees are composed of three members, all of whom are independent directors. The compensation committee carries out the Board's responsibilities relating to compensation of the Company's executive and non-executive officers and provides such other guidance with respect to compensation matters as the Committee deems appropriate. The nominating and governance committee assists the Board in: (i) identifying, evaluating and making recommendations to the Board concerning individuals for selections as director nominees for the next annual meeting of stockholders or to otherwise fill Board vacancies; (ii) developing and recommending to the Board a set of corporate governance guidelines and principles applicable to the Company, and (iii) reviewing the overall corporate governance of the Company and recommending improvements to the Board from time to time.

The board has determined that Mr. Gibbs, whose biographical details are included elsewhere in Item 6, chairman of our audit committee, qualifies as a financial expert and is considered to be independent under the corporate governance rules of the NASDAQ Global Select Market.

D. Employees

During 2008, 2009 and part of 2010 we had four employees. As of September 1, 2010, we have no direct employees and our four executive officers are furnished to us pursuant to agreements with Central Mare, as described above. During 2008, 2009 and 2010, our wholly-owned subsidiary, TOP Tanker Management, employed on average 88, 55 and 23 employees, respectively, all of whom are shore-based. Our current Fleet Manager, Central Mare or TMS Tankers in the case of the M/T Delos, ensure that all seamen have the qualifications and licenses required to comply with international regulations and shipping conventions, and that our vessels employ experienced and competent personnel. As of December 31, 2008, 2009 and 2010, we also employed 300, 137 and 137 sea going employees, directly and indirectly through our sub-managers.

E. Share Ownership

The common shares beneficially owned by our directors and senior managers and/or companies affiliated with these individuals are disclosed in "Item 7 – Major Shareholders and Related Party Transactions".

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major Shareholders

The following table sets forth information regarding (i) the owners of more than five percent of our common stock that we are aware of and (ii) the total amount of capital stock owned by our officers and directors as of March 1, 2011. All of the shareholders, including the shareholders listed in this table, are entitled to one vote for each share of common stock held. The percentages below are calculated as of March 1, 2011.

Title of Class	Identity of Person or Group	Amount Owned	Percent of Class	
Common Stock, par value \$.01 per share	Sphinx Investment Corp.*	4,133,333	12.09	%
	Maryport Navigation Corp.*	4,133,333	12.09	%
	George Economou*	4,133,333	12.09	%
	QVT Financial LP**	2,132,709	6.24	%
	QVT Financial GP LLC**	2,132,709	6.24	%
	QVT Fund LP	1,873,365	5.48	%
	QVT Associates GP LLC**	2,132,709	6.24	%
	Kingdom Holdings Inc.***	1,065,393	3.12	%
	Sovereign Holdings****	3,826,564	11.19	%
	Evangelos Pistiolis*****	3,826,564	11.19	%
	Shares of Officers and directors other than Evangelos Pistiolis	1,158,829	3.39	%
	All officers and directors as a group	4,985,393	14.58	%

*As of October 24, 2008. Sphinx Investment Corp., Maryport Navigation Corp. and Mr. Economou may constitute a "group" for reporting purposes of Rule 13d-5 promulgated under the Exchange Act.

** As of December 18, 2009. QVT Financial LP, QVT Financial GP LLC, QVT Fund LP and QVT Associates GP LLC share beneficial ownership of the shares listed in this table.

*** A company owned primarily by adult relatives of our President, CEO, and Director, Evangelos Pistiolis.

**** A company that is wholly owned by Evangelos Pistiolis.

***** By virtue of the shares owned directly through Sovereign Holdings Inc.

B. Related Party Transactions

Please see "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties".

Central Mare Letter Agreement, Management Agreements, and Other Agreements:

Since July 1, 2010, Central Mare, a related party controlled by the family of our CEO, has been performing all of our operational, technical and commercial functions relating to the chartering and operation of our vessels, pursuant to a letter agreement concluded between Central Mare and Top Ships, as well as management agreements concluded between Central Mare and our vessel-owning subsidiaries. See "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties". These agreements have an initial term of five years after which they will continue to be in effect until terminated by either party subject to a twelve month advance notice of termination.

The company pays a management fee of Euro 650 or \$868 per day per vessel that is employed under a time or voyage charter and a management fee of Euro 250 or \$334 per day per vessel that is employed under a bareboat charter. In addition, the management agreements provide for payment by the company to Central Mare of: (i) a fee of Euro 100 or \$134 per day per vessel for services in connection with compliance with Section 404 of the Sarbanes-Oxley Act of 2002; (ii) Euro 500 or \$668 per day for superintendent visits; (iii) a chartering commission of 0.75% on all existing (as of July 1, 2010) freight, hire and demurrage revenues; (iv) a chartering commission of 1.25% on all new (concluded after July 1, 2010) freight, hire and demurrage revenues; (v) a commission of 1.00% of all gross sale proceeds or the purchase price paid for vessels; (vi) a quarterly fee of Euro 250,000 or \$333,800 for services rendered by Central Mare in connection with the company's financial accounting services; (vii) a quarterly fee of Euro 80,000 or \$106,816 for services in relation to the financial reporting requirements of the company under Commission and NASDAQ rules and regulations; (viii) a commission of 0.2% on derivative agreements and loan financing or refinancing; (ix) a newbuilding supervision fee of Euro 400,000 or \$534,080 per newbuilding vessel and (x) an annual fee of Euro 10,000 or 13,352 per vessel, for the provision of information-system related services.

Central Mare also provides commercial operations and freight collection services in exchange for a fee of Euro 90 or \$120 per day per vessel. Central Mare provides insurance services and obtains insurance policies for the vessels for a fee of 5.00% of the total insurance premiums. Furthermore, if required, Central Mare will also handle and settle all claims arising out of its duties under the management agreements (other than insurance and salvage claims) in exchange for a fee of Euro 150 or \$200 per person per eight-hour day. Finally legal fees for claims and general corporate services incurred by Central Mare on behalf of the company will be payable to Central Mare at cost.

Pursuant to the terms of the management agreements, all fees payable to Central Mare are adjusted upwards 3% per annum. Transactions with the Manager in Euros are settled on the basis of the EUR/USD on the invoice date. The conversion from Euros to U.S. Dollars is based on the U.S. Dollar/Euro exchange rate of 1.3352 as of December 31, 2010.

We pay TMS Tankers a daily management fee of \$1,500 for the technical management and crewing of M/T Delos. In addition, we pay Central Mare a daily management fee of \$1,000 for the commercial management of M/T Delos. The management agreement with TMS Tankers is expected to be terminated during the second quarter of 2011 and all management functions performed by TMS Tankers will be transferred to another manager.

At December 31, 2010, \$1.8 million is payable to Central Mare, and is reflected in the consolidated balance sheets as Due to related parties.

On September 1, 2010, we entered into separate agreements with Central Mare, a related party controlled by the family of the Company's CEO, pursuant to which Central Mare furnishes our executive officers to us. These agreements were entered into in exchange for terminating prior employment agreements. See "Item 6 – Compensation".

On March 1, 2011, we entered into an agreement with Central Mare, a related party controlled by the family of the Company's CEO, pursuant to which Central Mare furnishes certain employees to us including Corporate Development Officer and Internal Auditor as well as certain administrative employees. Under the terms of this, we are obligated to pay an annual base salary. See "Item 18 – Financial Statements – Note 5 – Transactions with Related Parties".

C. Interests of Experts and Counsel.

Not applicable.

ITEM 8. FINANCIAL INFORMATION.

A. Consolidated Statements and Other Financial Information.

See "Item 18-Financial Statements".

Legal Proceedings

We have not been involved in any legal proceedings which may have, or have had, a significant effect on our business, financial position, results of operations or liquidity, nor are we aware of any proceedings that are pending or threatened which may have a significant effect on our business, financial position, results of operations or liquidity. From time to time, we may be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. We expect that these claims would be covered by insurance, subject to customary deductibles. Those claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources.

Dividend Distribution Policy

The Company paid special dividends of \$15.00 per share and \$7.50 per share on March 27, 2006 and April 25, 2006, respectively. On April 6, 2006 our Board decided to discontinue the Company's policy of paying regular quarterly dividends. The declaration and payment of any future special dividends shall remain subject to the discretion of the Board and shall be based on general market and other conditions including the Company's earnings, financial strength and cash requirements and availability.

We are permitted to pay dividends under the loans so long as we are not in default of a loan covenant and if such dividend payment would not result in a default of a loan covenant.

B. Significant Changes.

All significant changes have been included in the relevant sections.

ITEM 9. THE OFFER AND LISTING.

A. Offer and Listing Details.

Price Range of Common Stock

The trading market for our common stock is the NASDAQ Global Select Market, on which the shares are listed under the symbol "TOPS". The following table sets forth the high and low market prices for our common stock since our initial public offering of common stock at \$33.00 per share on July 23, 2004, as reported by the NASDAQ Global Select Market. The high and low market prices for our common stock for the periods indicated were as follows:

	HIGH	LOW
For the Fiscal Year Ended December 31, 2010	\$1.30	\$0.62
For the Fiscal Year Ended December 31, 2009	\$3.88	\$0.67
For the Fiscal Year Ended December 31, 2008	\$10.70	\$1.25
For the Fiscal Year Ended December 31, 2007	\$8.40	\$3.03
For the Fiscal Year Ended December 31, 2006	\$18.32	\$4.61
For the Quarter Ended		
March 31, 2010	\$1.16	\$0.70
December 31, 2010	\$1.15	\$0.65
September 30, 2010	\$1.01	\$0.62
June 30, 2010	\$1.30	\$0.90
March 31, 2010	\$1.30	\$0.98
December 30, 2009	\$1.30	\$0.94
September 30, 2009	\$2.16	\$1.12
June 30, 2009	\$3.88	\$0.95
For the Month		
March 2011	\$0.94	\$0.70
February 2011	\$1.08	\$0.92
January 2011	\$1.16	\$0.95
December 2010	\$1.15	\$0.80
November 2010	\$0.95	\$0.68
October 2010	\$0.74	\$0.65

ITEM 10. ADDITIONAL INFORMATION

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Our purpose is to engage in any lawful act or activity for which corporations may now or hereafter be organized under the Marshall Islands Business Corporations Act, or BCA. Our Amended and Restated Articles of Incorporation and Amended and Restated By-laws do not impose any limitations on the ownership rights of our shareholders.

Under our Amended and Restated By-laws, annual shareholder meetings will be held at a time and place selected by our Board of Directors. The meetings may be held in or outside of the Marshall Islands. Special meetings of the shareholders, unless otherwise prescribed by law, may be called for any purpose or purposes at any time exclusively by the Board of Directors. Notice of every annual and special meeting of shareholders shall be given at least 15 but not more than 60 days before such meeting to each shareholder of record entitled to vote thereat.

Directors. Our directors are elected by a plurality of the votes cast at a meeting of the shareholders by the holders of shares entitled to vote in the election. Our Amended and Restated Articles of Incorporation and Amended and Restated By-laws prohibit cumulative voting in the election of directors.

The Board of Directors must consist of at least one member and not more than twelve, as fixed from time to time by the vote of not less than 66²/₃% of the entire board. Each director shall be elected to serve until the third succeeding annual meeting of shareholders and until his successor shall have been duly elected and qualified, except in the event of his death, resignation, removal, or the earlier termination of his term of office. The Board of Directors has the authority to fix the amounts which shall be payable to the members of our Board of Directors, and to members of any committee, for attendance at any meeting or for services rendered to us.

Classified Board

Our Amended and Restated Articles of Incorporation provide for the division of our Board of Directors into three classes of directors, with each class as nearly equal in number as possible, serving staggered, three-year terms. Approximately one-third of our Board of Directors will be elected each year. This classified board provision could discourage a third party from making a tender offer for our shares or attempting to obtain control of our company. It could also delay shareholders who do not agree with the policies of the Board of Directors from removing a majority of the Board of Directors for two years.

Election and Removal

Our Amended and Restated Articles of Incorporation and Amended and Restated by-laws require parties other than the Board of Directors to give advance written notice of nominations for the election of directors. Our Amended and Restated articles of incorporation provide that our directors may be removed only for cause and only upon the affirmative vote of the holders of at least 80% of the outstanding shares of our capital stock entitled to vote for those directors. These provisions may discourage, delay or prevent the removal of incumbent officers and directors.

Dissenters' Rights of Appraisal and Payment. Under the Business Corporation Act of the Republic of the Marshall Islands, or BCA, our shareholders have the right to dissent from various corporate actions, including any merger or sale of all or substantially all of our assets not made in the usual course of our business, and receive payment of the fair value of their shares. In the event of any further amendment of the articles, a shareholder also has the right to dissent and receive payment for his or her shares if the amendment alters certain rights in respect of those shares. The dissenting shareholder must follow the procedures set forth in the BCA to receive payment. In the event that, among other things, the institution of proceedings in the circuit court in the judicial circuit in the Marshall Islands in which our Marshall Islands office is situated. The value of the shares of the dissenting we and any dissenting shareholder fail to agree on a price for the shares, the BCA procedures involve shareholder is fixed by the court after reference, if the court so elects, to the recommendations of a court-appointed appraiser.

Shareholders' Derivative Actions. Under the BCA, any of our shareholders may bring an action in our name to procure a judgment in our favor, also known as a derivative action, provided that the shareholder bringing the action is a holder of common stock both at the time the derivative action is commenced and at the time of the transaction to which the action relates.

Anti-takeover Provisions of our Charter Documents. Several provisions of our Amended and Restated Articles of Incorporation and Amended and Restated by-laws may have anti-takeover effects. These provisions are intended to avoid costly takeover battles, lessen our vulnerability to a hostile change of control and enhance the ability of our Board of Directors to maximize shareholder value in connection with any unsolicited offer to acquire us. However, these anti-takeover provisions, which are summarized below, could also discourage, delay or prevent (1) the merger or acquisition of our company by means of a tender offer, a proxy contest or otherwise, that a shareholder may consider in its best interest and (2) the removal of incumbent officers and directors.

Business Combinations

The Company's Amended and Restated Articles of Incorporation include provisions which prohibit the Company from engaging in a business combination with an interested shareholder for a period of three years after the date of the transaction in which the person became an interested shareholder, unless:

prior to the date of the transaction that resulted in the shareholder becoming an interested shareholder, the Board approved either the business combination or the transaction that resulted in the shareholder becoming an interested shareholder;

upon consummation of the transaction that resulted in the shareholder becoming an interested shareholder, the interested shareholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced;

at or subsequent to the date of the transaction that resulted in the shareholder becoming an interested shareholder, the business combination is approved by the Board and authorized at an annual or special meeting of shareholders by the affirmative vote of at least 66 $\frac{2}{3}$ % of the outstanding voting stock that is not owned by the interested shareholder; and

the shareholder became an interested shareholder prior to the consummation of the initial public offering.

Limited Actions by Shareholders

Our Amended and Restated Articles of Incorporation and our Amended and Restated By-laws provide that any action required or permitted to be taken by our shareholders must be effected at an annual or special meeting of shareholders or by the unanimous written consent of our shareholders.

Our Amended and Restated Articles of Incorporation and our Amended and Restated By-laws provide that only our Board of Directors may call special meetings of our shareholders and the business transacted at the special meeting is limited to the purposes stated in the notice. Accordingly, a shareholder may be prevented from calling a special meeting for shareholder consideration of a proposal over the opposition of our Board of Directors and shareholder consideration of a proposal may be delayed until the next annual meeting.

Blank Check Preferred Stock

Under the terms of our Amended and Restated Articles of Incorporation, our Board of Directors has authority, without any further vote or action by our shareholders, to issue up to 20,000,000 shares of blank check preferred stock. Our Board of Directors may issue shares of preferred stock on terms calculated to discourage, delay or prevent a change of control of our company or the removal of our management.

Super-majority Required for Certain Amendments to Our By-Laws

On February 28, 2007, we amended our by-laws to require that amendments to certain provisions of our by laws may be made when approved by a vote of not less than 66 $\frac{2}{3}$ % of the entire Board of Directors. These provisions that require not less than 66 $\frac{2}{3}$ % vote of the Board of Directors to be amended are provisions governing: the nature of business to be transacted at our annual meetings of shareholders, the calling of special meetings by our Board of Directors, any amendment to change the number of directors constituting our Board of Directors, the method by which our Board of Directors is elected, the nomination procedures of our Board of Directors, removal of our Board of Directors and the filling of vacancies on our Board of Directors.

C. Material Contracts

Debt Facilities

As of December 31, 2010 we had debt obligations under credit facilities with RBS, HSH, DVB, EMPORIKI, ALPHA BANK, LAURASIA TRADING and SANTA LUCIA HOLDINGS. For a full description of our credit facilities and related interest rate swaps, see "Item 5 – Operating and Financial Review and Prospects – Tabular Disclosure of Contractual Obligations – (1) Debt Facilities" and "Item 11 – Quantitative and Qualitative Disclosures about Market Risk".

Equity Offerings

On July 1, 2009, we entered into a Standby Equity Distribution Agreement, or the SEDA, with YA Global Master SPV LTD, or YA Global, pursuant to which we may offer and sell up to \$200 million worth of our common shares to YA Global. The SEDA has a duration of three years. We made initial sales under the SEDA on August 13, 2009 and as of December 31, 2010 2,230,000 shares had been sold with net proceeds amounting to approximately \$2.9 million. During the period from October 21, 2009 to the date of this report, no shares have been sold to YA Global under the SEDA.

Office space lease

In January 2006, we entered into an agreement with an unrelated party to lease office space in Athens, Greece. The agreement is for a duration of 12 years beginning May 2006 with a lessee's option for an extension of 10 years. In September 2010, the agreement was amended and the new monthly rent was renegotiated. It was also agreed to revert occupancy in certain areas of the leased office space by the end of April 2011. All other terms of the lease remained unchanged.

In addition, our subsidiary TOP TANKERS (U.K.) LIMITED, leases office space in London from an unrelated third party. The agreement is valid from September 2010 and shall continue until either party shall give to the other one calendar month written notice.

In November 2009, TOP SHIPS INC. entered into a lease agreement for office space in London. The initial agreement was signed on November 15, 2009 and it expired on November 14, 2010. The agreement was extended for another year with all terms remaining unchanged.

For a full description of the above mentioned agreements see "Item 5 – Operating and Financial Review and Prospects - Tabular Disclosure of Contractual Obligations – Operating Leases".

Stockholders Rights Agreement

We entered into a Stockholders Rights Agreement with Computershare Investor Services, LLC, as Rights Agent, as of August 19, 2005. Under this Agreement, we declared a dividend payable of one right, or Right, to purchase one one-thousandth of a share of the Company's Series A Participating Preferred Stock for each outstanding share of TOP SHIPS INC. common stock, par value U.S.\$0.01 per share. The Rights will separate from the common stock and become exercisable after (1) the 10th day after public announcement that a person or group acquires ownership of 15% or more of the company's common stock or (2) the 10th business day (or such later date as determined by the company's Board of Directors) after a person or group announces a tender or exchange offer which would result in that person or group holding 15% or more of the company's common stock. On the distribution date, each holder of a right will be entitled to purchase for \$25 (the "Exercise Price") a fraction (1/1000th) of one share of the company's preferred stock which has similar economic terms as one share of common stock. If an acquiring person (an "Acquiring Person") acquires more than 15% of the company's common stock then each holder of a right (except that Acquiring Person) will be entitled to buy at the exercise price, a number of shares of the company's common stock which has a market value of twice the exercise price. If after an Acquiring Person acquires more than 15% of the company's common stock, the company merges into another company or the company sells more than 50% of its assets or earning power, then each holder of right (except for those owned by the acquirer) will be entitled to purchase at the Exercise Price, a number of shares of common stock of the surviving entity which has a then current market value of twice the Exercise Price. Any time after the date an Acquiring Person obtains more than 15% of the

company's common stock and before that Acquiring Person acquires more than 50% of the company's outstanding common stock, the company may exchange each right owned by all other rights holders, in whole or in part, for one share of the company's common stock. The rights expire on the earliest of (1) August 31, 2015 or (2) the exchange or redemption of the rights as described above. The company can redeem the rights at any time on or prior to the earlier of a public announcement that a person has acquired ownership of 15% or more of the company's common stock, or the expiration date. The terms of the rights and the Stockholders Rights Agreement may be amended without the consent of the rights holders at any time on or prior to the Distribution Date. After the Distribution Date, the terms of the rights and the Stockholders Rights Agreement may be amended to make changes that do not adversely affect the rights of the rights holders (other than the Acquiring Person). The rights do not have any voting rights. The rights have the benefit of certain customary anti-dilution protections.

Management Agreements

Please see "Item 4 – Information on the company – B. Business Overview –Management of the fleet" for further information.

We have no other material contracts, other than contracts entered into in the ordinary course of business, to which we are a party.

D. Exchange controls

The Marshall Islands imposes no exchange controls on non-resident corporations.

E. Taxation.

The following is a discussion of the material Marshall Islands and U.S. federal income tax considerations relevant to an investment decision by a U.S. Holder and a non U.S. Holder, each as defined below, with respect to the common stock. This discussion does not purport to deal with the tax consequences of owning common stock to all categories of investors, some of which, such as dealers in securities and investors whose functional currency is not the U.S. Dollar, may be subject to special rules. You are encouraged to consult your own tax advisors concerning the overall tax consequences arising in your own particular situation under U.S. federal, state, local or foreign law of the ownership of common stock.

Marshall Islands Tax Consequences

We are incorporated in the Republic of the Marshall Islands. Under current Marshall Islands law, we are not subject to tax on income or capital gains, and no Marshall Islands withholding tax will be imposed upon payments of dividends by us to our shareholders.

U.S. Federal Income Tax Consequences

The following are the material United States federal income tax consequences to us of our activities and to U.S. Holders and non U.S. Holders, each as defined below, of our common stock. The following discussion of U.S. federal income tax matters is based on the Code, judicial decisions, administrative pronouncements, and existing and proposed regulations issued by the U.S. Department of the Treasury, all of which are subject to change, possibly with retroactive effect. The discussion below is based, in part, on the description of our business as described in "Business" above and assumes that we conduct our business as described in that section. Except as otherwise noted, this discussion is based on the assumption that we will not maintain an office or other fixed place of business within the United States. References in the following discussion to "we" and "us" are to TOP SHIPS INC. and its subsidiaries on a consolidated basis.

U.S. Federal Income Taxation of Our Company

Taxation of Operating Income: In General

Unless exempt from U.S. federal income taxation under the rules discussed below, a foreign corporation is subject to U.S. federal income taxation in respect of any income that is derived from the use of vessels, from the hiring or leasing of vessels for use on a time, voyage or bareboat charter basis, from the participation in a pool, partnership, strategic alliance, joint operating agreement, code sharing arrangements or other joint venture it directly or indirectly owns or participates in that generates such income, or from the performance of services directly related to those uses, which we refer to as "shipping income," to the extent that the shipping income is derived from sources within the United States. For these purposes, 50% of shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States constitutes income from sources within the United States, which we refer to as "U.S.-source shipping income."

Shipping income attributable to transportation that both begins and ends in the United States is considered to be 100% from sources within the United States. We are not permitted by law to engage in transportation that produces income which is considered to be 100% from sources within the United States.

Shipping income attributable to transportation exclusively between non-U.S. ports will be considered to be 100% derived from sources outside the United States. Shipping income derived from sources outside the United States will not be subject to any U.S. federal income tax.

In the absence of exemption from tax under Section 883 of the Code, our gross U.S.-source shipping income would be subject to a 4% tax imposed without allowance for deductions as described below.

Exemption of Operating Income from U.S. Federal Income Taxation

Under Section 883 of the Code and the regulations there under, we will be exempt from U.S. federal income tax on our U.S.-source shipping income if:

- (1) we are organized in a foreign country, or our country of organization, that grants an "equivalent exemption" to corporations organized in the United States; and
- (2) either
 - (A) more than 50% of the value of our stock is owned, directly or indirectly, by individuals who are "residents" of our country of organization or of another foreign country that grants an "equivalent exemption" to corporations organized in the United States, which we refer to as the "50% Ownership Test," or
 - (B) our stock is "primarily and regularly traded on an established securities market" in our country of organization, in another country that grants an "equivalent exemption" to United States corporations, or in the United States, which we refer to as the "Publicly-Traded Test".

The Marshall Islands, Cyprus and Liberia, the jurisdictions where our ship-owning subsidiaries are incorporated, each grant an "equivalent exemption" to U.S. corporations. Therefore, we will be exempt from U.S. federal income tax with respect to our U.S.-source shipping income if either the 50% Ownership Test or the Publicly-Traded Test is met.

Treasury Regulations provide, in pertinent part, that stock of a foreign corporation will be considered to be "primarily traded" on an established securities market if the number of shares of each class of stock that are traded during any taxable year on all established securities markets in that country exceeds the number of shares in each such class that are traded during that year on established securities markets in any other single country. Our common stock, which is our sole class of issued and outstanding stock, is and we anticipate will continue to be "primarily traded" on the NASDAQ Global Select Market.

Under the Treasury Regulations, our common stock will be considered to be "regularly traded" on an established securities market if one or more classes of our stock representing more than 50% of our outstanding shares, by total combined voting power of all classes of stock entitled to vote and total value, is listed on the market which we refer to as the listing threshold. Since our common stock, our sole class of stock, is listed on the NASDAQ Global Select Market, we will satisfy the listing requirement.

It is further required that with respect to each class of stock relied upon to meet the listing threshold, (i) such class of stock be traded on the market, other than in minimal quantities, on at least 60 days during the taxable year or one-sixth of the days in a short taxable year, which we refer to as the "trading frequency test"; and (ii) the aggregate number of shares of such class of stock traded on such market is at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short taxable year, which we refer to as the "trading volume test". We believe we will satisfy the trading frequency and trading volume tests. Even if this were not the case, the Treasury Regulations provide that the trading frequency and trading volume tests will be deemed satisfied if, as is the case with our common stock, such class of stock is traded on an established securities market in the United States and such stock is regularly quoted by dealers making a market in such stock.

Notwithstanding the foregoing, the Treasury Regulations provide, in pertinent part, that a class of our stock will not be considered to be "regularly traded" on an established securities market for any taxable year if 50% or more of the vote and value of the outstanding shares of such class of stock are owned, actually or constructively under specified stock attribution rules, on more than half the days during the taxable year by persons who each own 5% or more of the vote and value of the outstanding shares of such class of stock, which we refer to as the "5 Percent Override Rule."

For purposes of being able to determine the persons who own 5% or more of our stock, or "5% Shareholders," the Treasury Regulations permit us to rely on those persons that are identified on Schedule 13G and Schedule 13D filings with the SEC, as having a 5% or more beneficial interest in our common stock. The Treasury Regulations further provide that an investment company identified on a SEC Schedule 13G or Schedule 13D filing which is registered under the Investment Company Act of 1940, as amended, will not be treated as a 5% shareholder for such purposes.

In the event the 5 Percent Override Rule is triggered, the Treasury Regulations provide that the 5 Percent Override Rule will not apply if we can establish that among the closely-held group of 5% Shareholders, there are sufficient 5% Shareholders that are considered to be qualified shareholders for purposes of Section 883 of the Code to preclude non-qualified 5% Shareholders in the closely-held group from owning 50% or more of each class of our stock for more than half the number of days during such year.

We believe that we currently satisfy the Publicly-Traded Test and are not subject to the 5 Percent Override Rule and we will take this position for U.S. federal income tax reporting purposes. However, there are factual circumstances beyond our control which could cause us to lose the benefit of this exemption.

Taxation in the Absence of Exemption under Section 883 of the Code

To the extent the benefits of Section 883 of the Code are unavailable, our U.S.-source shipping income, to the extent not considered to be "effectively connected" with the conduct of a U.S. trade or business, as described below, would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions, which we refer to as the "4% gross basis tax regime". Since under the sourcing rules described above, no more than 50% of our shipping income would be treated as being derived from U.S. sources, the maximum effective rate of U.S. federal income tax on our shipping income would never exceed 2% under the 4% gross basis tax regime.

To the extent the benefits of the exemption under Section 883 of the Code are unavailable and our U.S.-source shipping income is considered to be "effectively connected" with the conduct of a U.S. trade or business, as described below, any such "effectively connected" U.S.-source shipping income, net of applicable deductions, would be subject to the U.S. federal corporate income tax currently imposed at rates of up to 35%. In addition, we may be subject to the 30% "branch profits" tax on earnings effectively connected with the conduct of such U.S. trade or business, as determined after allowance for certain adjustments, and on certain interest paid or deemed paid attributable to the conduct of such U.S. trade or business.

Our U.S.-source shipping income would be considered "effectively connected" with the conduct of a U.S. trade or business only if:

We have, or are considered to have, a fixed place of business in the United States involved in the earning of shipping income; and

substantially all of our U.S.-source shipping income is attributable to regularly scheduled transportation, such as the operation of a vessel that follows a published schedule with repeated sailings at regular intervals between the same points for voyages that begin or end in the United States.

We do not currently have, nor intend to have or permit circumstances that would result in having, any vessel operating to the United States on a regularly scheduled basis. Based on the foregoing and on the expected mode of our shipping operations and other activities, we believe that none of our U.S.-source shipping income will be "effectively connected" with the conduct of a U.S. trade or business.

U.S. Taxation of Gain on Sale of Vessels

Regardless of whether we qualify for exemption under Section 883 of the Code, we will not be subject to U.S. federal income taxation with respect to gain realized on a sale of a vessel, provided the sale is considered to occur outside of the United States under U.S. federal income tax principles. In general, a sale of a vessel will be considered to occur outside of the United States for this purpose if title to the vessel, and risk of loss with respect to the vessel, pass to the buyer outside of the United States. It is expected that any sale of a vessel by us will be considered to occur outside of the United States.

U.S. Federal Income Taxation of U.S. Holders

As used herein, the term "U.S. Holder" means a beneficial owner of our common stock that

is a U.S. citizen or resident, U.S. corporation or other U.S. entity taxable as a corporation, an estate the income of which is subject to U.S. federal income taxation regardless of its source, or a trust if a court within the United States is able to exercise primary jurisdiction over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust,

owns the common stock as a capital asset, generally, for investment purposes, and

owns less than 10% of our common stock for U.S. federal income tax purposes.

If a partnership holds our common stock, the tax treatment of a partner of such partnership will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding our common stock, you are encouraged to consult your tax advisor.

Distributions

Subject to the discussion of passive foreign investment companies below, any distributions made by us with respect to our common stock to a U.S. Holder will generally constitute dividends to the extent of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. Distributions in excess of such earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder's tax basis in his common stock on a dollar-for-dollar basis and thereafter as capital gain. Because we are not a U.S. corporation, U.S. Holders that are corporations will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. Dividends paid with respect to our common stock will generally be treated as "passive category income" for purposes of computing allowable foreign tax credits for U.S. foreign tax credit purposes.

Dividends paid on our common stock to a U.S. Holder who is an individual, trust or estate (a "U.S. Non-Corporate Holder") will generally be treated as "qualified dividend income" that is taxable to such U.S. Non-Corporate Holder at preferential tax rates (through 2012) provided that (1) the common stock is readily tradable on an established securities market in the United States (such as the Nasdaq Global Select Market on which our common stock is traded); (2) we are not a passive foreign investment company for the taxable year during which the dividend is paid or the immediately preceding taxable year (as discussed in more detail below); (3) the U.S. Non-Corporate Holder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock becomes ex-dividend; and (4) the U.S. Non-Corporate Holder is not under an obligation to make related payments with respect to positions in substantially similar or related property.

As discussed below, we expect to be treated as a passive foreign investment company, or PFIC, for our 2010 taxable year. Assuming this is the case, any dividends paid by us during 2010 and 2011 will not be treated as "qualified dividend income" in the hands of a U.S. Non-Corporate Holder. Even if we were not treated as a PFIC, there can be no assurance that any dividends paid on our common stock will be eligible for these preferential rates in the hands of a U.S. Non-Corporate Holder. Legislation has been previously introduced in the U.S. Congress which, if enacted in its present form, would preclude our dividends from qualifying for such preferential rates prospectively from the date of enactment. Any dividends we pay which are not eligible for these preferential rates will be taxed as ordinary income to a U.S. Non-Corporate Holder. Further, in the absence of legislation extending the term of the preferential tax rates

for qualified dividend income, all dividends received by a taxpayer in tax years beginning on January 1, 2013 or later will be taxed at ordinary graduated tax rates.

Special rules may apply to any "extraordinary dividend," generally, a dividend paid by us in an amount which is equal to or in excess of 10% of a shareholder's adjusted tax basis in a common share. If we pay an "extraordinary dividend" on our common stock that is treated as "qualified dividend income," then any loss derived by a U.S. Non-Corporate Holder from the sale or exchange of such common stock will be treated as long-term capital loss to the extent of such dividend.

Sale, Exchange or other Disposition of Common Stock

Assuming we do not constitute a passive foreign investment company for any taxable year, a U.S. Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder's tax basis in such stock. Such gain or loss will be treated as long-term capital gain or loss if the U.S. Holder's holding period is greater than one year at the time of the sale, exchange or other disposition. Such capital gain or loss will generally be treated as U.S.-source income or loss, as applicable, for U.S. foreign tax credit purposes. A U.S. Holder's ability to deduct capital losses is subject to certain limitations.

Passive Foreign Investment Company Status and Significant Tax Consequences

Special U.S. federal income tax rules apply to a U.S. Holder that holds stock in a foreign corporation classified as a passive foreign investment company, or PFIC, for U.S. federal income tax purposes. In general, we will be treated as a PFIC with respect to a U.S. Holder if, for any taxable year in which such holder held our common stock, either

at least 75% of our gross income for such taxable year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business), or

at least 50% of the average value of the assets held by the corporation during such taxable year produce, or are held for the production of, passive income.

For purposes of determining whether we are a PFIC, we will be treated as earning and owning our proportionate share of the income and assets, respectively, of any of our subsidiary corporations in which we own at least 25 percent of the value of the subsidiary's stock. Income earned, or deemed earned, by us in connection with the performance of services would not constitute "passive income" for these purposes. By contrast, rental income would generally constitute "passive income" unless we were treated under specific rules as deriving our rental income in the active conduct of a trade or business.

In general, income derived from the bareboat charter of a vessel will be treated as "passive income" for purposes of determining whether we are a PFIC and such vessel will be treated as an asset which produces or is held for the production of "passive income." On the other hand, income derived from the time charter of a vessel should not be treated as "passive income" for such purpose, but rather should be treated as services income; likewise, a time chartered vessel should generally not be treated as an asset which produces or is held for the production of "passive income."

For our 2010 taxable year, at least 50% of the average value of our assets consisted of vessels which were bareboat chartered. Therefore, we believe that were we treated as a PFIC for our 2010 taxable year. We intend to take the necessary steps in order to avoid being classified as a PFIC for 2011 and future taxable years, such as expanding our fleet through the purchase of non "passive income" producing assets. However, there can be no assurance that such remedial measures will be effective to avoid PFIC status for 2011 or any future taxable year.

Since we are a PFIC, a U.S. Holder will be treated as owning his proportionate share of the stock of any of our subsidiaries which is a PFIC. We expect that certain of our subsidiaries were PFICs in 2010 and, therefore, a U.S. Holder will be treated as owning stock in such PFICs. The PFIC rules discussed below will apply on a company-by-company basis with respect to us and each of our subsidiaries which is treated as a PFIC.

Since we are a PFIC, a U.S. Holder will be subject to different taxation rules depending on whether the U.S. Holder (1) makes an election to treat us as a "Qualified Electing Fund," which is referred to as a "QEF election," (2) makes a "mark-to-market" election with respect to our common stock, or (3) makes no election and, therefore, is subject to the Default PFIC Regime (as defined below). As discussed in detail below, making a QEF election or a mark-to-market election generally will mitigate the otherwise adverse U.S. federal income tax consequences under the Default PFIC Regime. However, the mark-to-market election may not be possible with respect to our subsidiaries which are treated as PFICs. In addition, if we were to be treated as a PFIC for any taxable year after 2010, a U.S. Holder would be required to file an annual report with the IRS for that year with respect to such Holder's common stock.

Taxation of U.S. Holders Making a Timely QEF Election

Making the Election. A U.S. Holder would make a QEF election with respect to any year that we are a PFIC by filing IRS Form 8621 with his U.S. federal income tax return. A separate QEF election will need to be made with respect to us and each of our subsidiaries that is treated as a PFIC. We intend to annually provide each U.S. Holder with all necessary information in order to make and maintain a QEF election with respect to us and each of our subsidiaries that is treated as a PFIC. A U.S. Holder who makes a QEF election for the first taxable year in which he owns common stock and we are treated as a PFIC, or an Electing Holder, will not be subject to the Default PFIC Regime (as defined below) for any taxable year. A U.S. Holder who does not make a timely QEF election would be subject the Default PFIC Regime for taxable years during his holding period in which a QEF election was not in effect, unless such U.S. Holder makes a special "purging" election. A U.S. Holder who does not make a timely QEF election is encouraged to consult such U.S. Holder's tax advisor regarding the availability of such purging election.

Current Taxation and Dividends. An Electing Holder must report each year for U.S. federal income tax purposes his pro rata share of our ordinary earnings and our net capital gain, if any, for our taxable year that ends with or within the taxable year of the Electing Holder, regardless of whether or not distributions were received from us by the Electing Holder. An Electing Holder's adjusted tax basis in his common stock will be increased to reflect any amounts currently included in income under the QEF rules. Distributions of earnings and profits that had been previously included in income will result in a corresponding reduction in the adjusted tax basis in the common stock and will not be taxed again once distributed. Any other distributions generally will be treated as discussed above under "Taxation – U.S. Federal Income Taxation of U.S. Holders – Distributions." Income inclusions under the QEF rules described above generally should be treated as foreign-source income for U.S. foreign tax credit limitation purposes, but Electing Holders should consult their tax advisors in this regard.

Sale, Exchange or Other Disposition. An Electing Holder would generally recognize capital gain or loss on the sale, exchange, or other disposition of our common stock in an amount equal to the excess of the amount realized on such disposition over the Electing Holder's adjusted tax basis in the common stock. Such gain or loss will be treated as long-term capital gain or loss if the Electing Holder's holding period in the common stock is greater than one year at the time of the sale, exchange or other disposition. Long-term capital gains of U.S. Individual Holders currently are taxable at a maximum rate of 15% (through 2012). An Electing Holder's ability to deduct capital losses is subject to certain limitations. Any gain or loss generally will be treated as U.S.-source gain or loss for U.S. foreign tax credit limitation purposes.

Taxation of U.S. Holders Making a "Mark-to-Market" Election

Making the Election. Alternatively, if, as is anticipated, our common stock is treated as "marketable stock," a U.S. Holder would be allowed to make a "mark-to-market" election with respect to the common stock, provided the U.S. Holder completes and files IRS Form 8621 in accordance with the relevant instructions and related Treasury Regulations. The common stock will be treated as "marketable stock" for this purpose if it is "regularly traded" on a "qualified exchange or other market." The common stock will be "regularly traded" on a qualified exchange or other market for any calendar year during which it is traded (other than in de minimis quantities) on at least 15 days during each calendar quarter. A "qualified exchange or other market" means either a U.S. national securities exchange that is registered with the SEC, the NASDAQ, or a foreign securities exchange that is regulated or supervised by a governmental authority of the country in which the market is located and which satisfies certain regulatory and other requirements. We believe that the Nasdaq Global Select Market should be treated as a "qualified exchange or other market" for this purpose. However, it should be noted that a separate mark-to-market election would need to be made with respect to each of our subsidiaries which is treated as a PFIC. The stock of these subsidiaries is not expected to be "marketable stock." Therefore, a "mark-to-market" election is not expected to be available with respect to these subsidiaries.

Current Taxation and Dividends. If the "mark-to-market" election is made, the U.S. Holder generally would include as ordinary income in each taxable year the excess, if any, of the fair market value of the common stock at the end of the taxable year over such U.S. Holder's adjusted tax basis in the common stock. The U.S. Holder would also be permitted an ordinary loss in respect of the excess, if any, of the U.S. Holder's adjusted tax basis in its common stock over its fair market value at the end of the taxable year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. Any income inclusion or loss under the preceding rules should be treated as gain or loss from the sale of common stock for purposes of determining the source of the income or loss. Accordingly, any such gain or loss generally should be treated as U.S.-source income or loss for U.S. foreign tax credit limitation purposes. A U.S. Holder's tax basis in his common stock would be adjusted to reflect any such income or loss amount. Distributions by us to a U.S. Holder who has made a mark-to-market election generally will be treated as discussed above under "Taxation – U.S. United States Federal Income Taxation of U.S. Holders – Distributions."

Sale, Exchange or Other Disposition. Gain realized on the sale, exchange, redemption or other disposition of the common stock would be treated as ordinary income, and any loss realized on the sale, exchange, redemption or other disposition of the common stock would be treated as ordinary loss to the extent that such loss does not exceed the net mark-to-market gains previously included in income by the U.S. Holder. Any loss in excess of such previous inclusions would be treated as a capital loss by the U.S. Holder. A U.S. Holder's ability to deduct capital losses is subject to certain limitations. Any such gain or loss generally should be treated as U.S.-source income or loss for U.S. foreign tax credit limitation purposes.

Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election

Finally, a U.S. Holder who does not make either a QEF election or a "mark-to-market" election, or a Non-Electing Holder, would be subject to special rules, or the Default PFIC Regime, with respect to (1) any excess distribution (i.e., the portion of any distributions received by the Non-Electing Holder on the common stock in a taxable year in excess of 125% of the average annual distributions received by the Non-Electing Holder in the three preceding taxable years, or, if shorter, the Non-Electing Holder's holding period for the common stock), and (2) any gain realized on the sale, exchange, redemption or other disposition of the common stock.

Under the Default PFIC Regime:

the excess distribution or gain would be allocated ratably over the Non-Electing Holder's aggregate holding period for the common stock;

the amount allocated to the current taxable year and any taxable year before we became a PFIC would be taxed as ordinary income; and

the amount allocated to each of the other taxable years would be subject to tax at the highest rate of tax in effect for the applicable class of taxpayer for that year, and an interest charge for the deemed tax deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

Any distributions other than "excess distributions" by us to a Non-Electing Holder will be treated as discussed above under "Taxation – U.S. United States Federal Income Taxation of U.S. Holders – Distributions."

These penalties would not apply to a pension or profit sharing trust or other tax-exempt organization that did not borrow funds or otherwise utilize leverage in connection with its acquisition of the common stock. If a Non-Electing Holder who is an individual dies while owning the common stock, such Non-Electing Holder's successor generally would not receive a step-up in tax basis with respect to the common stock.

U.S. Federal Income Taxation of "Non-U.S. Holders"

A beneficial owner of common stock that is not a U.S. Holder is referred to herein as a "Non-U.S. Holder."

Dividends on Common Stock

Non-U.S. Holders generally will not be subject to U.S. federal income tax or withholding tax on dividends received from us with respect to our common stock, unless that income is effectively connected with a trade or business conducted by the Non-U.S. Holder in the United States. If the Non-U.S. Holder is entitled to the benefits of a U.S. income tax treaty with respect to those dividends, that income is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States.

Sale, Exchange or Other Disposition of Common Stock

Non-U.S. Holders generally will not be subject to U.S. federal income tax or withholding tax on any gain realized upon the sale, exchange or other disposition of our common stock, unless:

the gain is effectively connected with a trade or business conducted by the Non-U.S. Holder in the United States. If the Non-U.S. Holder is entitled to the benefits of a U.S. income tax treaty with respect to that gain, that gain is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States; or

the Non-U.S. Holder is an individual who is present in the United States for 183 days or more during the taxable year of disposition and other conditions are met.

If the Non-U.S. Holder is engaged in a U.S. trade or business for U.S. federal income tax purposes, the income from the common stock, including dividends and the gain from the sale, exchange or other disposition of the stock that is effectively connected with the conduct of that trade or business will generally be subject to U.S. federal income tax in the same manner as discussed in the previous section relating to the taxation of U.S. Holders. In addition, in the case of a corporate Non-U.S. Holder, the earnings and profits of such Non-U.S. Holders that are attributable to effectively connected income, subject to certain adjustments, may be subject to an additional branch profits tax at a rate of 30%, or at a lower rate as may be specified by an applicable U.S. income tax treaty.

Backup Withholding and Information Reporting

In general, dividend payments, or other taxable distributions, made within the United States to you will be subject to information reporting requirements. In addition, such payments will be subject to backup withholding tax if you are a non-corporate U.S. Holder and you:

fail to provide an accurate taxpayer identification number;

are notified by the Internal Revenue Service, or IRS, that you have failed to report all interest or dividends required to be shown on your U.S. federal income tax returns; or

in certain circumstances, fail to comply with applicable certification requirements.

Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding by certifying their status on IRS Form W-8BEN, W-8ECI or W-8IMY, as applicable.

If you sell your common stock to or through a U.S. office of a broker, the payment of the proceeds is subject to both U.S. backup withholding and information reporting unless you certify that you are a non-U.S. person, under penalties of perjury, or you otherwise establish an exemption. If you sell your common stock through a non-U.S. office of a non-U.S. broker and the sales proceeds are paid to you outside the United States, then information reporting and backup withholding generally will not apply to that payment. However, U.S. information reporting requirements, but not backup withholding, will apply to a payment of sales proceeds, even if that payment is made to you outside the United States, if you sell your common stock through a non-U.S. office of a broker that is a U.S. person or has some other contacts with the United States. Backup withholding tax is not an additional tax. Rather, you generally may obtain a refund of any amounts withheld under backup withholding rules that exceed your U.S. federal income tax liability by filing a refund claim with the IRS.

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our risk management policy

Our primary market risks relate to adverse movements in freight rates in the product tanker market and in the Handymax and Panamax sectors of the drybulk market. In 2008, we began to implement our strategy of entering into long term period charters (either time or bareboat). As of the date of this annual report, we have eight vessels on long term period charters with duration of more than one year. Three of our drybulk vessels are on period charters with a duration of less than one year. Two of our tankers have spot market exposure. We believe that by slightly deviating from our long term charter policy we will participate in an upside of the product tanker market.

Our policy is to continuously monitor our exposure to other business risks, including the impact of changes in interest rates, currency rates, and bunker prices on earnings and cash flows. We assess these risks and, when appropriate, enter into derivative contracts with credit-worthy counter parties to minimize our exposure to the risks. With regard to bunker prices, as our employment policy for our vessels has been and is expected to continue to be with a high percentage of our fleet on period employment, we are not directly exposed with respect to those vessels to increases in bunker fuel prices, as these are the responsibility of the charterer under period charter arrangements.

Interest rate risk

We are subject to market risks relating to changes in interest rates because we have floating rate debt outstanding under our loan agreements on which we pay interest based on LIBOR, or cost of funds for certain banks, plus a margin. In order to manage our exposure to changes in interest rates due to this floating rate indebtedness, we enter into interest rate swap agreements. Set forth below is a table of our interest rate swap arrangements as of December 31, 2009 and 2010 (in thousands of U.S. Dollars).

Counterparty	SWAP Number (Nr)	Notional Amount December 31, 2010	Period	Effective Date	Interest Rate Payable	Fair Value - Liability December 31, 2009 December 31, 2010	
HSH NORDBANK	1	\$8,654	2 years	December 12, 2008	4.80 %	\$(444)	\$(53)
HSH NORDBANK	2	\$8,654	2 years	December 12, 2008	4.80 %	\$(444)	\$(53)
HSH NORDBANK	3	\$8,654	2 years	December 12, 2008	4.80 %	\$(444)	\$(53)
RBS	4	\$10,000	7 years	September 30, 2006	4.23 %	\$(907)	\$(828)
RBS	5	\$10,000	7 years	September 30, 2006	4.11 %	\$(869)	\$(799)
EGNATIA	6	\$10,000	7 years	July 3, 2006	4.76 %	\$(1,090)	\$(1,072)
HSH NORDBANK	7	\$6,153	5 years	March 27, 2008	4.60 %	\$(620)	\$(415)
HSH NORDBANK	8	\$10,332	5 years	March 27, 2008	4.60 %	\$(320)	\$(725)
EMPORIKI	9	\$20,000	7 years	May 15, 2008	10.85 %	\$(5,975)	\$(4,950)
HSH NORDBANK	10	\$11,599	7 years	July 15, 2008	5.55 %	\$(1,316)	\$(1,966)
HSH NORDBANK	11	\$14,356	4 years	June 28, 2010	4.73 %	\$(921)	\$(1,528)
DVB	12	\$30,586	3 years	March, 19, 2009	2.095 %	\$(453)	\$(496)
						\$(13,803)	\$(12,938)

SWAPS Nr 1,2,3,11,12 - Under these SWAP agreements, we pay a fixed rate and we receive variable three month LIBOR. SWAPS Nr 1, 2 and 3 expired in January 2011.

SWAPS Nr 4,5 - Under these SWAP agreements, for the first year (2006-2007) we paid RBS a fixed rate of 4.23% and 4.11% respectively. From the second year onwards we pay a fixed rate of 4.23% and 4.11% respectively plus a coupon equal to three times the difference between 0.08% and the difference of the 10 year U.S. Dollar swap rate and the two year U.S. Dollar swap rate for the payment period (quarter) in question, plus the coupon of the previous payment period (quarter). The coupon of the previous payment period is essentially the same formula calculated for the previous payment period (quarter). The coupon payments are capped at 10.25%. We receive from RBS variable three month LIBOR.

SWAP Nr 6 - Under this SWAP agreement, we paid Egnatia a fixed rate of 4.70% for the first payment period (quarter) in 2006. From the second quarter onwards we pay a fixed rate of 4.70% plus a coupon equal to three times the difference between 0.05% and the difference of the 10 year U.S. Dollar swap rate and the two year U.S. Dollar swap rate for the payment period (quarter) in question, plus the coupon of the previous payment period (quarter). The coupon of the previous payment period is essentially the same formula calculated for the previous payment period (quarter). The coupon payment is capped at 8.80%. We receive from Egnatia variable three month LIBOR.

SWAPS Nr 7, 8 – Under these SWAP agreements, we pay a fixed rate of the three-month U.S. Dollar LIBOR multiplied with the factor 0.95 per annum if the three month U.S. Dollar LIBOR is between 1.50% and 4.84%. In case the U.S. Dollar LIBOR is lower than 1.50% or higher 4.84%, we will pay a fixed rate of 4.60% per annum for that period. We receive from HSH Nordbank variable three month LIBOR.

SWAP Nr 9 – Under this SWAP agreement, we received an upfront amount of \$1.5 million. During the first year, we received a fixed rate of 5.25% and paid a fixed rate of 5.50%. From the second year, we receive quarterly a fixed rate of 5.25% and we pay a rate of 5.10%, if either of two conditions are met: i) the difference between the 10 year Euro swap rate and the 2 year Euro swap rate is greater or equal than -0.15% and ii) the six month USD LIBOR is between 1.00% and 6.00%. Otherwise, we pay 10.85% less 5.75% multiplied by a cushion consisting of the number of days that either of the above two conditions are not met, divided by the total number of days of the period multiplied by the previous quarter's cushion. The first cushion, as of the end of the first year, was set to 1. During the third and fourth quarter of 2009, the six month USD LIBOR has been consistently below 1% and the cushion has become zero. As a result we will be paying 10.85% until the instrument's maturity date.

SWAP Nr 10 - Under this SWAP agreement, we receive the three month LIBOR and pay 5.55%, less 2.5% multiplied by the quotient of the number of days the three month LIBOR and the 10 year swap rate falls within certain fixed ranges.

As of December 31, 2010, our total bank indebtedness was \$343.7 million, which after excluding unamortized financing fees of \$4.0 million amounts to \$339.7 million, of which \$148.9 million was covered by the interest rate swap agreements described above. As set forth in the above table, as of December 31, 2010, we paid fixed rates ranging from 2.095% to 10.85% and received floating rates on the SWAPs that are based on three month LIBOR as well as a fixed rate of 5.25% from Swap Nr 10. As of December 31, 2010 and March 31, 2011, our interest rate swap agreements are, on an average basis, above the prevailing three month LIBOR rates over which our loans are priced due to the steep reduction in prevailing interest rates during 2009 that continued into 2010. Accordingly, the effect of these interest rate swap agreements in 2010 and the first three months of 2011 has been to increase our loss on financial instruments.

Based on the amount of our outstanding indebtedness as of December 31, 2010 that is not covered by interest swap arrangements as of December 31, 2010, a hypothetical one percentage point increase in the three month U.S. Dollar LIBOR would increase our interest rate expense for 2011, on an annualized basis, by approximately \$2.26 million. We have not and do not intend to enter into interest rate swaps for speculative purposes.

Foreign exchange rate fluctuation

We generate all of our revenues in U.S. Dollars but incur certain expenses in currencies other than U.S. Dollars, mainly Euro. During 2010, approximately 18% of our expenses were in Euro and approximately 2% were in other currencies than the U.S. Dollar or Euro. For accounting purposes, expenses incurred in other currencies are converted into U.S. Dollars at the exchange rate prevailing on the date of each transaction. We have not hedged currency exchange risks associated with our expenses and our operating results could be adversely affected as a result. We constantly monitor the U.S. Dollar exchange rate and we try to achieve the most favorable exchange rates from the financial institutions we work with.

Based on our total expenses for the year ended December 31, 2010, and using as an exchange rate the 2010 average exchange rate of \$1.3269 / 1 Euro, a 5% decrease in the exchange rate to \$1.2606 / 1 Euro, would result in an expense saving of approximately \$0.83 million.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not Applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

As of December 31, 2010, we were in breach of certain loan covenants. For further information, please see "Item 5 – Operating and Financial Review And Prospects - Tabular Disclosure of Contractual Obligations – (1) Debt Facilities". Despite these breaches, neither we nor any of our subsidiaries have been subject to a material default in the payment of principal, interest, a sinking fund or purchase fund installment or any other material default that was not cured within 30 days.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not Applicable.

ITEM 15. CONTROLS AND PROCEDURES

a) Disclosure Controls and Procedures.

Management, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15(e) or 15d-15(e) promulgated under the Securities Exchange Act of 1934 (the "Exchange Act"), as of the end of the period covered by this annual report (as of December 31, 2010).

The term disclosure controls and procedures are defined under SEC rules as controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of December 31, 2010.

b) Management's Annual Report on Internal Control over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) and 15d-15(f) promulgated under the Exchange Act.

Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of Company's management and directors; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management with the participation of our Chief Executive Officer and Chief Financial Officer assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2010. In making this assessment, the Company used the control criteria framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, or COSO, published in its report entitled Internal Control-Integrated Framework. As a result of its assessment, the Chief Executive Officer and Chief Financial Officer concluded that the Company's internal controls over financial reporting are effective as of December 31, 2010.

c) Attestation Report of the Registered Public Accounting Firm.

This annual report does not contain an attestation report of the company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the company's registered public accounting firm since under the SEC adopting release implementing the Dodd-Frank Act, companies that are non-accelerated filers are exempt from including auditor attestation reports in their Form 20-Fs.

d) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the period covered by this annual report that have materially effected or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

We have established an audit committee composed of three members that is responsible for reviewing our accounting controls and recommending to the Board of Directors the engagement of our outside auditors. Each member is an independent director under the corporate governance rules of the NASDAQ Global Select Market. The members of the audit committee are Messrs. Gibbs, Hamboullas and Economou. Mr. Gibbs meets the qualifications of an audit committee financial expert.

ITEM 16B. CODE OF ETHICS

The Board of Directors has adopted a Corporate Code of Business Ethics and Conduct that applies to all employees, directors and officers, that complies with applicable guidelines issued by the SEC. The finalized Code of Ethics has been approved by the Board of Directors and was distributed to all employees, directors and officers. We will also provide any person a hard copy of our code of ethics free of charge upon written request. Shareholders may direct their requests to the attention of Ms. Eirini Alexandropoulou at the Company's registered address and phone numbers.

ITEM 16C. PRINCIPAL AUDITOR FEES AND SERVICES

Aggregate fees billed to the Company for the years ended December 2009 and 2010 represent fees billed by the Company's principal accounting firm, Deloitte, the other member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, "Deloitte & Touche").

U.S. Dollars in thousands,	Year Ended	
	2009	2010
Audit Fees	812	328
Tax Fees*	13	13
Total Fees	825	341

* Includes fees for PFIC Tax Services

Our audit committee pre-approves all audit, audit-related and non-audit services not prohibited by law to be performed by our independent auditors and associated fees prior to the engagement of the independent auditor with respect to such services.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Not applicable.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE

We have certified to Nasdaq that our corporate governance practices are in compliance with, and are not prohibited by, the laws of the Republic of the Marshall Islands. Therefore, we are exempt from many of Nasdaq's corporate governance practices other than the requirements regarding the disclosure of a going concern audit opinion, submission of a listing agreement, notification to Nasdaq of non-compliance with Nasdaq corporate governance practices, prohibition on disparate reduction or restriction of shareholder voting rights, and the establishment of an audit committee satisfying Nasdaq Listing Rule 5605(c)(3) and ensuring that such audit committee's members meet the independence requirement of Listing Rule 5605(c)(2)(A)(ii). The practices we follow in lieu of Nasdaq's corporate governance rules applicable to U.S. domestic issuers are as follows:

As a foreign private issuer, we are not required to hold regularly scheduled board meetings at which only independent directors are present.

In lieu of obtaining shareholder approval prior to the issuance of designated securities, we will comply with provisions of the Marshall Islands Business Corporations Act, which allows the Board of Directors to approve share issuances.

As a foreign private issuer, we are not required to solicit proxies or provide proxy statements to Nasdaq pursuant to Nasdaq corporate governance rules or Marshall Islands law. Consistent with Marshall Islands law and as provided in our bylaws, we will notify our shareholders of meetings between 15 and 60 days before the meeting. This notification will contain, among other things, information regarding business to be transacted at the meeting. In addition, our bylaws provide that shareholders must give us between 120 and 180 days advance notice to properly introduce any business at a meeting of shareholders.

Other than as noted above, we are in compliance with all other Nasdaq corporate governance standards applicable to U.S. domestic issuers.

F-1

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Top Ships Inc., Majuro, Republic of the Marshall Islands

We have audited the accompanying consolidated balance sheets of Top Ships Inc. and subsidiaries (the "Company") as of December 31, 2009 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 18. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Top Ships Inc. and subsidiaries as of December 31, 2009 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects, the information set forth therein.

The accompanying consolidated financial statements for the years ended December 31, 2009 and 2010, have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3 to the consolidated financial statements, the Company's inability to comply with financial covenants under its current loan agreements as of December 31, 2009 and 2010 and its negative working capital position raise substantial doubt about its ability to continue as a going concern. Management's plans concerning these matters are discussed in Note 3 to the consolidated financial statements. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

1. Basis of Presentation and General Information:

The accompanying consolidated financial statements include the accounts of Top Ships Inc. (formerly Top Tankers Inc. and Ocean Holdings Inc.) and its wholly owned subsidiaries (collectively the "Company"). Ocean Holdings Inc. was formed on January 10, 2000, under the laws of Marshall Islands, was renamed to Top Tankers Inc. and Top Ships Inc. in May 2004 and December 2007 respectively.

Top Ships Inc. is the sole owner of all outstanding shares of the following subsidiaries with vessels in operations, vessels under lease and other active companies as of December 31, 2010. The following list is not exhaustive as the Company has other subsidiaries relating to vessels that have been sold.

	Shipowning Companies with vessels in operations at December 31, 2010	Date of Incorporation	Country of Incorporation	Vessel
1	Ilisos Shipping Company Limited ("Ilisos")	April 2005	Marshall Islands	Ioannis P (acquired November 2005)
2	Amalfi Shipping Company Limited ("Amalfi")	July 2007	Marshall Islands	Amalfi (acquired December 2007) (Note 11)
3	Jeke Shipping Company Limited ("Jeke")	July 2007	Liberia	Voc Gallant (acquired February 2008) (Note 10, 11)
4	Japan I Shipping Company Limited ("Japan I")	August 2007	Liberia	Pepito (acquired March 2008) (Note 10)
5	Japan II Shipping Company Limited ("Japan II")	August 2007	Liberia	Astrale (acquired May 2008) (Note 10)
6	Japan III Shipping Company Limited ("Japan III")	August 2007	Liberia	Cyclades (acquired December 2007)
7	Warhol Shipping Company Limited ("Warhol")	July 2008	Liberia	Miss Marilena (delivered February 2009) (Note 9, 10)
8	Lichtenstein Shipping Company Limited ("Lichtenstein")	July 2008	Liberia	Lichtenstein (delivered February 2009) (Note 9, 10)
9	Banksy Shipping Company Limited ("Banksy")	July 2008	Liberia	Ionian Wave (delivered March 2009) (Note 9, 10)
10	Indiana R Shipping Company Limited ("Indiana R")	July 2008	Liberia	Tyrrhenian Wave (delivered March 2009) (Note 9, 10)
11	Britto Shipping Company Limited ("Britto")	July 2008	Liberia	Britto (delivered May 2009) (Note 9, 10)

Edgar Filing: TOP SHIPS INC. - Form 20-F

12	Hongbo Shipping Company Limited ("Hongbo")	July 2008	Liberia	Hongbo (delivered August 2009) (Note 9,10)
	Shipowning Companies with vessels under lease at December 31, 2010	Date of Incorporation	Country of Incorporation	Vessel
13	Mytikas Shipping Company Limited ("Mytikas")	February 2004	Marshall Islands	Delos (lease started October, 1, 2010) (Note 6)
	Other Companies	Date of Incorporation	Country of Incorporation	Activity
14	Top Tankers (U.K.) Limited	January 2005	England and Wales	Representative office in London
15	TOP Tanker Management Inc.	May 2004	Marshall Islands	Management Company

F-7

The Company is an international provider of worldwide seaborne crude oil and petroleum products transportation services and of drybulk transportation services, through the ownership and operation of the vessels mentioned above.

During 2008, 2009, and 2010, one, three and three charterers individually accounted for more than 10% of the Company's revenues as follows:

Charterer	Year Ended December		
	2008	2009	2010
A	17%	22%	
B		18%	19%
C			17%
D		14%	16%

Management of Company Vessels

As of December 31 2010, the Company had outsourced to Central Mare, a related party controlled by the family of the Company's Chief Executive Officer, all operational, technical and commercial functions relating to the chartering and operation of Company vessels (except M/T Delos), pursuant to a letter agreement concluded between Central Mare and the Company and management agreements concluded between Central Mare and the Company's vessel-owning subsidiaries on July 1, 2010. In relation to M/T Delos, as of December 31, 2010, the Company had outsourced technical management and crewing to TMS Tankers, a related party, whereas operational monitoring of the vessel was outsourced to Central Mare, both agreements effective from October 1, 2010. The Company plans to transfer full management of M/T Delos to Central Mare during the second quarter of 2011 (Note 5).

Up to July 1, 2010, TOP Tanker Management Inc. was responsible for all of the chartering, operational and technical management of the Company's fleet for a fixed monthly fee per vessel.

Top Tanker Management had been subcontracting the day to day technical management of certain vessels to unaffiliated ship management companies (collectively the "sub-managers"). The sub-managers provided day to day operational and technical services to the Company's vessels at a fixed monthly fee per vessel. The last agreement with V. Ships Management Limited was terminated on July 10, 2010 and the agreement with Interiorient Maritime Enterprises Inc. was also terminated on June 30, 2010.

As of December 31, 2009 and 2010 the amount due to the sub-managers totaled \$306 and \$655 respectively and is included in Accounts Payable in the accompanying consolidated balance sheets.

As of December 31, 2010 the net amount due to Central Mare was \$1,797 and is included in Due to related parties, which are separately presented in the accompanying December 31, 2010 consolidated balance sheets (Note 5).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

1. Basis of Presentation and General Information - (continued):

Management fees paid to related parties and management fees paid to third parties are being presented separately in the accompanying consolidated statements of operations and are summarized as follows:

	December 31, 2008	December 31, 2009	December 31, 2010
Management Fees –Related Parties			
Central Mare Inc (Note 5)			2,993
Titan Owning Company Ltd (TMS Tankers) (Note 5)			138
Total	-	-	3,131
Management Fees –Third Parties			
ST Shipping and Transport Pte. limited			9
G.I. Ship Management Private Limited	223		
Hanseatic Managing Owners & Operators	2		
Interorient	138	92	51
V. Ships Management limited	796	327	99
Total	1,159	419	159

2. Significant Accounting Policies:

- (a) Principles of Consolidation: The accompanying consolidated financial statements have been prepared in accordance with U.S generally accepted accounting principles ("US GAAP") and include the accounts and operating results of Top Ships Inc. and its wholly-owned subsidiaries referred to in Note 1. Intercompany balances and transactions have been eliminated in consolidation.
- (b) Use of Estimates: The preparation of consolidated financial statements in conformity with U.S generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Critical estimates mainly include impairment of vessels, vessel useful lives and residual values, provision for doubtful accounts and fair values of derivative instruments.
- (c) Foreign Currency Translation: The Company's functional currency is the U.S. Dollar because all vessels operate in international shipping markets, and therefore primarily transact business in U.S. Dollars. The Company's books of accounts are maintained in U.S. Dollars. Transactions involving other currencies during the year are converted into U.S. Dollars using the exchange rates in effect at the time of the transactions. At the balance sheet dates, monetary assets and liabilities, which are denominated in other currencies, are translated to reflect the year-end exchange rates. Resulting gains or losses are reflected in General and administrative expenses in the accompanying consolidated statements of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

(d)Cash and Cash Equivalents: The Company considers highly liquid investments such as time deposits and certificates of deposit with an original maturity of three months or less to be cash equivalents.

(e)Restricted Cash: The Company considers amounts that are pledged, blocked, held as cash collateral, required to be maintained with a specific bank or be maintained by the Company as an overall cash position as part of a loan agreement, as restricted (Notes 6 and 12).

(f)Trade Accounts Receivable, net: The amount shown as Trade Accounts Receivable, net at each balance sheet date, includes estimated recoveries from charterers for hire, freight and demurrage billings, net of a provision for doubtful accounts. At each balance sheet date, all potentially uncollectible accounts are assessed individually, combined with the application of a historical recoverability ratio, for purposes of determining the appropriate provision for doubtful accounts. Provision for doubtful accounts at December 31, 2009 and 2010 totaled \$1,949 and \$1,389, and is summarized as follows:

	Provision for doubtful accounts
Balance, December 31, 2007	801
—Additions	3,866
— Reversals / write-offs	(1,392)
Balance, December 31, 2008	3,275
—Additions	1,939
— Reversals / write-offs	(3,265)
Balance, December 31, 2009	1,949
— Reversals / write-offs	(560)
Balance, December 31, 2010	1,389

(g)Insurance Claims: Insurance claims, relating mainly to crew medical expenses and hull and machinery incidents are recorded upon collection or agreement with the relevant party of the collectible amount when collectability is probable.

(h)Inventories: Inventories consist of bunkers, lubricants and consumable stores which are stated at the lower of cost or market. Cost, which consists of the purchase price, is determined by the first in, first out method.

(i)Vessel Cost: Vessels are stated at cost, which consists of the contract price, pre-delivery costs incurred during the construction of newbuildings, capitalized interest and any material expenses incurred upon acquisition (improvements and delivery costs). Subsequent expenditures for conversions and major improvements are also capitalized when they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Repairs and maintenance are charged to expense as incurred and are included in Vessel operating expenses in the accompanying consolidated statements of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

(j) Impairment of Long-Lived Assets: The Company reviews its long-lived assets held and used for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the Company evaluates the asset for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset. In this respect, management regularly reviews the carrying amount of the vessels in connection with the estimated recoverable amount for each of the Company's vessels.

(k) Vessel Depreciation: Depreciation is calculated using the straight-line method over the estimated useful life of the vessels, after deducting the estimated salvage value. Each vessel's salvage value is equal to the product of its lightweight tonnage and estimated scrap rate. Management estimates the useful life of the Company's vessels to be 25 years from the date of initial delivery from the shipyard. Second hand vessels are depreciated from the date of their acquisition through their remaining estimated useful life. When regulations place limitations over the ability of a vessel to trade on a worldwide basis, its useful life is adjusted at the date such regulations are adopted.

(l) Other Fixed Assets, Net: Other fixed assets, net consists of furniture, office equipment, cars and leasehold improvements, stated at cost, which consists of the purchase / contract price less accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful life of the assets, while leasehold improvements are depreciated over the lease term, as presented below:

Description	Useful Life (years)
Leasehold improvements	Until the end of the lease term (April 2018)
Cars	6
Office equipment	5
Furniture and fittings	5
Computer equipment	3

In September 2010, the Company agreed to revert occupancy in certain areas of the leased office space in Maroussi, by the end of April 2011. As a result of this agreement we have made a revision in the useful life of certain leasehold improvements that would have been amortized over the life of the lease. The revision in useful life of these assets resulted in an accelerated depreciation of \$565 included in the statement of operations.

(m) Accounting for Dry-Docking Costs: All dry-docking costs are accounted for under the direct expense method, under which they are expensed as incurred and are reflected separately in the accompanying consolidated statements of operations.

(n) Sale and Leaseback Transactions: The gains on sale of vessel sale and leaseback transactions are deferred and amortized to income over the lease period.

F-11

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

- (o) Financing Costs: Fees incurred and paid to the lenders for obtaining new loans or refinancing existing ones are recorded as a contra to debt and such fees are amortized to interest expense over the life of the related debt using the effective interest method. Unamortized fees relating to loans repaid or refinanced are expensed when a repayment or refinancing is made and charged to interest and finance costs.
- (p) Convertible Debt: The Company evaluates debt securities ("Debt") for beneficial conversion features. A beneficial conversion feature is present when the conversion price per share is less than the market value of the common stock at the commitment date. The intrinsic value of the feature is then measured as the difference between the conversion price and the market value multiplied by the number of shares into which the Debt is convertible and is recorded as debt discount with an offsetting amount increasing additional paid-in-capital. The debt discount is accreted to interest expense over the term of the Debt with any unamortized discount recognized as interest expense upon conversion of the Debt. The total intrinsic value of the feature is limited to the proceeds allocated to the Debt instrument.
- (q) Pension and Retirement Benefit Obligations—Crew: The ship-owning companies included in the consolidation employ the crew on board under short-term contracts (usually up to nine months) and accordingly, they are not liable for any pension or post retirement benefits.
- (r) Staff leaving Indemnities – Administrative personnel: The Company's employees are entitled to termination payments in the event of dismissal or retirement with the amount of payment varying in relation to the employee's compensation, length of service and manner of termination (dismissed or retired). Employees who resign, or are dismissed with cause are not entitled to termination payments. The Company's liability on an actuarially determined basis, at December 31, 2009 and 2010 amounted to \$266 and \$32, respectively.
- (s) Accounting for Revenue and Expenses: Revenues are generated from bareboat charter, time charter, voyage charter agreements and pool arrangements. A bareboat charter is a contract in which the vessel owner provides the vessel to the charterer for a fixed period of time at a specified daily rate, which is generally payable monthly in advance, and the customer generally assumes all risk and costs of operation during the charter term. A time charter is a contract for the use of a vessel for a specific period of time and a specified daily charter hire rate, which is generally payable monthly in advance. Profit sharing represents the excess between an agreed daily base rate and the actual rate generated by the vessel every quarter, if any, and is settled and recorded on a quarterly basis. Under a voyage charter, revenue, including demurrage and associated voyage costs, with the exception of port expenses which are recorded as incurred, are recognized on a proportionate performance method over the duration of the voyage. A voyage is deemed to commence upon the latest between the completion of discharge of the vessel's previous cargo and the charter party date of the current voyage and is deemed to end upon the completion of discharge of the current cargo. Demurrage income represents payments by the charterer to the Company when loading or discharging time exceeded the stipulated time in the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

voyage charter. Vessel operating expenses are expensed as incurred. Unearned revenue represents cash received prior to year-end related to revenue applicable to periods after December 31 of each year. Under a pool arrangement, the pool charters-in a vessel on a time charter basis but the daily charter hire is not fixed but it depends on the total return that the pool is able to achieve by operating all its vessels in the spot market.

When vessels are acquired with time charters attached and the rates on such charters are below market on the acquisition date, the Company allocates the total cost between the vessel and the fair value of below market time charter based on the relative fair values of the vessel and the liability acquired. The fair value of the attached time charter is computed as the present value of the difference between the contractual amount to be received over the term of the time charter and management's estimates of the market time charter rate at the time of acquisition. The fair value of below market time charter is amortized over the remaining period of the time charter as an increase to revenues (Note 11).

As is common in the drybulk and tanker shipping industries, we pay commissions to ship brokers associated with arranging our charters. The commissions that we pay range from 2% to 7.5% of the total daily charter hire rate of each charter.

(t) Stock Incentive Plan: All share-based compensation related to the grant of restricted and/or unrestricted shares provided to employees and to non-employee directors, for their services as directors, is included in General and administrative expenses in the consolidated statements of operations. The shares that do not contain any future service vesting conditions are considered vested shares and recognized in full on the grant date. The shares that contain a time-based service vesting condition are considered non-vested shares on the grant date and recognized on a straight-line basis over the vesting period. The shares, vested and non-vested are measured at fair value, which is equal to the market value of the Company's common stock on the grant date.

(u) Earnings / (Loss) per Share: Basic earnings per share are computed by dividing net income or loss available to common stockholders' by the weighted average number of common shares deemed outstanding during the year. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised. For purposes of calculating diluted earnings per share the denominator of the diluted earnings per share calculation includes the incremental shares assumed issued under the treasury stock method weighted for the period the non-vested shares were outstanding, with the exception of the 1,472,438 shares, granted to the Company's CEO, which will vest in the event of change of control. Consequently, those shares are excluded from the remaining non-vested shares (Note 16). The dilutive effect of convertible debt outstanding shall be reflected in diluted EPS by application of the if-converted method. In applying the if-converted method, conversion shall not be assumed for purposes of computing diluted EPS if the effect would be antidilutive.

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

(v) Related Parties: The Company considers as related parties the affiliates of the Company; entities for which investments are accounted for by the equity method; principal owners of the Company; its management; members of the immediate families of principal owners of the Company; and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests. An Affiliate is a party that, directly or indirectly through one or more intermediaries, controls, is controlled by, or has common control with the Company. Control is the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an enterprise through ownership, by contract and otherwise. Immediate Family is family members whom a principal owner or a member of management might control or influence or by whom they might be controlled or influenced because of the family relationship. Management is the persons who are responsible for achieving the objectives of the Company and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management normally includes members of the board of directors, the CEO, the CFO, Vice President and CTO in charge of principal business functions and other persons who perform similar policy making functions. Persons without formal titles may also be members of management. Principal owners are owners of record or known beneficial owners of more than 10% of the voting interests of the Company.

(w) Derivatives and Hedging: The Company records every derivative instrument (including certain derivative instruments embedded in other contracts) in the balance sheet as either an asset or liability measured at its fair value, with changes in the derivatives' fair value recognized currently in earnings unless specific hedge accounting criteria are met. The Company has not applied hedge accounting for its derivative instruments during the periods presented.

The fair value of derivative liabilities was not adjusted for nonperformance risk as the Company, as one of the parties to a derivative transaction expects to be able to perform under the contractual terms of its derivative agreements, such as making cash payments at periodic net settlement dates or upon termination.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

2. Significant Accounting Policies - (continued):

(x) Segment Reporting: The Company has determined that it operates under two reportable segments, based on the way the Company's CEO reviews operating results, as a provider of international seaborne transportation services, carrying petroleum products and crude oil ("Tanker Fleet") and, drybulk commodities for the steel, electric utility, construction and agri-food industries ("Drybulk Fleet"). The accounting policies applied to the reportable segments are the same as those used in the preparation of the Company's consolidated financial statements.

The Company reports financial information and evaluates its operations by charter revenues and not by the length of ship employment for its customers (i.e., spot or time charters) or by geographical region as the charterer is free to trade the vessel worldwide and, as a result, the disclosure of geographic information is impracticable. The Company does not have discrete financial information to evaluate the operating results for each such type of charter. Although revenue can be identified for these types of charters, management cannot and does not identify expenses, profitability or other financial information for these charters.

(y) Recent Accounting Pronouncements: There are no recent accounting pronouncements that their adoption would have a material effect on the Company's consolidated financial statements in the current year or expected to have an impact on future years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2009 AND 2010

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

3. Going Concern:

As of December 31, 2009, the Company was in breach of loan covenants relating to EBITDA, overall cash position (minimum liquidity covenants), adjusted net worth, net asset value and asset cover of product tankers, with certain banks. As a result of these covenant breaches with all the banks, the Company has classified all its debt and financial instruments as current. The amount of long term debt and financial instruments that have been reclassified and presented together with current liabilities amounts to \$351,202 and \$9,916, respectively (Note 12).

As of December 31, 2010, the Company was in breach of loan covenants relating to EBITDA, overall cash position (minimum liquidity covenants), adjusted net worth, and asset cover, with certain banks. As a result of these covenant breaches and due to cross default provisions contained in all its bank facilities, the Company is in breach of all its loan facilities and has classified all its debt and financial instruments as current. The amount of long term debt and financial instruments that have been reclassified and presented together with current liabilities amounts to \$304,551 and \$4,125 respectively (Note 12).

The consolidated financial statements have been prepared assuming that the Company will continue as a going concern. Accordingly, the financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts the amounts and classification of liabilities, or any other adjustments that might result should the Company be unable to continue as a going concern, except for the current classification of debt and financial instruments.

Company cash flow for 2011 is expected to be lower than 2010 mainly due to the redelivery of the M/V Cyclades during the second quarter of 2011, from its present charterers where it earns a daily rate of \$54,250 to its new charterers where it will earn a daily rate of \$20,000. Based on Company projections for 2011, cash provided by operating activities is expected to amount to \$29,044 and is not sufficient to cover scheduled debt repayments as of December 31, 2010.

Cash flow could improve if actual charter rates during the year prove to be higher from the expected rates that we have used in our projections, thereby improving the revenues of the vessels that have spot market exposure, but this is a parameter outside Company control. Cash flow could also improve by deferring part of our debt repayments into future years or by releasing funds held under pledges. If the Company is unable to partly defer loan repayments and / or release funds held under pledges, it will examine the option of raising capital through equity and debt offerings or asset sales as a last resort. Given the high quality of assets and charters in the Company portfolio, the sale of a tanker vessel provides with a realistic last resort alternative to provide the Company with necessary liquidity.

As of the date of this report, discussions with certain lenders are already in progress and in certain cases cash flow has already improved. See Note 12 for a discussion of the progress with each lender.

4. Segment Reporting:

The following tables present segment results for the years ended December 31, 2008, 2009 and 2010 respectively:

Year ended December 31, 2008	Tanker Fleet	Drybulk Fleet	Unallocated (1)	Total
REVENUES:				
Revenues	163,995	71,590	21,795	257,380
EXPENSES:				
Voyage expenses	34,215	4,441	-	38,656
Charter hire expense	53,684	-	-	53,684
Amortization of deferred gain on sale and leaseback of vessels	(18,707)	-	-	(18,707)
Vessel operating expenses	56,272	10,842	-	67,114
Dry-docking costs	9,450	586	-	10,036
Vessel depreciation	13,867	18,797	-	32,664
Management fees-third parties	1,080	79	-	1,159
General and administrative expenses	22,474	7,856	(101)	30,229
Gain on sale of vessels	(21,347)	2,169	-	(19,178)
Operating income	13,007	26,820	21,896	61,723
Interest and finance costs	(11,888)	(13,876)	-	(25,764)
Segment income	1,119	12,944	21,896	35,959
Fair value change of financial instruments				(12,024)
Interest income				1,831
Other, net				(127)
Net Income				25,639

(1) Unallocated amounts relate to the drybulk vessels' amortization of the fair value of below market time charter contracts acquired of \$21,795, the management fees related to the management of third party vessels of \$16 less the foreign currency gains, net of \$85. These amounts are unallocated as they are not included in the financial information used by the chief operating decision maker to allocate the Company's resources.

(Expressed in thousands of United States Dollars – except share and per share data, unless otherwise stated)

5. Transactions with Related Parties:

(a)Pyramis Technical Co. S.A.: Pyramis Technical Co. S.A. is wholly owned by the father of the Company's Chief Executive Officer and has been responsible for the renovation of the Company's premises. As of December 31, 2009, the total contracted cost amounted to Euro 3,110 or \$4,487 (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009), out of which Euro 3,599 or \$5,193 (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009) was paid up to December 31, 2009 and is included in the Euro 3,701 or \$5,340 (based on the U.S. Dollar/Euro exchange rate as of December 31, 2009) renovation works. As of December 31, 2010, the total contracted cost amounted to Euro 3,185 or \$4,253 (based on the Dollar/Euro exchange rate as of December 31, 2010), out of which Euro 3,698 or \$4,940 (based on the Dollar/Euro exchange rate as of December 31, 2010) was paid up to December 31, 2010 and is included in the Euro 3,789 or \$5,059 (based on the Dollar/Euro exchange rate as of December 31, 2010) renovation works. The renovation works are included in Other fixed assets, net, which are separately presented in the accompanying December 31, 2010 consolidated balance sheet and were initially depreciated over the lease period, which is 12 years. In September 2010, the Company agreed to revert occupancy in certain areas of the leased office space in Maroussi, by the end of April 2011. As a result of this agreement we have made a revision in the useful life of certain leasehold improvements that would have been amortized over the life of the lease. The revision in useful life of these assets resulted in an accelerated depreciation of \$565 included in the statement of operations.

(b)Cardiff Marine Inc. ("Cardiff"): Both Cardiff and Sphinx Investment Corp. are controlled by Mr. George Economou who has been a related party since April 2008, when the Company privately placed \$7.3 million with various investors (Note 15). As of December 31, 2010, Sphinx Investment Corp. holds approximately 12.08% of the Company's outstanding common stock. Cardiff provides the Company with chartering and sale and purchase brokerage services. During the twelve months ended December 31, 2009 and 2010, Cardiff charged the Company \$862 and \$608 for chartering services, included in Voyage expenses. As of December 31, 2009 the amount due to Cardiff was \$82 out of which \$33 is included in Accounts Payable and \$49 is included in Accrued Liabilities. As of December 31, 2010 the amount due to Cardiff was \$155, out of which \$51 is included in Accounts Payable and \$104 is included in Accrued Liabilities. In 2010, Cardiff proceeded with an internal restructuring for the purpose of enhancing its efficiency and the quality of its ship-management services. As part of this restructuring TMS Dry and TMS Tankers were established as two different management companies to undertake the management of the fleet previously managed by Cardiff. TMS Dry and TMS Tankers utilize the same experienced personnel previously utilized by Cardiff. As a result, TMS Tankers, which is the manager of M/T Delos, is a related party management company due to its relation with Cardiff (see below (e)).

5. Transactions with Related Parties – (continued):

(c) Central Mare Inc. ("Central Mare") – Letter Agreement and Management Agreements: on May 12, 2010, the Company's Board of Directors agreed to outsource all of the commercial and technical management of the Company's vessels to Central Mare Inc., or Central Mare, a related party controlled by the family of the Company's Chief Executive Officer, on a timeline that was determined by its executive officers in consideration of the vessels' schedule. Since July 1, 2010 Central Mare has been performing all operational, technical and commercial functions relating to the chartering and operation of Company vessels, pursuant to a letter agreement concluded between Central Mare and Top Ships as well as management agreements concluded between Central Mare and our vessel-owning subsidiaries.

The Company pays a management fee of Euro 650 per day, per each vessel that is employed under a time charter or a voyage charter and a management fee of Euro 250 per day, per each vessel that is employed under a bareboat time charter. In addition, the management agreements provide for payment by the company to Central Mare of: (i) a fee of Euro 100 per day per vessel for services in connection with compliance with Section 404 of the Sarbanes-Oxley Act of 2002; (ii) Euro 500 for superintendent visits on board vessels, per vessel, for each day, per superintendent; (iii) chartering commission of 0.75% on all existing (as of July 1, 2010) freight, hire and demurrage revenues; (iv) chartering commission of 1.25% on all new (concluded after July 1, 2010) freight, hire and demurrage revenues; (v) a commission of 1.00% on all gross sale proceeds or purchase price paid for vessels; (vi) a quarterly fee of Euro 250 for services rendered by Central Mare in connection with the company's financial accounting services; (vii) a quarterly fee of Euro 80 for services in relation to the financial reporting requirements of the company under Securities and Exchange Commission and NASDAQ rules and regulations; (viii) a commission of 0.2% on derivative agreements and loan financing or refinancing; and (ix) an annual fee of Euro 10 per vessel, for the provision of information system related services.

Central Mare also provides commercial operations and freight collection services in exchange for a fee of Euro 90 per day, per vessel. Central Mare provides insurance services and obtains insurance policies for the vessels for a fee of 5.00% on the total insurance premiums, per vessel. Furthermore, if required, Central Mare will also handle and settle all claims arising out of its duties under the management agreements (other than insurance and salvage claims) in exchange for a fee of Euro 150 per person, per day of eight hours. Finally legal fees for claims and general corporate services incurred by Central Mare on behalf of the company will be payable to Central Mare at cost.
